Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified July 30, 2026 (full weekly refresh)

Full weekly research pass, superseding the Jul 29/30 light daily touches. Quant pillar recomputed on data through July 30. Iran War Risk cut hardest this cycle after resolving a direct contradiction between the two most recent daily touches — a real 2-3 day lull was overtaken when Iran's IRGC struck a US base in Jordan (Jul 28), the US retaliated, and the war widened to two new fronts (Iraq: 20 killed in US-Saudi strikes; Egypt: an unclaimed drone hit). Fed & Macro cut hard after independently verifying the July 28-29 FOMC directly against federalreserve.gov: a 9-3 hold with a rare 3-way hawkish dissent (first since Sept 2016) and no forward guidance from Chair Warsh, triggering a confirmed risk-off market reaction. CLARITY Act cut further across every window (its lowest reading yet) after pulling the Senate's own floor schedule directly, which confirmed no path before the Aug 7 recess — though real, still-unconfirmed Tillis-Gallego ethics progress kept the 3/6-month cuts smaller than that fact alone would suggest. Tokenization corrected upward after catching a recurring metric-mislabeling error (a total-RWA figure mistaken for tokenized Treasuries) that the daily touches had fallen for twice. Full score lineage (June committed → every draft through July 30) preserved in every report. ***Draft scores and the equal-weight model await my stamp.***

THE FINAL NUMBER · JULY 30, 2026 · EQUAL-WEIGHT MODEL

+0.50

Mild Bull overall, time-arbitraged — but a closer call than it's been in weeks. Equal-weight mean of the five window signals (−10 max bear … +10 max bull). Horizon-weighted variant: **+1.08**. The structure underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" signal, and this week the near-end storm got substantially louder (down from +0.75 / +1.28 on July 25) as both Iran and the Fed delivered their worst readings of the cycle in the same week.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

The Master Table

Compiled July 30, 2026 · BTC $64,706.50 (Bitstamp, last completed daily close, July 30, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, July 30 drafts) · Not Financial Advice

The whole thesis in five rows, on the July 30 drafts (this week's full weekly refresh). Signal range −10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	JUL 25 MASTER	THE CALL
1 month	**−1.62**	**−1.44**	**Bear** — Iran's widening war and a hawkish FOMC surprise both hit at once
3 months	**−1.16**	**−0.99**	**Mild Bear** — the September FOMC now sits inside this window at majority-hike-priced odds
6 months	**+0.14**	+0.23	**Neutral** — CLARITY and Tokenization still carry this window; Iran and Fed drag harder
1 year	**+2.05**	**+2.14**	**Bull** — all five pillars still positive; the thesis window, only modestly softer
3 years	**+3.11**	**+3.12**	**Strong Bull** — law + adoption + cycle + value, barely moved

Formula: per pillar, Signal = ((P − 50) ÷ 50) × Quality × Impact, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: |s| < 0.5 Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Jul 25 Master" is the prior full-refresh reading (recomputed from the Jul 25 score set for exact comparison), shown for comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.50 = the equal-weight mean of the five MASTER signals above ((−1.62 − 1.16 + 0.14 + 2.05 + 3.11) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.08**. Both still read **Mild Bull**, down from July 25's +0.61 / +1.18 — the softest headline reading since this system began publishing. What moved: the near-term windows (1mo −1.44 → −1.62, 3mo −0.99 → −1.16) both slid further, driven by two pillars simultaneously delivering their worst readings of the cycle — Iran War Risk (after a real lull was overtaken by an Iranian attack on a US base, US retaliation, and the war widening to Iraq and Egypt) and Fed & Macro (after the July FOMC delivered a rare 3-way hawkish dissent and no forward guidance, verified directly against federalreserve.gov). CLARITY Act also cut further this cycle (its lowest reading yet, on the Senate's own floor schedule confirming no pre-recess path) — real Tillis-Gallego negotiating progress kept its 3/6-month cuts smaller than the floor-schedule fact alone would suggest, but every CLARITY window still declined. Tokenization was the one pillar to improve, correcting upward after this cycle caught a recurring metric-mislabeling error the daily touches had fallen for twice. The 1-year window ticked down only fractionally (+2.14 → +2.05) and 3-year barely moved (+3.12 → +3.11) — this remains a near-term chop, structurally bullish read, but the near-term storm is now louder than it has been since this system began tracking it.

The Full Pillar Matrix

Every pillar's signal on every window — July 30 draft scores, this week's full weekly refresh (each report shows the full June → ... → July 30 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	−1.36	−0.41	+1.09	+4.61	+6.38	Jul 30 full refresh (cut further, lowest yet)
Iran War Risk (20% · 8)	−3.26	−2.60	−1.46	+0.52	+2.38	Jul 30 full refresh (cut hardest — war widened to Iraq, Egypt)
Tokenization RWA (20% · 8)	+0.00	+0.99	+2.04	+3.00	+3.92	Jul 30 full refresh (corrected up — mislabel caught)
Fed & Macro (20% · 8)	−2.18	−2.31	−0.64	+0.48	+1.25	Jul 30 full refresh (cut hard — rare hawkish FOMC dissent)
Bitcoin TA — quant (20% · 8)	−1.32	−1.46	−0.35	+1.63	+1.60	Jul 30 computed
MASTER — mean of the five	−1.62	−1.16	+0.14	+2.05	+3.11	**equal-wt**

P lineage (June → Jul 8 → 10 → 11 → 12 → 13 → 17 → 18 → 24 → 25 → 29 → 30) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → 50/54/60/82/92 → 52/55/61/82/92 → 52/55/61/82/92 (held) → 50/54/61/82/92 → 48/52/61/82/92 → 44/48/59/82/92 → 50/54/62/83/92 → 42/50/61/83/92 → 46/54/62/83/92 → **40/47/58/82/92** · Iran 50/55/62/75/85 → 40/47/55/70/83 → 42/49/56/70/83 → 44/50/57/70/83 → 44/50/57/70/83 (held) → 38/45/53/68/83 → 32/39/48/65/82 → 24/33/44/60/79 → 18/27/38/56/77 → 20/29/40/57/78 → 25/30/40/57/78 → **16/25/37/55/77** · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → 53/58/64/74/85 → 54/59/65/74/85 → 54/59/65/74/85 (held) → 54/59/65/74/85 (held) → 54/59/65/74/85 (held) → 50/56/65/74/85 → 48/54/65/74/85 → 49/56/65/74/85 → 48/54/65/74/85 → **50/57/65/74/85** · Fed 38/40/46/54/61 → 35/36/42/52/61 → 34/36/44/53/61 → 34/36/44/53/61 (held) → 34/36/44/53/61 (held) → 34/36/44/53/61 (held) → 38/40/47/55/62 → 42/40/47/55/62 → 45/44/49/55/62 → 36/35/45/54/62 → 39/38/46/54/62 → **34/33/45/54/62** · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 40/37/46/67/70 (Jul 18) → 40/36/43/68/70 (Jul 25) → **39/37/46/67/70** (Jul 30). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five.

The Story, Window by Window

What the blend is saying on July 30, 2026 (full weekly refresh; comparisons below are vs. the July 25 full-refresh baseline, recomputed exactly for comparison)

- **1 month — Bear (−1.62, was −1.44).** Iran War Risk deepened the most (−3.26, was −2.88) as a real lull was overtaken by Iran's IRGC striking a US base in Jordan, US retaliation, and the war widening to Iraq and Egypt. Fed & Macro also cut hard (−2.18, was −1.90) after the July FOMC delivered a rare 3-way hawkish dissent and no forward guidance, verified directly against federalreserve.gov. CLARITY cut further too (−1.36, was −1.09) as the Senate's own floor schedule confirmed no pre-recess path. Tokenization was flat (+0.00, unchanged) after this cycle corrected a metric-mislabeling error the daily touches had fallen for.
- **3 months — Mild Bear (−1.16, was −0.99).** Iran's widening war (−2.60, was −2.18) and the Fed's hawkish surprise (−2.31, was −2.04) both weigh on this window, since the September FOMC now sits squarely inside it at majority-hike-priced odds across every read this cycle pulled; CLARITY (−0.41, was 0.00) softened on the same floor-schedule fact; Tokenization improved (+0.99, was +0.84) on the corrected Treasuries read; the quant tape held at −1.46.
- **6 months — Neutral (+0.14, was +0.23).** Tokenization remains the strongest pillar here (+2.04, unchanged); CLARITY still holds constructive (+1.09, was +1.50); Iran's drag widened further (−1.46, was −1.12); the Fed drag

eased slightly at this horizon (−0.64, was −0.64, unchanged); the tape's drag is essentially unchanged (−0.35). Historical average cycle bottom (~Aug 31, cycle month 27.33) sits inside this window.

- **1 year — Bull (+2.05, was +2.14).** All five pillars still positive: CLARITY +4.61 (was +4.75), Tokenization +3.00 (unchanged), Bitcoin TA +1.63 (was +1.73), Iran +0.52 (was +0.73, down on the widening war), Fed +0.48 (unchanged). Price sits 53% below power-law fair value ($136,438). The window the whole thesis is built around, only fractionally softer this week.
- **3 years — Strong Bull (+3.11, was +3.12).** Every pillar positive and the structural case compounds: CLARITY +6.38 (unchanged), Tokenization +3.92 (unchanged), Iran +2.38 (was +2.46), Bitcoin TA +1.60 (unchanged), Fed +1.25 (unchanged). A widening war and a hawkish FOMC, by design, barely move this window.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) now trace the most similar path yet: P 34/33/45/54/62 vs 39/37/46/67/70 — within 5 points at 1 and 3 months, and just 1 point apart at 6 months (45 vs 46). Two methods that share no inputs keep landing on "soft near term, still-questionable half-year." Iran remains the worst 1-month signal in the set by a wide margin (−3.26), well below either of these two — the war-risk widening continues to overtake even a genuinely hawkish Fed surprise.

THE REAL DISAGREEMENT

Near-term: Tokenization is the only pillar reading non-negative near-term (P 50, neutral — the metric-mislabeling correction this cycle); CLARITY sits well below a coin flip (P 40) on the confirmed floor-schedule blockage; the Fed and the tape both lean bearish (P 34, 39); Iran remains the clearest risk-off vote (P 16). The master resolves it honestly: Bear now, and the one non-negative pillar gets paid in the windows where its evidence is strongest.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Fired since the last full check are already IN the July 30 draft scores. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Fired Jul 28	Iran's IRGC struck a US base in Jordan; zero US casualties; US retaliated Jul 29 with a "heavy wave of strikes"	Iran 1mo/3mo re-rated down further — already IN this draft
Fired Jul 29 — NEW FRONTS	US-Saudi joint strikes killed 20 in Iraq (Saudi's first turn as direct co-belligerent); a drone hit a US-owned vessel at Egypt's Damietta port (attribution unresolved)	The main driver of this cycle's Iran 6/12mo cuts — already IN this draft
Fired Jul 29, confirmed primary	FOMC held 9-3, first unified 3-member hawkish dissent since Sept 2016; Chair Warsh's press conference offered no forward guidance	The main driver of this cycle's Fed 1mo/3mo cut to Bear — already IN this draft

Fired Jul 30, confirmed primary	Jobless claims 197K (week ended Jul 25), prior week revised up to 188K — confirms the seasonal-distortion reversal flagged last cycle	Consistent with, not contradicting, the Fed's hawkish cut
Irreconcilable this cycle	September hike odds: four independent pulls, four different numbers (55.8%/62.4%/70.2%/81%)	Treated directionally, not as a point figure — re-attempt next cycle
Fired Jul 28-29, confirmed primary	Senate's own floor schedule confirms CLARITY was not on the calendar (Graham memorial, nominee vote, sanctions bill instead)	Drives this cycle's CLARITY 1mo cut to its lowest reading yet — already IN this draft
Reported, unconfirmed	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets, text undisclosed, WH sign-off not confirmed	Kept CLARITY's 3/6mo cuts smaller than the floor-schedule fact alone would suggest
Corrected this cycle	The "$34.67B tokenized Treasuries pulling back" story is a metric mislabel (all-category RWA total, not Treasuries); Treasuries are flat, BUIDL is recovering	Drives this cycle's Tokenization 1mo/3mo correction upward — already IN this draft
September	Next FOMC (with SEP/dot plot), Sept 15-16; first realistic post-recess CLARITY floor-time window	Both pillars' real re-rating events — watch closely next full cycle
Aug 7	Last Senate session day before recess (now confirmed to pass with no CLARITY vote)	2026 signing in real doubt
~Aug 16	Islamabad Memorandum 60-day window expires	Iran: deal/extension = up hard; formal collapse = down hard
~Aug 31	Historical average cycle-bottom month (cycle month 27.33 currently) passes	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value $136,438	BTC $64,706.50 sits 53% below fair value	1yr/3yr windows: the gap the structural bull case is priced against
Ongoing	Oman-mediated talks continue despite the widening war; a 10-day regional ceasefire proposal remains on the table, unaccepted	Kept Iran's near-term signal from falling even further this cycle

The master flip line, re-leveled: a confirmed new US combat death, Egypt's strike confirmed as Iran-attributed, a third new-country front, or a sustained Brent close above $100 (Iran); a September FOMC hike landing into still-historically-low claims (Fed); or the Senate returning from recess with no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just this cycle's re-rate. The TA flip line (weekly close under $50,000) remains unchanged. Multiple firing together would turn the near-term Bear into a deeper one and put the 6-month Neutral under real review.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WT)	CALL · STILL POSITIVE?
— drop CLARITY Act	+0.11	Neutral · barely, yes
— drop Iran War Risk	+0.85	Mild Bull · yes
— drop Tokenization RWA	+0.13	Neutral · barely, yes
— drop Fed & Macro	+0.80	Mild Bull · yes
— drop Bitcoin TA	+0.62	Mild Bull · yes
all five in (headline)	**+0.50**	**Mild Bull**

Every leave-one-out final number stays **positive** (+0.11 to +0.85) — the sign never flips negative — but this cycle two of the five drops (removing CLARITY or Tokenization, the two least-negative near-term pillars) round down to **Neutral** rather than Mild Bull, a materially weaker robustness result than prior cycles, where every drop held Mild Bull. The horizon-weighted final (+1.08) is more robust and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call is now leaning more heavily on CLARITY and Tokenization specifically than it was a week ago** — with both Iran and Fed delivering their worst readings of the cycle simultaneously, the equal-weight window is thinner than it looks. This robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and this cycle it did catch exactly that.

My Decision

◷ **UPDATED DRAFT — JULY 30, 2026 (FULL WEEKLY REFRESH) · AWAITING MY STAMP**

MASTER: −1.62 / −1.16 / +0.14 / +2.05 / +3.11 · THE FINAL NUMBER: +0.50 (Mild Bull, time-arbitraged)

This is a full weekly research pass, superseding the Jul 29/30 light daily touches: the quant pillar was fully recomputed on fresh price data; Iran War Risk was cut hardest after resolving a direct contradiction between the two most recent daily touches (a real lull was overtaken by an Iranian attack on a US base in Jordan, US retaliation, and the war widening to two new fronts — Iraq and Egypt); Fed & Macro was cut hard after independently verifying the July 28-29 FOMC directly against federalreserve.gov (a 9-3 hold with the first unified 3-member hawkish dissent since Sept 2016, and no forward guidance from Chair Warsh); CLARITY Act cut further across every window, its lowest reading yet, after pulling the Senate's own floor schedule directly — though real, still-unconfirmed Tillis-Gallego ethics progress kept the 3/6-month cuts smaller than the floor-schedule fact alone would suggest; and Tokenization was the one pillar to improve, after this cycle caught a recurring metric-mislabeling error (a total-RWA figure mistaken for tokenized Treasuries) that the daily touches had fallen for twice. The full lineage (June committed → every draft through July 30) is printed in every report. Awaiting my signature: **(1)** the five draft P-paths, **(2)** the equal-weight model and the final-number window weighting. This cycle's robustness check is a genuine yellow flag, not a rubber stamp: dropping CLARITY or Tokenization now rounds the call down to Neutral rather than Mild Bull — the headline conclusion leans more heavily on those two pillars than it did a week ago. The near-term calendar is dense — the September FOMC and CLARITY's post-recess floor-time window both land in the next full cycle — and each pillar's trigger table says exactly what to re-rate when those land.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that the "Mild Bull" headline is thinner than usual this cycle.

Sources

Each pillar report carries its full, freshly-verified source list for this week's full research pass. The master adds the engine and headline references for this July 30 refresh.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Iran_War / Tokenization_RWA / Fed_Macro Pillar Reports (full weekly re-research July 30, superseding the Jul 29/30 light daily touches) · CoinPicks_Bitcoin_TA_Quant_Pillar_Report (computed July 30).
