

# Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 12, 2026 (light daily touch off the Aug 11 committed daily baseline — AUTO-STAMPED)

Quant pillar recomputed on today's price. This is a light daily touch — check what's changed since the Aug 11 daily refresh, not a fresh deep-dive. All four qualitative pillars HELD FLAT: nothing found today exceeds what Aug 11 already priced in. CLARITY Act unchanged at 32/47/58/82/92: the Senate remains in August recess, the Sept 15 2:15pm ET cloture vote is unchanged, and no new floor-schedule or ethics-text development was found. Iran War Risk unchanged at 20/28/41/56/77: research surfaced a lethal Houthi "double-tap" missile strike on the cargo vessel Tihamah in the Bab al-Mandeb Strait (Red Sea, Aug 11, 6 killed — 4 crew, 2 rescue workers) that the Aug 11 daily check had missed, but assessed it as continuation, not escalation, comparable in kind to the Aug 8-9 incidents already logged — the Hormuz deal itself remains unsigned. Tokenization unchanged at 52/60/66/74/85: the rwa.xyz figures in current coverage (\$38.17B TVL, \$16.21B tokenized Treasuries) are the same Aug 9 dated pull already priced in. Fed & Macro unchanged at 40/38/47/55/62: July CPI — flagged since Aug 8 as the real September decider — had not yet been published in any available reporting as of this run. **This is a routine, well-evidenced daily cycle — no pillar P moved, no call band flipped — so it qualifies for, and has received, Alex's delegated daily auto-stamp authority (in effect since 2026-08-06).** Full score lineage (June committed → every draft through August 12, now committed) preserved in every report.

THE FINAL NUMBER · AUGUST 12, 2026 · EQUAL-WEIGHT MODEL (COMMITTED, AUTO-STAMPED)

+0.61

Mild Bull overall, time-arbitrated — the 1-month window remains outright Bear, same call band as Aug 11, with every qualitative pillar held flat today. Equal-weight mean of the five window signals (–10 n 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" month window, not a research-driven change — every qualitative pillar was held flat. This reading was auto-stamped under Alex's standing delegated authority for routine daily cycles — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 12, 2026 · BTC \$64,211.10 (Bitstamp, last completed daily close, August 12, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 12 committed set, light daily, auto-stamped)

The Master Table

The whole thesis in five rows, on the August 12 committed set (a light daily touch off the Aug 11 daily baseline). Signal range -10 (max bear) to +10 (max bull).

| WINDOW   | MASTER (EQUAL-WT) | AUG 11 MASTER | THE CALL                                                                      |
|----------|-------------------|---------------|-------------------------------------------------------------------------------|
| 1 month  | -1.54             | -1.52         | Bear — unchanged call; today's tiny move is quant mapping noise, not research |
| 3 months | -0.90             | -0.90         | Mild Bear — the September FOMC still sits inside this window; unchanged       |
| 6 months | +0.29             | +0.29         | Neutral — CLARITY and Tokenization still carry this window; Iran still drags  |
| 1 year   | +2.11             | +2.11         | Bull — all five pillars still positive; the thesis window, unmoved            |
| 3 years  | +3.11             | +3.11         | Strong Bull — law + adoption + cycle + value, unmoved                         |

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). For exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

**+0.61 = the equal-weight mean of the five MASTER signals above** ((-1.54 - 0.90 + 0.29 + 2.11 + 3.11) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.18**, unchanged.

What moved: nothing on the qualitative side — CLARITY, Iran, Tokenization, and Fed & Macro all held flat after today's research found nothing that exceeds what the Aug 11 set already priced in. TA's 1-month reading (P 40→39, -1.20 → -1.32), pure mapping noise from today's BTC close (\$64,211.10, -0.2% vs Aug 11), which nudges MASTER 1mo from -1.52 to -1.54 and THE FINAL NUMBER from +0.66 to +0.61.

**call band flipped, nothing rests on a single-source claim — so it was auto-stamped under Alex's standing delegated daily authority (in effect since 2026-08-06) — see My Decision.**

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today.

Generated by engine/history.py from every committed master\_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

| PILLAR (WEIGHT · IMPACT)     | 1 MO  | 3 MO  | 6 MO  | 1 YR  | 3 YR  |  |
|------------------------------|-------|-------|-------|-------|-------|--|
| CLARITY Act (20% · 8)        | -2.45 | -0.41 | +1.09 | +4.61 | +6.38 |  |
| Iran War Risk (20% · 8)      | -2.88 | -2.29 | -1.01 | +0.62 | +2.38 |  |
| Tokenization RWA (20% · 8)   | +0.29 | +1.41 | +2.18 | +3.00 | +3.92 |  |
| Fed & Macro (20% · 8)        | -1.36 | -1.63 | -0.38 | +0.60 | +1.25 |  |
| Bitcoin TA — quant (20% · 8) | -1.32 | -1.57 | -0.44 | +1.73 | +1.60 |  |
| MASTER — mean of the five    | -1.54 | -0.90 | +0.29 | +2.11 | +3.11 |  |

## The Story, Window by Window

- **1 month — Bear (−1.54, was −1.52).** All four qualitative pillars held flat: Fed & Macro (−1.36), Iran War Risk (−2.88), CLARITY (−2.45), Tokenization (+0.29) all unchanged from Aug 11. The oil price (−0.2% vs Aug 11) — noise, not a research signal.
- **3 months — Mild Bear (−0.90, unchanged).** CLARITY (−0.41), Iran (−2.29), Tokenization (+1.41), Fed (−1.63), and Bitcoin TA (−1.57) all held. Nothing found in today's research exceeded the noise floor.
- **6 months — Neutral (+0.29, unchanged).** Tokenization (+2.18), CLARITY (+1.09), Fed (−0.38), Iran (−1.01), and Bitcoin TA (−0.44) all held. Historical average cycle bottom (~Aug 31, cycle month 10) is still 1.5 months away.
- **1 year — Bull (+2.11, unchanged).** All five pillars still positive and unchanged: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.60, Iran +0.62. Price sits 53% below power-law fair value.
- **3 years — Strong Bull (+3.11, unchanged).** Every pillar positive and unchanged: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.60, Fed +1.25. A quiet news day, by design, does not change the long-term picture.

## Where the Two Lenses Agree — and Where They Fight

**THE INDEPENDENT CONFIRMATION**

**Fed & Macro (judged) and Bitcoin TA (computed) held their Aug 11 relationship almost exactly:** P 40/38/47/55/62 vs 39/36/45/68/70 (1mo TA P nudged 40→39 on mapping noise, imm the worst 1-month signal in the set (−2.88), followed by CLARITY (−2.45, the cloture vote itself sits outside this window) — two independent stories (an unresolved, still-unsigned Hormuz/regi its late-July lows.

**THE REAL DISAGREEMENT**

**Near-term:** Tokenization is still the strongest near-term pillar (P 52); Fed & Macro sits roughly at a coin flip (P 40); CLARITY remains below a coin flip (P 32) with the cloture vote still five-plus votes away. The Houthi strike, still-unsigned Hormuz deal) found nothing to move it either direction. The master resolves it honestly: outright Bear at 1 month, unchanged in call band from Aug 11.

**Long-term:** the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remains a gap. Equal weight lets that gap show through honestly instead of burying it in a blend.

## Trigger Watch — The Next Six Weeks, Re-Dated

| DATE / LEVEL               | EVENT                                                                                                                                                                                                                      |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Checked, unchanged         | CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; Senate remains in August recess, no new floor-schedule or ethics-text development found                                                                     |
| Fired Aug 11, found Aug 12 | Houthi "double-tap" missile strike on the cargo vessel Tihamah in the Bab al-Mandeb Strait (Red Sea) — 6 killed (4 crew, 2 rescue workers), multi-source                                                                   |
| Checked, not found         | No new dated RWA/tokenization catalyst since the Aug 9 rwa.xyz all-time-high pull; today's coverage recycles the same \$38.17B TVL / \$16.21B Treasuries figures                                                           |
| Checked, not yet landed    | July CPI print (BLS, scheduled 8:30am ET Aug 12) — not yet published in any available reporting as of this run                                                                                                             |
| Aug 12                     | July CPI print — Morgan Stanley flags this, not the jobs report alone, as the real decider for the September FOMC; lands inside the 1mo window                                                                             |
| Aug 13                     | Next Fed H.4.1 balance-sheet release and next weekly jobless-claims print                                                                                                                                                  |
| Sept 15                    | First CLARITY Act procedural (cloture) vote, precisely dated 2:15pm ET; zero confirmed Democratic yes votes as of Aug 12                                                                                                   |
| Pending                    | Actual signing of a Hormuz agreement the US accepts — the fee/compensation/sovereignty disputes (Iran wants tolls + compensation + a US/Israel ban; US wants zero) are the thing that has blocked unilateral announcements |
| September                  | Next FOMC (with SEP/dot plot), week of Sept 15 — Senate returns from recess the same week                                                                                                                                  |
| ~Aug 31                    | Historical average cycle-bottom month (cycle month 27.8 currently) passes                                                                                                                                                  |

|                                   |                                           |
|-----------------------------------|-------------------------------------------|
| Power-law fair value<br>\$137,413 | BTC \$64,211.10 sits 53% below fair value |
|-----------------------------------|-------------------------------------------|

**The master flip line, unchanged from Aug 8:** a confirmed new US combat death, a resumption of direct US strikes on Iran proper, the conflict widening to a further new state, or a sustained Brent close above \$100 returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just routine daily noise. A signed, durable Hormuz deal (under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

| FINAL NUMBER WITH THIS PILLAR REMOVED | FINAL # (EQUAL-WEIGHT) |
|---------------------------------------|------------------------|
| — drop CLARITY Act                    | +0.30                  |
| — drop Iran War Risk                  | +0.92                  |
| — drop Tokenization RWA               | +0.23                  |
| — drop Fed & Macro                    | +0.84                  |
| — drop Bitcoin TA                     | +0.77                  |
| all five in (headline)                | +0.61                  |

Every leave-one-out final number stays **positive** (+0.23 to +0.92) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-positive near-term pillars) still round down to **Neutral** and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — today's flat qualitative research didn't change which two pillars the check exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

✓ COMMITTED — AUGUST 12, 2026 (LIGHT DAILY TOUCH) · STAMPED BY ALEX (AUTO-STAMPED)

MASTER: −1.54 / −0.90 / +0.29 / +2.11 / +3.11 · THE FINAL NUMBER: +0.61 (Mild Bull, time-arbitraged, committed)

This is a light daily touch off the Aug 11 committed daily baseline — checking what's changed since Aug 11, not re-litigating it from scratch. All four qualitative pillars HELD FLAT: nothing found today except a recess, the cloture vote remains dated 2:15pm ET Tuesday, Sept 15, and no new floor-schedule or ethics-text development was found (KuCoin, Disruption Banking, news.bitcoin.com, The Block, CryptoPotato). A proposal, zero confirmed Democratic yes votes) are unchanged. Iran War Risk held at 20/28/41/56/77: research surfaced a lethal Houthi "double-tap" missile strike on the cargo vessel Tihamah in the Bab al-Mandeb, corroborated by US News/AP wire) that the Aug 11 daily check had missed, but assessed it as continuation, not escalation, comparable in kind to the Aug 8 ADNOC tanker hit and Aug 9 Jazan refinery strike, but "close" but conditioning full reopening on US concessions. Tokenization held at 52/60/66/74/85: the rwa.xyz figures cited in current coverage (\$38.17B total RWA TVL, \$16.21B tokenized Treasuries, 1.7M+ holders, a catalyst. Fed & Macro held at 40/38/47/55/62: July CPI (BLS, scheduled 8:30am ET Aug 12) — flagged repeatedly since Aug 8 as the real September-FOMC decider — had not yet been published in any available form anywhere is Bitcoin TA's computed 1-month reading (mapping noise on today's \$64,211.10 close, −0.2% vs Aug 11, P 40→39), nudging MASTER 1mo from −1.52 to −1.54 and THE FINAL NUMBER from +0.77 to +0.77. **stamp authority (in effect since 2026-08-06) exists for: no pillar P moved, no call band flipped, and nothing rests on a single-source claim — so it was auto-stamped rather than left for manual stamping.** Tokenization still rounds the call down to Neutral — the headline conclusion continues to lean more heavily on those two pillars than on Iran, Fed, or TA. The near-term calendar is dense: the Aug 12 CPI print is Sept 15 now hosts both the FOMC week and the first CLARITY cloture vote, and continued Hormuz shipping attacks or an actual signed deal (not Iran's unilateral announcements) are the real thing to watch for.

**Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that this is auto-stamped under Alex's standing delegated authority, so it is the system's official stamped position.**
