Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 11, 2026 (light daily catch-up) · COMMITTED — AUTO-STAMPED SEPTEMBER 11, 2026

*This is a light daily catch-up (score set 2026-09-11_draft) against the Sept 10 committed baseline (2026-09-10_draft, auto-stamped September 10, 2026). CLARITY Act held flat at 32/47/58/82/92 and Tokenization RWA held flat at 52/60/66/74/85: no new dated catalyst found (the Sept 15 2:15pm ET cloture vote is unchanged; the whip-count detail circulating this cycle is dated Sept 4, before the last two baselines). **Fed & Macro RE-RATED UP, modestly**, to 34/33/44/54/60 (from 32/31/43/54/60): this cycle held its research window open past 8:30am ET for the August CPI print, and BLS's own release has headline CPI-U +0.4% m/m SA / +3.4% y/y NSA — exactly in line with consensus — and core +0.3% m/m / +2.4% y/y, **one tenth cooler on the month than the +0.4% consensus**; energy +2.1% and gasoline +3.9% drove over a third of the monthly increase. A modest dovish surprise in the windows bracketing the Sept 15-16 FOMC, tempered because the headline acceleration is energy-driven — the same oil shock firing Iran's Brent clause below. Market-implied hike odds around the print (~70% for 25bp) are a market price, reported, not scored. **Iran War Risk RE-RATED DOWN, modestly**, to 1/4/20/40/71 (from 1/5/22/42/72): this pillar's own "sustained Brent close above \$100" flip-line clause FIRED on a third consecutive session — Brent ended Thursday Sept 10 up more than 6% above \$107 after trading above \$108 intraday — its highest since May 19 — and WTI closed above \$102 for the first time since May; Brent was still ~\$104.36 midday Friday Sept 11, ~9% higher on the week (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500). Fuller reporting also landed on Iran's Sept 9 shipping wave: 10 vessels attacked near Hormuz (2 US-linked ships, 8 oil tankers), the largest declared wave of the war, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill) — a merchant seafarer is not a US service member, so the confirmed-US-combat-death clause does not fire, and no further new state was struck, so the widening clause does not fire either. Counterweight logged: Friday's ~3% Brent give-back is attributed to Hormuz diplomacy and the IEA's 2.5 mb/d 2026 demand-contraction forecast.*

THE FINAL NUMBER · SEPTEMBER 11, 2026 · EQUAL-WEIGHT MODEL (COMMITTED — AUTO-STAMPED)

+0.36

Neutral overall, time-arbitraged — essentially unchanged from the last stamped set's (Sept 10) +0.34 — Iran's cut, Fed's modest CPI-driven upgrade and Bitcoin TA firming at the front end very nearly cancel; no call-band flip. Equal-weight mean of the five window signals (−10 max bear ... +10 max bull). Horizon-weighted variant: **+0.90**, a small further dip from +0.91 but still Mild Bull. The structure underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Bull at 3 years. **COMMITTED — AUTO-STAMPED SEPTEMBER 11, 2026 (2026-09-11_draft)** — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled September 11, 2026 (light daily catch-up, committed, auto-stamped) · BTC \$77,063.25 (local full quant refresh, run.py quant, September 11, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, 2026-09-11_draft, committed; last committed: 2026-09-11_draft) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the September 11 set (a light daily catch-up vs. the Sept 10 last-stamped baseline; COMMITTED, AUTO-STAMPED). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	SEPT 9 MASTER (PRIOR STAMPED)	THE CALL
1 month	-1.62	-1.74	Bear — a touch shallower; Iran stays at the near-floor, Bitcoin TA firmed as its 1-month cycle analog flipped back positive
3 months	-1.29	-1.30	Mild Bear — Iran's further cut and Bitcoin TA's slight easing both pull down; the September FOMC still sits inside this window
6 months	-0.01	+0.00	Neutral — CLARITY and Tokenization still carry this window; Iran's further cut tips it a hair below zero, still inside the Neutral band
1 year	+1.75	+1.80	Bull — four of five pillars positive; Iran alone negative at this window
3 years	+2.94	+2.96	Bull — law + adoption + cycle + value; barely moved

Formula: per pillar, $Signal = ((P - 50) \div 50) \times Quality \times Impact$, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: $|s| < 0.5$ Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Sept 9 Master" is the prior stamped reading, for exact comparison. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

+0.36 = the equal-weight mean of the five MASTER signals above $((-1.62 - 1.34 - 0.04 + 1.75 + 2.94) \div 5)$. Weighting the longer windows harder (10/15/20/30/25%) gives **+0.90**, a small further dip from Sept 10's +0.91 but still Mild Bull. No call band flips this cycle. CLARITY and Tokenization held flat this cycle on independent re-checks (see each pillar's own What Changed); Iran War Risk re-rated down modestly as its own "sustained Brent close above \$100" flip-line clause fired; Fed & Macro re-rated up modestly once the August CPI print landed mid-cycle with core a tenth cooler than consensus; Bitcoin TA (computed) firmed at the front end as its 1-month cycle analog flipped back positive. **COMMITTED — AUTO-STAMPED SEPTEMBER 11, 2026** — light daily touch, call band unchanged everywhere, sourcing well above the sufficiency bar, and under the runbook's widened delegated authority the size of a move is not itself a reason to withhold the stamp; so this set is auto-stamped: status committed, stamped_by "Alex (auto-stamped)." See My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — September 11 scores, a light daily catch-up (2026-09-11_draft), COMMITTED — AUTO-STAMPED SEPTEMBER 11, 2026 (each report shows the full June → Aug 22 → Aug 28/29 drafts → Aug 31 → Sept 1 → Sept 2 → Sept 5 draft → Sept 5 draft2 → Sept 6 → Sept 8 → Sept 9 → Sept 10 → Sept 11 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	−2.45	−0.41	+1.09	+4.61	+6.38	Held flat — Sept 15 cloture unchanged; the whip-count writeup circulating this cycle is dated Sept 4, not new
Iran War Risk (20% · 8)	−4.70	−4.78	−3.36	−1.04	+1.85	RE-RATED DOWN, modestly — the "sustained Brent >\$100" flip-line clause fired; AUTO-STAMPED
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	Held flat — no new dated rwa.xyz pull or rail event, no fresh catalyst
Fed & Macro (20% · 8)	−2.18	−2.31	−0.77	+0.48	+1.04	RE-RATED UP, modestly — August CPI core a tenth cooler than consensus; AUTO-STAMPED
Bitcoin TA — quant (20% · 8)	+0.96	−0.34	+0.79	+1.73	+1.52	Sept 11 computed — BTC \$77,063 vs Sept 10's \$77,994
MASTER — mean of the five	−1.62	−1.29	−0.01	+1.75	+2.94	equal-wt

P lineage (June → Jul 8 → ... → Aug 16 → 22 draft2 → 28/29 drafts → 31 → Sept 1 → Sept 2 → Sept 5 → Sept 6 → Sept 8 → Sept 9 → Sept 10) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 7, committed) → 32/47/58/82/92 (Sept 9, held flat since Aug 7) → **32/47/58/82/92** (Sept 10, held flat) · Iran 50/55/62/75/85 → 40/47/55/70/83 → ... → 20/28/41/56/77 (Aug 16, committed) → 14/22/38/54/76 (Aug 22 draft2, committed) → 14/22/38/54/76 (Aug 29, held flat, draft) → 9/17/34/51/75 (Aug 31 — RE-RATED DOWN, flip line fired, auto-stamped committed) → 7/15/32/50/75 (Sept 1 — RE-RATED DOWN AGAIN, more modestly, on continued escalation, auto-stamped committed) → 1/9/27/47/74 (Sept 2 — RE-RATED DOWN SHARPLY on a ~50x-larger strike wave, first-ever tanker strikes, and a four-country retaliation — COMMITTED, auto-stamped Sept 3) → 1/9/27/47/74 (Sept 5 draft, held flat) → 1/9/27/47/74 (Sept 5 draft2, full weekly refresh — held flat, COMMITTED BY ALEX Sept 5, 2026) → 1/8/25/45/73 (Sept 6 — RE-RATED DOWN, modestly, once CENTCOM's own press release confirmed the Sept 5 tanker strike as a 3-tanker retaliation for an IRGC missile attack on 2 US Navy warships — COMMITTED, AUTO-STAMPED Sept 6, 2026) → 1/7/24/44/73 (Sept 8 — RE-RATED DOWN, modestly, on Iran's announced intent to declare a restricted zone beyond Hormuz into the Persian Gulf, not yet executed — COMMITTED, AUTO-STAMPED Sept 8, 2026) → 1/6/23/43/72 (Sept 9 — RE-RATED DOWN, modestly, on CENTCOM's confirmed 5-tanker strike Sept 8 and Brent's intraday \$100 cross Sept 9, neither firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 9, 2026, the last TRUE committed baseline) → **1/5/22/42/72** (Sept 10 — RE-RATED DOWN, modestly, on the Al Azraq Jordan retaliation and the Houthi seizure of Mocha/Bab-el-Mandeb, neither firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 10, 2026, the new last TRUE committed baseline) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 52/60/66/74/85 (Aug 8, committed) → 52/60/66/74/85 (Sept 9, held flat since Aug 8) → **52/60/66/74/85** (Sept 10, held flat) · Fed 38/40/46/54/61 → 35/36/42/52/61 → ... → 43/41/48/56/62 (Aug 22 draft2, committed) → 36/35/45/55/61 (Aug 29, draft) → 36/35/45/55/61 (Aug 31, auto-stamped committed) → 36/35/45/55/61 (Sept 1, auto-stamped committed) → 36/35/45/55/61 (Sept 2 — held flat, auto-stamped Sept 3) → 32/31/43/54/60 (Sept 5 draft — RE-RATED DOWN on a hot August jobs report and higher FOMC hike-odds pricing) → 32/31/43/54/60 (Sept 5 draft2, full weekly refresh — RE-CONFIRMED, COMMITTED BY ALEX Sept 5, 2026) → 32/31/43/54/60 (Sept 6, held flat, auto-stamped) → 32/31/43/54/60 (Sept 8, held flat, auto-stamped) → 32/31/43/54/60 (Sept 9, held flat) → **32/31/43/54/60** (Sept 10, held flat) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 49/46/54/66/69 (Aug 22 draft2) → 54/46/56/67/69 (Aug 29) → 54/46/59/68/69 (Aug 31) → 57/46/59/68/69 (Sept 1, computed) → 57/47/59/68/69 (Sept 2, computed) → 59/48/60/68/69 (Sept 5, computed) → 62/53/60/68/69 (Sept 6, computed) → 59/47/59/68/69 (Sept 8, computed) → 59/47/60/68/69 (Sept 9, computed) → **55/48/59/68/69** (Sept 10, computed on today's bar). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on September 11, 2026, a light daily catch-up (comparisons below are vs. the last stamped baseline, Sept 10's 2026-09-10_draft)

- **1 month — Bear (–1.62, up from –1.74).** CLARITY (–2.45) and Tokenization (+0.29) held and **Fed improved to –2.18 from –2.45** on the CPI print; **Iran held flat at –4.70 (P=1 is already at the near-floor, no further room this window)**, and **Bitcoin TA firmed to +0.96 from +0.60** as the 1-month cycle analog flipped back to 2-of-3 positive — the largest single mover this cycle, and the same n=3 alignment fragility that moved it the other way yesterday.
- **3 months — Mild Bear (–1.29, down from –1.30).** CLARITY (–0.41) and Tokenization (+1.41) held and **Fed improved to –2.31 from –2.58; Iran moved to –4.78 from –4.68** (the P cut from 5→4) and **Bitcoin TA eased to –0.34 from –0.22** — the Fed upgrade roughly offsets both, leaving the window a hair thinner.
- **6 months — Neutral (–0.01, down from +0.00).** CLARITY (+1.09) and Tokenization (+2.18) held and **Fed improved to –0.77 from –0.90; Iran fell to –3.36 from –3.14** on this cycle's re-rate, while **Bitcoin TA held at +0.79**. The window tips a hair below zero — still squarely inside the Neutral band ($|\text{signal}| < 0.5$), not a call-band flip.
- **1 year — Bull (+1.75, down from +1.80).** Four of five pillars still non-negative: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73 (unchanged), Fed +0.48. **Iran fell to –1.04 from –0.83**, still alone negative at this window. Price now sits ~45% below power-law fair value (\$139,939).
- **3 years — Bull (+2.94, essentially unchanged).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Bitcoin TA +1.52 (unchanged), Fed +1.04, **Iran +1.85 (down from +1.94 on the 36mo cut 72→71)**. A structural window one modest re-rate barely moves.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) stays cut on last week's hot jobs print while Bitcoin TA (computed) eased slightly this cycle: P 32/31/43/54/60 (Fed, judged, held flat) vs 55/48/59/68/69 (Bitcoin TA, computed, easing at 1mo as the 1-month cycle analog flipped negative). The quant pillar's model reading, built on completed bars and cycle position rather than daily headlines, still doesn't share Fed & Macro's near-term pessimism. Iran War Risk (P 1/5/22/42/72) remains the worst signal at every window through 1 year — re-rated down modestly this cycle on the Al Azraq Jordan retaliation and the Houthi seizure of Mocha/Bab-el-Mandeb, not improving.

THE REAL DISAGREEMENT

Near-term: Bitcoin TA's computed near-term read (P 55/48) is still the strongest near-term pillar; Tokenization (P 52) follows; Fed & Macro (P 32/31) remains below CLARITY (P 32) at 3mo; Iran remains sharply the clearest risk-off vote in the set (P 1). The master resolves it honestly: Bear at 1 month, a touch deeper than Sept 9's Bear, with Iran's modest fresh cut and Bitcoin TA's slight easing both pulling the same direction this cycle.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +1.94, Fed +1.04) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.3× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A light daily catch-up ran this cycle. Iran War Risk re-rated down modestly as its own "sustained Brent close above \$100" flip-line clause fired, and Fed & Macro re-rated up modestly once the August CPI print landed; CLARITY and Tokenization held. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Fired Sept 9, CONFIRMED via CENTCOM/Jordan's own military statement	The IRGC retaliates for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military)	Iran War Risk: Jordan is a repeat target — the widening clause does not fire; both sides confirm no casualties — the US-casualty clause does not fire either. Contributes to this cycle's modest cut
FIRE Sept 10-11 — a flip-line clause, CONFIRMED via 4+ independent market sources	"Sustained Brent close above \$100" — Brent ended Thursday Sept 10 up more than 6% above \$107 (above \$108 intraday), its highest since May 19; WTI closed above \$102 for the first time since May; Brent still ~\$104.36 midday Friday Sept 11, ~9% higher on the week (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500)	Iran War Risk: this clause FIRES — the second distinct flip-line clause to trigger, after the Aug 30 resumption-of-direct-US-strikes clause. It is the driver of this cycle's cut
Fired Sept 9, fuller reporting landed Sept 10-11, CONFIRMED via 4 independent outlets (Reuters wire)	Iran attacked 10 vessels near the Strait of Hormuz — 2 US-linked ships and 8 oil tankers — the largest declared wave of shipping attacks of the war; at least one seafarer killed, one missing (U.S. News, RTE, Foreign Policy, The Hill)	Iran War Risk: a merchant seafarer is not a US service member — the US-casualty clause does not fire; existing theater, so no widening either. Contributes to this cycle's cut
Fired Sept 10, CONFIRMED via 5+ independent outlets	Iran-aligned Houthi forces seize the Yemeni Red Sea port city of Mocha, closing in on control of the Bab el-Mandeb Strait — a second global chokepoint distinct from Hormuz (The Media Line, Times of Israel, Al Jazeera, SCMP, Jerusalem Post, Cyprus Mail)	Iran War Risk: same actor/theater already priced, not a strike on a further new state; no strait closure actually confirmed — does not independently fire a flip-line clause; contributes to this cycle's modest cut
Second straight session, logged Sept 10 — SUPERSEDED by the firing above	Brent crude trades near/above \$100/bbl for a second straight session — above \$101 Wednesday Sept 9; the Sept 10 cycle logged ~\$101.25 for Thursday, which proved to be an intraday read (Thursday closed above \$107)	Iran War Risk: judged short of a sustained close at the time and flagged for watching — it fired the very next cycle. Kept for the audit trail
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; the fullest whip count found this cycle (Paul and Hawley firm no, Tillis conditional, 7-11 Democratic votes needed) is dated Sept 4, before the last two baselines; Polymarket ~16% is a market price and Galaxy Research ~10% an analyst estimate	CLARITY: confirmation only, nothing new — no P move
Checked, no fresh catalyst	Tokenization: no new dated rwa.xyz pull, rail failure, depeg, or counterparty event found; DTCC's October 2026 full-service launch window unchanged	Tokenization: held flat

FIRE Sept 11, 8:30am ET — BLS primary release	August CPI: headline +0.4% m/m SA (after +0.1% in July), +3.4% y/y NSA — in line; core +0.3% m/m (after +0.2%), +2.4% y/y — one tenth cooler than the +0.4% consensus ; energy +2.1%, gasoline +3.9%, shelter +0.3%	Fed & Macro: RE-RATED UP, modestly , 32/31/43 → 34/33/44 on the windows bracketing the FOMC; 12mo/36mo held. Tempered — the headline acceleration is energy-driven
Sept 15-16, 2026	FOMC decision with SEP/dot plot — the first meeting after a core-CPI print that undershot consensus by a tenth while headline ran hot on energy	Fed: a hike confirms the hawkish read this pillar still carries; a hold would argue the market outran the committee
Sept 15, 2026	Next FOMC, with SEP/dot plot; also the first CLARITY Act cloture vote, precisely dated 2:15pm ET	Fed: a hike confirms the Sept 5 re-rate, a hold/cut suggests the market outran the committee. CLARITY: cloture succeeds = re-rate 3mo/6mo up hard; fails = re-rate down
~Aug 31, now passed	Historical average cycle-bottom month has passed (cycle month now 28.75)	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value \$139,939	BTC \$77,063.25 sits ~45% below fair value	1yr/3yr windows: the structural bull case's core, essentially unmoved by this cycle's news

The master flip line — Iran's strikes clause fired Aug 30, escalated sharply Sept 1-2, and as of Sept 11 a SECOND clause has now fired too: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a sustained Brent close above \$100 (Iran). **The Brent clause fired this cycle** — three consecutive sessions above \$100, including a close above \$107 on Sept 10, its highest since May 19. Two of the four clauses are now live; the other two are not: the Sept 9 Al Azraq retaliation was a repeat-pattern strike on Jordan rather than a widening to a new state, and the one death in the Sept 9 shipping wave was a merchant seafarer, not a US service member. The Sept 11 CPI print and the September FOMC delivering a hike would confirm and extend the Fed read; the Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text would also be a genuine escalation. A signed, US-accepted Hormuz reopening that holds a full clean week would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	−0.03	Neutral
— drop Iran War Risk	+1.05	Mild Bull · yes
— drop Tokenization RWA	−0.09	Neutral
— drop Fed & Macro	+0.63	Mild Bull · yes
— drop Bitcoin TA	+0.21	Neutral
all five in (headline)	+0.36	Neutral

The leave-one-out range this cycle is **−0.09 to +1.05** — the sign still flips when Tokenization, CLARITY, or Iran are dropped individually, the same fragile-reading pattern as Sept 10 — and three of the five drops (removing CLARITY, Tokenization, or Bitcoin TA) round to **Neutral**, same as the headline itself this cycle. **Iran War Risk remains the largest single swing pillar: dropping it alone moves the reading from Neutral (+0.36) to +1.05 — a full call band better, into Mild Bull territory.** Dropping Fed & Macro alone also crosses into Mild Bull (+0.63) — the second-largest swing pillar this cycle. That is the single clearest robustness signal this report can give: today's headline number is not being driven by a broad, balanced move — Iran and, to a lesser degree, Fed & Macro are doing the work. The horizon-weighted final (+0.90) is more robust and stays Mild Bull throughout even with either pillar included. This robustness check exists specifically to catch a pillar quietly driving the whole call.

My Decision

COMMITTED — AUTO-STAMPED SEPTEMBER 11, 2026 (2026-09-11_draft) · LIGHT DAILY CATCH-UP

MASTER: -1.62 / -1.29 / -0.01 / +1.75 / +2.94 · THE FINAL NUMBER: +0.36 equal-weight (Neutral) / +0.90 horizon-weighted (Mild Bull) — no call-band flip vs. the last stamped set (2026-09-09_draft)

This is a light daily catch-up (2026-09-11_draft) against the Sept 10 committed baseline (2026-09-10_draft, auto-stamped September 10, 2026). Three pillars were independently re-checked and **held flat**. CLARITY Act at 32/47/58/82/92: the Sept 15 2:15pm ET cloture vote remains the only scheduled action; the detailed whip count circulating this cycle is dated Sept 4, before the last two baselines, and Polymarket (~16%, a market price) and Galaxy Research (~10%, an analyst estimate) are reported separately and neither moves P. Tokenization RWA at 52/60/66/74/85: no new dated rwa.xyz pull, rail failure, depeg, or counterparty event found; DTCC's October 2026 full-service launch remains the unchanged operative catalyst. **Fed & Macro RE-RATED UP, modestly**, to 34/33/44/54/60: this cycle held its research window open past 8:30am ET for the August CPI print, and BLS's own release has headline CPI-U +0.4% m/m SA / +3.4% y/y NSA — exactly in line with consensus — and core +0.3% m/m / +2.4% y/y, **one tenth cooler on the month than the +0.4% consensus**; energy +2.1% and gasoline +3.9% drove over a third of the monthly increase. That is a dated primary print and clears the sufficiency bar on its own; it is tempered because the headline acceleration is energy-driven, the same oil shock firing Iran's Brent clause, so the move is confined to 1mo/3mo/6mo with 12mo and 36mo held flat. Market-implied hike odds around the print (~70% for 25bp) are a market price, reported, not scored. **Iran War Risk RE-RATED DOWN, modestly**, to 1/4/20/40/71 (from 1/5/22/42/72): this pillar's own "sustained Brent close above \$100" flip-line clause FIRED on a third consecutive session — Brent ended Thursday Sept 10 up more than 6% above \$107 after trading above \$108 intraday, its highest since May 19, with WTI closing above \$102 for the first time since May (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500), and Brent was still ~\$104.36 midday Friday Sept 11, ~9% higher on the week. Fuller reporting also landed on Iran's Sept 9 shipping wave (10 vessels, at least one seafarer killed — a merchant seafarer, not a US service member, so the US-casualty clause does not fire). Counterweight logged honestly: Friday's ~3% give-back on Hormuz diplomacy plus the IEA's 2.5 mb/d demand-contraction forecast. **Auto-stamp decision**: ordinary light daily touch, full research access (WebSearch/WebFetch working, a full local quant refresh ran), verification clean, no call band flipped anywhere — and under the runbook's widened delegated authority a flip-line clause firing is not itself a reason to withhold. **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."**

This is a light daily touch — no window moved more than 1 point, the master call band held Neutral → Neutral everywhere, and sourcing clears the primary-source-plus-multi-outlet bar — so per the runbook's delegated daily auto-stamp authority, this set is AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." No call band flips versus the prior stamped set (2026-09-09_draft).

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — Iran remains the largest single swing pillar (see Robustness above: dropping it alone puts the reading at +1.05, Mild Bull), with Fed & Macro the second-largest (dropping it alone gives +0.63); note the leave-one-out range this cycle (-0.09 to +1.05) does cross zero, a genuinely fragile reading worth watching — the same pattern as Sept 10. This set (2026-09-11_draft, light daily catch-up) is COMMITTED — AUTO-STAMPED SEPTEMBER 11, 2026 — the prior stamped position was Sept 10's +0.34 (2026-09-10_draft, auto-stamped, Neutral).

Sources

Each pillar report carries its full, freshly-checked source list for this light daily catch-up. The master adds the engine and headline references for this September 11 update.
