

Five Pillars, One Table, One Number — Updated & Re-verified August 22, 2026 (catch-up cycle, DRAFT — awaiting my stamp)

THE FINAL NUMBER · AUGUST 22, 2026 · EQUAL-WEIGHT MODEL (DRAFT — AWAITING MY STAMP)

Mild Bull overall, time-arbitraged — the 1-month window remains Mild Bear, same call band as Aug 16, even as Iran War Risk re-rated down further and Bitcoin TA improved again. Equal-weight mean of underneath: Mild Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years — every call band identical to Aug 16's committed reading. The number holds because Bitcoin TA's review rather than auto-stamped — see Mv Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 22, 2026 · BTC \$77,169.40 (Bitstamp, last completed daily close, August 22, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 22 draft set, awaiting stamp) · Not Final

The Master Table

The whole thesis in five rows, on the August 22 committed set (a catch-up cycle covering the Aug 16-22 gap). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 16 MASTER	THE CALL
1 month	-1.34	-1.41	Mild Bear — unchanged call band; Iran's further re-rate down and Bitcoin TA's improvement
3 months	-0.72	-0.82	Mild Bear — the September FOMC still sits inside this window
6 months	+0.40	+0.31	Neutral — CLARITY and Tokenization still carry this window; Iran still drags harder
1 year	+2.06	+2.14	Bull — all five pillars still positive; the thesis window
3 years	+3.07	+3.12	Strong Bull — law + adoption + cycle + value

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.70 = the equal-weight mean of the five MASTER signals above ((-1.34 - 0.72 + 0.40 + 2.06 + 3.07) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.22**, essentially the call band, not a flip, even though two of the five pillars moved for real this cycle: Iran War Risk provisionally re-rated down further (a vessel seizure, plus a fatal strike whose "first fatality" framing a \$77,169,40, +7.4%). These two real moves land on roughly opposite sides and largely cancel at the MASTER level — CLARITY, Tokenization, and Fed & Macro all held flat after four independent pillar's own What Changed for the specific checks run). **LEFT AS DRAFT, NOT AUTO-STAMPED** — no window moved more than 8 points (largest: Iran -6 at 1mo), no call band flipped, and the thesis window but a dedicated adversarial fact-check caught this cycle's own "first confirmed fatality" claim as false (actual toll: roughly 18th death in the campaign, never previously scored), which surfaces as a Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

The Full Pillar Matrix

Every pillar's signal on every window — August 22 committed scores, a catch-up cycle covering the Aug 16-22 gap (each report shows the full June → Aug 16 → Aug 22 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	-2.45	-0.41	+1.09	+4.61	+6.38	
Iran War Risk (20% · 8)	-3.46	-2.91	-1.34	+0.42	+2.29	
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	
Fed & Macro (20% · 8)	-0.95	-1.22	-0.26	+0.72	+1.25	
Bitcoin TA — quant (20% · 8)	-0.12	-0.45	+0.35	+1.54	+1.52	
MASTER — mean of the five	-1.34	-0.72	+0.40	+2.06	+3.07	

P lineage (June → Jul 8 → ... → Aug 13 → 16 → 22) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 7, committed) → **32/47/58/82/92** (Aug 22, committed — held flat since Aug 7) · Iran 50/55/62/75/85 → **14/22/38/54/76** (Aug 22, committed — first campaign fatality, first vessel seizure; the UAE "novel escalation" framing carried by the abandoned Aug 17/18/20/21 drafts is corrected and not adopted) · Tokenization 53/57/62/72/85 → 38/40/46/54/61 → 35/36/42/52/61 → ... → 43/41/48/56/62 (Aug 13, re-rated up on CPI/claims) → **43/41/48/56/62** (Aug 22, committed — held flat) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 41/36/45/68/71 (Aug 16) remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on August 22, 2026, a catch-up cycle (comparisons below are vs. the Aug 16 committed baseline)

- 1 month — Mild Bear (−1.34, was −1.41).** Two real moves this cycle largely offset: Iran War Risk fell further (−2.88 → −3.46) on Iran's first vessel seizure since June and a fatal tanker strike was computed reading improved (−1.08 → −0.12) as BTC rose to \$77,169.40. CLARITY (−2.45), Tokenization (+0.29), and Fed & Macro (−0.95) all held flat.
- 3 months — Mild Bear (−0.72, was −0.82).** Same pattern: Iran (−2.29 → −2.91) and Bitcoin TA (−1.57 → −0.45) move opposite directions and roughly cancel; CLARITY (−0.41), Tokenization (+1.41), and Fed & Macro (−1.22) held.
- 6 months — Neutral (+0.40, was +0.31).** Iran (−1.01 → −1.34) and Bitcoin TA (−0.44 → +0.35) again move opposite ways; CLARITY (+1.09), Tokenization (+2.18), and Fed (−0.26) held. Historically, the Fed & Macro pillar has been the most volatile.
- 1 year — Bull (+2.06, was +2.14).** All five pillars still positive: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.54, Fed +0.72, Iran +0.42 (down from +0.62 — the dip-buy thesis at this pillar was before. The window the whole thesis is built around, essentially unmoved in call band.
- 3 years — Strong Bull (+3.07, was +3.12).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Iran +2.29, Bitcoin TA +1.52, Fed +1.25. A structural window this cycle's tactical news, the Fed's rate cut, and the UAE's missile claim.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) remain close at the near end this cycle: P 43/41/48/56/62 (Fed, judged, held flat) vs 49/46/54/66/69 (Bitcoin TA, computed) — the computed read is closer to the judged read. Iran War Risk remains the worst 1-month signal in the set by a wide margin (−3.46), now further from CLARITY (−2.45, the cloture vote itself sits outside this window) than the Fed & Macro's judged read. Iran War Risk (further BTC rally) are pulling in opposite directions at the same time. This report does not resolve that tension by adjusting either pillar to match the other — it logs it.

THE REAL DISAGREEMENT

Near-term: Tokenization is still the strongest near-term pillar (P 52); Bitcoin TA's computed near-term read (P 49/46) is now the second-strongest, ahead of Fed & Macro (P 43/41); CLARITY remains the weakest in the set and got worse this cycle (P 14, down from 20). The master resolves it honestly: Mild Bear at 1 month, unchanged in call band from Aug 16 only because two real moves offset — not because the pillars are in agreement. **Long-term:** the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.29, Fed +1.25) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.3× higher. Remember, Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Two named facts fired this cycle for Iran War Risk (a fatal tanker strike whose "first fatality" framing an adversarial check refuted, and the first vessel seizure since June); the UAE missile claim's "novel escalation" framing also did not

DATE / LEVEL	EVENT
Fired Aug 17-18, CORRECTED on adversarial re-check	Fatal strike in the Hormuz tanker-attack campaign: bulker Minoan Dignity, chief engineer killed — NOT the campaign's first fatality as this draft first claimed; roughly the 18th since late Feb 2026
Fired Aug 17, held to Aug 19	First Iranian vessel seizure since June 22: tanker Amara boarded near Qeshm Island
Corrected this cycle	UAE missile-attack claim (Aug 18) remains single-source; independent research finds it was NOT the UAE's first direct hit (April, May incidents predate it)
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; Trump's Aug 19 White House push and the SEC's parallel Reg Crypto Assets proposal (Aug 18) don't resolve the ethics deadlock
Checked, not found	rwa.xyz total RWA value \$38.32B, tokenized Treasuries ~\$16.15-16.21B, both essentially flat; tokenized-stock exemption talks remain delayed/exploratory
Checked, in line	Jobless claims (week ended Aug 15, 206K) and H.4.1 (week ended Aug 19) both published Aug 20 — modest, offsetting moves; CME FedWatch September-hold ~69.4% essentially flat vs. the ~65% already priced
Pending	Actual signing of a Hormuz agreement the US accepts; whether Bessent's promised sanctions package actually lands and how Iran responds; next jobless claims/H.4.1 (Aug 27), Warsh's first Jackson Hole speech as Chair (Aug 28)
Sept 15	First CLARITY Act procedural (cloture) vote, precisely dated 2:15pm ET; ethics/stablecoin-yield disputes unresolved as of Aug 22
~Aug 31	Historical average cycle-bottom month (cycle month 28.1 currently) passes

Power-law fair value \$138,195	BTC \$77,169.40 sits 44% below fair value (was 48% below on Aug 20)
--------------------------------	---

The master flip line, unchanged from Aug 16: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a would reverse the Fed read (Fed); or the Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, no upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	+0.41
— drop Iran War Risk	+1.12
— drop Tokenization RWA	+0.33
— drop Fed & Macro	+0.89
— drop Bitcoin TA	+0.73
all five in (headline)	+0.70

Every leave-one-out final number stays **positive** (+0.33 to +1.12) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-positive near-term pillars) still round down to **Neutral** Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — this cycle's real moves in Iran War Risk (down further) and Bitcoin TA (up) did specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

DRAFT — AUGUST 22, 2026 (CATCH-UP CYCLE) · AWAITING MY STAMP — FLAGGED FOR MANUAL REVIEW

MASTER: -1.34 / -0.72 / +0.40 / +2.06 / +3.07 · THE FINAL NUMBER: +0.70 (Mild Bull, time-arbitraged, draft)

This cycle covers the Aug 16-22 gap. Aug 17, 18, and 20 drafts were each researched but never delivered (no render/archive/commit followed any of them), and an Aug 21 session got partway through deli stopping. All four are treated as not-delivered per house discipline. Today ran four independent, parallel primary-source research passes (one per pillar), then — new this cycle — a dedicated adversarial fact-check. Aug 32/47/58/82/92: the Senate remains in August recess, the cloture vote remains dated 2:15pm ET Tuesday, Sept 15; Trump's Aug 19 White House push for CLARITY and the SEC's parallel "Regulation Crypto Assets" proposal is a deadlock. Tokenization held at 52/60/66/74/85: a direct rwa.xyz pull shows total RWA value \$38.32B and tokenized Treasuries ~\$16.15-16.21B, both essentially flat; the SEC's Reg Crypto Assets proposal is clearly not a trigger. Fed & Macro held at 43/41/48/56/62: no new H.4.1, CPI, or PPI release in the window (next both Aug 27); the one new jobless-claims print (206K, week ended Aug 15) was already captured in the already priced — no fresh catalyst clears the bar. **Iran War Risk provisionally re-rated down at the front end to 14/22/38/54/76** (from the Aug 16 committed 20/28/41/56/77): Iran's first vessel seizure (Minoan Dignity (chief engineer killed, Aug 17-18, 7+ independent outlets) was ALSO initially drafted as "the first confirmed fatality" in the tanker campaign — **the adversarial fact-check REFUTES that claim**. It's not a fatality per multiple outlets), a toll this report's own prior cycles never surfaced or scored on. **Correction to the record (this one holds up):** the UAE missile-attack claim (Aug 18) that drove the Aug 20 draft's "no call" — the UAE's first direct attack — UAE was hit by missile/drone barrages Apr 1-8 and again at its Fujairah port May 4, both Iran-attributed and predating this incident. That framing is retired, not carried forward. Composite +26.1 (Slight bullish, 5-of-7), monthly -2.1 (Neutral, 2-of-7), quarterly +23.7 (Slight bullish, 4-of-7). **This score set is LEFT AS A DRAFT this cycle and flagged prominently for my manual review** — no call band flipped, and the UAE correction is clean — but the fatality-framing error is a different kind of problem than Aug 20's disputed single-source claim: it's a factual error this report itself made, caused by the Iran War Risk been under-scored for weeks because this campaign's true casualty toll was never tracked? — that a same-day automated pass should not answer by self-approving. Note also, honestly: BTC's score to match the tape, and flags the divergence rather than resolving it quietly.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that this is awaiting Alex's manual review and stamp — it is not yet the system's official stamped position.

Sources

Each pillar report carries its full, freshly-checked source list for this catch-up cycle. The master adds the engine and headline references for this August 22 update.

- The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Iran_War / Tokenization_RWA / Fed_Macro Pillar Reports (catch-up cycle Aug 22, four independent parallel research passes checking for changes since last update) · CoinPicks_Bitcoin_TA_Quant_Pillar_Report (computed Aug 22).
