Pillar Report

Middle East Conflict Risk — Researched, Scored, and Personally Committed

Originally written June 19, 2026; scores committed by me June 19, 2026. Fully re-researched July 8, 13, 18, 25, and 30, 2026, and again as a full weekly refresh on August 8, 2026 (P cut at 1mo/3mo, 24/31/41/56/77 → 20/28/41/56/77, committed and stamped by Alex, last COMMITTED baseline). The Aug 16-22 gap saw four abandoned drafts: Aug 17 (held flat), Aug 18 (cut to 17/25/38/54/76), Aug 20 (cut to 16/24/38/54/76, left for manual review over a UAE missile claim), and Aug 21 (a session got partway through delivering the Aug 20 numbers — 2 of 6 reports touched, no render/selfcheck/archive/commit — before stopping). None were rendered, archived, or committed. An Aug 22 morning catch-up cycle (score set **2026-08-22_draft**) independently re-verified the gap via four parallel primary-source research passes, then adversarially fact-checked the load-bearing new claims before delivery — a step that caught a real error (see below) — and cut P to 14/22/38/54/76, delivered as a draft flagged for manual review. **Correction #1 (confirmed accurate):** the UAE missile-attack claim (Aug 18) remains single-source (UAE MoD only, Iran denies and calls it a possible “false flag”) and was NOT the first direct attack on the UAE as prior drafts framed it — UAE was hit by a missile/drone barrage Apr 1-8 and again at its Fujairah port May 4, both Iran-attributed by UAE’s own government and predating Aug 18; that “novel escalation vector” framing is retired. **Correction #2 (a genuine miss, caught on adversarial re-check):** that draft initially described a fatal strike on the bulker Minoan Dignity (chief engineer killed, Aug 17-18) as “the first confirmed fatality” in the Hormuz tanker campaign — that is FALSE; it is one of a cumulative toll of seafarer deaths since the campaign began late February 2026 this report never previously surfaced or scored on. The Iranian vessel seizure (tanker Amara, held near Qeshm Island since Aug 17, first since June 22) IS confirmed accurate. **THIS VERSION (score set 2026-08-22_draft2) is a separate, later-in-the-day FULL WEEKLY refresh** — the first deep multi-source dive since Aug 8 — that independently re-researched the pillar and ran a second, dedicated adversarial-verification pass specifically re-checking (a) whether the casualty-toll figure holds up and (b) whether anything was missed Aug 19-22. It holds up, but softer than a clean number: cross-checking Wikipedia’s “2026 Strait of Hormuz crisis” infobox (18 total), a mid-July gCaptain snapshot (“at least 15”), and IMO’s own incident tracker (19 seafarer deaths, but scoped to the broader Middle East, not Hormuz cleanly) puts the honest range at **15-19 cumulative deaths (17-18 by the most Hormuz-specific trackers)**, not a flat “18th death” — that softened framing is carried everywhere below. A UAE missile-attack claim the adversarial pass initially flagged as a possible miss turned out, on reconciliation, to be the same Aug 18 episode already in the draft baseline, not a second incident. No new kinetic incident was found Aug 19-22. **P HELD FLAT this cycle at 14/22/38/54/76 — left as draft at delivery (full weekly refreshes are categorically excluded from auto-stamp), then reviewed and COMMITTED BY ALEX on August 23** after independent re-verification of the math and the research trail; see My Decision below. A daily catch-up draft dated August 28, 2026 (score set **2026-08-28_draft**) re-checked two more Hormuz tanker incidents and a single-source Iran-Oman revenue-sharing claim, holding P flat — but that draft was never rendered, selfchecked, archived, or committed, and is treated as abandoned/superseded, the same discipline this report has applied to every other interrupted session (Aug 17, 18, 20, and 21). **THIS VERSION (score set 2026-08-29_draft) is a NEW, independent FULL WEEKLY refresh** against the last committed baseline (2026-08-22_draft2) — the first cycle in several weeks to surface a genuinely two-sided evidence ledger: a confirmed, crypto-specific sanctions escalation (the Aug 24 “Operation Economic Outcast” package, the first Iran sanctions action to explicitly name digital assets as a sanctionable sector and list 30 on-chain addresses, confirmed via direct fetch of home.treasury.gov) against a confirmed de-escalation upgrade (Oman’s own Foreign Ministry, not just Iran, co-confirming a temporary Hormuz corridor Aug 25, confirmed via direct fetch of fm.gov.om). The two roughly offset, alongside a first-of-the-crisis Hormuz transit uptick and a second straight weekly Brent decline on the bull side, and two more tanker incidents plus a firmer casualty count on the bear side. **P HELD FLAT at 14/22/38/54/76 — left as a draft, not auto-stamped**, because this is a full weekly refresh, categorically excluded from delegated auto-stamp authority regardless of move size (here, zero). See My Decision below. **THIS VERSION (score set 2026-08-31_draft) is a light daily catch-up** covering the Aug 29-31 gap: on Aug 30, US forces struck IRGC rocket/mine-launchers on Iran’s Larak Island — the first US strike on

Iranian territory since Jul 29 — directly firing this pillar's own pre-declared flip line ("a resumption of direct US strikes on Iran proper"). Iran retaliated with ballistic missiles on two US-linked Jordan airbases hours later; Jordan intercepted 8 missiles; no confirmed US casualty. **P RE-RATED DOWN to 9/17/34/51/75** (from 14/22/38/54/76), front-loaded and held under 8 points per window. This is a light daily touch, not a full weekly refresh, no window moved >8 points, and the master FINAL NUMBER's call band did not flip vs. the last stamped set — **AUTO-STAMPED per delegated authority. THIS VERSION (score set 2026-09-01_draft) is a further light daily catch-up** covering Aug 31-Sept 1: escalation continued into a second day — a THIRD Hormuz tanker hit (the VLCC Senegal Prosperity, Aug 31), a disputed Iranian claim of a drone strike on the UAE's Al Minhad Air Base (UAE MoD denies the target claim but confirms it intercepted an Iranian drone over its waters), and Trump on-record Aug 31 still weighing further strikes on Iran. **P RE-RATED DOWN again, more modestly, to 7/15/32/50/75** (from 9/17/34/51/75) — no window moved more than 2 points, well under the 8-point auto-stamp threshold. **AUTO-STAMPED per delegated authority** — the new last COMMITTED baseline. **THIS VERSION (score set 2026-09-02_draft) is a further light daily catch-up that turned into the sharpest single-cycle move since Aug 30:** CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran — roughly 50x the scale of the single Aug 30 Larak strike — including, for the first time in this war, direct US strikes on Iranian government oil tankers under a new "tanker for tanker" policy. A US strike reportedly hit a wedding party in Kuhestak, Hormozgan (4+ dead per the Hormozgan governor's office, including a 4-year-old, 60+ injured) — flagged here as SINGLE-NARRATIVE-SOURCED at the core fact level (Iranian state/local authorities; CENTCOM has neither confirmed nor denied it), so it does not by itself move P, but it is the reported trigger for Iran's response: coordinated IRGC ballistic-missile/drone strikes Sept 2 on US-linked bases in FOUR countries at once (Jordan, Bahrain, Iraq, Kuwait) — larger in scale than the single-state Aug 30-31 Jordan strike, but all four are repeat targets, so the "widening to a further NEW state" flip-line clause does not fire. **P RE-RATED DOWN sharply to 1/9/27/47/74** (from 7/15/32/50/75), front-loaded and kept under 8 points per window. **COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026**, retroactively, under Alex's Sept 3 widened delegated daily auto-stamp policy: a call-band flip and the size of a move are no longer disqualifying on their own. The wedding-casualty fact was correctly kept single-narrative-sourced and never used to move P, and nothing about the sourcing or the research itself changed — only the stamping threshold did. This remains the last TRUE committed baseline: 1/9/27/47/74. **Sept 3:** Iran fired a second retaliatory wave on Kuwait and UAE — both repeat targets, no US-manned facility hit, widening clause does not fire. **P HELD FLAT. Sept 5, light daily catch-up (2026-09-05_draft):** held flat again — the Reuters weapons-expert corroboration of the Sept 1 wedding strike resolves attribution of an already-priced event, not new escalation; a Sept 5 Iranian-media report of a US strike on the tanker STARK 1 near Kharg Island is single-narrative and not used to move P. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the STARK 1 incident is real and developing (Iran International separately obtained video of US radio warnings, and AP itself frames it as an Iranian accusation, not a confirmed fact) but CENTCOM has still not confirmed or denied it, so per the sufficiency rule it is NOT used to move P. None of this pillar's flip-line clauses independently fired this week. **HELD FLAT at 1/9/27/47/74. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX**

September 5, 2026. Sept 6 light daily catch-up (score set 2026-09-06_draft): CENTCOM's own on-the-record press release now confirms the Sept 5 tanker strike this report had withheld pending confirmation — and reveals it was materially more serious than known: THREE Iranian tankers (M/T Downy, M/T Stark 1, M/T Kylo) struck in retaliation for an unprovoked IRGC ballistic-missile attack on two US Navy warships, both of which evaded. **P RE-RATED DOWN, modestly, to 1/8/25/45/73** — no window moved more than 2 points, no flip-line clause independently fires (no confirmed US casualty, no widening to a new state, Brent short of \$100), and the master call band held Neutral → Neutral. **AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-08_draft) is a further light daily catch-up** covering Sept 6-8: the new fact is Iran SNSC secretary Mohsen Rezaei's on-record Sept 6-7 announcement (state TV, Press TV, Tehran Times) that Iran will declare a new "restricted zone" from the US Navy's blockade line into the Persian Gulf, sanctioning any vessel that enters — corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu, GlobalSecurity.org) but explicitly a THREAT OF INTENT, not yet executed ("further details... yet to be announced" per Al Jazeera's Sept 7 explainer). No flip-line clause fires (DCAS still 18, Brent ~\$97.29 Sept 7, no new state). **P RE-RATED DOWN, modestly, to 1/7/24/44/73** (from 1/8/25/45/73) — no window moved more than 1 point. **AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-09_draft) is a further light daily catch-up** covering Sept 8-9: CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship") confirms US forces destroyed FIVE more Iranian crude oil carriers on Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Gulf of Oman) and M/T Derya (Kharg Island) — after the IRGC targeted a US Navy warship with ballistic missiles TWICE over the preceding two days, corroborated by 5+ independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org); both Iranian missile attempts were evaded, no US personnel harmed. Separately, Brent crude crossed \$100/bbl intraday Sept 9 for the first time since July 24 (CNBC, ABC News; ~\$100.44, +2.57%) — a single-day

intraday cross, not this pillar's own "sustained Brent >\$100" flip-line threshold, so it does not independently fire that clause, but it is the closest this cycle has come to the flip line. No flip-line clause fires (no US casualty, no new state, only an intraday Brent cross). **P RE-RATED DOWN, modestly, to 1/6/23/43/72** (from 1/7/24/44/73) — no window moved more than 1 point. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-10_draft) is a further light daily catch-up** covering Sept 9-10: two new dated facts. CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military). Jordan is a repeat target, so the widening clause does not fire, and both sides confirm no casualties, so the US-casualty clause does not fire either. Separately, Iran-aligned Houthi forces seized the Yemeni port of Mocha Sept 10, closing in on the Bab el-Mandeb Strait — a second global chokepoint distinct from Hormuz — confirmed by 5+ outlets (The Media Line, Times of Israel, Al Jazeera, SCMP, Jerusalem Post, Cyprus Mail), but the same Houthi/Yemen actor already priced, and no strait closure has actually been executed, so this does not independently fire a clause either. Brent has now traded near/above \$100/bbl for a second straight session (CNBC: above \$101 Sept 9; TradingEconomics: ~\$101.25 Sept 10) — more persistent than Sept 9's intraday cross, the closest this cycle has come to the flip line, but still short of a clean sustained-close call. **P RE-RATED DOWN, modestly, to 1/5/22/42/72** (from 1/6/23/43/72) — no window moved more than 1 point, master call band unchanged (Neutral → Neutral). **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-11_draft) is a further light daily catch-up** covering Sept 10-11: this pillar's own "sustained Brent close above \$100" flip-line clause FIRES on a third consecutive session — Brent closed Thursday Sept 10 up more than 6% above \$107 after trading above \$108 intraday, its highest since May 19, with WTI closing above \$102 for the first time since May (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500 — 4+ independent) — alongside fuller reporting of Iran's Sept 9 shipping wave: 10 vessels attacked near Hormuz (2 US-linked ships, 8 oil tankers), the largest declared wave of the war, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill). A merchant seafarer is not a US service member, so the confirmed-US-combat-death clause does not fire. **P RE-RATED DOWN, modestly, to 1/4/20/40/71** (from 1/5/22/42/72) — 1mo held at the near-floor 1, 3mo -1, 6mo -2, 12mo -2, 36mo -1. No window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar on every scored fact, and the master FINAL NUMBER's call band did not flip anywhere. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-12_draft) is a further light daily catch-up** covering Sept 11-12: Houthi forces, having seized Mocha Sept 10, swept the rest of Yemen's Red Sea coastline by Sept 11 — capturing the final government-held coastal towns (Dhubab, Murad) and Houthi naval forces seizing Mayyun (Perim) Island in the Bab al-Mandeb strait itself, with fighting continuing for Zuqar Island — a materially more severe status (actual control of a second global chokepoint's own islands) than the Sept 10 baseline's "closing in" characterization, confirmed by 6+ independent outlets (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Separately, UKMTO's own Warning 133-26 confirms four projectiles struck two more vessels near Khasab, Oman Sept 10, one set afire (Gulf News, Maritime Executive, The Hill corroborating); an IRGC claim of a Salldrone strike is single-source and not used to move P. Yemen is an existing theater, so the widening clause does not fire; no US casualty, so that clause doesn't either — this is a severity escalation of an already-fired flip-line environment, not a fresh clause firing. **P RE-RATED DOWN, moderately, to 1/2/18/38/70** (from 1/4/20/40/71) — 1mo held at the near-floor 1, 3mo -2, 6mo -2, 12mo -2, 36mo -1. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **LATER THE SAME DAY (Sept 12): a separate FULL WEEKLY refresh (score set 2026-09-12_draft2), the first full-weekly-depth research dive since the Sept 5 full weekly refresh, ran four parallel adversarial research passes across all four qualitative pillars against the 2026-09-12_draft committed baseline (1/2/18/38/70).** One new dated fact clears the sufficiency bar: Saudi Arabia's East-West Pipeline (Petroline) — the kingdom's primary Hormuz-bypass oil-export route, a NEW target distinct from the already-logged Sept 8 Aramco/Jazan refinery strikes — was hit by drones launched from Iraqi territory on Sept 10 (Saudi MFA statement/confirmation issued Sept 11). PRIMARY: Saudi Arabia's own Ministry of Foreign Affairs confirmed pumping stations in the Riyadh/Medina areas were struck, causing injuries and material damage, and said it would not retaliate for now at Baghdad's request; corroborated by 6+ independent outlets (Al Jazeera, CNBC, CNN, Times of Israel, ABC News Australia, OilPrice.com) with satellite imagery of fire/smoke at the pumping stations, plus Iraq's own PM ordering a probe, dismissing the Maysan operations commander, and closing the Shalamchah border crossing. No group has claimed responsibility; President Trump, in Dublin, said Iran was "probably" responsible — a single, hedged, unconfirmed remark, logged as such, NOT as established fact (the Saudi MFA statement itself attributes origin only to Iraqi territory, not to a directing state). Neither flip-line clause fires: the widening clause does NOT fire (Iraq has been an active theater since the Sept 1 IRGC strike on US facilities in Erbil province — escalation within an existing theater, not a new one), and the US-casualty clause does NOT fire (no confirmed US military casualty found); the sustained-Brent->\$100 clause continues to hold (~\$104.61 Sept 12, same as the morning baseline) as persistence, not a fresh trigger. Also logged, not scored: Trump's own account that the Houthis privately signaled they don't want direct US involvement

in Yemen (single-source as to substance, consistent with the already-logged MBS-refused-strikes counterweight), and the BRICS New Delhi summit's joint declaration (Sept 12, all members plus Saudi Arabia/Iran/UAE) urging "maximum restraint" over the escalation — a mild long-horizon diplomatic data point relevant only to the 1yr/3yr framing. The Mayyun Island/Bab al-Mandeb seizure (Sept 10-11) was independently re-verified as still holding, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye, ZeroHedge). Sized small given a single infrastructure strike with no widening and no US casualty: **P RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70** (from 1/2/18/38/70) — 3mo/6mo/12mo -1 each, 36mo held, 1mo held at the near-floor 1. **WEEKLY REFRESH — left as DRAFT for Alex's manual review, full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of move size.** Committed by Alex; Sept 13-14 light daily catch-ups held flat with nothing new clearing the sufficiency bar, AUTO-STAMPED. **Sept 16 (score set 2026-09-16_draft):** RE-RATED DOWN on the 6/12/36mo windows to 1/1/14/33/66 (from 1/1/18/38/70) — the IAEA Board of Governors voted Sept 9 to refer Iran's nuclear file to the UN Security Council, and 130 Iranian lawmakers signed a Sept 12-13 statement calling for NPT withdrawal, with a headline MP describing an emergency bill being drafted (RFE/RL, Tehran Times, Mehr News); Pezeshkian's public no-nuclear-weapons stance and the Foreign Ministry's "still being prepared" framing kept the move modest. AUTO-STAMPED, the last TRUE committed baseline. **THIS VERSION (Sept 17, score set 2026-09-17_draft) HOLDS FLAT at 1/1/14/33/66** — re-checked, no new dated development beyond the Sept 9 IAEA referral and the Sept 12-13 NPT statement already priced; Pezeshkian's and the Foreign Ministry's positions are unchanged. AUTO-STAMPED per delegated daily authority. See My Decision below.

P — the odds this is *good for crypto* by then. **THIS CYCLE (Sept 14, LIGHT DAILY touch, score set 2026-09-15_draft): RE-RATED DOWN to 1/1/18/38/70** (from the Sept 13-committed 3/3/70). **Agency, Sunday September 13:** "It has been decided to postpone to a later date the regional meeting that was to be held on Monday in Salalah, in order to create conditions conducive to a meeting in the Gulf." — **Malay Mail** (Sept 13-14). No new flip-line clause fires (existing theater, no US casualty), but the severity step is bigger than the routine daily grind. 1mo held at **STAMPED SEPTEMBER 12, 2026**, the new last COMMITTED baseline → **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2) 1/1/17/37/70** — one sufficiency-clearing new fact (the Petroline pipeline drone strike, Iraqi-origin, spo weekly refresh) — awaiting Alex's manual review.

Prior cycle (Sept 12, FULL WEEKLY refresh, score set 2026-09-12_draft2): RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70 (from the Sept 12-committed 1/2/18/38/70). Four past cycles (Sept 10, Sept 11, Sept 12, Sept 13) all showed a sustained-\$100 clause continues to hold (Brent ~\$104.61 Sept 12, the same level as the morning baseline) — persistence, not a fresh trigger. **Also logged, not scored:** Trump's involvement in Yemen — single-source as to substance, consistent with (not additive to) the already-logged MBS-twice-refused-strikes restraint counterweight; the BRICS New Delhi summit's escalation," calling for "exercising maximum restraint," and expressing concern over attacks on civilian/nuclear infrastructure — a mild, diplomatic, long-horizon data point relevant only to the holding, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye, ZeroHedge); no new UKMTO warning was found beyond the already-logged Warning 133-2-2026 export route, clears the sufficiency bar (a primary Saudi MFA statement plus 6 independent outlets) for a modest further move given the persistent-pattern read — but it is a single infrastructure data point; the strike doesn't change the long-run strategic outlook, and the BRICS restraint statement is a modest offsetting data point at this horizon); 1mo held at the near-floor 1 — no further room reason for move size — **LEFT AS DRAFT, flagged prominently for Alex's manual review.**

Prior cycle (Sept 12 daily, score set 2026-09-12_draft): RE-RATED DOWN, moderately, to 1/2/18/38/70 (from the Sept 11-committed 1/4/20/40/71). **BEARISH and NEW: a second global oil price rise** — Mocha Sept 10 (logged in the Sept 10 baseline as "closing in" on Bab al-Mandeb), continued an offensive that by Sept 11 captured Dhubab and Murad — the final coastal towns held by the Iranian forces on the coastline; Houthi naval forces separately seized Mayyun (Perim) Island inside the Bab al-Mandeb strait itself, with fighting continuing for Zuqar Island. This is confirmed by 6+ independent outlets. Iran's "in" status the Sept 10 cycle priced — actual control of strait-controlling islands in a second global oil chokepoint distinct from Hormuz, not merely an approach to one. Saudi Crown Prince Mohammed bin Salman (intelligence/targeting-data support offered instead) — a genuine US-restraint data point, logged as an honest counterweight. Per this pillar's own flip-line definitions, Yemen/the Houthis are a threat, not confirmed, so that clause does not fire either — this is a continuation/severity escalation of an already-fired flip-line environment (the direct-US-strikes and sustained-Brent clauses both fire). On Sept 10, 1910 UTC Sept 10, the UK's official maritime security authority — primary source) confirms four unidentified projectiles struck two vessels roughly 4nm west of Khasab, Oman, setting one afire. **(single-source):** IRGC's own claim to have separately struck a US Navy Saildrone Explorer-type unmanned vessel near the Strait entrance — no US/CENTCOM confirmation found. Brent holds at \$104.61, confirming persistence of the flip-line clause that already fired Sept 10-11, not a fresh trigger. **P RE-RATED DOWN: 1mo held at the near-floor 1, 3mo 4 → 2, 6mo 20 → 18, 12mo 40 → 38, 36mo 70 → 60** — the strike grind of the past week, sized moderately larger than recent 1-point touches but still restrained since no flip-line newly fires — the sourcing clears the primary-plus-multi-outlet bar (UKMTO verification passed clean, so **this set is AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."**

Prior cycle (Sept 11, score set 2026-09-11_draft): RE-RATED DOWN, modestly, to 1/4/20/40/71 (from the Sept 10-committed 1/5/22/42/72). **BEARISH and NEW — a second, distinct flip-line** — Sept 10 second session came close to but did not cleanly fire, now fires on a third consecutive session: Brent **ended Thursday Sept 10 up more than 6% above \$107** after trading above \$107 (Rigzone/Bloomberg wire Sept 10, TradingEconomics, Vantage Markets, NAI500 — 4+ independent), and Brent was still ~\$104.36 midday Friday Sept 11, roughly 9% higher on the week des. **"Thursday Sept 10"** — an intraday read; Thursday's actual close was far higher, above \$107. **BEARISH and NEW, second fact:** fuller reporting of the Sept 9 shipping wave — Iran attacked 10 ships since the war began, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill — 4 independent). A merchant seafarer is *not* a US service member. The widening clause does not fire either. **Logged but NOT used to move P (single-source):** a compilation putting Hormuz throughput at 7 transits on Sept 9 against a Kpler 10-day average of 1.5 transits. Hormuz plus the IEA's 2.5 mb/d 2026 demand-contraction forecast — the market is not pricing monotonic escalation. **P RE-RATED DOWN: 1mo held at the near-floor 1, 3mo 5 → 4, 6mo 22 → 20** — but under the rubnook's widened delegated authority the size of a move is not itself a reason to withhold the stamp; the sourcing clears the primary-plus-multi-outlet bar and verification passes.

Prior cycle (Sept 10, score set 2026-09-10_draft): RE-RATED DOWN, modestly, to 1/5/22/42/72 (from the Sept 9-committed 1/6/23/43/72). Two new dated facts. **BEARISH and NEW: CENTCOM confirms Jordan's Al Azraq (Muwaffaq Salti) air base** — Jordan's armed forces say 18 were intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera Sept 9, MiGFlug, GlobalSecurity.org DOD statement; CENTCOM state clause does NOT fire; CENTCOM and Jordan both confirm no casualties, so the confirmed-US-casualty clause also does NOT fire (DCAS remains 18, unchanged since Sept 4 — a separate fact; CENTCOM's own no-casualties statement). **BEARISH and NEW: Iran-aligned Houthi forces seized the Yemeni Red Sea port city of Mocha on Sept 10, closing in on control of the Bab el-Mandeb Strait** — outlets (The Media Line, Times of Israel, Al Jazeera, South China Morning Post, Jerusalem Post, Cyprus Mail), clearing the sufficiency bar. This is the same Houthi/Yemen actor and theater as the Sept 11 cycle — outlets describe Houthis as "closing in on" and "threatening" control, not as having executed a blockade — so it does not independently fire a flip-line clause either. Separately, Brent crude rose 10% since May; TradingEconomics: ~\$101.25 Thursday Sept 10) — more persistent than Sept 9's single-day intraday cross, but still short of a clean multi-session "sustained" call by this pillar.

Prior to this cycle (Sept 9, score set 2026-09-09_draft): P was RE-RATED DOWN, modestly, to 1/6/23/43/72 (from the Sept 8-committed 1/7/24/44/73). **BEARISH and NEW: CENTCOM forces destroyed FIVE more Iranian crude oil carriers on Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Gulf of Oman), and M/T Derya (Kharg Island) — after the independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org) in addition to CENTCOM's own release — clears the sufficiency bar.** CENTCOM confirms both Iranian missile strikes on Sept 8 — and this is a repeat pattern (Gulf of Oman, Kharg Island are both existing theater), not a widening to a further new state. Separately, Brent crude crossed \$100/bbl intraday today (Sept 9) for the first time since 2011 ("oil price worries") and ABC News, trading ~\$100.44, +2.57% — but this is a single-day intraday cross, not this pillar's own "sustained Brent >\$100" flip-line threshold, so it does not independently fire its own announcement (already logged in the Sept 8 baseline as a not-yet-executed threat) remains in the same state — coverage today still describes boundaries as unspecified/forthcoming, so it is already priced, not a fresh flip-line event, sized consistently with those cycles' modest per-cycle cuts. **P RE-RATED DOWN: 1mo held at the near-floor 1 (no further room), 3mo 7 - 6, 6mo 10 - 9** (from the Sept 8-committed 1mo 10 - 9, 3mo 10 - 9, 6mo 10 - 9) — so per the runbook's delegated daily auto-stamp authority the primary-source-plus-multi-outlet bar, and the master FINAL NUMBER's equal-weight call band did not flip (Neutral → Neutral) — so per the runbook's delegated daily auto-stamp authority the primary-source-plus-multi-outlet bar, and the master FINAL NUMBER's equal-weight call band did not flip (Neutral → Neutral).

Prior to this cycle (Sept 8, score set 2026-09-08_draft): P was RE-RATED DOWN, modestly, to 1/7/24/44/73 (from the Sept 6-committed 1/8/25/45/73). BEARISH and NEW: Iran's SNS Iran will declare, "in the coming days," a new "restricted zone" beginning at the US Navy's blockade line and extending into the Persian Gulf, with any vessel entering it placed on a "blacklist." This is corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu Agency, Newsbytes, WFLA/Nexstar, GlobalSecurity.org) reporting the same on-record statement — clearing the way for Iran's own Sept 7 explainer states "further details, including the precise boundaries, have yet to be announced," and no zone had actually been declared as of this cycle's research cutoff. Consistent with the "weighing further strikes" comment), this is sized as a small continuation-of-escalation cut, not a flip-line event: DCAS US KIA remains 18 (unchanged since Sept 4), no widening to a further new count; GlobalSecurity's Day 192 (Sept 7) blockade count of 92 vessels redirected / 3 disabled / 2 boarded (up from Day 190's 87/3/2 on Sept 3) is a continuation of the already-priced blockade-enforcement; per Rezaei; the existing temporary 7-mile corridor from late August remains the operative arrangement). **P RE-RATED DOWN: 1mo held at the near-floor 1 (no further room), 3mo 8 → 7, 6mo 7 → 6** (no daily touch, no window moved more than 1 point, sourcing clears the primary-source-plus-multi-outlet bar, and the master FINAL NUMBER's equal-weight call band did not flip (Neutral → Neutral) stamped by "Alex (auto-stamped)."

Prior to this cycle (Sept 6 light daily catch-up, score set 2026-09-06_draft): P was RE-RATED DOWN, modestly, to 1/8/25/45/73 (from the Sept 5-committed 1/9/27/47/74). BEARISH a and is more serious than known. CENTCOM's own on-the-record press release (centcom.mil, corroborated by Al Arabiya, Jerusalem Post, CNN, NBC, and 5+ other independent outlets) states that the M/T Stark 1 (permanently disabled near Jask), and M/T Kylo (completely destroyed in the Gulf of Oman) — in retaliation for the IRGC firing ballistic missiles at two US Navy warships (an aircraft carrier and Admiral Brad Cooper, CENTCOM's commander: "If you shoot at two of our ships, we will impose an even higher economic cost — taking out three of yours." This clears the sufficiency bar for CENTCOM silent) — it is now primary-sourced and multiply corroborated, and it reveals a materially more serious escalation than a quiet single-tanker interdiction: a direct, unprovoked Iranian attack on two US naval vessels plus three "US-linked" vessels and a US naval drone in the Strait of Hormuz (Al Jazeera's live blog, Euronews) are IRGC's own claims only — not yet US-confirmed, so per the sufficiency rule, no confirmed new US combat death (DCAS still 18 as of Sept 4, unchanged from the standing count), no widening to a further new state (Kharg Island, Jask, and the Gulf of Oman are all existing sustained-flip threshold. The cut is sized as a confirmed-escalation/severity-upgrade to an already-known event, not a fresh flip-line shock, and kept small: 1mo held at the near-floor 1 (no further escalation) clears the primary-source-plus-multi-outlet bar, and the master FINAL NUMBER's equal-weight call band did not flip (Neutral → Neutral) — so per the runbook's delegated daily auto-stamp a

Prior to this cycle: P was RE-RATED DOWN SHARPLY to 1/9/27/47/74 (Sept 2, committed Sept 3, then HELD FLAT through Sept 3's Kuwait/UAE repeat-target strikes and the Sept 5 full 7/15/32/50/75) — researched Sept 2, **COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026** under Alex's widened daily auto-stamp policy. **BEARISH and CONFIRMED, the load-bearing flagged.** CENTCOM confirmed US strikes hit nearly 100 targets across Iran Sept 1-2 — IRGC air-defense sites, radar, mine-laying capability, communications sites, and anti-ship cruise-missile launchers (Bloomber, UPI). For the first time in this war, the US struck Iranian government oil tankers directly (engine rooms), under a newly reported Trump-approved "tanker for tanker" policy, a market shock — \$95-96.6/bbl, WTI to ~\$91-92, still short of the \$100 flip line. A US strike on Kūhestak, Sirik County, Hormozgan (near the Strait) reportedly hit a wedding party: the Hormozgan governor's office confirmed the strike. **EXPLICITLY AS SINGLE-NARRATIVE-SOURCED at the core fact level:** the casualty claim originates with Iranian state and local authorities, and CENTCOM's Cmdr. Tim Hawkins told CBS that the claim was "widened" through multiple Western outlets report the claim (wide pickup of a single-narrative core fact is not the same as multi-sourcing the fact itself). It is reported here as context for what it triggered: simultaneously — Jordan, Bahrain, Iraq, and Kuwait — a materially larger, four-country retaliation versus the single-state Jordan strike Aug 30-31. But all four are REPEAT targets already struck in this war's own tracker pages), so the pillar's own "widening to a FURTHER NEW state with confirmed attribution" flip-line clause does NOT fire. Most projectiles were intercepted (Jordan: roughly 100% and no confirmed new US combat death has been found as of this run — so neither the casualty clause nor the widening clause independently fires either. The already-fired (Aug 30) "resumption of hostilities" clause does not fire down this cycle. Both sides are now on-record threatening larger future action: President Trump threatened a "significantly larger response" if Iran retaliates further; an unnamed senior Iranian official said Iran would "escalate the response" to any US strike, not de-escalation. The cut is front-loaded and kept under the 8-point/window auto-stamp threshold: 1mo 7 → 1, 3mo 15 → 9, 6mo 32 → 27, 12mo 50 → 47, 36mo 75 → 74. **Originally left as a single-narrative-sourced event,** today's four-country retaliation — is single-narrative-sourced even though widely reported, so confidence in today's sizing was lower than for a clearly multi-sourced primary event; (2) the scale of the incident sizing precedent; (3) both sides' on-record threats of much larger responses ahead raised the cost of a miscalibrated cut. It also independently flipped the master FINAL NUMBER's evidence threshold to 100% — auto-stamp on its own. **On September 3, 2026, Alex reviewed this cycle and widened the delegated daily auto-stamp policy: a call-band flip and move size are no longer disqualifying for this cycle.** Alex's decision was still was not used to move P — only the stamping threshold changed. **COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026.** See My Decision below for the full reasoning.

Prior to this cycle (Sept 1 light catch-up): P was RE-SATED DOWN to 7/15/32/50/75 (from the Aug 31-mixed committed 9/17/34/51/75) — AUTO-STAMPED per delegated daily authority. The cut (see below) was explicitly sized on the assumption that "one resumed-strike night is not yet a sustained new campaign" — that assumption is undercut by what happened next. A THIRD H nautical miles northeast of Khasab, Oman, during outbound transit — hit on the port side, engine room, and ballast tank; no casualties, no environmental impact reported; UKMTO-logged. The drone strike on the UAE's Al Minhad Air Base near Dubai; the UAE Ministry of Defense explicitly DENIED that Al Minhad was targeted, while separately confirming its air force intercepted an I cross-border drone incursion, a genuine (if unconfirmed-as-a-hit) attempt to widen beyond the repeat-target Jordan pattern. Jordan was struck again Aug 30-31, but as a repeat target (already weighing further strikes on Iran, calling it "a relatively little war for us" (CBS News, Breitbart, Yahoo — on-record, multi-source) — explicitly not signaling de-escalation. Brent crude continued Labor Day weekend, the second straight cycle of gains on this news thread. No new confirmed US casualty, and no confirmed hit on UAE territory (UAE denies), so this does NOT indicate "state struck" clause fires cleanly. This is a continuation/erosion of the "single incident" framing, not a fresh shock of comparable size to the Aug 30-31 cut itself — hence the small move, well up Corroborated across CBS News, Al Jazeera, Breitbart, Yahoo, Jerusalem Post, ABC News, Seatrade Maritime, Iran International, and UKMTO. Prior to this, on Aug 30 US forces struck two IR ships in the Strait — CENTCOM spokesperson Capt. Tim Hawkins confirmed on the record, corroborated by 20+ independent outlets (Bloomberg, CNBC, NBC News, Reuters, Newsweek, ABC News, Al Jazeera) — first acknowledged US strike on Iranian territory since Jul 29, ending the ~28-30-consecutive-clean-night streak the Aug 29 baseline explicitly cited as part of its bullish case, and it directly fired the "thesis as broken") — not a novel judgment call, a pre-committed heavy firing exactly as written. IRGC confirmed Iranian soldiers/civilians killed or wounded at Larak (no precise toll given) and Jordan's military said it intercepted 8 missiles, and Iran claims "heavy damage" to base infrastructure — unconfirmed by the US or Jordan beyond the interception, so logged as Iran-source, not a strike precedent for a comparable single-incident shock: 1mo 14 ~ 9, 3mo 22 ~ 17, 6mo 38 ~ 34, 12mo 54 ~ 51 and 36mo 76 ~ 75. Prior to that, the Aug 29 full weekly refresh had held P flat at **sanctions package, Aug 24**. Directly fetched from [home.treasury.gov](https://home.treasury.gov/press-releases/sb0613): press release sb0613 ("Treasury Launches Unprecedented Campaign Against Iranian Regime on Economic D-Day") and independent trade-compliance/crypto-intelligence outlets (TRM Labs, Chainalysis, CryptoTimes) plus law-firm client alerts. ~60 entities/individuals/vessels were designated across Hong Kong. FIRST TIME digital assets was explicitly named as a sanctionable sector under this program — 30 crypto addresses across Bitcoin, Ethereum, and TRON were listed. Unlike the sanctions this cycle, confirmed, and directly crypto-relevant — a genuine escalation. It continued Aug 28 with a new Bank Melli-Dubai designation. Two more Hormuz "unknown projectile" tanker incidents fired this cycle, safe, UKMTO) — both comparable in severity to the already-established pattern. CENTCOM commander Adm. Brad Cooper gave an on-record briefing Aug 28 (corroborated by UPI, The National, and recognized shipping lanes; ~1,500 commercial vessels have transited since blockade enforcement began; ~75 vessels turned back and 3 disabled for evading the blockade; no oil has been exported since the shock. IMO's six-month casualty count (Aug 28, quasi-primary IMO briefing, corroborated by 4 outlets) settles at 19-20 dead (seafarers + port workers) across 68-70 incidents — the upper end of the range. **Oman's own Foreign Ministry co-confirmed a Hormuz corridor, Aug 25**. Directly fetched from fm.gov.om/en/53722 (Oman's own government site) — a genuine upgrade, because in every cycle, a statement. Terms: a temporary 7-mile-wide joint navigational corridor (entry/exit through Iranian waters), a joint mine-clearing project, and continuing technical talks toward a permanent corridor. The "closed" pending US compliance with the lapsed June MoU. No public fee/revenue terms were disclosed in the joint statement; a separate IRGC spokesman claim (Aug 26) of an Iran-Oman deal was as prior single-source claims. Trump declared the Strait "demined" with a zero-tolerance policy on new mines Aug 25 (Reuters, Axios, France24, US News) — undercut two days later by the release of the week for the week of Aug 17-23 (USNI News, citing Lloyd's List Intelligence — quasi-primary shipping data, 2 independent pieces Aug 21 & Aug 28) — 114 transits vs. 87 the prior week (western sources) — confirmed uptick of the whole crisis. Brent eased for a SECOND straight week: ~\$88.24 (Aug 25) — ~\$89.13-89.3 (Aug 27, weekly loss >5%) — ~\$88.29-90.55 (Aug 28) — down from ~\$93-94 the prior week on the Hormuz progress. No new confirmed US combat death Aug 22-29 (checked directly — one initial-looking hit, Sgt. Michael Emmanuel Swinton, was actually killed Jul 18-19, already confirmed by the US and Iran found — GlobalSecurity's Day-181 tracker (checked Aug 27) confirms a 28th consecutive night with no confirmed strike. **Net assessment: the new escalation and the new de-escalation** — the week without a new attack/fatality/seizure — is NOT met, since the Aug 27 attack breaks the "clean week" clause and the corridor deal remains Iran+Oman only (not US-accepted). Consider the week in five windows.

Quality — how trustworthy the evidence is. This cycle's load-bearing fact — the Petroline pipeline drone strike — is corroborated by a primary Saudi Ministry of Foreign Affairs statement plus sufficiency bar; the single-source Trump "probably Iran" attribution is explicitly NOT used to move P. The prior cycle's load-bearing fact — the Bab al-Mandeb chokepoint seizure — remains confirmed. Khasab vessel strikes remain confirmed via UKMTO's own official warning plus 3+ independent outlets. Quality (the 0-1 input) is unchanged this cycle per house rules: 0.60/0.65/0.70/0.65/0.5

Impact — 8 out of 10, the uniform value shared by every pillar in the equal-weight model. BTC traded at \$76,916.53 on Sept 14, firming from \$76,808.69 on Sept 13 and \$77,269.22 on Sept 12. The house discipline this pillar's score is not adjusted to chase or match the tape either way. For context, BTC traded at \$76,581.44 on Sept 2, down from \$78,038.78 on Sept 1 — the real, visible tape.

The Claim

The thesis, and where I differ from the consensus — updated September 16, 2026 (light daily touch, P re-rated down on the 6/12/36mo windows as the nuclear track escalates alongside the shooting war)

This cycle (Sept 16): the crowd's attention today is almost entirely on the CLARITY Act vote failure, not Iran — but two real, dated escalatory facts landed this week on the nuclear track that this Iranian lawmakers publicly pushed for NPT withdrawal on Sept 12-13. **Me:** I'm treating this as real but bounded — a parliamentary push and an institutional referral are documented facts, not a claim. Both cut against reading this as a fait accompli. That's why the move lands entirely on the 6/12/36mo windows (18 → 14, 38 → 33, 70 → 66) and not on 1mo/3mo, which were already sitting at this price. The Saudi pipeline, the Salalah postponement, Hormuz shipping — showed nothing new this cycle, so those didn't independently move anything.

Prior cycle (Sept 12, full weekly refresh): the crowd will likely either read the Petroline pipeline strike as proof Iran is now hitting Saudi Arabia's core oil-export infrastructure directly, or dismiss it for lack of support. **Me:** the honest read sits between those: a drone strike launched from Iraqi soil hit a NEW kind of target (Saudi Arabia's primary Hormuz-bypass export artery, not a refinery this time) for the first time. That Trump's Dublin remark is a single hedged guess, not evidence, and score accordingly: the move is small (3mo/6mo/12mo -1 each) precisely because the load-bearing fact is a single infrastructure strike. Because I am siding with either the "Iran did it" or "no proof, ignore it" framings. The BRICS restraint declaration and Trump's own account of Houthi reluctance to draw in the US are both logged for context.

Prior cycle (Sept 12 daily): the crowd will likely either treat the Bab al-Mandeb island seizures as a headline-grabbing new front that should crater risk assets, or dismiss it as "just Yemen" background noise. It is structural, not emotional — Iran-aligned forces now hold actual chokepoint-controlling islands in a SECOND global oil corridor, not merely "closing in" on one, and that upgrades the standing risk. This cut larger than the recent 1-point daily touches for exactly that reason, while still stopping short of treating it as a flip-line event, because it isn't one by this pillar's own pre-declared, falsifiable rule. After the fact to justify a bigger move. The MBS-request-refused detail is logged honestly because it cuts the other way: the US is not chasing every escalation into a wider war.

Prior cycle (Sept 11): the crowd will read a \$108 print and a 6% up-day in Brent as the war finally repricing energy — or, watching Friday's 3% give-back on Hormuz diplomacy headlines, wave off. A sustained Brent close above \$100 — and three consecutive sessions above it, including a close above \$107, is that clause firing, not a near-miss. I said so in the two prior cycles when it hadn't. Still no confirmed US combat death since Sept 4, still no strike on a further new state, and the one death in the Sept 9 shipping wave was a merchant seafarer, not a service member. So this is a repeat pattern.

Prior cycle (Sept 10): the crowd is likely to either read the Al Azraq missile barrage as a dangerous new peak of the conflict, or wave off a Yemeni port city changing hands as background noise. Jordan is in large isolation, but Jordan has now absorbed this kind of strike repeatedly since Jul 28, and both CENTCOM and Jordan's own military confirm no casualties this time either — a repeat-pattern. The same actor this pillar has tracked in the Red Sea/Bab al-Mandeb theater for months, so it doesn't independently widen the war, but "closing in on" a second global chokepoint is a genuine structural upgrade. A second straight session is the more important tell than either strike — not yet a sustained close, but the clearest signal yet that markets are pricing this as durable rather than a one-day spike. Re-rated down since Sept 6.

Prior cycle (Sept 9): the crowd is likely to either read Brent's intraday \$100 cross as confirmation the flip line has effectively fired, or dismiss the 5-tanker CENTCOM strike as "more of the same." The closest this cycle has come to the flip line, but it is explicitly not the same thing as a sustained close above \$100, which is what this pillar's own pre-declared threshold requires — so it does not count. The CENTCOM-confirmed 5-tanker strike is a larger single incident than the 3-tanker strike this pillar priced on Sept 6, but it is the same repeat pattern (Gulf of Oman, Kharg Island) responding to a repeat trajectory, not a new category of event, so I am re-rating down modestly again (1/6/23/43/72, from 1/7/24/44/73) rather than sharply, consistent with the Sept 6 and Sept 8 cuts.

Prior cycle (Sept 8): the crowd is likely to either dismiss Rezaei's restricted-zone announcement as Iran "talking tough" without follow-through, or treat it as an imminent full closure of a new strategic corridor. It is a real escalatory signal worth logging and worth a small cut, but it is not yet an executed act — no boundaries, no enforcement mechanism, and no confirmed incident tied to it as of this cycle's flip-line. Clause fires on it (no US casualty, no new state, Brent short of \$100) and it is consistent with — not a departure from — this pillar's past treatment of announced-but-unexecuted escalatory moves. Coming days" as bullish either — until it is actually signed, it's the same "very close" pattern this pillar has discounted for weeks.

Prior cycle (Sept 6): the crowd was likely to read CENTCOM's own confirmation of the Sept 5 tanker strike as a relief ("finally, official clarity") rather than what it actually was — a confirmation that the IRGC ballistic-missile attack on two US Navy warships that the US answered by destroying three tankers. Re-rated down modestly (1/8/25/45/73, from 1/9/27/47/74) rather than sharply, because the event was more serious than previously known — was still a continuation of the same "resumption of direct US strikes" trajectory already priced in since Aug 30, not a new category of event. Sept 6's separate unconfirmed by the US, and the sufficiency rule is exactly what stops a claim like that from doing more work than it's earned.

The crowd: is likely to anchor on the wedding-strike casualty claim as the emotional center of today's news, and either (a) treat it as a confirmed atrocity driving the story, or (b) dismiss the whole thing as an underlying US strike wave (nearly 100 targets, first-ever direct tanker strikes) is independently, multi-source confirmed regardless of how the casualty dispute resolves, and is the real story this cycle.

Me: cutting sharply to 1/9/27/47/74, versus the Sept 1 baseline (7/15/32/50/75, auto-stamped). This is the largest single-cycle P move this pillar has made since the Aug 30-31 flip-line-firing cut, and Alex's manual review. Three reasons, stated plainly: (1) the core wedding-casualty fact — the political and emotional driver of today's four-country Iranian retaliation — is single-narrative-sourced and widely reported; my confidence in today's sizing is lower than for a cleanly multi-sourced primary event, and I don't want to self-approve a cut this large resting partly on that; (2) the scale jump — ~50x — sizing precedents (Jul 28 Jordan, Aug 30 Larak) don't cleanly cover, and sizing a cut for a genuinely new magnitude of event is exactly the kind of judgment call the runbook says shouldn't be quite so costly than usual given what could follow. That said, the cut is still evidence-bounded, not panic-sized: kept under 8 points per window, and the four-country retaliation does NOT independently justify a larger cut.

My edge: the discipline here is refusing to let a single-source emotional fact do more work than it's earned, in either direction — not discarding it (it's genuinely the trigger for today's retaliation and the count, tanker strikes, four-country retaliation, mutual escalation threats) support on their own. The crowd either over- or under-reacts to a claim like this; this pillar tries to size around it instead.

Honesty check against the tape: BTC fell from \$78,038.78 (Sept 1, Bitstamp) to \$76,581.44 (Sept 2) — a real, visible risk-off move that for once tracks the same direction as this pillar's own scores evidence, not price action — but the comparison itself is logged here explicitly as an honesty check for the reader.

The Facts

As of September 16, 2026 — LIGHT DAILY touch (2026-09-16_draft). Hard numbers only, sources on the last page. New facts from this cycle appear first; earlier facts are carried forward unchanged (still load-bearing) below.

- ★ ★ NEW — the IAEA Board of Governors voted Sept 9, 2026 to refer Iran's nuclear file to the UN Security Council. A primary institutional action by the IAEA itself, escalating international pressure.
- ★ ★ NEW — 130 Iranian lawmakers signed a statement Sept 12-13, 2026 calling on parliament to begin the legal process for Iran's withdrawal from the Nuclear Non-Proliferation Treaty (globalsecurity.org mirror), Tehran Times, and Mehr News — 3 independent outlets, though two are Iranian state-affiliated, so treated as corroborated reporting of a documented parliamentary action.
- Counterweight, same sourcing set: President Pezeshkian publicly reiterated Iran is not seeking nuclear weapons, even as the parliamentary push proceeds. Foreign Ministry spokesman Ebrahim Amini said "Iran's parliament in later stages" — a real escalatory step, not a completed NPT exit.
- Nothing new found on the Salalah Iran-GCC ministerial (still postponed, no new date), the Saudi East-West pipeline (still offline), or Hormuz shipping beyond what the Sept 15 baseline already covered.

Carried forward from the September 12 full weekly refresh and the daily touches since — still load-bearing, not contradicted:

- ★ ★ NEW — Saudi Arabia's East-West Pipeline (Petroline), the kingdom's primary Hormuz-bypass oil-export route, was hit by drones launched from Iraqi territory Sept 10 (Saudi Ministry of Foreign Affairs confirmed pumping stations in the Riyadh/Medina areas were struck, causing injuries and material damage, and said it would not retaliate for now at Baghdad's request for fire/smoke at the pumping stations). Iraq's PM ordered a probe, dismissed the Maysan operations commander, and closed the Shalamchah border crossing as a precaution.
- Attribution caveat, stated carefully: no group has claimed responsibility for the pipeline strike; the Saudi MFA statement attributes origin only to Iraqi territory, not to a directing state. Prescribed as established fact.
- Neither flip-line clause fires: the widening clause does NOT fire (Iraq has been an active theater since the Sept 1 IRGC strike on US facilities in Erbil province); the US-casualty clause does NOT fire.
- Counterweight, logged: Trump's own account (same Dublin remarks) that the Houthis privately signaled they don't want direct US involvement in Yemen — single-source as to substance, corroborated by a joint declaration (Sept 12, all members plus Saudi Arabia, Iran, and UAE) called for "exercising maximum restraint" and voiced concern over attacks on civilian/nuclear infrastructure — a mild counterweight.
- Re-verified independently: the Mayyun (Perim) Island/Bab al-Mandeb seizure (Sept 10-11) still holds, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye).

Carried forward from the Sept 12 light daily catch-up (score set 2026-09-12_draft, auto-stamped — still load-bearing):

- ★ ★ NEW — Houthi forces complete their sweep of Yemen's entire Red Sea coastline (capturing Dhubab and Murad by Sept 11, the last government-held coastal towns) and seize the Bab al-Mandeb chokepoint moving from "closing in on" to actual island-level control (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald — 6+ independent). Yemen is existing theater, so the move is logged.

- Carried forward from Sept 9 (re-verified this cycle — still load-bearing).

- Carried forward from Sept 8 (re-verified this cycle — still load-bearing).

- Carried forward from Sept 6 (re-verified this cycle — still load-bearing).

- Carried forward from Sept 2 (re-verified through the Sept 5 full weekly refresh and this cycle — still load-bearing).*

- Carried forward from the Sept 1 light daily catch-up (score set 2026-09-01_draft, now superseded — still load-bearing):*

- ★ **A THIRD Hormuz tanker hit this week, Aug 31, CONFIRMED via UKMTO plus multi-source reporting.** The Liberian-flagged VLCC Senegal Prosperity was struck by three unknown projectiles, one of which hit the vessel's bow, rupturing a 1,000-ton ballast tank. No casualties, no environmental impact reported; UKMTO-logged. This follows the already-priced Metro Venetian (Aug 24) and Al Salam II (Aug 25) incidents — the third such hit in the Gulf of Oman in less than a month.

- ★ **Iran's army claims a drone strike on the UAE's Al Minhad Air Base; the UAE Ministry of Defense DENIES that base was targeted while CONFIRMING a separate cross-border drone strike** — explicitly denied Al Minhad was targeted, while separately confirming its air force intercepted an Iranian drone detected over UAE territorial waters, approaching from Iran. So: a disputed target. Jerusalem Post, ABC News, Seatrade Maritime, and Iran International.
- ★ **President Trump said on-record Aug 31 he is still weighing further strikes on Iran**, calling it "a relatively little war for us" (CBS News, Breitbart, Yahoo — on-record, multi-source) — explicit.
- **Brent crude continued higher into Sept 1 (~+2% Tuesday per multiple market-desk reports)** on fresh-clash fears — the session after the long Labor Day weekend, the second straight of gains.
- **Jordan was struck again Aug 30-31**, but remained a repeat, not a "further new," state per this pillar's own framing (already struck Jul 28 and again as part of the Aug 30 IRGC retaliation) — explicit.
- **BTC traded at \$78,038.78 on Sept 1** — down from \$78,447.16 on Aug 31 (Bitstamp).

Carried forward from the Aug 31 light daily catch-up (score set 2026-08-31_draft, now superseded — still load-bearing):

- ★ **Resumed direct US strike on Iranian territory, Aug 30, CONFIRMED via on-record CENTCOM spokesperson plus 20+ independent outlets.** US forces struck two IRGC rocket/mine-launchers (CENTCOM) confirmed on the record; corroborated by Bloomberg, CNBC, NBC News, Reuters, Newsweek, ABC News, Al Jazeera, Fox News, RFE/RL, Epoch Times, Daily Caller, and others. The ~28-30-consecutive-clean-night streak. **Directly fired this pillar's own pre-declared flip line** ("a resumption of direct US strikes on Iran proper... = treat the dip-buy thesis as broken").
- ★ **IRGC retaliatory ballistic-missile strikes on two US-linked Jordan airbases, Aug 30-31, CONFIRMED via Jordan's own military statement plus multi-source reporting.** IRGC said it struck Jordanian airbases. Iran claims "heavy damage" to base infrastructure, unconfirmed by the US or Jordan beyond the interception — logged as Iran-sourced, not scored as fact. IRGC separately confirmed Iranian missile strikes on Israel.
- **Press (Reuters/CNBC) framed the renewed exchange as weighing on Asian equities and US futures**, reversing the prior two-week Brent decline.
- **BTC traded at \$78,447.16 on Aug 31** — up from \$77,666.16 on Aug 29 (Bitstamp).

Carried forward from the Aug 29 full weekly refresh (score set 2026-08-29_draft, now superseded — still load-bearing):

- ★ **"Operation Economic Outcast" sanctions package, Aug 24, CONFIRMED via direct fetch of home.treasury.gov.** Press releases sb0613 ("Treasury Launches Unprecedented Campaign to Isolate Iran's Economy" 20260824 — corroborated by state.gov and 3+ independent trade-compliance/crypto-intelligence outlets (TRM Labs, Chainalysis, CryptoTimes) plus law-firm client alerts. ~60 entities/individuals targeted for secondary sanctions determinations. **For the first time, digital assets was explicitly named as a sanctionable sector** — 30 crypto addresses across Bitcoin, Ethereum, and TRON were listed. Unlike prior cycles, this was a new Bank Melli-Dubai designation.
- ★ ★ **NEW — Oman's OWN Foreign Ministry co-confirmed a temporary Hormuz corridor, Aug 25, CONFIRMED via direct fetch of fm.gov.om/en/53722.** A genuine upgrade: in every prior cycle, the US had been the primary source of the claim. Statement terms: a temporary 7-mile-wide joint navigational corridor (entry/exit through Iranian waters), a joint mine-clearing project, and continuing technical talks toward a permanent corridor. "The corridor will remain closed" pending US compliance with the lapsed June MoU. No public fee/revenue terms were disclosed; a separate IRGC spokesman claim (Aug 26) of an Iran-Oman revenue-sharing deal was not used.
- **NEW — two more Hormuz "unknown projectile" tanker incidents.** Aug 24, off Oman's coast (engine-room damage, vessel disabled, no casualties, UKMTO); Aug 27 (fire onboard, extinguished, vessel disabled, no casualties, UKMTO).
- **NEW — CENTCOM commander Adm. Brad Cooper's on-record briefing, Aug 28** (corroborated by UPI, The National, Washington Times, The Hill, RedState, IranWire): US forces cleared the corridor. "No vessels have transited since blockade enforcement began; ~75 vessels turned back and 3 disabled for evading the blockade; no oil has been exported from Iran since the blockade resumed. Read a transcript." — explicit.
- **NEW — IMO's six-month casualty count (Aug 28, quasi-primary IMO briefing, corroborated by 4 outlets) settles at 19-20 dead** (seafarers + port workers) across 68-70 incidents — the highest since the 2011-12 period.
- **NEW — Trump declared the Strait "demined" Aug 25** with a "zero tolerance" policy on new mines (Reuters, Axios, France24, US News) — undercut two days later by the Aug 27 tanker attack.
- **NEW — the first quantified Hormuz transit-volume increase of the whole crisis: +30%+ week-over-week for the week of Aug 17-23** (USNI News, citing Lloyd's List Intelligence — quantified). Still a small fraction (~10-15%) of the ~110-130/day (~770-910/week) pre-war baseline, but a genuine first uptick.
- **NEW — Brent eased for a SECOND straight week:** ~\$88.24 (Aug 25) → ~\$89.13-89.3 (Aug 27, weekly loss >5%) → ~\$88.29-90.55 (Aug 28) — down from ~\$93-95 (Aug 20-21), moving from a loss to a gain.
- **NEW — no new confirmed US combat death Aug 22-29** (checked directly — one initial-looking hit, Sgt. Michael Emmanuel Swinton, was actually killed Jul 18-19, already counted in the statistics).
- **NEW — no new US/CENTCOM strikes on Iran found** — GlobalSecurity's Day-181 tracker (checked Aug 27) confirms a 28th consecutive night with no confirmed strike.
- **BTC closed at \$77,666.16 on Aug 29** — up modestly from \$77,266.84 on Aug 22 (Bitstamp).

Carried forward from the abandoned Aug 28 draft (2026-08-28_draft — never rendered, selfchecked, archived, or committed; re-confirmed independently this cycle, not taken on faith): the two Aug 24/Aug 27 tanker incidents as not-used. All re-verified fresh this cycle.

Carried forward from the Aug 22 full weekly refresh (score set 2026-08-22_draft2, committed by Alex Aug 23 — still load-bearing):

- ★ **Casualty toll (as of Aug 22): real, but a range, not a point figure.** That cycle cross-checked the cumulative Hormuz-campaign death toll directly: Wikipedia's "2026 Strait of Hormuz crisis" page (East Highlighted Incidents" page (fetched directly) shows 19 seafarer fatalities across 68 incidents as of Aug 21, but appears to aggregate the broader Middle East (possibly including a separate conflict). **19 cumulative deaths, 17-18 by the most Hormuz-specific trackers** — now settled higher by this cycle's IMO six-month count above (19-20).
- **No new kinetic incident found Aug 19-22.** Independent re-checking for vessel strikes, seizures, or Iran-related military incidents in that window found nothing beyond the Aug 22 draft base.
- **The UAE missile-attack claim reconciles to the same known Aug 18 episode, not a new one.** Aug 19-dated reporting (Washington Post, NBC News, Haaretz, The Week, EgyptToday) dated on reconciliation it is the same episode already in the draft baseline (CBS/CNN/Al Jazeera, Aug 18 strike / Aug 19 embargo response) — a one-day cross-outlet dating variance describing or correcting a source on their own claims.
- **CENTCOM's blockade/interdiction tally was climbing incrementally as of Aug 22** (68 vessels redirected vs. ~67 shortly before) — now superseded by this cycle's Aug 28 briefing above.
- **The Iran-Oman single-corridor deal remained unsigned as of Aug 22;** the underlying 60-day US-Iran negotiation window (from the June 17 Versailles MOU) expired Aug 17 without a confirmed deal (no US-accepted deal).
- **Brent was ~\$93-95/bbl as of Aug 20-21**, a second straight weekly gain (~6%), the highest since late July — now reversed by this cycle's two-week Brent decline above.
- **Strait of Hormuz traffic: trackers disagreed on the exact daily transit count as of Aug 22** (estimates ranged ~1% to ~20% of the pre-war ~130-170/day baseline) — now superseded by this cycle's Aug 28 briefing above.

From the Aug 22 morning draft (score set 2026-08-22_draft) — carried forward, casualty framing softened above:

- ★ ★ **NEW — a fatal strike on the Hormuz tanker-attack campaign's latest victim (CORRECTED: not the first fatality, contrary to this draft's earlier framing).** The Liberia-flagged bulk carrier was struck in the southern corridor, Aug 17-18; the chief engineer was killed. UKMTO's report is corroborated by 7+ independent outlets (Maritime Executive, Windward, Hellenic Shipping News, Riviera, Safe Maritime, etc.). **not a clean figure** — see the NEW (draft2) item above. This report's own prior cycles never surfaced or scored on that toll — flagged honestly as a research gap, not new information, and a correction.
- ★ ★ **NEW — the first Iranian vessel seizure since June 22.** The Liberia-flagged tanker Amara was boarded near Qeshm Island Aug 17; Iran's Fars News says it's held for non-payment under a 2015 agreement. Attacks-only to active enforcement and detention.
- ★ **Correction to the record:** the UAE missile-attack claim (Aug 18) remains single-source (UAE MoD only; Iran denies, calls it a possible "false flag") and is NOT the first direct attack on the UAE, both predating this incident. That "novel escalation vector" framing is not carried forward.
- **No new US/CENTCOM strikes on Iran since the Aug 1 stand-down** (GlobalSecurity Day-175 tracker) — the pause holds, a modest stabilizing factor.
- **Sanctions remain mostly rhetoric.** Treasury Secretary Bessent has repeatedly promised the "toughest sanctions in history" / to "collapse Iran's economy," with the actual package pushed to the sidelines. Hezbollah-linked individuals/networks — real, but narrower than the promised Iran-economy package, which has not yet been unveiled.
- **Brent ~\$93-95/bbl (Aug 21)** (TradingEconomics, Vantage, Fortune) — up modestly on sanctions anticipation, still well under the \$100 flip line.
- **Iran said Aug 22 it will allow Iraqi oil tankers through the Strait** (state media) — a mild, narrow normalizing signal amid otherwise hardening posture.
- **Mediation continues without a breakthrough;** Qatar/Oman still pushing diplomacy. Tehran "dismissed" Trump's sanctions threats Aug 21 and called the new sanctions a "declaration of war."
- **No new confirmed US combat death found in this window.**
- **BTC closed at \$77,169.40 on Aug 22** — up +7.4% from Aug 20's close of \$71,882.92 (Bitstamp). See The Claim for the honesty check on this divergence from the pillar's own evidence.

Carried forward from Aug 18-20 (still load-bearing — the UAE "novel escalation" framing is corrected above, not repeated here):

- ★ **The UAE reported Iran fired two ballistic missiles at its territory Aug 18; Iran denies it, calling it a possible "false flag."** Bloomberg, CNN, and CP24 (Aug 18) report the UAE says on source-attributed dispute, reported as such, not used alone to move P.
- ★ **The UAE suspended all trade, commercial, and financial dealings with Iran, announced Aug 19** (CNN, Washington Post, Fortune) — a dated, corroborated, structural response, independent (NBC News, Haaretz, The Week, EgyptToday) describing this same missile attack and embargo was initially flagged as a possible second incident by this cycle's adversarial pass — confirmed.
- ★ **A commercial vessel was struck by an unknown projectile in the Strait, Aug 18**, causing engine damage and one crew injury (UK Maritime Trade Operations).
- ★ **The Iran-Oman Hormuz route deal remains unsigned as of Aug 20-22.** Iran claims route coordinates were agreed Aug 18; Oman has not confirmed.

Carried forward from Aug 16-18 (independently re-verified against fresh primary sources this cycle — all confirmed accurate, still load-bearing):

- ★ **The 60-day MoU window formally lapsed Monday, Aug 18, without a signed deal.** CBS News's live desk (direct-fetched) reports the deadline expired that day; Iran's foreign ministry downplayed the first time either side has publicly framed the other as already in breach, rather than "very close." Trump told reporters he has "no time schedule" to resolve the conflict (a framing he softened).
- ★ **Trump threatened Oman.** In a Fox News interview (Aug 17, per CBS's live desk), Trump said the US would take action if Oman "gets in the way" of reopening the Strait, and that "we'd have to" followed Iran announcing its own agreement with Oman on shipping routes through the Strait.
- ★ **Strait of Hormuz traffic collapsed further.** CBS News's live desk, citing maritime monitors, reports only 3-5 vessel transits over the Aug 15-16 weekend, versus 31 the prior weekend; CENTCOM's war baseline cited in the Aug 18 draft (~130/day) was independently re-checked this cycle; the more defensible figure is closer to ~110/day. The discrepancy is flagged here for transparency; the difference is significant.
- ★ **Brent rose to ~\$90.9-91.0/bbl (Aug 17-18)** — up 2.7% on Aug 17 per Yahoo Finance/Fortune/TradingEconomics, from the \$87-90 range priced in Aug 13-16 — still well under the \$100 flip point.
- ★ **BTC closed at \$64,285.10 on Aug 18** — +2.1% vs. Aug 16's close of \$62,937.03 (Bitstamp).

Carried forward from Aug 14-16 (still load-bearing):

- ★ **Three ADNOC tanker incidents in 48 hours (Aug 14-15), comparable in kind to the established pattern.** The UAE accused Iran/IRGC of striking two ADNOC vessels Aug 14 (Al Jazeera, Reuters, CNN, etc.) and Aug 15 (Al Jazeera, Reuters, etc.) with "unknown projectile". Iran did not claim direct responsibility either time; UAE's Foreign Ministry called it "piracy." No new state targeted, no casualties at the time — now compounding into the larger pattern.

Carried forward from Aug 11-14 (still load-bearing):

- ★ **Aug 13 — Hormuz deal remains unsigned, stuck on hardened compensation demands from both sides.** Reuters, US News, NBC, Washington Post, Al Jazeera, and The Hill (six independent sources) reported the deal was "very close" but "not yet signed" due to "hardened" demands for damages, asset unfreezing, and sanctions relief; Trump separately amended his own compensation demand to include damages "to the people of Lebanon, Syria, Yemen, and Gaza" — a hardening.
- ★ **Brent eased to ~\$87-90/bbl** (from the \$98-100+ spikes logged in late July) as Hormuz traffic stayed low as of Aug 13-14; a live tracker (straits.live) showed the Strait at "day 166" of closure.
- ★ **Aug 13 — Araghchi again called the Hormuz deal "very close" while conditioning full reopening on the US "making amends" over the June MoU** (CNN, NPR, Al Jazeera, France 24).
- ★ **Aug 11 — a Houthi "double-tap" missile strike on the cargo vessel Tihamah in the Bab al-Mandeb Strait (Red Sea, not Hormuz) killed 6 (4 crew, 2 rescue workers)** per Yemeni government sources; the same Houthi-proxy Red Sea theater and comparable in kind to the Aug 8 ADNOC tanker hit and Aug 9 Jazan refinery strike already logged without moving P.
- ★ **Iran's Supreme Leader reshuffled top military leadership (new armed-forces chief of staff, new IRGC commander)** — a structural development with an ambiguous, not-yet-legible direction.
- ★ **Houthi forces drone-struck Saudi Aramco's Jazan refinery on Aug 9**, a 400,000 bpd facility on Saudi Arabia's Red Sea coast. NBC News, Al Jazeera, CBC, NPR, UPI, and Al Bawaba (sources) reported the strike; the refinery was damaged and production was "temporarily" reduced; the fire was extinguished the resulting fire the same day, with no announced extended production impact.

Carried forward from Aug 8-10 (still load-bearing):

- ★ **Iranian FM Araqchi says the Oman shipping-route deal is "very close" but conditions full reopening on new demands, including US compensation to Iran.** Reuters (via Investing.com) reported the deal was "very close" but "not yet signed" due to "hardened" demands for an agreement on a new shipping route through the strait, but that reopening it would depend on further conditions, and that the previous shipping traffic separation scheme is "no longer acceptable".
- ★ **The UAE says Iran struck another ship in the strait; Oman condemns "repeated attacks."** The same Reuters report: the UAE separately reported a fresh Iranian strike on a vessel transiting the Strait, claiming it was "very close" to a deal, but that the UAE was "not yet ready" to blame, and described negotiations with Iran as "positive and constructive."

Carried forward from Aug 1-8 (still load-bearing):

- ★ **Five separate Hormuz tanker/shipping incidents, Jul 31 - Aug 5, that daily two-day checks missed or undercounted.** The LNG carrier Gaslog Shanghai was struck and disabled carrying oil; the ship was damaged and disabled, and the crew was rescued; the ship was struck in the engine room, suffering a blackout with one crew member missing (Aug 3); two more explosions were reported near Kumzar (Aug 5). The IMO's cumulative incident tally now stands at 10.
- ★ **★ NEW — a new front: Iran-backed Houthi forces struck Najran, Saudi Arabia on Aug 7**, wounding 11 civilians (7 Saudi, 1 Yemeni, 2 Egyptian, 1 Pakistani, including a 4-year-old with burns) (Reuters, CNN, etc.); the Saudi government (via Reuters) confirmed the attack; the Japan Times, OIC statement corroborate).
- ★ **★ NEW — Saudi Arabia, Turkey, and Pakistan signed a mutual-defense "Mecca" pact on Aug 7** (an attack on one is an attack on all) — a structural, deterrence-oriented development that may be significant.
- ★ **Aug 7-8 — Iran announced what it calls a finalized agreement with Oman on Hormuz shipping**, banning American and Israeli vessels and fining violators up to 20% of cargo value (IRNA, Reuters, CNN, etc.); the deal was "very close" but "not yet signed" due to "hardened" demands (Al Jazeera), insisting on zero tolls, permits, or approvals. The fundamental fee/sovereignty dispute is unresolved, not narrowed. This claim's specific draft terms trace to Fars News (Iranian state media).
- ★ **Correction: Trump's Aug 2 "perimeters of a deal" framing was contested by his own later remarks.** Two days after claiming "the perimeters of a deal has been agreed to," Trump called the deal "very close" but "not yet signed" due to "hardened" demands, a rhetoric outpacing substance, a pattern that recurred all week (positive announcements paired with continuing attacks or contradictions within 1-2 days each time).
- ★ **Brent held a \$82-86/bbl range through the week** — up modestly, not pricing a resolved crisis.
- ★ **BTC closed at \$65,006.64 on Aug 8** — essentially flat vs. Aug 7's close of \$65,000.00.

Carried forward from Aug 1-7 (still load-bearing):

- ★ **Aug 7 — the Iran-Oman joint statement remained unsigned as of that check, still in final drafting.** Iran's Foreign Ministry spokesman Baghaei described the statement outlining agreed terms.

Carried forward from Aug 1-6 (still load-bearing):

- ★ **Aug 6 — Iran and Oman reached an "understanding in principle" on the Hormuz route map.** Iran's Deputy Foreign Minister Kazem Gharibabadi told IRNA: "an understanding in principle" was reached (Reuters, CNN, etc.); the deal was "very close" but "not yet signed" due to "hardened" demands (Bloomberg (two articles), CBS, Al Jazeera (two articles), Euronews, and Military.com).
- ★ **Aug 6 — the fee dispute first surfaced as the remaining obstacle.** Iran is seeking fees of 5-7% of cargo value from transiting ships; Oman is discussing fees around 3%; Washington Post reported the proposed passage deal is "not feasible for shipping industry."

Carried forward from Aug 1-5 (still load-bearing):

- ★ **Aug 1 — the first quiet night in days.** globalsecurity.org's day-by-day war tracker reported no new US strikes on Iran overnight Jul 31 following the heavy Jul 29-30 wave; Brent fell ~2% on the reported drawing backing from 14 countries.
- ★ **Aug 1-2 — fresh, multi-source-corroborated attacks on Hormuz shipping.** Bloomberg: a Qatari LNG tanker (Gaslog Shanghai) was struck while transiting the Strait. UKMTO/globalsecurity.org reported the vessel disabled. These directly contradicted the Aug 1 "quiet night" framing — the pause was not durable.
- ★ **Aug 2 — the Saudi-led naval coalition kept solidifying.** Al Jazeera, The National, DefenseMirror, and Tribune reported 14 confirmed member countries and 43 nations represented at a first attack-or-lull headline.
- ★ **Aug 4 — Trump canceled a planned joint US-Israeli strike on Iranian energy infrastructure.** Multiple outlets (NPR, Axios, Al Jazeera, NBC, Washington Times, Breitbart, JPost, Townhall, etc.) reported the cancellation, including a full Strait of Hormuz reopening. No US strikes on Iran proper have been reported since the cancellation.
- ★ **Aug 4 — Iran continues to deny any direct US talks.** Foreign Ministry spokesman Baghaei: "we currently have no negotiations with the United States; the negotiations are with Oman." Trump's claim that "the deal is very close" but "not yet signed" due to "hardened" demands.
- ★ **Aug 4 — a bulker was struck by a projectile and suffered a full blackout in the Strait** (globalsecurity.org, iransitrep.com) — active attacks continued even as the diplomatic framework was being discussed.

- ★ **Aug 5 — the first public terms of a 60-day interim Hormuz deal.** Axios, Deccan Chronicle, Israel Hayom, InvestingLive, The National, and Al-Quds report the US, Iran, and Oman nearing or transit fees during the interim period, and a plan to clear naval mines from the median lane within 30 days. The US aimed to announce the deal Aug 6.
- ★ **Aug 5 — still unsigned.** CNN quotes a Gulf official putting the odds of an Iran-Oman deal by Friday at only 50-50. The Strait remains formally impassable to normal traffic pending finalization.
- ★ **BTC closed at \$64,661.55 on Aug 5** — up ~1.7% from the \$63,579.68 close on Jul 31, continuing its resilience through a week where the war's own risk signal moved both up and down.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ **The lull was real, then it broke: Iran's IRGC struck a US/CENTCOM base at Muwaffaq Salti, Jordan (Jul 28).** Confirmed by 5+ independent outlets (Al Jazeera, CNN, Axios, RT, JPost) — This came after a genuine 2-3 day pause in CENTCOM strikes (Jul 25-27) and on the same day Trump was publicly touting "very friendly" talks with Netanyahu at the White House — both the
- ★ **The US retaliated with a "heavy wave of strikes" (Jul 29)** — explosions reported at Bandar Abbas, Kish Island, Qeshm Island, and Khuzestan Province (CNN). Trump: "it's our turn to hit the bad
- ★ **NEW FRONT — Iraq: US and Saudi Arabia conducted joint strikes on Iran-backed Popular Mobilisation Forces across Iraq (Jul 29),** CENTCOM-confirmed, hitting sites in Baghdad, V (outlets). Iraq's government called it a "flagrant violation of sovereignty." This is Saudi Arabia's first turn as a direct co-belligerent in this war. A claim that "six Iranian IRGC advisors" were also
- ★ **NEW FRONT — Egypt: a drone hit a US-owned FSRU vessel and a tanker at Egypt's Damietta port (Jul 29)** — the first strike on Egyptian soil in this war (Al Jazeera, CNBC, Times of Is remains unresolved.
- ★ **Brent rebounded from the lull-low.** Brent fell to ~\$90/bbl (-6.7%) during the Jul 25-27 lull, then rose back to ~\$92-93/bbl by Jul 30 (+~3.5% day-over-day, +24.6% month-over-month) on the
- ★ **Iran continues rejecting a direct-talks framing even as Trump claims progress.** Iran FM spokesman Baghaei, Jul 27: "We have no negotiations with the United States at present" — dire
- ★ **Congress split on competing War Powers resolutions (Jul 23, carried forward, no new action since):** House passed a nonbinding one 214-208 (4 GOP defectors); the Senate's binding
- ★ **The Pentagon casualty-count dispute (18 vs. 14) is confirmed stale, not a fresh Jul 30 event.** The DCAS toll briefly rose to 18 (Jul 23) then reverted to 14 (Jul 24) amid a credibly-sourc
- ★ **Strait of Hormuz remains effectively closed to normal commercial traffic** — ~10 transits/day versus a normal baseline near 88/day (IMF PortWatch), unchanged from prior cycles. IRGC
- ★ **No formal MoU withdrawal by either side.** The 60-day window to ~**Aug 16** remains intact and un-triggered.
- ★ **Israel remains out of direct engagement** — no confirmed direct Israel–Iran exchange since June 7–8; the widened fronts (Iraq, Egypt) involve the US, Saudi Arabia, and unclaimed actors,

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. As of Sept 16, 2026: the IAEA's UNSC referral (Sept 9) and the 130-lawmaker NPT-withdrawal push (Sept 12-13) are the newest entries, driving this cycle's flip-line box below) — a resumption of direct US strikes on Iran proper, confirmed via on-record CENTCOM statements and 20+ independent outlets; escalation continued sharply Sept 1-2 — a materially larger strike wave and US Navy warships; Iran's SNSC secretary announces intent to declare a restricted zone beyond Hormuz into the Persian Gulf, not yet executed; CENTCOM confirms a FIVE-tanker strike Sept 8, and Brent crosses \$100 intraday Sept 9; Yemeni port of Mocha Sept 10 closing in on Bab el-Mandeb. **As of Sept 11 a SECOND, distinct flip-line clause has now fired** — the "sustained Brent close above \$100" clause, on a third consecutive session above \$100 in **al-Mandeb's Mayyun Island** — a second global chokepoint moving from "closing in on" to actual island-level control, though it does not independently fire a fresh flip-line clause (top row). **As of the Sept 13 light daily touch, the six GCC states and Iraq will convene in Salalah, Oman on Monday Sept 14 on Strait of Hormuz navigation, safe shipping routes and mine clearance — the first such gathering since the war began in February 2020** **against Bahrain's announced non-attendance, an Iranian official's statement that no deal is expected, the fact that the agenda concerns managing a strait Iran still controls, and continued fighting on Sept 13 (a second day of strikes)** **line, which requires a signed, US-accepted Hormuz reopening holding a full clean week. In the prior Sept 12 full weekly refresh, a third distinct Saudi oil-infrastructure strike landed** — drones launched from Iraqi territory to Saudi oil infrastructure in the Persian Gulf (Iraqi territory) — *Iran" is a single hedged remark*) — neither the widening clause (Iraq is existing theater) nor the US-casualty clause fires.

DATE	EVENT
FIRE D Sept 9, reported Sept 12-16 — PRIMARY (IAEA Board of Governors institutional action)	The IAEA Board of Governors voted to refer Iran's nuclear file to the UN Security Council , escalating international pressure over Iran's nuclear activity and demands for inspectors. Separately, 130 Iranian lawmakers signed a statement Sept 12-13 calling on parliament to begin the legal process for NPT withdrawal, with a bill for an emergency bill is being drafted (RFE/RL, Tehran Times, Mehr News — 3 independent outlets). Counterweight: President Pezeshkian publicly reiterated Iran's right to nuclear weapons; the Foreign Ministry says the withdrawal bill "is still being prepared."
FIRE D Sept 13 — PRIMARY (Oman News Agency statement) plus 5+ independent outlets (Arab News, Washington Post, CNN, Gulf News, Malay Mail)	The Salalah ministerial was POSTPONED, one day before it was to convene, with NO new date . ONA: the meeting is "postponed to a later date ... to be conducive to a constructive dialogue." Bahrain had explicitly ruled out attending; no GCC state had confirmed; the UAE had downgraded to a minister of state. Saudi Arabia requested the delay citing Yemen and calls that a pretext — <i>single-party-sourced to Iranian officials, reported not scored</i> . Separately, FM Araqchi said the meeting's understanding "would not mean reopening of the Strait of Hormuz" (Tehran Times/Mehr). Brent +2.8% past \$107, WTI \$102.34 — <i>market prices, reported not scored</i>
Announced Fri Sept 11, reported Sept 11-12 — PRIMARY (Iranian MFA statement) plus 6+ independent outlets; SUPERSEDED — the meeting was postponed Sept 13, see the row above	First Iran-GCC ministerial meeting since the war began in February . The foreign ministers of Iran, the six GCC states and Iraq convene in Salalah, Oman for a day of navigation — safe/temporary commercial shipping routes, mine clearance and short-term management of the waterway, built on weeks of Oman-mediated talks. The gathering aims "to promote better understanding among the countries of the region and help strengthen shared regional security" (Al Jazeera Sept 11, Oman Observer, The Business Standard, Business Recorder, ARMENPRESS, SBS). Logged counterweights: Bahrain announced Sept 12 it will not attend; no signed deal is expected; Tehran is weighing a transit service-fee regime, i.e. the agenda is about managing a strait Iran still controls
Sept 13, reported same day (Al Jazeera live blog) — Iran's attribution is Iran's own and is NOT treated as established	A commercial vessel was attacked near Qeshm Island inside the Strait of Hormuz, killing one and wounding four; an Iranian official blamed the "US terror attack" that struck Jazan, Saudi Arabia, causing injuries and damaging a mosque. Houthi forces and Yemen's internationally recognised government continued trading with Iran
Friday Sept 11 — a market price, reported NOT used to move P	Brent gave back 4.24% to ~\$104.26, the first meaningful downside session since the sustained->\$100 flip-line clause fired; wire coverage attributes it to the IEA's demand-contraction forecast (TradingEconomics, Forbes)

Iraq's PM ordered a probe, dismissed the Maysan operations commander, closed the Shalamcheh border crossing. Trump (Dublin): Iran "probably" hedged, unconfirmed, NOT treated as fact
Fired Sept 10-11, escalated to island seizure Sept 11, CONFIRMED via 6+ independent outlets — no strait closure yet	Houthi forces complete their sweep of Yemen's entire Red Sea coastline (capturing Dhubab, Murad) and seize Mayyun (Perim) Island in the Bab el-Mandeb Strait (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Saudi Crown Prince MBS's request for direct US strikes on Houthi forces (intel/targeting support offered instead)
Sept 10 (UKMTO Warning 133-26, issued 1910 UTC), reported Sept 11 — CONFIRMED via UKMTO plus 3+ independent outlets	Four unidentified projectiles struck two vessels ~4nm west of Khasab, Oman, setting one afire (UKMTO; Gulf News, Maritime Executive, The Hill) — to move P (single-source, IRGC claim only): a separate IRGC claim of a strike on a US Navy Saildrone near the Strait entrance, no US/CENTCOM confirmation
FIRE D Sept 10-11 — a flip-line clause, CONFIRMED via 4+ independent market sources	"Sustained Brent close above \$100" — Brent ended Thursday Sept 10 up more than 6% above \$107 (above \$108 intraday), its highest since May for the first time since May; Brent still ~\$104.36 midday Friday Sept 11, ~9% higher on the week (Rigzone/Bloomberg wire, TradingEconomics, VanEck) — consecutive sessions above \$100. <i>Correction</i> : the Sept 10 cycle logged ~\$101.25 as that Thursday's level — an intraday read, not the close
Fired Sept 9, fuller reporting landed Sept 10-11, CONFIRMED via 4 independent outlets (Reuters wire)	Iran attacked 10 vessels near the Strait of Hormuz — 2 US-linked ships and 8 oil tankers — the largest declared wave of shipping attacks by either side since the war began in February 2020 (Reuters via U.S. News, RTE, Foreign Policy, The Hill)
Fired Sept 9, CONFIRMED via CENTCOM/Jordan's own military statement plus multi-outlet reporting	IRGC retaliates for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq (Muwaffaq Salti) air base — Jordan's armed forces reported no casualties, no fatalities, no damage; fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org Day 194, Jordan's own military statement)
Fired Sept 10, CONFIRMED via 5+ independent outlets — chokepoint NOT yet closed	Iran-aligned Houthi forces seize the Yemeni Red Sea port city of Mocha, closing in on control of the Bab el-Mandeb Strait — a SECOND global strike on the Strait of Hormuz (The Media Line, Times of Israel, Al Jazeera, South China Morning Post, Jerusalem Post, Cyprus Mail)
Second straight session, logged Sept 10 — SUPERSEDED by the Sept 10-11 firing above	Brent crude trades near/above \$100/bbl for a second straight session — above \$101 Wednesday Sept 9 for the first time since May; the Sept 10 cycle closed above Thursday's level, which proved to be an intraday read (Thursday closed above \$107)
Crossed intraday Sept 9, CONFIRMED via CNBC and ABC News — NOT a sustained close	Brent crude tops \$100/bbl intraday for the first time since July 24 , trading ~\$100.44 (+2.57%) as U.S.-Iran tit-for-tat strikes stoke oil-supply worries (OilPrice.com) — "U.S.-Iran tit-for-tat strikes stoke oil supply worries," ABC News)
Fired Sept 8, CONFIRMED via CENTCOM's own press release plus 5+ independent outlets	CENTCOM confirms US forces destroyed FIVE more Iranian crude oil carriers Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Oman-bound, Kharg Island) — after the IRGC targeted a US Navy warship with ballistic missiles TWICE over the preceding two days ("US Destroys 5 IRGC Tankers, 5 Iranian Warships," centcom.mil; NBC News, CBS News, SBS, RedState, GlobalSecurity.org corroborating)
Announced Sept 6-7, on-record, corroborated by 8+ independent outlets — NOT yet executed	Iran SNSC secretary Mohsen Rezaei announces Iran will declare a new "restricted zone" beginning at the US Navy's blockade line and extending to the Persian Gulf (Iran's state media) — "in the coming days," with any vessel entering it placed on Iran's sanctions list; he separately says an Iran-Oman corridor agreement will be signed "in the coming days" (Times, Al Jazeera, The Hill, RTE, Anadolu, Newsbytes, WFLA, GlobalSecurity.org)

Fired Sept 5, CONFIRMED Sept 6 via CENTCOM's own press release plus 5+ independent outlets	CENTCOM confirms US forces struck THREE Iranian crude oil tankers Sept 5 — M/T Downy (disabled, Kharg Island), M/T Stark 1 (disabled, Jas of Oman) — in retaliation for the IRGC firing ballistic missiles at two US Navy warships (a carrier and a guided-missile destroyer), both of which even (centcom.mil; Al Arabiya, Jerusalem Post, CNN, NBC corroborating)

Fired Aug 17, held to Aug 19 — CONFIRMED, negative, cleared the bar	First Iranian vessel seizure since June 22: tanker Amara boarded near Qeshm Island, held under Iran's post-MoU toll regime
Fired Aug 18 — CONFIRMED reported, DISPUTED attribution, single-source; RECONCILED this cycle	The UAE reports Iran fired two ballistic missiles at its territory , one landing in territorial waters; Iran denies involvement, calls it a possible "false flag"

The flip line, re-leveled — TRIGGERED Aug 30, and as of Sept 11 a SECOND distinct clause (sustained Brent close above \$100) has now ALSO fired: a confirmed new US combat death, a resumption of Brent close above \$100 = treat the dip-buy thesis as broken. **As of Aug 30, the “resumption of direct US strikes on Iran proper” clause fired** — CENTCOM struck Larak Island, the first acknowledged US strike in consecutive sessions above \$100, including a close above \$107 on Sept 10, its highest since May 19. Two of the four clauses are now live; the remaining two (a confirmed new US combat death, a widening to a **scale** — CENTCOM confirms nearly 100 targets struck (~50x Aug 30) plus the war’s first direct strikes on Iranian government tankers — but none of the OTHER three clauses has independently fired fresh: the “new-state clause did NOT fire despite Iran’s Sept 2 retaliation hitting four countries simultaneously (Jordan, Bahrain, Iraq, Kuwait) — every one of the four is a REPEAT target already struck earlier in this war, so 0% sustained \$100 close. The evidence is nonetheless the largest single-cycle escalation since the flip line itself fired, which is why P moved sharply down that cycle. **UPDATE, Sept 6:** CENTCOM has now confirmed Sept 6 brings further single-source IRGC claims of additional strikes. Neither independently re-fires any of the three unfired clauses (no confirmed US casualty, no confirmed strike on a genuinely new state, E the delegated daily authority (sourcing is primary/multi-outlet, no call-band flip). **The equivalent upside flip: a signed Hormuz agreement the US actually accepts that holds past a full week without a new state** naval exchange makes a durable, US-accepted deal considerably further away, not closer. Watch next cycle for: whether Sept 6’s IRGC claims are independently confirmed, whether either side’s threatened “mucous state, or a sustained Brent close above \$100 — any of which would independently fire a fresh flip-line clause and likely warrant a larger cut. **UPDATE, Sept 8:** Iran’s SNSC secretary Mohsen Rezaei announced in a genuine new escalatory signal, corroborated by 8+ independent outlets, but explicitly not yet executed (no boundaries announced, no confirmed incident tied to it). This does not independently re-fire any of the three — the cut this cycle is modest (no window moved >1 point) and is AUTO-STAMPED per the delegated daily authority. **UPDATE, Sept 9:** CENTCOM confirms a FIVE-tanker strike Sept 8 (M/T Kaviz, M/T Charming, a widening to a new state, and no confirmed US casualty, so neither of those clauses fires. Brent crosses \$100/bbl intraday for the first time since July 24 (~\$100.44) — the closest this cycle has come to the “sustained three unfired clauses independently re-fires this cycle — the cut is modest (no window moved >1 point) and is AUTO-STAMPED per the delegated daily authority. Watch next cycle for: whether Brent sustains a close and enforced, whether the Iran-Oman corridor deal is actually signed, a confirmed US combat death, or a confirmed strike on a genuinely new state. **UPDATE, Sept 10:** the IRGC retaliates for the Sept 8 tanker strikes. Houthi forces seize the Yemeni port of Mocha, closing in on Bab el-Mandeb — a second chokepoint, but the same actor/theater already priced, and no strait closure has actually been confirmed, so this does not fire. The closest this cycle has come to the “sustained Brent >\$100” clause, but still short of a clean multi-session sustained call. None of the three unfired clauses independently re-fires this cycle — the cut is modest (no window moved further than “closing in” — they hold Yemen’s entire Red Sea coastline plus Mayyun (Perim) Island inside Bab al-Mandeb itself, with fighting continuing for Zuqar Island (6+ independent outlets), and Brent has held so the widening clause does not fire (same actor/theater), and no US casualty is confirmed, so that clause doesn’t fire either — this is a severity escalation within the already-fired sustained-Brent and direct-strike clauses. Watch next cycle for: whether the Houthis actually close or interdict shipping through Bab al-Mandeb (vs. merely holding its shores/islands), whether Zuqar Island’s contested status resolves, a confirmed infrastructure strike — the East-West Pipeline (Petroline), hit by drones launched from Iraqi territory Sept 10 (Saudi MFA statement Sept 11) — does not independently fire either the widening clause (Iraq is existing infrastructure) (Trump’s single hedged “probably Iran” remark is not treated as fact). The cut is small (no window moved >1 point) and, because this is a FULL WEEKLY refresh, is LEFT AS DRAFT for Alex’s manual review regarding whether responsibility for the pipeline strike is claimed or independently confirmed, whether the Houthis actually close or interdict shipping through Bab al-Mandeb, a confirmed US combat death, or a confirmed state.

Sept 12 light daily catch-up (score set 2026-09-12_draft), prior cycle: the load-bearing development is that Houthi forces, an Iran-aligned proxy, have moved from "closing in on" to actual island-level capture of 10, Houthi forces captured Dhuhab and Murad (the last government-held coastal towns) by Sept 11, giving them Yemen's entire Red Sea coastline, and separately seized Mayyun (Perim) Island in the strait of Bab el Mandeb (National, National Herald). Saudi Crown Prince MBS's request for direct US strikes on the Houthis was refused, with intelligence/targeting support offered instead — a genuine US-restraint counterweight, not a mere deflection (as in the 2015-16 Iran case); an IRGC claim of a Saildrone strike is single-source and not used to move P. Brent held near/above \$104 for a fifth straight session, confirming persistence of the flip-line clause that already fired, not an escalation of an already-fired flip-line environment, not a new flip-line event, but is a bigger step than the routine daily grind. **P RE-RATED DOWN to 12/18/38/70** — 1mo held at the near-floor 1, 3mo 4 – 2 (WebSearch working throughout), and verification passed clean — under the runbook's widened delegated authority, neither the size of a move nor the severity of the underlying news is by itself a reason to re-rate. Tokenization, and Fed & Macro all held flat on independent re-check — see those reports.

Sept 10 light daily catch-up (score set 2026-09-10_draft), prior cycle: two new dated facts since the Sept 9 baseline. (1) CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike fell in unpopulated areas, no casualties (Al Jazeera Sept 9, MiGFlug, GlobalSecurity.org Day 194, corroborating Jordan's own military statement). Jordan is a repeat target (struck previously Aug 30-31), so casualty clause also does not fire (US KIA count remains 18, unchanged since Sept 4 per GlobalSecurity's own tracker — a separate low-quality aggregator claiming a fresh KIA figure was checked and real). Red Sea port city of Mocha on Sept 10, closing in on control of the Bab el-Mandeb Strait — a SECOND global shipping chokepoint distinct from Hormuz — confirmed by 5+ independent outlets (The Middle East Eye, Reuters, Bloomberg, etc.) — the same Houthi/Yemen actor and theater already priced (not a strike on a further new state), and no strait closure or shipping interdiction has actually been confirmed yet — outlets describe Houthis as "clinging to the strait" rather than "closing it" either. Separately, Brent crude has now traded near/above \$100/bbl for a second straight session (CNBC: Brent above \$101 Wednesday Sept 9 for the first time since May; TradingEconomics: ~\$101.25 Tuesday Sept 9) by this pillar's own conservative standard; flagged as the closest this cycle has come, and worth close watching next cycle, but does not independently fire that clause. Net: a repeat-pattern regional strike with a flip-line threshold. Cut applied to 3mo/6mo/12mo only (-1 point each: 6 → 5, 23 → 22, 43 → 42); 1mo held at the near-floor 1 (no further room) and 36mo held flat at 72 (a repeat regional strike and the same-theater repeat-pattern strike, plus-multi-outlet bar, and the master FINAL NUMBER's call band did not flip (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the rubnook's delegated auto-stamp authority).

Sept 8 light daily catch-up (score set 2026-09-08draft), prior cycle: Iran's SNSC secretary Mohsen Rezaei announced on-record (Iranian state TV, carried by Press TV and Tehran Times), Sept 6-7, that "in the coming days," with any vessel entering it placed on Iran's sanctions list; he separately said an Iran-Oman corridor agreement would be signed "in the coming days." Corroborated by 8+ independent outlets, "Iran clears the sufficiency bar. This is a genuine new escalatory signal but explicitly a THREAT OF INTENT, not yet executed: Al Jazeera's own Sept 7 explainer states "further details, including the precise bound-to flip-line clauses independently fire: DCAS US KIA remains 18 (unchanged since Sept 4), no widening to a further new state, and Brent closed –\$97.29/bbl Sept 7 (tradingeconomics.com) — still short of \$100/bbl." 3) is a continuation of the already-priced trend, not scored separately. Sept 3-5 re-check, held flat: Iran fired a second retaliatory wave Sept 3 on Ahmed al-Jaber AB (Kuwait) and Al Minhad AB (UAE) — a US official confirmed no US-manned facility was hit and no third night state clause still does not fire. Brent held roughly flat (~\$95.2-95.75 Sept 4), still short of \$100. Two developments logged, NOT used to move P: (1) Reuters shared images/video with four independent we

bomb fragments identified) — this upgrades the casualty claim's sourcing from single-narrative to independently corroborated by a primary Western wire service, but the US has still not accepted responsibility for the Sept 1-2 event rather than describing new escalation, so it does not independently move P; (2) Sept 5 (today, developing): Iranian state/semi-official media (Fars) reported four missiles launched from the south of Iran, with one source confirmation as of this research pass, so per the sufficiency rule this single-narrative claim is NOT used to move P. WATCH NEXT CYCLE: if independently confirmed, this would be a materially new development. Iran reportedly warned the US that an Israeli move on Lebanon's Ali al-Taher ridge would trigger a "large-scale attack" on Israel; the IDF took the ridge Sept 3, but no such attack has been confirmed as of this research pass. The claim is claimed "AUTO-STAMPED SEPTEMBER 5, 2026," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here and not corrected retroactively.

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2), this version: independently re-verified via WebSearch. The Sept 5 tanker report has firmed up considerably since the daily touch a few hours earlier: per Tasnim (Iranian state media); separately, Iran International — a London-based Persian broadcaster editorially independent of and adversarial to Tehran — obtained video of three US radio warnings on the incident is headlined "Iran accuses the US of targeting a tanker" — treating it as an accusation, not a confirmed fact — and US Central Command had not issued any statement confirming or denying the incident, which the Curacao-flagged M/T Belma was disabled via Hellfire-into-smokestack after ignoring warnings — that precedent is already priced in). Per the sufficiency rule, the identity of the striking party still is not confirmed; that specific fact; Iran International's video corroborates that warnings were issued and a strike occurred, but does not independently confirm US authorship versus Iran's own narrative — so this is NOT used to move P. The claim is confirmed or denial. None of the pillar's flip-line clauses independently fired this week regardless: no confirmed new US combat death (standing count remains 18 per GlobalSecurity Day 189), no widening of the conflict to include roughly 9% w/w on the broader escalation but still short of the \$100 sustained-flip threshold. **P HELD FLAT at 1/9/27/47/74. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp.**

2026.

This is a light daily catch-up against the Sept 1 baseline (7/15/32/50/75, auto-stamped) — but it turned into the sharpest single-cycle move since the flip line itself fired Aug 30. **The load-bearing new fact:** the scale of the single Aug 30 Larak Island strike — including, for the first time in this war, direct US strikes on Iranian government oil tankers under a newly reported "tanker for tanker" policy. A US strike on a 60+ injured) — CENTCOM has neither confirmed nor denied it, and this claim is explicitly flagged single-narrative-sourced at the core fact level, so it is NOT itself used to move P. It is reported as context for the broader escalation (Jordan, Bahrain, Iraq, Kuwait) — all repeat targets, so the widening-to-a-new-state flip-line clause does not fire. Multi-source corroborated: Axios, CNBC, CNN, Bloomberg, UPI, Al Jazeera, Yahoo, CBS News. **P RE-RATED DOWN SHARPLY: 1mo 7 → 1, 3mo 15 → 9, 6mo 32 → 27, 12mo 50 → 47, 36mo 75 → 74.** Every window moved under 8 points, but this is the largest front-loaded cut since the Aug 30-31 flip-line. The claim is a genuinely new state, Brent short of \$100), but the already-fired "resumption of direct US strikes on Iran proper" clause is escalating sharply in scale, which is what's driving the size of this move.

Still a **dip-watching pillar, not a panic-selling one** — the four-country retaliation hit repeat targets, most projectiles were intercepted, and no US casualty is confirmed. But the trajectory since Aug 30 is not a larger responses. A confirmed new US combat death, a confirmed strike on a genuinely new state, or Brent sustaining a close above \$100 would each independently warrant a further, larger cut.

Why this was originally left as a draft Sept 2, pending manual review: (1) the core wedding-casualty fact — the emotional and political driver of that day's four-country retaliation — is single-narrative-sourced primary event, and this pillar's own research chose not to self-approve a cut resting partly on it; (2) the jump in scale — nearly 100 targets and the war's first-ever direct tanker strikes, versus two not clearly cover; (3) both sides were on-record threatening much larger responses ahead ("significantly larger" from Trump, "many times greater" from an Iranian military source), raising the cost of a miscalibrated stamped set — under the rules in force that day, this alone disqualified the set from delegated daily auto-stamp.

September 3, 2026 update: Alex reviewed this cycle's research (delivered as PDFs Sept 2) and widened the delegated daily auto-stamp policy in CLAUDE.md: a call-band flip and the size of a move are not a verification inconsistency. This cycle had neither: the research was multi-sourced, and the single-narrative wedding-casualty claim was correctly kept out of the P move under the sufficiency rule. Nothing a **STAMPED SEPTEMBER 3, 2026.**

Historical note: the paragraph above was the Sept 2 cycle's original manual-review flag, superseded by the Sept 3 auto-stamp policy widening and, again, by this cycle's own auto-stamp. Left here for the record.

- **Re-checked for a new dated development beyond the Sept 9 IAEA referral and the Sept 12-13 NPT-withdrawal statement — found none.** Pezeshkian's public no-nuclear-weapons statement confirmed this cycle. No new development found on the Salalah ministerial, the Saudi pipeline repair timeline, or Hormuz shipping.

- ★ ★ **NEW — the IAEA Board of Governors voted Sept 9, 2026 to refer Iran's nuclear file to the UN Security Council** — a primary institutional escalation not previously priced by this pillar.
- ★ ★ **NEW — 130 Iranian lawmakers signed a statement Sept 12-13, 2026 calling on parliament to begin the legal process for NPT withdrawal**, with a hardline MP saying an emergency session (unaffiliated).
- **Counterweight, logged:** President Pezeshkian publicly reiterated Iran is not seeking nuclear weapons; the Foreign Ministry says the withdrawal bill "is still being prepared" — a real step, not a bluff.
- **Score decision: RE-RATED DOWN, 1/1/18/38/70 → 1/1/14/33/66.** 1mo/3mo held at the floor (no room to move further); 6mo 18 → 14, 12mo 38 → 33, 36mo 70 → 66.

Carried forward — what changed in the September 15 light daily touch (2026-09-15_draft, committed, auto-stamped, held flat), for continuity:

- **The Salalah ministerial remains postponed with no new date** — the fact that drove yesterday's re-rate down, unchanged. Al Jazeera (Sept 14) adds detail already consistent with what was reported; Omani FM Albusaidi gave no new date and no reason beyond "in the interests of consensus."
- **Saudi Arabia's East-West (Petroline) pipeline is still offline** — already priced Sept 12. Saudi energy-ministry sources put the loss at roughly **700,000 barrels a day**; Aramco has not said when it will be repaired. **unconfirmed by Aramco or the Ministry of Energy — reported, not scored.**
- **INTERESTED-PARTY CLAIM, reported not scored:** Bloomberg (Sept 14) reports an *Iranian claim* that a tanker struck mines in the Strait of Hormuz. Uncorroborated by any independent party. Hormuz shipments — a mildly de-escalatory datapoint, also single-sourced and not scored.
- **MARKET PRICES, reported not scored:** Brent closed above **\$105** and WTI rose toward **\$102** (Sept 14–15), slightly below yesterday's ~\$108 Brent print. Still inside the already-fired "sustained escalation" strait reopening, and the downside direct-US-strikes clause is unfired.
- **Score decision: HELD FLAT at 1/1/18/38/70.** No window moved; nothing new cleared the sufficiency bar.

- ★ ★ **NEW — the Salalah ministerial did not happen. Oman postponed it on Sunday, September 13, with no new date.** PRIMARY: Oman News Agency — "It has been decided to postpone the ministerial to a later date to allow for constructive dialogue." Corroborated independently by Arab News, the Washington Post, CNN, Gulf News and Malay Mail (Sept 13-14). This is the exact fact yesterday's upward re-rate was based on.
- **The problem is Gulf-Arab buy-in, not the calendar. Bahrain explicitly ruled out attending; no GCC state had confirmed participation** before the postponement; and the **UAE had already ruled out attending** based on evidence of de-escalation than a meeting announced.
- **Iran says Saudi Arabia asked for the delay, citing the Yemen war, and calls that a pretext — SINGLE-PARTY SOURCED and NOT used to move P.** This is Iran's MFA spokesman Chaharmahal Albusaidi posted on X that Oman remains "determined to promote dialogue that contributes to stability and lasting cooperation in our region."
- **FM Araqchi capped the value of what survives: the Iran-Oman understanding "would not mean reopening of the Strait of Hormuz"** (Tehran Times / Mehr News, Sept 13 — Iranian state media; Sunday Guardian). He also confirmed the bilateral technical work is real: navigational charts drawn, draft joint statement prepared. That framework survives the postponement — which is why the pillar is not scored.
- **Market reaction — a MARKET PRICE, reported and not scored:** Brent crude pushed past **\$107/bbl (+2.8%, \$107.54 November delivery)** and WTI to **\$102.34 (+2.3%)** on the postponement.
- **Checked and REJECTED as stale:** research this cycle surfaced drone strikes on Oman's Salalah and Duqm ports, which would have been materially escalatory. Those incidents are dated but not presented them without dates.
- **Score decision: P RE-RATED DOWN to 1/1/18/38/70** (from 3/3/19/39/70) — 1mo -2 (the one near-term de-escalation catalyst evaporated with no replacement date) · 3mo -2 (the GCC refueling ban for the surviving Iran-Oman bilateral framework) · 36mo flat (nothing structural moved). - ★ ★ NEW — Iran fired a second retaliatory wave Sept 3 on Kuwait and UAE, both REPEAT targets. A US official confirmed no US-manned facility was hit; the widening-to-a-new-state claim is not confirmed.
- ★ ★ NEW — Sept 5: the Iranian-flagged NITC tanker STARK 1 reportedly hit by four missiles ~6nm off Kharg Island. Iran's Tasnim (state media) makes the claim; Iran International (independent) denies it. "Iran accuses the US of targeting a tanker" (an accusation, not a confirmed fact); CENTCOM has not confirmed or denied it. NOT used to move P per the sufficiency rule — WATCH NEXT C for more.
- Reuters shared images/video with four independent weapons experts corroborating the Sept 1 Kuhestak wedding-strike casualty claim as likely a direct US-munition hit — resolved.
- Score decision: HELD FLAT at 1/9/27/47/74. No flip-line clause independently fired this week (no confirmed new US combat death, no widening to a further new state, Brent short of \$100). Review — COMMITTED BY ALEX SEPTEMBER 5, 2026.
- Correction: the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session.

Carried forward — what changed in the Sept 2 light daily catch-up (score set 2026-09-02_draft, committed), for continuity:

- ★ ★ NEW — CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran, ~50x the scale of the Aug 30 strike. IRGC air-defense sites, radar, mine-laying capability, command-and-control nodes.
- ★ ★ NEW — for the first time in this war, the US struck Iranian government oil tankers directly (engine rooms), under a newly reported "tanker for tanker" policy.
- ★ ★ NEW, SINGLE-NARRATIVE-SOURCED at the core fact — a US strike reportedly hit a wedding party in Kuhestak, Hormozgan. Hormozgan governor's office: 4 of at least 5 dead (independent). As context for the retaliation it triggered.
- ★ ★ NEW — Iran's IRGC retaliated Sept 2 with coordinated strikes on FOUR countries at once: Jordan, Bahrain, Iraq, Kuwait. All four are repeat targets — does NOT independently fire.
- NEW — Brent rose ~5% Tue Sept 1 (best session in 5 weeks) to ~\$95-96.6; WTI ~\$91-92 — still short of the \$100 flip line. Both sides now on-record threatening larger future action (Trump's "no more strikes").
- BTC traded at \$76,581.44 (Sept 2) — down from \$78,038.78 (Sept 1, Bitstamp), a real risk-off move.
- Score decision: RE-RATED DOWN SHARPLY to 1/9/27/47/74 (from 7/15/32/50/75) — 1mo -6, 3mo -6, 6mo -5, 12mo -3, 36mo -1; front-loaded, kept under the 8-point threshold, but this is a (single-narrative wedding-casualty fact, genuinely novel scale, both sides threatening larger future action, and the master call band flip Mild Bull → Neutral); COMMITTED — AUTO-STAMPED per delegated daily authority. Will longer withhold the stamp by themselves.

Carried forward — what changed in the Sept 1 light daily catch-up (score set 2026-09-01_draft, auto-stamped), for continuity:

- ★ A THIRD Hormuz tanker hit this week, Aug 31, CONFIRMED via UKMTO plus multi-source reporting. The Liberian-flagged VLCC Senegal Prosperity was struck by three unknown projectiles (Aug 24) and Al Salam II (Aug 25).
- ★ Iran's army claims a drone strike on the UAE's Al Minhad Air Base; the UAE Ministry of Defense DENIES the base was targeted while CONFIRMING a cross-border drone incursion by CBS News, Al Jazeera, Breitbart, Yahoo, Jerusalem Post, ABC News, Seatrade Maritime, and Iran International.
- ★ President Trump said on-record Aug 31 he is still weighing further strikes on Iran, calling it "a relatively little war for us" (CBS News, Breitbart, Yahoo) — not a de-escalation signal.
- Brent continued higher into Sept 1 (~+2% Tuesday, multiple market-desk reports) — second straight cycle of gains on this news thread; Jordan struck again Aug 30-31 but remained a repeat target.
- BTC traded at \$78,038.78 (Sept 1) — down from \$78,447.16 (Aug 31, Bitstamp).
- Score decision: RE-RATED DOWN, modestly, to 7/15/32/50/75 (from 9/17/34/51/75) — 1mo -2, 3mo -2, 6mo -2, 12mo -1, 36mo flat; no single new fact independently fired a fresh flip-line campaign. AUTO-STAMPED per delegated daily authority: light daily touch, no window moved >2 points, master call band unchanged vs. the last stamped set (Mild Bull → Mild Bull), sourcing.

Carried forward — what changed in the Aug 31 light daily catch-up (score set 2026-08-31_draft, auto-stamped), for continuity:

- ★ Resumed direct US strike on Iranian territory, Aug 30, CONFIRMED via on-record CENTCOM spokesperson (Capt. Tim Hawkins) plus 20+ independent outlets. US forces struck two targets, including a tanker, in a strike on Iran since Jul 29, ending the ~28-30-night clean streak. Fired this pillar's own pre-declared downside flip line ("a resumption of direct US strikes on Iran proper... = treat the dip-line as a signal to flip down").
- ★ IRGC retaliatory ballistic-missile strikes on two US-linked Jordan airbases, Aug 30-31, CONFIRMED via Jordan's own military statement. King Hussein and Al-Azraq airbases targeted; confirmed casualties at Larak (no precise toll); no confirmed US casualty from either event.
- BTC traded at \$78,447.16 (Aug 31) — up from \$77,666.16 (Aug 29, Bitstamp).
- Score decision: RE-RATED DOWN, front-loaded, to 9/17/34/51/75 (from 14/22/38/54/76) — 1mo -5, 3mo -5, 6mo -4, 12mo -3, 36mo -1, sized to a single resumed-strike-night shock. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (score set 2026-08-29_draft, held P flat, left as draft, now superseded), for continuity:

- ★ "Operation Economic Outcast" sanctions package, Aug 24, CONFIRMED via direct fetch of home.treasury.gov (sb0613, sb0614) and an OFAC recent-actions entry. ~60 entities/institutions; corroborated by state.gov, TRM Labs, Chainalysis, CryptoTimes, law-firm alerts. For the first time, digital assets was named a sanctionable sector — 30 crypto assets. Rhetoric this pillar discounted through Aug 22. Continued Aug 28 with a Bank Melli-Dubai designation.
- ★ ★ NEW — Oman's OWN Foreign Ministry co-confirmed a temporary Hormuz corridor, Aug 25, CONFIRMED via direct fetch of fm.gov.om/en/53722. A genuine upgrade: every prior claim of a corridor, joint mine-clearing project, continuing talks toward a permanent corridor. Still "temporary" — Iran itself said Aug 26 the Strait "remains closed" pending US compliance. No confirmed casualties.
- NEW — two more Hormuz "unknown projectile" tanker incidents, Aug 24 (off Oman, engine-room damage, disabled, no casualties, UKMTO) and Aug 27 (fire onboard, extinguished, crew safe).
- NEW — CENTCOM commander Adm. Brad Cooper's on-record briefing, Aug 28: Iranian sea mines cleared from the shipping lanes; ~1,500 vessels transited since blockade enforcement began.
- NEW — IMO's six-month casualty count settles at 19-20 dead across 68-70 incidents — the upper end of the prior 15-19 range.
- NEW — Trump announced Aug 25 the Strait had been demined, with a "zero tolerance" policy on new mines (Reuters, Axios, France24, US News) — undercut two days later by the Aug 26 claim of an Iran-Oman revenue-sharing agreement.
- NEW — first confirmed Hormuz transit-volume uptick of the whole crisis: +30%+ week-over-week for the week of Aug 17-23 (USNI News/Lloyd's List) — 114 transits vs. 87 the prior week.
- NEW, FLAGGED AND NOT USED — an IRGC spokesman's Aug 26 claim of an Iran-Oman Hormuz revenue-sharing agreement (Sepah News, Iranian state military source) is unconfirmed. Fees — single-source, explicitly not the US-accepted deal this pillar's flip line requires.
- Brent eased for a SECOND straight week: ~\$88.24 (Aug 25) → ~\$89.13-89.3 (Aug 27) → ~\$88.29-90.55 (Aug 28), down from ~\$93-95 (Aug 20-21) — moving further from the \$100 flip line.
- No new confirmed US combat death Aug 22-29; no new US/CENTCOM strikes found (GlobalSecurity Day-181 tracker, 28th consecutive clean night).
- BTC closed at \$77,666.16 (Aug 29) — up modestly from \$77,266.84 (Aug 22, Bitstamp).
- Score decision: HELD FLAT at 14/22/38/54/76 — the confirmed sanctions escalation and the confirmed Oman corridor upgrade roughly offset; neither independently clears the sufficiency by stamp authority).

Carried forward — the abandoned Aug 28 daily catch-up draft (2026-08-28_draft), for audit continuity: that draft first logged the two Aug 24/27 tanker incidents, Trump's Aug 25 demining claim, and the IRGC revenue-sharing claim (see above) rather than carry it forward on trust. Treated as not-delivered, same discipline as the Aug 17-21 gap.

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2, committed by Alex Aug 23), for continuity: Background, for completeness: Aug 17, 18, and 20 drafts were each researched but not rendered before stopping without finishing render/selfcheck/archive/commit; the Aug 22 morning catch-up treated all four as not-delivered and independently re-verified via four parallel primary-source research passes, cutting P to 14/22/38/54/76 on an adversarial pass.

- Aug 17/18/20 drafts (never delivered): held flat, then cut to 17/25/38/54/76, then cut further to 16/24/38/54/76 on the lapsed MoU window and the UAE missile claim (framed as a "novel escalation").
- Aug 21 (partially delivered, then abandoned): a session began delivering the Aug 20 draft's numbers but updated only 2 of 6 reports and never ran render/selfcheck/archive/commit — treated as not-delivered.
- ★ Aug 22 morning draft — a fatal strike in the Hormuz tanker-attack campaign, Aug 17-18: bulker Minoan Dignity's chief engineer killed, 7+ independent sources. That draft first (wrongly) surfaced before.
- ★ Aug 22 morning draft — the first Iranian vessel seizure since June 22, the tanker Amara, boarded near Qeshm Island Aug 17, still detained Aug 19. Confirmed accurate on adversarial re-render.
