

The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31 — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). P HELD FLAT at 32/47/58/82/92. This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was AUTO-STAMPED alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's own commit message claimed this set was "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to**

committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call). **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P. **HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time** — re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P. **HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found. **HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again** — re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50%→30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found. **HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.** Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news, **September 4**) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)** held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)"** — the new last TRUE committed baseline. **A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)** — the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his support on remains largely unchanged from the July draft, and no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Político — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. **P HELD FLAT at 32/47/58/82/92** — the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-**

Written June 5, 2026 · [MERGED — see merge note below] Updated & Re-verified October 3, 2026 — FULL WEEKLY refresh, score set 2026-10-03_draft2: RE-RATED DOWN, 15/28/45/72/92 — 1 arithmetic rather than forecast: the Senate's last roll-call votes of the session were Sept 30 (roll calls 253–256, every tally verified on senate.gov) and NONE touched CLARITY; it convened pro 3:00 p.m., whose first order of business is H.R. 2347, not H.R. 3633. The 1-month window closes around Nov 3, before the Senate returns, so it contains ZERO Senate legislative days. LEFT AS HELD FLAT at 15/28/45/72/92 on the score, but with FOUR fact corrections to the record — the largest correction set of any pillar this cycle. Most seriously, this report had stated the OPPOSITION unresolved (a Treasury circuit breaker exists, expiring 18 months after enactment); TILLIS, not Thune, entered the motion to reconsider; and FOUR Republicans defected on Roll Call 234, which is full weekly, is also now logged. COMMITTED BY ALEX, September 27, 2026, after review. · Prior: Updated & Re-verified September 18, 2026 (LIGHT DAILY touch, 2026-09-18_draft: HELD FLAT at 15/28/45/72/92, new dated development on the CLARITY Act found this cycle. AUTO-STAMPED per the delegated daily authority.) · Last TRUE committed: 15/28/45/72/92 (2026-09-18_draft, auto-stamped Sept 18) · Updated since the Sept 15 cloture failure: the Senate is out for nearly all of October and the first week of November for the midterms, leaving the lame-duck session as the only realistic remaining 2026 opportunity for market-structure rulemaking, an administrative fallback track running in parallel to the dead legislative track. Democratic yes votes, no movement on the ethics dispute, no primary congressional action. The Sept 15 cloture failure (49-50, eleven short of the 60 required) remains the operative fact and is already fully priced here.

The thesis as of September 16, 2026 (LIGHT DAILY touch, 2026-09-16_draft) — the cycle in which the Sept 15 cloture vote resolved, and failed

Me: re-rated down hard on the near windows — 37/53/62/83/92 → 15/28/45/72/92 — because the vote outcome is now a resolved fact, not a probability: named Democratic negotiators (including Lummis) failed on the second try, and Lummis herself ruled out a quick floor return. The Senate calendar reinforces the near-term read — senators leave for the midterms in early October and don't return until after Thanksgiving. **Dem:** as hard: the ethics concessions the White House already made are real and don't evaporate just because this particular vote failed, so they remain a foundation for a future round, whether that's

The Facts

As of October 3, 2026 (FULL WEEKLY refresh, score set 2026-10-03_draft2, LEFT AS DRAFT). Every figure below was independently re-derived from a primary source in this cycle's adversarial-verification pass unless explicitly labelled

★ **PRIMARY** — the Senate's last votes of the session were **Sept 30, 2026**, and none of them touched this bill. Verified individually on senate.gov's own roll-call pages: **vote 256** (9:29 p.m. **53–47**; **vote 254** (12:51 p.m.) rejected cloture on the motion to proceed to H.R. 9340, the utility/ratepayer cost-recovery bill, **57–43** against the 60-vote threshold; and **vote 253** (11:58 a.m.) re the session, and there is no CLARITY action anywhere in votes 250–256.

★ **PRIMARY** — the Senate is now adjourned until November 9, and the arithmetic of the 1-month window follows from that. [dailypress.senate.gov](https://www.dailypress.senate.gov) records, verbatim, that on Thursday forma sessions on Oct 5 (4:00 p.m.), 6, 9, 13, 15, 19, 22, 26, 29 and Nov 2 and 5 — every one of them without business. It states: “The Senate will return for business on **Monday, November 9** around Nov 3 — *before* the chamber returns. **That is why 1mo falls five points: the residual odds of floor action inside this window are not merely low, they are zero.**”

★ **Baseline re-confirmed, with one precision fix.** The Sept 15, 2026 2:19 p.m. cloture vote on the motion to proceed to **H.R. 3633** failed **49 Yea – 50 Nay – 1 not voting** against the 60 required Republican Nays are on the official tally: **Collins (ME), Hawley (MO), Moran (KS) and Tillis (NC)**. Tillis's motion to reconsider is recorded for Sept 15, remains the bill's latest action, and survives.

CORRECTED this cycle — the continuing resolution's dates. This report had implied both chambers acted around Sept 1–2. They did not. **H.R. 6500**, the Continuing Appropriations and Extension Act of 2026 (Roll Call 228); the **House concurred Sept 1, 2026 at 2:03 p.m., 370–48** with 14 not voting (Roll Call 286); and the President signed it **Sept 2, 2026**, funding agencies at FY2026 levels through September 30, 2026. The report also implied that the House passed a bill to extend the duck floor availability for a crypto bill, and is a second reason 3mo is trimmed by only two points.

REPORTED, NOT SCORED. Multiple outlets now call the lame duck the bill's "last realistic opportunity" while simultaneously calling it "a long shot" and "very complicated." That is comment on one nomination hearing Oct 1 at 10:00 a.m. in Dirksen 538; it was not CLARITY-related, and the nominee's identity was not retrievable, so no claim is made about it.

SOURCING LIMIT, stated plainly. congress.gov returned HTTP 403 on both the bill-actions and all-actions endpoints, as did its daily-digest endpoint. The “latest action” status therefore rests below the rest of this page, and said so rather than glossed.

- ★ ★ NEW, September 26, 2026 — the roll call, verified line by line, and it is a HARDER read than this report had been giving. Senate Roll Call Vote 234 (senate.gov, primary, Sept 15, 2:15 p.m.) cycle's verification pass: exactly four Republicans — Collins (ME), Hawley (MO), Moran (KS) and Tillis (NC) — plus 44 Democrats and 2 Independents (King, Sanders). The 49 Yeas were all Democrats, including the two Independents. This was a clean party-line vote, with no Republican defections, framing the failure as purely Democratic. Losing 4 of 53 in your own conference is materially worse for the bill's prospects than a clean party-line shortfall, and it belies the "near-unanimous" claim.
- ★ ★ NEW, September 26, 2026 — a development three consecutive prior cycles missed, logged rather than buried. On Sept 17, seven Democratic negotiators — Gallego, Gillibrand, Al Franken, Cortez Masto, Warner, Booker and Warnock — announced a deal: "We have reached a breakthrough agreement. We are committed to working in a bipartisan fashion to get this legislation passed." It is primary-sourced and multi-corroborated (see also the "Development" section). A "breakthrough agreement" is not a "development found." That is a research-coverage gap, not a scoring error, and it is named here so the lineage is honest. It does not move P on its own: it is a commitment to keep negotiating.
- The Senate calendar, from the primary source, September 26, 2026: senate.gov's own 2026 schedule lists "Oct 05 – Nov 06 — State Work Period," exactly five work weeks. That makes S 2348 no scheduled re-vote; the Senate reconvened at 3 p.m. Monday Sept 28. Tillis's motion to reconsider preserves the option but sets no date.
- ★ ★ NEW — September 15, 2026, 2:15pm ET: the Senate cloture vote on the motion to proceed to H.R. 3633 FAILED, 49–50 — well short of the 60 votes required, and support did not even include Sen. Lummis. CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call.
- ★ ★ NEW — named Democrats who were negotiating the bill voted No, including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto — Gallego, flagged in the record.
- ★ ★ CORRECTED September 26 — procedural aftermath, September 15–16, 2026. It was Sen. TILLIS, not Majority Leader Thune, who entered the motion to reconsider — and this report misstated the time. The records: "Senator Tillis voted no in order to make a motion to reconsider," entered at 3:01 p.m. He voted Yea, then switched to Nay specifically in order to preserve the option. It remains a pro-reconsideration vote (see also the "Development" section); Sen. Lummis voted against 2:19 p.m. on the roll-call page); Sen. Lummis told reporters the bill will not return to the floor; Sen. Kennedy said any renewed push likely waits for the lame-duck session; senators leave the chamber after 2:30 p.m. on Sept 15.
- MARKET PRICE, reported not scored: Polymarket's "CLARITY Act signed into law in 2026" odds crashed from roughly 35% pre-vote to roughly 5% post-vote (KuCoin, Yahoo Finance, Coinbase Pro).

Carried forward from the September 15 light daily touch — still load-bearing, not contradicted:

- ★ **September 13, 2026: the White House agreed to an ethics package for the CLARITY Act and transmitted the language to Senate Republicans.** A senior administration official called it congress.net — 4+ independent outlets. This is the first movement on the blocker that has sat unanswered at the White House since roughly Aug 1–3.
- ★ ★ **NEW — September 14, 2026: Sens. Lummis, Boozman and Scott posted the FINAL CLARITY Act text one day before the cloture vote.** Versus the July draft, the ethics division **drops attorney-general enforcement** and gives state AGs standing to sue, and **raises civil penalties from “10% of the take or \$500,000, whichever is less” to “20% or \$500,000, whichever is less”** for compensation while in office. The sponsors say the draft incorporates 126 substantive Democrat-requested changes. Corroborated by The Block, The Defiant, CNBC, crypto.news, Be

- Carried forward — the abandoned/never-delivered 2026-08-28_draft (daily catch-up, researched but never rendered/selfchecked/archived/committed): logged a Polymarket "signed in 2026" drift to 14% (live pull, Aug 28) from ~19% by this cycle's independent re-verification, not contradicted.

- **White House digital-assets adviser Patrick Witt called himself "truly optimistic and bullish" on passage** (The Block, Aug 18) despite the stablecoin friction — rhetoric only, no new whip
- **Polymarket "signed in 2026" bounced from ~16% (around Aug 14-15) to ~24% (Aug 20 live pull)** on no identified news catalyst, and has since settled to 25% (Aug 22) — noise, not use
- ★ **★ FLAGGED FOR THE RECORD, not scored:** Galaxy Research appears to have cut its 2026-passage estimate further to 10% (from the 30% already reflected in this report's history) around Aug 18, but Alex's attention, not treating as a driver of today's score.

Carried forward from the August 16 committed baseline (still load-bearing; independently re-verified, not contradicted, this cycle):

- ★ **★ NEW — the SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote the day before it was scheduled**, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, GenT). The context on regulatory limbo across both branches, but not a CLARITY-specific trigger; not used to move P.
- **The Senate remains in August recess; no new floor-schedule or ethics-text development found (as of Aug 16).** Re-checked Bitcoin Foundation, Troutman Financial Services, CoinDesk — no reporting on the Tillis-Gallego ethics counteroffer or White House sign-off.
- **The Sept 15, 2:15pm ET cloture date remains widely corroborated** — no change from Aug 14.
- **New detail on remaining disputes:** illicit-finance provisions and reconciling the Senate Agriculture Committee's text are named as two additional sticking points ahead of the vote (PYMNTS).
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633.** Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoSL).
- **The real live blocker remains a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump stay in limbo" concession).
- **Zero confirmed Democratic yes votes on cloture** as of Aug 16, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.
- **Polymarket "signed in 2026" (market odds, not an institutional estimate) remains around the mid-teens** per the conflicting cached reads (13-21%) noted Aug 14 — not re-verified as of Aug 22; is the reliable part.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ **★ PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows Ju motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source confirmation of "no floor time" than any leadership quote — and confirms no path t
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common grou hedges "whether they've actually done it is unclear," and neither senator's office nor the White House responded to comment requests. Treat as real movement, not a completed deal.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and the Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to is urgency — noted, not scored.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$81,224.46** (September 19, 2026). A **GENIUS-sized move (~40–47%)** from here ≈ **~\$114–119K**. A retest of the ~\$125K cycle high ≈ **+53.6%**. The anchor is real: during the GENIUS move, the CLARITY analog just showed the other side of the coil: Polymarket's 2026-signed-into-law odds crashed from ~35% pre-vote to ~5% post-vote (Sept 15-16) on the "CLARITY Act"). The Prize doesn't feed the math — it tells you what the lean is worth acting on, and this cycle is a live example of the pillar's own honesty rule: the score moved on evidence (cloture failed).

The Other Side

The strongest honest case this is wrong

- ★ **★ NEW, and it strengthens the bear case — the party that wanted this bill lost four of its own.** The Sept 15 failure was not a clean party-line shortfall. **Collins (ME), Hawley (MO), Moran (AZ)** needs eleven Democrats to reach 60 while simultaneously repairing its own conference — a materially harder problem than the one this report had been describing, and the honest reading o
- **The composition problem cuts the other way too, and is reported as a MARKET PRICE, not scored.** A Sept 24 analysis argues the likeliest path is now a 2027 restart in a differently-comp are market prices in a single outlet — barred from moving a P on both counts, and never to be confused with an institutional forecast — so they appear here as the strongest honest bear f different people, which is a real risk to the 72 this report carries at 12 months.
- **The administration itself may be de-prioritising the legislative route.** A White House adviser said on Sept 23 that the lame duck "is not a significant focus" and that work is shifting to fed — but it points the same direction as the CFTC's own market-structure rulemaking groundwork, and if confirmed it would mean the ceiling on this pillar is administrative action rather than a s
- ★ **★ RESOLVED, Sept 15-16: the bear case below won.** Multiple bullets in this section flagged the cloture vote as more likely to fail than the ethics concessions suggested — Punchbowl's "doomed" 49-50, a wider margin than even those bears expected. This report's own 1mo/3mo re-rate down to 15/28 (from 37/53) reflects that the bear case, not the concession-driven optimism, was the one that them still applies.
- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight na
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture know make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" September is also when midterm-campaign politics starts eating floor time.

- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency — and now the CFTC has said the same thing.** If both the White House-aligned SEC and CFTC believe they can deliver work, directing staff to explore a fallback rulemaking (verified against [cftc.gov](https://www.cftc.gov)) is the second such regulator-level statement this summer — a slow bleed on legislative priority, not a dramatic kill, but a real signal even if it doesn't clear the sufficiency bar to move P on its own; a bear could reasonably argue this report is being too conservative in not letting corroborated market pessimism move the needle.
- **Prediction markets have drifted lower again, not higher.** DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21% — near the lower end of the range this report has tracked. A bear could reasonably argue this report is being too conservative in not letting corroborated market pessimism move the needle.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set September 16, 2026 — light daily touch, 2026-09-16_draft, the cycle in which the cloture-vote trigger fired (and failed) and this pillar re-rated down. Re-administrative-track item logged below (CFTC OIRA filing).

DATE	EVENT
FIRE d Sept 30 — PRIMARY (senate.gov), and this converts the near-term call from forecast to arithmetic	The Senate’s last roll-call votes of the session were Sept 30 (roll calls 253–256, each tally verified individually) and none touched CLARITY . It convened pro forma, adjourned, but for pro forma sessions, until Monday Nov 9 at 3:00 p.m. , whose first business is H.R. 2347, not H.R. 3633. The “one session week left” this table flipped left two days earlier than the published calendar implied
Checked Oct 3 — context, NOT scored	The federal funding fight that could have consumed lame-duck floor time was defused before this window: H.R. 6500 / Public Law 119-103 funds agencies at FY House 370–48 on Sept 1, signed Sept 2). No Oct 1 shutdown occurred. Separately, multiple outlets call the lame duck the bill’s “last realistic opportunity” <i>and</i> “a last
Checked Sept 19, no change to the legislative read	No new Senate floor vote is scheduled since the Sept 15 cloture failure. Sen. Tillis’s motion to reconsider remains only a procedural placeholder; the Senate’s shows it out for nearly all of October and the first week of November for the midterms, returning briefly before the Nov 11 Veterans Day observance, then working in December before Christmas recess — leaving the lame-duck session as the only realistic remaining 2026 opportunity (Motley Fool 9/18, CryptoBriefing, CoinGecko)
Fired Sept 17, 2026 — confirmed via 4 independent outlets (The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein, all Sept 18)	CFTC files prerule OIRA action (RIN 3038-AF80, “Regulation of Crypto Asset Transactions and Crypto Asset Markets”) — an administrative fallback rulemaking on timeline not reaching a proposed rule before 2027
Checked Sept 18, no change	Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor — consistent with, not incremental to, the existing read established the day of the failure
Checked Sept 17, no change	No new dated development found since the Sept 15 cloture-vote failure. A policy advocate’s Sept 16 comment that the bill “could get another shot during late the Sept 16 baseline’s own note (Sen. Kennedy’s remark), not a new dated fact
Surfaced Sept 10, checked Sept 13 — corroborated via 3+ independent outlets (crypto.news, Coingape, CoinSpectator)	A FOURTH named Democratic blocking issue: vertical-integration conflict-of-interest authority. Democrats want regulators empowered to set conflict-of-interest company controlling several legs of a transaction, the FTX/Alameda pattern. Republicans say they support safeguards but fear a future administration misusing the provision. Sens. Booker, Lummis and Boozman are negotiating it. Separately, Sen. Lummis spent Sept 11-13 publicly pressing Democrats to back the changes incorporated) — advocacy, not a vote commitment; still zero Democrats publicly committed. Polymarket ~23% signed-into-law by Dec 31 — a market price
Checked Sept 2, no change	Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in — no White House sign-off on the Tillis-Gallego ethics language, no
Checked Sept 1, no change	No material development found on the ethics counteroffer, the stablecoin-yield dispute, or the Sept 15 cloture schedule since the Aug 31 light daily catch-up
Fired Aug 8, reconfirmed via 7+ outlets as of Aug 21, reconfirmed again by DeFiRate.com Aug 27, adversarially re-verified Aug 29	Cloture vote on the motion to proceed to H.R. 3633 is scheduled 2:15pm ET Tuesday, Sept 15 — no schedule change found anywhere Aug 22-29 (DeFiRate.com) to-proceed cloture vote only, not final passage
Fired Aug 20, checked Aug 29	CFTC Chair Michael Selig’s on-record speech at the Innovation Advisory Committee’s inaugural meeting — directed CFTC staff to explore a fallback crypto-asset CLARITY continues to stall because of Democratic obstruction”; verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10)
Checked Aug 29 — both still open	Ethics-provision dispute (no confirmed WH sign-off on Tillis-Gallego language) and the stablecoin-yield/banking dispute both remain fully unresolved; no
Pulled Aug 27 (DeFiRate.com) and Aug 28 (live), checked Aug 29	Prediction markets: Polymarket 13-14%, Kalshi 20-21% — two independent pulls agreeing on a low-teens-to-20s read
Traced Aug 29	NOT FIRED / NOT USED — “Sen. Tim Scott: 12-18 Democrats open” quote traced to an August 2025 (one-year-old) story, a likely search-engine year-confusion and
Aug 8, context only, checked Aug 29	Senate passed a stopgap funding bill (Collins-Murray deal) funding the government through Dec 11, 2026
Sept 15	PENDING — first cloture vote (motion to proceed), now precisely dated; Democrats call it “doomed” absent further concessions; Republicans hold 53 of 60 needed
Unresolved since Jul 30; checked again Sept 10-12	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed as of Aug 29; Gallego’s own of that date. A revised ~630-page CLARITY Act text WAS released Sept 10, 2026 (Sen. Lummis, primary source + 6 independent outlets — The Block, Decrypt, incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope — but the ethics/conflict-of-interest language in it is reported to dispute remains unresolved.
Ongoing	Three named Democratic blocking issues: ethics enforcement, illicit-finance/DeFi provisions, stablecoin yield (Yahoo Finance, Aug 5)
PARTIALLY FIRED Sept 13–14, 2026 — 6+ independent outlets	White House signs off on ethics language and Senate Republicans post the final text — the Sept 14 text drops the Jan 20, 2029 sunset, restores state-attorney or \$500,000 whichever is greater. But it is <i>not</i> a merged text with Democratic buy-in: no divestment requirement, zero Democrats publicly committed, Gallego says Sept 14.
FIRE d & RESOLVED — Sept 15, 2026, 2:15pm ET	The cloture vote on the motion to proceed to H.R. 3633 FAILED, 49-50, with 1 not voting (60 needed) — support did not even reach 50. CORRECTED Sept 2 ALL Republicans, zero Democrats; the 50 Nays included FOUR REPUBLICANS — Collins (ME), Hawley (MO), Moran (KS), Tillis (NC) — plus 44 Democrats and Democrats who were negotiating the bill (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) voted No — then recommitted to the effort in motion to reconsider (procedural only); Lummis told reporters the bill will not return to the floor. 6+ independent outlets (CNBC, CoinDesk, CryptoTimes, Coinped
Sept 16, context only	Senate calendar: senators leave Washington in early October for the midterms (7 weeks out) and do not return until after the election; Sen. Kennedy said any re-session; the SEC’s “Regulation Crypto Assets” workstream and CFTC spot-market drafting remain the live administrative fallback tracks.

The flip line, re-stated Sept 26 — it fired on the DOWNSIDE Sept 16 and nothing since has un-fired it: cloture failing with no released, White-House-confirmed ethics text and no clear next-step plan = start left (Sept 28 – Oct 2) before a five-week recess (“Oct 05 – Nov 06 — State Work Period”), with **no re-vote scheduled** and Tillis’s motion to reconsider an unexercised placeholder that sets no date. The lame duck is focus.” **The equivalent upside flip:** a renewed cloture vote that actually passes, or eleven named Democratic yes votes materialising. The Sept 17 seven-Democrat recommitment is the closest thing to a positive discovery that four Republicans defected. **What would change my mind fastest:** a scheduled floor date in the Sept 28 – Oct 2 week, or a single named Democrat publicly committing to vote yes. **What would change** CFTC and SEC can do without Congress.

P (2026-10-03_draft2, FULL WEEKLY refresh, LEFT AS DRAFT — AWAITING ALEX'S STAMP; RE-RATED DOWN as the legislative window closed committed by Alex September 27, 2026): 15 / 28 / 45 / 72 / 92 · Change: -5 / -2 / -1 / 0 / 0 · My Weight: 20% (equal) · Impact: 8 (uniform) · T 1yr +3.17 (Strong Bull) · 3yr +6.38 (Very Strong Bull) · Master (equal-weight), this cycle's blend: 1mo -2.17 · 3mo -1.60 · 6mo -0.55 · 1yr +1.14 (Neutral), versus -0.08 / +0.47 on the Sept 26 committed baseline — no call band flipped anywhere · Leave-one-out range: -0.74 to +0.62 (si 2 close was \$84,500.84)

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — HELD FLAT at 15/28/45/72/92 on the score, but this was the most consequential cycle this pillar has had in weeks for report had stated that the final CLARITY text "does not require divestment or blind-trust placement of preexisting crypto holdings." Senator Lummis's own summary of that text says verbatim there is a "clear Government Act of 1978." The honest framing is *real but delayed* — effective 360 days after enactment, or 60 days after the section 10102 final rule, whichever is sooner — and it comes with state attorney being carried as "fully unresolved, no update found," when the same text contains a Treasury circuit breaker whose authority expires 18 months after enactment; Tillis, not Thune, entered the motion to recede, and Tillis — voted against cloture, which makes the Sept 15 failure a harder read than a clean party-line shortfall. **A coverage gap is named rather than buried:** a Sept 17 joint statement by seven Democrats, new dated development found." **Why the score nonetheless holds flat:** the two items that clear the sufficiency bar cut in *opposite* directions — the Democratic recommitment is modestly supportive of a fully priced at these levels. 1mo holds at 15 because the primary Senate calendar confirms one session week left before a five-week recess with no re-vote scheduled; 15 already encodes "essentially no change" unchanged. 6mo holds at 45 as a genuine wash. 12mo and 36mo hold at 72 and 92: the House's 294–134 passage, two Senate committee approvals, real ethics language now *confirmed* in the text, and a bipartisan 23 remark that the lame duck "is not a significant focus" (effectively single-source, and bearish); Tillis's own "this is not the end" post (single-source); prediction-market midterm odds and a 6.45% Polymarket; Sherrod Brown (real, but electoral rather than legislative); and a trade-association CEO change. **Stamp decision: COMMITTED BY ALEX, September 27, 2026, after his own manual review** — full weekly corrections above were exactly the kind of thing a human needed to see before a stamp, and he saw them.

Sept 24 LIGHT DAILY touch (score set 2026-09-24_draft), this version — HELD FLAT at 15/28/45/72/92. Checked for changes since the Sept 23 committed baseline. Nothing dated Sept 23–24 clears the Sept 15 cloture failure — 49–50, eleven votes short of the 60 required — remains the operative fact, and it is already fully priced in the active set. Secondary trackers continue to put 2026 passage odds at 16–17%. Macro re-rate, Iran window split, and Tokenization nudge.

Sept 23 LIGHT DAILY touch (score set 2026-09-23_draft), prior version: checked for changes since the Sept 22 committed baseline. One dated item found: a SINGLE-SOURCE CoinDesk report (Sept 22, structure "can't wait" for a possible post-election lame-duck CLARITY Act revival, and framing the CFTC/SEC administrative rulemaking track as where near-term action now sits — a CoinSpectator pickup of a Democratic senator publicly committing to a yes vote, and no movement on the ethics-provision dispute were found since Sept 15. Polymarket's "signed into law in 2026" contract read approximately 6% Yield, this is flagged as approximate/directional only. **P HELD FLAT at 15/28/45/72/92.** This is an ordinary light daily touch, research capability was fully available (WebSearch clean), no window moved, and the cycle — see that report.

Sept 19 FULL WEEKLY refresh (score set 2026-09-19_draft), prior version: independently re-researched from primary sources — no new Senate vote is scheduled since the Sept 15 cloture failure; the Sept 2026 opportunity. New this week, logged not scored: the CFTC filed a prerule OIRA action Sept 17 (RIN 3038-AF80) on crypto market-structure rulemaking — an administrative fallback track, not evidence of the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — **LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW.**

Prior cycle (Sept 18 light daily touch, score set 2026-09-18_draft): re-checked — Sen. Lummis reconfirmed Sept 15–16 the bill will not return to the floor, which is consistent with, not incremental to, the existing **STAMPED SEPTEMBER 18, 2026** per the runbook's delegated authority. Tokenization RWA was the only pillar that moved that cycle — see that report.

Prior cycle (Sept 17 light daily touch): re-checked — no new dated development since the Sept 15 cloture-vote failure; a policy advocate's Sept 16 lame-duck comment was already anticipated commentary.

Sept 15 LIGHT DAILY touch (score set 2026-09-15_draft), this version — the first UPWARD re-rate on this pillar since June. The standing trigger "White House / Senate GOP concedes on the ethics provision vote, Lummis, Boozman and Scott posted the FINAL CLARITY text, which **drops the Jan 20, 2029 sunset, reverses the July bar on state-attorney-general enforcement, and raises civil penalties to 20%** Against that: the divestment/blind-trust ask is still not met, Warren calls it a "weak fig leaf", lead Democratic negotiator Gallego says the text "as it currently stands falls short", and Democrats sent a counteroffer. **32/47/58/82/92 → 37/53/62/83/92.** Light daily touch, full research access, verification clean — **AUTO-STAMPED SEPTEMBER 15, 2026** per the runbook's delegated authority as widened Sept 2, under which

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: a separate, deeper research pass run this afternoon, independent of this morning's light daily catch-up — the first deep multi-source lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BelnCryto, Coingape, and Blockhead — 6+ independent outlets), incorporating "more than 114 separate register with the CFTC, confined to cash-settled spot trading in digital commodities). The ethics/conflict-of-interest provision Sen. Tillis has conditioned his support on remains largely unchanged from the July (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged and reconfirmed. Prediction-market reads this time as market prices only, not used to move P. **P HELD FLAT at 32/47/58/82/92.** The Lummis release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis-blocking provision rule's bar (primary source or 2+ independents) for a move in either direction. **This is a FULL WEEKLY refresh — categorically excluded from the runbook's delegated daily auto-stamp authority regardless of TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.**

This morning's cycle (Sept 12 light daily catch-up, score set 2026-09-12_draft): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remained unchanged; no new dated legislative development had since was the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **P HELD FLAT at 32/47/58/82/92.** That cycle was a light daily touch, no window moved, master call band unchanged anywhere **stamped).** Iran War Risk is the only pillar that moved that cycle — see that report.

Prior cycle (Sept 11 light daily catch-up): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remains unchanged; no new dated legislative development found since Sept 10. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 10, 2026.**

Sept 10 light daily catch-up: re-checked — the Sept 15 cloture-vote schedule unchanged since Sept 9; Polymarket 2026–passage odds still in the same ~16% band, a market-price read only; no new dated legislative

Prior cycle (Sept 9 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; Polymarket 2026–passage odds drifted to ~16–17% from ~18%, a market-price move only.

Prior cycle (Sept 8 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the ethics-language counteroffer found; no fresh corroborated

Prior cycle (Sept 6 light daily catch-up): held flat — House Whip Emmer's office pulled the Sept 21/28 voting weeks off the House calendar, but the operative Sept 15 Senate cloture vote was unchanged. **AUTO-STAMPED SEPTEMBER 6, 2026.**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch: the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off since Jul 30/31) and the stablecoin-yield dispute — remain fully unresolved. This shared score set (2026-09-02_draft) was originally left as draft only because Iran War Risk's sharp rise in **3, 2026** once Alex widened the delegated daily auto-stamp policy.

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores.json baseline for this pillar remains **2026-09-02_draft (32/47/58/82/92), auto-stamped Sept 3.** Not corrected retroactively in scores.json — stamping is Alex's call — only flagged here and reflected accurately

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat again — unchanged since Aug 8, through the committed Aug 22 full weekly refresh (2026-08-22_draft2, stamped by Alex Aug 22, no White House sign-off since Jul 30/31) and the stablecoin-yield dispute — remain fully unresolved. This shared score set (2026-09-02_draft) was originally left as draft only because Iran War Risk's sharp rise in **3, 2026** once Alex widened the delegated daily auto-stamp policy.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026), the run of 32/47/58/82/92 held flat Aug 8 through Sept 14, the Sept 15 up-move to 37/53/62/83/92, and the Sept 16 down-move to 32/47/58/82/92

The pre-committed legislative window closed empty, so the residual odds of action inside it are zero, not low. **3mo 28 → 26:** roughly five weeks of floor time lost and no progress on the Democratic blocking issues during the recess, against a lame duck bears on the 2027 new-Congress path. **Why the move is not larger:** the recess itself was already known and priced — the Sept 26 cycle cited the State Work Period explicitly and this table had a empty, and the chamber left earlier than scheduled. **Fact corrections this cycle:** the CR's Senate vote was Aug 8 (Roll Call 228, 90–6–1 present–3 not voting), not September as this report implied

- **The honest counterweight, same-day and equally well sourced.** The concession does *not* include the Tillis–Gallego divestment/blind-trust ask — preexisting crypto holdings need not be o crypto profits” and took it to the floor. Sen. Gallego — the lead Democratic negotiator and the most likely yes vote — said the Republican text “as it currently stands falls short” on ethics, con Monday, September 14 (CoinDesk, Sept 15): negotiation was still live on the eve of the vote.
- **SINGLE-SOURCE, reported but NOT scored:** CoinDesk alone reports the Democratic objection that the new language would still *block state attorneys general from directly suing the U.S. pres* itself.
- **MARKET PRICE, reported but NOT scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to **~34.5%** on the ethics deal, versus the ~23% Dec-31 read priced Sept 13 used to move P.
- **The whip math itself is unchanged.** Zero Democrats publicly committed; Republicans hold 53 seats and need roughly 7–9 crossovers against likely GOP defections. **The 2:15pm ET cloture** next cycle, and it remains a vote on the motion to proceed only, not final passage.
- **Score decision: RE-RATED UP, 32/47/58/82/92 → 37/53/62/83/92.** Per window: **1mo 32→37** — the top-cited blocker got real, text-level concessions hours before the vote, but the lead De narrowed, it did not close. **3mo 47→53** — the largest move: a White House that has now demonstrably moved, plus a live Democratic counteroffer, makes a second bite within the quarter ma high and barely changes. **3yr 92, held flat** — a single negotiation round does not move the multi-year read.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged. New since Sept 5: House Majority Whip Tom Emmer’s office h not the operative Sept 15 Senate cloture vote. Polymarket’s ~18% 2026-enactment odds (market price, not an institutional estimate) reflect the same math already priced in.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved; no new dated development clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield).** The Tillis-Gallego ethics counteroffer sent to the White House remains from J Bitget, Motley Fool).
- **Coinbase CEO Brian Armstrong’s public prediction that the bill passes is a single executive’s opinion, not new information** — reported for completeness, not used to move P.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from delegated daily auto-stamp, so it was left for ma that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft’s commit message claimed it was auto-stamped, but config/scores.json’s status field was never actually advanced — a bug in that session.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in.** Score decision: HELD FLAT at 32/47/58/82/92. This shared score set was originally left as draft to widen the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 31-Sept 1.** The Tillis-Gallego ethics counteroffer sent to the White House via multiple outlets.
- **No fresh prediction-market pull with a corroborating news event found this cycle** to clear the sufficiency bar.
- **Score decision: HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-09-01_draft) is a light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 29-31.** The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged as of Sept 1.
- **Score decision: HELD FLAT at 32/47/58/82/92.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **AUDIT NOTE — a 2026-08-28_draft daily catch-up cycle sits between this refresh and the Aug 22 commit, abandoned and never delivered.** It was researched (held flat, logged a Polymarket house discipline this report has applied to the Aug 17, 18, and 20 drafts and the interrupted Aug 21 session. This cycle supersedes it and independently re-verifies everything from scratch against the same sources.
- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date remains the only scheduled floor action,** reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate.com.
- ★ ★ **NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting,** directed CFTC staff to explore a fallback crypto-asset (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets dated it Aug 21, likely next-day pickup; cftc.gov used as primary). The CFTC's analog to SEC CFTC's crypto-asset.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego counter-proposal — no White House sign-off or released text found) and the stablecoin yield provision.
- **Prediction markets, two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% and Kalshi 20-21%; a live Aug 28 Polymarket pull separately showed 14%. Consistent with the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. The active score set is **2026-08-29_draft**, AWAITING ALEX'S MANUAL REVIEW; the last confirmed score set is 2026-08-28_draft.
- ★ ★ **NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and traced to an **August 19, 2026** tweet by Sen. Scott. Not used as evidence.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** — primary-source confirmation relied on 7+ independent secondary outlets instead.
- **Context only, not new:** the Senate's Aug 8 stopgap funding bill (Collins-Murray deal) funds the government through Dec 11, 2026 — modestly reduces shutdown-fight risk to September floor action.
- **Score decision: held flat at 32/47/58/82/92 across all five windows.** Nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction. The runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. The active score set is **2026-08-29_draft**, AWAITING ALEX'S MANUAL REVIEW; the last confirmed score set is 2026-08-28_draft.

Carried forward — what changed in the Aug 22 full weekly refresh (2026-08-22_draft2), for continuity:

- **This morning's Aug 22 catch-up draft (d1) was fully delivered** — rendered, selfchecked, archived, and git-committed — but stayed uncommitted (owner-stamp sense) after a fact-check the later cycle: a full weekly refresh that independently re-confirms d1's findings against fresh primary sources and lands as a new dated set, 2026-08-22_draft2, per the runbook's same-day-afternoon refresh.
- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date reconfirmed via 7+ outlets** (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Banking, news.bloombergle.com, etc.) — proceed vote only, not final passage.
- ★ ★ **NEW — Sen. Ruben Gallego, on the record at the Aug 19 SALT Wyoming Blockchain Symposium** (crypto.news, Cointelegraph, FXStreet, Blockonomi), confirmed the White House has no intention of rushing the Sept 15 vote. Confirms the deadlock persists, not new deterioration.
- ★ ★ **NEW — WH crypto adviser Patrick Witt (Aug 19)** said the administration is "fully committed" to September passage and will keep negotiating with Democrats, while publicly blaming Sen. Lummis (Crytpopolitan) — combative messaging, not a concession, not used to move P.
- **No stablecoin-yield-provision developments found this window** — still an open blocker, status quo.
- **Prediction markets, this cycle's fresh pull:** Polymarket "signed in 2026" ~19.5% as of ~Aug 21 (CCN: volatile, dipping to ~15.5% before recovering slightly), Kalshi "60 votes" ~22% (Aug 21) P.
- ★ ★ **NEW, FLAGGED AND EXPLICITLY NOT USED — an unverified, non-journalistic X post** (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision is "officially solved" — single-source evidence for a scored fact.
- ★ ★ **NEW, FLAGGED NOT SCORED — Coinbase CEO Armstrong's Aug 21 "pretty optimistic" remarks on 60 votes** (Motley Fool/Fool.com) are single-source opinion from an interested individual.
- **Zero confirmed Democratic yes votes on cloture** — Republicans hold 53 of 60 votes needed, unchanged.
- **Score re-rates (Aug 22 d1 → Aug 22 d2):** 1-month 32 → **32** (held) · 3-month 47 → **47** (held) · 6-month 58 → **58** (held) · 1-year 82 → **82** (held) · 3-year 92 → **92** (held) — nothing found this cycle's own evidence was clean — but a FULL WEEKLY refresh is categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are.
