

Tokenization of Real-World Assets Pillar Report

Real Money On-Chain — Researched, Scored, and Personally Committed

Originally written **June 19, 2026**; scores committed by me on **June 19, 2026**. Re-researched July 8, 13, 18, 25, and 30, 2026 against live primary sources, and again as a full weekly refresh on August 8, 2026 (nudged up at 3mo/6mo on a new RWA all-time high and two missed catalysts, committed and stamped by Alex). Held flat through the Aug 9-16 daily touches, all auto-stamped committed. Drafts written Aug 17, Aug 18, and Aug 20 were never delivered (no report/render/archive/commit followed for any of them), and an Aug 21 session began delivering the Aug 20 numbers into only two of six reports before stopping — also never finished or committed. **This version (August 22) does not take any of those abandoned drafts at face value — it independently re-verifies through a dedicated primary-source research pass and HOLDS FLAT at 52/60/66/74/85** — the rwa.xyz total-value print remains essentially unchanged (and Treasuries-specific value is confirmed distinct from the all-category total, this pillar's known mislabeling trap), the SEC's newly proposed "Regulation Crypto Assets" (Aug 18-19) is scoped to new-token capital formation rather than RWA tokenization and doesn't clear this pillar's bar, and the tokenized-stock innovation exemption this pillar is watching remains delayed/exploratory with no new dated progress. **This pillar's own evidence is clean and would have qualified for Alex's standing daily auto-stamp on its own** — but the **overall Aug 22 score set is left as a DRAFT, flagged for Alex's manual review**, because a dedicated adversarial fact-check this cycle found that the Iran War Risk pillar's report contained a materially false claim (a "first confirmed fatality" framing that was actually roughly the 18th such death) that the original research pass missed; see My Decision below. **A second, deeper session ran later the same day**. With that Aug 22 catch-up draft already delivered — rendered, archived, and git-committed — house rules require a new dated set rather than an in-place edit, so this full weekly refresh (the first since Aug 8) is scored as **2026-08-22, draft2**. Draft2 independently re-confirms the hold at 52/60/66/74/85 through fresh primary-source research, including a direct sec.gov check of a newly issued Franklin Templeton no-action letter (Aug 12) and a since-canceled (not merely delayed) SEC tokenized-equity "innovation exemption" meeting (Aug 13-15 reporting) — the two roughly offset and neither alone clears this pillar's bar. Draft2 was left as draft at delivery — this time because a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority, regardless of how clean the evidence is — **COMMITTED BY ALEX August 23, 2026** after independent review. **A daily catch-up draft dated August 28, 2026** (score set 2026-08-28, draft) was written — a direct rwa.xyz re-pull showing total distributed value \$38.69B (+3.04%/30d) and tokenized Treasuries \$16.00B (-0.93%/30d), both continuing trend — but it was never rendered, selfchecked, archived, or git-committed, and sits abandoned, superseded the same way this report has always treated interrupted prior sessions. **This version (August 29) does not take that abandoned draft at face value** — it runs a fresh, independent full-weekly primary-source pass and again HOLDS FLAT at 52/60/66/74/85, scored as **2026-08-29, draft**. The week's one genuine new development is **Coinbase's August 24 launch of tokenized-stock trading (NVDAc/METAc/AAPLc/GOOGLc — Nvidia, Meta, Apple, Alphabet) on its own Base blockchain**, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026 — confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25, but eligible to **non-US users only**, the exact same structural limitation this report already established (the "Robinhood Chain precedent") as insufficient alone to move P. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25, whose stated use cases touch RWA settlement) is logged as tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check this window, and DTCC's October 2026 and Nasdaq's December 6, 2026 targets are both unchanged. **rwa.xyz's own site (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle** — a data-access gap flagged for next cycle — so this pass relies on the report's own most recent primary pull (the abandoned Aug 28 draft's rwa.xyz read), loosely corroborated by secondary citations, showing tokenized Treasuries specifically posting a **second consecutive negative 30-day reading** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% and not independently reconfirmed this cycle, but the

closest thing in this pillar to a trend worth watching. **This full weekly refresh was left as a DRAFT, not auto-stamped** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality. **THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft** covering Aug 29-31: sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) are consistent with the Aug 28 direct pull already priced in — same trend, not a fresh dated catalyst; rwa.xyz itself was not independently re-pulled this cycle. **P HELD FLAT at 52/60/66/74/85.** This is a light daily touch, not a full weekly refresh, no window moved, and the master call band is unchanged — **AUTO-STAMPED** per delegated daily authority. **Sept 1: held flat again** — only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot), no fresh dated catalyst, no rail failure/depeg/counterparty default. Score set 2026-09-01_draft, AUTO-STAMPED, new last COMMITTED baseline. **Sept 2: held flat a further time** — no dated catalyst found Sept 1-2 (the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events). Score set 2026-09-02_draft — this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Tokenization's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report); **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the policy — this is the last TRUE committed baseline. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — no dated catalyst found Sept 3-5; DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participating institutions) remains unchanged background. This pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — a bug, flagged for Alex, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch (DTCC's October launch remains the operative unchanged catalyst; no new dated milestone found). **HELD FLAT again at 52/60/66/74/85. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants including BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, and Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found. **HELD FLAT at 52/60/66/74/85. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July 15 production-trade stress test; 50+ firm industry working group, no new dated milestone found. **HELD FLAT at 52/60/66/74/85. Sept 9: light daily catch-up, held flat again** — rwa.xyz aggregate reads circulating today (~\$39.2B total distributed value) are single-source press-summary figures without a direct rwa.xyz pull this cycle, read as organic continuation of the already-priced growth trend (no rail failure, depeg, or counterparty default found); DTCC's October full-service launch remains the operative catalyst, unchanged. **HELD FLAT at 52/60/66/74/85. Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 52/60/66/74/85 — independently re-checked, nothing cleared the sufficiency bar. No new dated rwa.xyz pull, no rail failure/depeg/counterparty event found. DTCC's October full-service launch remains the unchanged operative catalyst. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **THIS VERSION (September 11) is a light daily catch-up, score set 2026-09-11_draft**, covering Sept 10-11: re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found, and DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries) remains the unchanged operative catalyst. **P HELD FLAT at 52/60/66/74/85.** Iran War Risk and Fed & Macro are the pillars that moved this cycle (Iran down on its Brent flip-line clause firing, Fed up modestly on a core-CPI print a tenth cooler than consensus). Light daily touch, no window of this pillar moved — **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **Sept 12 light daily catch-up (2026-09-12_draft), this morning's cycle:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) read as continuation of the already-priced growth trend, not a new milestone; no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **P HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)," the new last TRUE committed baseline. Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version)** independently re-confirms the hold: rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced smooth growth curve, not a step-change or new milestone; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B, a structural-breadth note. **DTCC's October 2026 full-service tokenization launch is reconfirmed**

Written June 19, 2026. [MERGED — see merge note below] Updated & Re-verified October 3, 2026 — FULL WEEKLY refresh, score set 2026-10-03_draft2: CUT on 1mo and 3mo, 57/65/70/77/88 \$14.94B — \$14.77B (~7.30% over 30 days, same 25 assets), and the offsetting near-term catalyst is confirmed NOT LIVE — dtcc.com's own page still calls the October Tokenization Service launch an adversarial verification undermined part of its own rationale: the "four consecutive negative readings" framing is retired because the aggregator changed scope from 87 products to 25 assets. GENIUS is no longer zero-of-six. LEFT AS DRAFT — AWAITING ALEX'S STAMP. · Updated & Re-verified September 26, 2026 — FULL WEEKLY refresh, score set 2026-09-26_draft3: CUT one point, trigger fired DOWNWARD — tokenized US Treasuries read \$14.94B, ~6.95% over 30 days, a THIRD consecutive negative print at roughly seven times the prior magnitude, and the trigger table on." THIS REVERSES the abandoned Sept 24 draft, which took +1 here on the NYSE Group / Blockchain.com MOU without accounting for the contraction. The other four windows HOLD, otherwise. DCOs hold TOKENIZED Regulation 1.25 collateral. COMMITTED BY ALEX, September 27, 2026, after his own manual review. · rwa.xyz was reachable by direct fetch this cycle, resolving the Sept 19 0% RATED UP, 52/60/66/74/85 — 58/65/70/77/86, on the SEC's Sept 17 "Innovation Exemption" — sec.gov press release 2026-90, permanent-record trigger this pillar's own table has been watching since August. structural break of the non-US-only ceiling this pillar has repeatedly flagged; 7+ independent outlets. · Last TRUE committed: 58/65/70/77/86 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-verified September 23, 2026 — no Tokenized Securities Venue has announced going live yet under the Sept 17 SEC exemption, and its own 30-day issuer-notice-and-objection mechanic makes a live third-party-tokenized NMS stock expected institutional friction, no litigation filed; DTCC's October full-service launch remains on schedule, unconfirmed this week; on-chain tokenized-equity holder counts continue climbing (~1.9M addressable) — no exemption's own impact. DATA GAP FLAGGED: this week's rwa.xyz reads were internally inconsistent and are NOT used — continuing to cite the last verified ~\$39.2B, Sept 8 figure. This is a FULL WEEKLY refresh (here, zero) — LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.) · Last TRUE committed: 58/65/70/77/86 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-verified September 22, 2026, not re-researched this cycle; Fed & Macro re-rated down instead (see that pillar's report). COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026. · Updated & Re-verified September 23, 2026 (LIGHT DAILY touch, "mass tokenization" speech at the NY Fed conference is a well-corroborated tone signal, not a rule or transaction; no GENIUS Act finalization, DTCC/Nasdaq timeline news, or depeg incident found. COMMITTED, 23_draft, auto-stamped Sept 23) · Not Financial Advice · Updated & Re-verified September 24, 2026 (LIGHT DAILY touch, 2026-09-24_draft [NEVER DELIVERED — no render, selfcheck, archive or copy] near windows, 58/65/70/77/86 — 59/66/70/77/86, on the NYSE Group / Blockchain.com MOU announced Sept 23 for tokenized US stocks and ETFs on NYSE's planned digital ATS — the first named major market outlets. Held to a single point and to the near windows only because the MOU is non-binding, the venue is not live, approvals are outstanding and no launch date was given.)

The Scores — Committed vs. Drafts

MERGE NOTE — **TWO independent full weekly refreshes ran for October 3, and this is the same duplicate-cycle failure mode the runbook already documents for Sept 26.** The cloud routine researches the day on its own researched independently and pushed first. **Origin's lineage is authoritative and untouched** — its set keeps the key 2026-10-03_draft and its archive keeps the bare 2026-10-03 directory — so this package takes the next free. The cloud's weekly moved ONLY Fed & Macro, to 30/27/35/43/58, and held the other three pillars flat; this package moves all four. **On Fed & Macro the two independent passes AGREE ON DIRECTION and disagree on size** (the how decisively the September jobs report prices out the October meeting. On the other three pillars this package diverges alone, each cut resting on a dated primary fact (the Senate's own roll-call record and Nov 9 adjournment; the **independent adversarial-verification passes behind it**, and those passes withdrew three claims carried in previously delivered reports as false — corrections that apply to the shared record whichever score set Alex keeps. **Oct 3 (256/64/70/77/86 — LEFT AS DRAFT, AWAITING ALEX'S STAMP**. The 6-month cut first scored this cycle was WITHDRAWN on verification — see What Changed. The 9/26 column is now the last COMMITTED baseline, stamped by **CUT one point on 1mo, 58/65/70/77/86 → 57/65/70/77/86 — COMMITTED BY ALEX, September 27, 2026, after his own manual review** (full weekly refreshes are categorically excluded from delegated auto-stamp authority windows but was never delivered, so per this report's own convention for abandoned drafts it gets no column here — and its judgement is reversed, not merely superseded, because a pre-committed downward trigger fired in the same 2026 (last committed Jun 12 cycle). Aug 8 (nudged up at 3mo/6mo, full weekly refresh) committed and stamped by Alex; Aug 9-16 light daily touches held flat, all auto-stamped committed. Aug 17, 18, and 20 drafts were written but of those three sessions was ever delivered (report/render/archive/commit), so, consistent with this report's own convention, they do not get their own column here. **Aug 22 independently re-verifies and holds flat again, but was** fact-check of the Iran War Risk pillar that cycle caught a materially false claim. A later same-day full weekly refresh, **2026-08-22_draft2**, independently re-confirmed the hold once more through fresh primary-source research (Franklin draft at delivery — that time because full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority — **COMMITTED BY ALEX August 23, 2026**. An Aug 28 daily catch-up draft (2026-08-28_draft) lineage below (see What Changed for the audit trail). Aug 29 (full weekly refresh) and Aug 31/Sept 1 (light daily catch-ups) all independently re-verify and hold flat; Sept 1 (52/60/66/74/85) is the last COMMITTED set for this pillar. Risk's re-rate (bundled in the same set) flipped the master call band; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy — now the last TRUE COMMITTED set for this pillar. **Sept 5 light daily catch-up (2026-09-05_draft)** holds flat again; that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 6** excluded from auto-stamp authority, so it went to manual review and is **COMMITTED BY ALEX September 5, 2026**. **Sept 6 and Sept 8 light daily catch-ups (2026-09-06_draft, 2026-09-08_draft)** each independently re-checked Sept 8 the last COMMITTED baseline. **Sept 9 (2026-09-09_draft, this version)** holds flat a further time — rwa.xyz reads circulating today are single-source press summaries, read as organic continuation, not a fresh catalyst — **AUGUST 2026** flat a further time — no new dated rwa.xyz pull, no rail failure/depeg/counterparty event found; DTCC's October full-service launch remains the unchanged operative catalyst — **AUTO-STAMPED per delegated daily authority**, the **per delegated daily authority**, the last COMMITTED baseline. **Sept 12 light daily catch-up (2026-09-12_draft)** holds flat a further time, nothing new found — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED hold — rwa.xyz reads ~\$39.2B (Sept 8), DTCC's October launch reconfirmed on schedule, two freshly-dated single-source-equivalent items logged as context only — categorically excluded from auto-stamp authority (full weekly), so checked and held flat — no new dated rwa.xyz pull, rail failure, depeg, or counterparty default — **AUTO-STAMPED** each cycle, Sept 16 the last TRUE committed baseline. **Sept 17 (2026-09-17_draft)** holds flat a further time — the continuation not clearing this pillar's own bar — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 18 (2026-09-18_draft, this version): RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86** (1mo +6 to 3yr +1) since the exemption is in effect now but is itself temporary/conditional, sunseting in 5 years. **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per delegated daily authority — the new last TRUE committed **refresh, HELD FLAT at 58/65/70/77/86**. A dedicated primary-source pass (11 WebSearch queries) found no Tokenized Securities Venue live yet under the exemption — its own 30-day issuer-notice-and-objection mechanic makes it baked into 1mo, not a reason to cut it further; SIFMA and Better Markets publicly pushed back (expected institutional friction, no litigation filed); DTCC's October full-service launch remains on schedule, unconfirmed this week; on-chip trend, not fresh confirmation of the exemption's uptake. This week's rwa.xyz total-value reads came back internally inconsistent and were **not used** — the last independently verified ~\$39.2B (Sept 8) figure is cited instead, the discrepancy **AWAITING ALEX'S MANUAL REVIEW**, full weekly refreshes being categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality or move size. 2026-09-18_draft remains the last TRUE committed researched this cycle (Fed & Macro is the pillar that moved — see that report). Light daily touch — **COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026**, the new last TRUE committed baseline.

Prior committed P (2026-09-23_draft, light daily touch, auto-stamped, HELD FLAT): 58 / 65 / 70 / 77 / 86 · Current P (2026-09-26_draft3, FULL WEEKLY refresh, COMMITTED BY ALEX, September 27, 2026, CUT one point) 72 / 74 / 77 / 85 / 86 · Quality × Impact. **This cycle's cut rests on this pillar's OWN pre-committed trigger firing downward:** tokenized US Treasuries at \$14.94B, -6.95% over 30 days — a third consecutive negative reading, at roughly seven times the rating on." It is confined to 1mo, and held to one point, because two genuine positives offset it: the CFTC's Sept 24 FAQ permitting FCMs and DCOs to hold *tokenized* Regulation 1.25 collateral (primary), and the NYSE Group / Blockchain accounting for the contraction — and an MOU is explicitly not this pillar's live-venue trigger.

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. RE-RATED UP this cycle, 52/60/66/74/85 → 58/65/70/77/86, on the SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90) — see the **repeated attempts this cycle** — could not independently re-pull live figures. Relying on the report's own most recent primary pull (Aug 28, from the abandoned daily-catch-up draft); total RV 30 days ago), across the same 87-product set tracked all cycle. Loosely corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug 19-25; another source citing \$38.39B as of confirmation. This is now the **second consecutive cycle with a negative 30-day reading on tokenized Treasuries specifically** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% in absolute magnitude, but flagged for a genuinely independent rwa.xyz pull next cycle since it's the one figure in this pillar closest to actually mattering. Leaders as last confirmed: USYC ~\$3.0B, BUIDL ~\$2.6-2.68B, Ondra default was found; two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$8.5M, Aug 23) and an Arrakis V1/G-UNI Uniswap V3 spot-manipulation drain (AUG 23) — both applicable to this pillar's risk watch.

★ **NEW — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026, primary):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own state from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market maker coordination, books-and-records, and technology-safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, etc.), precisely the trigger this pillar's own table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting ("a formally re-scheduled meeting or pull request" has logged (Robinhood Chain EU/EEA-only, Coinbase's Base launch non-US-only), this is a US federal regulator directly authorizing on-chain tokenized-stock trading domestically, the exact stock counterweights: "temporary" and "conditional" — this is relief under existing exemptive authority while the Commission takes public comment on further steps, not a permanent rule; no venue old and un-stress-tested.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value shared by every pillar in the equal-weight model. If tokenization compounds, it pulls trillions of TradFi assets onto rails crypto controls.

★ **NEW — Coinbase launches tokenized-stock trading on Base (Aug 24, primary + 9 outlets):** Coinbase launched tokenized-stock trading — NVDAC, METAC, AAPLC, GOOGLc (Nvidia, Metastock) under regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026. Confirmed on Coinbase's own blog and corroborated by 9+ independent outlets, all dated Aug 24-25. Eligible to **non-US users only** — structurally identical to the Robinhood Chain precedent this report already established as it is. "We are coming "in the coming weeks." Treated the same way for consistency: real, multi-sourced, does not clear the sufficiency bar alone.

Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25): Standard Chartered's Anchorpoint Financial (backed by Standard Chartered, HKT, Animoca) began institutional distribution and settlement and distribution of tokenized real-world assets. This is a stablecoin launch, not an RWA-tokenization event itself — logged as context, not adopted as a trigger.

For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026: multiple press-release-syndication outlets report this milestone. It predates the Aug 22-29 research window and a full-launch target is unchanged, no delay reported. Nasdaq's Dec 6, 2026 target is unchanged.

SEC and DTCC/Nasdaq, unchanged this cycle: no new SEC rulemaking, no-action letter, or press release dated Aug 22-29 was found on a direct sec.gov check; the tokenized-equity "innovation" full-launch target is unchanged, no delay reported. Nasdaq's Dec 6, 2026 target is unchanged.

Carried forward, still load-bearing — Franklin Templeton SEC no-action letter (Aug 12, primary, confirmed direct on sec.gov): the SEC's Division of Investment Management issued a no-action letter permitting Franklin Templeton to use its own investor-services affiliate, Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain U.S. Government Bonds as a cash-management sleeve for other Franklin funds. Confirmed by 7+ independent outlets (The Block, Tech Times, ETHNews, coinaprika, BigGo Finance, UEX, KuCoin), all dated Aug 12-13. This is a conventional ETFs/mutual funds, possibly starting Q4 2026. Genuine but narrow institutional-plumbing positive, already reflected in the committed baseline.

Aug 3 catalyst (carried forward, committed): BlackRock launched two new tokenized money-market funds — BSTBL (BlackRock Select Treasury-Based Liquidity Fund) and BRSRV (BlackRock Short-Term Reserves) to hold cash, short-term Treasuries, and repo agreements; BRSRV is purpose-built as a reserve asset for stablecoin issuers, targeting GENIUS Act eligibility. Securitize is transfer agent and tokenization platform.

GENIUS Act status, unchanged this cycle: Treasury's Section 3 NPRM (Federal Register, Aug 18, comment deadline Oct 19) and the joint FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Rulemaking action found Aug 22-29. No final rule expected until 2027. An unchanged, already-priced mild headwind against the Jan 18, 2027 statutory effective date — holds 12mo/36mo flat.

The Claim

The thesis, and where I differ from the consensus — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; HELD FLAT — no venue live yet under the Sept 17 exemption, SIFMA/Better Markets pushback log)

The crowd: is treating Coinbase's Aug 24 tokenized-stock launch on Base as the moment tokenized equities go mainstream. It's a real, well-documented development — 9+ independent outlets reported it. The Robinhood Chain launch this report already priced in as insufficient alone. Treating a geography-restricted product launch as the catalyst risks exactly the kind of overreach this report has repeatedly warned not to overreact to it either.

Me: RE-RATING UP, 52/60/66/74/85 → 58/65/70/77/86. The SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary, plus Commissioner Uyeda's statement, corroborated by 11 outlets) provides relief to trade tokenized NMS stock via permissioned AMMs — for the first time, this is US-domestic access, not another geography-restricted launch. It's exactly the trigger this report's own trigger model loaded (1mo +6, tapering to 3yr +1) because the exemption is in effect now and immediately actionable, but I'm deliberately not treating it as a permanent regime change: it's temporary, conditional, and actually live under it. That's why 3yr moves only +1 despite the exemption being the biggest structural development this pillar has logged all cycle — the honest read is "the ceiling cracked," not "the floor fell."

The Aug 29 full weekly dive (still the last full re-dig): a dedicated primary-source pass found one genuine, multi-sourced development that week (Coinbase's Base tokenized-stock launch) that could be a catalyst for launch (Anchorpoint's HKDAP), no new SEC rulemaking dated Aug 22-29, and unchanged DTCC/Nasdaq timelines. An Aug 28 daily catch-up draft was written but never delivered and was not taken into account on Aug 29, Aug 31, Sept 1, Sept 2.

My edge: this pillar's discipline is to notice when institutions actually ship product accessible to the broad market this pillar scores, not just when they announce intent or ship into a single excluded venue. More than paper over them with secondary sources dressed up as primary ones. Today, for the first time, that discipline cuts the other way: the SEC's Innovation Exemption is exactly the "actually ships" trigger. The most (+6) precisely because it's immediately actionable. 12mo/36mo move least, not because the GENIUS Act headwind changed, but because the exemption itself is temporary/conditional and actually live.

The Sept 19 full weekly dive (the first full re-dig since the Sept 18 re-rate): same discipline, applied against the new baseline — a dedicated primary-source pass (11 WebSearch queries) found no new developments (objection window) means "live" is unlikely before mid-October in most cases — exactly the kind of "announced intent, not shipped product" gap this pillar refuses to score early. SIFMA and Better Markets litigation has been filed. The ~1.9M-address holder-count figure is a real number but a continuation of an existing growth curve, not confirmation the exemption itself is working — the same discipline applied instead of launches. And when this week's rwa.xyz reads came back internally inconsistent, the discipline is the same as ever: flag the gap, don't quietly substitute a number that can't be verified.

The Facts

As of October 3, 2026 (FULL WEEKLY refresh, score set 2026-10-03_draft2, LEFT AS DRAFT). Every figure below was independently re-derived from a primary source in this cycle's adversarial-verification pass unless explicitly labelled otherwise.

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 26 – OCTOBER 3, 2026

★ **The flow reading, confirmed exact to the digit.** A direct rwa.xyz pull as of **Oct 3** returns tokenized US Treasuries distributed value **\$14.77B**, "**down 7.30% from 30d ago**"; represented value as of Sept 26 pull of **\$14.94B at -6.95% / 30d on the same 25-asset basis**, both the level fell and the rate of decline worsened. **That week-over-week, like-for-like comparison is the part that carries the weight of the point rather than two.** Note too that the holder count is *rising* while value falls: more holders, less value each, reported rather than spun either way.

WITHDRAWN this cycle — the "fourth consecutive negative reading" framing, and the trigger claim built on it. Adversarial verification found three defects. (1) A **denominator discount** on **25 assets** — 87 to 25 is a metric and scope *redefinition by the aggregator*, not a market event, so the four readings are not apples-to-apples. (2) The Aug 28–29 reading was **never independently verified** as it "could not independently re-pull live figures." (3) An **observation gap** between Aug 29 and Sept 26 means "fourth consecutive" is fourth consecutive *observation*, not a continuous streak — **the level in level is real; the trend claim built on top of it was not, and this pillar's pre-committed "third consecutive negative" trigger cannot be treated as cleanly fired on a redefined series.**

SOURCING GRADE, stated plainly. These are **aggregator** figures with an undefined and evidently *changing* basis. rwa.xyz does not define "distributed" versus "represented" on-page; the headline is a magnitude; nothing on sec.gov or treasury.gov corroborates it; the Sept 26 comparable is confirmed only against this system's own archive rather than any external source; and the **cause remains unexplained** number, not a narrative.

★ **THE DECISIVE NEGATIVE FINDING — DTCC's tokenization service has NOT launched.** dtcc.com's own tokenization page is forward-looking as of today: "paving the way for the expected launch of the service itself is **July 15, 2026** ("DTCC Turns Tokenization into Reality"), which says the production-trade milestone "sets the stage for the DTCC Tokenization Service to launch in October 2026" (with Ondo's Oasis Pro Markets as first tokenization member), makes no mention of the service's launch status. **Corrected detail:** the July production trades involved "more than 30 firms," not 50+; the consequential near-term catalyst for this pillar is confirmed not live, in either direction, and is **logged, not scored** — contracting flow against an unrealised catalyst is precisely the 1-month cumulative loss.

★ **CORRECTED, and it is a genuine positive this report had wrong: GENIUS is no longer zero-of-six.** Treasury issued the **first binding GENIUS rulemaking on Sept 30, 2026** — "Forms and Instructions for Comment," **91 FR 61688**, an **interim final rule**, effective on publication and therefore binding law, though not a concluded notice-and-comment final rule. The honest formulation, replacing the *first binding interim final rule now exists*, with the Fed's two NPRMs (91 FR 61346 and 91 FR 61580, both Sept 29) and Treasury's Section 3 NPRM (91 FR 53368) still proposed. **This is a principled correction** to institutional fixed income to Circle's Arc chain (Oct 1).

CORRECTED — the SEC order's "30-day" mechanic was mis-described in the prior version. Re-verified via the Federal Register API (document 2026-19388): "Order Granting Temporary Comment for Comment," published **Sept 22, 2026, 91 FR 60168**, Release No. **34-106402**, File No. **4-927**, signed Sept 17. The Federal Register text has **no comment deadline and no DATES section**. The order does not commence until at least 30 calendar days from the date when the issuer receives the Issuer Notice" — *not* a public comment window; and the relief is **temporary for five years**, with comment period put the first third-party-tokenized NMS trade around mid-October does not follow from the text and is withdrawn.

Structural anchors re-verified from primary documents, which is why 12mo and 36mo hold. The **CFTC's Sept 24 FAQ**, extracted and read directly from cftc.gov/media/14671, is confirmed by its own footnote 4. New **Q12** answers "Yes, so long as..." on whether an FCM or DCO may invest customer funds in tokenized forms of otherwise-permitted Regulation 1.25 investments, subject to "legally or functionally equivalent" legal and economic rights; satisfaction of all Reg 1.25 terms including liquidity, concentration limits, time-to-maturity and instrument-feature restrictions; and custody on a blockchain network (as opposed to a private and/or permissioned blockchain network). **Honesty note:** the FAQ states it represents "only the views of the Divisions," creates no rights, and is "not intended to be relied upon."

NOT SCORED, re-confirmed as caveats. The **NYSE Group / Blockchain.com** arrangement of Sept 23 is a **non-binding MOU** for distribution on NYSE's "previously announced digital ATS," "artifact remains Blockchain.com's own PR Newswire release 302887041. Searches of *ir.theice.com* and *nyse.com* return no Blockchain.com release — and because ICE's IR newsroom *does* carry "Exchange Develops Tokenized Securities Platform" release that itself says "subject to regulatory approvals"), **that absence is meaningful rather than a search artifact.** The ATS is not live and stablecoin depeg or counterparty default surfaced Sept 26 – Oct 3 — absence of evidence rather than primary confirmation of absence. A "\$46.2B total RWA across 36 chains" figure circulating blended with it. The "Nasdaq Dec 6, 2026" row still could not be re-verified and stays flagged.

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ **THE FIRED TRIGGER, and the reason this pillar is cut rather than raised — rwa.xyz direct pull, Sept 26, 2026.** Three subpages were fetched directly this cycle, which **resolves the Sept 17** now read **\$14.94B, DOWN 6.95% over 30 days** across 25 assets, from \$16.00B at the Aug 28 pull. **This report's own trigger table pre-committed, in its own words, that "a third consecutive" (–0.39% Aug 22, –0.93% Aug 28, –6.95% Sept 26), at roughly seven times the prior magnitude.** Acting on a trigger the report itself wrote down in advance is the entire point of writing it down — the figures were pulled directly, but *no independent aggregator reproduces the –6.95% specifically*, so the magnitude is labelled single-aggregator. It is corroborated in *direction and rough level* of debt at "more than \$15.9 billion" — \$15.9B on Sept 15 falling to \$14.94B on Sept 26 is consistent with a real contraction. **The cause is unknown and is reported as a number, not a narrative** distinguished. Full aggregate from the same pull: total distributed asset value **\$38.59B (–1.66% / 30d)**, represented value \$358.13B (–4.86%), stablecoins \$306.39B (+1.12%), total RWA holder value of which supersedes this report's secondary "–1.9M addresses, +134% MoM" citation. Token Terminal's separate \$46B aggregate (Sept 24) uses a different methodology and is **not blended** with it.

★ **FIRST OFFSET — PRIMARY: the CFTC opens the door to tokenized customer collateral, Sept 24, 2026.** The Crypto Asset / Blockchain FAQ update, marked "NEW 9/24/2026," was downgraded to **Participants, Market Oversight, and Clearing and Risk** (an earlier pass named only two; corrected). New **Q12** asks "May an FCM or DCO invest customer funds in tokenized forms of otherw... under four conditions: the underlying is 1.25(a)-eligible; the tokenized form grants rights "the same or functionally equivalent"; all 1.25 liquidity, concentration and time-to-maturity terms are met; and an institutional demand channel pointed at *exactly* the tokenized-Treasury and money-market product whose flow just contracted. New **Q13 and Q14** call Regulations 1.31 and 45.2 "technological... entity ... electing not to maintain offchain version(s) of records," explicitly contemplating a **"public and permissionless blockchain network"** subject to retrieval controls — which speaks directly to **Held rather than scored up** because it is staff-level no-objection guidance, not a rule, and no CFTC pressroom release accompanied it. Logged as the leading candidate to move next cycle if the venue going live.

★ **SECOND OFFSET — the NYSE Group / Blockchain.com MOU, Sept 23, 2026, 9:00am ET. Real, and explicitly NOT the live-venue trigger.** A non-binding memorandum of understanding for the previously announced digital ATS, **"subject to any required regulatory approvals,"** plus bidirectional market-data distribution via ICE Data Services to Blockchain.com's 44M+ confirmed accounts (NYSE President), corroborated across 8+ independent outlets. **What it is not:** the ATS is *not live*, no launch date and no financial terms were disclosed, and required approvals are outstanding — the NYSE- or ICE-issued primary release could be found (*ir.theice.com* returned 404), so the only primary artifact is **Blockchain.com's own PR Newswire release (302887041)** — company-issued "Product," which is the honest read. **This pillar's own pre-committed standard names "an actual live venue announcement" as the trigger, and an MOU is not that** — which is precisely why the pillar was asymmetric.

The live-venue trigger DID NOT FIRE. No Tokenized Securities Venue is live, or announced as live, as of Sept 26. The exemption's own mechanic still gates it: a prospective venue must publish its first business day, which puts the earliest third-party-tokenized NMS trade around **mid-October**. Analysts name Coinbase, Securitize and Circle as likely first filers "as early as Q4 2026" — a forecast.

Logged, not scored — the SEC exemption's Federal Register publication, Sept 22, 2026. Verified via the federalregister.gov API: citation **91 FR 60168, Release No. 34-106402, File No. 4-35-2026** Relief ... for the Use of Certain Distributed Ledger Trading Venues for Tokenized NMS Stocks ... **and Request for Comment** — "Innovation Exemption" is informal shorthand, and the relief is not permanent. This is procedural completion of the Sept 17 order already scored: it adds a citation, not information.

Logged, not scored — Ondo's BlackRock-strategy portfolios went live Sept 24, but are non-US only. Three portfolio tokens (BLKHlon, BLKDIGon, BLKGRWon) built on BlackRock-developed infrastructure for investors outside the United States." The BVI entity and the US-person exclusion were both confirmed independently at Ondo's own documentation, which bars "persons who are "U.S. persons" or "US persons." **Robinhood Chain and Coinbase-Base precedents this pillar has twice ruled insufficient**, so it gets the same treatment for consistency. Citi's \$5.5tn-by-2030 figure circulating in the same cycle.

No RWA-rail failure, depeg or counterparty default was found dated Sept 19–26, on a dedicated search. **The honest bear datapoint in this pillar is idle capital and redemption pressure** from Aug 28, the tokenized-Treasury sector fell about 12% from its mid-July peak, and DeFiLlama shows BUIDL, BENJI and USYC all under 1% utilisation. The widely-circulated "89% of tokenized assets are in such. Separately, risk-guide content circulating this month about a \$140M property-platform liquidation and a credit-protocol shutdown consists of **undated 2026 retrospectives, not events** to date.

Unchanged, and re-verified as unchanged: the GENIUS Act still has **zero of six** agencies finalized, with the statutory backstop the earlier of Jan 18, 2027 or 120 days after final rules. SIFMA's **no stay** as of Sept 26. **A STALE ROW IS FLAGGED RATHER THAN REQUESTED:** this report's "Nasdaq Dec 6, 2026" tokenized-trading date *could not be re-verified from any source* this pass, and the relief is for re-sourcing rather than repeated as fact. DTCC's October full-service launch remains slated but rests on **secondary reporting only** this cycle, so it is carried as unchanged and *unconfirmed*.

- ★ ★ **No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17, 2026 "Innovation Exemption."** A structural detail worth logging: for any NMS stock tokenized under the exemption, the issuer must file a registration statement with the SEC at least 15 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, CoinDesk, Crowdfund Insider, Decrypt, Securities.io). Legally trade under it is roughly mid-October — mostly outside a 1-month window from today. This is a reason for near-term caution baked into keeping 1mo modest (58), not a reason to cut it.
- ★ **SIFMA issued a public statement (sifma.org, primary, Sept 2026)** raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets' "temporary/conditional" — no litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- ★ **DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026** per DTCC's own May/July 2026 press materials, corroborated by CoinDesk. "Unconfirmed this week" is the working assumption, not a positive surprise; doesn't move P.
- ★ **On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month)** per AMBCrypto and CoinGabbbar (both Sept 2026, likely drawing on the same underlying data). Continuing adoption momentum but is a continuation of a pre-existing growth trend, not specific new evidence about the Sept 17 exemption's real-world uptake — doesn't independently justify a move.
- ★ ★ **DATA GAP, flagged not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date). We cite the last independently verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number; the discrepancy is flagged explicitly rather than silently updated.
- ★ **No corrections needed** to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up below — still true, now still true two days later. No new market-price/official data.
- ★ **Research capability:** full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attempted. Partial research-depth limitation, flagged honestly, not a capability failure.
- ★ **Score decision: HELD FLAT at 58/65/70/77/86.** Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. **LEFT AS DRAFT, AWAITING** delegated daily auto-stamp authority regardless of evidence quality or move size (here, zero).

Carried forward from September 18, 2026 (LIGHT DAILY touch, RE-RATED UP; still relevant background):

As of September 18, 2026, LIGHT DAILY touch, score set **2026-09-18 draft**, COMMITTED, AUTO-STAMPED — hard numbers with exact dates, sources on the last page. Covers the Sept 17-18 gap; this pillar RE-RATED UP

- ★ ★ **NEW, PRIMARY — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own statement for relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market-making, coordination, books-and-records, and technology-safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, etc.), precisely the trigger this report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting — and unlike every prior tokenized exemption (non-US-only), this is US-federal-regulator-authorized domestic tokenized-stock trading, the exact structural ceiling this pillar's Other Side section has repeatedly flagged.
- ★ **Honest counterweights, same day:** "temporary" and "conditional" — this is relief under existing exemptive authority while the Commission takes public comment on further steps, not a permanent order is one day old and un-stress-tested.
- ★ **Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.** Sizing front-loaded: 1mo +6 (58) — in effect now, immediately actionable; 3mo +5 (65); 6mo +4 (70); 1yr +3 (77) — some already near its practical ceiling and the exemption itself sunsets in 5 years. **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per delegated daily authority.

Carried forward from September 12, 2026 FULL WEEKLY refresh (independently re-confirmed through Sept 17, still relevant background):

- ★ ★ **rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026** (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late Aug. Six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B — a structural-breadth note.
- ★ ★ **DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed ON SCHEDULE, no delay** (primary: DTCC.com, corroborated by Forkast's "Frontier" unchanged, operative forward catalyst; the July 15 live-production trades are already priced in.
- **Two freshly-dated items this week, each effectively single-source** (a press release syndicated across many aggregator sites, not independently reported) — incremental infrastructure new. Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; (b) Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting C
- **No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions found dated within the last two weeks.**
- **Score decision: P HELD FLAT at 52/60/66/74/85.** Nothing this cycle is both newly dated within the lookback window and clears the primary-source-or-2+-independent-outlets bar for a major. Two freshly-dated items are single-source-equivalent. **LEFT AS DRAFT** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence.

Carried forward from August 29, 2026 (independently reconfirmed that cycle, still relevant):

- ★ ★ **NEW, primary + 9 outlets — Coinbase launches tokenized-stock trading on Base (Aug 24):** NVDAc, METAc, AAPLc, GOOGLc (Nvidia, Meta, Apple, Alphabet), each backed 1:1 by a share. Coinbase received Aug 11, 2026. Confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25. Eligible to non-US users only — the same structural limitation says more stocks are coming "in the coming weeks."
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed Anchorpoint Financial began institutional distribution of HKDAP, a Hong Kong-dollar stablecoin launch, not an RWA-tokenization event — logged as context only.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29** found on a direct sec.gov check; the tokenized-equity "innovation exemption" meeting remains canceled with no coverage.
- **DTCC's October 2026 full-launch target and Nasdaq's Dec 6, 2026 target are both unchanged** — no delay reported this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found.** Two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$8.5M, A ordinary DeFi protocols, not tokenized-RWA/Treasury rails, and are not applicable to this pillar's risk watch.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** (multiple press-release-syndication outlets) — this predates the Aug 22-29 window and appears to have been missed this cycle.
- ★ ★ **Data-quality flag — rwa.xyz direct access blocked this cycle (Aug 29):** app.rwa.xyz returned HTTP 403 on repeated attempts; could not independently re-pull live figures. Relying on the distributed value \$38.69B (+3.04%/30d); tokenized Treasuries \$16.00B (-0.93%/30d). Loosely corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug 19-25; another source confirmation.
- ★ ★ **NEW — second consecutive negative 30-day reading on tokenized Treasuries:** Aug 22 read -0.39%, Aug 28 read -0.93% — both sub-1% in absolute magnitude, and this cycle's figure of independent rwa.xyz pull next cycle — it's the one thing in this pillar closest to actually mattering.
- **BTC (pipeline reference) closed at \$77,666.16 on Aug 29** — up modestly from \$77,266.84 on Aug 22 (Bitstamp).

Carried forward from Aug 22 (independently reconfirmed that cycle, still relevant):

- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** total RWA distributed value \$38.32B, +2.30% vs. 30 days ago — essentially flat versus the Aug 16 baseline (\$38.17-\$38.24B); normal drift, no distribution.
- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** tokenized US Treasuries \$15.98B, -0.39% vs. 30 days ago, across 87 products — the first slightly-negative 30-day reading this pillar had tracked.
- ★ **Primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** the SEC's Division of Investment Management issued a no-action letter dated 2026-08-12 (sec.gov) to Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain U.S. Government Money Fund (BENJI, on Stellar), carved out of Rule 17f-2's physical-certification. coinpaprika, BigGo Finance, UEX, KuCoin), all dated Aug 12-13. Separately, Bloomberg (Aug 20) reports a plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, integrating.
- ★ **SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** a planned SEC meeting on the exemption, expected around Aug 14, was canceled/postponed (coverage) attributes the delay to White House concerns and SIFMA opposition, plus a stated desire not to unsettle tokenization-adjacent provisions being negotiated in the CLARITY Act; the meeting was announced as of Aug 29.
- **GENIUS Act rulemaking proceeded on its pre-set procedural schedule:** Treasury's Section 3 NPRM was published in the Federal Register Aug 18 (comment deadline Oct 19), and the joint rulemaking (0331) closed on schedule Aug 21, 2026 — process, not news; no rule has been finalized. Too soon to score.
- ★ **Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock trading volume on Robinhood Chain crossed \$1B cumulative as of Aug 21 (multi-source: crypto.news, cryptonews, Coinbase's Aug 24 Base launch.

Carried forward from Aug 17 (independently reconfirmed, still relevant):

- **Multi-sourced (The Block, crypto.news, Benzinga, Blockzeit) — Aug 17:** SEC Chair Atkins met with President Trump, CFTC Chair Selig, NYSE, CME, DTCC, and crypto firms; the SEC reported to the Innovation Advisory Committee. Per crypto.news, the discussed 24/7 tokenized-stock "innovation exemption" remained explicitly exploratory — "no final framework, eligibility criteria, or implementation specifically on the exemption, expected ~Aug 14 (i.e., before this Aug 17 multi-agency meeting), was itself reported canceled/postponed (Aug 13-15 reporting) — see the finding above; the block

Carried forward from Aug 16 (still load-bearing):

- **No new dated RWA/tokenization catalyst was found as of Aug 16.** General web search had surfaced only recirculating market-size commentary — a \$33.5B "liquid on-chain value" figure for \$38.17B distributed-value number already in this report; not adopted as a replacement metric.

Carried forward from Aug 9-14 (still load-bearing):

- **rwa.xyz's Aug 9 pull, reconfirmed Aug 14 with added product-level detail:** tokenized Treasuries \$16.21B across 87 products and 63,010 unique addresses; Circle's USYC leads at \$3.00B, Bitfarms figures already in this report, not a new catalyst.
- **rwa.xyz's \$38.17B total distributed-value print, dated Sunday Aug 9 (Bitcoin News, CoinSpectator), is the same all-time-high move already folded into prior sets' language** — still the

Carried forward from Aug 8-9 (still load-bearing):

- ★ **Total RWA distributed value hit a new all-time high of \$38.24B** (rwa.xyz direct pull, Aug 8), up from \$34.67B roughly two and a half weeks earlier — a genuine +10% move, not stagnation. 62,997 holders, 7d yield 3.29%.
- ★ ★ **CORRECTION, again — the \$34.67B figure was never "tokenized Treasuries."** KuCoin's "Tokenized Treasuries Dip to \$34.67 Billion" headline (~Jul 22) mislabels the total-RWA distributed value, not cite that figure as a Treasuries number anywhere in this system.
- ★ ★ **NEW — the Central Bank of Ireland cleared Aviva Investors' tokenized USD Liquidity Fund on the XRP Ledger (Jul 29),** the first time a major EU regulator has approved a public-blockchain by 6+ independent outlets, missed entirely by the daily "no new catalyst" checks.
- ★ ★ **NEW — Ripple took equity stakes in Zilo and Licuido (Aug 3),** converting a commercial relationship into ownership and adding regulated transfer-agency, issuance, and collateral-mobility (+ 5 outlets).
- **rwa.xyz also separately reports a "Represented Asset Value" of \$373.55B** (down 1.70% over 30 days) — a different metric (off-chain assets referenced via tokenization infrastructure, not total value figure.
- **No new RWA-rail failure, depeg, or counterparty default found** in the Jul 30 - Aug 8 window.

Carried forward from Aug 6-7 (still load-bearing):

★ **BlackRock launched two tokenized money-market funds on Aug 3, 2026.** BSTBL and BRSRV, following an SEC prospectus filing Aug 1, via Securitize (same transfer agent as BUIDL), target BitcoinWorld, Solana Compass, and CoinPaprika (7 independent outlets).

★ **CORRECTION** — the "\$34.67B tokenized Treasuries pulling back" headline circulating this week (and cited in the Jul 29/30 daily touches) is a metric mislabel, again. That figure is specifically — the same conflation an earlier full refresh already corrected once. Multiple outlets (including one whose own body text contradicts its headline, admitting "tokenized U.S. treasury shows tokenized Treasuries at **\$16.18B**, essentially flat versus \$16.20B a week ago — not declining.

★ **NEW, confirmed 4+ outlets — Robinhood Chain's on-chain RWA activity jumped roughly 5x to ~\$70M (Jul 25).** Tokenized-stock trading grew in size, with tokenized SpaceX overtaking Incrypted, Crowdfund Insider). TVL roughly tripled to ~\$312M, though stablecoins/memecoins still dominate overall activity. Separately, a Jul 29 report cites \$885.5M in Robinhood Chain's *cu* numbers above.

- **All-RWA totals, direct pull (Jul 30): Distributed Value ~\$36.93B (+0.3% over 5 days), Represented Value ~\$370.55B (-2.6% over 5 days, single-pull, unconfirmed trend), stablecoin total**

- **DTCC's tokenization pilot continues as planned** — Russell 1000 stocks/ETFs/Treasuries, 50+ firms including BofA, Citi, Morgan Stanley, Robinhood, Circle, Ondo, Anchorage; October 2026 for

- **OUSD (Open USD) 140+-partner credibility dispute (Samsung/Dunamu/Upbit denials) remains unresolved** — no new statements found this window.

- **Circle won final OCC approval for a national trust bank (Jul 10, carried forward).** "Circle National Trust" puts Circle under direct federal (OCC) oversight for fiduciary digital-asset custody.

- **Ondo keeps extending its franchise (carried forward):** Broadridge proxy-voting partnership, IVV/Micron tokenization, "Ondo Perps." Ondo DAO also voted to burn 100M ONDO (1% of supply)

- **The TAM anchor stands:** BCG × Ripple (Apr 7, 2025) projects **~\$9.4T by 2030 / \$18.9T by 2033**. Current on-chain value is still **<1%** of any endpoint.

The cleanest single-token anchor is still **ONDO**, the name most tied to the RWA narrative: from its early-trading price around **\$0.22 (Jan 2024 — listing prints vary by venue)** it ran to a **\$2.14**. The round-trip, last checked July 13 (CoinGecko, not re-pulled live this cycle): **\$0.3291** — market cap ~\$1.6B, still ~85% below the high — even as the company keeps extending its franchise (Jul 25). Part of the Dec-2024 spike was a Trump-linked World Liberty Financial buy, not fundamentals. The durable signal stays structural, not one token: total RWA distributed value sits near its continuation of the already-priced growth curve, not a new milestone; six asset categories now each exceed \$1B) and tokenized Treasuries last confirmed near \$16.00B (-0.93%/30d, a second reconfirmed since) while the token trades ~85% off its peak, and the confirmed institutional moves stacked through this cycle — BlackRock's Aug 3 fund launch, Franklin Templeton's Aug 12 2026 full-service launch reconfirmed on schedule, and now the SEC's Sept 17 Innovation Exemption authorizing US-domestic tokenized-stock trading for the first time — are exactly the kind of today) fell short of this pillar's sufficiency bar. Pipeline reference: BTC closed at \$81,224.46 on Sept 19, up sharply from \$78,046.80 on Sept 18 — noted here only as context for the market backwash worth acting on, euphoria and round-trip included.

- ★ **Partly answered today, worth stating plainly: the "non-US-only ceiling" critique this section has raised three separate times (BlackRock funds, Robinhood Chain, Coinbase's Base)**
The exemption is temporary (5 years), conditional (public-notice/transparency/safeguard conditions, sunsets pending further Commission action), and as of this research pass no venue has adopted it. The honest read is the structural ceiling cracked, not that it disappeared; this pillar will be watching for an actual live US venue as the next real trigger.

- **Tokenized Treasuries posted two consecutive negative 30-day readings in late August** (-0.39% Aug 22, then -0.93% Aug 28) — still sub-1% each and not independently reconfirmed since

- **An Ondo Stocks milestone from Aug 15 was missed for two full cycles.** That's a real research-process miss, caught only in hindsight — a reminder that "no new catalyst found" claims in p

- **The RWA totals are still a small, largely institutional/permissioned number.** ~\$38-39B in total distributed value is real growth, but it's still under 1% of the BCG×Ripple \$9.4T-by-2030 TAM. RWA figures — a reminder that headline numbers in this space need active skepticism, not just repetition.

- ★ **NEW this cycle — the exemption's own 30-day issuer-notice-and-objection mechanic is a real structural brake, not a footnote.** Any NMS stock tokenized by an unaffiliated third party issuer can object and block it outright — meaning the earliest a third-party-tokenized NMS stock could legally trade under the exemption is roughly mid-October, and issuers that object can delay until Sept 18; it's now dated and specific rather than a general caution. SIFMA's and Better Markets' public pushback (Sept 2026) is the expected institutional friction this section anticipated — worth a comment letter.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set August 29, 2026 (full weekly refresh); re-checked August 31 through September 17, 2026 (light daily catch-ups, full weekly refreshes) — no change beyond on Avalanche (Tether's USAT) is single-product continuation, not independently trigger-worthy — no P move. **FIRE** **Sept 18**: the SEC's tokenized-equity exemption meeting row below — flagged since Aug 13-15 as "no P move alone"; **Checked** **Sept 19 (FULL WEEKLY refresh)**: no TSV live yet under the exemption (30-day issuer-notice mechanic logged), SIFMA/Better Markets pushback logged not scored, DTCC's October launch unconfirmed this week — see the table

DATE	EVENT	MEANS
FIRE Oct 3 — direct rwa.xyz pull, confirmed exact; plus a NEGATIVE finding on the offsetting catalyst	Tokenized US Treasuries fell again on a like-for-like basis : \$14.94B → \$14.77B , now −7.30% over 30 days across the same 25 assets (holders 86,020, +1.18% / 7d — <i>rising</i> holders against falling value). And DTCC's October Tokenization Service launch is confirmed NOT LIVE : dtcc.com still says "expected," its last service press release is July 15, and its Sept 16 release does not mention launch status. Verification SHRANK this call : the "four consecutive negatives" framing is retired — the aggregator redefined scope from 87 products to 25 assets, one prior reading was never confirmed (403), and most of the decline fell inside an unobserved gap	CUT to 56/64/70/77
FIRE Sept 30 — PRIMARY (Federal Register) , a POSITIVE this pillar had previously recorded wrong	GENIUS is no longer zero-of-six . Treasury issued the first binding GENIUS rulemaking: "Forms and Procedures for Review of State Certifications by the Stablecoin Certification Review Committee," 91 FR 61688 , an interim final rule — effective on publication, therefore binding law, though not a concluded notice-and-comment final rule. The Fed's two NPRMs (91 FR 61346, 91 FR 61580, both Sept 29) and Treasury's Section 3 NPRM (91 FR 53368) remain proposed	A principal reason the than repeated
CORRECTED Oct 3 — a mechanic this report had mis-described	The SEC's tokenized-NMS order (91 FR 60168, Release 34-106402, File 4-927, published Sept 22, signed Sept 17) has no comment deadline and no DATES section . Its 30 days is an ISSUER-NOTICE condition — trading "may not commence until at least 30 calendar days from the date when the issuer receives the Issuer Notice" — <i>not</i> a public comment window, and the relief runs five years	No P move. The earlier the text and is withdrawn
FIRE Sept 26 — THIS PILLAR'S OWN PRE-COMMITTED TRIGGER , fired DOWNWARD	Tokenized US Treasuries contracted for a third consecutive reading: \$14.94B, −6.95% over 30 days (rwa.xyz direct pull, 25 assets), from \$16.00B on Aug 28 — after −0.39% (Aug 22) and −0.93% (Aug 28). Roughly seven times the prior magnitude. Corroborated in direction and level by a Sept 15 secondary citation at "more than \$15.9 billion"; the −6.95% magnitude itself is single-aggregator . Cause unknown — redemptions, quarter-end and reclassification could not be distinguished	Tokenization CUT on trend worth re-rating
FIRE Sept 24 — POSITIVE, PRIMARY, PDF extracted locally — the main offset	CFTC Crypto Asset / Blockchain FAQ update (Market Participants, Market Oversight, <i>and</i> Clearing and Risk divisions), marked "NEW 9/24/2026". New Q12: an FCM or DCO MAY invest customer funds in TOKENIZED forms of otherwise-permitted Regulation 1.25 investments , on four conditions. New Q13/Q14 call Regs 1.31 and 45.2 "technology neutral"; Q15 contemplates PUBLIC AND PERMISSIONLESS networks for regulatory recordkeeping	Held, not scored up aimed at exactly the p guidance, not a rule
FIRE Sept 23 — positive, but explicitly NOT the live-venue trigger	NYSE Group / Blockchain.com MOU for tokenized US-listed equities and ETFs on NYSE's planned digital ATS, with ICE Data Services market-data distribution. On-record quotes from Peter Smith and Lynn Martin; 8+ independent outlets. Non-binding, "subject to any required regulatory approvals," ATS not live, no launch date, no terms . No NYSE/ICE-issued primary release found (ir.theice.com 404) — the primary is Blockchain.com's own PR Newswire release	Real, and a genuine si this while ignoring t
DID NOT FIRE — the trigger that would actually matter	No Tokenized Securities Venue is live, or announced live, as of Sept 26 . The exemption's own mechanic gates it: public notice at least 30 calendar days before commencing, plus Commission notification within one business day — putting the earliest third-party-tokenized NMS trade around mid-October . Analyst naming of Coinbase/Securitize/Circle as likely first filers is a forecast, not a fact	Still the single clearest
Logged Sept 22 — procedural, adds a citation not information	The SEC exemption published in the Federal Register : 91 FR 60168, Release No. 34-106402, File No. 4-927 (verified via the federalregister.gov API). Formal title: " Order Granting Temporary Conditional Exemptive Relief ... and Request for Comment "	"Innovation Exemption than letting the nickna
Logged Sept 24 — NOT scored, non-US only	Ondo "Intelligent Portfolios, Powered by BlackRock" went live (BLKHlon, BLKDIGon, BLKGRWon), issued by Ondo Global Markets (BVI) Limited , available only to eligible investors outside the United States — confirmed independently at Ondo's own eligibility documentation	Structurally identical the same way for cons
Checked Sept 19–26 — no rail failure found	No RWA-rail failure, depeg or counterparty default dated in the window. The honest bear datapoint is idle capital and redemption pressure : ~\$78M of BENJI redemptions in the 30 days to Aug 28, the sector ~12% off its mid-July peak, and BUIDL/BENJI/USYC all under 1% utilisation. Circulating "89% idle" framing is secondary analysis, not a primary figure. Risk-guide items about a \$140M property-platform liquidation are undated 2026 retrospectives, not this window	No trigger. Recorded
STALE ROW — FLAGGED, NOT REQUOTED	This report's " Nasdaq Dec 6, 2026 " tokenized-trading date could NOT be re-verified from any source this pass, and may be a conflation with Nasdaq's separate 23-hour-trading launch in December. DTCC's October full-service launch remains slated but rests on secondary reporting only this cycle	Flagged for re-sourcing
Unchanged — re-verified as unchanged	GENIUS Act: zero of six agencies finalized , statutory backstop still the earlier of Jan 18, 2027 or 120 days after final rules. SIFMA's Sept 17 pushback statement remains the extent of institutional opposition — no litigation, no stay	An already-priced mil
FIRE Sept 24 (event dated Sept 23) — partial, multi-sourced, this cycle	NYSE Group / Blockchain.com memorandum of understanding for access to tokenized US-listed stocks and ETFs on NYSE's planned digital ATS — 24/7 trading, fractional shares, stablecoin funding, on-chain settlement, plus ICE Data Services distributing Blockchain.com's crypto market data and Blockchain.com incorporating ICE/NYSE feeds. On-record quotes from Peter Smith (Blockchain.com CEO) and Lynn Martin (NYSE Group President); 8+ independent outlets	Worth one point on evidence of real institi outstanding. It is <i>not</i> t for the next cycle : a move; the MOU lapsin
Watch, not fired (checked Sept 19)	No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 Innovation Exemption. Structural detail: for any NMS stock tokenized by an unaffiliated third party, the TSV must give the issuer written notice and wait a minimum 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18) — the earliest a third-party-tokenized NMS stock could legally trade is roughly mid-October, mostly outside a 1-month window from today	No P move — a reason an actual live venue a
Logged, not scored (Sept 19)	SIFMA issued a public statement (sifma.org, primary, Sept 2026) raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets separately criticized the exemption. No litigation filed as of Sept 19	No P move — exactly information; a filed lav
Checked Sept 19, unconfirmed	DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) remains slated per DTCC's own May/July 2026 press materials, corroborated by Coindesk/CNBC/FFNews — no update this week confirming or denying it's still on track	No P move — "Octob date approaches
FIRE Sept 18, 2026	The SEC issued its "Innovation Exemption" (sec.gov press release 2026-90, primary + Commissioner Uyeda statement; 7+ independent outlets): temporary 5-year conditional exemptive relief letting Tokenized Securities Venues trade tokenized NMS stock via permissioned AMMs, plus a companion dealer exemption for AMM liquidity providers, subject to public-notice/transparency/safeguard conditions with a comment period open	RE-RATED UP: 52/60 or published framework logged; held flat aga
Checked Sept 13, no change	No dated catalyst found Sept 12-13 — no new rwa.xyz pull beyond the \$39.2B Sept 8 primary read already priced, and no rail failure, depeg, or counterparty default. DTCC's October 2026 full-service launch (Russell 1000 equities, major ETFs, Treasuries) remains unchanged and on schedule	No P move — held fla

Checked Sept 2, no change	No dated catalyst found Sept 1-2; the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events	No P move — this cycle
Checked Sept 1, no change	Only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot); no fresh dated catalyst, no rail failure/depeg/counterparty default	No P move — AUTO-S

The flip line, re-stated Sept 26 — and this cycle it cut both ways, which is why the move is small: if the GENIUS rules drift into Q4 unfinished, the DTCC and Nasdaq launches slip past their October and December deadlines, and the public-rails question remains head-on rather than routing around it. **Adoption that never touches public, crypto-controlled rails is TradFi, not crypto. Pointing toward failure this cycle:** tokenized Treasuries under 1% — capital is arriving and then sitting idle, or leaving. **Pointing the other way, and directly at this clause:** the CFTC's Sept 24 Q15 explicitly contemplates *public and permissionless* non-custodial rails. **The downside risk:** a *fourth* consecutive negative tokenized-Treasury reading, which would turn a flagged trend into a confirmed one and justify more than a single point. **What would change my mind upward:** an FCM or other institution showing observable institutional demand, and is the single item most likely to move this pillar next cycle.

My Decision

UPDATED DRAFT — OCTOBER 3, 2026 · AWAITING MY STAMP (2026-10-03_draft2) · FULL WEEKLY REFRESH · CUT ON 1mo/3mo · THE 6mo CUT WAS V

P (2026-10-03_draft2, FULL WEEKLY refresh, LEFT AS DRAFT — AWAITING ALEX'S STAMP; CUT on 1mo and 3mo — the 6mo cut was WITHDRAWN 09-26_draft3, FULL WEEKLY refresh, committed by Alex September 27, 2026): 57 / 65 / 70 / 77 / 86 · Change: -1 / -1 / 0 / 0 / 0 · My Weight: 2 (Bull) · 3mo +1.97 (Bull) · 6mo +2.72 (Bull) · 1yr +3.37 (Strong Bull) · 3yr +4.03 (Strong Bull) · Master (equal-weight), this cycle's blend: 1mo -0.07 equal-weight (Neutral) / +0.48 horizon-weighted (Neutral), versus -0.08 / +0.47 on the Sept 26 committed baseline +0.62 (sign still flips) · BTC \$84,858.11 (local run.py quant fetch, Bitstamp; Oct 3, 2026 partial session — the Oct 2 close was \$84,500.84)

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — CUT one point on 1mo, 58/65/70/77/86 → 57/65/70/77/86, and this REVERSES the abandoned Sept 24 draft on that words, that "a third consecutive negative reading would be a genuine trend worth re-rating on." It got one: a direct rwa.xyz pull this cycle — which also **resolves the Sept 19 data gap** and retires the carried **days** from \$16.00B, following -0.39% and -0.93%. That is roughly seven times the prior magnitude. Acting on a pre-committed trigger is the entire point of writing one down, so 1mo takes -1. **Why the audit trail** Group / Blockchain.com MOU while not accounting for the contraction in the same window. The MOU is real and independently verified to its primary artifact — but it is non-binding, "subject to any requirements" that an ICE-issued release exists, so the primary is the counterparty's own PR. This pillar's standard names "an actual live venue announcement" as the trigger, and an MOU is explicitly not that. **Why only one point** the CFTC's Sept 24 FAQ update — primary, PDF extracted locally — whose new Q12 permits an FCM or DCO to invest customer funds in *tokenized* Regulation 1.25 instruments, opening an institutional demand and whose Q15 contemplates *public and permissionless* chains for regulatory recordkeeping, which speaks directly to this pillar's own flip line. Both are staff no-objection guidance rather than rules, so they are **Honest limits on the number driving the cut**: the -6.95% magnitude is single-aggregator — corroborated in direction and rough level by an independent Sept 15 citation of ~\$15.9B, but not reproduced in the same way, rather than dressed in a narrative. **Stamp decision: COMMITTED BY ALEX, September 27, 2026, after his own manual review** — full weekly refreshes are categorically excluded from delegated auto-stamp authority.

Sept 24 draft (score set 2026-09-24_draft) — WRITTEN BUT NEVER DELIVERED; REVERSED, not merely superseded, by the Sept 26 weekly above. It proposed 58/65/70/77/86 → 59/66/70/77/86 and was followed and config/scores.json was never advanced past draft. **Its factual claim about the NYSE MOU held up on re-verification; its judgement did not** — it counted the MOU as a positive while the audit trail; original text follows. **NYSE Group and Blockchain.com signed a memorandum of understanding, announced Sept 23, 2026**, under which Blockchain.com users would get access to tokenized fractional shares, stablecoin funding, on-chain settlement, plus bidirectional market-data distribution via ICE Data Services. Named executives on record: Peter Smith, Blockchain.com CEO ("Connecting to the millions of Blockchain.com users around the world") and Lynn Martin, NYSE Group President. Corroborated across 8+ independent outlets (The Block, Decrypt, PYMNTS, Bitcoin Magazine, Cointelegraph, Bloomberg). **point**: it is the first named major-exchange distribution partnership to respond to the SEC Innovation Exemption this pillar scored on Sept 18, which is genuine evidence the exemption is attracting institutional interest; a non-binding MOU; the NYSE digital ATS is not live; required regulatory approvals are outstanding; and neither firm disclosed a launch date or terms. CryptoTimes headlined it "It's an Intent, Not a Product" and Citi Institute's \$5.5tn-by-2030 base case, so the counterweight named "an actual live venue announcement" as the next real trigger — this is not that, so 6mo, 12mo and 36mo are held exactly where they were. **Stamp decision: AUTO-STAMPED** — ordinary light daily touch, research capability fully available, sourcing clears the sufficiency rule, verification clean.

Sept 23 LIGHT DAILY touch (score set 2026-09-23_draft), prior version: checked for changes since the Sept 22 committed baseline. One dated item found: CFTC Chairman Michael Selig, speaking at the Sept 24/7 trading, and broader stablecoin use as core market plumbing — corroborated by 6+ independent outlets (The Block, KuCoin News, CoinCentral, Crypto-Economy, CoinGabbbar, Blockonomi). This is a real move, but it does not independently move P. Still zero of six agencies with a finalized GENIUS Act rule; no new DTCC or Nasdaq tokenization timeline news found; no tokenized-treasury depeg or counterparty incident news found; research fully available (WebSearch clean), no window moved, and the master call band did not flip — **AUTO-STAMPED per the runbook's delegated daily authority**. Iran War Risk is the only pillar that moved this cycle.

Sept 19 FULL WEEKLY refresh (score set 2026-09-19_draft), prior version: independently re-verified via extensive WebSearch (11 queries) — no Tokenized Securities Venue has announced going live yet, so the issuer written notice and wait a minimum 30 calendar days before trading can start (with the issuer able to object and block it outright), making mid-October the earliest realistic date for a third-party-tokenized security. Crowdfund Insider, Decrypt, Securities.io — a reason for near-term caution already baked into the modest 1mo score, not a reason to cut it further. SIFMA issued a public statement (sifma.org, primary) raising concerns and Better Markets separately criticized the exemption — expected institutional pushback, no litigation filed, not new negative information. DTCC's October 2026 full-service launch remains slated per its own timeline, but counts continue climbing (~1.9M addresses, +134% MoM per AMBCrypto/CoinGabbbar) — continuation of a pre-existing growth trend, not fresh confirmation of the exemption's own uptake. **DATA GAP FILL** inconsistent secondary figures (\$38.86B vs. \$23.25B for adjacent dates) that could not be verified directly (WebFetch to app.rwa.xyz blocked in this sandbox) — continuing to cite the last independently verified figures. app.rwa.xyz was also blocked this cycle for every domain attempted, so primary-source content relies on WebSearch's indexed summaries rather than direct fetches — a partial research-depth limitation, flagged in the runbook, categorically excluded from Alex's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW**. 2026-09-18_draft remains as is.

Prior cycle (Sept 17 light daily touch): re-checked — the only dated news found was Aave's Sept 16 RWA-lending-hub announcement on Avalanche, a single-product continuation not clearing this pillar's bar. **Stamp decision: COMMITTED baseline before this pillar moved.**

Prior cycle (Sept 16 light daily touch): re-checked — no new dated rwa.xyz pull beyond the \$38.89B mid-September read already priced Sept 15; no rail failure, depeg, or counterparty default. **P HELD FLAT.**

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: independently re-confirms the hold. rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz; secondary: DTCC continuation of the already-priced growth curve, not a step-change; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$10B; DTCC (DTCC.com primary + Forkast/Tradeweb/Crowdfund Insider, 2+ independents) — remains the operative unchanged catalyst. Two freshly-dated items this week were found but are each effectively single-source (Casper-to-ERC-3643/T-REX Ledger bridge) — logged as context, not used to move P per the sufficiency rule. No new rail failure, stablecoin depeg, counterparty default, or RWA-tokenization-specific enforcement news found. **WEEKLY refresh, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality — LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.** This morning's Sept 12 draft remains as is.

Prior cycle (Sept 12 light daily catch-up, this morning): re-checked — no new dated catalyst found. RWA.xyz aggregate reads (~\$38B tokenized value by late August) read as continuation of already-priced growth. **FLAT. AUTO-STAMPED SEPTEMBER 12, 2026 (2026-09-12_draft) — the last TRUE committed baseline.** Iran War Risk was the only pillar that moved that cycle.

Prior cycle (Sept 11 light daily catch-up): re-checked — no new dated catalyst found. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 11, 2026.**

Prior cycle (Sept 10 light daily catch-up): re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 10, 2026.**

Prior cycle (Sept 9 light daily catch-up): re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct pull, read as continuation of already-priced growth. **STAMPED SEPTEMBER 9, 2026.**

Prior cycle (Sept 8 light daily catch-up): re-checked via WebSearch — no new dated catalyst found; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 8, 2026.**

Prior cycle (Sept 6 light daily catch-up): re-checked via WebSearch — DTCC's October launch remained the operative unchanged catalyst, no new dated milestone. **AUTO-STAMPED SEPTEMBER 6, 2026.**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch, no new dated catalyst found. **P HELD FLAT at 52/60/66/74/85. COMMITTED BY ALEX, SEPTEMBER 5, 2026.**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores.json reported "P HELD FLAT". The **TRUE committed baseline** for this pillar remains **2026-09-02_draft (52/60/66/74/85), auto-stamped Sept 3**. Not corrected retroactively in scores.json — stamping is Alex's call.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat, no dated catalyst found Sept 1-2. This shared score set was originally left as draft only because Iran War Risk's sharp re-rate flip was not clear. **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Prior cycle (Sept 1 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 31-Sept 1; none found — only stale/recycled RWA market-size summaries turned up.

Prior cycle (Aug 31 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 29-31; none found — sector-level figures cited that window (total tokenized RWA snapshot) were consistent with the Aug 28 pull already priced in, not a fresh catalyst; rwa.xyz was not independently re-pulled. P held flat, AUTO-STAMPED.

Prior cycle (Aug 29 full weekly refresh) — carried forward for context: this was the first full weekly refresh since Aug 22 draft2 — an independent primary-source pass that does not take the abandoned, never-issued Aug 22 draft2 as a given. This week's one genuine, multi-sourced development is Coinbase's Aug 24 launch of tokenized-stock trading (NVDAC/METAC/AAPLc/GOOGLc) on its own Base blockchain, under an ADGM permission received from the Cayman Islands, with structural limitation that already kept the Robinhood Chain launch from clearing this pillar's bar; treated the same way for consistency. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24) touching RWA tokenization was found on a direct sec.gov check Aug 22-29, and DTCC's October 2026 / Nasdaq's Dec 6, 2026 targets are unchanged. **rwa.xyz's own site returned HTTP 403 on repeated attempts** to fetch the report's most recent primary pull (Aug 28, carried forward from the abandoned draft): total distributed value \$38.69B (+3.04%/30d), tokenized Treasuries \$16.00B (-0.93%/30d), the **second consecutive negative** report. **Stamp decision:** reconfirmed this cycle — not sufficient alone to move P, but worth a genuinely independent re-pull next cycle. No new RWA-rail failure, depeg, or counterparty default found; two unrelated DeFi incidents (a failed DeFi launch, a failed DeFi launch) cleared the sufficiency bar to move P.

(That Aug 29 cycle was left as a draft solely because full weekly refreshes are categorically excluded from delegated daily auto-stamp authority, regardless of evidence quality — not for any evidentiary reason.)

The June committed scores (**53 / 57 / 62 / 72 / 85**, committed June 19, 2026) and every committed set from Aug 8 through Sept 17 (52/60/66/74/85) show this pillar held flat for six weeks; **today's Sept 17** 28 draft (abandoned, not delivered) → Aug 29 full weekly refresh (held flat, left as draft) → Aug 31 light daily catch-up (held flat, AUTO-STAMPED) → Sept 1 light daily catch-up (2026-09-01_draft, held flat, AUTO-STAMPED SEPTEMBER 3, 2026) → Sept 3 (no new score set, held flat) → Sept 5 light daily catch-up (2026-09-05_draft, held flat — commit message wrongly claimed auto-stamp, corrected here) → Sept 5 FULL WEEKLY refresh (held flat, AUTO-STAMPED) → Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, held flat, left as draft, committed by Alex) → Sept 13-17 light daily catch-ups (held flat, AUTO-STAMPED) → **UP to 58/65/70/77/86 on the SEC's Innovation Exemption — COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026, the last TRUE committed baseline → Sept 19 FULL WEEKLY refresh (2026-09-19_draft, held flat, AUTO-STAMPED)** (the day issuer-notice mechanic makes mid-October the earliest realistic date), SIFMA/Better Markets pushback logged but not scored, DTCC's October launch unconfirmed this week, holder-count growth read but not used — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW** (full weekly refreshes are categorically excluded from the delegated daily auto-stamp authority regardless of move size).

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

FULL WEEKLY refresh, September 26, 2026 (score set **2026-09-26_draft3, COMMITTED BY ALEX, September 27, 2026**) — checked against the last COMMITTED baseline, 2026-09-23_draft (58/65/70/77/86). One primary-source report.

October 3, 2026 — FULL WEEKLY refresh (2026-10-03_draft2), LEFT AS DRAFT: CUT on 1mo and 3mo, 57/65/70/77/86 → 56/64/70/77/86. This is the clearest case this cycle of an advance than buried. The first pass scored -2/-1/-1. Verification then found that the "four consecutive negative readings" rationale would not hold: the aggregator had changed scope from **87 products** to most of the \$15.98B → \$14.77B decline fell inside an unobserved Aug 29 – Sept 26 gap. What survives is the clean, like-for-like, week-over-week comparison — \$14.94B → \$14.77B on the same 28 days. **1mo 57 → 56:** contracting flow against a catalyst that is confirmed *not live*, since dtcc.com still describes its October launch as "expected." **3mo 65 → 64:** DTCC's launch now falls inside this window. **2mo 72 → 71:** surfaced a positive this report had recorded wrongly — **GENIUS is no longer zero-of-six**, Treasury having issued the first binding interim final rule on Sept 30 (91 FR 61688). **12mo and 36mo held flat** — SEC order's 30-day mechanic is an *issuer-notice* period, not a public comment window, and the relief runs five years; and DTCC's July production trades involved "more than 30 firms," not 50+.

- Oct 2 light daily touch (quant-only; qualitative set unchanged):** re-checked this pillar's pre-committed triggers via WebSearch. No new dated SEC/CFTC action or live Tokenized Securities Venue (as of Oct 1). **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched; active set remains 2026-09-26_draft3.
- Oct 1 light daily touch (quant-only; qualitative set unchanged):** re-checked this pillar's pre-committed triggers via WebSearch. Direct rwa.xyz access was blocked by the sandbox's network. Sept 26–Oct 1 window could substitute, so the tokenized-Treasury trend could not be re-read this cycle — a genuine data gap, not evidence either way. The live-venue trigger explicitly did not fire (around Oct 17). DTCC's October launch remains an unconfirmed target, neither newly confirmed nor delayed. No RWA-rail failure, depeg, or counterparty default found. **GENIUS Act rulemaking is still pending.** **FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched; active set remains 2026-09-26_draft3.
- ★ ★ SUPERSESSION NOTICE — and on this pillar the abandoned draft is REVERSED, not just superseded.** A 2026-09-24_draft cycle proposed 59/66/70/77/86 here and edited this report to "COMMITTED · AUTO-STAMPED" for a set still marked draft. Its NYSE MOU fact *held up* on re-verification. **Its judgement did not:** it took +1 on the two near windows for a non-binding MOU. That is asymmetric, and this cycle goes the other way on 1mo.
- ★ ★ THE FIRED TRIGGER — rwa.xyz reachable by direct fetch, resolving the Sept 19 data gap. Tokenized US Treasuries: \$14.94B, -6.95% over 30 days** across 25 assets, from \$16.00B on Sept 8 to \$14.77B on Sept 26. **Seven times the prior magnitude.** This report's own table had pre-committed that a third negative reading "would be a genuine trend worth re-rating on." The carried "~\$39.2B as of Sept 8" figure was a secondary report's secondary "~1.9M addresses, +134% MoM" citation. Token Terminal's \$46B figure uses a different methodology and is **not blended**.
- Honest limits on the number driving the cut:** the -6.95% magnitude is **single-aggregator** — no second aggregator reproduces it — though a Sept 15 independent citation of "more than 30 firms" and a possible reclassification could not be distinguished, so it is reported as a number, not a narrative.
- ★ ★ NEW — PRIMARY: the CFTC opens the door to tokenized customer collateral, Sept 24.** The FAQ update (marked "NEW 9/24/2026", PDF extracted locally) was issued by **three divisions** (corrected). New **Q12 answers "Yes"** to whether an FCM or DCO may invest customer funds in *tokenized* Reg 1.25 instruments, on four conditions. **Q15 explicitly contemplates "public and private"** aims institutional demand at exactly the product whose flow just contracted — and the leading candidate to move this pillar next cycle if an FCM actually holds such collateral.
- The live-venue trigger DID NOT FIRE.** No Tokenized Securities Venue is live or announced live as of Sept 26; the exemption's 30-day public-notice mechanic puts the earliest third-party-tokenized venue at least 30 days out.
- Logged, not scored:** the exemption's Federal Register publication Sept 22 (**91 FR 60168**, Release 34-106402, File 4-927, via the federalregister.gov API) — procedural completion of the Sept 22 **Conditional Exemptive Relief ... and Request for Comment.** Ondo's BlackRock-strategy portfolios went live Sept 24 but are **non-US only** (Ondo Global Markets (BVI) Limited; US persons barred). Citi's \$5.5tn-by-2030 is a third-party **forecast**.
- No rail failure, depeg or counterparty default** dated Sept 19–26. The honest bear datapoint is **idle capital**, not a failure event: ~\$78M of BENJI redemptions in the 30 days to Aug 28, the second-highest in history. This is secondary analysis and is labelled as such; circulating \$140M-liquidation items are **undated retrospectives, not this window**.
- A stale row is FLAGGED rather than requested:** the "Nasdaq Dec 6, 2026" tokenized-trading date **could not be re-verified from any source** and may conflate Nasdaq's separate 23-hour-trading date. **GENIUS remains zero-of-six finalized;** SIFMA's pushback is still a statement with **no litigation and no stay**.
- Score decision: CUT one point on 1mo, to 57/65/70/77/86. LEFT AS DRAFT, NOT AUTO-STAMPED** — full weekly refreshes are categorically excluded from delegated auto-stamp authority.
- What would change my mind:** upward, an FCM or DCO actually holding tokenized Reg 1.25 collateral, or a venue going live under the exemption. Downward, a **fourth** consecutive negative reading on the 1mo score, or a **fourth** consecutive negative reading on the 3mo score.

Carried forward — what changed in the September 23 light daily touch (2026-09-23_draft, committed, auto-stamped), for continuity:

- CFTC Chairman Selig's Sept 22 speech** at the NY Fed's Treasury Market Conference — "mass tokenization," 24/7 trading, broader stablecoin use as core market plumbing — corroborated by Blockonomi). A rhetorical/tonal signal, not a rule or transaction; does not move P.
- Score decision: HELD FLAT at 58/65/70/77/86.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 22 light daily touch (2026-09-22_draft, committed, auto-stamped), for continuity:

- Not independently re-researched that cycle — a targeted single-pillar Fed & Macro follow-up (two regional Fed survey findings; see that pillar's report), not a fresh Tokenization/RWA research.
- Score decision: HELD FLAT at 58/65/70/77/86.** Not re-researched that cycle (targeted single-pillar touch) — carried forward from the Sept 19 weekly review. AUTO-STAMPED alongside Fed's Sept 19 FULL WEEKLY refresh.

Carried forward — the September 19 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 19, 2026 (score set **2026-09-19_draft, DRAFT, awaiting Alex's manual review**) — checking for changes since the 2026-09-18_draft committed baseline via a dedicated full-weekly primary-source report.

- No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 "Innovation Exemption."** A structural detail worth logging: for any NMS stock tokenized by an issuer, 30 days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18). The exemption's 30-day public-notice mechanic puts the earliest third-party-tokenized venue at least 30 days out. This is a reason for near-term caution already baked into keeping 1mo modest (58), not a reason to cut.
- SIFMA issued a public statement (sifma.org, primary, Sept 2026)** raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets said it was "temporary/conditional" — no litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026** per DTCC's own May/July 2026 press materials, corroborated by CoinDesk. "Unconfirmed this week" is the working assumption, not a positive surprise; doesn't move P.
- On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month)** per AMBCrypto and CoinGabbbar (both Sept 2026, likely drawing on the same underlying data). Continuing adoption momentum but is a continuation of a pre-existing growth trend, not specific new evidence about the Sept 17 exemption's real-world uptake — doesn't independently justify a move.
- DATA GAP, flagged not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date). Cite the last independently verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number, flagging this discrepancy explicitly rather than silently updating.

- **No corrections needed** to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up — still true, now still true two days later. No new market-price/odds data.
- **Research capability:** full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attempted, especially re: the SEC press release and the rwa.xyz figure (handled by not reporting an unverified number, see above). A partial research-depth limitation, not a capability failure.
- **Score decision: HELD FLAT at 58/65/70/77/86.** Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. **LEFT AS DRAFT, AWAITING** delegated daily auto-stamp authority, regardless of evidence quality or move size (here, zero).

Carried forward — what changed in the September 18 light daily touch (2026-09-18_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 18, 2026 (score set **2026-09-18_draft**, committed, auto-stamped) — checking for changes since the 2026-09-17_draft committed baseline. **This pillar RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.**

- **PRIMARY: the SEC issued its "Innovation Exemption" for tokenized-stock trading (sec.gov press release 2026-90, published Sept 17, 2026, plus Commissioner Uyeda's corroborating letter).** The SEC's exemption provides exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automata period open. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May).
- **This is exactly the trigger this pillar's own table has been watching since the Aug 13-15 cancellation of the SEC's earlier tokenized-equity exemption meeting** ("a formally re-scheduled meeting" — the SEC's own words). Since launch this pillar has logged (Robinhood Chain, Coinbase's Base launch, both non-US-only), it is US-federal-regulator-authorized domestic tokenized-stock trading, the exact structural ceiling for the RWA market.
- **Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.** Sizing front-loaded per window: 1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1 — heaviest near-term because the exemption is temporary/conditional (sunsets in 5 years) and the 3yr window was already near its practical ceiling. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 17 light daily touch (2026-09-17_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 17, 2026 (score set **2026-09-17_draft**, committed, auto-stamped) — checking for changes since the 2026-09-16_draft committed baseline. **This pillar HELD FLAT at 52/60/66/74/85.**

- **Only dated news found: Aave's Sept 16 announcement of a planned RWA lending hub on Avalanche using Tether's USAT.** Consistent with this pillar's own house treatment of single-product announcements, a single-product announcement does not by itself clear the bar for a P move.
- **No rail failure, depeg, counterparty default, or DTCC/Nasdaq timeline change found.**
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 16, 2026 (score set **2026-09-16_draft**, committed, auto-stamped) — checking for changes since the 2026-09-15_draft committed baseline. **This pillar HELD FLAT at 52/60/66/74/85.**

- **No new dated rwa.xyz pull found** beyond the \$38.89B mid-September read already priced Sept 15.
- **No rail failure, depeg, or counterparty default found** in the window since the last check.
- **DTCC's October full-service launch** (Russell 1000, major ETFs, Treasuries) remains unchanged and on schedule — already priced, no new dated milestone.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 14, 2026 (score set **2026-09-14_draft**) — checking for changes since the 2026-09-13_draft committed baseline.

- **No dated catalyst found Sept 13-14.** No fresh rwa.xyz aggregate pull beyond the ~\$39.2B Sept 8 read already priced, and no rail failure, depeg, or counterparty default on any tokenization.
- **DTCC's October 2026 full-service launch** — Russell 1000 equities, major index ETFs, and US Treasuries — **remains unchanged and on schedule.** No delay, no scope change, nothing new announced.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved. The growth curve is continuing on trend, which is what the current P already assumes.

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 — checking for changes since the Sept 12 committed baseline (2026-09-12_draft, auto-stamped this morning).

- **Sept 12, FULL WEEKLY refresh (2026-09-12_draft2):** rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary, corroborated by CryptoRank/Crowdfund Insider aggregate). Categories now each exceed \$1B. DTCC's October 2026 full-service launch reconfirmed on schedule, no delay (DTCC.com primary + 2 independents: Forkast, Tradeweb, Crowdfund Insider). Two Group's "AstralBeam" Casper bridge) are each single-source-equivalent, logged as context only, not used to move P. No new rail failure, depeg, counterparty default, or RWA-tokenization-specific news.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Nothing this cycle clears the sufficiency bar. **LEFT AS DRAFT — full weekly refreshes are categorically excluded from Alex's delegated daily authority.** 2026-09-12_draft2.

Carried forward — what changed in the Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped, this morning's cycle), for continuity:

- **Sept 12, light daily catch-up:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) are a continuation of the already-priced growth. DTCC's October 2026 full-service launch (Russell 1000 equities, major-index ETFs, US Treasuries) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service launch remained the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct rwa.xyz pull. DTCC's October 2026 full-service launch remained the operative unchanged catalyst. No rail failure, depeg, or counterparty default found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; no new dated catalyst clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated tokenization catalyst found Sept 1-2.** General web search found nothing beyond unchanged background (the DTCC pilot's possible October 2026 commercial-launch window).
- **BTC (pipeline reference): \$76,581.44 on Sept 2 vs. \$78,038.78 on Sept 1** — a real pullback on the day, driven by the Iran escalation covered in that pillar's report, not by anything here.

- **No new dated tokenization catalyst found** via WebSearch this cycle — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participants incl. BL unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp policy regardless of 2026. Fed & Macro is the pillar that moved this week, on a hot August jobs report. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **No dated catalyst found Sept 1-2.** Score decision: HELD FLAT at 52/60/66/74/85. This shared score set was originally left as draft — Iran War Risk's sharp re-rate flipped the master call band and daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 31-Sept 1.** General web search turned up only stale/recycled RWA market-size summaries — dated to Q1 2026 or the already-priced Aug 9 rail failure, depeg, or counterparty default found.
- **BTC (pipeline reference): \$78,038.78 on Sept 1 vs. \$78,447.16 on Aug 31** — modest pullback.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority, then the committed baseline. In

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 29-31.** Sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research trend, not fresh. rwa.xyz was not independently re-pulled this cycle.
- **BTC (pipeline reference): \$78,447.16 on Aug 31 vs. \$77,666.16 on Aug 29** — further gain.
- **Score decision: HELD FLAT at 52/60/66/74/85.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **★ Coinbase launched tokenized-stock trading on Base (Aug 24):** NVDac, METac, AAPLc, GOOGLc (Nvidia, Meta, Apple, Alphabet), 1:1 Alpaca-custodied, under an ADGM FSRA permission for US users only — same structural limitation as the Robinhood Chain precedent, insufficient alone for consistency.
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed, citing RWA settlement/distribution as a use case; a stablecoin launch, not RWA tokenization.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29 found** on a direct sec.gov check; the tokenized-equity exemption meeting remains canceled with no new dates.
- **DTCC's October 2026 and Nasdaq's Dec 6, 2026 targets are both unchanged** this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found;** two unrelated DeFi incidents (Term Finance ~\$8.5M, Arrakis V1/G-UNI, both Aug 23) are ordinary DeFi.
- **★ Data-quality flag — rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle.** Could not independently re-pull live figures; relying on the report's most recent primary source (+3.04%/30d) vs. \$38.32B (+2.30%/30d) Aug 22 — continued sub-1%-per-week growth, same trend. Tokenized Treasuries \$16.00B (-0.93%/30d) vs. \$15.98B (-0.39%/30d) Aug 22 — the **second** flagged for a genuinely independent pull next cycle.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** — predates this window, missed by the Aug 22 research pass; logged for the audit trail, not counted as new evidence.
- **BTC (pipeline reference): \$77,666.16 on Aug 29 vs. \$77,266.84 on Aug 22** — modest gain.
- **Score decision: held flat at 52/60/66/74/85** — nothing this cycle clears the sufficiency bar. **Left as draft, not auto-stamped:** this is a full weekly refresh, categorically excluded from Alex's standing and awaiting Alex's manual review.

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity: Three earlier drafts (Aug 17, 18, 20) were written but never delivered, and an Aug 21 session delivered the Aug 20 number; primary-source pass on top of the already-delivered Aug 22 catch-up.

- **Why a new set instead of editing the delivered Aug 22 draft:** per house rules, a same-day draft may only be amended in place before delivery; the Aug 22 catch-up draft was already rendered as 22_draft2.
- **rwa.xyz total RWA distributed value: essentially flat.** Direct pull Aug 22 draft2 (primary) shows \$38.32B (+2.30%/30d) vs. the Aug 16 baseline (\$38.17-38.24B) — normal drift, no discontinuity.
- **★ rwa.xyz tokenized Treasuries: first slightly-negative 30-day reading tracked.** \$15.98B, -0.39%/30d, across 87 products (primary) — prior cycles reported flat/slightly-up figures around \$16B — not sufficient alone to move P, flagged to watch next cycle.
- **★ NEW, primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar), carved from coinprika, BigGo Finance, UEEx, KuCoin). Bloomberg (Aug 20) separately reports a plan to embed BENJI in conventional ETFs/mutual funds, possibly starting Q4 2026. Genuine but narrow in scope.
- **★ NEW — SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** the planned ~Aug 14 meeting was called off. Multi-sourced (Ledger Insights, etc.) traces causes (White House concerns, SIFMA opposition, CLARITY Act friction) trace to reporting that looks like one originating story — flagged as uncorroborated at the causal level. Incremental news in the letter above.
- **GENIUS Act rulemaking proceeding exactly on its pre-set procedural schedule:** Treasury's Section 3 NPRM published in the Federal Register Aug 18 (comment deadline Oct 19); the joint Treasury-SEC memos; Forkast). Process, not news — no rule finalized. Not yet a trigger.
- **★ NEW — Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only, but growth off a small base, not an acceleration.
- **No new RWA-rail failure, depeg, or counterparty default found** in this window; the Jul 15 Ostium exploit (\$18-24M) remains closed and non-recurring, no follow-up developments found.
- **BTC (pipeline reference):** \$77,169.40 on Aug 22 vs. \$71,882.92 on Aug 20, +7.4%.
- **Score decision:** 1mo 52 → 52 · 3mo 60 → 60 · 6mo 66 → 66 · 12mo/36mo held at 74/85 — the Franklin Templeton positive and the SEC exemption-cancellation negative are both multi-sourced; the negative Treasuries reading is sub-1% and a single datapoint. **Left as draft at delivery, not auto-stamped:** this pillar's own evidence would have met the routine conditions for Alex's standing and re-rates only — this is a full weekly refresh, categorically excluded regardless of evidence quality. **COMMITTED BY ALEX August 23, 2026** after manual review.

Sources

Retrieved & graded September 19, 2026, FULL WEEKLY refresh — click and judge the quality yourself. Official records & rules first, then live data, reporting, and prices. This cycle: 11 WebSearch queries covering the Innovation Exemption count growth; WebFetch to sec.gov and app.rwa.xyz was blocked in this sandbox for every domain attempted, so primary-source content relies on WebSearch's indexed summaries rather than direct fetches — flagged as a partial reliance.

- **Tokenized Treasuries (aggregator, direct pull Oct 3, 2026, confirmed exact):** app.rwa.xyz/treasuries — \$14.77B distributed value, -7.30% / 30d, 25 assets, 86,020 holders. **Sourcing limit:** single aggregator, metric based on subset of 109 table rows; cause of the decline unknown; the Sept 26 comparable is confirmed only against this system's own archive.

- September 19 FULL WEEKLY refresh (this cycle):** CNBC, CoinDesk, Crowdfund Insider, Decrypt, Securities.io (all Sept 17-18, 2026) — corroborating coverage of the SEC's Innovation Exemption mechanics, including the primary — public statement raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets separately criticized the exemption (no litigation filed as of Sept 19) · month-over-month (likely the same underlying analytics dataset, one corroborated data point, not fully independent triangulation) · DTCC.com (May/July 2026 press releases, background) — October 2026 full-service total cycle returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date) that could not be verified directly (WebFetch to app.rwa.xyz blocked in this sandbox) — NOT used; the last ind data-fetch workflow — BTC pipeline reference, unchanged from Sept 18.
- September 18 light daily touch:** sec.gov — press release 2026-90, "SEC Grants Innovation Exemption for Tokenized Securities Venues" (primary, published Sept 17, 2026); Commissioner Uyeda's corroborating statement Alpha, Richey May (7+ independent outlets, all dated Sept 17-18, 2026) — corroborating coverage of the exemption's scope and conditions · GitHub Actions data-fetch workflow — BTC \$78,046.80 (Sept 18, 2026) vs. \$78,046.80 (Sept 17, 2026).
 - September 12 FULL WEEKLY refresh:** rwa.xyz — aggregate tokenized RWA value (primary), ~\$39.2B as of Sept 8, 2026, corroborated by CryptoRank and Crowdfund Insider aggregation coverage; six asset categories (p DTCC.com — October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed on schedule, corroborated by Forkast ("From Pilot to Plumbing"), Tradeweb, and Crowdfund Insider · single-s exchange collateral expansion (Sept 7) and MAKE Group's "AstralBeam" Casper-to-ERC-3643/T-REX Ledger bridge (Sept 7-8) — logged as context, not used to move P · general web search, risk check — no new rail failure within the last two weeks.
 - September 12 light daily catch-up (this morning's cycle):** Stobox "State of RWA 2026" mid-year report, InvestaX Q3 2026 RWA market report — RWA.xyz aggregate ~\$38B tokenized value by late August 2026 (up from dated milestone; DTCC's October 2026 full-service-launch window (Russell 1000 equities, major ETFs, Treasuries) reconfirmed unchanged; no new SEC rulemaking or no-action letter found.
 - September 11 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 10-11 — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 rulemaking or no-action letter found.
 - September 10 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 9-10 — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 rulemaking or no-action letter found.
 - September 9 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 8-9 — press summaries citing rwa.xyz put total distributed value at ~\$39.2B, a single-source figure without 2026 full-service-launch window reconfirmed unchanged; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
 - September 8 light daily catch-up:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 6-8 (DTCC.com, Tradeweb, CoinDesk, CoinGabbbar) — DTCC's October 2026 full-service-launch window confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
 - September 6 light daily catch-up:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 5-6 — DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries) confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
 - September 3-5 re-check:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 3-5 — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, U.S. Treasuries; 50+ participants) confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
 - September 2 light daily catch-up (this cycle):** general web search for DTCC/Nasdaq/GENIUS Act/SEC/rwa.xyz-sourced RWA news dated Sept 1-2 — returned no fresh dated catalyst beyond unchanged background (the BTC \$76,581.44 (Sept 2) vs. \$78,038.78 (Sept 1)).
 - September 1 light daily catch-up:** general web search for DTCC/Nasdaq/GENIUS Act/SEC/rwa.xyz-sourced RWA news dated Aug 31-Sept 1 — returned only stale/recycled market-size summaries (Q1 2026 or the already priced 31).
 - August 31 light daily catch-up:** gncrypto.news, Yellow research (both citing an Aug 9, 2026 rwa.xyz snapshot: total tokenized RWA \$38.17B, tokenized Treasuries \$16.21B) — consistent with the Aug 28 pull already priced in; dated Aug 29-31 — no new dated development found · Bitstamp — BTC \$78,447.16 (Aug 31) vs. \$77,666.16 (Aug 29).
 - August 29 full weekly refresh:** coinbase.com — "Coinbase establishes its tokenization hub in Abu Dhabi" plus its tokenized-stocks product page (Aug 24, 2026, primary) — NVDAC/METAC/AAPLC/GOOGLC launch on Bax (Aug 24, 2026) corroborating the Coinbase launch and its non-US-only eligibility · Standard Chartered / Anchorpoint Financial coverage (Aug 24-25, 2026) — HKDAP stablecoin launch citing RWA settlement as a use case, logged 22-29, 2026; none found; tokenized-equity exemption meeting remains canceled, no new date · app.rwa.xyz — repeated direct-pull attempts, Aug 29, 2026: **HTTP 403, access blocked**, data-quality flag logged · general web search corroborating the carried-forward Aug 28 rwa.xyz figures — a Stobox weekly digest (~\$38.4B, Aug 19-25 window) and a separate source citing \$38.39B as of Aug 21 — secondary, not independent price (~\$8.5M, Aug 23) and Arrakis V17/G-UNI Uniswap V3 spot-manipulation drain (Aug 23) identified and assessed as ordinary DeFi incidents, not applicable to this pillar · press-release-syndication coverage of Ondo Stocks C (Aug 23, 2026) — confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
 - August 28 daily catch-up draft (never delivered, superseded — figures carried forward this cycle only due to the Aug 29 rwa.xyz access failure):** app.rwa.xyz — direct pull, Aug 28, 2026 (primary): total RWA distributed value \$38.32B (+2.30% 30d); tokenized US Treasuries \$15.98B (-0.39% 30d, 87 products) — first slightly-negative 30-day reading tracked · [Federal Register](#) / [home.treasury.gov](#) — Treasury's GENIUS Act (Aug 28, 2026) — Uniswap's tokenized-stock volume on Robinhood Chain crosses \$1B cumulative; CEO Teney's Aug 18 call for a US framework.
 - August 22 draft2 full weekly refresh (this cycle, second session same day):** sec.gov — no-action letter, Franklin Templeton, dated 2026-08-12 (.../franklin-templeton-081226), direct primary check confirming custody Finance, UEX, and KuCoin (all Aug 12-13, 2026) — corroborating coverage of the Franklin Templeton no-action letter · Bloomberg (Aug 20, 2026) — Franklin Templeton's plan to embed tokenized BENJI shares inside core 15, 2026), plus Bloomberg/Yahoo-sourced coverage — SEC's planned tokenized-equity "innovation exemption" meeting (~Aug 14) canceled/postponed, citing White House concerns, SIFMA opposition, and CLARITY Act (Aug 14, 2026) — total RWA distributed value \$38.32B (+2.30% 30d); tokenized US Treasuries \$15.98B (-0.39% 30d, 87 products) — first slightly-negative 30-day reading tracked · [Federal Register](#) / [home.treasury.gov](#) — Treasury's GENIUS Act (Aug 28, 2026) — Uniswap's tokenized-stock volume on Robinhood Chain crosses \$1B cumulative; CEO Teney's Aug 18 call for a US framework.
 - August 22 primary-source research pass (earlier same-day catch-up draft):** app.rwa.xyz — direct pull, Aug 22, 2026 (primary): total RWA distributed value \$38.32B (+2.30% 30d); tokenized Treasuries ~\$16.15-16.21B (~\$2.14-2.2B, iBENJI ~\$1.7-1.72B) — superseded by the deeper draft2 Treasuries pull above (\$15.98B, -0.39%/30d) · sec.gov — press release 2026-76, "Regulation Crypto Assets" proposal (Aug 18-19, 2026, primary), corrected FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Program (CIP) proposed rulemaking (docket nos. FinCEN-2026-0101 / OCC-2026-0331, published Jun 22, 2026, comment period closed on schedule Aug 21, 2026), reported set to delay the tokenized-stock "innovation exemption" track amid Wall Street/White House pushback — superseded by the draft2 finding above that the meeting was outright canceled.
 - August 20 draft (never delivered, superseded by the Aug 22 pass above):** app.rwa.xyz — direct pull, Aug 20, 2026: total RWA distributed value \$38.07B (+1.28% 30d), plus a conflicting "\$13.7B Treasuries" subtotal flat report; not reconfirmed by the Aug 22 pull) · AI-summarized web search result citing \$38.27B as of Aug 19 (+2.44%/30d), noted as a soft/unverified figure · [The Block](#), [crypto.news](#), [Benzinga](#), and [Blockzeit](#) — SEC Chair Ayres (Aug 17, 2026; crypto.news explicitly notes no final framework, eligibility criteria, or implementation date announced).
 - August 16 light daily check:** general web search for RWA/tokenization news dated Aug 15-16 — returned only a recirculating \$33.5B "liquid on-chain value" market-size figure from a different data provider (CryptoRank) · catalyst found.
 - August 14 light daily check:** [Bitcoin News](#) — "Tokenized RWA Sector Hits \$38B as Treasury Debt Dominates Market" · [gncrypto.news](#) — "Tokenized RWAs Reach \$38.17B; Treasuries Lead \$16.21B" · [Yellow](#) — "RWA Tokenization Hits \$38B" — added product-level detail (87 Treasury products, 63,010 addresses, USYC/BUIDL/USDY/iBENJI leaderboard); no new dated catalyst found.
 - August 13 light daily check:** [CryptoRank](#) — "RWA Tokenization News Today" · [Blockchain Reporter](#) — "\$33.5B liquid on-chain value, tripling in a year" · [Yahoo Finance](#) — "Reality of RWA Tokenization in 2026" — all track distributed-value number already in this report, so it's not adopted. No other fresh dated catalyst found.
 - August 11 light daily check:** general web search for RWA/tokenization news dated Aug 10-11 — returned only generic 2026 market-sizing and explainer pieces (Yahoo Finance, Finextra, crypto.news, MetaMask, InvestaX, and others).
 - August 10 light daily check:** [Bitcoin News](#), [CoinSpectator](#) — "Tokenized RWA Sector Hits \$38B" (dated Aug 9, re-checked today, confirmed already priced in) · general web search for RWA/tokenization news dated Aug 9-10 — returned only generic year-in-review/market-overview pieces (Yahoo Finance, InvestaX, BingX, crypto.news, MetaMask), no fresh dated catalyst found.
 - August 9 light daily check:** general web search for RWA/tokenization news dated Aug 8-9 — returned only generic year-in-review/market-overview pieces (Yahoo Finance, InvestaX, BingX, crypto.news, MetaMask), no fresh dated catalyst found.
 - August 8 full-weekly additions:** app.rwa.xyz — direct pull, Aug 8, 2026: tokenized Treasuries \$16.21B (87 products, 62,997 holders, 7d yield 3.29%), total RWA distributed value \$38.24B (new ATH), Represented Asset Value \$38.24B (new ATH) · [CoinDesk](#) — Central Bank of Ireland clears Aviva Investors' XRP Ledger fund (Jul 29) · [Ripple.com](#) press release + FOW, Cryptonomist, Fintech.global, CryptoNews, Yahoo Finance — Ripple takes equity stakes in XRP Ledger (Aug 8, 2026) — confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
 - August 7 additions:** [CryptoRank](#) — "RWA Tokenization News Today: Market Size & Trends 2026" (aggregator roundup, no new dated catalyst) · [CoinGecko](#) — "RWA Report 2026" (background) · checked and found nothing new.
 - August 6 additions:** [CoinDesk](#) — [BlackRock](#) expands tokenized cash with BSTBL/BSRV (Aug 3), corroborated by [KuCoin](#), [PYMNTS](#), [Cointribune](#), [BitcoinWorld](#), [Solana Compass](#), and [CoinPaprika](#) · [crypto.news](#) — corroborated by [CryptoRank](#) and [Crowdfund Insider](#) · [CoinDesk](#) — [BlackRock](#) expands tokenized cash with BSTBL/BSRV (Aug 3), corroborated by [KuCoin](#), [PYMNTS](#), [Cointribune](#), [BitcoinWorld](#),

- **Forecasts (carried from June, still load-bearing):** BCG × Ripple — \$9.4T by 2030 / \$18.9T by 2033 (Apr 7, 2025) · BIS WP 1270 — stablecoin inflows lower T-bill yields; outflows a fire-sale "lower bound".
- **The Prize (prices):** CoinGecko — ONDO \$0.3291 (Jul 13, 2026; −0.90% 24h, +0.60% 7d; mkt cap ~\$1.6B; ATH \$2.14 Dec 16, 2024) — market price, not an institutional estimate.
- **Reference (BTC pipeline reading):** GitHub Actions data-fetch workflow — BTC \$85,488.24 (Sept 23, 2026) vs. \$85,992.32 (Sept 22, 2026).
