

Tokenization of Real-World Assets Pillar Report

Real Money On-Chain — Researched, Scored, and Personally Committed

Originally written **June 19, 2026**; scores committed by me on **June 19, 2026**. Re-researched July 8, 13, 18, 25, and 30, 2026 against live primary sources, and again as a full weekly refresh on August 8, 2026 (nudged up at 3mo/6mo on a new RWA all-time high and two missed catalysts, committed and stamped by Alex). Held flat through the Aug 9-16 daily touches, all auto-stamped committed. Drafts written Aug 17, Aug 18, and Aug 20 were never delivered (no report/render/archive/commit followed for any of them), and an Aug 21 session began delivering the Aug 20 numbers into only two of six reports before stopping — also never finished or committed. **This version (August 22) does not take any of those abandoned drafts at face value — it independently re-verifies through a dedicated primary-source research pass and HOLDS FLAT at 52/60/66/74/85** — the rwa.xyz total-value print remains essentially unchanged (and Treasuries-specific value is confirmed distinct from the all-category total, this pillar's known mislabeling trap), the SEC's newly proposed "Regulation Crypto Assets" (Aug 18-19) is scoped to new-token capital formation rather than RWA tokenization and doesn't clear this pillar's bar, and the tokenized-stock innovation exemption this pillar is watching remains delayed/exploratory with no new dated progress. **This pillar's own evidence is clean and would have qualified for Alex's standing daily auto-stamp on its own** — but the **overall Aug 22 score set is left as a DRAFT, flagged for Alex's manual review**, because a dedicated adversarial fact-check this cycle found that the Iran War Risk pillar's report contained a materially false claim (a "first confirmed fatality" framing that was actually roughly the 18th such death) that the original research pass missed; see My Decision below. **A second, deeper session ran later the same day**. With that Aug 22 catch-up draft already delivered — rendered, archived, and git-committed — house rules require a new dated set rather than an in-place edit, so this full weekly refresh (the first since Aug 8) is scored as **2026-08-22_draft2**. Draft2 independently re-confirms the hold at 52/60/66/74/85 through fresh primary-source research, including a direct sec.gov check of a newly issued Franklin Templeton no-action letter (Aug 12) and a since-canceled (not merely delayed) SEC tokenized-equity "innovation exemption" meeting (Aug 13-15 reporting) — the two roughly offset and neither alone clears this pillar's bar. Draft2 was left as draft at delivery — this time because a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority, regardless of how clean the evidence is — **COMMITTED BY ALEX August 23, 2026** after independent review. **A daily catch-up draft dated August 28, 2026** (score set 2026-08-28_draft) was written — a direct rwa.xyz re-pull showing total distributed value \$38.69B (+3.04%/30d) and tokenized Treasuries \$16.00B (-0.93%/30d), both continuing trend — but it was never rendered, selfchecked, archived, or git-committed, and sits abandoned, superseded the same way this report has always treated interrupted prior sessions. **This version (August 29) does not take that abandoned draft at face value** — it runs a fresh, independent full-weekly primary-source pass and again HOLDS FLAT at 52/60/66/74/85, scored as **2026-08-29_draft**. The week's one genuine new development is **Coinbase's August 24 launch of tokenized-stock trading (NVDac/METAc/AAPLc/GOOGLc — Nvidia, Meta, Apple, Alphabet) on its own Base blockchain**, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026 — confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25, but eligible to **non-US users only**, the exact same structural limitation this report already established (the "Robinhood Chain precedent") as insufficient alone to move P. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25, whose stated use cases touch RWA settlement) is logged as tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check this window, and DTCC's October 2026 and Nasdaq's December 6, 2026 targets are both unchanged. **rwa.xyz's own site (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle** — a data-access gap flagged for next cycle — so this pass relies on the report's own most recent primary pull (the abandoned Aug 28 draft's rwa.xyz read), loosely corroborated by secondary citations, showing tokenized Treasuries

specifically posting a **second consecutive negative 30-day reading** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% and not independently reconfirmed this cycle, but the closest thing in this pillar to a trend worth watching. **This full weekly refresh was left as a DRAFT, not auto-stamped** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality. **THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft**, covering Aug 29-31: sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) are consistent with the Aug 28 direct pull already priced in — same trend, not a fresh dated catalyst; rwa.xyz itself was not independently re-pulled this cycle. **P HELD FLAT at 52/60/66/74/85**. This is a light daily touch, not a full weekly refresh, no window moved, and the master call band is unchanged — **AUTO-STAMPED** per delegated daily authority. **Sept 1: held flat again** — only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot), no fresh dated catalyst, no rail failure/depeg/counterparty default. Score set 2026-09-01_draft, AUTO-STAMPED, new last COMMITTED baseline. **Sept 2: held flat a further time** — no dated catalyst found Sept 1-2 (the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events). Score set 2026-09-02_draft — this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Tokenization's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report); **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the policy — this is the last TRUE committed baseline. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — no dated catalyst found Sept 3-5; DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participating institutions) remains unchanged background. This pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — a bug, flagged for Alex, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch (DTCC's October launch remains the operative unchanged catalyst; no new dated milestone found). **HELD FLAT again at 52/60/66/74/85. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants including BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, and Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found. **HELD FLAT at 52/60/66/74/85. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July 15 production-trade stress test; 50+ firm industry working group, no new dated milestone found. **HELD FLAT at 52/60/66/74/85. Sept 9: light daily catch-up, held flat again** — rwa.xyz aggregate reads circulating today (~\$39.2B total distributed value) are single-source press-summary figures without a direct rwa.xyz pull this cycle, read as organic continuation of the already-priced growth trend (no rail failure, depeg, or counterparty default found); DTCC's October full-service launch remains the operative catalyst, unchanged. **HELD FLAT at 52/60/66/74/85. Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 52/60/66/74/85 — independently re-checked, nothing cleared the sufficiency bar. No new dated rwa.xyz pull, no rail failure/depeg/counterparty event found. DTCC's October full-service launch remains the unchanged operative catalyst. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 11) is a light daily catch-up, score set 2026-09-11_draft**, covering Sept 10-11: re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found, and DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries) remains the unchanged operative catalyst. **P HELD FLAT at 52/60/66/74/85.** Iran War Risk and Fed & Macro are the pillars that moved this cycle (Iran down on its Brent flip-line clause firing, Fed up modestly on a core-CPI print a tenth cooler than consensus). Light daily touch, no window of this pillar moved — **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." Sept 12 light daily catch-up (2026-09-12_draft), this morning's cycle:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) read as continuation of the already-priced growth trend, not a new milestone; no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **P HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)," the new last TRUE committed baseline. Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version)** independently re-confirms the hold: rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced smooth growth curve, not a step-change or new

milestone; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B, a structural-breadth note. **DTCC's October 2026 full-service tokenization launch is reconfirmed on schedule, no delay** (primary: DTCC.com, corroborated by Forkast's "From Pilot to Plumbing," Tradeweb, and Crowdfund Insider — 2+ independents) — the July 15 live-production trades remain already priced in. Two freshly-dated items this week were found but are each effectively single-source (a press release syndicated across aggregator sites, not independently reported) and incremental, not step-changes: Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting Casper onto the ERC-3643/T-REX Ledger tokenization standard network — both logged as context, not used to move P per the sufficiency rule. No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions were found dated within the last two weeks. **P HELD FLAT at 52/60/66/74/85**. This is a **FULL WEEKLY refresh**, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW**, as score set **2026-09-12 draft2**. This morning's 2026-09-12 draft remains the last TRUE committed baseline. **Sept 13-16** light daily catch-ups each independently re-checked and held flat, all **AUTO-STAMPED**, Sept 16 the last TRUE committed baseline before this pillar moved. **Sept 17: held flat a further time** — the only dated news found was Aave's Sept 16 RWA-lending-hub announcement on Avalanche using Tether's USAT, a single-product continuation not clearing this pillar's own bar — **AUTO-STAMPED**, the new last TRUE committed baseline. **SEPT 18: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86 — the first move this pillar has made since Aug 8**. PRIMARY: the SEC issued its "Innovation Exemption" (sec.gov press release 2026-90, published Sept 17, 2026, plus a corroborating statement from Commissioner Uyeda, also on sec.gov), granting Tokenized Securities Venues temporary, conditional, 5-year exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market makers, subject to public-notice, transaction-transparency, stoppage-coordination, books-and-records, and technology-safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May). This is precisely the trigger this report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting, which explicitly said "a formally re-scheduled meeting or published framework would matter" — a published framework is now exactly what happened, and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain, Coinbase's Base launch — both non-US-only), it is a US federal regulator directly authorizing on-chain tokenized-stock trading domestically, the specific structural ceiling this pillar's Other Side section had repeatedly flagged. Sizing front-loaded (1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1) because the exemption is in effect now and immediately actionable, with diminishing effect further out since the 3yr window was already near its practical ceiling and the exemption itself is temporary/conditional and sunsets in 5 years pending further Commission action — an honest counterweight, not a permanent rule, and no venue has yet announced it is live under the exemption as of this research pass. Quant (fully computed, unchanged methodology): P 59/54/59/68/69, BTC \$78,046.80 (2026-09-18). Light daily touch, research capability fully available (WebSearch functioned normally; sec.gov and the Commissioner statement were both directly verifiable), verification passed clean — **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per the delegated daily auto-stamp authority, under which neither the size of the move nor a call-band flip withholds the stamp on their own. **Sept 19 FULL WEEKLY refresh held flat at 58/65/70/77/86** (left as draft, awaiting review — no venue live yet under the exemption, SIFMA/Better Markets pushback logged not scored). **Sept 22-23 light daily touches** each held flat and were AUTO-STAMPED. **Sept 26 FULL WEEKLY refresh cut one point on 1mo, 58/65/70/77/86 → 57/65/70/77/86**, on this pillar's own pre-committed trigger firing downward (tokenized US Treasuries \$14.94B, -6.95%/30d, a third consecutive negative reading), offset chiefly by the CFTC's Sept 24 FAQ update — **COMMITTED BY ALEX, September 27, 2026** (see the Infobox and What Changed sections above/below for full detail on each of these intervening cycles). **Oct 3, 2026 FULL WEEKLY refresh (score set 2026-10-03 draft), this version:** independently re-verified against the Sept 26/27 committed baseline through a genuinely broad research effort made via WebFetch AND WebSearch this cycle. Direct WebFetch to **rwa.xyz, sec.gov, cftc.gov, federalregister.gov, dtcc.com, and most crypto-news aggregators ALL returned EGRESS_BLOCKED** — a real, confirmed sandbox limitation, not a repeat assumption; WebSearch itself worked normally, so every finding this cycle comes from WebSearch result synthesis, labeled accordingly. The tokenized-Treasury 30-day-trend figure this pillar's own trigger table depends on remains genuinely inaccessible for a **second consecutive cycle** — disclosed as an ongoing data gap, not treated as a non-finding. The live Tokenized Securities Venue launch under the SEC's Sept 18 Innovation Exemption still has not fired, and structurally could not have yet: an on-record SEC Crypto Task Force official (Taylor Lindman, quoted via cryptotimes.io Sept 22) says operating notices are expected "in coming months" and venues "could begin to take shape as early as next quarter" (Q4 2026). 24X National Exchange has filed a tokenization proposal with the SEC (marketsmedia.com, thetradenews.com) — a filing, not a live venue. The "Nasdaq Dec 6, 2026" date is now **downgraded to likely-unreliable**, not merely unverifiable — multiple secondary sources (gfmag.com, letsdatascience.com) report Nasdaq's tokenized-equity platform is actually targeting H1/Q2 2027. GENIUS Act and DTCC's

October 2026 target are both reiterated by secondary outlets this cycle, not newly confirmed (dtcc.com itself was unreachable to verify execution). **HOLDS FLAT at 57/65/70/77/86** — nothing clears the sufficiency rule in either direction. **LEFT AS DRAFT, NOT auto-stamped** (a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority regardless of move size, here zero) — **AWAITING ALEX'S MANUAL REVIEW.**

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 19, 2026 · **Updated & Re-verified October 3, 2026** — **FULL WEEKLY refresh, score set 2026-10-03_draft: HELD FLAT at 57/65/70/77/86, independently re-verified via a broadened neither moving the score:** the tokenized-Treasury trend figure this pillar's own trigger table depends on remains genuinely inaccessible for a **second consecutive cycle** (direct WebFetch to rwa.xyz, s assumption — disclosed as an ongoing data gap, not a non-finding); and the "Nasdaq Dec 6, 2026" date is now downgraded to likely-unreliable, contradicted by other reporting pointing to H1/Q2 2027. r per the SEC's own stated timeline (an on-record SEC Crypto Task Force official says operating notices are expected "in coming months" and venues "as early as next quarter"; 24X National Exchange's **auto-stamped** — this is a full weekly refresh, categorically excluded from Alex's delegated daily auto-stamp authority regardless of move size (here, zero) — **AWAITING ALEX'S MANUAL REVIEW.** · **L verified September 26, 2026** — **FULL WEEKLY refresh, score set 2026-09-26_draft3: CUT one point on the 1mo window, 58/65/70/77/86 → 57/65/70/77/86. This pillar's OWN pre-committed trig at roughly seven times the prior magnitude, and the trigger table had said in advance that a third negative reading "would be a genuine trend worth re-rating on."** This REVERSES the aban **The other four windows HOLD, offset chiefly by the CFTC's Sept 24 FAQ update (primary, PDF extracted locally) letting FCMs and DCOs hold TOKENIZED Regulation 1.25 collateral. COMM the Sept 19 data gap.** · Prior: Updated & Re-verified September 18, 2026 (LIGHT DAILY touch, 2026-09-18_draft: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86, on the SEC's Sept 17 "Innovation Ex granting US-domestic tokenized-NMS-stock trading via permissioned AMMs, the first structural break of the non-US-only ceiling this pillar has repeatedly flagged; 7+ independent outlets) · Last TRUE co refresh, 2026-09-19_draft: **HELD FLAT at 58/65/70/77/86** — no Tokenized Securities Venue has announced going live yet under the Sept 17 SEC exemption, and its own 30-day issuer-notice-and-object publicly pushed back as expected institutional friction, no litigation filed; DTCC's October full-service launch remains on schedule, unconfirmed this week; on-chain tokenized-equity holder counts continu own impact. DATA GAP FLAGGED: this week's rwa.xyz reads were internally inconsistent and are NOT used — continuing to cite the last verified ~\$39.2B, Sept 8 figure. This is a FULL WEEKLY refresh DRAFT, AWAITING ALEX'S MANUAL REVIEW.) · Last TRUE committed: 58/65/70/77/86 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-verified September 22, 2026 (LIGHT DAILY touch, sc down instead (see that pillar's report). COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026. · Updated & Re-verified September 23, 2026 (LIGHT DAILY touch, score set 2026-09-23_draft): **HELD FL corroborated tone signal, not a rule or transaction; no GENIUS Act finalization, DTCC/Nasdaq timeline news, or depeg incident found. COMMITTED, AUTO-STAMPED SEPTEMBER 23, 2026.** · Last TR **September 24, 2026** (LIGHT DAILY touch, 2026-09-24_draft [**NEVER DELIVERED — no render, selfcheck, archive or commit followed; superseded by the September 26 weekly refresh above**]: Sept 23 for tokenized US stocks and ETFs on NYSE's planned digital ATS — the first named major-exchange response to the Sept 17 SEC Innovation Exemption, corroborated across 8+ independent o outstanding and no launch date was given.)

The Scores — Committed vs. Drafts

Oct 3 (2026-10-03_draft, this version): FULL WEEKLY refresh — HELD FLAT at 57/65/70/77/86, no change from the last committed set. A broadened research effort (WebFetch AND WebSearch) found the tokenized-Treas and dtcc.com all returned EGRESS_BLOCKED, a confirmed sandbox limitation — not a repeat assumption), the live-TSV-launch trigger structurally has not and could not yet have fired per the SEC's own stated Q4 2026 timeline (pointing to H1/Q2 2027). GENIUS Act and DTCC targets are reiterated, not newly confirmed. Nothing clears the sufficiency rule in either direction. **LEFT AS DRAFT, NOT AUTO-STAMPED** — a full weekly refresh is categorically excluded from auto-stamp authority. The 9/23 column is the last COMMITTED baseline (COMMITTED BY ALEX, September 27, 2026). **Sept 26 (2026-09-26_draft3): FULL WEEKLY refresh, CUT one point on 1mo, 58/65/70/77/86 — 57/65/70/77/86** — stamp authority). The 9/23 column is the last COMMITTED baseline for that cycle. An intervening Sept 24 draft proposed 59/66 on the two near windows but was never delivered, so per this report's own convention for abandoned drafts (same window. It remains in config/scores.json permanently. Historical notes follow. June P's committed by me June 19, 2026 (last committed Jun 12 cycle). Aug 8 (nudged up at 3mo/6mo, full weekly refresh) committed by me and an Aug 21 session delivered partial numbers into only two of six reports before stopping — none of those three sessions was ever delivered (report/render/archive/commit), so, consistent with this report's own convention, **manual review** — not on this pillar's own evidence, but because an adversarial fact-check of the Iran War Risk pillar that cycle caught a materially false claim. A later same-day full weekly refresh, **2026-08-22_draft2** (independent re-researched tokenized-equity exemption meeting) and was left as draft at delivery — that time because full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority — **COMMITTED BY ALEX August 22, 2026** and is dropped from the visible lineage below (see What Changed for the audit trail). Aug 29 (full weekly refresh) and Aug 31/Sept 1 (light daily catch-ups) all independently re-verify and hold flat; Sept 1 (52/60/66/74/85) is the last committed set. War Risk's re-rate (bundled in the same set) flipped the master call band; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy — now the last TRUE COMMITTED baseline. **catch-up (2026-09-05_draft)** holds flat again; that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 5 FULL WEEKLY refresh** to manual review and is **COMMITTED BY ALEX September 5, 2026**. **Sept 6 and Sept 8 light daily catch-ups (2026-09-06_draft, 2026-09-08_draft)** each independently re-checked and held flat — DTCC's October launch (2026-09-18) is **version)** holds flat a further time — rwa.xyz reads circulating today are single-source press summaries, read as organic continuation, not a fresh catalyst — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. DTCC's October full-service launch remains the unchanged operative catalyst — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 11 (2026-09-11_draft)** holds flat again on the same re-check and held flat a further time, nothing new found — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version)** independently re-confirms the status quo as context only — categorically excluded from auto-stamp authority (full weekly), so it goes to manual review, **left as DRAFT**. Committed by Alex; **Sept 13-16** light daily catch-ups each independently re-checked and held flat — **Sept 17 (2026-09-17_draft)** holds flat a further time — the only dated news found was Aave's Sept 16 RWA-lending-hub announcement on Avalanche, a single-product continuation not clearing this pillar's own bar — **AUTO-STAMPED per delegated daily authority** — **58/65/70/77/86** — the SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary, corroborated by 7+ independent outlets) authorizes US-domestic tokenized-NMS-stock trading via permissioned AMMs, a structural break of the "non-US-only" ceiling this pillar's Other Side section had repeatedly flagged. Sizing front-loaded (1mo +6 to 3yr +1) since the exemption is in effect now but is itself temporary/conditional, sunsetting in 5 years, the re-rate for this pillar since Aug 8. **Sept 19 (2026-09-19_draft, this version): FULL WEEKLY refresh, HELD FLAT at 58/65/70/77/86**. A dedicated primary-source pass (11 WebSearch queries) found no Tokenized Securities V1 party-tokenized NMS stock, a reason for near-term caution already baked into 1mo, not a reason to cut it further; SIFMA and Better Markets publicly pushed back (expected institutional friction, no litigation filed); DTCC's October 2026 MoM) but that's continuation of an existing trend, not fresh confirmation of the exemption's uptake. This week's rwa.xyz total-value reads came back internally inconsistent and were **not used** — the last independently verified — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW**, full weekly refreshes being categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality or move size. 2026-09-18_draft remains in the lineage. **researched this cycle (Fed & Macro is the pillar that moved — see that report). Light daily touch — COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026**, the new last TRUE committed baseline.

Prior committed P (2026-09-26_draft3, FULL WEEKLY refresh, COMMITTED BY ALEX, September 27, 2026): 57 / 65 / 70 / 77 / 86 · **Current P (2026-10-03_draft, FULL WEEKLY refresh, HELD FLAT, LEFT AS DRAFT):** 57 / 65 / 70 / 77 / 86 — the one figure this pillar's own trigger table depends on — the tokenized-Treasury 30-day trend — is genuinely inaccessible for a **second consecutive cycle** (rwa.xyz, sec.gov, cftc.gov, federalregister.gov and dtcc.com all returned EGRESS_BLOCKED, a confirmed sandbox limitation — not a repeat assumption), the live-TSV-launch trigger structurally has not, and could not yet have, fired — an SEC Crypto Task Force official (Taylor Lindman, via cryptotimes.io, Sept 22) says operating notices are expected “in coming months” and venues “could begin to take shape as the market matures.” DTCC's October target are reiterated this cycle, not newly confirmed. The “Nasdaq Dec 6, 2026” date is downgraded from flagged-unverifiable to **likely-unreliable** (gfmag.com, letsdatascience.com both point to H1/Q2 2027).

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. RE-RATED UP this cycle, 52/60/66/74/85 → 58/65/70/77/86, on the SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90) — so the odds are **not** **cycle** — could not independently re-pull live figures. Relying on the report's own most recent primary pull (Aug 28, from the abandoned daily-catch-up draft): total RWA distributed value \$38.6B, tracked all cycle. Loosely corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug 19-25; another source citing \$38.39B as of Aug 21) — consistent with trend, no discounting. **reading on tokenized Treasuries specifically** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% in absolute magnitude and not independently reconfirmed this cycle, so it does not move P much, mattering. Leaders as last confirmed: USYC ~\$3.0B, BUIDL ~\$2.6-2.68B, Ondo USDY ~\$2.14-2.2B, Franklin iBENJI ~\$1.7-1.72B. No new RWA-rail failure, depeg, or counterparty default was observed. Arrakis V1/G-UNI Uniswap V3 spot-manipulation drain (Aug 23) — but both are ordinary DeFi protocols, not tokenized-RWA/Treasury rails, and are not applicable to this pillar's risk watch.

★ **NEW — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026, primary):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own statement that the "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market makers and liquidity pools, for the purpose of "safeguarding conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfunder, etc.) and 15 cancellation of the SEC's prior tokenized-equity exemption meeting ("a formally re-scheduled meeting or published framework would matter") — and unlike every prior tokenized-equity law, the regulator directly authorizing on-chain tokenized-stock trading domestically, the exact structural ceiling this pillar's Other Side section has repeatedly flagged as the limiting factor. Honest court challenge on public comment on further steps, not a permanent rule; no venue has yet announced it is live under the exemption as of this research pass; the order is one day old and un-stress-tested.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value shared by every pillar in the equal-weight model. If tokenization compounds, it pulls trillions of TradFi assets onto rails crypto controls.

★ **NEW — Coinbase launches tokenized-stock trading on Base (Aug 24, primary + 9 outlets):** Coinbase launched tokenized-stock trading — NVDac, METac, AAPLc, GOOGLc (Nvidia, Meta, Apple, etc.) on Base, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026. Confirmed on Coinbase's own blog ("Coinbase establishes Base as a new venue for tokenized securities trading, dated Aug 24-25. Eligible to **non-US users only** — structurally identical to the Robinhood Chain precedent this report already established as insufficient alone to move P (EU/EEA-only tokenized securities). real, multi-sourced, does not clear the sufficiency bar alone.

Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25): Standard Chartered's Anchorpoint Financial (backed by Standard Chartered, HKT, Animoca) began institutional tokenized real-world assets. This is a stablecoin launch, not an RWA-tokenization event itself — logged as context, not adopted as a trigger.

For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026: multiple press-release-syndication outlets report this milestone. It predates the Aug 22-29 research window and evidence this cycle — using it now would double-count an old fact as if timely.

SEC and DTCC/Nasdaq, unchanged this cycle: no new SEC rulemaking, no-action letter, or press release dated Aug 22-29 was found on a direct sec.gov check; the tokenized-equity "income" unchanged, no delay reported. Nasdaq's Dec 6, 2026 target is unchanged.

Carried forward, still load-bearing — Franklin Templeton SEC no-action letter (Aug 12, primary, confirmed direct on sec.gov): the SEC's Division of Investment Management issued a letter to allow use its own investor-services affiliate, Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain U.S. Government Money Fund (BENJI, on SIFMA). Confirmed by 7+ independent outlets (The Block, Tech Times, ETHNews, coinpaprika, BigGo Finance, UEX, KuCoin), all dated Aug 12-13. Separately, Bloomberg (Aug 20) reports a plan to launch institutional-plumbing positive, already reflected in the committed baseline.

Aug 3 catalyst (carried forward, committed): BlackRock launched two new tokenized money-market funds — BSTBL (BlackRock Select Treasury-Based Liquidity Fund) and BRSRV (BlackRock Short-Term Reserves), and repo agreements; BRSRV is purpose-built as a reserve asset for stablecoin issuers, targeting GENIUS Act eligibility. Securitize is transfer agent and tokenization provider for both.

GENIUS Act status, unchanged this cycle: Treasury's Section 3 NPRM (Federal Register, Aug 18, comment deadline Oct 19) and the joint FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Requirements rule found Aug 22-29. No final rule expected until 2027. An unchanged, already-priced mild headwind against the Jan 18, 2027 statutory effective date — holds 12mo/36mo flat.

The Claim

The thesis, and where I differ from the consensus — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; HELD FLAT — no venue live yet under the Sept 17 exemption, SIFMA/Better Markets pushed back)

The crowd: is treating Coinbase's Aug 24 tokenized-stock launch on Base as the moment tokenized equities go mainstream. It's a real, well-documented development — 9+ independent outlets report already priced in as insufficient alone. Treating a geography-restricted product launch as the catalyst risks exactly the kind of overreach this report has repeatedly had to correct. Today's SIFMA/Better Markets pushback is evidence of this.

Me: RE-RATING UP, 52/60/66/74/85 → 58/65/70/77/86. The SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary, plus Commissioner Uyeda's statement, corroborated by NMS stock via permissioned AMMs — for the first time, this is US-domestic access, not another geography-restricted launch. It's exactly the trigger this report's own trigger table has been watching for. The exemption is in effect now and immediately actionable, but I'm deliberately not treating it as a permanent regime change: it's temporary, conditional, sunsets in five years pending further Commission action. Being the biggest structural development this pillar has logged all cycle — the honest read is "the ceiling cracked," not "the ceiling is gone."

The Aug 29 full weekly dive (still the last full re-dig): a dedicated primary-source pass found one genuine, multi-sourced development that week (Coinbase's Base tokenized-stock launch) that was not new, no new SEC rulemaking dated Aug 22-29, and unchanged DTCC/Nasdaq timelines. An Aug 28 daily catch-up draft was written but never delivered and was not taken at face value. 52/60/66/74/85.

My edge: this pillar's discipline is to notice when institutions actually ship product accessible to the broad market this pillar scores, not just when they announce intent or ship into a single excluded secondary sources dressed up as primary ones. Today, for the first time, that discipline cuts the other way: the SEC's Innovation Exemption is exactly the "actually ships to the broad, US market" trigger. Actionable. 12mo/36mo move least, not because the GENIUS Act headwind changed, but because the exemption itself is temporary/conditional and those horizons were already close to this pillar's horizon.

The Sept 19 full weekly dive (the first full re-dig since the Sept 18 re-rate): same discipline, applied against the new baseline — a dedicated primary-source pass (11 WebSearch queries) found no "live" is unlikely before mid-October in most cases — exactly the kind of "announced intent, not shipped product" gap this pillar refuses to score early. SIFMA and Better Markets pushing back puts the figure is a real number but a continuation of an existing growth curve, not confirmation the exemption itself is working — the same distinction this pillar draws between announcements and shipped product. If inconsistent, the discipline is the same as ever: flag the gap, don't quietly substitute a number that can't be verified. Nothing here clears the bar to move P in either direction — **HELD FLAT at 58/65/70/77/86**.

The Facts

As of September 19, 2026, independently re-verified through a dedicated FULL WEEKLY primary-source research pass (11 WebSearch queries) — hard numbers with exact dates, sources on the last page. Covers the Sept 17 exemption, SIFMA/Better Markets pushback, and excluded from the delegated daily auto-stamp policy, regardless of evidence quality).

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 26–OCTOBER 3, 2026

★ DATA GAP, now a SECOND CONSECUTIVE CYCLE — the tokenized-Treasury 30-day trend could not be re-read. A genuinely broad, independent research effort was made this cycle (11 WebSearch queries) and **most crypto-news aggregators ALL returned EGRESS_BLOCKED** — a real, confirmed sandbox limitation, not a repeat assumption. WebSearch itself worked normally, so every finding below is dated after roughly July 22–August 6, 2026 — meaning the Sept 26 trigger reading (\$14.94B, −6.95%/30d) can neither be confirmed nor extended this cycle. This is reported as an **ongoing**, not "likely," event. "Flagged for a priority direct rwa.xyz re-pull next cycle if sandbox network access allows."

The live Tokenized Securities Venue launch under the SEC's Sept 18 Innovation Exemption still has NOT fired. An on-record SEC Crypto Task Force official, **Taylor Lindman**, quoted as "likely as early as next quarter" (Q4 2026) — consistent with, not earlier than, the already-known mid-October issuer-notice floor. **24X National Exchange has filed a tokenization proposal with the SEC** and is not presented here as the trigger firing. NYSE/Blockchain.com remains at the MOU/exploration stage, unchanged since Sept 23. **Two unrelated things surfaced in search that are NOT the new SEC exemption** and Robinhood's 24/7 tokenized stocks (a different, non-US-TSV regime).

CFTC's Q12 (tokenized Reg 1.25 collateral): no live-usage event found this cycle — still just the guidance itself (the Sept 24 FAQ); no registrant has announced using it.

DTCC's claimed October 2026 full-service tokenization launch: multiple secondary outlets reiterate the target (building on DTCC's own confirmed July 15, 2026 pilot-trade press release), but no execution versus a still-forward-looking repeated target. Treated as "target reiterated, not confirmed executed" — not upgraded to a confirmed launch.

★ The "Nasdaq Dec 6, 2026" date, downgraded: a prior cycle flagged this date as unverifiable; this cycle finds it is actually **CONTRADICTED**, not just unverified — multiple secondary sources dated after Dec 2026. Downgraded from "flagged, could not re-verify" to "likely unreliable/superseded" — a correction in tone, not a score move.

GENIUS Act stablecoin rules: still zero of six finalized. Treasury's own Section 3 gatekeeping-rules NPRM (published Aug 18) has a comment period running to **October 19, 2026** — still missing. **repeated across many outlets** (pymnts, theblock, cointelegraph, decrypt, icba, lcx) — treated as ONE fact multiply reported, not independent corroboration of a NEW development; it just repeats.

No RWA-rail failure, depeg, redemption run, or counterparty default found this window (the one depeg precedent that surfaced in search, USDR/TangibleDAO, is a stale 2023 event, not dated Dec 11, 2026) — SEC/CFTC are fully staffed, so this week's lack of fresh regulatory news is not a staffing/shutdown artifact.

Net assessment: nothing here clears the sufficiency rule on any window. The one potentially trigger-relevant figure (tokenized-Treasury trend) is genuinely inaccessible for a second cycle. Reiterated/already-priced target or an explicit non-event. **HOLD FLAT at 57/65/70/77/86.**

- ★ ★ DATA GAP, logged not scored: a direct tokenized-Treasury 30-day-trend re-read could not be obtained this cycle either from rwa.xyz directly or from any dated secondary citation — this cycle's evidence is insufficient.
- ★ ★ SEC Crypto Task Force official Taylor Lindman (cryptotimes.io, Sept 22): operating notices for live Tokenized Securities Venues are expected "in coming months," and venues "could be live by mid-2026" — notice floor, not a new earlier date.
- 24X National Exchange has filed a tokenization proposal with the SEC (marketsmedia.com, thetradenews.com) — a filing/proposal, not a live venue or a confirmed exemption notice. No action.
- ★ ★ The "Nasdaq Dec 6, 2026" date is downgraded from flagged-unverifiable to likely-unreliable/superseded — multiple secondary sources (gfmag.com, letsdatascience.com) point to it.
- CFTC's Q12 tokenized Reg 1.25 collateral permission: no live-usage event found — still just the guidance itself, no registrant has announced using it.
- DTCC's October 2026 full-service launch: target reiterated by secondary outlets, none dated after Sept 26; dtcc.com itself unreachable (WebFetch blocked) to confirm execution — not upgraded.
- GENIUS Act: still zero of six finalized. Treasury's Section 3 NPRM comment period runs to Oct 19, 2026. OCC's "final rule by November" is the same Aug 2026 statement recirculating across outlets.
- No RWA-rail failure, depeg, redemption run, or counterparty default found. No government shutdown in effect (CR signed Sept 3 funds government through Dec 11, 2026) — SEC/CFTC are fully staffed.
- Research capability: a genuinely broad effort was made via both WebFetch and WebSearch this cycle. Direct WebFetch to rwa.xyz, sec.gov, cftc.gov, federalregister.gov, dtcc.com, and most findings above are WebSearch-synthesis, labeled accordingly.

- ★ **Score decision: HOLD FLAT at 57/65/70/77/86.** Nothing this cycle clears the sufficiency bar in either direction. **This is a FULL WEEKLY refresh — LEFT AS DRAFT, NOT AUTO-STAMPED**

Carried forward from the September 26, 2026 FULL WEEKLY refresh (independently reconfirmed that cycle via its own fired trigger; still relevant background):

★ NEW THAT CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ **THE FIRED TRIGGER, and the reason this pillar is cut rather than raised — rwa.xyz direct pull, Sept 26, 2026.** Three subpages were fetched directly this cycle, which resolves the **DOWN 6.95% over 30 days** across 25 assets, from \$16.00B at the Aug 28 pull. **This report's own trigger table pre-committed, in its own words, that "a third consecutive negative real"** (Sept 26), at roughly *seven times* the prior magnitude. Acting on a trigger the report itself wrote down in advance is the entire point of writing it down. **Sourcing honesty on the magnitude:** rwa.xyz *the -6.95% specifically*, so the magnitude is labelled single-aggregator. It is corroborated in *direction and rough level* by a Sept 15 secondary citation of rwa.xyz/Castle Labs data putting tokenized RWA at a real contraction. **The cause is unknown and is reported as a number, not a narrative:** genuine redemptions, quarter-end effects and a possible rwa.xyz reclassification could not be distinguished. \$358.13B (~4.86%), stablecoins \$306.39B (+1.12%), total RWA holders **4.83M (+60.72%)**, and tokenized stocks **\$3.14B (+13.29%)** across **3.99M holders** — the last of which supersedes this pillar's different methodology and is **not blended** with the rwa.xyz figure.

★ **FIRST OFFSET — PRIMARY: the CFTC opens the door to tokenized customer collateral, Sept 24, 2026.** The Crypto Asset / Blockchain FAQ update, marked "NEW 9/24/2026," was drafted by **Oversight, and Clearing and Risk** (an earlier pass named only two; corrected). New **Q12** asks "May an FCM or DCO invest customer funds in tokenized forms of otherwise permitted investments?" and the tokenized form grants rights "the same or functionally equivalent"; all 1.25 liquidity, concentration and time-to-maturity terms are met; and the assets sit with an acceptable depository. **Why?** "The tokenized form grants rights 'the same or functionally equivalent'; all 1.25 liquidity, concentration and time-to-maturity terms are met; and the assets sit with an acceptable depository. **Why?** and money-market product whose flow just contracted. New **Q13** and **Q14** call Regulations 1.31 and 45.2 "technology neutral" verbatim, and **Q15** states the Divisions "would not object solely to the use of a 'permissionless blockchain network' subject to retrieval controls — which speaks directly to this pillar's own flip line that adoption never touching public rails is TradFi, not crypto. **Held rather than raised** it. Logged as the leading candidate to move next cycle if a second confirming action appears — an FCM actually holding tokenized 1.25 collateral, or a venue going live.

★ **SECOND OFFSET — the NYSE Group / Blockchain.com MOU, Sept 23, 2026, 9:00am ET. Real, and explicitly NOT the live-venue trigger.** A non-binding memorandum of understanding between the digital ATS, "subject to any required regulatory approvals," plus bidirectional market-data distribution via ICE Data Services to Blockchain.com's 44M+ confirmed accounts. On-record quotes from outlets. **What it is not:** the ATS is *not live*, no launch date and no financial terms were disclosed, and required approvals are outstanding — the ATS has needed regulatory approval since it was returned 404), so the only primary artifact is **Blockchain.com's own PR Newswire release (302887041)** — company-issued PR from the counterparty side, jointly worded. One outlet headlined it **"actual live venue announcement" as the trigger, and an MOU is not that** — which is precisely why taking +1 for it while ignoring the fired Treasury trigger, as the abandoned Sept 24 draft.

The live-venue trigger DID NOT FIRE. No Tokenized Securities Venue is live, or announced as live, as of Sept 26. The exemption's own mechanic still gates it: a prospective venue must put up the earliest third-party-tokenized NMS trade around **mid-October**. Analysts name Coinbase, Securitize and Circle as likely first filers "as early as Q4 2026" — a forecast, not a fact, and not a trigger.

Logged, not scored — the SEC exemption's Federal Register publication, Sept 22, 2026. Verified via the federalregister.gov API: citation **91 FR 60168, Release No. 34-106402, File No. 2026-09-18**. Certain Distributed Ledger Trading Venues for Tokenized NMS Stocks ... **and Request for Comment** — "Innovation Exemption" is informal shorthand, and the relief is **temporary and conditional** of the Sept 17 order already scored: it adds a citation, not information.

Logged, not scored — Ondo's BlackRock-strategy portfolios went live Sept 24, but are non-US only. Three portfolio tokens (BLKHlon, BLKDIgon, BLKGRWon) built on BlackRock-developed "States." The BVI entity and the US-person exclusion were both confirmed independently at Ondo's own documentation, which bars "persons who are 'U.S. persons' or acting for the account of a U.S. person." **Pillar has twice ruled insufficient**, so it gets the same treatment for consistency. Citi's \$5.5tn-by-2030 figure circulating in the same coverage is a third-party *forecast* and is not used.

No RWA-rail failure, depeg or counterparty default was found dated Sept 19–26, on a dedicated search. **The honest bear datapoint in this pillar is idle capital and redemption pressure.** The tokenized-Treasury sector fell about 12% from its mid-July peak, and DeFiLlama shows BUIDL, BENJI and USYC all under 1% utilisation. The widely-circulated "89% of tokenized RWAs remain in circulation" circulating this month about a \$140M property-platform liquidation and a credit-protocol shutdown consists of **undated 2026 retrospectives, not events in this window**, and is deliberately not a trigger.

Unchanged, and re-verified as unchanged: the GENIUS Act still has **zero of six** agencies finalized, with the statutory backstop the earlier of Jan 18, 2027 or 120 days after final rules. **SIFMA STALE ROW IS FLAGGED RATHER THAN REQUESTED:** this report's "Nasdaq Dec 6, 2026" tokenized-trading date *could not be re-verified from any source* this pass, and may be a conflation. **DTCC's October full-service launch remains slated but rests on secondary reporting only** this cycle, so it is carried as unchanged *and unconfirmed*.

- ★ ★ **No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17, 2026 "Innovation Exemption."** A structural detail worth logging: for any NMS stock tokenized under the exemption, the issuer can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18). Since the exemption is mostly outside a 1-month window from today. This is a reason for near-term caution baked into keeping 1mo modest (58), not a reason to cut it further.
- ★ **SIFMA issued a public statement (sifma.org, primary, Sept 2026)** raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets also filed a comment. Litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- ★ **DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026** per DTCC's own May/July 2026 press materials, corroborated by CBO's working assumption, not a positive surprise; doesn't move P.
- ★ **On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month)** per AMBCrypto and CoinGabbbar (both Sept 2026, likely drawing on the same underlying data). Momentum but is a continuation of a pre-existing growth trend, not specific new evidence about the Sept 17 exemption's real-world uptake — doesn't independently justify a further move.
- ★ ★ **DATA GAP, flagged not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date). An independently verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number; the discrepancy is flagged explicitly rather than silently updated.
- ★ **No corrections needed** to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up below — still true, now still true two days later. No new market-price/odds.
- ★ **Research capability:** full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attempt. Limitation, flagged honestly, not a capability failure.
- ★ **Score decision: HELD FLAT at 58/65/70/77/86.** Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. **LEFT AS DRAFT, AWAITING AUTHORITY** regardless of evidence quality or move size (here, zero).

Carried forward from September 18, 2026 (LIGHT DAILY touch, RE-RATED UP; still relevant background):

As of September 18, 2026, LIGHT DAILY touch, score set **2026-09-18 draft**. COMMITTED, AUTO-STAMPED — hard numbers with exact dates, sources on the last page. Covers the Sept 17-18 gap; this pillar RE-RATED UP.

- ★ ★ **NEW, PRIMARY — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own definition of "exchange" — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market makers and liquidity providers under safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting — and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain EU/EEA-only, Coinbase's "Other Side" section has repeatedly flagged).
- ★ **Honest counterweights, same day:** "temporary" and "conditional" — this is relief under existing exemptive authority while the Commission takes public comment on further steps, not a permissionless un-stress-tested.
- ★ **Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.** Sizing front-loaded: 1mo +6 (58) — in effect now, immediately actionable; 3mo +5 (65); 6mo +4 (70); 1yr +3 (77) — some of which the exemption itself sunsets in 5 years. **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per delegated daily authority.

Carried forward from September 12, 2026 FULL WEEKLY refresh (independently re-confirmed through Sept 17, still relevant background):

- ★ ★ **rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026** (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B — a structural-breadth note.
- ★ ★ **DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed ON SCHEDULE, no delay** (primary: DTCC.com, corroborated by Forkast's catalyst; the July 15 live-production trades are already priced in).
- ★ **Two freshly-dated items this week, each effectively single-source** (a press release syndicated across many aggregator sites, not independently reported) — incremental infrastructure news: (a) BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; (b) Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting Casper onto the Ethereum network.

- **No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions found dated within the last two weeks.**
- **Score decision: P HELD FLAT at 52/60/66/74/85.** Nothing this cycle is both newly dated within the lookback window and clears the primary-source-or-2+-independent-outlets bar for a mature single-source-equivalent. **LEFT AS DRAFT** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality.

Carried forward from August 29, 2026 (independently reconfirmed that cycle, still relevant):

- ★ ★ **NEW, primary + 9 outlets — Coinbase launches tokenized-stock trading on Base (Aug 24):** NVDac, METAc, AAPLc, GOOGLc (Nvidia, Meta, Apple, Alphabet), each backed 1:1 by a 2026. Confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25. Eligible to non-US users only — the same structural limitation as the Robinhood Chain p
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed Anchorpoint Financial began institutional distribution of HKDAP, a Hong Kong-dollar tokenization event — logged as context only.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29** found on a direct sec.gov check; the tokenized-equity "innovation exemption" meeting remains canceled with
- **DTCC's October 2026 full-launch target and Nasdaq's Dec 6, 2026 target are both unchanged** — no delay reported this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found.** Two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$8.5M, A tokenized-RWA/Treasury rails, and are not applicable to this pillar's risk watch.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** (multiple press-release-syndication outlets) — this predates the Aug 22-29 window and appears to have been m
- ★ ★ **Data-quality flag — rwa.xyz direct access blocked this cycle (Aug 29):** app.rwa.xyz returned HTTP 403 on repeated attempts; could not independently re-pull live figures. Relying on t (+3.04%/30d); tokenized Treasuries \$16.00B (-0.93%/30d). Loosely corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug 19-25; another source citing \$38.39B as of
- ★ ★ **NEW — second consecutive negative 30-day reading on tokenized Treasuries:** Aug 22 read -0.39%, Aug 28 read -0.93% — both sub-1% in absolute magnitude, and this cycle's figur cycle — it's the one thing in this pillar closest to actually mattering.
- **BTC (pipeline reference) closed at \$77,666.16 on Aug 29** — up modestly from \$77,266.84 on Aug 22 (Bitstamp).

Carried forward from Aug 22 (independently reconfirmed that cycle, still relevant):

- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** total RWA distributed value \$38.32B, +2.30% vs. 30 days ago — essentially flat versus the Aug 16 baseline (\$38.17-38.24B); normal drift, no c
- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** tokenized US Treasuries \$15.98B, -0.39% vs. 30 days ago, across 87 products — the first slightly-negative 30-day reading this pillar had track
- ★ **Primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** the SEC's Division of Investment Management issued a no-action letter dated 2026-08-12 (sec.g custodian holding private keys for the tokenized Franklin OnChain U.S. Government Money Fund (BENJI, on Stellar), carved out of Rule 17f-2's physical-certificate requirement. Confirmed b Separately, Bloomberg (Aug 20) reports a plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, integration possibly starting Q4 2026.
- ★ **SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** a planned SEC meeting on the exemption, expected around Aug 14, was canceled/p delay to White House concerns and SIFMA opposition, plus a stated desire not to unsettle tokenization-adjacent provisions being negotiated in the CLARITY Act; the causal reasons remain r
- **GENIUS Act rulemaking proceeded on its pre-set procedural schedule:** Treasury's Section 3 NPRM was published in the Federal Register Aug 18 (comment deadline Oct 19), and the jo schedule Aug 21, 2026 — process, not news; no rule has been finalized. Too soon to score.
- ★ **Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock trading volume on Robinhood Chain crossed \$1B cumulative as of Aug 21 (multi-source: crypto.news, cryptoc

Carried forward from Aug 17 (independently reconfirmed, still relevant):

- **Multi-sourced (The Block, crypto.news, Benzinga, Blockzeit) — Aug 17:** SEC Chair Atkins met with President Trump, CFTC Chair Selig, NYSE, CME, DTCC, and crypto firms; the SEC r Committee. Per crypto.news, the discussed 24/7 tokenized-stock "innovation exemption" remained explicitly exploratory — "no final framework, eligibility criteria, or implementation date has l (i.e., before this Aug 17 multi-agency meeting), was itself reported canceled/postponed (Aug 13-15 reporting) — see the finding above; the broader Aug 17 meeting proceeded, but the dedica

Carried forward from Aug 16 (still load-bearing):

- **No new dated RWA/tokenization catalyst was found as of Aug 16.** General web search had surfaced only recirculating market-size commentary — a \$33.5B "liquid on-chain value" figure, number already in this report; not adopted as a replacement metric.

Carried forward from Aug 9-14 (still load-bearing):

- **rwa.xyz's Aug 9 pull, reconfirmed Aug 14 with added product-level detail:** tokenized Treasuries \$16.21B across 87 products and 63,010 unique addresses; Circle's USYC leads at \$3.00 this report, not a new catalyst.
- **rwa.xyz's \$38.17B total distributed-value print, dated Sunday Aug 9 (Bitcoin News, CoinSpectator), is the same all-time-high move already folded into prior sets' language** — still

Carried forward from Aug 8-9 (still load-bearing):

- ★ **Total RWA distributed value hit a new all-time high of \$38.24B** (rwa.xyz direct pull, Aug 8), up from \$34.67B roughly two and a half weeks earlier — a genuine +10% move, not stagnation 3.29%).
- ★ ★ **CORRECTION, again — the \$34.67B figure was never "tokenized Treasuries."** KuCoin's "Tokenized Treasuries Dip to \$34.67 Billion" headline (~Jul 22) mislabels the total-RWA distrib Treasuries number anywhere in this system.
- ★ ★ **NEW — the Central Bank of Ireland cleared Aviva Investors' tokenized USD Liquidity Fund on the XRP Ledger (Jul 29),** the first time a major EU regulator has approved a public-bl outlets, missed entirely by the daily "no new catalyst" checks.
- ★ ★ **NEW — Ripple took equity stakes in Zilo and Licuido (Aug 3),** converting a commercial relationship into ownership and adding regulated transfer-agency, issuance, and collateral-mob
- **rwa.xyz also separately reports a "Represented Asset Value" of \$373.55B** (down 1.70% over 30 days) — a different metric (off-chain assets referenced via tokenization infrastructure, no
- **No new RWA-rail failure, depeg, or counterparty default found** in the Jul 30 - Aug 8 window.

Carried forward from Aug 6-7 (still load-bearing):

- **GENIUS Act rulemaking status:** FDIC's BSA/AML comment period closed Aug 4; a joint five-agency CIP comment period runs through Aug 21; no agency has published a final rule. Realist priced, mild headwind.

Carried forward from Aug 6 (still load-bearing):

- ★ **BlackRock launched two tokenized money-market funds on Aug 3, 2026.** BSTBL and BRSRV, following an SEC prospectus filing Aug 1, via Securitize (same transfer agent as BUIDL), t Solana Compass, and CoinPaprika (7 independent outlets).

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **CORRECTION — the "\$34.67B tokenized Treasuries pulling back" headline circulating this week (and cited in the Jul 29/30 daily touches) is a metric mislabel, again.** That figur conflation an earlier full refresh already corrected once. Multiple outlets (including one whose own body text contradicts its headline, admitting "tokenized U.S. treasuries lead at \$15.86 billion versus \$16.20B a week ago — not declining.
- ★ **NEW, direct pull — BlackRock's BUIDL continues recovering, not declining.** BUIDL sits at **\$2.64B** (Jul 30), up from \$2.52B (Jul 22 wobble low) and \$2.61B (Jul 25) — a steady +4.8% re
- ★ **NEW, confirmed 4+ outlets — Robinhood Chain's on-chain RWA activity jumped roughly 5x to ~\$70M (Jul 25).** Tokenized-stock trading grew in size, with tokenized SpaceX overtaking Insider). TVL roughly tripled to ~\$312M, though stablecoins/memecoins still dominate overall activity. Separately, a Jul 29 report cites \$885.5M in Robinhood Chain's *cumulative transfer volum*
- ★ **NEW — Securitize Capital (BlackRock BUIDL's transfer-agent/tokenization partner) registered with the SEC as an investment adviser (Jul 27),** and Citi initiated a Buy rating on Secur

Illustrative only — not price targets, not advice

The cleanest single-token anchor is still **ONDO**, the name most tied to the RWA narrative: from its early-trading price around **\$0.22 (Jan 2024** — listing prints vary by venue) it ran to a **\$2.14** The round-trip, last checked July 13 (CoinGecko, not re-pulled live this cycle): **\$0.3291** — market cap ~\$1.6B, still ~85% below the high — even as the company keeps extending its franchise spike was a Trump-linked World Liberty Financial buy, not fundamentals. The durable signal stays structural, not one token: total RWA distributed value sits near its all-time high (rwa.xyz aggregate milestone; six asset categories now each exceed \$1B) and tokenized Treasuries last confirmed near \$16.00B (-0.93%/30d, a second consecutive slightly-negative reading as of Aug 28, still six moves stacked through this cycle — BlackRock's Aug 3 fund launch, Franklin Templeton's Aug 12 no-action letter, Coinbase's Aug 24 tokenized-stock launch on Base (non-US only), DTCC's US-domestic tokenized-stock trading for the first time — are exactly the kind of adoption proof points that outlast any single token's price, even where each individually (until today) fell short or 18 — noted here only as context for the market backdrop, not as investment guidance. The Prize doesn't feed the math — it tells you what the lean is worth acting on, euphoria and round-trip

The strongest honest case this is wrong — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; still valid, plus one new item below on the exemption's own timing mechanic)

- ★ **Partly answered today, worth stating plainly:** the "non-US-only ceiling" critique this section has raised three separate times (BlackRock funds, Robinhood Chain, Coinbase's SIFMA's temporary (5 years), conditional (public-notice/transparency/safeguard conditions, sunsets pending further Commission action), and as of this research pass no venue has actually announced cracked, not that it disappeared; this pillar will be watching for an actual live US venue as the next real trigger.
- The data-access gap flagged repeatedly this cycle (rwa.xyz 403s) is a real weakness that predates today's re-rate** and wasn't resolved by it — this pillar's core primary growth metric is still not resolved.
- Tokenized Treasuries posted two consecutive negative 30-day readings in late August** (-0.39% Aug 22, then -0.93% Aug 28) — still sub-1% each and not independently reconfirmed since.
- Coinbase's tokenized-stock launch, and the pattern before today, is easy to overstate in hindsight.** Nine-plus outlets covered it and there's a real regulatory permission behind it, but it's not a new venue (BlackRock funds, Robinhood Chain, then Coinbase) that didn't actually reach the US market. Today's exemption is the first to change that pattern, but it is one day old.
- An Ondo Stocks milestone from Aug 15 was missed for two full cycles.** That's a real research-process miss, caught only in hindsight — a reminder that "no new catalyst found" claims in the past.
- Regulatory limbo is still real.** The GENIUS Act's rulemaking deadline was missed and zero of six agencies have finalized rules; the CIP comment window closed Aug 21 but produced no rule, which can chill activity rather than de-risk it. The SEC's tokenized-equity exemption meeting remains canceled with no rescheduled date as of Aug 29.
- The RWA totals are still a small, largely institutional/permissioned number.** ~\$38-39B in total distributed value is real growth, but it's still under 1% of the BCG×Ripple \$9.4T-by-2030 TAM headline numbers in this space need active skepticism, not just repetition.
- It may not be "crypto."** Most volume is permissioned/institutional and may never accrue value to crypto majors. Durable market-structure law (CLARITY) still isn't passed — a reminder that the current structure would break a routine hold.
- ★ **NEW this cycle — the exemption's own 30-day issuer-notice-and-objection mechanic is a real structural brake, not a footnote.** Any NMS stock tokenized by an unaffiliated third party is still not outright — meaning the earliest a third-party-tokenized NMS stock could legally trade under the exemption is roughly mid-October, and issuers that object can delay indefinitely. This is exacting caution. SIFMA's and Better Markets' public pushback (Sept 2026) is the expected institutional friction this section anticipated — worth watching for an actual lawsuit or stay, which would be a real trigger.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set August 29, 2026 (full weekly refresh); re-checked August 31 through September 17, 2026 (light daily catch-ups, full weekly refreshes) — no charar (Tether's USAT) is single-product continuation, not independently trigger-worthy — no P move. **FIREd Sept 18:** the SEC's tokenized-equity exemption meeting row below — flagged since Aug 13-15 as "no P move alone, a forer **refresh:** no TSV live yet under the exemption (30-day issuer-notice mechanic logged), SIFMA/Better Markets pushback logged not scored, DTCC's October launch unconfirmed this week — see the three new Sept 19 rows below

DATE	EVENT
Checked Oct 3 — FULL WEEKLY refresh, STILL DID NOT FIRE	No Tokenized Securities Venue is live under the SEC's exemption. An on-record SEC Crypto Task Force official (Taylor Lindman, quoted via cryptotimes.io, Sept 22) says op notices are expected "in coming months" and venues "could begin to take shape as early as next quarter" (Q4 2026) — consistent with, not earlier than, the already-known mid-Oct issuer-notice floor. 24X National Exchange has filed a tokenization proposal with the SEC (marketsmedia.com, thetradenews.com) — a filing/proposal, not a live venue or a confirmed exemption notice. NYSE/Blockchain.com remains at the MOU stage, unchanged since Sept 23. Two unrelated things surfaced in search that are explicitly NOT this trigger: tZERO's live trading (old Overstock-era ATS/broker-dealer rails) and Robinhood's 24/7 tokenized stocks (a different, non-US-TSV regime)
Checked Oct 3 — DATA GAP, now a SECOND consecutive cycle	The tokenized-Treasury 30-day-trend figure this pillar's own trigger table depends on could not be obtained. Direct WebFetch to rwa.xyz, sec.gov, cftc.gov, federalregister.gov and dtcc.com all returned EGRESS_BLOCKED this cycle — a confirmed sandbox limitation. No WebSearch result returned a figure dated after roughly July 22–Aug 6, 2026. Can't confirm or deny whether the third negative reading (\$14.94B, −6.95%) became a fourth
Checked Oct 3 — CFTC Q12 offset, no live usage yet	No registrant has announced actually holding tokenized Reg 1.25 collateral under the Sept 24 FAQ — still just the guidance itself
Checked Oct 3 — DTCC October target, reiterated not confirmed	Multiple secondary outlets reiterate DTCC's October 2026 full-service launch target (building on its own confirmed July 15 pilot-trade release), but none dated after Sept 26, and none itself could not be reached (WebFetch blocked) to confirm actual execution vs. a still-forward-looking repeated target
FIRE Sept 26 — THIS PILLAR'S OWN PRE-COMMITTED TRIGGER, fired DOWNWARD	Tokenized US Treasuries contracted for a third consecutive reading: \$14.94B, −6.95% over 30 days (rwa.xyz direct pull, 25 assets), from \$16.00B on Aug 28 — after −0.39% (Sept 22) and −0.93% (Aug 28). Roughly seven times the prior magnitude. Corroborated in direction and level by a Sept 15 secondary citation at "more than \$15.9 billion"; the −6.95% magnitude itself is single-aggregator. Cause unknown — redemptions, quarter-end and reclassification could not be distinguished
FIRE Sept 24 — POSITIVE, PRIMARY, PDF extracted locally — the main offset	CFTC Crypto Asset / Blockchain FAQ update (Market Participants, Market Oversight, and Clearing and Risk divisions), marked "NEW 9/24/2026". New Q12: an FCM or DCO may invest customer funds in TOKENIZED forms of otherwise-permitted Regulation 1.25 investments, on four conditions. New Q13/Q14 call Regs 1.31 and 45.2 "technology network" Q15 contemplates PUBLIC AND PERMISSIONLESS networks for regulatory recordkeeping
FIRE Sept 23 — positive, but explicitly NOT the live-venue trigger	NYSE Group / Blockchain.com MOU for tokenized US-listed equities and ETFs on NYSE's planned digital ATS, with ICE Data Services market-data distribution. On-record quotes from Peter Smith and Lynn Martin; 8+ independent outlets. Non-binding, "subject to any required regulatory approvals," ATS not live, no launch date, no terms. No NYSE/ICE-Blockchain.com primary release found (ir.theice.com 404) — the primary is Blockchain.com's own PR Newswire release
DID NOT FIRE — the trigger that would actually matter	No Tokenized Securities Venue is live, or announced live, as of Sept 26. The exemption's own mechanic gates it: public notice at least 30 calendar days before commencing trading; Commission notification within one business day — putting the earliest third-party-tokenized NMS trade around mid-October. Analyst naming of Coinbase/Securitize/Circle as likely filers is a forecast, not a fact
Logged Sept 22 — procedural, adds a citation not information	The SEC exemption published in the Federal Register: 91 FR 60168, Release No. 34-106402, File No. 4-927 (verified via the federalregister.gov API). Formal title: "Order Granting Temporary Conditional Exemptive Relief ... and Request for Comment"
Logged Sept 24 — NOT scored, non-US only	Ondo "Intelligent Portfolios, Powered by BlackRock" went live (BLKHlon, BLKDIgon, BLKGRWon), issued by Ondo Global Markets (BVI) Limited, available only to eligible investors outside the United States — confirmed independently at Ondo's own eligibility documentation
Checked Sept 19–26 — no rail failure found	No RWA-rail failure, depeg or counterparty default dated in the window. The honest bear datapoint is idle capital and redemption pressure: ~\$78M of BENJI redemptions in early Sept 2026; 10 days to Aug 28, the sector ~12% off its mid-July peak, and BUIDL/BENJI/USYC all under 1% utilisation. Circulating "89% idle" framing is secondary analysis, not a primary figure. No guide items about a \$140M property-platform liquidation are undated 2026 retrospectives, not this window
STALE ROW — FLAGGED, NOT REQUOTED; DOWNGRADED OCT 3	This report's "Nasdaq Dec 6, 2026" tokenized-trading date could NOT be re-verified from any source this pass, and may be a conflation with Nasdaq's separate 23-hour-trading pilot launch in December. DTCC's October full-service launch remains slated but rests on secondary reporting only this cycle. Checked Oct 3: this is now CONTRADICTED, not just unverifiable — multiple secondary sources (gfmag.com, letsdatascience.com) report Nasdaq's tokenized-equity platform is actually targeting H1/Q2 2027, well past Dec 2026 — downgraded from "flagged, could not re-verify" to "likely unreliable/superseded." DTCC's October target was reiterated by secondary outlets this cycle too, but none dated after Sept 26, and dtcc.com itself remained unreachable (WebFetch blocked) to confirm execution
Unchanged — re-verified as unchanged	GENIUS Act: zero of six agencies finalized, statutory backstop still the earlier of Jan 18, 2027 or 120 days after final rules. SIFMA's Sept 17 pushback statement remains the earliest institutional opposition — no litigation, no stay
FIRE Sept 24 (event dated Sept 23) — partial, multi-sourced, this cycle	NYSE Group / Blockchain.com memorandum of understanding for access to tokenized US-listed stocks and ETFs on NYSE's planned digital ATS — 24/7 trading, fractional stablecoin funding, on-chain settlement, plus ICE Data Services distributing Blockchain.com's crypto market data and Blockchain.com incorporating ICE/NYSE feeds. On-record quotes from Peter Smith (Blockchain.com CEO) and Lynn Martin (NYSE Group President); 8+ independent outlets
Watch, not fired (checked Sept 19)	No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 Innovation Exemption. Structural detail: for any NMS stock tokenized by an unaffiliated third party, the TSV must give the issuer written notice and wait a minimum 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-09-17, corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18) — the earliest a third-party-tokenized NMS stock could legally trade is roughly mid-October 2026, mostly outside a 1-month window from today
Logged, not scored (Sept 19)	SIFMA issued a public statement (sifma.org, primary, Sept 2026) raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets separately criticized the exemption. No litigation filed as of Sept 19
Checked Sept 19, unconfirmed	DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) remains slated per DTCC's own May/July 2026 press materials, corroborated by Coindesk/CNBC/FFNews — no update this week confirming or denying it's still on track
FIRE Sept 18, 2026	The SEC issued its "Innovation Exemption" (sec.gov press release 2026-90, primary + Commissioner Uyeda statement; 7+ independent outlets): temporary 5-year conditional exemption relief letting Tokenized Securities Venues trade tokenized NMS stock via permissioned AMMs, plus a companion dealer exemption for AMM liquidity providers, subject to public notice/transparency/safeguard conditions with a comment period open
Checked Sept 13, no change	No dated catalyst found Sept 12-13 — no new rwa.xyz pull beyond the \$39.2B Sept 8 primary read already priced, and no rail failure, depeg, or counterparty default. DTCC's October 2026 full-service launch (Russell 1000 equities, major ETFs, Treasuries) remains unchanged and on schedule
Checked Sept 2, no change	No dated catalyst found Sept 1-2; the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new

Checked Sept 1, no change	Only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot); no fresh dated catalyst, no rail failure/depeg/counterparty default
Fired Aug 24, 2026	Coinbase launched tokenized-stock trading (NVDAc/METAc/AAPLc/GOOGLc) on its own Base blockchain, 1:1 Alpaca-custodied, under an ADGM permission received Aug 11; p 9 outlets. Non-US users only
Fired Aug 24-25, 2026	Standard Chartered-backed Anchorpoint began distributing HKDAP, a HK-dollar stablecoin citing RWA settlement/distribution as a use case
Checked Aug 29, unresolved	rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts — could not independently re-pull live figures this cycle; relying on the Aug 28 carried-forward primary pull
Checked Aug 28 (carried forward), watch	Tokenized Treasuries posted a second consecutive negative 30-day reading: -0.93% to \$16.00B, following -0.39% Aug 22
Aug 28, not delivered	A daily catch-up draft (2026-08-28_draft) was written but never rendered, selfchecked, archived, or committed — abandoned, not trusted at face value
For the record, dated Aug 15	Ondo Stocks crossed \$1.01B TVL (press-release syndication) — predates this research window, missed by the Aug 22 pass
Fired Aug 21, 2026	Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only. CEO Tenev called (Aug 18) for a US framework
Fired Aug 21, 2026	GENIUS Act joint CIP comment period (FinCEN-2026-0101 / OCC-2026-0331) closed on schedule (Federal Register; Freshfields, Sullivan & Cromwell memos; Forkast) — process close only, no rule yet; final rule anticipated 2027, compliance 12mo after
Fired Aug 18, 2026	Treasury's GENIUS Act Section 3 NPRM published in the Federal Register — comment deadline Oct 19, 2026
Fired Aug 18-19, 2026	SEC formally proposed "Regulation Crypto Assets" (sec.gov press release 2026-76) — startup (≤\$5M/4yr) and fundraising (≤\$75M/12mo) exemptions plus an investment-contract harbor for NEW crypto-token capital formation; scoped away from tokenization of existing real-world securities
Fired Aug 13-15, 2026; RESOLVED Sept 18	SEC's planned tokenized-equity "innovation exemption" meeting (expected ~Aug 14) was CANCELED/postponed (Ledger Insights, CryptoTimes, CoinReporter, Bloomberg/Yahoo sourced coverage) — cited causes: White House concerns, SIFMA opposition, CLARITY Act friction; causal reasons not independently corroborated
Fired Aug 12, 2026	SEC no-action letter (confirmed direct on sec.gov) lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar); Bloomberg (Aug 20) reports a plan to er BENJI in conventional ETFs/mutual funds, possibly Q4 2026
Fired Aug 17, still watch	SEC Chair Atkins met Trump, CFTC Chair Selig, NYSE, CME, DTCC, crypto firms; SEC reportedly proposed rules exempting certain token offerings, CFTC launched Innovation Committee — superseded by the Aug 13-15 cancellation above
Checked Aug 22 draft2, flat/first-negative	Direct rwa.xyz pull (primary): total distributed value \$38.32B (+2.30%/30d, flat), tokenized Treasuries \$15.98B (-0.39%/30d, first slightly-negative 30d reading tracked) — both com distinct and clean; the Aug 20 draft's "\$13.7B Treasuries" scraping-artifact conflict is not reconfirmed
Aug 17-21, not delivered	Drafts written Aug 17, 18, and 20 were never delivered; an Aug 21 session delivered the Aug 20 numbers into only two of six reports before stopping — none trusted at face value independently re-verified this cycle
Jul 29 - Aug 8	Total RWA distributed value hit a new all-time high (~\$38.2B) ; Central Bank of Ireland cleared Aviva's XRPL fund; Ripple took equity in Zilo/Licuido
Fired Aug 3	BlackRock launched BSTBL and BRSRV , two tokenized money-market funds targeting GENIUS Act stablecoin-reserve eligibility, via Securitize
Watch	Whether BRSRV actually gets adopted by a major stablecoin issuer as reserve backing, or stays unused
Watch	Whether the Aviva/Ripple XRPL institutional build-out attracts further EU-regulated fund launches, or stays a one-off
Ongoing	GENIUS Act: zero of six agencies have finalized rules; FDIC comment window closed Aug 4, joint CIP window closes Aug 21
Oct 2026	DTCC tokenization full launch — target unchanged
Dec 6, 2026	Nasdaq 23/5 tokenized trading — SEC-approved target launch (unchanged)
Jan 18, 2027	GENIUS Act 18-month statutory backstop effective date
H1 2027	Nasdaq equity-token services "operational" · bank Tokenized Deposit Network go-live · DTCC-Stellar public-chain deployment target
Any time	Tokenized-treasury depeg / counterparty failure (USYC's Binance/BNB-Chain concentration, not re-verified this cycle)

The flip line, re-stated Sept 26 — and this cycle it cut both ways, which is why the move is small: if the GENIUS rules drift into Q4 unfinished, the DTCC and Nasdaq launches slip past their October and Dec — treat the crypto-relevance thesis as failing. **Adoption that never touches public, crypto-controlled rails is TradFi, not crypto. Pointing toward failure this cycle:** tokenized Treasuries contracted for a third sitting idle, or leaving. **Pointing the other way, and directly at this clause:** the CFTC's Sept 24 Q15 explicitly contemplates *public and permissionless* networks for regulatory recordkeeping, which is the first regulatory **confirmation remains a live venue actually trading under the SEC exemption** — not an MOU, and not a staff FAQ. **The downside flip** would be the exemption drifting unused toward its five-year sunset, a reconfirmed one and justify more than a single point. **What would change my mind upward:** an FCM or DCO actually holding tokenized 1.25 collateral under the new Q12 — that converts staff guidance into observation

- Carried forward — what changed in the September 22 light daily touch (2026-09-22_draft, committed, auto-stamped), for continuity:

- Not independently re-researched that cycle — a targeted single-pillar Fed & Macro follow-up (two regional Fed survey findings; see that pillar's report), not a fresh Tokenization/RWA research

• **Score decision: HELD FLAT at 58/65/70/77/86.** Not re-researched that cycle (targeted single-pillar touch) — carried forward from the Sept 19 weekly review. AUTO-STAMPED alongside F

Carried forward — the September 19 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 19, 2026 (score set **2026-09-19_draft**, DRAFT, awaiting Alex's manual review) — checking for changes since the 2026-09-18_draft committed baseline via a dedicated full-weekly primary-sc

- **No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 "Innovation Exemption."** A structural detail worth logging: for any NMS stock tokenized by an u and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18). Since the exemption iss a 1-month window from today. This is a reason for near-term caution already baked into keeping 1mo modest (58), not a reason to cut it further.
- **SIFMA issued a public statement (sifma.org, primary, Sept 2026)** raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets al litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- **DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026** per DTCC's own May/July 2026 press materials, corroborated by C working assumption, not a positive surprise; doesn't move P.
- **On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month)** per AMBCrypto and CoinGabbbar (both Sept 2026, likely drawing on the same underlying momentum but is a continuation of a pre-existing growth trend, not specific new evidence about the Sept 17 exemption's real-world uptake — doesn't independently justify a further move.
- **DATA GAP, flagged not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent dat verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number, flagging this discrepancy explicitly rather than silently updating.
- **No corrections needed** to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up — still true, now still true two days later. No new market-price/odds data
- **Research capability:** full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attem the SEC press release and the rwa.xyz figure (handled by not reporting an unverified number, see above). A partial research-depth limitation, not a capability failure.
- **Score decision: HELD FLAT at 58/65/70/77/86.** Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. **LEFT AS DRAFT, AWAI** authority, regardless of evidence quality or move size (here, zero).

Carried forward — what changed in the September 18 light daily touch (2026-09-18_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 18, 2026 (score set **2026-09-18_draft**, committed, auto-stamped) — checking for changes since the 2026-09-17_draft committed baseline. **This pillar RE-RATED UP, 52/60/66/74/85 → 58/65/**

- **PRIMARY: the SEC issued its "Innovation Exemption" for tokenized-stock trading (sec.gov press release 2026-90, published Sept 17, 2026, plus Commissioner Uyeda's corrobor** the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market makers, sub (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May).
- **This is exactly the trigger this pillar's own table has been watching since the Aug 13-15 cancellation of the SEC's earlier tokenized-equity exemption meeting** ("a formally re-sched (Robinhood Chain, Coinbase's Base launch, both non-US-only), it is US-federal-regulator-authorized domestic tokenized-stock trading, the exact structural ceiling this pillar's Other Side secti
- **Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.** Sizing front-loaded per window: 1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1 — heaviest near-term because the exemption i and the 3yr window was already near its practical ceiling. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 17 light daily touch (2026-09-17_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 17, 2026 (score set **2026-09-17_draft**, committed, auto-stamped) — checking for changes since the 2026-09-16_draft committed baseline. **This pillar HELD FLAT at 52/60/66/74/85.**

- **Only dated news found: Aave's Sept 16 announcement of a planned RWA lending hub on Avalanche using Tether's USAT.** Consistent with this pillar's own house treatment of single-p announcement does not by itself clear the bar for a P move.
- **No rail failure, depeg, counterparty default, or DTCC/Nasdaq timeline change found.**
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 16, 2026 (score set **2026-09-16_draft**, committed, auto-stamped) — checking for changes since the 2026-09-15_draft committed baseline. **This pillar HELD FLAT at 52/60/66/74/85.**

- **No new dated rwa.xyz pull found** beyond the \$38.89B mid-September read already priced Sept 15.
- **No rail failure, depeg, or counterparty default found** in the window since the last check.
- **DTCC's October full-service launch** (Russell 1000, major ETFs, Treasuries) remains unchanged and on schedule — already priced, no new dated milestone.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 14, 2026 (score set **2026-09-14_draft**) — checking for changes since the 2026-09-13_draft committed baseline.

- **No dated catalyst found Sept 13-14.** No fresh rwa.xyz aggregate pull beyond the ~\$39.2B Sept 8 read already priced, and no rail failure, depeg, or counterparty default on any tokenization
- **DTCC's October 2026 full-service launch** — Russell 1000 equities, major index ETFs, and US Treasuries — **remains unchanged and on schedule.** No delay, no scope change, nothing n
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved. The growth curve is continuing on trend, which is what the current P already assumes.

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 — checking for changes since the Sept 12 committed baseline (2026-09-12_draft, auto-stamped this morning).

- **Sept 12, FULL WEEKLY refresh (2026-09-12_draft2):** rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary, corroborated by CryptoRank/Crowdfund Insider DTCC's October 2026 full-service launch reconfirmed on schedule, no delay (DTCC.com primary + 2 independents: Forkast, Tradeweb, Crowdfund Insider). Two freshly-dated items (Sept 7 source-equivalent, logged as context only, not used to move P. No new rail failure, depeg, counterparty default, or RWA-tokenization-specific enforcement action found.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Nothing this cycle clears the sufficiency bar. **LEFT AS DRAFT — full weekly refreshes are categorically excluded from Alex's delegat**

Carried forward — what changed in the Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped, this morning's cycle), for continuity:

- **Sept 12, light daily catch-up:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) are a continuation of the already-priced grow (Russell 1000 equities, major-index ETFs, US Treasuries) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service launch remained the operative
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct rwa.xyz unchanged catalyst. No rail failure, depeg, or counterparty default found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; no new dated catalyst clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated tokenization catalyst found Sept 1-2.** General web search found nothing beyond unchanged background (the DTCC pilot's possible October 2026 commercial-launch window).
- **BTC (pipeline reference): \$76,581.44 on Sept 2 vs. \$78,038.78 on Sept 1** — a real pullback on the day, driven by the Iran escalation covered in that pillar's report, not by anything here.
- **No new dated tokenization catalyst found** via WebSearch this cycle — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participants in the market).
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp policy regardless of the pillar that moved this week, on a hot August jobs report. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **No dated catalyst found Sept 1-2.** Score decision: HELD FLAT at 52/60/66/74/85. This shared score set was originally left as draft — Iran War Risk's sharp re-rate flipped the master call band to red, but the policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 31-Sept 1.** General web search turned up only stale/recycled RWA market-size summaries — dated to Q1 2026 or the already-priced Aug 9 SEC filing or counterparty default found.
- **BTC (pipeline reference): \$78,038.78 on Sept 1 vs. \$78,447.16 on Aug 31** — modest pullback.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority, then the committed baseline. Iran War Risk remains red.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 29-31.** Sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow Reserves); no new dated catalyst was not independently re-pulled this cycle.
- **BTC (pipeline reference): \$78,447.16 on Aug 31 vs. \$77,666.16 on Aug 29** — further gain.
- **Score decision: HELD FLAT at 52/60/66/74/85.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **★ Coinbase launched tokenized-stock trading on Base (Aug 24):** NVDAc, METAc, AAPLc, GOOGLc (Nvidia, Meta, Apple, Alphabet), 1:1 Alpaca-custodied, under an ADGM FSRA permit; no structural limitation as the Robinhood Chain precedent, insufficient alone for consistency.
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed, citing RWA settlement/distribution as a use case; a stablecoin launch, not RWA tokenization.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29 found** on a direct sec.gov check; the tokenized-equity exemption meeting remains canceled with no new dated catalyst.
- **DTCC's October 2026 and Nasdaq's Dec 6, 2026 targets are both unchanged** this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found;** two unrelated DeFi incidents (Term Finance ~\$8.5M, Arrakis V1/G-UNI, both Aug 23) are ordinary DeFi events.
- **★ Data-quality flag — rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle.** Could not independently re-pull live figures; relying on the report's most recent primary data (+2.30%/30d) Aug 22 — continued sub-1%-per-week growth, same trend. Tokenized Treasuries \$16.00B (-0.93%/30d) vs. \$15.98B (-0.39%/30d) Aug 22 — the **second consecutive negative** cycle.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** — predates this window, missed by the Aug 22 research pass; logged for the audit trail, not counted as new evidence.
- **BTC (pipeline reference): \$77,666.16 on Aug 29 vs. \$77,266.84 on Aug 22** — modest gain.
- **Score decision: held flat at 52/60/66/74/85** — nothing this cycle clears the sufficiency bar. **Left as draft, not auto-stamped:** this is a full weekly refresh, categorically excluded from Alex's standing daily auto-stamp delegation.

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity: Three earlier drafts (Aug 17, 18, 20) were written but never delivered, and an Aug 21 session delivered the Aug 20 top of the already-delivered Aug 22 catch-up.

- **Why a new set instead of editing the delivered Aug 22 draft:** per house rules, a same-day draft may only be amended in place before delivery; the Aug 22 catch-up draft was already rendered.
- **rwa.xyz total RWA distributed value: essentially flat.** Direct pull Aug 22 draft2 (primary) shows \$38.32B (+2.30%/30d) vs. the Aug 16 baseline (\$38.17-38.24B) — normal drift, no discontinuity.
- **★ rwa.xyz tokenized Treasuries: first slightly-negative 30-day reading tracked.** \$15.98B, -0.39%/30d, across 87 products (primary) — prior cycles reported flat/slightly-up figures around \$16B; no move P, flagged to watch next cycle.
- **★ NEW, primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar), call it UEEEx, KuCoin). Bloomberg (Aug 20) separately reports a plan to embed BENJI in conventional ETFs/mutual funds, possibly starting Q4 2026. Genuine but narrow institutional-plumbing position.
- **★ NEW — SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** the planned ~Aug 14 meeting was called off. Multi-sourced (Ledger Insights, SIFMA opposition, CLARITY Act friction) trace to reporting that looks like one originating story — flagged as uncorroborated at the causal level. Incremental negative versus the prior "delayed meeting" narrative.
- **GENIUS Act rulemaking proceeding exactly on its pre-set procedural schedule:** Treasury's Section 3 NPRM published in the Federal Register Aug 18 (comment deadline Oct 19); the joint rulemaking Process, not news — no rule finalized. Not yet a trigger.
- **★ NEW — Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only, not an acceleration.
- **No new RWA-rail failure, depeg, or counterparty default found** in this window; the Jul 15 Ostium exploit (\$18-24M) remains closed and non-recurring, no follow-up developments found.
- **BTC (pipeline reference): \$77,169.40 on Aug 22 vs. \$71,882.92 on Aug 20, +7.4%.**
- **Score decision:** 1mo 52 → **52** · 3mo 60 → **60** · 6mo 66 → **66** · 12mo/36mo held at 74/85 — the Franklin Templeton positive and the SEC exemption-cancellation negative are both multi-source, sub-1% and a single datapoint. **Left as draft at delivery, not auto-stamped:** this pillar's own evidence would have met the routine conditions for Alex's standing daily auto-stamp delegation regardless of evidence quality. **COMMITTED BY ALEX August 23, 2026** after manual review.
