

Iran War Risk

Pillar Report

Middle East Conflict Risk — Researched, Scored, and Personally Committed

Originally written June 19, 2026; scores committed by me June 19, 2026. Fully re-researched July 8, 13, 18, 25, and 30, 2026, and again as a full weekly refresh on August 8, 2026 (P cut at 1mo/3mo, 24/31/41/56/77 → 20/28/41/56/77, committed and stamped by Alex, last COMMITTED baseline). The Aug 16-22 gap saw four abandoned drafts: Aug 17 (held flat), Aug 18 (cut to 17/25/38/54/76), Aug 20 (cut to 16/24/38/54/76, left for manual review over a UAE missile claim), and Aug 21 (a session got partway through delivering the Aug 20 numbers — 2 of 6 reports touched, no render/selfcheck/archive/commit — before stopping). None were rendered, archived, or committed. An Aug 22 morning catch-up cycle (score set **2026-08-22_draft**) independently re-verified the gap via four parallel primary-source research passes, then adversarially fact-checked the load-bearing new claims before delivery — a step that caught a real error (see below) — and cut P to 14/22/38/54/76, delivered as a draft flagged for manual review. **Correction #1 (confirmed accurate):** the UAE missile-attack claim (Aug 18) remains single-source (UAE MoD only, Iran denies and calls it a possible "false flag") and was NOT the first direct attack on the UAE as prior drafts framed it — UAE was hit by a missile/drone barrage Apr 1-8 and again at its Fujairah port May 4, both Iran-attributed by UAE's own government and predating Aug 18; that "novel escalation vector" framing is retired. **Correction #2 (a genuine miss, caught on adversarial re-check):** that draft initially described a fatal strike on the bulker Minoan Dignity (chief engineer killed, Aug 17-18) as "the first confirmed fatality" in the Hormuz tanker campaign — that is FALSE; it is one of a cumulative toll of seafarer deaths since the campaign began late February 2026 this report never previously surfaced or scored on. The Iranian vessel seizure (tanker Amara, held near Qeshm Island since Aug 17, first since June 22) IS confirmed accurate. **THIS VERSION (score set 2026-08-22_draft2) is a separate, later-in-the-day FULL WEEKLY refresh** — the first deep multi-source dive since Aug 8 — that independently re-researched the pillar and ran a second, dedicated adversarial-verification pass specifically re-checking (a) whether the casualty-toll figure holds up and (b) whether anything was missed Aug 19-22. It holds up, but softer than a clean number: cross-checking Wikipedia's "2026 Strait of Hormuz crisis" infobox (18 total), a mid-July gCaptain snapshot ("at least 15"), and IMO's own incident tracker (19 seafarer deaths, but scoped to the broader Middle East, not Hormuz cleanly) puts the honest range at **15-19 cumulative deaths (17-18 by the most Hormuz-specific trackers)**, not a flat "18th death" — that softened framing is carried everywhere below. A UAE missile-attack claim the adversarial pass initially flagged as a possible miss turned out, on reconciliation, to be the same Aug 18 episode already in the draft baseline, not a second incident. No new kinetic incident was found Aug 19-22. **P HELD FLAT this cycle at 14/22/38/54/76 — left as draft at delivery (full weekly refreshes are categorically excluded from auto-stamp), then reviewed and COMMITTED BY ALEX on August 23** after independent re-verification of the math and the research trail; see My Decision below. A daily catch-up draft dated August 28, 2026 (score set **2026-08-28_draft**) re-checked two more Hormuz tanker incidents and a single-source Iran-Oman revenue-sharing claim, holding P flat — but that draft was never rendered, selfchecked, archived, or committed, and is treated as abandoned/superseded, the same discipline this report has applied to every other interrupted session (Aug 17, 18, 20, and 21). **THIS VERSION (score set 2026-08-29_draft) is a NEW, independent FULL WEEKLY refresh** against the last committed baseline (2026-08-22_draft2) — the first cycle in several weeks to surface a genuinely two-sided evidence ledger: a confirmed, crypto-specific sanctions escalation (the Aug 24 "Operation Economic Outcast" package, the first Iran sanctions action to explicitly name digital assets as a sanctionable sector and list 30 on-chain addresses, confirmed via direct fetch of home.treasury.gov) against a confirmed de-escalation upgrade (Oman's own Foreign Ministry, not just Iran, co-confirming a temporary Hormuz corridor Aug 25, confirmed via direct fetch of fm.gov.om). The two roughly offset, alongside a first-of-the-crisis Hormuz transit uptick and a second straight weekly Brent decline on the bull side, and two more tanker incidents plus a firmer casualty count on the bear side. **P HELD FLAT at 14/22/38/54/76 — left as a draft, not auto-stamped**, because this is a full weekly refresh, categorically excluded from delegated auto-stamp authority regardless of move size (here, zero). See My Decision below. **THIS VERSION (score set 2026-08-31_draft) is a light daily catch-up** covering the Aug 29-31 gap: on Aug 30, US forces struck IRGC rocket/mine-launchers on Iran's Larak Island — the first US strike on Iranian territory since Jul 29 — directly firing this pillar's own pre-declared flip line ("a

resumption of direct US strikes on Iran proper"). Iran retaliated with ballistic missiles on two US-linked Jordan airbases hours later; Jordan intercepted 8 missiles; no confirmed US casualty. **P RE-RATED DOWN to 9/17/34/51/75** (from 14/22/38/54/76), front-loaded and held under 8 points per window. This is a light daily touch, not a full weekly refresh, no window moved >8 points, and the master FINAL NUMBER's call band did not flip vs. the last stamped set — **AUTO-STAMPED per delegated authority. THIS VERSION (score set 2026-09-01_draft) is a further light daily catch-up** covering Aug 31-Sept 1: escalation continued into a second day — a THIRD Hormuz tanker hit (the VLCC Senegal Prosperity, Aug 31), a disputed Iranian claim of a drone strike on the UAE's Al Minhad Air Base (UAE MoD denies the target claim but confirms it intercepted an Iranian drone over its waters), and Trump on-record Aug 31 still weighing further strikes on Iran. **P RE-RATED DOWN again, more modestly, to 7/15/32/50/75** (from 9/17/34/51/75) — no window moved more than 2 points, well under the 8-point auto-stamp threshold. **AUTO-STAMPED per delegated authority** — the new last COMMITTED baseline. **THIS VERSION (score set 2026-09-02_draft) is a further light daily catch-up that turned into the sharpest single-cycle move since Aug 30:** CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran — roughly 50x the scale of the single Aug 30 Larak strike — including, for the first time in this war, direct US strikes on Iranian government oil tankers under a new "tanker for tanker" policy. A US strike reportedly hit a wedding party in Kuhestak, Hormozgan (4+ dead per the Hormozgan governor's office, including a 4-year-old, 60+ injured) — flagged here as SINGLE-NARRATIVE-SOURCED at the core fact level (Iranian state/local authorities; CENTCOM has neither confirmed nor denied it), so it does not by itself move P, but it is the reported trigger for Iran's response: coordinated IRGC ballistic-missile/drone strikes Sept 2 on US-linked bases in FOUR countries at once (Jordan, Bahrain, Iraq, Kuwait) — larger in scale than the single-state Aug 30-31 Jordan strike, but all four are repeat targets, so the "widening to a further NEW state" flip-line clause does not fire. **P RE-RATED DOWN sharply to 1/9/27/47/74** (from 7/15/32/50/75), front-loaded and kept under 8 points per window. **COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026,** retroactively, under Alex's Sept 3 widened delegated daily auto-stamp policy: a call-band flip and the size of a move are no longer disqualifying on their own. The wedding-casualty fact was correctly kept single-narrative-sourced and never used to move P, and nothing about the sourcing or the research itself changed — only the stamping threshold did. This remains the last TRUE committed baseline: 1/9/27/47/74. **Sept 3:** Iran fired a second retaliatory wave on Kuwait and UAE — both repeat targets, no US-manned facility hit, widening clause does not fire. **P HELD FLAT. Sept 5, light daily catch-up (2026-09-05_draft):** held flat again — the Reuters weapons-expert corroboration of the Sept 1 wedding strike resolves attribution of an already-priced event, not new escalation; a Sept 5 Iranian-media report of a US strike on the tanker STARK 1 near Kharg Island is single-narrative and not used to move P. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the STARK 1 incident is real and developing (Iran International separately obtained video of US radio warnings, and AP itself frames it as an Iranian accusation, not a confirmed fact) but CENTCOM has still not confirmed or denied it, so per the sufficiency rule it is NOT used to move P. None of this pillar's flip-line clauses independently fired this week. **HELD FLAT at 1/9/27/47/74. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6 light daily catch-up (score set 2026-09-06_draft):** CENTCOM's own on-the-record press release now confirms the Sept 5 tanker strike this report had withheld pending confirmation — and reveals it was materially more serious than known: THREE Iranian tankers (M/T Downy, M/T Stark 1, M/T Kylo) struck in retaliation for an unprovoked IRGC ballistic-missile attack on two US Navy warships, both of which evaded. **P RE-RATED DOWN, modestly, to 1/8/25/45/73** — no window moved more than 2 points, no flip-line clause independently fires (no confirmed US casualty, no widening to a new state, Brent short of \$100), and the master call band held Neutral → Neutral. **AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-08_draft) is a further light daily catch-up** covering Sept 6-8: the new fact is Iran SNSC secretary Mohsen Rezaei's on-record Sept 6-7 announcement (state TV, Press TV, Tehran Times) that Iran will declare a new "restricted zone" from the US Navy's blockade line into the Persian Gulf, sanctioning any vessel that enters — corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu, GlobalSecurity.org) but explicitly a THREAT OF INTENT, not yet executed ("further details... yet to be announced" per Al Jazeera's Sept 7 explainer). No flip-line clause fires (DCAS still 18, Brent ~\$97.29 Sept 7, no new state). **P RE-RATED DOWN, modestly, to 1/7/24/44/73** (from 1/8/25/45/73) — no window moved more than 1 point. **AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-09_draft) is a further light daily catch-up** covering Sept 8-9: CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship") confirms US forces destroyed FIVE more Iranian crude oil carriers on Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Gulf of Oman) and M/T Derya (Kharg Island) — after the IRGC targeted a US Navy warship with ballistic missiles TWICE over the preceding two days, corroborated by 5+ independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org); both Iranian missile attempts were evaded, no US personnel harmed. Separately, Brent crude crossed \$100/bbl intraday Sept 9 for the first time since July 24 (CNBC, ABC News; ~\$100.44, +2.57%) — a single-day intraday cross, not this pillar's own "sustained Brent >\$100" flip-line threshold, so it does not independently fire that clause, but it is the

closest this cycle has come to the flip line. No flip-line clause fires (no US casualty, no new state, only an intraday Brent cross). **P RE-RATED DOWN, modestly, to 1/6/23/43/72** (from 1/7/24/44/73) — no window moved more than 1 point. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-10_draft) is a further light daily catch-up** covering Sept 9-10: two new dated facts. CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military). Jordan is a repeat target, so the widening clause does not fire, and both sides confirm no casualties, so the US-casualty clause does not fire either. Separately, Iran-aligned Houthi forces seized the Yemeni port of Mocha Sept 10, closing in on the Bab el-Mandeb Strait — a second global chokepoint distinct from Hormuz — confirmed by 5+ outlets (The Media Line, Times of Israel, Al Jazeera, SCMP, Jerusalem Post, Cyprus Mail), but the same Houthi/Yemen actor already priced, and no strait closure has actually been executed, so this does not independently fire a clause either. Brent has now traded near/above \$100/bbl for a second straight session (CNBC: above \$101 Sept 9; TradingEconomics: ~\$101.25 Sept 10) — more persistent than Sept 9's intraday cross, the closest this cycle has come to the flip line, but still short of a clean sustained-close call. **P RE-RATED DOWN, modestly, to 1/5/22/42/72** (from 1/6/23/43/72) — no window moved more than 1 point, master call band unchanged (Neutral → Neutral). **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-11_draft) is a further light daily catch-up** covering Sept 10-11: this pillar's own "sustained Brent close above \$100" flip-line clause FIRES on a third consecutive session — Brent closed Thursday Sept 10 up more than 6% above \$107 after trading above \$108 intraday, its highest since May 19, with WTI closing above \$102 for the first time since May (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500 — 4+ independent) — alongside fuller reporting of Iran's Sept 9 shipping wave: 10 vessels attacked near Hormuz (2 US-linked ships, 8 oil tankers), the largest declared wave of the war, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill). A merchant seafarer is not a US service member, so the confirmed-US-combat-death clause does not fire. **P RE-RATED DOWN, modestly, to 1/4/20/40/71** (from 1/5/22/42/72) — 1mo held at the near-floor 1, 3mo -1, 6mo -2, 12mo -2, 36mo -1. No window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar on every scored fact, and the master FINAL NUMBER's call band did not flip anywhere. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-12_draft) is a further light daily catch-up** covering Sept 11-12: Houthi forces, having seized Mocha Sept 10, swept the rest of Yemen's Red Sea coastline by Sept 11 — capturing the final government-held coastal towns (Dhubab, Murad) and Houthi naval forces seizing Mayyun (Perim) Island in the Bab al-Mandeb strait itself, with fighting continuing for Zuqar Island — a materially more severe status (actual control of a second global chokepoint's own islands) than the Sept 10 baseline's "closing in" characterization, confirmed by 6+ independent outlets (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Separately, UKMTO's own Warning 133-26 confirms four projectiles struck two more vessels near Khasab, Oman Sept 10, one set afire (Gulf News, Maritime Executive, The Hill corroborating); an IRGC claim of a Saldrone strike is single-source and not used to move P. Yemen is an existing theater, so the widening clause does not fire; no US casualty, so that clause doesn't either — this is a severity escalation of an already-fired flip-line environment, not a fresh clause firing. **P RE-RATED DOWN, moderately, to 1/2/18/38/70** (from 1/4/20/40/71) — 1mo held at the near-floor 1, 3mo -2, 6mo -2, 12mo -2, 36mo -1. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **LATER THE SAME DAY (Sept 12): a separate FULL WEEKLY refresh (score set 2026-09-12_draft2), the first full-weekly-depth research dive since the Sept 5 full weekly refresh, ran four parallel adversarial research passes across all four qualitative pillars against the 2026-09-12_draft committed baseline (1/2/18/38/70).** One new dated fact clears the sufficiency bar: Saudi Arabia's East-West Pipeline (Petroline) — the kingdom's primary Hormuz-bypass oil-export route, a NEW target distinct from the already-logged Sept 8 Aramco/Jazan refinery strikes — was hit by drones launched from Iraqi territory on Sept 10 (Saudi MFA statement/confirmation issued Sept 11). PRIMARY: Saudi Arabia's own Ministry of Foreign Affairs confirmed pumping stations in the Riyadh/Medina areas were struck, causing injuries and material damage, and said it would not retaliate for now at Baghdad's request; corroborated by 6+ independent outlets (Al Jazeera, CNBC, CNN, Times of Israel, ABC News Australia, OilPrice.com) with satellite imagery of fire/smoke at the pumping stations, plus Iraq's own PM ordering a probe, dismissing the Maysan operations commander, and closing the Shalamchah border crossing. No group has claimed responsibility; President Trump, in Dublin, said Iran was "probably" responsible — a single, hedged, unconfirmed remark, logged as such, NOT as established fact (the Saudi MFA statement itself attributes origin only to Iraqi territory, not to a directing state). Neither flip-line clause fires: the widening clause does NOT fire (Iraq has been an active theater since the Sept 1 IRGC strike on US facilities in Erbil province — escalation within an existing theater, not a new one), and the US-casualty clause does NOT fire (no confirmed US military casualty found); the sustained-Brent->\$100 clause continues to hold (~\$104.61 Sept 12, same as the morning baseline) as persistence, not a fresh trigger. Also logged, not scored: Trump's own account that the Houthis privately signaled they don't want direct US involvement in Yemen (single-source as to substance, consistent with the already-logged MBS-refused-strikes counterweight), and the BRICS New Delhi summit's joint declaration (Sept

12, all members plus Saudi Arabia/Iran/UAE) urging "maximum restraint" over the escalation — a mild long-horizon diplomatic data point relevant only to the 1yr/3yr framing. The Mayyun Island/Bab al-Mandeb seizure (Sept 10-11) was independently re-verified as still holding, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye, ZeroHedge). Sized small given a single infrastructure strike with no widening and no US casualty: **P RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70** (from 1/2/18/38/70) — 3mo/6mo/12mo -1 each, 36mo held, 1mo held at the near-floor 1. **WEEKLY REFRESH — left as DRAFT for Alex's manual review, full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of move size.** Committed by Alex; Sept 13-14 light daily catch-ups held flat with nothing new clearing the sufficiency bar, AUTO-STAMPED. **Sept 16 (score set 2026-09-16_draft):** RE-RATED DOWN on the 6/12/36mo windows to 1/1/14/33/66 (from 1/1/18/38/70) — the IAEA Board of Governors voted Sept 9 to refer Iran's nuclear file to the UN Security Council, and 130 Iranian lawmakers signed a Sept 12-13 statement calling for NPT withdrawal, with a hardline MP describing an emergency bill being drafted (RFE/RL, Tehran Times, Mehr News); Pezeshkian's public no-nuclear-weapons stance and the Foreign Ministry's "still being prepared" framing kept the move modest. AUTO-STAMPED, the last TRUE committed baseline. **THIS VERSION (Sept 17, score set 2026-09-17_draft) HOLDS FLAT at 1/1/14/33/66** — re-checked, no new dated development beyond the Sept 9 IAEA referral and the Sept 12-13 NPT statement already priced; Pezeshkian's and the Foreign Ministry's positions are unchanged. AUTO-STAMPED per delegated daily authority. **Sept 18 (score set 2026-09-18_draft, this version) HOLDS FLAT again at 1/1/14/33/66.** Two dated items were found and weighed. Trump told Axios Sept 17 he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday UN General Assembly meeting with six Gulf-state leaders — dated and multi-sourced (Axios original, corroborated by Times of Israel, Politico Wire, Breitbart, RedState, Western Journal, anews — 5+ independent), but it is rhetoric about an undated future decision, and the near-term windows (1mo/3mo P=1) already price maximal active-war uncertainty, so it does not clear the bar for a further move. Separately, an initial general search surfaced a claim that the IRGC struck a Togo-flagged tanker named "Trend" in the Strait of Hormuz on Sept 18; a follow-up targeted search could not independently corroborate this from any named outlet or primary (CENTCOM/IRGC) source — **treated as NOT FIRED / NOT USED** per this report's house discipline for uncorroborated single claims. AUTO-STAMPED per delegated daily authority. See My Decision below. **THIS VERSION (Sept 19, score set 2026-09-19_draft) is a FULL WEEKLY refresh** against the last committed baseline (2026-09-18_draft) — independent primary-source research across all five windows found nothing that clears the sufficiency bar for a move. Iran's parliament continues moving toward, but has NOT enacted, NPT withdrawal: 130 lawmakers signed a further Sept 7-13 statement urging the legal Article X process, Parliament Presidium spokesman Abbas Goudarzi said withdrawal "can easily" be done, and a bill was submitted for expedited consideration — but Iran's own Foreign Ministry still calls it "in preparation," so this remains a proposal, not a completed act (Iran International, Tehran Times, IranWire, APA.az, anews, Militarnyi, IFP News — corroborated but mostly Iran-linked/state-affiliated, the same treatment this pillar has always given Iranian-sourced claims). Trump told Axios (Sept 17) he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday Sept 22 UN General Assembly sideline meeting with six Gulf-state leaders (Saudi Arabia, UAE, Qatar, Bahrain, Kuwait, Oman) — very well corroborated (Axios, Jerusalem Post, Politico/Political Wire, Israel National News, Common Dreams, Breitbart, CBN News, 5+ independent), but still rhetoric about an undated future decision; **the Sept 22 meeting itself is now flagged as this pillar's clearest near-term trigger to watch next cycle.** The UN Security Council failed 11-2-2 on Sept 17 to renew its Iran-sanctions monitoring panel, Russia and China dissenting (Somalia/Pakistan abstaining) — a primary UN press release (press.un.org, sc16455 and related), corroborated by Euronews and Security Council Report — institutional gridlock over the 2025 snapback dispute, not a new sanction or act of war. The Togo-flagged tanker "Trend" strike (Sept 17-18) this pillar could not corroborate last cycle is now CONFIRMED via the IRGC's own statement (IRNA, primary, via GlobalSecurity.org) plus independent outlets including The Hill, Bernama, IranWire, TFTC, Parapolitika, and Rio Times — reversing last cycle's NOT FIRED call, but it is a continuation of an already-months-long tanker campaign (the US struck three Iranian tankers Sept 1-5), not a new escalatory step, so it updates the record without moving P. Brent settled ~\$103.21/bbl Sept 18 (CNBC, Al Jazeera), down 1.5% day-over-day but still near the multi-month highs reached in early September — a market price, not scored. Iran has now gone nine straight days without striking a "host state" (GlobalSecurity.org's OSINT day-by-day tracker) — a mild, fragile de-escalatory data point — while a Houthis-linked air-raid alert hit Riyadh Sept 19 for the first time since July (Times of Israel liveblog) — a mixed signal on the proxy front; neither clears the bar alone. FM Araghchi said Iran and Oman "agreed a plan" to reopen the Strait (TASS, Caspianpost) but separately clarified the Oman understanding will NOT by itself reopen Hormuz, conditioned on the US honoring the 60-day Islamabad MOU (Mehr News, corroborated by Samaa) — a net wash. **P HELD FLAT at 1/1/14/33/66 — full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of the size of the move (here, zero) — LEFT AS DRAFT, flagged prominently for Alex's manual review.** See My Decision below. **Updated & Re-verified September 22, 2026 — LIGHT DAILY touch, score set 2026-09-22_draft: carried forward unchanged at 1/1/14/33/66 — not re-researched this cycle; Fed & Macro re-rated down instead. COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026. Updated & Re-verified September 23, 2026 — LIGHT DAILY touch, score set 2026-09-23_draft: RE-RATED UP to 3/3/16/35/66,**

the first upward move since Sept 13. A senior Iranian official told Reuters (Sept 22, 8+ outlet corroboration) Iran can reopen Hormuz within 7 days if the US eases pressure and lifts its blockade; separately, US officials (Witkoff/Kushner) and Iran's FM Araghchi held a 3-hour "very productive" mediated meeting at the UN General Assembly sidelines Sept 22, the first direct US-Iran contact at this level since the war began, with another meeting scheduled soon. Sized modestly against Iran's still-steep unmet conditions (full blockade lift, all frozen assets released, end to war on every named front), Pezeshkian declining to meet Trump directly, and continued unattributed Sept 21 tanker incidents. **COMMITTED, AUTO-STAMPED SEPTEMBER 23, 2026.**

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 19, 2026 · **Updated & Re-verified October 3, 2026** — FULL WEEKLY refresh, score set 2026-10-03_draft: RE-RATED DOWN, 1/2/15/34/66 → 1/1/14/33/66 (0/−1/−1/−1/0). The Sept justification is gone. THIS CYCLE ALSO CORRECTS A MATERIAL PRICE ERROR IN THIS REPORT: Brent was \$120.92 on Sept 24 and \$116.01 on Sept 25 on the official EIA/FRED Europe Brent Sp saying, and the “sustained above \$100” clause is fired by a wide margin. LEFT AS DRAFT — AWAITING ALEX’S STAMP. · Updated & Re-verified September 26, 2026 — FULL WEEKLY refresh, sc NAMED PRINCIPALS ON THE RECORD: FM Araghchi detailed a concrete seven-day Hormuz-reopening plan outside the UN Security Council on Sept 25 (AP, Reuters and Al Jazeera as indepen the windows split. Held small because the confirmed ACTIONS run the other way: a cargo vessel struck in Hormuz Sept 23, two Houthi salvos at Saudi Arabia, the blockade intact, transits at own manual review. · Note: a September 24 draft on this pillar was written but never delivered, and its claim that no tanker incidents occurred Sept 23–24 was FALSIFIED on re-verification. · Prior: Updated undated future decision — near-term windows already at this pillar's practical floor; a claim of an IRGC strike on a tanker named "Trend" could NOT be independently corroborated on a follow-up targeted 2026-09-19_draft (P HELD FLAT at 1/1/14/33/66). Iran's parliament continues moving toward but has NOT enacted NPT withdrawal (still "in preparation" per its own Foreign Ministry) — a proposal, not a trigger to watch next cycle. The UN Security Council failed 11-2-2 (Russia and China vetoing, Somalia/Pakistan abstaining, Sept 17) to renew its Iran-sanctions monitoring panel — institutional gridlock, not already-active tanker campaign, not new escalation, so it updates the record without moving P. This is a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp authority regarding 1/1/14/33/66 — not re-researched this cycle; Fed & Macro re-rated down instead (see that pillar's report). The Scores — Committed vs. Drafts

Oct 3 (2026-10-03_draft, this version): FULL WEEKLY refresh, RE-RATED DOWN 1/2/15/34/66 → 1/1/14/33/66 — LEFT AS DRAFT, AWAITING ALEX’S STAMP. The 9/26 column is now the last COMMITTED baseline (stamp fixed and every column on this table now reconciles cell-by-cell against config/scores.json. Historical notes follow. **Sept 26 (2026-09-26_draft3, this version): FULL WEEKLY refresh, RE-RATED as a WINDOW SPLIT, 3/3/15/34/66.** Sept 24 draft was written but never delivered, so per this report’s convention for abandoned drafts it gets no column here; it stays in config/scores.json permanently. Historical notes follow. June column committed by me June 19. Adversarial passes, cut to 14/22/38/54/76, HELD FLAT vs. the morning draft) was left as a draft at delivery (full weekly refresh, categorically excluded from auto-stamp) and **COMMITTED BY ALEX August 23, 2026.** An Aug 28 daily catch-up cover (categorically excluded from auto-stamp) pending Alex’s manual review — that draft is now superseded and collapses out of this table per house rules on committed sets. **Aug 31 (2026-08-31_draft)** was a light daily catch-up covering **09-01_draft)** was a further light daily catch-up covering Aug 31-Sept 1: escalation continued into a second day — P cut again, more modestly, to 7/15/32/50/75, AUTO-STAMPED, the last COMMITTED set. **This section (score set 2026-09-01_draft, this version)** reportedly hit a wedding party in Hormozgan (single-narrative-sourced, not scored directly); Iran’s IRGC retaliated Sept 2 with coordinated strikes on FOUR countries at once (Jordan, Bahrain, Iraq, Kuwait — all repeat targets, so the larger future action, and the master call band flip Mild Bull → Neutral); **COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy so a call-band flip and move size no longer but config/scores.json’s status was never actually advanced — flagged as a correction, not itself edited. **Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, this version)** independently re-verifies via WebSearch, including the Sept 5 **set 2026-09-06_draft)** re-rates P down modestly to 1/8/25/45/73 once CENTCOM’s own press release confirmed the Sept 5 tanker strike as a 3-tanker retaliation for an IRGC missile attack on 2 US Navy warships — no window move on 1/7/24/44/73 on Iran SNSC secretary Mohsen Rezaei’s Sept 6-7 announcement of intent to declare a restricted zone beyond Hormuz into the Persian Gulf — a genuine new escalatory signal, corroborated by 8+ independent outlets, **09_draft, this version)** re-rates P down modestly again to 1/6/23/43/72: CENTCOM’s own press release confirms US forces destroyed FIVE more Iranian crude oil carriers Sept 8 (M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Rieser) — line. No window moved more than 1 point, master call band unchanged (Neutral → Neutral) — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10 light daily catch-up (score set 2026-09-10_draft, this version)** closing in on the Bab el-Mandeb Strait — a second chokepoint, but the same actor/theater already priced; Brent traded above \$100 for a second straight session, still short of a sustained close. No window moved more than 1 point, master call band unchanged (Neutral → Neutral). Brent close above \$100” flip-line clause fires on a third consecutive session (Brent closed above \$107 Thursday Sept 10, highest since May 19), alongside fuller reporting of Iran’s 10-vessel Sept 9 Hormuz shipping wave (at least one seized), **12_draft)** re-rates P down, moderately, to 1/2/18/38/70: Houthi forces swept the rest of Yemen’s Red Sea coastline by Sept 11 (capturing Dhubab and Murad, the last government-held coastal towns) and seized Mayyun (Perim) Island. **12_draft, this version)** Khasab, Oman Sept 10 (one afire). No new flip-line clause fires (Yemen is existing theater; no US casualty), but this is a bigger step than the routine daily grind — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. Arabia’s East-West Pipeline (Petroline) was hit by drones launched from Iraqi territory Sept 10 (Saudi MFA-confirmed Sept 11, 6+ independent outlets), sponsorship undetermined (Trump’s “probably Iran” is a single hedged remark, not confirmed). **delegated auto-stamp authority regardless of move size — awaiting Alex’s manual review.** Committed by Alex; Sept 13-14 held flat, AUTO-STAMPED. **Sept 16 (2026-09-16_draft)** re-rates down on 6/12/36mo to 1/1/14/33/66, **16_draft, this version)** STAMPED per delegated daily authority. **Sept 18 (2026-09-18_draft)** HOLDS FLAT again at 1/1/14/33/66 — Trump’s Sept 17 Axios “big decision”/“annihilate” remark is dated/multi-sourced but rhetorical, near-term windows already priced. **this version)** independently re-researched the week via full primary-source access: Iran’s parliament continues moving toward but has NOT enacted NPT withdrawal (130 lawmakers, Sept 7-13 statement; bill submitted but still “in process”; China vetoing, Somalia/Pakistan abstaining) to renew its Iran-sanctions monitoring panel, institutional gridlock; the Togo-flagged tanker “Trend” strike is now CONFIRMED (IRGC’s own statement plus The Hill and others), reversing long Iran-Oman Strait diplomatic claim nets to a wash. None of this clears the sufficiency bar. **P HELD FLAT at 1/1/14/33/66 — this is a FULL WEEKLY refresh, categorically excluded from delegated auto-stamp authority regardless of move size (this version)** report). Light daily touch — **COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026**, the new last TRUE committed baseline.

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. **THIS CYCLE (Sept 14, LIGHT DAILY touch, score set 2026-09-15_draft): RE-RATED DOWN to 1/1/18/38/70** (from the Sept 13-committed 3/3/18/38/70) — meeting that was to be held on Monday in Salalah, in order to create conditions conducive to a constructive dialogue." **No new date was set.** Corroborated by Arab News, the Washington Post, and the UAE had already downgraded to a minister of state rather than its foreign minister. Iran's MFA spokesman says Saudi Arabia requested the postponement citing the Yemen war and calls the meeting "a misunderstanding" **"would not mean reopening of the Strait of Hormuz"** (Tehran Times / Mehr — Iranian state media quoting Iran's own foreign minister, primary for Iran's stated position; echo of the **was checked and rejected:** research this cycle surfaced drone strikes on Salalah and Duqm ports; those are dated **March 1, 3 and 11, 2026**, not September, and are NOT treated as new. Winograd's Sept 10 and Oman's FM publicly recommitted to dialogue), 36mo 70 flat.

Prior cycle (Sept 12, FULL WEEKLY refresh, score set 2026-09-12_draft2): RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70 (from the Sept 12-committed 1/2/18/38/70). Four paragraphs covered the Sept 10-11 Bab al-Mandeb/Mayyun Island seizure and the Sept 10 UKMTO Warning 133-26 near Khasab): **Saudi Arabia's East-West Pipeline (Petroline) — the kingdom's primary oil export route** — Aramco/Jazan refinery strikes. PRIMARY: Saudi Arabia's own Ministry of Foreign Affairs confirmed pumping stations in the Riyadh/Medina areas were struck, causing injuries and material damage. Secondary: with satellite imagery showing fire/smoke at pumping stations near Al Mesba'ah and Al Dhekra. Iraq's PM ordered a probe of the Maysan operations command, dismissed its commander, and said the attack was "probably" responsible — a SINGLE, HEDGED, UNCONFIRMED statement, logged as exactly that, NOT as established fact (the Saudi MFA statement itself attributes origin only to Iraq). The US, within an existing theater, not a new one; the US-casualty clause does NOT fire — no confirmed US military casualty found this cycle. The sustained-Brent->\$100 clause continues to hold (Brent's rise to \$100 administration they don't want direct US involvement in Yemen — single-source as to substance, consistent with (not additive to) the already-logged MBS-twice-refused-strikes restraint count). The US is expressing concern over attacks on civilian/nuclear infrastructure — a mild, diplomatic, long-horizon data point relevant only to the 1yr/3yr framing. The Mayyun (Perim) Island/Bab al-Mandeb Strait is an already-logged Warning 133-26. **Sizing:** a third distinct attack on Saudi oil infrastructure this week, specifically targeting the kingdom's Hormuz-bypass export route, clears the sufficiency bar for a 3mo/6mo/12mo -1 each, 36mo held flat (a single tactical strike doesn't change the long-run strategic outlook, and the BRICS restraint statement is a modest offsetting data point at this horizon). **flagged prominently for Alex's manual review.**

Prior cycle (Sept 12 daily, score set 2026-09-12_draft): RE-RATED DOWN, moderately, to 1/2/18/38/70 (from the Sept 11-committed 1/4/20/40/71). **BEARISH and NEW: a second global oil price spike** — an offensive that by Sept 11 captured Dhubab and Murad — the final coastal towns held by the internationally recognized Yemeni government — giving Iran-aligned Houthis control of the Red Sea's oil outlets (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald) and is materially more severe than the "closing in" status the Sept 10 cycle priced — actual control of strait-controlling infrastructure refused (intelligence/targeting-data support offered instead) — a genuine US-restraint data point, logged as an honest counterweight. Per this pillar's own flip-line definitions, Yemen/the Houthis' escalation of an already-fired flip-line environment (the direct-US-strikes and sustained-Brent clauses both fired in prior cycles), not a fresh flip-line event. **BEARISH and NEW, second fact:** U.S. oil is one afire; corroborated by 3+ independent outlets (Gulf News, Maritime Executive, The Hill). **Logged but NOT used to move P (single-source):** IRGC's own claim to have separately struck a tanker in the Red Sea (TradingEconomics/psuconnect.in) — confirming persistence of the flip-line clause that already fired Sept 10-11, not a fresh trigger. **P RE-RATED DOWN: 1mo held at the near-floor 1, 3mo 4** — recent 1-point touches but still restrained since no flip-line newly fires — the sourcing clears the primary-plus-multi-outlet bar (UKMTO's own warning, not a single outlet, for the vessel strikes).

Prior cycle (Sept 11, score set 2026-09-11_draft): RE-RATED DOWN, modestly, to 1/4/20/40/71 (from the Sept 10-committed 1/5/22/42/72). **BEARISH and NEW — a second, distinct fact:** a session: Brent **ended Thursday Sept 10 up more than 6% above \$107** after trading above \$108 intraday — its highest in nearly four months, since May 19 — with WTI closing above \$102 for the first time in a ~3% give-back. *Correction to the prior cycle:* that cycle, run mid-morning Sept 10, logged Brent at ~\$101.25 "Thursday Sept 10" — an intraday read; Thursday's actual close was far higher, above \$107, on either side since the war began, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill — 4 independent). A merchant seafarer is *not* a US service member.

This cycle (Sept 16): the crowd's attention today is almost entirely on the CLARITY Act vote failure, not Iran — but two real, dated escalatory facts landed this week on the nuclear track that this bounded — a parliamentary push and an institutional referral are documented facts, not a completed NPT exit, and Pezeshkian's own public no-nukes line plus the Foreign Ministry calling the bill floor of 1 with no room left to express further deterioration. The shooting-war facts this pillar has tracked for weeks — the Saudi pipeline, the Salalah postponement, Hormuz shipping — showed

Prior cycle (Sept 12, full weekly refresh): the crowd will likely either read the Petroline pipeline strike as proof Iran is now hitting Saudi Arabia's core oil-export infrastructure directly, or dismiss it as off-target (Saudi Arabia's primary Hormuz-bypass export artery, not a refinery this time) for the third time this week, and that pattern — not the unconfirmed attribution — is what earns a further escalation strike with no widening (Iraq is already an active theater since the Sept 1 Erbil strike) and no US casualty — not because I am siding with either the "Iran did it" or "no proof, ignore it" framings. The

Prior cycle (Sept 12 daily): the crowd will likely either treat the Bab al-Mandeb island seizures as a headline-grabbing new front that should crater risk assets, or dismiss it as "just Yemen" background noise to the oil in a SECOND global oil corridor, not merely "closing in" on one, and that upgrades the standing risk even though no clause in this pillar's own flip line technically fires (Yemen is existing theater, not a falsifiable definitions — and I'd rather be criticized for under-reacting to a real structural shift than for inventing a new flip-line clause after the fact to justify a bigger move. The MBS-request-refusal

Prior cycle (Sept 11): the crowd will read a \$108 print and a 6% up-day in Brent as the war finally repricing energy — or, watching Friday's 3% give-back on Hormuz diplomacy headlines, wave the price above \$107, is that clause firing, not a near-miss. I said so in the two prior cycles when it hadn't fired yet; the discipline only counts if it also fires when the number arrives. What it does *not* do is cause a further modest cut, not a regime change — and the give-back on diplomacy headlines is logged honestly alongside it.

Prior cycle (Sept 10): the crowd is likely to either read the Al Azraq missile barrage as a dangerous new peak of the conflict, or wave off a Yemeni port city changing hands as background noise to the CENTCOM and Jordan's own military confirm no casualties this time either — a repeat-pattern event, not a new category. The Houthis seizure of Mocha is more interesting precisely because it's escalation development worth flagging even though no blockade has actually been executed yet. Brent trading above \$100 for a second straight session is the more important tell than either strike — not yet has used for every cycle since Sept 6.

Prior cycle (Sept 9): the crowd is likely to either read Brent's intraday \$100 cross as confirmation the flip line has effectively fired, or dismiss the 5-tanker CENTCOM strike as "more of the same" to close above \$100, which is what this pillar's own pre-declared threshold requires — so it does not independently fire that clause, though it earns a mention in every relevant section below rather than to the same kind of provocation (an IRGC missile attack on a US Navy warship) — a continuation of an already-priced trajectory, not a new category of event, so I am re-rating down modestly again.

Prior cycle (Sept 8): the crowd is likely to either dismiss Rezaei's restricted-zone announcement as Iran "talking tough" without follow-through, or treat it as an imminent full closure of a new strike zone — no boundaries, no enforcement mechanism, and no confirmed incident tied to it as of this cycle's research cutoff. Re-rating down modestly (1/7/24/44/73, from 1/8/25/45/73) rather than sharply on escalatory statements. I am explicitly not treating Rezaei's parallel claim that an Iran-Oman corridor deal will also be signed "in the coming days" as bullish either — until it is actually signed, it's the

Prior cycle (Sept 6): the crowd was likely to read CENTCOM's own confirmation of the Sept 5 tanker strike as a relief ("finally, official clarity") rather than what it actually was — a confirmation that the 5 tankers. Re-rated down modestly (1/8/25/45/73, from 1/9/27/47/74) rather than sharply, because none of this pillar's flip-line clauses fired on it (no US casualty, no new state, Brent short of \$100). Separate IRGC claims of further tanker/vessel/drone strikes were explicitly not used to move P — those are Iran's own claims, unconfirmed by the US, and the sufficiency rule is exactly what stops

The crowd: is likely to anchor on the wedding-strike casualty claim as the emotional center of today's news, and either (a) treat it as a confirmed atrocity driving the story, or (b) dismiss the whole claim as source confirmed regardless of how the casualty dispute resolves, and is the real story this cycle.

Me: cutting sharply to 1/9/27/47/74, versus the Sept 1 baseline (7/15/32/50/75, auto-stamped). This is the largest single-cycle P move this pillar has made since the Aug 30-31 flip-line-firing cut, but the political and emotional driver of today's four-country Iranian retaliation — is single-narrative-sourced at the level that matters (Iranian state/local authorities, CENTCOM neither confirming nor denying) — ~50x the Aug 30 strike, plus the war's first direct tanker strikes — is a genuinely novel escalation this pillar's prior single-incident sizing precedents (Jul 28 Jordan, Aug 30 Larak) don't cleanly cover. Ahead — a miscalibrated cut here is more costly than usual given what could follow. That said, the cut is still evidence-bounded, not panic-sized: kept under 8 points per window, and the four-cycle

My edge: the discipline here is refusing to let a single-source emotional fact do more work than it's earned, in either direction — not discarding it (it's genuinely the trigger for today's retaliation). The crowd either over- or under-reacts to a claim like this; this pillar tries to size around it instead.

Honesty check against the tape: BTC fell from \$78,038.78 (Sept 1, Bitstamp) to \$76,581.44 (Sept 2) — a real, visible risk-off move that for once tracks the same direction as this pillar's own sharp drop. Check for the reader.

The Facts

As of October 3, 2026 (FULL WEEKLY refresh, score set 2026-10-03_draft, LEFT AS DRAFT). Every figure below was independently re-derived from a primary source in this cycle's adversarial-verification pass unless explicitly labelled otherwise.

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 26 – OCTOBER 3, 2026

★ **CORRECTION, and it is the most important item on this page — this report had Brent \$12–14 a barrel too low.** The prior version stated "Brent closed \$106.60 Sept 24 (+3.4%, intraday low \$104.20) (petroleum/pri/spt, series **RBRTE**, Europe Brent Spot Price FOB) and **FRED DCOILBRENTU**, the latter re-pulled to disk and read from the raw bytes rather than through any summarising layer. **Root cause, now understood:** \$106.60 is not the correct figure. **(Sept 29). Sept 29 is the last published reading in both EIA and FRED** — there is no Sept 30, Oct 1 or Oct 2 spot print, and none is asserted here. **Consequence:** the "sustained Brent close above \$100" clause is not merely still fired, but

NOT USED, and why. Claims that Brent fell to \$99.68 or about \$102 on Oct 2 trace to TradingEconomics, which self-discloses as contract-for-difference data "supplied by a third party rather than the source." **not published here as a figure:** retail futures feeds proved irreconcilable with one another (a one-day date offset between two of them; one missing Sept 24–29 entirely while quoting a different price) — anomalous — roughly \$11–21 depending on which futures source one accepts — and that irreducible uncertainty is itself the point.

★ **CONFIRMED — the diplomatic track stalled, which is what moves P this cycle.** The indirect UN General Assembly sidelines track reached a **stalemate on Monday Sept 28:** the White House **treated as established:** that Secretary of State Rubio *ordered* the delegation out rests on Axios reporting citing anonymous "sources familiar," syndicated to roughly 25 outlets — *wide syndication* — New York on Monday evening, in accordance with the schedule that had also been communicated to the US Department of State in advance on September 17." On sourcing grade the denial is

The channel is not dead, which is why this is one point and not a collapse to the floor. Mediators **Qatar** (principal), **Pakistan** and **Egypt** — all three confirmed in the room for the Sept 23 talks. Trump said publicly on Sept 27 that he expected talks that week, while rejecting the current terms.

★ **KINETIC EVENTS — and a framing correction that matters.** UKMT0 reported **four vessels struck across Sept 28–29**, all transiting **dark (AIS off)** near Musandam, with a fifth — the Kuwaiti tanker *Al Fintas* — primary and trade source says "unknown projectile" and *no group claimed responsibility*. An earlier pass of this cycle wrote "Iran struck"; that was an inference and is withdrawn. Iran's own PGS report says the operator is **ADNOC, not Sinokor**; and Sinbad, at 115,949 dwt, is **Aframax/LR2 class, not a VLCC**. Al Fintas (KOTC VLCC, struck Sept 28 east of Musandam, fire extinguished, crew safe, vessel intact) — casualty flip clause is untouched. None of it fires a fresh clause either: it is the same category already priced since the Sept 5 and Sept 8 tanker strikes, and the trade reporting's own read is that

DCAS — an honesty caveat that now matters more than the number. The official tally stands at **19 (11 hostile, 8 non-hostile)** and is corroborated by a source quoting DCAS directly, but the *Washington Post* (Sept 5), which ended May 5), not a single published figure. And it is **actively contested as an undercount:** five US officials told the *Washington Post* the real figure is at least 22, one said 23, and one said 24. One of Norfolk, Virginia, who died Sept 18 in what is explicitly described as a non-combat-related incident and was posthumously promoted to major. "No confirmed" is not "none occurred": DCAS

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ **THE LOAD-BEARING NEW FACT — Iran's foreign minister put a concrete plan on the record, Sept 25, 2026.** FM Abbas Araghchi, speaking to reporters *outside the UN Security Council*, announced a ceasefire on all fronts including Lebanon and Yemen; **the Strait of Hormuz reopens on day six**; and **US–Iran talks on a final nuclear deal begin on day seven**. In his words: "The choice now is between a deal and no deal." and Al Jazeera as independent originals — a categorical upgrade over the anonymous sourcing that this pillar has repeatedly refused to score. *Sourcing precision:* the \$12bn figure travels with the same steps as not new — "They are all already in the MOU" — which ties the plan to the existing Islamabad framework rather than presenting it as a fresh concession.

★ **NEW — Pezeshkian offers to readmit UN nuclear inspectors, in a CBS excerpt released Sept 25.** Asked whether Iran would allow UN nuclear inspectors back in, President Pezeshkian said "yes" in a *broadcast*, not a Sept 25 interview aired in full; the concession is explicitly **conditional on the US accepting Iran's proposal**; and the softening versus his own defiant Sept 23 UNGA address is significant. Inspector access is the first movement on the nuclear file in weeks, and it is the specific reason the 12-month window takes +1.

★ **NEW — Secretary Rubio on the record, Sept 24:** the previous day's talks were "largely positive" and "human beings talked to each other yesterday," but he *declined* to call it a breakthrough.

CORRECTION to the Sept 23 committed set — the Sept 22 contact was MEDIATED, not direct. That set called it the “first direct-channel” US–Iran contact. Witkoff’s own on-record account **rather than smoothed over**: Iranian state broadcaster IRIB described it as a *meeting* between Araghchi and Witkoff held at Witkoff’s request, and Trump said his envoys “met with” the Iranian

★ **FALSIFIED CLAIM — a cargo vessel WAS struck in Hormuz on Sept 23.** The abandoned Sept 24 draft stated that “no new tanker incidents dated Sept 23–24 were found.” That is **wrong**, evacuated, with **two casualties** reported. **Careful wording, because the sources genuinely do not say more**: UKMTO did *not* state whether the two casualties were killed or injured, so this is not (as the Indian nationals aboard) — not to UKMTO. Either way these are **merchant crew, not US service members**, so the US–combat-death flip line is untouched. *Basis caveat*: ukmto.org returned 403

★ **NEW — two Houthi salvos at Saudi Arabia.** On **Sept 24** Saudi forces intercepted **six ballistic missiles** aimed at Taif and the Yanbu Red Sea area; overnight **Sept 25–26** the coalition intercepted. Arabia is a repeat target already in theatre, and everything incoming was intercepted.

★ **NEW STATE OF AFFAIRS — no announced US strike on Iranian territory since Sept 1, roughly 3.5 weeks.** The strikes clause that fired Aug 30 is therefore now **DORMANT, though not** (Partner Military Operations) plus the absence of wire coverage — wire/ISW-derived, not primary-verified. A discrepancy is flagged rather than printed: secondary sources date the follow-on at

US fatalities — the flip line did NOT fire, with three corrections to the record. The Pentagon’s DCAS total stands at **19**, unchanged through Sept 26, and breaks down as **11 hostile plus 8** combat-related and a defense official described a medical incident aboard a flight to Saudi Arabia. It is explicitly non-hostile, so this pillar’s flip line, which requires a confirmed new US *combat* troops have died than the Pentagon has disclosed; the article returned 403 and could not be read. It is potentially material to this flip line and needs a dedicated pass.

MARKET PRICES AND SHIPPING DATA — labelled, never presented as institutional estimates. (*BASIS NOTE: the figures below are ICE front-month FUTURES prints. They were previously carried on a* basis) closed **\$106.60 on Sept 24, up 3.4%**, with an intraday high of **\$108.23**, then closed **\$104.37 on Sept 25, down 2.09%** — roughly +20% on the month and **well above the fired \$100** **Thursday Sept 24** from 14 the previous day, against a **10-day average of 18**, versus a pre-war baseline of about **125 large commercial vessels per day** (confirmed in the same Reuters copy) comparable with the Reuters series and the two are not mixed; Reuters also caveats that vessels running with transponders off are not counted, so actuals may be higher. The **US naval blockade** Israel–Iran with US–Iran, so no number is quoted.

REPORTED BUT EXPLICITLY NOT SCORED — and the most important one cuts AGAINST this cycle’s up-move. (a) The Wall Street Journal reported Sept 25–26, citing *unnamed US officials* Bloomberg, CNBC, The Hill, JPost, Ynet and others all headline it as a *WSJ report*, and there is **no on-record White House confirmation** anywhere as of Sept 26. WSJ’s own caveat is carried: **that rule symmetrically: the item argues for a smaller up-move or none, and is still not used.** (b) The National’s Sept 23 “road map” remains single-original-source; Semafor attributes it to — and the two are deliberately **not merged**. (c) An IRGC claim of a cluster-warhead anti-ship missile test near a US carrier (Sept 20, via Al Jazeera) is Iran’s own unconfirmed assertion and is not

- ★ ★ **NEW — the UN Security Council failed 11-2-2 (Russia and China vetoing, Somalia/Pakistan abstaining) on Sept 18, 2026 to renew the panel of independent experts monitoring** ground, so it doesn’t move P.
- ★ ★ **NEW — Trump told Axios (Sept 17, 2026) he faces a “big decision” on whether to “annihilate” the Iranian regime, ahead of a planned Tuesday Sept 22 UN General Assembly sided** Rhetoric about an undated future decision, not an action — this pillar’s clearest near-term trigger to watch next cycle.
- ★ ★ **CORROBORATION UPDATE, reverses last cycle’s “not fired” call**: the Togo-flagged tanker “Trend” strike in the Strait of Hormuz on Sept 17–18, 2026 is now confirmed via the IRGC’s own long tanker campaign, not a new escalatory step, so it updates the record without moving P.
- ★ ★ **NEW — the IAEA Board of Governors voted Sept 9, 2026 to refer Iran’s nuclear file to the UN Security Council.** A primary institutional action by the IAEA itself, escalating international

- **Strait of Hormuz remains effectively closed to normal commercial traffic** — ~10 transits/day versus a normal baseline near 88/day (IMF PortWatch), unchanged from prior cycles. IRGC, US Navy, and
- **No formal MoU withdrawal by either side**. The 60-day window to ~**Aug 16** remains intact and un-triggered.
- **Israel remains out of direct engagement** — no confirmed direct Israel-Iran exchange since June 7-8; the widened fronts (Iraq, Egypt) involve the US, Saudi Arabia, and unclaimed actors, not
- **The "Layla" tanker claim (Jul 23) remains unconfirmed** after a full week — AIS data dark, no primary confirmation found. Downgraded from "watch" to "discard pending new evidence."
- **The baseline (still true, still load-bearing)**: June 2025 "12-Day War" — BTC dipped to a ~**\$98,225 intraday low**, reclaimed \$107k+ within days, a fast V. The far larger 2026 war still hasn't crossed

The Prize

Illustrative only — not price targets, not advice

The upside is still the **"buy-the-invasion" rebound**. Anchors: Russia-Ukraine (Feb 24, 2022) — BTC fell ~8% to a ~**\$34,300 intraday low**, posted a +14.5% up-day on Feb 28, ended ~+**25-28%** by Mar 10, 2022. The Aug 30-Sept 2 direct US-Iran exchange escalated sharply (a ~50x-larger US strike wave, the war's first direct strikes on Iranian government tankers, a four-country Iranian retaliation), reset the prize, but has not been confirmed reopened either. As of this cycle (Sept 19), the picture is mixed rather than clearly escalating further: Iran has gone nine straight days without striking a "host state," a rare feat, but sharply from \$78,046.80 on Sept 18 — this pillar's own P held flat this cycle, so that move tracks other pillars' news (notably nothing that cleared any pillar's own bar this week), not this one; low oil price/fee/compensation/sovereignty compromise both sides actually accept, signed and holding a full clean week without a new attack, fatality, or seizure, would shift the prize from "temporary compromise" to "the Prize doesn't feed the math, it tells you what the lean is worth acting on."

The Other Side

The strongest honest case this is wrong

- **The cut may still be too small, even at 1/9/27/47/74**. Nearly 100 targets, the war's first direct tanker strikes, and a four-country simultaneous retaliation is a genuinely different order of magnitude, but this pillar has always flagged as the real tail risk, and that keeping the cut "under 8 points per window" mechanically, out of habit from smaller prior incidents, is itself a mistake when the under
- **Leaving it as a draft may itself be too cautious**. The independently-confirmed facts alone — CENTCOM's own ~100-target count, the first-ever tanker strikes, the four-country retaliation, but the caveat as an excuse to soften a call the non-disputed facts already support, rather than a genuine evidentiary gap.

- **The cut may be too small.** This report explicitly pre-declared "a resumption of direct US strikes on Iran proper" as the line that breaks the dip-buy thesis — and calibrated the actual cut to a routine tanker incident, precisely because the report itself said in advance this class of event was different in kind, not just degree.
- **The cut may be too large.** One resumed-strike night after ~28-30 clean nights is, so far, a single interdiction event (stopping a mine-laying attempt) rather than evidence of a full campaign. In the next few days, this cut may prove to have moved faster than the evidence ultimately warranted.
- **The Oman corridor confirmation (Aug 25) is not retracted.** Oman's own Foreign Ministry still has not walked back its Aug 25 joint statement — the first time both parties on the "deal" side have not walked back a scoped shock.
- **The Aug 24 sanctions package is arguably a bigger structural story than this week's kinetic exchange.** It was the first Iran sanctions action in this war to explicitly name digital assets as a target.
- **No confirmed US casualty, still.** The single hardest-edged clause of this pillar's own flip line — a confirmed new US combat death — remains unfired even after this week's exchange; a reader should not expect it to be.
- **Thin sample, still.** The bullish long-term read rests on a handful of dip-and-recover events, all in a bull regime — geopolitical shocks don't always V-recover, and a fresh direct strike exchange would be a new sample.
- **Two more restraint signals landed this cycle, logged honestly — a reader could argue they're under-weighted.** The BRICS New Delhi summit's joint declaration (Sept 12) — signed by Saudi Arabia and Iran — and Houthis privately signaling they don't want direct US involvement in Yemen. Neither moves P (one is purely diplomatic, the other single-source as to substance), but this pillar logs every new signal and decision is defensible.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. **As of Sept 19 (full weekly refresh):** the Togo-flagged tanker "Trend" strike is now **CONFIRMED** (reversing the Sept 18 NOT USED call, but not moving P — see the UN Security Council failed 11-2-2 on Sept 17 to renew its Iran-sanctions monitoring panel — institutional gridlock, a new row below. None of this clears the sufficiency bar; P HELD FLAT. **As of Sept 18:** Trump's Sept 17 Axios "big" lawmaker NPT-withdrawal push (Sept 12-13) are the newest entries, driving this cycle's 6/12/36mo re-rate down. Re-leveled August 22, 2026, refreshed August 29; **this pillar's own downside flip line FIRED August 30** (see the flip-line clause below). **As of Sept 17:** the Togo-flagged tanker "Trend" strike is **CONFIRMED** and revealed to be part of a direct IRGC missile attack on 2 US Navy warships; Iran's SNSC secretary announces intent to declare a restricted zone beyond Hormuz into the Persian Gulf, not yet closing in on Bab el-Mandeb. **As of Sept 11 a SECOND, distinct flip-line clause has now fired** — the "sustained Brent close above \$100" clause, on a third consecutive session above \$100 including a close above \$107 on Sept 10. **As of Sept 10:** fresh flip-line clause (top row). **As of the Sept 13 light daily touch, the first de-escalation datapoint in six weeks landed: Iran's foreign ministry announced Fri Sept 11 that the foreign ministers of Iran, the six GCC states and the UN Security Council failed to agree on a new Iran-sanctions monitoring panel.** **As of Sept 12:** **independent outlets). It drives this pillar's first UPWARD re-rate since Aug 6, sized small against Bahrain's announced non-attendance, an Iranian official's statement that no deal is expected, the fact that the agreement is not signed, US-accepted Hormuz reopening holding a full clean week. In the prior Sept 12 full weekly refresh, a third distinct Saudi oil-infrastructure strike landed** — drones launched from Iraqi territory hit Saudi Arabia's Eastern Province oil infrastructure.

DATE	EVENT
FIRED Sept 28 — CONFIRMED; the grounds for sitting above the floor are gone	The indirect UNGA-sidelines track reached a stalemate — the White House expected progress Monday morning, and by late afternoon there was no progress. Reported with its grade: that Rubio <i>ordered</i> them out rests on one anonymous Axios original syndicated to the Wall Street Journal, <i>first-party and on the record</i> , citing a schedule communicated to State on Sept 17 — so the expulsion is DISPUTED and only the stalemate moves forward. As of Sept 28: the US has a revised draft realigning blockade, inspector-return and oil-waiver sequencing, and Trump said Sept 27 he expected talks that week
CLAUSE STILL FIRED, by a wider margin than this report had stated — Brent, double-primary-confirmed Oct 3	The “sustained Brent close above \$100” clause is fired by roughly 14%, not marginally. Official EIA RBRTE / FRED DCOILBRENTU Europe Brent oil price (USD per barrel) (Sept 24), \$116.01 (Sept 25), \$119.97 (Sept 28), \$113.96 (Sept 29, the last published reading). CORRECTION: this report had printed \$106.60/\$104.30. FUTURES prints mislabelled as the spot series. There was NO oil de-escalation this week; a TradingEconomics CFD quote suggesting Brent fell below \$100
Checked Oct 3 — vessel strikes continue, but NO fresh clause fires and attribution is NOT established	Four vessels struck Sept 28–29 (UKMTO), all transiting dark near Musandam, plus the Kuwait-flagged KOTC VLCC Kazimah III on Oct 1 (crew safe, vessel damaged). Every source says “unknown projectile” and no group claimed responsibility — attribution to Iran is NOT established. Zero deaths, zero injuries reported. Mersin Prosperity's operator is ADNOC, not Sinokor; Sinbad (115,949 dwt) is Aframax/LR2, not a VLCC. Al Funtas is IMO-confirmed as to damage
FIRED Sept 25 — DE-ESCALATORY, named principal ON THE RECORD, 3 independent originals	FM Abbas Araghchi detailed a SEVEN-DAY plan outside the UN Security Council, conveyed to Washington via Qatar: ~4–5 days of US steps (lifting sanctions, unfreezing assets, etc.) in exchange for a 7-day ceasefire. Estimated \$12bn in frozen assets, ceasefire on all fronts including Lebanon and Yemen), Strait reopens day six , nuclear talks begin day seven. “T” and Al Jazeera as independent originals. He added the US steps “are all already in the MOU”
FIRED Sept 25 — DE-ESCALATORY, nuclear file, but CONDITIONAL	Pezeshkian offers to readmit UN nuclear inspectors in a CBS excerpt released Sept 25 ahead of the Sunday Sept 27 broadcast: “That is absolutely a commitment to us — explicitly <i>if</i> the US accepts Iran’s proposal. Materially softer than his own Sept 23 UNGA address <i>on inspector access specifically</i> ”
FIRED Sept 23 — ESCALATORY, and it FALSIFIES the abandoned Sept 24 draft	A cargo vessel was struck by an unknown projectile in the Strait of Hormuz , caught fire, lost control and drifted; crew evacuated; two casualties reported. As of Sept 23: incidents occurred Sept 23–24 — wrong. UKMTO did not say killed or injured, so this report does not say “two killed”; the vessel is the Antigean MS Golden Breeze . Confirmed fatality is attributed to the Indian Embassy in Oman (19 Indian nationals aboard). ukmto.org 403’d — wire-derived, not primary-verified
FIRED Sept 24 and overnight Sept 25–26 — escalatory, multi-source	Two Houthi salvos at Saudi Arabia: six ballistic missiles intercepted toward Taif and the Yanbu area (Sept 24); two more plus two drones toward Jeddah (Sept 25)
DORMANT as of Sept 26 — a previously fired clause has lapsed	No announced US strike on Iranian territory since SEPT 1 , roughly 3.5 weeks. centcom.mil returned 403 on both release indexes, so this negated the “US strike on Iranian territory” clause (to report”) plus the absence of wire coverage — wire/ISW-derived, not primary-verified
STILL FIRED — a flip-line clause, market price	Brent remains well above \$100 — and by MORE than stated here; see the Oct 3 correction row above. On the official EIA/FRED SPOT series, Brent closed at \$113.96 on Sept 29. The figures that follow are FUTURES prints, mislabelled in the original entry: closed \$106.60 Sept 24 (+3.4%, intraday high \$108.50) and \$106.60 Sept 24 (+3.4%, intraday high \$108.50) ~+20% on the month. This supersedes the last committed set’s “~\$99, two-week low, war premium unwinding” read
NOT FIRED — checked Sept 26, no recovery	Hormuz transits: nine on Thursday Sept 24 from 14 the previous day, 10-day average 18 , against a pre-war baseline of ~ 125 large commercial tankers per day. 14% of normal. An IMF PortWatch reading of 1 is dated Sept 20 and uses PortWatch’s own 85/day baseline — not comparable, and not mixed
NOT FIRED — the combat-death clause, with three record corrections	Pentagon DCAS holds at 19 through Sept 26 (11 hostile, 8 non-hostile). The 19th was Capt. Bianca C. Wilkerson, 37, posthumously promoted to major (Sept 26). “undetermined,” not “medical.” No new US combat death found
REPORTED, NOT SCORED — and it argues AGAINST this cycle’s up-move	The WSJ reported Sept 25–26, citing UNNAMED US officials, that Trump REJECTED the seven-day plan and expects to resume bombing after the ceasefire. As of Sept 25: source: Bloomberg, CNBC, The Hill, JPost and Ynet all cite the WSJ; no on-record White House confirmation exists. WSJ’s own caveat: Trump’s “road map” is “not a deal”
REPORTED, NOT SCORED — still single-original-source	The National’s Sept 23 60-day “road map”: Semafor attributes it verbatim to “The National reported” rather than confirming independently. It is a “road map” with Qatari/Pakistani/Egyptian mediation versus seven days via Qatar
WATCH — the next concrete signal either way	Whether the US responds ON THE RECORD to the seven-day plan. Rubio called the Sept 24 talks “largely positive” but explicitly not a breakthrough. As of Sept 25: said Sept 25 it “will not stop punishing the US until Iran’s seven conditions are met”
FIRED Sept 24 (event dated Sept 22) — on-record, multi-sourced, this cycle	President Trump’s UN General Assembly address, Sept 22, 2026 (Axios, NBC News, CBS News, Times of Israel, PBS, Bloomberg, Washington Post, etc.) made with Iran that lets them rebuild and create a far greater country than it ever was before ... or do I annihilate the Islamic Republic, and do it on my own terms right after the election because it doesn't make sense for them not to. They’re waiting to see how I do in the midterm election.” Not priced by the market. As of Sept 22: Witkoff/Kushner-Araghchi meeting but not the speech — that omission is logged, not folded in quietly
Sept 23 — REPORTED, NOT SCORED (single-narrative source)	<i>The National</i> (Sept 23) reported Iran presented the US a “road map”: a regionwide ceasefire of up to 60 days, phased Strait of Hormuz reopening, etc. Qatari, Pakistani and Egyptian mediators. Gulf News and Aaj English TV carry it but label it “report” in their own headlines — syndication of the same

Sept 7-13, still unenacted as of Sept 19 — corroborated but mostly Iran-linked/state-affiliated (Iran International, Tehran Times, IranWire, APA.az, anews, Militarnyi, IFP News)	Iran’s parliament continues moving toward, but has NOT enacted, NPT withdrawal: 130 lawmakers signed a further Sept 7-13 statement urging the UN Security Council to demand Iran’s withdrawal from the NPT. Presidium spokesman Abbas Goudarzi said withdrawal “can easily” be done; a bill was submitted for expedited consideration but not yet voted on

Sept 18 — PRIMARY (UN press releases sc16455 and related) plus Euronews and Security Council Report's monthly forecast	The UN Security Council failed 11-2-2 (Russia and China vetoing) to renew its panel of independent experts monitoring reimposed Iran Pakistan abstaining, deepening the ongoing Russia/China-vs-E3 legal dispute over the 2025 "snapback" sanctions reimposition
FIRE d Sept 9, reported Sept 12-16 — PRIMARY (IAEA Board of Governors institutional action)	The IAEA Board of Governors voted to refer Iran's nuclear file to the UN Security Council , escalating international pressure over Iran's nuclear program. Separately, 130 Iranian lawmakers signed a statement Sept 12-13 calling on parliament to begin the legal process for NPT withdrawal, with a hardline (RFE/RL, Tehran Times, Mehr News — 3 independent outlets). FIRE d Sept 13 — PRIMARY (Oman News Agency statement) plus 5+ independent outlets (Arab News, Washington Post, CNN, Gulf News, Malay Mail)	The Salalah ministerial was POSTPONED, one day before it was to convene, with NO new date . Iran rejected Yemen and calls that a pretext — <i>single-party-sourced to Iranian officials, reported not scored</i> . Separately, FM Araqchi said the Iran-Oman understanding "is still being prepared." Hormuz" (Tehran Times/Mehr). Brent +2.8% past \$107, WTI \$102.34 — <i>market prices, reported not scored</i> .

Logged counterweights: Bahrain announced Sept 12 it will not attend; an Iranian official told JPost no sign of a service-fee regime, i.e. the agenda is about managing a strait Iran still controls
Sept 13, reported same day (Al Jazeera live blog) — Iran's attribution is Iran's own and is NOT treated as established	A commercial vessel was attacked near Qeshm Island inside the Strait of Hormuz, killing one and wounding four; an Iranian official blamed the "U.S. Navy" and Saudi Arabia, causing injuries and damaging a mosque. Houthi forces and Yemen's internationally recognised government continued trading strikes
Friday Sept 11 — a market price, reported NOT used to move P	Brent gave back 4.24% to ~\$104.26, the first meaningful downside session since the sustained->\$100 flip-line clause fired; wire coverage attributed to a contraction forecast (TradingEconomics, Forbes)
Attack Sept 10, Saudi MFA statement/confirmation Sept 11 (primary) plus 6+ independent outlets — sponsorship UNDETERMINED (Iraqi-origin, no group claim)	Saudi Arabia's East-West Pipeline (Petroline) — its primary Hormuz-bypass oil-export route — hit by drones launched from Iraqi territory; Riyadh/Medina struck, injuries and material damage, will not retaliate for now at Baghdad's request (Al Jazeera, CNBC, CNN, Times of Israel). By Dec 31, 2026	Final US–Iran nuclear deal signed — not fired, pending
PARTIALLY FIRED Sept 22, 2026 — corroborated 6+ independent outlets plus Iranian state media	US (Witkoff/Kushner) and Iran (FM Araghchi) held a 3-hour mediated meeting at the UN General Assembly sidelines — Trump called it "v momentum"; another meeting scheduled "in the very near future." Separately, a senior Iranian official told Reuters (Sept 22, corroborated 8+ outlets) that Iran "eases pressure and lifts its blockade — conditions include releasing ALL frozen Iranian assets and ending the war on named "resistance fronts."

THE FLIP LINE AS OF SEPT 26 (full weekly refresh) — one clause still firing, one now DORMANT, two unfired: the four clauses are a confirmed new US combat death, a resumption of direct US strikes on Iran (Sept 24), \$116.01 (Sept 25), \$119.97 (Sept 28) and \$113.96 (Sept 29, the last published reading); nowhere near un-firing. The \$106.60/\$104.37 figures previously printed here were ICE front-month FUTURES prices because centcom.mil returned 403, so it is wire-derived rather than primary-verified. **(3) Confirmed new US combat death: NOT FIRED** — DCAS holds at 19 (11 hostile, 8 non-hostile); the 19th died Sept 18 of a confirmed direct US–Iran naval exchange makes a durable, US-accepted deal considerably further away, not closer. Watch next cycle for: whether Sept 6's IRGC claims are independently confirmed, whether either of the three unfired clauses (no confirmed US casualty, no confirmed strike on a genuinely new state, Brent ~\$97.29 Sept 7, still short of \$100) — the cut this cycle is modest (no window moved >2 points) and, unlike the Sept 2 cycle, is AUTO-STAMPED per the delegated daily authority (sourcing is primary/multi-outlet, no call-band flip). **The equilibrium** is a repeat pattern, not a widening to a new state, and no confirmed US casualty, so neither of those clauses fires. Brent crosses \$100/bbl intraday for the first time since July 24 (~\$100.44) — the closest threshold window moved >1 point) and is AUTO-STAMPED per the delegated daily authority. Watch next cycle for: whether Brent sustains a close above \$100 (it is now closer to that threshold than at any prior point in this cycle). **UPDATE, Sept 6:** CENTCOM has now confirmed the Sept 5 tanker strike this pillar had withheld — a 3-tanker retaliation for an IRGC ballistic-missile attack on 2 Sept (Sept 8 tanker strike by firing 20 missiles at Jordan's Al Azraq base — Jordan is a repeat target and both sides confirm no casualties, so neither clause fires. Houthi forces seize the Yemeni port of Mocha, closing the Red Sea to shipping, a confirmed US combat death, or a confirmed strike on a genuinely new state. **UPDATE, Sept 19 (full weekly refresh):** none of the four clauses newly fires this cycle. Iran's parliament still has not enacted the UN Security Council's failed Sept 17 sanctions-panel renewal is institutional gridlock, not a new sanction or act of war; the "Trend" tanker strike (Sept 17-18) is newly confirmed but is a continuation of the already-firing clause. **UPDATE, Sept 12 (full weekly refresh):** a third distinct Saudi oil-infrastructure strike — the East-West Pipeline (Petroline), hit by drones launched from Iraqi territory Sept 10 (Saudi MFA statement Sept 11) — does not treated as fact). The cut is small (no window moved >1 point) and, because this is a FULL WEEKLY refresh, is LEFT AS DRAFT for Alex's manual review regardless of the move's size — full weekly refreshes are called regardless of move size (here, none). Watch next cycle for: the outcome of the Sept 22 UN General Assembly Gulf-states meeting, whether the NPT-withdrawal bill is actually voted on, a confirmed US combat death, or a confirmed strike on a genuinely new state.

The flip line, re-leveled — TRIGGERED Aug 30, and as of Sept 11 a SECOND distinct clause (sustained Brent close above \$100) has now ALSO fired: a confirmed new US combat death, a resumption of direct US strikes on Iran proper" clause fired — CENTCOM struck Larak Island, the first acknowledged US strike on Iranian territory since Jul 29. **As of Sept 11, the "sustained Brent close above \$100" clause has fired** to confirm attribution) are not. **As of Sept 1-2, the strikes clause was already firing again at vastly greater scale** — CENTCOM confirms nearly 100 targets struck (~50x Aug 30) plus the war's first direct strikes on a new-state clause did NOT fire despite Iran's Sept 2 retaliation hitting four countries simultaneously (Jordan, Bahrain, Iraq, Kuwait) — every one of the four is a REPEAT target already struck earlier in this war, so "firing" is why P moved sharply down that cycle. **UPDATE, Sept 6:** CENTCOM has now confirmed the Sept 5 tanker strike this pillar had withheld — a 3-tanker retaliation for an IRGC ballistic-missile attack on 2 Sept (Sept 8 tanker strike by firing 20 missiles at Jordan's Al Azraq base — Jordan is a repeat target and both sides confirm no casualties, so neither clause fires. Houthi forces seize the Yemeni port of Mocha, closing the Red Sea to shipping, a confirmed US combat death, or a confirmed strike on a genuinely new state. **UPDATE, Sept 19 (full weekly refresh):** none of the four clauses newly fires this cycle. Iran's parliament still has not enacted the UN Security Council's failed Sept 17 sanctions-panel renewal is institutional gridlock, not a new sanction or act of war; the "Trend" tanker strike (Sept 17-18) is newly confirmed but is a continuation of the already-firing clause. **UPDATE, Sept 12 (full weekly refresh):** a third distinct Saudi oil-infrastructure strike — the East-West Pipeline (Petroline), hit by drones launched from Iraqi territory Sept 10 (Saudi MFA statement Sept 11) — does not treated as fact). The cut is small (no window moved >1 point) and, because this is a FULL WEEKLY refresh, is LEFT AS DRAFT for Alex's manual review regardless of the move's size — full weekly refreshes are called regardless of move size (here, none). Watch next cycle for: the outcome of the Sept 22 UN General Assembly Gulf-states meeting, whether the NPT-withdrawal bill is actually voted on, a confirmed US combat death, or a confirmed strike on a genuinely new state.

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — RE-RATED DOWN, 3/3/16/35/66 — 1/2/15/34/66, and this REVERSES an earlier draft of this same cycle. That reversal was a seven-day plan on the record, conveyed via Qatar — the US lifts the naval blockade, waives oil sanctions and releases an estimated \$12bn in frozen assets over roughly four to five days, the Strait of Hormuz reopened, and the US proposed UN move (a window split to 2/5/18/36/66) on the reasoning that the Nov 3 midterms fall outside the 1-month window and inside the 3- and 6-month ones. **What overturned it:** a Wall Street Journal report that the US correctly declined to use it. **That analysis went stale on Saturday.** On Sept 26 Trump rejected the plan *himself, on the record*, to reporters outside the White House: **"I reject their proposal"; "I've rejected their proposal";** coverage of public remarks. That is a **primary source from the only person with authority to accept the plan**, and it must move P. The up-move is withdrawn. **Why this is NOT a full reversal to the old cycle:** a deal too," and has not withdrawn his own Sept 22 UN General Assembly prediction of a deal "right after the election"; he rejected this *proposal's terms and sequence*, not dealmaking, and the midterms sit on a conditional on US acceptance, but the first movement on the nuclear file in weeks. So 1mo goes to 1 (full reversal), 3mo to 2 and 6mo to 15 (near-full, one point above the floor), 12mo to 34 (one point, on the floor). The US has told mediators he will not lift the blockade — remain single-original-source, unnamed and unconfirmed on the record. They carry the real bearish punch, and they are deliberately excluded. A separate newsletter posing it as a hypothesis, and it is not used. **Live contrary evidence, weighed not buried:** Reuters (Sept 25–26, unnamed US official) reports the US in "positive, constructive discussions with Iran" and **COMMITTED BY ALEX, September 27, 2026, after his own manual review** — categorically required as a full weekly refresh; and independently warranted, since this pillar reversed its own call mid-cycle.

Sept 24 draft (score set 2026-09-24_draft) — WRITTEN BUT NEVER DELIVERED; SUPERSEDED above. It proposed 3/3/16/35/66 — 2/4/17/35/66 and its report edits claimed "COMMITTED · AUTO-STAMPED" **statement that "no new tanker incidents dated Sept 23-24 were found" was FALSIFIED** — a cargo vessel was struck in Hormuz on Sept 23 with two casualties. Its original text follows, uncorrected, so to be fair: the 2026-09-23 note scored the Witkoff/Kushner-Araghchi meeting held that same day but never mentioned the speech. That omission is logged here rather than quietly folded in. On record and much on the country than it ever was before ... or do I annihilate the Islamic Republic, and do it quickly?" — and then predicted the timing: "I believe we'll make a deal right after the election because it doesn't make sense to wait ~Dec 24) and 6mo windows. The one person with the authority to sign a deal has, on the record, put one past the near window and inside the next two — so 1mo goes 3→2 while 3mo goes 3→4 and 6mo goes 3→5. Sept 23 UNGA address (Washington Post, CNBC, ms.now — 3+ independent), lashing out at Trump by name, displaying photographs of schoolchildren killed in the war and of the assassinated supreme leader. The prediction says nothing about the multi-year strategic read. **Reported but explicitly NOT scored, per the sufficiency rule:** (a) *The National* reported Sept 23 that Iran presented the US with a "road map" for the headlines label it "report," because they are syndicating The National's single sourced account and the core fact rests on one unnamed source in one outlet. Wide pickup is not multi-sourcing; this pillar's track record database Sept 22 (Washington Post, Military.com, The Intercept — 3+ independent): an Army officer who died of a medical incident on a flight to Saudi Arabia. That is explicitly a **non-hostile** death and the fact that they were found, and no flip-line clause fires in either direction this cycle. **Stamp decision: AUTO-STAMPED** — ordinary light daily touch, research capability fully available, sourcing clears the sufficiency rule, v

Sept 23 LIGHT DAILY touch (score set 2026-09-23_draft), this version — the first upward re-rate on this pillar since Sept 13: two dated, well-corroborated diplomatic developments Sept 22, 2026 cleared a proposal was reportedly delivered to the US via mediators on Sept 16. Corroborated independently by 8+ outlets carrying the Reuters wire (Washington Times, Yahoo, US News, The Star, Israel Hayom, KFG, etc.). **Assessing sidelines in New York, Sept 22,** the first reported direct-channel US-Iran contact at this level since the war began. Trump called it "a very good meeting, a very productive meeting" with "a lot of good information" confirmation from Iranian state media of the Araghchi-Witkoff meeting itself — not a single-source claim. **Sized like the Sept 13 precedent** (a comparable announced-meeting cycle that moved P +2 on a flip-line deal; President Pezeshkian is in New York but will explicitly NOT meet Trump directly, so this remains a working-level channel; Sept 21 brought two more unattributed tanker/projectile incidents near Hormuz, but US demands are met is flagged, not used, per the sufficiency rule — as is a SINGLE-SOURCE Sept 23 report of new US sanctions on Iran airline service providers (no primary OFAC/Treasury confirmation, no independent corroboration). Context, not scored: Brent crude fell to ~\$99/bbl by Sept 22, a 5th straight down session and 2-week low (Bloomberg, CNBC, Rigzone, EnergyNow — multi-source, a market price); Saudi Arabia's East-West pipeline was used to justify, this re-rate. **P RE-RATED UP, modestly: 1mo 1→3, 3mo 1→3, 6mo 14→16, 12mo 33→35, 36mo held at 66** (a single diplomatic round, however well-corroborated, does not move the multi-year trend and the master FINAL NUMBER's call band did not flip (Neutral→Neutral equal-weight, Mild Bull→Mild Bull horizon-weighted) — so per the runbook's delegated daily auto-stamp authority, **this set is AUTO-STAMPED**).

Sept 19 FULL WEEKLY refresh (score set 2026-09-19_draft), prior version — a full independent primary-source research pass across all five windows, against the last committed baseline (2026-09-18_draft2, 7-13) urged the legal Article X process, Parliament Presidium spokesman Abbas Goudarzi said withdrawal "can easily" be done, and a bill was submitted for expedited consideration — but Iran's own Foreign Ministry said whether to "annihilate" the Iranian regime ahead of a Tuesday Sept 22 UN General Assembly sideline meeting with six Gulf-state leaders (Saudi Arabia, UAE, Qatar, Bahrain, Kuwait, Oman) — very well corroborated on the practical floor. **The Sept 22 meeting is flagged as this pillar's clearest near-term trigger to watch next cycle. The UN Security Council failed 11-2-2 on Sept 17 (Russia and China vetoing, Somalia/Pakistan abstaining). The dispute, not a new sanction or act of war. The Togo-flagged tanker "Trend" strike (Sept 17-18), which last cycle's targeted search could not corroborate, is now CONFIRMED via the IRGC's own statement (IRGC's campaign, not a new escalatory step, so it updates the record without moving P. Brent settled ~\$103.21/bbl Sept 18 (CNBC, Al Jazeera), down 1.5% day-over-day but still near multi-month highs — a market price. Time since July (Times of Israel liveblog) — a mixed signal; neither clears the bar. FM Araghchi said Iran and Oman "agreed a plan" to reopen the Strait (TASS, Caspianpost) but separately clarified the Omanis had degraded this cycle — full WebSearch access, 10+ independent outlets plus primary UN/IRGC statements reachable; WebFetch to arbitrary domains was blocked in this sandbox, relying on WebSearch summary. **size of the move (here, zero) — LEFT AS DRAFT: status draft, NOT stamped, flagged prominently for Alex's manual review.****

Sept 18 LIGHT DAILY touch (score set 2026-09-18_draft), prior cycle: two dated items were found and weighed. Trump told Axios Sept 17 he faces a "big decision" on whether to "annihilate" the Iranian regime (independent), but it is rhetoric about an undated future decision, and the near-term windows (1mo/3mo P=1) already price maximal active-war uncertainty, so it does not clear the bar for a further move. Sourcing: an outlet or primary (CENTCOM/IRGC) source — **treated as NOT FIRED / NOT USED**, the same house discipline this report has applied to every other uncorroborated single claim (e.g. the Aug 26 IRGC revenue report moved this cycle — see that report).

Prior cycle (Sept 17 light daily touch): re-checked — no new dated development beyond the Sept 9 IAEA referral and the Sept 12-13 NPT statement already priced. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 17, 2026.**

Sept 14 LIGHT DAILY touch (score set 2026-09-15_draft), this version — yesterday's up-move is retraced, because the meeting it rested on was called off: the Salalah ministerial never convened. Citing Washington Post, CNN, Gulf News and Malay Mail. Bahrain had ruled out attending, no GCC state had confirmed, and the UAE had downgraded its representation; Iran's MFA blames a Saudi request citing a market price, reported not scored. **P RE-RATED DOWN to 1/1/18/38/70** (1mo -2, 3mo -2, 6mo -2, 12mo -1, 36mo flat). This is an ordinary light daily touch, research access was full, and Step 6 verification of Bahraini attendance confirmed would re-fire the de-escalation read faster than it retraced.

Sept 13 LIGHT DAILY touch (score set 2026-09-13_draft), prior cycle — the first UPWARD re-rate on this pillar since August 6, now superseded by the postponement above: ONE sufficiency-clearing event **on Monday Sept 14 to discuss navigation through the Strait of Hormuz** — specifically safe and temporary commercial shipping routes, mine clearance, and short-term management of the waterway, but describing the gathering as an effort "to promote better understanding among the countries of the region and help strengthen shared regional security." Corroborated by 6+ independent outlets (Al Jazeera, etc.). **they are why this is +2 points and not a reversal:** (1) Bahrain announced Sept 12 it will NOT attend, so GCC participation is incomplete; (2) an Iranian official told the Jerusalem Post that NO signed Hornum agreement arguably institutionalises rather than lifts the blockade; (4) the kinetic war did not pause — on Sept 13 a commercial vessel was attacked near Qeshm Island inside Hormuz, killing one and wounding four (a confirmed continued trading strikes with Yemen's internationally recognised government over Bab al-Mandeb (Al Jazeera live blog, Sept 13). **Market corroboration, reported as a market price and NOT used to move the demand forecast.** **No flip-line clause fires in either direction.** The downside clauses already fired (direct US strikes on Iran proper, Aug 30; sustained Brent close above \$100, Sept 10-11) remain fired and are expected is not that. **P RE-RATED UP, modestly, to 3/3/19/39/70** (from 1/1/17/37/70) — 1mo +2, 3mo +2, 6mo +2, 12mo +2, 36mo held at 70 (one announced meeting does not move the multi-year strategic trend, light daily touch, research capability (WebSearch/WebFetch, primary sources) was fully available, no window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar, and verification of status committed, stamped by "Alex (auto-stamped)". The *direction* of the move does not change that test: the same rules that justified six weeks of downward re-rates justify this upward one.

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), prior version — still DRAFT, awaiting Alex's manual review: four parallel adversarial research passes ran across all four qualitative pillars of sufficiency-clearing new fact beyond the morning baseline: **Saudi Arabia's East-West Pipeline (Petroline) — its primary Hormuz-bypass oil-export route — was hit by drones launched from Iraqi territory** near Riyadh/Medina were struck, causing injuries and material damage, and said it would not retaliate for now at Baghdad's request; corroborated by 6+ independent outlets (Al Jazeera, CNBC, CNN, Times, etc.). **Attribution caveat:** no group has claimed responsibility, and the Saudi MFA statement attributes origin only to Iraqi territory, not to a directing state; President Trump, in Dublin, called Iran "probing" facilities in Erbil province — this is escalation within an existing theater, not a new one); the US-casualty clause does NOT fire (no confirmed US military casualty this cycle). The sustained-Brent-> \$100 clause is not used. Yemen (single-source as to substance, consistent with the already-logged MBS-refused-strikes counterweight), and the BRICS New Delhi summit's joint declaration (Sept 12, all members plus Saudi Arabia, etc.). NPR, Eurasia Review, Middle East Eye, ZeroHedge). **P RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70** (from 1/2/18/38/70) — 3mo/6mo/12mo -1 each, 36mo held, 1mo held at the near-floor 1. The stamp was applied. **This set is LEFT AS DRAFT: status draft, NOT stamped, flagged prominently for Alex's manual review.**

Sept 12 light daily catch-up (score set 2026-09-12_draft), prior cycle: the load-bearing development is that Houthi forces, an Iran-aligned proxy, have moved from "closing in on" to actual island-level operations, giving them Yemen's entire Red Sea coastline, and separately seized Mayyun (Perim) Island in the strait itself, with fighting continuing for Zuqar Island — confirmed by 6+ independent outlets (Al Jazeera, NPR, etc.). logged honestly. Separately, UKMTO's own Warning 133-26 confirms two more vessels struck near Khasab, Oman Sept 10 (one afire); an IRGC claim of a Sairdron strike is single-source and not used to move the trend, this is a severity escalation of an already-fired flip-line environment, not a new flip-line event, but is a bigger step than the routine daily grind. **P RE-RATED DOWN to 1/2/18/38/70** — 1mo held at the near-floor 1, widened delegated authority, neither the size of a move nor the severity of the underlying news is by itself a reason to withhold the stamp. **This set is AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)".**

Sept 11 light daily catch-up (score set 2026-09-11_draft), prior cycle: the load-bearing development is that this pillar's own **"sustained Brent close above \$100" flip-line clause has FIRED**. Brent end TradingEconomics, Vantage Markets, NAI500 — 4+ independent), and Brent was still ~\$104.36 midday Friday Sept 11, roughly 9% higher on the week despite a ~3% give-back. That is three consecutive ses 10 run logged ~\$101.25 as that Thursday's level — an intraday read, not the close. Second, fuller reporting landed on the Sept 9 shipping wave: Iran attacked 10 vessels near Hormuz (2 US-linked ships, 8 o clause does NOT fire; no further new state was struck, so the widening clause does not fire either. Logged but not used to move P: a single compilation putting Hormuz throughput at 7 transits Sept 9 vs a floor 1, 3mo 5→4, 6mo 22→20, 12mo 42→40, 36mo 72→71. **Auto-stamp decision:** this is an ordinary light daily touch, research access was full (WebSearch/WebFetch working, local quant refresh ran), and **committed, stamped by "Alex (auto-stamped)." Sept 10 light daily catch-up (score set 2026-09-10_draft), prior cycle: two new dated facts since the Sept 9 baseline. (1) CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike by corroborating Jordan's own military statement). Jordan is a repeat target (struck previously Aug 30-31), so the widening-to-a-further-new-state clause does NOT fire; CENTCOM/Jordan both confirm no cas rejected as uncorroborated against CENTCOM's own no-casualties statement). (2) Iran-aligned Houthi forces seized the Yemeni Red Sea port city of Mocha on Sept 10, closing in on control of the Bab el-M sufficiency bar. This is the same Houthi/Yemen actor and theater already priced (not a strike on a further new state), and no strait closure or shipping interdiction has actually been confirmed yet — outlets straight session (CNBC: Brent above \$101 Wednesday Sept 9 for the first time since May; TradingEconomics: ~\$101.25 Thursday Sept 10) — more persistent than Sept 9's single-day intraday cross, but still regional strike plus a new-but-same-actor Yemen/Red Sea territorial escalation, both intensifying the trend already priced without crossing any flip-line threshold. Cut applied to 3mo/6mo/12mo only (-1 point, sourcing clears the primary-source-plus-multi-outlet bar, and the master FINAL NUMBER's call band did not flip (Neutral→Neutral equal-weight, Mild Bull→Mild Bull horizon-weighted) — so per th

Sept 9 light daily catch-up (score set 2026-09-09_draft), prior cycle: CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship," centcom.mil) confirms U missiles TWICE over the preceding two days. Corroborated by 5+ independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org) in addition to CENTCOM's own release — clears the sufficiency the widening-to-a-new-state clause does not fire either; this is a repeat pattern, not a fresh category of event. Separately, Brent crude crossed \$100/bbl intraday today (Sept 9) for the first time since July 24 but a single-day intraday cross, not this pillar's own "sustained Brent >\$100" threshold, so it does not independently fire that clause either. Iran's Sept 6-7 SNSC "restricted zone" announcement remains in the Sept 6/8 cycles already priced, not a fresh flip-line event. **P RE-RATED DOWN, modestly: 1mo held at the near-floor 1, 3mo 7→6, 6mo 24→23, 12mo 44→43, 36mo 73→72.** No window moved mo **is AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."**

Sept 8 light daily catch-up (score set 2026-09-08_draft), prior cycle: Iran's SNSC secretary Mohsen Rezaei announced on-record (Iranian state TV, carried by Press TV and Tehran Times), Sept 6-7, that IR corridor agreement would be signed "in the coming days." Corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu Agency, Newsbytes, WFLA/Nexstar, GlobalSecurity.org) in addition to have yet to be announced," and no zone had actually been declared as of this cycle's research cutoff. None of this pillar's flip-line clauses independently fire: DCAS US KIA remains 18 (unchanged since Sept 87/3/2 on Sept 3) is a continuation of the already-priced trend, not scored separately. No permanent Iran-Oman corridor deal has been signed. **P RE-RATED DOWN, modestly: 1mo held at the near-floor 1, 3mo 7→6, 6mo 24→23, 12mo 44→43, 36mo 73→72.** No window moved mo (Neutral → Neutral) — so per the runbook's delegated daily auto-stamp authority, **this set is AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."**

Sept 6 light daily catch-up (score set 2026-09-06_draft), prior cycle: CENTCOM's own on-the-record press release (centcom.mil) now confirms the Sept 5 tanker strike this pillar had explicitly withheld from (permanently disabled near Jask), and M/T Kylo (completely destroyed in the Gulf of Oman) — in retaliation for the IRGC firing ballistic missiles at two US Navy warships (an aircraft carrier and a guided-missile cruiser) on the Sept 5 baseline explicitly withheld on, and reveals a direct, unprovoked IRGC missile attack on US Navy vessels rather than a quiet single-tanker interdiction. Separately, Sept 6 (today) brings further IRGC cycle. None of this pillar's flip-line clauses independently fire: DCAS still shows 18 confirmed US deaths (unchanged since Sept 4), Kharg Island/Jask/Gulf of Oman are all existing theater (not a new state), and more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar (CENTCOM's own release), and the master FINAL NUMBER's equal-weight call band did not flip (Neutral → Neutral, checked both again **stamped).**

Sept 3-5 re-check, held flat: Iran fired a second retaliatory wave Sept 3 on Ahmed al-Jaber AB (Kuwait) and Al Minhad AB (UAE) — a US official confirmed no US-manned facility was hit and no third night developments logged, NOT used to move P: (1) Reuters shared images/video with four independent weapons experts who concluded the Sept 1 Kuhestak wedding-party strike was likely a direct hit by a US missile; (2) VP Vance: "extremely skeptical," Sept 4, calling it under investigation), and the confirmation resolves attribution of an ALREADY-PRICED Sept 1-2 event rather than describing new escalation, independent Western multi-source confirmation as of this research pass, so per the sufficiency rule this single-narrative claim is NOT used to move P. WATCH NEXT CYCLE: if independently confirmed, this v ridge would trigger a "large-scale attack" on Israel; the IDF took the ridge Sept 3, but no such attack has been confirmed as of this run — a live pending trigger, not a fired one. **P HELD FLAT at - ★ ★ **THE CATALYST THAT IS NOW DEAD — Araghchi's seven-day plan, Sept 25.** Outside the UN Security Council, conveyed via Qatar: ~4–5 days of US steps (lift the blockade, waive oil sanctions). Araghchi added the US steps "are all already in the MOU." Real, well-sourced, and *refused* — which is why it ends up reversing the Sept 23 bump rather than extending it.
- **Why NOT a full reversal to the old 1/1/14/33/66 floor.** Two things are genuinely new since that floor, both on the record. **(1)** Trump paired the rejection with "I like making a deal too" and Pezeshkian offered on the record to readmit UN nuclear inspectors ("That is absolutely correct"), in a CBS excerpt released Sept 25 ahead of the Sunday Sept 27 broadcast — conditional on UN action.
- **STILL NOT SCORED, and this is where the rule bites hardest — the excluded claims are the *most bearish ones*.** The WSJ's other assertions — that Trump privately told aides he expects to resume negotiations — are circulating this cycle that *senior White House officials confirmed on record* they have "no intention of dismantling" the blockade was checked and **could not be found at all**; that exact phrasing is not merged.
- **LIVE CONTRARY EVIDENCE, weighed not buried:** Reuters (Sept 25–26, unnamed US official) has the US in "positive, constructive discussions with Iran through mediators" on the nuclear file. This pillar does not fall below its prior floor.
- ★ ★ **FALSIFIED — a cargo vessel WAS struck in Hormuz on Sept 23**, caught fire, lost control and drifted; crew evacuated; **two casualties**. **UKMTO did not specify killed or injured, so this remains unverified.** US service members, so the combat-death clause is untouched. ukmt0.org 403'd, so this is wire-derived rather than primary-verified.
- **CORRECTION to the Sept 23 committed set:** it called the Sept 22 contact the "first direct-channel" US–Iran contact. Witkoff's own account says the talks ran "through the mediators, who shared information."
- **Escalation on the other side of the ledger:** two Houthi salvos at Saudi Arabia (six ballistic missiles toward Taif and Yanbu on Sept 24; two missiles and two drones toward Khamis Mushait and Taif on Sept 25).
- ★ **A NEW STATE OF AFFAIRS this report had not recorded: no announced US strike on Iranian territory since Sept 1**, about 3.5 weeks — so the strikes clause that fired Aug 30 is now dormant.
- **Corrected market and shipping figures, all labelled as market prices or tracker data. Brent (these were FUTURES prints, and were wrongly captioned as the EIA spot series — corrected Sept 24 from 14 the day before, 10-day average 18, against ~125/day pre-war — a first research pass had put this at 7–13/day, which understated it, and is corrected.** An IMF PortWatch reading of 18.5 is also corrected.
- **Casualty-record corrections:** DCAS holds at **19** (11 hostile, 8 non-hostile). The 19th was **Capt. Bianca C. Wilkerson, posthumously promoted to major**, who died **Sept 18** of a cause **DCAS I** could not identify. Not enough material enough to need its own pass.
- **NOT SCORED, and it cuts against this cycle's own conclusion:** the WSJ reported Sept 25–26, citing unnamed US officials, that Trump **rejected** the seven-day plan and expects to resume negotiations. This pillar gives anonymous claims in the other direction. Also not scored: The National's 60-day road map (still single-original-source, and a different frame that is not merged with the seven-day plan).
- **Score decision: RE-RATED, window split, to 1/2/15/34/66** (–1/+2/+2/+1/0). **LEFT AS DRAFT, NOT AUTO-STAMPED** — full weekly refreshes are categorically excluded from delegated authority.
- **What would change my mind:** a *named* US official accepting or formally rejecting the seven-day plan would resolve the biggest ambiguity here in either direction; then a confirmed new US strike.

Carried forward — what changed in the September 23 light daily touch (2026-09-23_draft, committed, auto-stamped), for continuity:

- ★ ★ **NEW — a senior Iranian official told Reuters (Sept 22) Iran can reopen the Strait of Hormuz within 7 days if the US eases military pressure and lifts its naval blockade** — Tehran's IRNA.
- ★ ★ **NEW — US and Iranian officials (Witkoff/Kushner for the US, FM Araghchi for Iran) held a three-hour mediated meeting at the UN General Assembly sidelines in New York, Sept 22** — "in the very near future." Corroborated across 6+ independent outlets (Al Jazeera, Axios, The Hill, Times of Israel, New Arab, Al Arabiya) plus independent Iranian state-media confirmation of the meeting.
- **Counterweights, logged and sized in:** Iran's conditions remain steep and unmet (full blockade lift, release of ALL frozen assets, end to war on every named "resistance front"); Pezeshkian will not resume talks, and a single-source, unverified report of new US sanctions on Iran airline providers, are both flagged and NOT used.
- **Score decision: RE-RATED UP, modestly: 1mo 1–3, 3mo 1–3, 6mo 14–16, 12mo 33–35, 36mo held at 66.** No window moved more than 2 points; sourcing clears the primary-source-plus-one bar.

Carried forward — what changed in the September 22 light daily touch (2026-09-22_draft, committed, auto-stamped), for continuity:

- Not independently re-researched that cycle — a targeted single-pillar Fed & Macro follow-up (two regional Fed survey findings; see that pillar's report), not a fresh Iran War Risk research pass.
- **Score decision: HELD FLAT at 1/1/14/33/66.** Not re-researched that cycle (targeted single-pillar touch) — carried forward from the Sept 19 weekly review. AUTO-STAMPED alongside Fed & Macro.

Carried forward — the September 19 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 19, 2026 (score set **2026-09-19_draft**, DRAFT — awaiting Alex's manual review) — checking for changes since the 2026-09-18_draft committed baseline (1/1/14/33/66), via a full independent primary-source-plus-one search:

- **Iran's parliament continues moving toward, but has NOT enacted, NPT withdrawal.** A further 130-lawmaker statement (Sept 7-13) urged parliament to begin the legal Article X withdrawal process. The Ministry still calls it "still being prepared" (Iran International, Tehran Times, IranWire, APA.az, anews, Militarnyi, IFP News — corroborated but mostly Iran-linked/state-affiliated, the same treatment as the Sept 17 report).
- **Trump told Axios (Sept 17) he faces a "big decision" on whether to "annihilate" the Iranian regime**, ahead of a Tuesday Sept 22 UN General Assembly sideline meeting with six Gulf-state leaders. Rhetoric about an undated future decision, not an action — but **the Sept 22 meeting itself is now flagged as this pillar's clearest near-term trigger to watch next cycle.**
- **The UN Security Council failed 11-2-2 on Sept 17 to renew its panel of independent experts monitoring reimposed Iran sanctions**, Russia and China vetoing (Somalia/Pakistan abstain). Dispute over the 2025 "snapback" sanctions reimposition — institutional/procedural gridlock, ambiguous direction, not a new sanction or act of war. Does not move P.
- **CORROBORATION UPDATE, reverses last cycle's "not fired/not used" call, but is NOT used to move P:** the Togo-flagged tanker "Trend" strike in the Strait of Hormuz on Sept 17-18 is now confirmed. No spill; no CENTCOM confirmation or denial was found. This is a continuation of an already-months-long tanker campaign (the US struck three Iranian tankers Sept 1-5), not a new escalatory step.
- **MARKET PRICE, reported not scored:** Brent ~\$103.21/bbl Sept 18 (down 1.5% day-over-day but still near multi-month highs, having spiked toward \$109 in early September on tanker/energy market volatility).
- **Mixed proxy-front signal, neither clears the bar:** as of Sept 19, Iran has gone a ninth straight day without striking a "host state" (GlobalSecurity.org's OSINT day-by-day tracker) — a mild, but not clear, signal.
- **Diplomatic wash, not used:** Iranian FM Araghchi said Iran and Oman "agreed a plan" to reopen the Strait (TASS, Caspianpost) but separately clarified (Mehr News, corroborated by Samaa) that the plan is to "de-escalate tensions" and "not to use force."
- **Research capability:** full WebSearch available, no degradation. WebFetch to arbitrary domains was blocked in this sandbox (relied on WebSearch summaries, not direct fetches of full UN press releases).
- **Score decision: HELD FLAT at 1/1/14/33/66.** No window moved; nothing new cleared the sufficiency bar. This is a FULL WEEKLY refresh — full weekly refreshes are categorically excluded from delegated authority.

Rhetoric about an undated future decision, not an action — but **the Sept 22 meeting itself is now flagged as this pillar's clearest near-term trigger to watch next cycle.**
- **Checked and NOT USED — a claim that the IRGC struck a Togo-flagged tanker named "Trend" in the Strait of Hormuz Sept 18.** An initial general search surfaced the claim; a follow-up search found no evidence of a P move on it either way.
- **Score decision: HELD FLAT at 1/1/14/33/66.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

- ★ ★ **NEW — the IAEA Board of Governors voted Sept 9, 2026 to refer Iran's nuclear file to the UN Security Council** — a primary institutional escalation not previously priced by this pillar.

- **The Salalah ministerial remains postponed with no new date** — the fact that drove yesterday's re-rate down, unchanged. Al Jazeera (Sept 14) adds detail already consistent with what was consensus."

★ ★ **NEW** — the Salalah ministerial did not happen. Oman postponed it on Sunday, September 13, with no new date. PRIMARY: Oman News Agency — “It has been decided to postpone the Salalah ministerial until a later date.” (Sept 13-14). GULF NEWS: “Oman postpones Salalah ministerial.” (Sept 13-14). - ★ **Iran-aligned Houthi forces seized the Yemeni port of Mocha Sept 10, closing in on control of the Bab el-Mandeb Strait,** a second global chokepoint distinct from Hormuz (The Media Line).
- **Brent crude traded near/above \$100/bbl for a second straight session** (above \$101 Sept 9, ~\$101.25 Sept 10) — more persistent than Sept 9's intraday cross, but still short of a sustained cross.

Both Iranian missile attempts evaded, no US personnel harmed.
- **Brent crude crossed \$100/bbl intraday Sept 9 for the first time since July 24,** trading ~\$100.44 (+2.57%) on U.S.-Iran tit-for-tat strike fears (CNBC, ABC News) — the closest that cycle had come.

- **Sept 6's single-source IRGC claims of further strikes on 3 more tankers, 3 "US-linked" vessels, and a US naval drone** (Al Jazeera live blog, Euronews) remained US-unconfirmed — not used to move P.

- ★ ★ **NEW — Iran fired a second retaliatory wave Sept 3 on Kuwait and UAE, both REPEAT targets.** A US official confirmed no US-manned facility was hit; the widening-to-a-new-state clause was not used.
- ★ ★ **NEW — Sept 5: the Iranian-flagged NITC tanker STARK 1 reportedly hit by four missiles ~6nm off Kharg Island.** Iran's Tasnim (state media) makes the claim; Iran International (independent) confirmed or denied it. NOT used to move P per the sufficiency rule — WATCH NEXT CYCLE.

- ★ ★ **NEW — CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran, ~50x the scale of the Aug 30 strike.** IRGC air-defense sites, radar, mine-laying capability, comms.
- ★ ★ **NEW — for the first time in this war, the US struck Iranian government oil tankers directly (engine rooms),** under a newly reported "tanker for tanker" policy.
- ★ ★ **NEW, SINGLE-NARRATIVE-SOURCED at the core fact — a US strike reportedly hit a wedding party in Kuhestak, Hormozgan.** Hormozgan governor's office: 4 of at least 5 dead (incl. bride).
- ★ ★ **NEW — Iran's IRGC retaliated Sept 2 with coordinated strikes on FOUR countries at once: Jordan, Bahrain, Iraq, Kuwait.** All four are repeat targets — does NOT independently fire the widening-to-a-new-state clause.
- **NEW — Brent rose ~5% Tue Sept 1 (best session in 5 weeks) to ~\$95-96.6; WTI ~\$91-92** — still short of the \$100 flip line. Both sides now on-record threatening larger future action (Trump's tweet).

- ★ **President Trump said on-record Aug 31 he is still weighing further strikes on Iran,** calling it "a relatively little war for us" (CBS News, Breitbart, Yahoo) — not a de-escalation signal.
- **Brent continued higher into Sept 1 (~+2% Tuesday, multiple market-desk reports)** — second straight cycle of gains on this news thread; Jordan struck again Aug 30-31 but remained a repeat target.

Still "temporary" — Iran itself said Aug 26 the Strait "remains closed" pending US compliance. No fee terms disclosed.
- **NEW — two more Hormuz "unknown projectile" tanker incidents,** Aug 24 (off Oman, engine-room damage, disabled, no casualties, UKMTO) and Aug 27 (fire onboard, extinguished, crew safe).
- **NEW — CENTCOM commander Adm. Brad Cooper's on-record briefing, Aug 28:** Iranian sea mines cleared from the shipping lanes; ~1,500 vessels transited since blockade enforcement began.
- **NEW — IMO's six-month casualty count settles at 19-20 dead** across 68-70 incidents — the upper end of the prior 15-19 range.

- **Brent eased for a SECOND straight week:** ~\$88.24 (Aug 25) → ~\$89.13-89.3 (Aug 27) → ~\$88.29-90.55 (Aug 28), down from ~\$93-95 (Aug 20-21) — moving further from the \$100 flip line.
