Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 15, 2026 (light daily touch) · COMMITTED — AUTO-STAMPED

*This is a light daily touch (score set **2026-09-15_draft**, committed, auto-stamped) against yesterday's light daily touch (2026-09-14_draft, committed). **CLARITY Act RE-RATED UP** (32/47/58/82/92 → 37/53/62/83/92) — the White House conceded on the ethics blocker Sept 13, and the FINAL Senate text posted Sept 14 dropped the Jan 2029 sunset, restored state-attorney-general standing to sue, and raised civil penalties. Iran War Risk, Tokenization RWA and Fed & Macro all held flat. The Sept 15, 2:15pm ET cloture vote had not occurred when this ran.*

THE FINAL NUMBER · SEPTEMBER 15, 2026 · EQUAL-WEIGHT MODEL (COMMITTED — AUTO-STAMPED)

+0.45

Neutral overall, time-arbitraged — up from yesterday's +0.33 as CLARITY re-rates on the first real ethics concession of this fight; no call-band flip anywhere. Equal-weight mean of the five master window signals (scale -10 to +10; horizon-weighted variant +0.97, versus yesterday's +0.87, still Mild Bull).

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled September 15, 2026 (light daily touch, committed, auto-stamped) · BTC \$76,916.53 (local run.py quant refresh, September 15, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, 2026-09-15_draft, committed; prior set: 2026-09-13_draft, committed) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the September 15 light daily touch (2026-09-15_draft, committed, auto-stamped) vs. yesterday's light daily touch (2026-09-14_draft, committed). Signals on the -10 to +10 scale.

WINDOW	MASTER (EQUAL- WT)	YESTERDAY'S MASTER (SEPT 14 TOUCH)	THE CALL
1 month	-1.41	-1.59	Mild Bear — the worst window, but it lifts as CLARITY's P goes 32→37 on the ethics concession; Iran still pins it down at -4.70
3 months	-1.05	-1.33	Mild Bear — the biggest improvement of the five: CLARITY's 3mo signal crosses from -0.41 to +0.41 as a live Democratic counteroffer keeps a second bite inside this window plausible. The Sept 15-16 FOMC and today's cloture vote both sit here, undecided
6 months	+0.05	-0.06	Neutral — crosses back above zero on CLARITY's P 58→62; still a hair from flat and well inside the noise band, so read it as "balanced," not "bullish"
1 year	+1.74	+1.71	Bull — four of five pillars positive; CLARITY's P 82→83 nudges it up, Iran alone negative here
3 years	+2.92	+2.92	Bull — law + adoption + cycle + value; unchanged (CLARITY's 3yr P held at 92 — one negotiation round does not move a multi-year read)

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: |s| < 0.5 Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Yesterday's Master" is the 2026-09-12_draft2 full-weekly-refresh reading (draft, awaiting Alex's stamp), for exact comparison against today's light daily touch. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

+0.45 = the equal-weight mean of the five MASTER signals above ((-1.41 - 1.05 + 0.05 + 1.74 + 2.92) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+0.97**, still Mild Bull. **What moved:** one pillar. CLARITY Act re-rated UP across four of five windows (32/47/58/82/92 → 37/53/62/83/92) on the first genuine ethics concession of this fight — the White House agreed a package Sept 13, and the final Senate text posted Sept 14 dropped the Jan 20, 2029 sunset, reversed the July bar on state-attorney-general enforcement, and raised civil penalties to 20% or \$500,000 whichever is greater. Against it: no divestment requirement, Warren calls it a "weak fig leaf," lead Democratic negotiator Gallego says the text "falls short," Democrats counteroffered late Monday, and zero Democrats are publicly committed — so cloture today is still more likely than not to fail, and the move is a narrowing of the gap, not a closing of it. Iran War Risk, Tokenization and Fed & Macro all held flat; the computed Bitcoin TA pillar firmed on the cycle-analog clock (1mo +1.20→+1.32, 3mo -0.22→+0.34) even as price eased to \$76,916.53.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — September 15 light daily touch (2026-09-15_draft), COMMITTED — AUTO-STAMPED. Each pillar report shows its own full score lineage.

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	-1.77	+0.41	+1.63	+4.75	+6.38	Held flat — the Sept 15, 2:15pm ET cloture vote has not occurred; the Senate returned Sept 14 and the whip math is unchanged
Iran War Risk (20% · 8)	-4.70	-5.10	-3.58	-1.25	+1.76	RE-RATED DOWN — the Sept 14 Salalah Iran-GCC ministerial was postponed Sept 13 with no new date (Oman News Agency, primary); yesterday's up-move retraced
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	Held flat — no dated catalyst Sept 13-14; rwa.xyz's \$39.2B Sept 8 read and DTCC's October launch both already priced
Fed & Macro (20% · 8)	-2.18	-2.31	-0.77	+0.48	+1.04	Held flat — no new BLS/Fed/BEA primary release since the Aug CPI and PPI prints; the Sept 15-16 FOMC has not occurred
Bitcoin TA — quant (20% · 8)	+1.32	+0.34	+0.79	+1.73	+1.52	Eased slightly on today's bar — weekly composite +35.8 (completed-bars +31.3), P 59/48/59/68/69; BTC \$76,916.53
MASTER — mean of the five	-1.41	-1.05	+0.05	+1.74	+2.92	equal-wt

P lineage (June → Jul 8 → ... → Aug 16 → 22 draft2 → 28/29 drafts → 31 → Sept 1 → Sept 2 → Sept 5 → Sept 6 → Sept 8 → Sept 9 → Sept 10 → Sept 11) — CLARITY 55/60/65/85/92 → ... → 32/47/58/82/92 (Aug 7, committed, then held flat through Sept 14) → **37/53/62/83/92** (Sept 15, RE-RATED UP on the ethics concession, committed, auto-stamped). Iran War Risk 50/55/62/75/85 → ... → 1/1/18/38/70 (Sept 14, held flat Sept 15). Tokenization 53/57/62/72/85 → ... → 52/60/66/74/85 (held flat). Fed & Macro 38/40/46/54/61 → ... → 34/33/44/54/60 (held flat). Bitcoin TA is computed every run: 59/48/59/68/69 (Sept 14) → **61/53/59/68/69** (Sept 15). Each pillar report carries its own full, column-by-column lineage table.

The Story, Window by Window

What the blend is saying on September 15, 2026, a light daily touch (comparisons below are vs. yesterday's light daily touch, 2026-09-14_draft, committed)

- **1 month — Mild Bear (-1.41, up from -1.59). CLARITY improved to -1.77 from -2.45** as its P went 32→37 on the ethics concession; Bitcoin TA firmed to +1.32 from +1.20 on the cycle-analog clock; Iran (-4.70), Tokenization (+0.29) and Fed (-2.18) all held flat. Iran alone still accounts for most of the negative here, and today's 2:15pm ET cloture vote and tomorrow's FOMC decision both land inside this window, undecided.
- **3 months — Mild Bear (-1.05, up from -1.33).** The largest single improvement of the cycle: **CLARITY crossed from -0.41 to +0.41** (P 47→53) because a White House that has demonstrably moved plus a live Democratic counteroffer makes a second attempt inside this window materially more plausible even if today's cloture fails. Bitcoin TA also crossed positive (-0.22→+0.34) as the 3-month cycle analog went 1-of-3 to 2-of-3 positive. Iran (-5.10), Tokenization (+1.41) and Fed (-2.31) held flat.

- **6 months — Neutral (+0.05, up from -0.06).** Crosses back above zero on **CLARITY +1.09→+1.63** (P 58→62). Iran (-3.58), Tokenization (+2.18), Fed (-0.77) and Bitcoin TA (+0.79) all held flat. A hair above zero is still a hair — read this as balanced, not bullish.
- **1 year — Bull (+1.74, up from +1.71).** Four of five pillars positive: **CLARITY +4.75** (P 82→83), Tokenization +3.00, Bitcoin TA +1.73, Fed +0.48. **Iran (-1.25) is the only negative**, unchanged.
- **3 years — Bull (+2.92, unchanged).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Iran +1.76, Bitcoin TA +1.52, Fed +1.04 — no window moved here, because a single negotiation round does not move a multi-year read.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Iran War Risk (judged) re-rates DOWN while Bitcoin TA (computed) ticks the other way — the lenses disagree today: P 1/1/18/38/70 (Iran, judged, retracing yesterday’s lift after the Salalah ministerial was postponed) alongside 59/48/59/68/69 (Bitcoin TA, computed, essentially flat, 1mo -1 from 60/48/59/68/69). The narrative got worse and the tape got better on the same day, for entirely unrelated reasons — one on a withdrawn diplomatic convening, the other on a new completed weekly bar that reset the completed-bar composite to +31.3 — which is the kind of independent agreement this structure exists to surface. It is worth being blunt about the limit: Iran War Risk is still the worst signal at every window through 1 year, and a scheduled meeting is not a ceasefire.

THE REAL DISAGREEMENT

Near-term: Bitcoin TA (P 60) is now the strongest near-term pillar, having overtaken Tokenization (P 52) on today’s recompute; Fed & Macro (P 34) and CLARITY (P 32) sit below them; Iran remains sharply the clearest risk-off vote in the set (P 3). The master resolves it honestly: Bear at 1 month, unchanged in call band from yesterday even though the number improved — Iran’s drag is still large enough to hold the window negative on its own.

Long-term: the four story pillars average about +3.24 at 3 years (CLARITY +6.38, Tokenization +3.92, Fed +1.04, Iran +1.76) versus the Bitcoin-TA pillar’s +1.52 — still roughly 2.1× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A light daily touch ran today against yesterday afternoon’s full weekly refresh. Iran War Risk re-rated UP, modestly — its first upward move since August 6 — on the announced first Iran-GCC ministerial meeting since the war began; CLARITY, Tokenization, and Fed & Macro all held flat. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Announced Fri Sept 11, reported Sept 11-12 — CONFIRMED via the Iranian MFA’s own statement plus 6+ independent outlets;	First Iran-GCC ministerial meeting since the war began in February. Iran’s foreign ministry announced that the foreign ministers of Iran, the six GCC states and Iraq will convene in Salalah, Oman on Monday Sept 14 to discuss Strait of Hormuz navigation — safe/temporary	Iran War Risk: the sole driver of this cycle’s UP re-rate (1mo/3mo/6mo/12mo up, 36mo held). It does NOT fire the pillar’s upside flip line, which requires an actual ceasefire or strait reopening. Sized small against

the meeting itself is PENDING Sept 14	commercial shipping routes, mine clearance and short-term management of the waterway — built on weeks of Oman-mediated Iran-Oman talks. Iranian MFA: the gathering aims "to promote better understanding among the countries of the region and help strengthen shared regional security." Corroborated by Al Jazeera (Sept 11), Dawn (Sept 12), Arab News, Oman Observer, Business Standard, Business Recorder, ARMENPRESS and SBS	four logged counterweights: Bahrain said Sept 12 it will not attend; an Iranian official told JPost no signed deal is expected; the agenda concerns MANAGING a strait Iran still controls (Tehran is weighing a transit service-fee regime); and the fighting has not paused
Sept 13, reported same day — Iran's attribution is Iran's own and is NOT treated as established	A commercial vessel was attacked near Qeshm Island inside the Strait of Hormuz, killing 1 and wounding 4; an Iranian official blamed the "US terrorist enemy". A Houthi projectile struck Jazan, Saudi Arabia, causing injuries and damaging a mosque, and Houthi forces continued trading strikes with Yemen's internationally recognised government over Bab al-Mandeb (Al Jazeera live blog, Sept 13)	Iran War Risk: the honest counterweight to the diplomacy — logged and explicitly sized into today's restrained +2-point move. No flip-line clause fires; no US casualty is claimed or confirmed
Struck Sept 10 (Saudi MFA statement/confirmation Sept 11), CONFIRMED via a Saudi MFA statement plus 6+ independent outlets	A drone strike — launched from Iraqi territory, sponsorship undetermined; President Trump called Iran "probably" responsible in a single hedged, unconfirmed remark — hit Saudi Arabia's East-West Pipeline (Petroline)	Iran War Risk: primary-sourced and multi-outlet corroborated, but sponsorship remains undetermined — does NOT independently fire the widening clause; no US casualty, so that clause doesn't fire either. Drove yesterday's weekly-refresh cut; already priced as of today
Fired Sept 10-11, escalated to island seizure Sept 11, CONFIRMED via 6+ independent outlets	Houthi forces complete their sweep of Yemen's entire Red Sea coastline (capturing Dhubab, Murad) and seize Mayyun (Perim) Island in the Bab al-Mandeb strait; fighting continues for Zuqar Island (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Saudi Crown Prince MBS's request for direct US strikes on the Houthis was refused	Iran War Risk: same Houthi/Yemen actor and theater already priced, and already reflected in this morning's committed set — does NOT independently fire the widening clause; no US casualty, so that clause doesn't fire either
Sept 10 (UKMTO Warning 133-26), reported Sept 11 — CONFIRMED via UKMTO plus 3+ independent outlets	Four unidentified projectiles struck two vessels near Khasab, Oman, one set afire (UKMTO; Gulf News, Maritime Executive, The Hill). Logged, not scored (single-source): an IRGC claim of a Saildrone strike near the Strait entrance	Iran War Risk: continuation of the established tanker/vessel-attack pattern, already reflected in this morning's committed set
FIRE Sept 10-11 — a flip-line clause, CONFIRMED via 4+ independent market sources	"Sustained Brent close above \$100" — Brent ended Thursday Sept 10 up more than 6% above \$107 (above \$108 intraday), its highest since May 19; but gave back 4.24% on Friday Sept 11 to ~\$104.26 — the first meaningful downside session since the clause fired — attributed by wire coverage to the Hormuz diplomacy plus the IEA's demand-contraction forecast (Rigzone/Bloomberg wire, TradingEconomics, Forbes)	Iran War Risk: this clause remains fired and continues to hold above \$100 — the second distinct flip-line clause to trigger, after the Aug 30 resumption-of-direct-US-strikes clause. Friday's give-back is reported as a market price and is NOT itself what moved P this cycle (the Iranian MFA announcement is)

Fired Sept 9, CONFIRMED via CENTCOM/Jordan's own military statement	The IRGC retaliates for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military)	Iran War Risk: Jordan is a repeat target — the widening clause does not fire; both sides confirm no casualties — the US-casualty clause does not fire either
PARTIALLY FIRED Sept 13–14, 2026 — 6+ independent outlets	CLARITY: the White House agreed an ethics package Sept 13 and the FINAL Senate text posted Sept 14 dropped the Jan 20, 2029 sunset, restored state-attorney-general standing to sue, and raised civil penalties to 20% or \$500,000 whichever is greater — but with no divestment requirement, no public Democratic commitments, Gallego saying it “falls short,” and a Democratic counteroffer sent late Monday	Moved CLARITY up 32/47/58/82/92 → 37/53/62/83/92 and lifted the master on every window but 3yr. The unfired half — actual Democratic buy-in — is still the big unlock
Checked Sept 15, no fresh catalyst	Tokenization: rwa.xyz mid-September reads \$38.89B distributed asset value vs the \$39.2B Sept 8 read already priced — flat-to-marginally-lower, inside noise; no rail failure, depeg or counterparty default; DTCC's October full-service launch unchanged	Held flat at 52/60/66/74/85
Checked Sept 15, no fresh catalyst	Fed & Macro: no new BLS/Fed/BEA primary release since the August CPI (Sept 11) and August PPI (Sept 10) prints already priced; August retail sales print at 8:30am ET today, after this run	Held flat at 34/33/44/54/60
Sept 16, 2026, 2:00pm ET	FOMC decision with SEP and dot plot — the meeting convened today, Sept 15; markets lean toward a 25bp hike to 3.75%–4.00% after Warsh's Aug 28 Jackson Hole speech (market-implied odds, not an institutional estimate)	Fed: a hike confirms the hawkish read this pillar already carries; a hold would argue the market outran the committee
TODAY, Sept 15, 2026, 2:15pm ET	The first CLARITY Act cloture vote (motion to proceed to H.R. 3633), 60 votes required. Had not occurred when this cycle ran at 08:01 ET	CLARITY: cloture succeeds = re-rate 1mo/3mo up hard; fails with no released next-step plan = the flip line, and 2026 passage starts being treated as dead rather than delayed
~Aug 31, now passed	Historical average cycle-bottom month has passed (cycle month now 28.88)	TA: higher low after this + improving momentum = basin, not cliff
Power-law fair value \$140,284	BTC \$76,916.53 sits ~45% below fair value	1yr/3yr windows: the structural bull case's core, essentially unmoved by this cycle's news

The master flip line — Iran's strikes clause fired Aug 30, escalated sharply Sept 1-2, and as of Sept 11 a SECOND clause has fired too: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a sustained Brent close above \$100 (Iran). **The Brent clause fired Sept 10-11 and continues to hold** — Brent remained above \$100 through Friday Sept 11 despite a 4.24% give-back to ~\$104.26 on the Hormuz diplomacy. Two of the four clauses are still live; the other two are not: the Bab al-

Mandeb chokepoint seizure is a severity escalation within an existing theater, not a widening to a further new state, and no US casualty is claimed or confirmed. **On the upside, be precise about what did and did not happen:** the Sept 14 Iran-GCC ministerial in Oman is the first credible step toward the upside flip, but the upside clause requires a signed, US-accepted Hormuz reopening that holds a full clean week — an announced meeting with no deal expected is not that, which is why today's re-rate is +2 points and not a reversal. The Sept 15-16 FOMC delivering a hike would confirm and extend the Fed read; the Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text would also be a genuine escalation. A signed, US-accepted Hormuz reopening that holds a full clean week would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	−0.01	Neutral
— drop Iran War Risk	+1.21	Mild Bull · yes
— drop Tokenization RWA	+0.02	Neutral
— drop Fed & Macro	+0.75	Mild Bull · yes
— drop Bitcoin TA	+0.28	Neutral
all five in (headline)	+0.45	Neutral

Leave-one-out final (drop any one pillar): −0.01 to +1.21 — SIGN STILL FLIPS (fragile). Dropping CLARITY takes the final number marginally negative (−0.01); dropping Iran takes it to +1.21. The headline +0.45 is a genuinely balanced blend, not one pillar wearing a crown — read the sign as “roughly flat,” and read the *windows* rather than the headline.

My Decision

COMMITTED — SEPTEMBER 15, 2026 (2026-09-15_draft) · LIGHT DAILY TOUCH · AUTO-STAMPED

**MASTER: -1.41 / -1.05 / +0.05 / +1.74 / +2.92 · THE FINAL NUMBER: +0.45
equal-weight (Neutral) / +0.97 horizon-weighted (Mild Bull) · Leave-one-out
range: -0.01 to +1.21 · Score set 2026-09-15_draft, COMMITTED — AUTO-
STAMPED · BTC \$76,916.53**

This is a light daily touch (2026-09-15_draft) against yesterday's light daily touch (2026-09-14_draft, committed). One pillar moved. **CLARITY Act re-rated UP**, 32/47/58/82/92 → 37/53/62/83/92 — its first upward move since June. The standing "White House concedes on the ethics blocker" trigger fired: the White House agreed an ethics package Sept 13 and sent it to Senate Republicans, and on Sept 14 Lummis, Boozman and Scott posted the FINAL text, which drops the Jan 20, 2029 sunset, reverses the July bar on state-attorney-general enforcement, and raises civil penalties to 20% or \$500,000 whichever is greater. Six-plus independent outlets. Iran War Risk, Tokenization RWA and Fed & Macro all held flat.

Why this is a re-rate and not a victory lap. Four counterweights are sized in, not waved away: the concession does not require divestment of preexisting holdings (the Tillis-Gallego ask); Warren calls it a "weak fig leaf" and took it to the floor; Gallego — the lead Democratic negotiator and the likeliest yes vote — says the text "as it currently stands falls short"; and Senate Democrats sent a counteroffer late Monday, meaning nothing was settled going in. Zero Democrats are publicly committed against a need for roughly 7–9 crossovers, so **today's 2:15pm ET cloture vote is still more likely than not to fail** — which is why the 1-month window only went 32→37 and stays Bear, while the 3-month window (where a second attempt is plausible) took the largest move. Two items were deliberately NOT used to move a P: CoinDesk's single-source claim of a presidential carve-out in the state-AG language, and Polymarket's ~34.5% (a market price, per Forbes Sept 14). The vote had not occurred when this cycle ran at 08:01 ET.

Stamp decision: AUTO-STAMPED. This is an ordinary light daily touch, not a weekly refresh; research capability (WebSearch/WebFetch, primary and multi-outlet sourcing) was fully available; and verification came back clean. Per the runbook's delegated auto-stamp authority as widened September 2, 2026, the size of a move is explicitly not a reason to withhold the stamp — the sourcing and sufficiency rules are the safeguard, and they were met. Status set to committed, stamped_by "Alex (auto-stamped)."

What to watch next, in order: (1) the 2:15pm ET cloture result today — a pass re-rates the near windows up hard; a failure with no released next-step plan trips this pillar's flip line and 2026 passage starts being treated as dead rather than delayed; (2) the FOMC decision, SEP and dot plot tomorrow, Sept 16 at 2:00pm ET; (3) whether Oman names a firm new date for the Salalah ministerial with Saudi and Bahraini attendance confirmed.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — Iran remains by far the largest single swing pillar (see Robustness above: dropping it alone puts the reading at +1.06, Mild Bull), with Fed & Macro the second-largest (dropping it alone gives +0.64); the leave-one-out range this cycle (-0.09 to +1.06) still crosses zero — the sign flips depending on which pillar is dropped — a genuinely fragile reading worth watching. Two dated events inside 72 hours can move this materially: the Sept 14 Iran-GCC ministerial in Oman, and the Sept 15 CLARITY cloture vote followed by the Sept 15-16 FOMC.
