The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

*Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**; the Aug 5 catch-up (held flat) was reviewed and stamped committed. **This version (August 6) is another light daily touch** — still no cloture motion filed, "just two days left in session" per today's coverage. The score held flat again at 38/47/58/82/92. A recirculating "White House agrees on CLARITY ethics package" story was traced via direct fetch to its actual publish date — July 20-21, 2026 — and correctly excluded as stale, not new. This version carries **DRAFT** scores awaiting my stamp.*

The Scores — Committed vs. Drafts

June column committed by me June 12, 2026. Every draft since is shown for full lineage — nothing collapses until I commit a newer set. Aug 5 (held flat) committed and stamped by Alex. Aug 6 is today's light daily touch — held flat again.

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. Held flat again: as of Aug 6, "just two days left in session" and still no cloture motion filed (CoinGape, CryptoSlate, CoinDesk, Cryptonews, Bitcoin Foundation, Yahoo Finance). A recirculating story — "White House agrees on CLARITY ethics package," sourced from Bravenewcoin and CryptoBriefing headlines that resurfaced in today's search — was traced via direct fetch to its actual publish date, July 20-21, 2026, well before the current baseline. It is not new and was not used to move P. Advancing the bill still requires 60 votes, meaning roughly seven Democrats crossing over — unchanged. Long-term still high — even the bears argue "slips past the midterms," not "dies."

Quality — how trustworthy the evidence is. Each daily check this week cross-referenced multiple independent outlets against the Senate's own published schedule rather than relying on any single leadership quote or press summary. Quality itself is unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of August 6, 2026, and where I differ from the consensus — another day of no material change

The crowd: spent the week watching the same clock I was — Polymarket's "signed in 2026" contract sat around 30-31% all week (a live Aug 3 pull showed ~31%, within noise of the Jul 30 read), and coverage (CoinGape, KuCoin, crypto.news, CryptoSlate, Bitcoin Foundation) consistently framed Aug 3-7 as the last realistic pre-recess window. Nothing new broke the deadlock: no cloture motion, no released ethics text, no White House sign-off.

Me: holding at 38% for the next month — my lowest read, unchanged from Jul 31 — because five straight days of checking the Senate's own floor schedule found nothing to move it. I'm not cutting further because the underlying Tillis-Gallego negotiating track hasn't collapsed either; it's simply been quiet, and quiet isn't the same as dead.

My edge: unchanged since June — the crowd keeps pricing a *timing* problem like a *death* problem. The House did its half a year ago (294-134). This week's one genuine finding was procedural, not substantive: this report's own prior notes had the recess date wrong (Aug 7 instead of the actual Aug 10), which I've corrected here without changing the score — the substantive picture (bill still unfiled, still no ethics text) is unchanged either way.

The Facts

As of August 6, 2026 — hard numbers only, sources on the last page. New Aug 6 facts appear first; the Jul 30-Aug 5 facts below are carried forward unchanged (still load-bearing).

- ★ **Aug 6 — still no cloture motion filed.** Coverage (CoinGape, CryptoSlate, CoinDesk "here are the possible outcomes for CLARITY right now," Cryptonews, Yahoo Finance, Bitcoin Foundation) describes "just two days left in session" with no official word on whether or when the Senate will act.
- ★ **Aug 6 — a recirculating "White House ethics deal" story traced and excluded as stale.** Headlines like "White House Signs Off on CLARITY Act Ethics Deal" and "White House agrees on ethics package for Clarity Act, sent to Senate Republicans" resurfaced in search results; direct fetch of the source articles (Bravenewcoin, CryptoBriefing) confirmed publish dates of July 20-21, 2026 — weeks before the current baseline, describing the same ethics-negotiation track already reflected (and later complicated) in this pillar's July history. Not used to move P.
- **Aug 6 — advancing the bill still requires roughly seven Democratic crossover votes** to reach the 60-vote cloture threshold, per Cryptonews/Yahoo Finance reporting — unchanged from the standing vote-count picture.
- **Checked daily Jul 31 - Aug 5: no cloture motion filed.** Multiple outlets (CoinGape's live-updates series, KuCoin, crypto.news, CryptoSlate, Bitcoin Foundation) consistently reported the bill absent from the Senate's cloture calendar all week.
- ★ **Aug 5 was the ordinary filing deadline for a cloture petition** that could produce a Friday Aug 7 vote on the motion to proceed — that vote alone would not pass CLARITY, only end debate on taking it up. As of this check, no petition had been filed.
- ★ **Correction: the Senate's actual August recess begins Aug 10, not Aug 7.** Roll Call, Federal News Network, and Senate-calendar coverage confirm the formal recess start date; earlier versions of this report conflated it with the "last realistic floor-time window" framing used in CLARITY-specific coverage. This is a factual correction only — it does not change the substantive picture (bill still unfiled, no ethics text released).
- **Aug 3, 2026 — Senate's floor plan (5:30pm roll-call vote) covered only cloture on the H.R. 6500 CR vehicle,** with no floor time allocated to CLARITY (Yahoo Finance, Bitcoin.com, KuCoin, CryptoSlate, Spendnode).
- **Polymarket "signed in 2026" held in a narrow band all week** — a live pull Aug 3 showed ~31%, essentially flat vs. the ~30% used in the Jul 30/31 baseline.
- **No new Tillis-Gallego ethics-text release or White House sign-off found this week.** The negotiating track from late July has neither advanced nor collapsed on the record.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows Jul 28's time went to a memorial ceremony for the late Sen. Lindsey Graham plus an executive-calendar nominee vote, and Jul 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source confirmation of "no floor time" than any leadership quote — and confirms no path to passage before the Aug 7 recess.
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground on an ethics compromise (Jul 29-30). The exact text is undisclosed and White House sign-off is unconfirmed — CoinDesk's own reporting hedges "whether they've actually

done it is unclear," and neither senator's office nor the White House responded to comment requests. Treat as real movement, not a completed deal.

- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and then rejected Jul 30 by both the White House (adviser Patrick Witt mocking the comparison) and the crypto industry (DeFi Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to issue crypto market-structure rules on its own, while still calling statute the preferred, "future-proof" path. A modest reducer of legislative urgency — noted, not scored.
- **Odds board (*sentiment only*) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, Jul 30) — down from the ~35% read a week ago. Galaxy Research's Alex Thorn cut his personal 2026-passage estimate from 50% to 30% — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-counted here.
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics language. Firmly committed Democratic votes: zero.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor math" inference (which was already corrected in an earlier cycle: his SC seat was refilled within 48 hours, GOP floor count restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since — carried forward as the binding constraint, now potentially loosening.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ WLFI-related. Gillibrand: "*there is no CLARITY Act without an ethics provision.*"
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the floor; Coinbase's ~\$1.35B/yr USDC-rewards structure survives in the text as-is.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House fast-follow plan (companion bill, Rep. Dusty Johnson) unchanged.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$64,507.23** (Bitstamp daily close, August 6, 2026). A **GENIUS-sized move (~40–47%)** from here $\approx$ **~\$90–95K**. A retest of the ~\$125K high $\approx$ **+93%**. The anchor is real: during the GENIUS Act's passage (Senate committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K ($\approx$ +44%).

Discount both — 2025 had tailwinds 2026 doesn't, and **the GENIUS rally itself fully retraced**. And note the coil cuts both ways: prediction-market odds have settled in a narrow band (~30-31%) since the Jul 29 record-low print of 27% — a real repricing from the ~74-82% readings earlier in 2026, holding steady rather than recovering further this week. The Prize doesn't feed the math — it tells you what the lean is worth acting on.

The Other Side

The strongest honest case this is wrong

- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have actually reached an agreement. This report is giving

real weight (an 8-point 6mo improvement from the Jul 18 low) to something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.

- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows, new disputes keep appearing — a pattern, not a one-off.
- **The floor-calendar problem doesn't have an end date either.** "No path before Aug 7" is now confirmed, but this report's own history is repeated rounds of missed "imminent" and "targeted" dates — nothing guarantees September is any less crowded (a revived NDAA, appropriations, other priorities).
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped from 50% to 30% independent of any single news event, suggesting professional handicappers see this as a genuine coin-toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency.** If the White House and industry believe the SEC can deliver workable rules unilaterally, that reduces the political cost of letting CLARITY slip further — a slow bleed on legislative priority, not a dramatic kill.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set August 6, 2026.

DATE	EVENT	MEANS
Checked Aug 6 — CONFIRMED, no motion filed	Still no cloture motion filed; "just two days left in session" per today's coverage	Keeps the 1mo score at its lowest read (38) — the window keeps closing with nothing filed
Checked Aug 6 — excluded as stale	A recirculating "White House CLARITY ethics deal" story traced to its actual July 20-21 publish date	Not used to move P — a reminder to re-verify dates on recirculating headlines
Aug 7	PENDING — possible procedural vote on the motion to proceed (not final passage), if a cloture motion is filed in time	A filed motion = the process is at least alive; the window closing with nothing filed = re-rate down further
Aug 10	PENDING — Senate's actual formal August recess begins (corrected from the Aug 7 date assumed in prior versions of this report)	No pre-recess vote = September collides with the midterms — 2027 becomes the base case for signing
Unresolved since Jul 30	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed	If confirmed and signed off, the single biggest unlock this year — watch for a released text
September	PENDING — first realistic floor-time window post-recess, contingent on Tillis-Gallego text and WH sign-off landing over the break	A released, WH-blessed ethics text over recess = re-rate 3/6mo up sharply; continued silence = re-rate down
Any time	NOT FIRED — White House formally signs off on a merged text with Democratic buy-in	The single biggest unlock — Democratic votes follow; re-rate everything up

The flip line: no released, WH-confirmed ethics text by the time the Senate returns from the Aug 10 recess = start treating 2026 passage as effectively dead, not just delayed. Keep 1-year and 3-year Bull either way — a bill with 294 House votes, a reported bipartisan ethics counteroffer, and only one unresolved variable is delayed, not dead.

My Decision

🕒 **UPDATED DRAFT — AUGUST 6, 2026 (LIGHT DAILY TOUCH) · AWAITING MY STAMP**

Draft P: 38 / 47 / 58 / 82 / 92 · Weight: 20% (equal) · Impact: 8 (uniform)

Another day of checking the Senate's own floor schedule found no cloture motion filed. The score held flat at 38/47/58/82/92. Today's one finding was a correction, not a re-rate: a recirculating "White House agrees on CLARITY ethics deal" story traced via direct fetch to its actual July 20-21 publish date and was excluded as stale, not new. 1-year and 3-year hold — nothing today changes the structural, multi-year read.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026) remain the last human-stamped values.

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

Light daily touch, August 6, 2026, on the Aug 5 committed set.

- ★ **Still no cloture motion filed as of Aug 6**, confirmed against multiple outlets (CoinGape, CryptoSlate, CoinDesk, Cryptonews, Yahoo Finance, Bitcoin Foundation) — "just two days left in session."
- ★ **Traced and excluded a stale story**: a recirculating "White House agrees on CLARITY ethics package" headline (Bravenewcoin, CryptoBriefing) was fetched directly and confirmed dated July 20-21, 2026 — not new, not used.
- ★ **Corrected an internal date error**: the Senate's actual formal recess begins Aug 10, not Aug 7 as prior versions of this report assumed. Not score-moving.
- **Aug 3 — Senate's floor plan covered only cloture on the H.R. 6500 CR vehicle**, no CLARITY floor time allocated.
- **Polymarket "signed in 2026" held in a narrow ~30-31% band all week** — essentially flat, no fresh move.
- **Score re-rates (Jul 30 full refresh → Jul 31 → Aug 1-5, committed → Aug 6)**: 1-month 40 → **38** (held Aug 1-6) · 3-month 47 → **47** (held throughout) · 6-month 58 → **58** (held) · 1-year 82 → **82** (held) · 3-year 92 → **92** (held) — one real move (Jul 31's 1mo trim) followed by six straight days with nothing to change. Draft, awaiting my stamp.
