Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 6, 2026 (light daily touch on the Aug 5 committed set)

Quant pillar recomputed on today's price. Two pillars moved today, both on genuine news. Iran War Risk nudged up: Iran's Deputy Foreign Minister Kazem Gharibabadi said an "understanding in principle" has been reached with Oman on the Hormuz route map — inbound/outbound entry and exit lanes are agreed — a real step up from Aug 5's vaguer, still-unsigned framing. But the same day surfaced a genuine new complication: a fee dispute (Iran wants 5-7% of cargo value, Oman ~3%, Washington wants zero), with eight shipping-lobby groups already protesting and the Jerusalem Post reporting the proposed regime may not be feasible for the industry — so the move stayed modest. Tokenization nudged up on a real catalyst the past five days of daily checks had missed: BlackRock launched two new tokenized money-market funds (BSTBL, BRSRV) on August 3, targeting GENIUS Act stablecoin-reserve eligibility, via Securitize — the same partner as BUIDL. CLARITY Act held flat (still no cloture motion filed as of Aug 6, "just two days left in session"; a recirculating "White House ethics deal" story was traced to its actual July 20-21 publish date and correctly excluded as stale). Fed & Macro held flat (jobless claims 199K, week ended Aug 1, prior revised to 198K — a continued mild uptick in-trend, not a fresh shock; H.4.1 for the week ended Aug 5 not yet published). Full score lineage (June committed → every draft through August 6) preserved in every report.

Draft scores await my stamp.

THE FINAL NUMBER · AUGUST 6, 2026 · EQUAL-WEIGHT MODEL

+0.58

Mild Bull overall, time-arbitrated — the 1-month window itself flipped from Bear to Mild Bear for the first time in over a week. Equal-weight mean of the five window signals (−10 max bear ... +10 max bull). Horizon-weighted variant: **+1.14**. The structure underneath: Mild Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" signal, and today the near-end storm eased further (up from Aug 5's +0.54 / +1.11) on genuine progress on two fronts at once — Iran's route-map understanding and BlackRock's tokenization push — even though neither is a clean, unambiguous positive (the Hormuz fee dispute and the Tokenization catch being five days late both temper the read).

The Master Table

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

The whole thesis in five rows, on the August 6 draft (a light daily touch on the Aug 5 committed set). Signal range -10 (max bear) to +10 (max bull).

Compiled August 6, 2026 · BTC \$64,507.23 (Bitstamp, last completed daily close, August 6, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 6 draft) · Not Financial Advice

WINDOW	MASTER (EQUAL-WT)	AUG 5 MASTER	THE CALL
1 month	-1.49	-1.59	Mild Bear — the first non-Bear 1-month read in over a week, as Iran and Tokenization both firmed
3 months	-1.00	-1.10	Mild Bear — the September FOMC still sits inside this window at majority-hike-priced odds
6 months	+0.19	+0.17	Neutral — CLARITY and Tokenization still carry this window; Iran and Fed still drag harder
1 year	+2.09	+2.09	Bull — all five pillars still positive; the thesis window, unmoved
3 years	+3.11	+3.11	Strong Bull — law + adoption + cycle + value, unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: |s| < 0.5 Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Aug 5 Master" is yesterday's committed reading, for exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.58 = the equal-weight mean of the five MASTER signals above ((-1.49 - 1.00 + 0.19 + 2.09 + 3.11) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.14**. Both still read **Mild Bull**, up from Aug 5's +0.54 / +1.11. What moved: the 1-month window crossed the -1.5 boundary from Bear into Mild Bear (-1.59 → -1.49) — the first time it's read anything other than outright Bear in over a week — driven by two pillars moving on genuine news simultaneously: Iran War Risk (P 22/29/40/56/77 → 24/31/41/56/77, on Iran and Oman reaching an "understanding in principle" on the Hormuz route map, tempered by a newly-surfaced fee dispute) and Tokenization (P 50/57/65/74/85 → 52/59/65/74/85, on BlackRock's Aug 3 launch of two tokenized money-market funds — a real catalyst the prior five days of daily checks missed). CLARITY Act and Fed & Macro held flat — no material corroborated change in either today. Bitcoin TA held essentially flat (price -0.2% vs. Aug 5). The 1-year and 3-year windows didn't move — this remains a near-term chop, structurally bullish read, with today's news flow continuing to modestly reduce the near-term storm rather than adding to it.

The Full Pillar Matrix

Every pillar's signal on every window — August 6 draft scores (each report shows the full June → ... → August 6 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	−1.63	−0.41	+1.09	+4.61	+6.38	Held flat (no cloture motion filed)
Iran War Risk (20% · 8)	−2.50	−1.98	−1.01	+0.62	+2.38	Nudged up (route map agreed, fee dispute open)
Tokenization RWA (20% · 8)	+0.29	+1.27	+2.04	+3.00	+3.92	Nudged up (BlackRock fund launch, caught late)
Fed & Macro (20% · 8)	−2.18	−2.31	−0.64	+0.48	+1.25	Held flat (claims in-trend, H.4.1 pending)
Bitcoin TA — quant (20% · 8)	−1.44	−1.57	−0.53	+1.73	+1.60	Aug 6 computed
MASTER — mean of the five	−1.49	−1.00	+0.19	+2.09	+3.11	equal-wt

P lineage (June → Jul 8 → ... → Jul 30 → 31 → Aug 1 → 2 → 3 → 4 → 5 → 6) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 40/47/58/82/92 (Jul 30) → 38/47/58/82/92 (Jul 31) → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → 38/47/58/82/92 (Aug 5, committed) → **38/47/58/82/92** (Aug 6, held) · Iran 50/55/62/75/85 → 40/47/55/70/83 → ... → 16/25/37/55/77 (Jul 30) → 16/25/37/55/77 (Jul 31, held) → 19/26/37/55/77 (Aug 1) → 15/23/37/55/77 (Aug 2) → 15/23/37/55/77 (Aug 3, held) → 19/27/39/56/77 (Aug 4) → 22/29/40/56/77 (Aug 5, committed) → **24/31/41/56/77** (Aug 6) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 50/57/65/74/85 (Jul 30) → 50/57/65/74/85 (Jul 31, held) → 50/57/65/74/85 (Aug 1-4, held) → 50/57/65/74/85 (Aug 5, committed) → **52/59/65/74/85** (Aug 6) · Fed 38/40/46/54/61 → 35/36/42/52/61 → ... → 34/33/45/54/62 (Jul 30) → 34/33/45/54/62 (Jul 31, held) → 34/33/45/54/62 (Aug 1-4, held) → 34/33/45/54/62 (Aug 5, committed) → **34/33/45/54/62** (Aug 6, held) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 39/37/46/67/70 (Jul 30) → 37/36/45/67/70 (Jul 31) → 37/34/44/67/71 (Aug 1) → 37/35/44/67/71 (Aug 2) → 37/34/44/67/71 (Aug 3) → 37/35/44/67/70 (Aug 4) → 38/36/44/68/70 (Aug 5) → **38/36/44/68/70** (Aug 6). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on August 6, 2026 (comparisons below are vs. the Aug 5 committed baseline)

- **1 month — Mild Bear (−1.49, was −1.59).** Iran War Risk firmed (−2.50, was −2.69) on the route-map understanding with Oman, tempered by the newly-surfaced fee dispute. Tokenization moved into positive territory (+0.29, was +0.00) on the BlackRock fund launch. CLARITY (−1.63, unchanged) and Fed & Macro (−2.18, unchanged) both held. Bitcoin TA held essentially flat (−1.44, unchanged).
- **3 months — Mild Bear (−1.00, was −1.10).** Same two movers: Iran (−1.98, was −2.18) and Tokenization (+1.27, was +0.99) both firmed; the September FOMC still sits squarely inside this window at majority-hike-priced odds per the Fed pillar (−2.31, unchanged); CLARITY (−0.41, unchanged) held; the quant tape held flat (−1.57, unchanged).
- **6 months — Neutral (+0.19, was +0.17).** Tokenization remains the strongest pillar here (+2.04, unchanged — the fund-launch news didn't move this window); CLARITY still holds constructive (+1.09, unchanged); Iran's drag eased slightly (−1.01, was −1.12); the Fed drag is unchanged (−0.64); the tape's drag is unchanged (−0.53). Historical average cycle bottom (~Aug 31, cycle month 27.56) sits inside this window.
- **1 year — Bull (+2.09, was +2.09).** All five pillars still positive and unchanged today: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Iran +0.62, Fed +0.48. Price sits 53% below power-law fair value (\$136,961). The window the whole thesis is built around, unmoved.

- **3 years — Strong Bull (+3.11, was +3.11).** Every pillar positive and the structural case compounds, unchanged today: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.60, Fed +1.25. A single day of news, by design, doesn't move this window.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) still trace a very similar path: P 34/33/45/54/62 vs 38/36/44/68/70 — within 5 points at 1 and 3 months, and just 1 point apart at 6 months (45 vs 44). Two methods that share no inputs keep landing on "soft near term, still-questionable half-year." Iran, despite today's improvement, remains the worst 1-month signal in the set (−2.50) — genuine progress on Hormuz still hasn't caught up to the Fed's own near-term drag.

THE REAL DISAGREEMENT

Near-term: Tokenization is now the only pillar reading positive near-term (P 52); CLARITY sits well below a coin flip (P 38) on the confirmed no-cloture-filed blockage; the Fed and the tape both lean bearish (P 34, 38); Iran remains the clearest risk-off vote even after today's improvement (P 24). The master resolves it honestly: Mild Bear now, and the one positive pillar gets paid in the windows where its evidence is strongest.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Fired today are already IN the August 6 draft scores. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Fired Aug 6	Iran's Deputy FM Gharibabadi: an "understanding in principle" reached with Oman on the Hormuz route map, including entry/exit lanes (IRNA, corroborated by Bloomberg x2, CBS, Al Jazeera x2, Euronews, Fortune)	Iran 1mo/3mo/6mo nudged up — already IN this draft
Fired Aug 6 — NEW COMPLICATION	A fee dispute surfaced the same day: Iran wants 5-7% of cargo value, Oman ~3%, the US wants zero; eight shipping-lobby groups are already protesting, and Jerusalem Post reports the regime may not be feasible for the industry	Kept the Aug 6 Iran move modest and short-horizon-only
Fired Aug 3, caught Aug 6	BlackRock launched two tokenized money-market funds (BSTBL, BRSRV) targeting GENIUS Act stablecoin-reserve eligibility, via Securitize (CoinDesk, KuCoin, PYMNTS, Cointribune, BitcoinWorld, Solana Compass, CoinPaprika)	Tokenization 1mo/3mo nudged up — a real catalyst the Aug 1-5 daily checks missed
Checked Aug 6, no motion filed	Still no cloture motion for CLARITY; "just two days left in session" before the Aug 7 last-realistic-vote date and the Aug 10 recess	CLARITY held flat

Checked Aug 6, correctly excluded	A recirculating "White House CLARITY ethics deal" story traced via direct fetch to its actual July 20-21 publish date — stale, not new	Not used to move CLARITY P
Fired Aug 6, confirmed primary	DOL jobless claims 199K (week ended Aug 1), prior week revised to 198K from 197K	Consistent with the existing trend — Fed held flat
Pending	Fed H.4.1 for the week ended Aug 5, not yet published as of this check	Fed & Macro's next real re-rating trigger
Aug 6-7	CLARITY's last realistic pre-recess floor window	CLARITY: a filed cloture motion = up; the window closing with nothing filed = down
Pending	Actual signing of a Hormuz agreement — the fee dispute (5-7% vs 3% vs 0%) is the thing to watch, not the route-map understanding alone	Resolved favorably = re-rate Iran up further; deal collapses over fees = re-rate down
September	Next FOMC (with SEP/dot plot), Sept 15-16; first realistic post-recess CLARITY floor-time window	Both pillars' real re-rating events — watch closely
~Aug 16	Islamabad Memorandum 60-day window expires	Iran: deal/extension = up hard; formal collapse = down hard
~Aug 31	Historical average cycle-bottom month (cycle month 27.56 currently) passes	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value \$136,961	BTC \$64,507.23 sits 53% below fair value	1yr/3yr windows: the gap the structural bull case is priced against

The master flip line, re-leveled: a confirmed new US combat death, a resumption of US strikes on Iran proper, or a sustained Brent close above \$100 (Iran); a September FOMC hike landing into still-historically-low claims (Fed); or the Senate returning from recess with no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just today's re-rate. A signed, durable Hormuz reopening — fee dispute resolved, not just the route map — would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WT)	CALL · STILL POSITIVE?
— drop CLARITY Act	+0.20	Neutral · barely, yes
— drop Iran War Risk	+0.85	Mild Bull · yes
— drop Tokenization RWA	+0.20	Neutral · barely, yes
— drop Fed & Macro	+0.89	Mild Bull · yes
— drop Bitcoin TA	+0.73	Mild Bull · yes
all five in (headline)	+0.58	Mild Bull

Every leave-one-out final number stays **positive** (+0.20 to +0.89) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-negative near-term pillars) still round down to **Neutral** rather than Mild Bull, essentially unchanged from prior days' thinner-than-usual robustness result. The horizon-weighted final (+1.14) is more robust and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — today's Iran and Tokenization moves widened their own leave-one-out margins but didn't change which two pillars are load-bearing for the headline call. This robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

🕒 **UPDATED DRAFT — AUGUST 6, 2026 (LIGHT DAILY TOUCH ON THE AUG 5 COMMITTED SET) · AWAITING MY STAMP**

MASTER: −1.49 / −1.00 / +0.19 / +2.09 / +3.11 · THE FINAL NUMBER: +0.58 (Mild Bull, time-arbitraged)

This is a light daily touch on top of yesterday's committed set: the quant pillar was recomputed on today's price; Iran War Risk nudged up (22/29/40/56/77 → 24/31/41/56/77) on Iran's Deputy FM confirming an "understanding in principle" with Oman on the Hormuz route map, tempered by a genuinely new complication — an unresolved fee dispute (Iran 5-7%, Oman ~3%, US 0%) that shipping-lobby groups are already protesting; Tokenization nudged up (50/57/65/74/85 → 52/59/65/74/85) on BlackRock's Aug 3 launch of two tokenized money-market funds, a real catalyst the past five days of daily checks had missed entirely; CLARITY Act and Fed & Macro both held flat — no cloture motion filed, and jobless claims (199K) landed in-trend, not a fresh shock. A recirculating "White House CLARITY ethics deal" story was traced to its actual July 20-21 publish date and correctly excluded as stale. The full lineage (June committed → every draft through August 6) is printed in every report. Awaiting my signature: **(1)** the two moved P-paths (Iran, Tokenization), **(2)** the equal-weight model and the final-number window weighting. The robustness check remains a standing yellow flag, not a rubber stamp: dropping CLARITY or Tokenization still rounds the call down to Neutral — the headline conclusion continues to lean more heavily on those two pillars than on Iran, Fed, or TA. The near-term calendar is dense: Fed H.4.1 is still pending, CLARITY's last pre-recess floor window runs through Aug 7, and the Hormuz fee dispute is the real thing to watch next, not the route-map understanding alone.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that the "Mild Bull" headline still leans on two of the five pillars more than the other three.

Sources

Each pillar report carries its full, freshly-verified source list for today's research. The master adds the engine and headline references for this August 6 update.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Iran_War / Tokenization_RWA / Fed_Macro Pillar Reports (daily re-research Aug 6) · CoinPicks_Bitcoin_TA_Quant_Pillar_Report (computed Aug 6).
- **The engine:** engine/blend.py → data/master_blend.json (score set 2026-08-06_draft in config/scores.json, full lineage back to 2026-06-19_committed; final-number window weights in config/settings.json "final_weights") · engine/mapping.py → data/pillar_scores.json (Bitstamp data through Aug 6, 2026).
- **Headline checks (Aug 6):** full citations for the Iran-Oman route-map understanding and the fee-dispute complication, the BlackRock BSTBL/BRSRV launch, the CLARITY no-cloture confirmation and the stale-ethics-story exclusion, and the DOL claims print are carried in full in each respective pillar report's own source list — not duplicated here to avoid stale or mismatched links in the master.
