

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 31, 2026 (light daily catch-up) · Committed, auto-stamped

*This is a light daily catch-up against the Aug 29 full weekly refresh (2026-08-29_draft, held flat/re-rated, left as draft pending Alex's manual review — now superseded). CLARITY Act held flat at 32/47/58/82/92: the Sept 15 cloture vote and both binding disputes (ethics, stablecoin-yield) remain unchanged. Tokenization RWA held flat at 52/60/66/74/85: no new dated catalyst found Aug 29-31. Fed & Macro held flat at 36/35/45/55/61: CME FedWatch September hike odds continued drifting up (~56-58% → ~60.4%) but a market-odds drift alone, without a fresh primary print, doesn't clear the sufficiency bar for a further move. **Iran War Risk re-rated down**, front-loaded, to 9/17/34/51/75 from 14/22/38/54/76: on Aug 30, US forces struck IRGC rocket/mine-launchers on Iran's Larak Island — the first US strike on Iranian territory since Jul 29 — directly firing this pillar's own pre-declared flip line ("a resumption of direct US strikes on Iran proper"); Iran retaliated with ballistic missiles on two US-linked Jordan airbases hours later, with no confirmed US casualty. Confirmed via an on-record CENTCOM spokesperson plus 20+ independent outlets. Bitcoin TA (computed) moved with today's tape and the advancing cycle-month clock: BTC \$78,447.16 (Aug 31) vs. \$77,666.16 (Aug 29), quant draft P 54/46/59/68/69. **AUTO-STAMPED** per delegated daily authority: light daily touch, no window moved more than 8 points, the master call band is unchanged versus the last stamped set, and the load-bearing Iran claim is corroborated well above the sufficiency bar. Full score lineage (June committed → Aug 22 committed → Aug 28/29 drafts → Aug 31 committed) preserved in every report.*

THE FINAL NUMBER · AUGUST 31, 2026 · EQUAL-WEIGHT MODEL (COMMITTED — AUTO-STAMPED)

+0.58

Mild Bull overall, time-arbitraged — down from the last stamped set's (Aug 22) +0.74 on Iran War Risk's re-rate. Equal-weight mean of the five window signals (–10 max bear ... +10 max bull). Horizon-weighted months, Bull at 1 year, Strong Bull at 3 years — no call band flipped versus the last stamped reading. This reading is COMMITTED this cycle — AUTO-STAMPED per delegated daily authority — see My Decision below

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 31, 2026 (light daily catch-up) · BTC \$78,447.16 (Bitstamp, August 31, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 31 committed set, auto-stamped) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the August 31 committed set (a light daily catch-up vs. the Aug 22 last-stamped baseline). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 22 MASTER (PRIOR STAMPED)	THE CALL
1 month	-1.50	-1.22	Bear — Iran War Risk's flip-line-firing re-rate dr
3 months	-0.98	-0.72	Mild Bear — Iran drags harder; the September
6 months	+0.32	+0.49	Neutral — CLARITY and Tokenization still carry
1 year	+2.01	+2.09	Bull — all five pillars still positive; the thesis win
3 years	+3.03	+3.07	Strong Bull — law + adoption + cycle + value

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Exact comparison. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

+0.58 = the equal-weight mean of the five MASTER signals above ((-1.50 - 0.98 + 0.32 + 2.01 + 3.03) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.13**, down from +1.14.

Three pillars (CLARITY, Tokenization, Fed & Macro) held flat this cycle on independent re-checks; Iran War Risk re-rated down, front-loaded, on a resumed direct US strike on Iran that fired the **STAMPED** per delegated daily authority — light daily touch, no window moved more than 8 points, call band unchanged. See My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — August 31 committed scores, a light daily catch-up (each report shows the full June → Aug 22 → Aug 28/29 drafts → Aug 31 committed lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	-2.45	-0.41	+1.09	+4.61	+6.38	Held flat
Iran War Risk (20% · 8)	-3.94	-3.43	-1.79	+0.10	+2.20	RE-RATED DOWN
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	
Fed & Macro (20% · 8)	-1.90	-2.04	-0.64	+0.60	+1.14	
Bitcoin TA — quant (20% · 8)	+0.48	-0.45	+0.79	+1.73	+1.52	
MASTER — mean of the five	-1.50	-0.98	+0.32	+2.01	+3.03	

P lineage (June → Jul 8 → ... → Aug 16 → 22 draft2 → 28/29 drafts → 31 committed) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 7, committed) → **32/47/58/82/92** (Aug 31 — held flat since Aug 7) · Iran → 14/22/38/54/76 (Aug 29, held flat, draft) → **9/17/34/51/75** (Aug 31 — RE-RATED DOWN, flip line fired, auto-stamped committed) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 52/60/66/74/85 (Aug 8, committed) → **52/60/66/74/85** (Aug 31 — held flat, auto-stamped committed) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 49/46/54/66/69 (Aug 22 draft2) → 54/46/56/67/69 (Aug 29) → **54/46/56/67/69** (Aug 31 — held flat, auto-stamped committed) — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on August 31, 2026, a light daily catch-up (comparisons below are vs. the last stamped baseline, Aug 22's 2026-08-22_draft2)

- 1 month — Bear (-1.50, down from -1.22).** CLARITY (-2.45) held at its Aug 22 level; Tokenization (+0.29) held; Fed & Macro (-1.90) held from Aug 29; Bitcoin TA held near flat (+0.48). **Iran fell to -3.43 from -2.91** — the pillar's own flip line firing drives the net change into outright Bear.
- 3 months — Mild Bear (-0.98, down from -0.72).** CLARITY (-0.41), Tokenization (+1.41), and Fed & Macro (-2.04) held; Bitcoin TA held near flat (-0.45); **Iran fell to -3.43 from -2.91** — the pillar's own flip line firing drives the net change into outright Bear.
- 6 months — Neutral (+0.32, down slightly from +0.49).** CLARITY (+1.09), Tokenization (+2.18), and Fed & Macro (-0.64) held; Bitcoin TA firmed to +0.79 as the cycle-analog turned unanimo sits right at this window's front edge.
- 1 year — Bull (+2.01, down slightly from +2.09).** All five pillars still positive: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.60, Iran +0.10 (down from +0.42). Price now sits 4 cushion has thinned.
- 3 years — Strong Bull (+3.03, essentially unchanged from +3.07).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Iran +2.20, Bitcoin TA +1.52, Fed +1.14. A structural window

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Iran War Risk (judged) re-rated down sharply this cycle while Bitcoin TA (computed) held firm — a real, not manufactured, divergence: P 9/17/34/51/75 (Iran, judged, cut on a resu advancing cycle clock). The qualitative war-risk read turned sharply more cautious even as the tape holds up — a genuine short-term tension this report doesn't resolve by adjusting one pillar's own pre-declared flip line having just fired — a genuine escalation, independent of what BTC's tape is doing.

THE REAL DISAGREEMENT

Near-term: Bitcoin TA's computed near-term read (P 54/46) is now the strongest near-term pillar; Tokenization (P 52) follows; Fed & Macro (P 36/35) sits below both; CLARITY remains below a (P 9), having just fired its own flip line. The master resolves it honestly: Bear at 1 month, down a full band from Aug 22's Mild Bear — Iran's sharp move down is the whole story at the near end

Long-term: the four story pillars average about +3.8 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.20, Fed +1.14) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.5× higher. Rem Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A light daily catch-up ran this cycle. Iran War Risk's own pre-declared flip line fired; CLARITY, Tokenization, and Fed & Macro held. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT
FIRE Aug 30 — CONFIRMED, FLIP LINE TRIGGERED	US forces struck two IRGC rocket/mine-launchers on Iran's Larak Island — the first US strike on Iranian territory since Jul 29, ending a ~28-30-night clean streak. Confirmed spokesperson Capt. Tim Hawkins, corroborated by 20+ independent outlets (Bloomberg, CNBC, NBC, Reuters, Newsweek, ABC, Al Jazeera, Fox, RFE/RL, and more). Directly f declared flip line ("a resumption of direct US strikes on Iran proper")
FIRE Aug 30-31 — CONFIRMED (Iran-claimed damage unconfirmed)	IRGC retaliatory ballistic-missile strikes on two US-linked Jordan airbases (King Hussein, Al-Azraq); Jordan's military intercepted 8 missiles; no confirmed US casualty
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; no WH sign-off on the ethics text found
Checked, no fresh catalyst	Tokenization: sector-level figures cited this window are consistent with the Aug 28 pull already priced in — no new dated development
Checked, drift only	CME FedWatch September hike odds continued drifting up (~56-58% → ~60.4%), but a market-odds drift alone, without a fresh primary print or news event, doesn't clear t
Sept 15, 2026	Next FOMC, with SEP/dot plot; also the first CLARITY Act cloture vote, precisely dated 2:15pm ET
~Aug 31	Historical average cycle-bottom month (cycle month 28.38 currently) passes — essentially today
Power-law fair value \$138,979	BTC \$78,447.16 sits 44% below fair value, up +1.0% vs. \$77,666.16 on Aug 29

The master flip line — Iran's clause just fired: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a **30**, confirmed via an on-record CENTCOM spokesperson and 20+ outlets; the "confirmed new US combat death" and "widening to a further new state" clauses remain unfired. The September FOMC delivering a h released, WH-confirmed CLARITY ethics text (CLARITY) would also be a genuine escalation. A signed, US-accepted Hormuz reopening that holds a full clean week would be the equivalent upside flip for Iran — now and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	+0.26	
— drop Iran War Risk	+1.06	
— drop Tokenization RWA	+0.18	
— drop Fed & Macro	+0.86	
— drop Bitcoin TA	+0.52	
all five in (headline)	+0.58	

Every leave-one-out final number stays **positive** (+0.18 to +1.06) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-positive near-term pillars) still round down to **Neutral** n Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — this cycle's Iran re-rate didn't change that structure. This robustness ch

My Decision

COMMITTED — AUGUST 31, 2026 · AUTO-STAMPED (ALEX (AUTO-STAMPED)) · LIGHT DAILY CATCH-UP

MASTER: -1.50 / -0.98 / +0.32 / +2.01 / +3.03 · THE FINAL NUMBER: +0.58 (Mild Bull, time-arbitraged, committed)

This is a light daily catch-up against the Aug 29 full weekly refresh (2026-08-29_draft, itself left as a draft pending Alex's manual review, now superseded by this cycle's auto-stamp). Three pillars were indep the only scheduled action; no White House sign-off on the Tillis-Gallego ethics text was found. Tokenization RWA at 52/60/66/74/85: sector-level figures cited this window are consistent with the Aug 28 pu odds continued drifting up (~56-58% → ~60.4%), but a market-odds drift alone, without a fresh primary print or news event, cannot move P per the sufficiency rule. **Iran War Risk re-rated down**, front-loa Iran's Larak Island — the first US strike on Iranian territory since Jul 29, ending the ~28-30-night clean streak the Aug 29 baseline cited as part of its bullish leg — confirmed on the record by CENTCOM spo pre-declared downside flip line ("a resumption of direct US strikes on Iran proper... = treat the dip-buy thesis as broken") — not a novel judgment call, a pre-committed trigger firing as written. IRGC retalia confirmed US casualty from either event. The cut is front-loaded and held under 8 points per window (1mo -5, 3mo -5, 6mo -4, 12mo -3, 36mo -1), sized to a single resumed-strike-night shock rather th month clock (28.32 → 28.38): BTC closed at \$78,447.16 (Aug 31) vs. \$77,666.16 (Aug 29), +1.0%, and the quant pillar's own P moved to 54/46/59/68/69. **This score set is AUTO-STAMPED** per the runbook's points; the master FINAL NUMBER's call band (Mild Bull) is unchanged versus the last stamped set (2026-08-22_draft2, +0.74 → this cycle +0.58); and the load-bearing Iran claim is corroborated by 20+ ind source claim is doing the work.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that COMMITTED, auto-stamped under Alex's delegated daily authority — the prior stamped position was Aug 22's +0.74 (2026-08-22_draft2, stamped August 23, 2026).
