The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

*Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as a full weekly refresh on **August 8, 2026**. **This version (August 10) is a light daily touch** checking for changes since the Aug 9 touch: the Sept 15, 2:15pm ET cloture vote remains the only scheduled date (now also confirmed by CoinGape, Blockonomi, Disruption Banking, and news.bitcoin.com), and Galaxy Research's cut of its 2026-passage estimate to 30% — recirculating in some coverage today — is confirmed dated to late July, already priced into the score by the Aug 7 set, and is not a fresh trigger. The score holds unchanged at 32/47/58/82/92. **This version's scores have been auto-stamped** under Alex's standing delegated daily authority (in effect since 2026-08-06) — no pillar P moved anywhere in today's cycle; see My Decision below.*

COINPICKS PILLAR REPORT · WEIGHT: 25% OF MY THESIS

Written June 5, 2026 · Updated & Re-verified August 10, 2026 (light daily touch off the Aug 9 baseline — committed, auto-stamped) · Not Financial Advice

The Scores — Committed vs. Drafts

June column committed by me June 12, 2026. Every draft since is shown for full lineage — nothing collapses until I commit a newer set. Aug 8 (full weekly refresh, 3mo confirmed unchanged) committed and stamped by Alex. Aug 9 and Aug 10 are light daily touches — both held flat, both auto-stamped.

WINDOW	JUN	...	8/5	8/6	8/7	8/8	8/9	8/10	QUAL.	IMP.	SIGNAL	MY CALL
1 month	55	...	38	38	32	32	32	32	0.85	8	-2.45	Bear — cloture vote itself falls outside this 30-day window
3 months	60	...	47	47	44	47	47	47	0.85	8	-0.41	Mild Bear — a dated Sept 15 procedural vote now sits squarely inside this window
6 months	65	...	58	58	58	58	58	58	0.85	8	+1.09	Mild Bull
1 year	85	...	82	82	82	82	82	82	0.90	8	+4.61	Strong Bull
3 years	92	...	92	92	92	92	92	92	0.95	8	+6.38	Very Strong Bull

Committed P (Aug 10): 32 / 47 / 58 / 82 / 92 · **Weight:** 20% (equal) · **Impact:** 8 (uniform) · **Formula:** Signal = ((P – 50) ÷ 50) × Quality × Impact. Full lineage: June committed 55/60/65/85/92 (Jun 12) → ... (see prior versions of this report for the full Jul 8-Aug 7 path) → Aug 8 32/47/58/82/92 (3mo up — Thune files cloture, locking in a Sept 15-16 procedural vote; committed and stamped by Alex) → Aug 9 32/47/58/82/92 (held flat — Sept 15 date firmed up, not a new trigger) → **Aug 10 32/47/58/82/92** (held flat — no new dated catalyst; Galaxy's 30% cut confirmed old news) — committed, auto-stamped.

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. Held flat this cycle at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote remains the only scheduled date, now confirmed by a wider set of outlets (The Block, CryptoSlate, Cointelegraph, CoinGape, Blockonomi, Disruption Banking, news.bitcoin.com) — still a confirmation, not a fresh trigger. Some coverage today recirculated Galaxy Research's cut of its 2026-passage estimate to 30%; that call is dated to late July and was already priced into the score by the time it fell to 32/47 in the Aug 7 set, so it changes nothing today. The move stays flat because Republicans still hold only 53 of the 60 votes needed and roughly zero Democrats are confirmed as yes votes. The actual live blocker, unchanged since Aug 8: a *toughened* Democratic ethics counter-proposal has sat unanswered at the White House since roughly Aug 1-3. Long-term still high — even the bears argue "slips past the midterms," not "dies."

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of August 10, 2026, and where I differ from the consensus — a second flat day, nothing structural moved

The crowd: some outlets are re-running Galaxy Research's 30% 2026-passage estimate today as if it were fresh — it's a late-July call, already priced in. The live debate is unchanged: either the Sept 15 cloture filing is the opening move in a real pre-vote negotiation that could flip Democratic votes, or it's a political exercise to force resistant lawmakers to go on record before campaign season.

Me: holding at 32/47/58/82/92 for a second straight day — nothing since Aug 9 exceeds what that set already priced in. Republicans still hold only 53 of 60 needed, and the real blocker (the unanswered Democratic ethics counter-proposal) hasn't moved since Aug 8.

My edge: unchanged since June — the crowd keeps pricing a *timing* problem like a *death* problem. The House did its half a year ago (294-134). A formally filed, precisely-dated cloture vote is a Senate actually moving a bill rather than sitting on it. I'm not moving any window today because nothing about the structural math (still 7 Democratic votes short) changed.

The Facts

As of August 10, 2026, light daily touch — hard numbers only, sources on the last page. New facts appear first; the Aug 8-9 facts below are carried forward unchanged (still load-bearing).

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture date is now corroborated by 7 independent outlets**, up from 3 on Aug 9: CoinGape, Blockonomi, Disruption Banking, and news.bitcoin.com all confirm the same inter-party Senate scheduling agreement (The Block, CryptoSlate, Cointelegraph, all citing Thune's Aug 8 4:52am ET cloture filing on the H.R. 3633 motion to proceed, Calendar No. 423). Broader corroboration, not a new date or a fresh trigger.
- **Galaxy Research's cut of its 2026-passage estimate to 30% (from 50%) is confirmed dated to late July** (Galaxy's Alex Thorn, cited by CryptoSlate/CryptoTimes around July 24-27) and was already priced into the score by the time it fell to 32/47 in the Aug 7 set — some coverage today recirculates it as if fresh; it is not.
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633.** Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoSlate) plus partial primary corroboration via the bill's own congress.gov calendar text (Calendar No. 423).
- ★ ★ **NEW — the real live blocker is a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump stays silent on ethics deal," Aug 3; corroborated by CoinDesk's Jul 29 report that senators were negotiating a stronger version of the original concession). This is distinct from, and tougher than, the original July ethics framework Trump agreed to in principle — that earlier framework was already priced into scores before Jul 30 and is not new information.
- **Zero confirmed Democratic yes votes on cloture** as of Aug 8, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.
- **Polymarket "signed in 2026" (market odds, not an institutional estimate) hit a record low of 13% on Aug 5** during the pre-filing paralysis, then bounced to a noisy 20-27% range after the Aug 8 cloture filing — still well below the Jul 21 local peak of 43%. Treat the exact post-filing figure as noisy; the directional read (bounce off a record low, still depressed vs. earlier in the year) is the reliable part.
- **Aug 7 — confirmed cloture was never filed before the August recess** and the vote is delayed to September (Senate Majority Leader Thune, on the record to The Block, Aug 6 ~11pm ET) — the trigger that drove the Aug 7 1mo/3mo cut, now followed by the Aug 8 cloture filing.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows Jul 28's time went to a memorial ceremony for the late Sen. Lindsey Graham plus an executive-calendar nominee vote, and Jul 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source

confirmation of "no floor time" than any leadership quote — and confirms no path to passage before the Aug 7 recess.

- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground on an ethics compromise (Jul 29-30). The exact text is undisclosed and White House sign-off is unconfirmed — CoinDesk's own reporting hedges "whether they've actually done it is unclear," and neither senator's office nor the White House responded to comment requests. Treat as real movement, not a completed deal.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and then rejected Jul 30 by both the White House (adviser Patrick Witt mocking the comparison) and the crypto industry (DeFi Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to issue crypto market-structure rules on its own, while still calling statute the preferred, "future-proof" path. A modest reducer of legislative urgency — noted, not scored.
- **Odds board (*sentiment only*) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, Jul 30) — down from the ~35% read a week ago. Galaxy Research's Alex Thorn cut his personal 2026-passages estimate from 50% to 30% — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-counted here.
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics language. Firmly committed Democratic votes: zero.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor math" inference (which was already corrected in an earlier cycle: his SC seat was refilled within 48 hours, GOP floor count restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since — carried forward as the binding constraint, now potentially loosening.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ WLF-related. Gillibrand: *"there is no CLARITY Act without an ethics provision."*
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the floor; Coinbase's ~\$1.35B/yr USDC-rewards structure survives in the text as-is.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House fast-follow plan (companion bill, Rep. Dusty Johnson) unchanged.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$65,061.97** (Bitstamp daily close, August 10, 2026). A **GENIUS-sized move (~40–47%)** from here ≈ **~\$91–96K**. A retest of the ~\$125K high ≈ **+92%**. The anchor is real: during the GENIUS Act's passage (Senate committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K (≈+44%).

Discount both — 2025 had tailwinds 2026 doesn't, and **the GENIUS rally itself fully retraced**. And note the coil cuts both ways: prediction-market odds bottomed at a fresh record low of 13% on Aug 5, then bounced to a noisy 20-27% on the cloture filing — still a real repricing from the ~74-82% readings earlier in 2026. The cloture filing is a dated procedural step, not evidence the underlying passage odds have durably moved; it does not itself reopen the coil. The Prize doesn't feed the math — it tells you what the lean is worth acting on.

The Other Side

The strongest honest case this is wrong

- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have actually reached an agreement. This report is giving real weight (an 8-point 6mo improvement from the Jul 18 low) to something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows, new disputes keep appearing — a pattern, not a one-off.
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture knowing it will fail, the point may be to put Democrats on the record before the midterms rather than to actually advance the bill, which would make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" and "targeted" dates — nothing guarantees the actual Sept 15-16 vote produces real movement rather than another procedural loss, and September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped from 50% to 30% independent of any single news event, suggesting professional handicappers see this as a genuine coin-toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency.** If the White House and industry believe the SEC can deliver workable rules unilaterally, that reduces the political cost of letting CLARITY slip further — a slow bleed on legislative priority, not a dramatic kill.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set August 10, 2026.

DATE	EVENT	MEANS
Fired Aug 8, precisely dated Aug 9, broadly corroborated Aug 10	Cloture vote on the motion to proceed to H.R. 3633 is scheduled 2:15pm ET Tuesday, Sept 15 (Senate inter-party scheduling agreement; now 7-outlet corroborated)	Confirmation of the Aug 8 trigger, not a new one — no P move
Sept 15	PENDING — first cloture vote, now precisely dated; Democrats call it "doomed" absent further concessions; Republicans hold 53 of 60 needed	Cloture clears = re-rate 3mo/6mo up hard, real momentum; cloture fails cleanly = re-rate down, base case shifts toward 2027
Unresolved since Jul 30	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed	If confirmed and signed off before the vote, the single biggest unlock this year — watch for a released text
Ongoing	Three named Democratic blocking issues: ethics enforcement, illicit-finance/DeFi provisions, stablecoin yield (Yahoo Finance, Aug 5)	Resolution on all three before the vote = real chance of cloture succeeding; continued silence = the "doomed" framing holds
Any time	NOT FIRED — White House formally signs off on a merged text with Democratic buy-in	The single biggest unlock — Democratic votes follow; re-rate everything up

The flip line: cloture fails on Sept 15-16 with no released, WH-confirmed ethics text and no clear next-step plan = start treating 2026 passage as effectively dead, not just delayed. Keep 1-year and 3-year Bull either way — a bill with 294 House votes, a reported bipartisan ethics counteroffer, and a formally filed cloture motion is delayed, not dead.

My Decision

✓ **COMMITTED — AUGUST 10, 2026 (LIGHT DAILY TOUCH) · STAMPED BY ALEX (AUTO-STAMPED)**

Committed P: 32 / 47 / 58 / 82 / 92 · Weight: 20% (equal) · Impact: 8 (uniform)

Held flat for a second straight day. The Sept 15, 2:15pm ET cloture date is now corroborated by 7 outlets, up from 3 — broader confirmation, not a new trigger. A recirculating "Galaxy cuts odds to 30%" headline traces to a late-July report already priced in by the Aug 7 set. The real live blocker, unchanged since Aug 8, is a toughened Democratic ethics counter-proposal sitting unanswered at the White House since roughly Aug 1-3.

This is a routine, well-evidenced daily cycle — no pillar P moved anywhere in this run, no call band flipped — so it was auto-stamped under Alex's standing delegated daily authority (in effect since 2026-08-06). The June committed scores (55 / 60 / 65 / 85 / 92, committed June 12, 2026) and the Aug 9 committed scores (32 / 47 / 58 / 82 / 92) remain the prior human/auto-stamped values, identical to today's.

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

Light daily touch, August 10, 2026 — checking for changes since the Aug 9 touch.

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture date is now confirmed by 7 independent outlets**, up from 3 on Aug 9 (adds CoinGape, Blockonomi, Disruption Banking, news.bitcoin.com). Broader corroboration, not a new date — no P move.
- **Traced and excluded: a "Galaxy cuts CLARITY odds to 30%" headline recirculating today.** Confirmed dated to late July (Galaxy's Alex Thorn, cited by CryptoSlate/CryptoTimes ~Jul 24-27) and already priced into the score by the Aug 7 set — old news, not a fresh trigger.
- **Zero confirmed Democratic yes votes on cloture** as of Aug 10 — Republicans hold 53 of 60 votes needed, unchanged.
- **The toughened Democratic ethics counter-proposal remains unanswered at the White House** — no update found since Aug 8.
- **Score re-rates (Aug 9 committed → Aug 10):** 1-month 32 → **32** (held) · 3-month 47 → **47** (held) · 6-month 58 → **58** (held) · 1-year 82 → **82** (held) · 3-year 92 → **92** (held) — nothing found today exceeds the Aug 9 baseline. Auto-stamped: a routine, well-evidenced daily cycle under Alex's standing delegated authority.
