

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 10, 2026 (light daily touch off the Aug 9 committed daily baseline — AUTO-STAMPED)

Quant pillar recomputed on today's price. This is a light daily touch — check what's changed since the Aug 9 daily refresh, not a fresh deep-dive. All four qualitative pillars HELD FLAT: nothing found today exceeds what Aug 9 already priced in. CLARITY Act unchanged at 32/47/58/82/92: the Sept 15 2:15pm ET cloture vote remains the only scheduled date; a recirculating "Galaxy Research cuts odds to 30%" headline was traced to a late-July dated report (already priced in by the time CLARITY fell to 32/47 in the Aug 7 set), not a new trigger; the underlying blockers (unanswered Democratic ethics counter-proposal, zero confirmed Democratic yes votes) are unchanged. Iran War Risk unchanged at 20/28/41/56/77: the Iran-Oman Hormuz joint statement remains in "final drafting stage" (unsigned) per GlobalSecurity, Euronews, Al Jazeera, and Wikipedia's live tracker, all showing Aug 5-8 as the latest dated development — no new incident or concession since. Tokenization unchanged at 52/60/66/74/85: the \$38.17B rwa.xyz TVL print (dated Sunday Aug 9) was already folded into the Aug 9 set's "all-time-high" language; no fresh dated catalyst found today. Fed & Macro unchanged at 40/38/47/55/62: the Aug 6-week jobless claims print (262K, published Aug 8) landed in line with the 263K consensus estimate — noise, not a surprise — and no new Fed/BLS release has posted since; both due again Aug 13, and the Aug 12 CPI print flagged Aug 8 as the real September decider is still pending. **This is a routine, well-evidenced daily cycle — no pillar P moved, no call band flipped — so it qualifies for, and has received, Alex's delegated daily auto-stamp authority (in effect since 2026-08-06).** Full score lineage (June committed → every draft through August 10, now committed) preserved in every report.

THE FINAL NUMBER · AUGUST 10, 2026 · EQUAL-WEIGHT MODEL (COMMITTED, AUTO-STAMPED)

+0.62

Mild Bull overall, time-arbitraged — the 1-month window remains outright Bear, same call band as Aug 9, with every qualitative pillar held flat today. Equal-weight mean of the five window signals (–10 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" month window, not a research-driven change — every qualitative pillar was held flat. This reading was auto-stamped under Alex's standing delegated authority for routine daily cycles — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 10, 2026 · BTC \$65,061.97 (Bitstamp, last completed daily close, August 10, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 10 committed set, light daily, auto-stamped)

The Master Table

The whole thesis in five rows, on the August 10 committed set (a light daily touch off the Aug 9 daily baseline). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 9 MASTER	THE CALL
1 month	-1.52	-1.54	Bear — unchanged call band; tiny quant mapping nudge, all four qualitative pillars h
3 months	-0.88	-0.88	Mild Bear — the September FOMC still sits inside this window; unchanged today
6 months	+0.29	+0.29	Neutral — CLARITY and Tokenization still carry this window; Iran still drags harder
1 year	+2.11	+2.11	Bull — all five pillars still positive; the thesis window, unmoved
3 years	+3.11	+3.11	Strong Bull — law + adoption + cycle + value, unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.62 = the equal-weight mean of the five MASTER signals above ((-1.52 - 0.88 + 0.29 + 2.11 + 3.11) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.18**, unchanged: nothing on the qualitative side — CLARITY, Iran, Tokenization, and Fed & Macro all held flat after today's research found nothing that exceeds what the Aug 9 set already priced in (see month reading (-1.32 → -1.20), pure mapping noise from today's BTC close (\$65,061.97, -0.2% vs Aug 9), which nudges MASTER 1mo from -1.54 to -1.52 while THE FINAL NUMBER holds at **nothing rests on a single-source claim — so it was auto-stamped under Alex's standing delegated daily authority (in effect since 2026-08-06) — see My Decision.**

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today.

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — August 10 committed scores, light daily touch (each report shows the full June → ... → August 10 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	−2.45	−0.41	+1.09	+4.61	+6.38	
Iran War Risk (20% · 8)	−2.88	−2.29	−1.01	+0.62	+2.38	
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	
Fed & Macro (20% · 8)	−1.36	−1.63	−0.38	+0.60	+1.25	
Bitcoin TA — quant (20% · 8)	−1.20	−1.46	−0.44	+1.73	+1.60	
MASTER — mean of the five	−1.52	−0.88	+0.29	+2.11	+3.11	

P lineage (June → Jul 8 → ... → Aug 6 → 7 → 8 → 9 → 10) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 34/33/45/54/62 (Aug 6, committed) → 32/44/58/82/92 (Aug 7, committed) → 32/47/58/82/92 (Aug 8, committed, full w 50/55/62/75/85 → 40/47/55/70/83 → ... → 24/31/41/56/77 (Aug 6, committed) → 24/31/41/56/77 (Aug 7, committed) → 20/28/41/56/77 (Aug 8, committed, full weekly) → 20/28/41/56/77 (Aug 9, committed, light daily) → **20/28/41/56/77** (Aug 6, committed) → 52/59/65/74/85 (Aug 7, committed) → 52/60/66/74/85 (Aug 8, committed, full weekly) → 52/60/66/74/85 (Aug 9, committed, light daily) → **52/60/66/74/85** (Aug 10, committed, light daily — held flat) · Fed 38/40/38/47/55/62 (Aug 8, committed, full weekly) → 40/38/47/55/62 (Aug 9, committed, light daily) → **40/38/47/55/62** (Aug 10, committed, light daily — held flat) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 38/36/44/68 (Aug 9, committed, light daily) → 38/36/44/68 (Aug 10, committed, light daily) → **38/36/44/68** (Aug 10, committed, light daily — held flat) · P nudged 39→40 on mapping noise). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own P lineage.

The Story, Window by Window

What the blend is saying on August 10, 2026, light daily touch (comparisons below are vs. the Aug 9 committed baseline)

- 1 month — Bear (−1.52, was −1.54).** The only mover anywhere: Bitcoin TA's computed reading ticked from −1.32 to −1.20 on today's mapping (BTC \$65,061.97, −0.2% vs Aug 9) — noise, not signal (−2.45), Tokenization (+0.29) all unchanged from Aug 9. Nothing found in today's research exceeded the Aug 9 baseline.
- 3 months — Mild Bear (−0.88, unchanged).** CLARITY (−0.41), Iran (−2.29), Tokenization (+1.41), Fed (−1.63), and Bitcoin TA (−1.46) all held flat.
- 6 months — Neutral (+0.29, unchanged).** Tokenization (+2.18), CLARITY (+1.09), Fed (−0.38), Iran (−1.01), and Bitcoin TA (−0.44) all held. Historical average cycle bottom (~Aug 31, cycle month 27.69 currently) passes.
- 1 year — Bull (+2.11, unchanged).** All five pillars still positive and unchanged: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.60, Iran +0.62. Price sits 53% below power-law fair value.
- 3 years — Strong Bull (+3.11, unchanged).** Every pillar positive and unchanged: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.60, Fed +1.25. A quiet news day, by design, doing nothing.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) held their Aug 9 relationship almost exactly: P 40/38/47/55/62 vs 40/37/45/68/70 (1mo TA P nudged 39→40 on mapping noise, immanently the worst 1-month signal in the set (−2.88), followed by CLARITY (−2.45, the cloture vote itself sits outside this window) — two independent stories (an unresolved, still-unsigned Hormuz/regime change) and its late-July lows.

THE REAL DISAGREEMENT

Near-term: Tokenization is still the strongest near-term pillar (P 52); Fed & Macro sits roughly at a coin flip (P 40); CLARITY remains below a coin flip (P 32) with the cloture vote still five-plus votes away (P 20). No new incident (no Hormuz deal, no new incident) found nothing to move it either direction. The master resolves it honestly: outright Bear at 1 month, unchanged in call band from Aug 9.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remains a gap. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Nothing fired today that exceeds the August 9 committed scores. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15 (per The Block, CryptoSlate, Cointelegraph, Disruption Banking); a recirculating "Galaxy Research cuts 2026 odds to 30% on late-July report, already priced in
Checked, unchanged	Iran-Oman Hormuz joint statement remains in "final drafting stage," unsigned, per GlobalSecurity/Euronews/AI Jazeera/Wikipedia live tracker; no new incident reported since Aug 8
Checked, not found	The \$38.17B rwa.xyz TVL print (dated Aug 9) was already folded into the Aug 9 set; no fresh dated catalyst since
Checked, in line	Aug 6-week jobless claims (262K actual vs 263K expected, published Aug 8) landed within consensus; no new H.4.1/BLS release since
Aug 12	July CPI print — Morgan Stanley flags this, not the jobs report alone, as the real decider for the September FOMC; lands inside the 1mo window
Aug 13	Next Fed H.4.1 balance-sheet release and next weekly jobless-claims print
Sept 15	First CLARITY Act procedural (cloture) vote, precisely dated 2:15pm ET; zero confirmed Democratic yes votes as of Aug 10
Pending	Actual signing of a Hormuz agreement the US accepts — the fee/compensation/sovereignty disputes (Iran wants tolls + compensation + a US/Israel ban; US wants zero) are the thing; unilateral announcements
September	Next FOMC (with SEP/dot plot), week of Sept 15 — Senate returns from recess the same week
~Aug 31	Historical average cycle-bottom month (cycle month 27.69 currently) passes

Power-law fair value \$137,264	BTC \$65,061.97 sits 53% below fair value
-----------------------------------	---

The master flip line, unchanged from Aug 8: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, the conflict widening to a further new state, or a sustained Brent close above \$100 returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just routine daily noise. A signed, durable Horowitz (under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WEIGHT)
— drop CLARITY Act	+0.32
— drop Iran War Risk	+0.94
— drop Tokenization RWA	+0.24
— drop Fed & Macro	+0.85
— drop Bitcoin TA	+0.77
all five in (headline)	+0.62

Every leave-one-out final number stays **positive** (+0.24 to +0.94) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-positive near-term pillars) still round down to **Neutral** and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — today's flat qualitative research didn't change which two pillars the robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

✓ COMMITTED — AUGUST 10, 2026 (LIGHT DAILY TOUCH) · STAMPED BY ALEX (AUTO-STAMPED)

MASTER: -1.52 / -0.88 / +0.29 / +2.11 / +3.11 · THE FINAL NUMBER: +0.62 (Mild Bull, time-arbitraged, committed)

This is a light daily touch off the Aug 9 committed daily baseline — checking what's changed since Aug 9, not re-litigating it from scratch. All four qualitative pillars HELD FLAT: nothing found today exceeded the 2:15pm ET Tuesday, Sept 15 (The Block, CryptoSlate, Cointelegraph, Disruption Banking) — unchanged from Aug 9; a "Galaxy Research cuts 2026 odds to 30%" headline recirculating today was traced to a late-Aug 9 news, not a trigger; the underlying blockers (unanswered Democratic ethics counter-proposal, zero confirmed Democratic yes votes) are unchanged. Iran War Risk held at 20/28/41/56/77: the Iran-Oman Houthi Wikipedia's live 2026 Strait of Hormuz crisis tracker, all showing Aug 5-8 as the latest dated development — no new incident or concession since; held flat pending either a signed agreement or a development (dated Sunday Aug 9) was already folded into the Aug 9 set's "all-time-high" language; no fresh dated catalyst found today. Fed & Macro held at 40/38/47/55/62: the Aug 6-week jobless claims print (262K) and Fed/BLS release has posted since; the next H.4.1 and jobless-claims prints are due Aug 13, and the Aug 12 CPI print flagged Aug 8 as the real September decider has not yet landed. The only change anywhere was dropping MASTER 1mo by two hundredths while THE FINAL NUMBER holds exactly at +0.62. **This is exactly the kind of routine, well-evidenced daily cycle the runbook's delegated auto-stamp authority is built for: a single-source claim — so it was auto-stamped rather than left for manual review.** The robustness check remains a standing yellow flag, not a rubber stamp: dropping CLARITY or Tokenization still rounds down on Iran, Fed, or TA. The near-term calendar is dense: Aug 12 CPI and Aug 13 Fed data are the next real Fed triggers inside this month's window, Sept 15 now hosts both the FOMC week and the first CLARITY announcements) are the real thing to watch on Iran.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that this is auto-stamped under Alex's standing delegated authority, so it is the system's official stamped position.
