Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 26, 2026 (FULL WEEKLY refresh) · UPDATED DRAFT — AWAITING MY STAMP

*This is a FULL WEEKLY refresh (score set **2026-09-26_draft2**, draft, awaiting Alex's stamp) against the Sept 26 committed daily baseline (2026-09-26_draft). **CLARITY Act, Iran War Risk, and Tokenization RWA were each independently re-researched and are carried forward unchanged** — nothing found this cycle cleared the sufficiency bar for any of the three. **Fed & Macro RE-RATED DOWN** (31/29/37/44/58 → 27/25/35/43/57): independent full research surfaced a genuinely new primary-sourced cluster the intervening daily touches had missed — Fed Governor Barr's Sept 23 speech ("further policy adjustments are likely to be needed") plus the same-day S&P Global flash PMI showing inflation re-accelerating to its highest since October 2022. See the Fed & Macro pillar report for the full sourcing. **Bitcoin TA (computed) is unchanged** — no new quant refresh this cycle; BTC \$83,381.75 (Sept 25 data).*

THE FINAL NUMBER · SEPTEMBER 26, 2026 · EQUAL-WEIGHT MODEL (UPDATED DRAFT — AWAITING MY STAMP)

−0.07

Neutral overall, essentially flat versus the last committed cycle — −0.07, versus −0.01 on Sept 26 (committed daily). No call-band flip anywhere: the horizon-weighted variant holds Neutral at +0.47, versus +0.52 on Sept 26. Equal-weight mean of the five master window signals (scale −10 to +10). **Only one qualitative pillar moved this cycle** — Fed & Macro, re-rated down on a genuinely new primary-sourced cluster the intervening daily touches missed; CLARITY Act, Iran War Risk, and Tokenization RWA all carried forward unchanged, and Bitcoin TA (computed) is unchanged this cycle — see The Master Table and My Decision below. This is a FULL WEEKLY refresh and is therefore LEFT AS DRAFT, categorically excluded from delegated auto-stamp authority regardless of the size of the move.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled September 26, 2026 (FULL WEEKLY refresh, draft, awaiting Alex's stamp) · BTC \$83,381.75 (GitHub Actions data-fetch workflow, September 25, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, 2026-09-26_draft2, draft; prior committed set: 2026-09-26_draft) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the September 26 FULL WEEKLY refresh (2026-09-26_draft2, draft) vs. the Sept 26 committed daily baseline (2026-09-26_draft). Signals on the -10 to +10 scale.

WINDOW	MASTER (EQUAL-WT)	SEPT 26 (COMMITTED)	THE CALL
1 month	-2.10	-1.99	Bear — slightly deeper. Fed & Macro dropped to -3.13 from -2.58 on Fed Governor Barr's hawkish speech plus a hot flash PMI; CLARITY (-4.76) and Iran (-4.70) remain this window's biggest drags
3 months	-1.63	-1.52	Bear — slightly deeper. Fed & Macro dropped to -3.40 from -2.86; Iran (-5.10) and CLARITY (-2.99) both held
6 months	-0.59	-0.54	Mild Bear — essentially unchanged. Fed & Macro dropped to -1.92 from -1.66 on the same cluster; Iran (-4.03) remains this window's biggest drag
1 year	+1.13	+1.16	Mild Bull — essentially unchanged. Fed & Macro eased to -0.84 from -0.72. Tokenization (+3.37) and CLARITY (+3.17) remain the strongest pillars in this window
3 years	+2.81	+2.84	Bull — essentially unchanged. Every pillar still positive; Fed & Macro eased slightly to +0.73 from +0.83, the only pillar to move this cycle

Formula: per pillar, $\text{Signal} = ((P - 50) \div 50) \times \text{Quality} \times \text{Impact}$, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: $|s| < 0.5$ Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

-0.07 = the equal-weight mean of the five MASTER signals above $((-2.10 - 1.63 - 0.59 + 1.13 + 2.81) \div 5)$. Weighting the longer windows harder (10/15/20/30/25%) gives **+0.47**, same call band (Neutral) as Sept 26. **What moved, and why: one pillar, on a genuinely new cluster the daily touches missed.** This is a FULL WEEKLY refresh — CLARITY Act, Iran War Risk, and Tokenization RWA were each independently re-researched this cycle and held flat, nothing clearing the sufficiency bar. Fed & Macro re-rated DOWN (31/29/37/44/58 → 27/25/35/43/57): Fed Governor Michael Barr — a sitting FOMC voter — said in a Sept 23 speech that "further policy adjustments are likely to be needed" to bring inflation to target, and the same-day S&P Global flash composite PMI showed the strongest private-sector activity since 2021 alongside inflation re-accelerating to its highest combined reading since October 2022 (both primary-sourced, independently well-corroborated). CME's implied October-hike odds jumped from roughly 50% to 70-76% on this same cluster (a market price, corroborating context only). Bitcoin TA (computed) is unchanged this cycle — no new quant refresh; BTC \$83,381.75 (Sept 25 data). **What the number is not:** it is not a crash call, nor a breakout call — it is -0.07, essentially dead flat and barely changed from the Sept 26 committed read — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW**, since full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of the size of the move.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — September 26 FULL WEEKLY refresh (2026-09-26_draft2), DRAFT, AWAITING ALEX'S STAMP. Each pillar report shows its own full score lineage.

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	−4.76	−2.99	−0.68	+3.17	+6.38	Held flat — independently re-researched this cycle; CFTC/SEC staff FAQs (Sept 24-25) apply existing rules, logged not scored
Iran War Risk (20% · 8)	−4.70	−5.10	−4.03	−1.77	+1.41	Held flat at 1/1/14/33/66 — independently re-researched this cycle; continued Houthi-Saudi attacks are a continuation of an already-priced front, not a new state
Tokenization RWA (20% · 8)	+1.15	+2.11	+2.72	+3.37	+4.03	Held flat at 58/65/70/77/86 — independently re-researched this cycle; a NYSE/Blockchain.com MOU (Sept 23-24) is pre-approval, no live product, logged not scored
Fed & Macro (20% · 8)	−3.13	−3.40	−1.92	−0.84	+0.73	RE-RATED DOWN to 27/25/35/43/57 — Fed Governor Barr's Sept 23 hawkish speech plus a hot flash PMI, a cluster the daily touches missed
Bitcoin TA — quant (20% · 8)	+0.96	+1.23	+0.97	+1.73	+1.52	Computed, unchanged methodology: P 58/61/61/68/69, BTC \$83,381.75. No new quant refresh this cycle (data-check only, per the cloud-sandbox network policy)
MASTER — mean of the five	−2.10	−1.63	−0.59	+1.13	+2.81	equal-wt

P lineage (June → Jul 8 → ... → Sept 26 → Sept 26 d2) — CLARITY 55/60/65/85/92 → ... → 15/28/45/72/92 (Sept 16-26, held flat) → **15/28/45/72/92** (Sept 26 d2, held flat). Iran War Risk 50/55/62/75/85 → ... → 3/3/16/35/66 (Sept 23, RE-RATED UP) → 1/1/14/33/66 (Sept 26, RE-RATED DOWN, reversing Sept 23) → **1/1/14/33/66** (Sept 26 d2, held flat). Tokenization 53/57/62/72/85 → ... → 58/65/70/77/86 (Sept 18-26, held flat since the SEC-exemption re-rate) → **58/65/70/77/86** (Sept 26 d2, held flat). Fed & Macro 38/40/46/54/61 → ... → 31/29/37/44/58 (Sept 22-26, held flat) → **27/25/35/43/57** (Sept 26 d2, RE-RATED DOWN on the Barr/PMI cluster). Bitcoin TA is computed every run: 58/61/61/68/69 (Sept 25 data, unchanged this cycle). Each pillar report carries its own full, column-by-column lineage table.

The Story, Window by Window

What the blend is saying on September 26, 2026, a FULL WEEKLY refresh (comparisons below are vs. the Sept 26 committed daily baseline, 2026-09-26_draft)

- **1 month — Bear (−2.10, from −1.99).** Fed & Macro dropped to −3.13 from −2.58 on Fed Governor Barr's hawkish speech plus a hot flash PMI; CLARITY (−4.76) and Iran (−4.70), both held flat, remain this window's biggest drags. The worst window this cycle, slightly deeper.
- **3 months — Bear (−1.63, from −1.52).** Slightly deeper. Fed & Macro dropped to −3.40 from −2.86; Iran (−5.10), CLARITY (−2.99), and Tokenization (+2.11) all held flat.
- **6 months — Mild Bear (−0.59, from −0.54).** Essentially unchanged. Fed & Macro dropped to −1.92 from −1.66 on the same cluster; Iran (−4.03), held flat, remains this window's biggest drag.
- **1 year — Mild Bull (+1.13, from +1.16).** Four of five pillars still positive: Tokenization leads at +3.37, CLARITY +3.17, Bitcoin TA +1.73, Fed eased to −0.84 from −0.72 (now the only negative besides Iran −1.77).

- **3 years — Bull (+2.81, from +2.84).** Every pillar still positive: CLARITY +6.38, Tokenization +4.03, Bitcoin TA +1.52, Iran +1.41, Fed eased to +0.73 from +0.83 — the only pillar to move this cycle, on a genuinely new primary-sourced cluster the intervening daily touches had missed.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

One qualitative pillar moves on a genuinely new primary-sourced cluster while three others hold and Bitcoin TA (computed) is unchanged: Fed & Macro re-rated down after independent full research surfaced Fed Governor Barr's Sept 23 hawkish speech and a hot flash PMI that the intervening daily touches had missed, while CLARITY Act, Iran War Risk, and Tokenization RWA were each independently re-researched and held flat. That's the structure doing its job: a full weekly refresh catches what a light daily touch can miss, moving only what actually clears the sufficiency bar.

THE REAL DISAGREEMENT

Near-term: Bitcoin TA (P 58) and Tokenization (P 58) remain the strongest near-term pillars; Fed & Macro (P 27, freshly re-rated down) and Iran (P 1, near the floor) sit well below, and CLARITY (P 15) remains one of the two weakest near-term reads. The master resolves it honestly: Bear at 1 month and 3 months, as three pillars now drag the same direction at once.

Long-term: the four story pillars average about +3.14 at 3 years (CLARITY +6.38, Tokenization +4.03, Iran +1.41, Fed +0.73) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.1× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A FULL WEEKLY refresh ran today, independently re-researching all four qualitative pillars. Only Fed & Macro's trigger table fired this cycle — a genuinely new cluster the intervening daily touches had missed. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
FIREDDept 23, surfaced this Sept 26 full weekly refresh — hawkish, primary x2	Fed Governor Barr (a sitting FOMC voter) said "further policy adjustments are likely to be needed" to bring inflation to target; the same-day S&P Global flash composite PMI showed the strongest activity since 2021 alongside inflation re-accelerating to its highest since October 2022 — both primary-sourced, well-corroborated, and missed by the intervening daily touches	Fed & Macro: RE-RATED DOWN to 27/25/35/43/57 (1mo/3mo −4, 6mo −2, 1yr/3yr −1); LEFT AS DRAFT, full weekly refresh
Checked Sept 26 (full weekly), no change found	CLARITY Act: CFTC and SEC staff FAQs (Sept 24-25) apply existing rules, not evidence of legislative-passage odds; no new floor scheduling, no Democratic yes votes	CLARITY Act: held flat at 15/28/45/72/92
Checked Sept 26 (full weekly), no change found	Iran War Risk: the WSJ-rejection and Reuters-still-talking stories were already priced into the same-day daily baseline; continued Houthi-Saudi attacks are a continuation of an already-priced front, not a new state	Iran War Risk: held flat at 1/1/14/33/66

Checked Sept 26 (full weekly), no change found	Tokenization: a NYSE Group/Blockchain.com MOU (Sept 23-24) is pre-approval, no live product — logged as context, not scored; DTCC's October launch remains unconfirmed	Tokenization: held flat at 58/65/70/77/86
Sept 30, 2026	August PCE (BEA) — the next hard data point, and the real test of whether the Barr/PMI hawkish cluster is confirmed or reversed	Fed & Macro: the next real test of this cycle's re-rate
Oct 27-28, 2026	Next scheduled FOMC meeting; CME's implied odds of a hike there jumped to 70-76% on this cycle's cluster	Fed & Macro: the next real test of the SEP's hawkish path
Power-law fair value \$141,180	BTC \$83,381.75 sits ~41% below fair value	1yr/3yr windows: the structural bull case's core, essentially unmoved by this cycle's news

The master flip line — Iran's strikes clause fired Aug 30, escalated sharply Sept 1-2, and the Brent >\$100 clause fired Sept 10-11 and continues to hold: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a sustained Brent close above \$100. Two of the four clauses are still live; the WSJ-reported expectation of resumed bombing after the midterms is prospective, not an executed strike, so it does not itself fire the "resumption" clause. **A new, distinct nuclear-track escalation is still in view but has not itself fired a clause:** an actual NPT withdrawal enactment, or a UNSC resolution/sanctions snapback, would be a fresh downside trigger for Iran. The Sept 22 UNGA-sidelines meeting's modest upside move has now been reversed by the reported rejection — not the signed, durable deal the upside flip line itself requires, and now further away than it looked mid-week; whether US strikes actually resume is the nearest-term item to watch. **On CLARITY, the flip line fired on the downside Sept 16** — cloture failed cleanly with no released next-step plan; the lame-duck session is now the only realistic remaining path. A renewed floor vote that actually passes cloture would be the equivalent upside flip. **On Fed & Macro, the flip line is a durable dovish or hawkish reaction function** — a genuinely dovish Fed pivot (a cut, or explicit forward guidance toward one) would be the upside flip; this cycle's Barr speech and hot flash PMI point further hawkish, and the Sept 30 August PCE print plus the Oct 27-28 FOMC delivering the further hike its own SEP projects would confirm this cycle's cut. **On Tokenization, the flip line is unchanged from Sept 18** — a live US venue actually trading under the exemption would be the next upside confirmation; the exemption drifting unused toward its 5-year sunset, or a rescission during the comment period, would be the downside flip. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	−0.15	Neutral
— drop Iran War Risk	+0.62	Mild Bull · yes
— drop Tokenization RWA	−0.76	Mild Bear · yes
— drop Fed & Macro	+0.34	Neutral
— drop Bitcoin TA	−0.41	Neutral
all five in (headline)	−0.07	Neutral

Leave-one-out final (drop any one pillar): −0.76 to +0.62 — SIGN STILL FLIPS (fragile), essentially unchanged from Sept 26's −0.68 to +0.70. Tokenization remains the pillar carrying the upside: drop it and the final number falls to −0.76, still the largest single-pillar swing and the only drop that changes the call band outright besides Iran. Iran remains the largest single negative on its own (drop it and the reading rises to +0.62) even though it held flat this cycle — Fed & Macro's fresh re-rate is what moved the headline this cycle (drop Fed and the reading rises to +0.34, the biggest single-cycle change in this table). Read the fragility honestly: at −0.07 the equal-weight number is essentially dead flat and no single pillar is driving it, and this cycle's one-pillar re-rate barely moved the range at all. Dropping Bitcoin TA moves the reading to −0.41, similar in size to dropping CLARITY Act (−0.15).

My Decision

DRAFT — SEPTEMBER 26, 2026 (2026-09-26_draft2) · FULL WEEKLY REFRESH · FED & MACRO RE-RATED DOWN · AWAITING MY STAMP

MASTER: -2.10 / -1.63 / -0.59 / +1.13 / +2.81 · THE FINAL NUMBER: -0.07 equal-weight (Neutral) / +0.47 horizon-weighted (Neutral) · Leave-one-out range: -0.76 to +0.62 · Score set 2026-09-26_draft2, DRAFT, AWAITING ALEX'S STAMP · Prior committed set: 2026-09-26_draft, which read -0.01 / +0.52 · BTC \$83,381.75 (GitHub Actions data-fetch workflow, Sept 25 data)

This is a FULL WEEKLY refresh (2026-09-26_draft2) against the Sept 26 committed daily baseline (2026-09-26_draft). **CLARITY Act, Iran War Risk, and Tokenization RWA were each independently re-researched and are carried forward unchanged** — nothing found cleared the sufficiency bar for any of the three. **Fed & Macro is the one pillar that moved**, re-rated DOWN (31/29/37/44/58 → 27/25/35/43/57) on a genuinely new primary-sourced cluster — Fed Governor Barr's Sept 23 hawkish speech plus the same-day S&P Global flash PMI — that the intervening daily touches had missed; the computed Bitcoin TA read is unchanged this cycle (no new quant refresh; BTC \$83,381.75, Sept 25 data). This is a FULL WEEKLY refresh, categorically excluded from delegated auto-stamp authority regardless of the size of the move — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.**

Why Fed & Macro re-rated down this cycle. Fed Governor Michael Barr — a sitting FOMC voter — said in a Chicago speech Sept 23, 2026 (PRIMARY: federalreserve.gov/newsevents/speech/barr20260923a.htm; corroborated by American Banker, National Mortgage News, Bloomberg, Reuters/Investing.com, Yahoo Finance) that "further policy adjustments are likely to be needed" to bring inflation to target "in a timely fashion," citing inflation risk having "increased" while labor-market risk has "receded." The same day, S&P Global's flash September composite PMI (PRIMARY: pmi.spglobal.com; corroborated by CNBC x2, FXStreet, Kiplinger, Reuters, Mitrade) showed the strongest private-sector activity since 2021 alongside input-cost and output-price inflation both accelerating to the highest combined reading since October 2022. CNBC's own reporting ties the two together directly: CME FedWatch's implied October-hike odds jumped from roughly 50% to 70-76% on this same cluster. Both facts were independently re-verified via separate searches before use. Why this clears the sufficiency bar and exceeds the Sept 22 precedent: a sitting FOMC voter's own words plus a national flash PMI, both primary-sourced and dated the same day, is stronger sourcing than the two regional soft surveys that drove the Sept 22 one-point move — and it is a genuinely new finding, since the Sept 23 and Sept 26 daily touches had both logged "no new FOMC speaker" and missed it entirely.

Why the other three pillars are untouched. Each was independently re-researched via fresh WebSearch this cycle, not merely carried forward blind. CLARITY Act: CFTC and SEC staff FAQs (Sept 24-25) apply existing rules, not evidence of legislative-passage odds; no new floor scheduling or Democratic yes votes found. Iran War Risk: the WSJ-rejection and Reuters-still-talking stories were already priced into the same-day committed baseline; continued Houthi attacks on Saudi Arabia are a continuation of an already-priced front, not a new state. Tokenization: a NYSE Group/Blockchain.com MOU (Sept 23-24) is a pre-approval MOU with zero live product — logged as context, not scored. See each pillar's own report for its full sourcing.

Why the final number barely moved despite Fed & Macro's re-rate. The move is sized to this pillar's own Sept 3 precedent for a comparable-strength single dated catalyst (1mo/3mo -4, 6mo -2, 1yr/3yr -1) — real but modest, and equal-weighted against four other pillars that held flat. The quant pillar's own read is unchanged this cycle (no new data refresh; the pipeline's last run remains Sept 25), so all of this cycle's movement in the master traces to one pillar.

Stamp decision: LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW. Per CLAUDE.md, full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of the size or direction of any move — weekly remains Alex's own periodic review checkpoint. Research capability was fully available this cycle (WebSearch clean throughout, no EGRESS_BLOCKED hits), and render/selfcheck/verification passed clean. Status: draft, not stamped.

What to watch next, in order: (1) the August PCE print due Sept 30, the next hard read on whether this cycle's hawkish cluster is confirmed or reversed; (2) whether the Fed delivers the further 2026 hike its own SEP median projects at the Oct 27-28 FOMC, where implied odds now sit at 70-76%; (3) whether US strikes on Iran actually

resume, or Iran's Hormuz proposal is formally answered either way; (4) whether any Tokenized Securities Venue actually announces it is live and trading under the Sept 17 SEC exemption, or the NYSE/Blockchain.com MOU advances toward a filing; (5) whether the CLARITY Act's lame-duck path develops into anything scheduled.

Read as an investment posture: near windows are still Bear and the one-year window is Mild Bull, so this is not a month to chase — the number is -0.07 , essentially dead flat and barely moved by one pillar's re-rate. Tokenization remains the largest single swing pillar on the downside (see Robustness above: dropping it alone puts the reading at -0.76 , Mild Bear), while dropping Iran (unchanged this cycle, but still the largest standing negative) gives $+0.62$, Mild Bull — the leave-one-out range still crosses zero, a genuinely fragile reading worth watching.

Sources

Each pillar report carries its full, freshly-checked source list. The master adds the engine and headline references for this September 26 FULL WEEKLY refresh.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Iran_War / Tokenization_RWA Pillar Reports (each independently re-researched this cycle and held flat) / Fed_Macro Pillar Report (independently re-researched and re-rated this cycle, see that report's own What Changed and Sources) and the computed Bitcoin TA Quant Pillar Report.
- **The engine:** engine/blend.py → data/master_blend.json (score set 2026-09-26_draft2 in config/scores.json, status: draft, active_qual_set; prior committed set 2026-09-26_draft; full lineage back to 2026-06-19_committed; final-number window weights in config/settings.json "final_weights") · engine/mapping.py → data/pillar_scores.json (data through Sept 25, 2026).
- **September 26 full weekly refresh — the load-bearing facts checked this cycle:** federalreserve.gov (primary, Fed Governor Barr's Sept 23 speech) plus American Banker, National Mortgage News, Bloomberg, Reuters/Investing.com, Yahoo Finance (5+ corroborating outlets) · pmi.spglobal.com (primary, flash September composite PMI) plus CNBC x2, FXStreet, Kiplinger, Reuters, Mitrade (6+ corroborating outlets) · cftc.gov and sec.gov staff FAQs (Sept 24-25, CLARITY/Tokenization context) · ir.theice.com (NYSE/Blockchain.com MOU, Sept 23-24) plus Yahoo Finance, PYMNTS, Decrypt, Blockhead, News.Bitcoin.com (6+ corroborating outlets).
- **Carried forward from the September 26 light daily touch, re-verified not re-derived this cycle:** Reuters (primary wire, Sept 22, Iranian official's Hormuz-reopening offer) plus 8+ corroborating outlets · WSJ (Sept 25-26, Trump rejects Hormuz proposal) plus 20+ syndicating outlets, CNN's own separate reporting, and on-record White House officials.
- **Carried forward from the September 19 full weekly refresh, not re-checked this cycle:** Roll Call, BGov, The Well News, Troutman Financial Services (Senate 2026 calendar) · Axios, Jerusalem Post, Politico/Political Wire, Israel National News, Breitbart (Sept 17, Trump's Iran remark) · SEC.gov press release 2026-90 and Commissioner Uyeda statement (primary, Sept 17), CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io (exemption mechanics) · SIFMA.org (primary, pushback statement) · U.S. Dept of Labor, Census Bureau/HUD, NAR, University of Michigan Surveys of Consumers (primary, labor/housing/sentiment data).
- **Price:** BTC/USD \$83,381.75 (Sept 25, 2026, data/btc_usd_daily.csv via the GitHub Actions data-fetch workflow); cycle low \$58,526 close (June 30, 2026).
