Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 7, 2026 (light daily touch on the Aug 6 committed set)

*Quant pillar recomputed on today's price. One pillar moved today, on confirmed news; three held flat. CLARITY Act re-rated down at 1mo/3mo: Senate Majority Leader Thune told The Block on the record (Aug 6, ~11pm ET) that cloture was never filed and the CLARITY Act vote is delayed until the Senate returns from its month-long recess in mid-September — the exact "window closing with nothing filed" scenario this pillar's own trigger table had flagged, now confirmed rather than merely anticipated. Iran War Risk held flat: the Iran-Oman joint statement remains unsigned and in final drafting, and the fee dispute (Iran 5-7%, Oman ~3%, US 0%) remains unresolved — materially unchanged from Aug 6. Tokenization held flat: no new dated catalyst found beyond the Aug 3 BlackRock BSTBL/BRSRV launch already reflected in the Aug 6 committed set. Fed & Macro held flat: the H.4.1 balance-sheet release for the week ended Aug 5 finally landed, but its modest uptick (~+\$8.8B reserves) after a much larger prior-week decline reads as settlement noise, not a policy signal; the July BLS jobs report (due today) had not yet appeared in available reporting. Full score lineage (June committed → every draft through August 7) preserved in every report. **Today's scores have been auto-stamped committed by Alex under delegated daily auto-stamp authority.***

THE FINAL NUMBER · AUGUST 7, 2026 · EQUAL-WEIGHT MODEL

+0.54

Mild Bull overall, time-arbitraged — the 1-month window slipped back from Mild Bear into outright Bear as the CLARITY delay confirmation landed. Equal-weight mean of the five window signals (−10 max bear ... +10 max bull). Horizon-weighted variant: **+1.12**. The structure underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" signal, and today's near-end storm intensified slightly (down from Aug 6's +0.58 / +1.14) as CLARITY's confirmed delay outweighed a small quant-driven bounce and three pillars holding flat.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

The Master Table Compiled August 7, 2026 · BTC \$65,000.00 (Bitstamp, last completed daily close, August 7, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 7 draft) · Not Financial Advice
The whole thesis in five rows, on the August 7 draft (a light daily touch on the Aug 6 committed set). Signal range –10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 6 MASTER	THE CALL
1 month	–1.63	–1.49	Bear — CLARITY's confirmed delay pushes the window back below the –1.5 boundary
3 months	–1.08	–1.00	Mild Bear — the September FOMC still sits inside this window at majority-hike-priced odds
6 months	+0.21	+0.19	Neutral — CLARITY and Tokenization still carry this window; Iran and Fed still drag harder
1 year	+2.09	+2.09	Bull — all five pillars still positive; the thesis window, unmoved
3 years	+3.11	+3.11	Strong Bull — law + adoption + cycle + value, unmoved

Formula: per pillar, Signal = ((P – 50) ÷ 50) × Quality × Impact, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: |s| < 0.5 Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Aug 6 Master" is yesterday's committed reading, for exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.54 = the equal-weight mean of the five MASTER signals above ((–1.63 – 1.08 + 0.21 + 2.09 + 3.11) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.12**. Both still read **Mild Bull**, down slightly from Aug 6's +0.58 / +1.14. What moved: the 1-month window crossed back below the –1.5 boundary from Mild Bear into outright Bear (–1.49 → –1.63) as CLARITY Act re-rated down (P 38/47/58/82/92 → 32/44/58/82/92) on Senate Majority Leader Thune's on-record confirmation that cloture was never filed and the vote is delayed to September. Iran War Risk, Tokenization, and Fed & Macro all held flat — none had a fresh, sufficiency-clearing trigger today. Bitcoin TA ticked up fractionally (price +1.2% vs. Aug 6's finalized close) but not enough to offset CLARITY's drag. The 1-year and 3-year windows didn't move — this remains a near-term chop, structurally bullish read.

The Full Pillar Matrix

Every pillar's signal on every window — August 7 draft scores (each report shows the full June → ... → August 7 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	−2.45	−0.82	+1.09	+4.61	+6.38	Re-rated down (cloture delay confirmed)
Iran War Risk (20% · 8)	−2.50	−1.98	−1.01	+0.62	+2.38	Held flat (joint statement still unsigned)
Tokenization RWA (20% · 8)	+0.29	+1.27	+2.04	+3.00	+3.92	Held flat (no new catalyst found)
Fed & Macro (20% · 8)	−2.18	−2.31	−0.64	+0.48	+1.25	Held flat (H.4.1 uptick read as noise)
Bitcoin TA — quant (20% · 8)	−1.32	−1.57	−0.44	+1.73	+1.60	Aug 7 computed
MASTER — mean of the five	−1.63	−1.08	+0.21	+2.09	+3.11	equal-wt

P lineage (June → Jul 8 → ... → Jul 31 → Aug 1 → 2 → 3 → 4 → 5 → 6 → 7) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 38/47/58/82/92 (Jul 31) → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → 38/47/58/82/92 (Aug 5, committed) → 38/47/58/82/92 (Aug 6, committed) → **32/44/58/82/92** (Aug 7) · Iran 50/55/62/75/85 → 40/47/55/70/83 → ... → 16/25/37/55/77 (Jul 31, held) → 19/26/37/55/77 (Aug 1) → 15/23/37/55/77 (Aug 2) → 15/23/37/55/77 (Aug 3, held) → 19/27/39/56/77 (Aug 4) → 22/29/40/56/77 (Aug 5, committed) → 24/31/41/56/77 (Aug 6, committed) → **24/31/41/56/77** (Aug 7, held) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 50/57/65/74/85 (Jul 31, held) → 50/57/65/74/85 (Aug 1-4, held) → 50/57/65/74/85 (Aug 5, committed) → 52/59/65/74/85 (Aug 6, committed) → **52/59/65/74/85** (Aug 7, held) · Fed 38/40/46/54/61 → 35/36/42/52/61 → ... → 34/33/45/54/62 (Jul 31, held) → 34/33/45/54/62 (Aug 1-4, held) → 34/33/45/54/62 (Aug 5, committed) → 34/33/45/54/62 (Aug 6, committed) → **34/33/45/54/62** (Aug 7, held) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 37/36/45/67/70 (Jul 31) → 37/34/44/67/71 (Aug 1) → 37/35/44/67/71 (Aug 2) → 37/34/44/67/71 (Aug 3) → 37/35/44/67/70 (Aug 4) → 38/36/44/68/70 (Aug 5) → 38/36/44/68/70 (Aug 6) → **39/36/45/68/70** (Aug 7). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on August 7, 2026 (comparisons below are vs. the Aug 6 committed baseline)

- **1 month — Bear (−1.63, was −1.49).** CLARITY Act broke down (−2.45, was −1.63) as Thune confirmed cloture never got filed and the vote is delayed to September — the pillar's single largest daily move in weeks. Iran (−2.50, unchanged), Fed (−2.18, unchanged), and Tokenization (+0.29, unchanged) all held. Bitcoin TA ticked up slightly (−1.32, was −1.44) on the modest price bounce.
- **3 months — Mild Bear (−1.08, was −1.00).** CLARITY trimmed (−0.82, was −0.41) on the same confirmed delay — a September return still falls inside this window, but with less runway before the midterm calendar crowds the floor. Iran (−1.98), Fed (−2.31), and Tokenization (+1.27) held; the quant tape held essentially flat (−1.57).
- **6 months — Neutral (+0.21, was +0.19).** Tokenization remains the strongest pillar here (+2.04, unchanged); CLARITY still holds constructive (+1.09, unchanged — the delay doesn't touch this window); Iran's drag is unchanged (−1.01); the Fed drag is unchanged (−0.64); the tape's drag eased slightly (−0.44, was −0.53). Historical average cycle bottom (~Aug 31, cycle month 27.6) sits inside this window.
- **1 year — Bull (+2.09, was +2.09).** All five pillars still positive and unchanged today: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Iran +0.62, Fed +0.48. Price sits 53% below power-law fair value (\$137,037). The window the whole thesis is built around, unmoved.
- **3 years — Strong Bull (+3.11, was +3.11).** Every pillar positive and the structural case compounds, unchanged today: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.60, Fed +1.25. A single day of news, by

design, doesn't move this window.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) still trace a very similar path: P 34/33/45/54/62 vs 39/36/45/68/70 — within 5 points at 1 and 3 months, and now identical at 6 months (45 vs 45). Two methods that share no inputs keep landing on "soft near term, still-questionable half-year." Iran remains the worst 1-month signal in the set (−2.50), with CLARITY now close behind (−2.45) after today's confirmed cloture delay — two independent stories (a stalled war-risk deal, a stalled Senate vote) both landing near-term bearish at once.

THE REAL DISAGREEMENT

Near-term: Tokenization is the only pillar reading positive near-term (P 52); CLARITY dropped further below a coin flip (P 32) on the confirmed cloture delay; the Fed and the tape both lean bearish (P 34, 39); Iran remains a clear risk-off vote (P 24). The master resolves it honestly: Bear now, and the one positive pillar gets paid in the windows where its evidence is strongest.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Fired today are already IN the August 7 draft scores. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Fired Aug 6, confirmed Aug 7	Senate Majority Leader Thune told The Block on the record that cloture was never filed and the CLARITY Act vote is delayed until the Senate returns from recess in mid-September ("queued up first thing when we come back")	CLARITY 1mo/3mo re-rated down — already IN this draft
Checked Aug 7, unchanged	The Iran-Oman joint statement remains unsigned, still in final drafting; the fee dispute (Iran 5-7%, Oman ~3%, US 0%) remains unresolved, with US officials confirming no fees apply until a final agreement	Iran held flat
Checked Aug 7, none found	No new dated RWA/tokenization catalyst beyond the Aug 3 BlackRock BSTBL/BRSRV launch already reflected in the Aug 6 committed set	Tokenization held flat
Fired Aug 6 (published)	Fed H.4.1 for the week ended Aug 5: total assets and reserve balances both up modestly (~+\$8.8B reserves), reversing the prior week's -\$77.6B drop	Read as noise, not signal — Fed held flat

Pending	July BLS employment report, due 8:30am ET Aug 7 — not yet in available reporting as of this check	Fed & Macro's next real re-rating trigger
Mid-September	Senate returns from recess; Thune says CLARITY is "queued up first thing when we come back"	CLARITY: a vote actually happening = re-rate 3mo up; continued slippage = re-rate down further
Pending	Actual signing of a Hormuz agreement — the fee dispute (5-7% vs 3% vs 0%) is the thing to watch, not the route-map understanding alone	Resolved favorably = re-rate Iran up further; deal collapses over fees = re-rate down
September	Next FOMC (with SEP/dot plot), Sept 15-16; Senate returns from recess	Both pillars' real re-rating events — watch closely
~Aug 16	Islamabad Memorandum 60-day window expires	Iran: deal/extension = up hard; formal collapse = down hard
~Aug 31	Historical average cycle-bottom month (cycle month 27.6 currently) passes	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value \$137,037	BTC \$65,000.00 sits 53% below fair value	1yr/3yr windows: the gap the structural bull case is priced against

The master flip line, re-leveled: a confirmed new US combat death, a resumption of US strikes on Iran proper, or a sustained Brent close above \$100 (Iran); a September FOMC hike landing into still-historically-low claims (Fed); or the Senate returning from recess with no released, WH-confirmed CLARITY ethics text and no floor vote (CLARITY) — any one of these firing would be a genuine escalation, not just today's re-rate. A signed, durable Hormuz reopening — fee dispute resolved, not just the route map — would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WT)	CALL · STILL POSITIVE?
— drop CLARITY Act	+0.23	Neutral · barely, yes
— drop Iran War Risk	+0.80	Mild Bull · yes
— drop Tokenization RWA	+0.15	Neutral · barely, yes
— drop Fed & Macro	+0.84	Mild Bull · yes
— drop Bitcoin TA	+0.67	Mild Bull · yes
all five in (headline)	+0.54	Mild Bull

Every leave-one-out final number stays **positive** (+0.15 to +0.84) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-negative near-term pillars) still round down to **Neutral** rather than Mild Bull, essentially unchanged from prior days' thinner-than-usual robustness result. The horizon-weighted final (+1.12) is more robust and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — CLARITY's confirmed delay narrowed its own leave-one-out margin (+0.20 → +0.23, i.e. dropping it now helps the number slightly more than yesterday) but didn't change which two pillars are load-bearing for the headline call. This robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

✓ **COMMITTED — AUGUST 7, 2026 (LIGHT DAILY TOUCH ON THE AUG 6 COMMITTED SET) · AUTO-STAMPED BY ALEX**

MASTER: -1.63 / -1.08 / +0.21 / +2.09 / +3.11 · THE FINAL NUMBER: +0.54 (Mild Bull, time-arbitraged)

This is a light daily touch on top of yesterday's committed set: the quant pillar was recomputed on today's price; CLARITY Act re-rated down (38/47/58/82/92 → 32/44/58/82/92) after Senate Majority Leader Thune confirmed on the record that cloture was never filed and the vote is delayed until the Senate returns from recess in mid-September — exactly the scenario this pillar's own trigger table had flagged as a re-rate-down trigger, now confirmed. Iran War Risk, Tokenization, and Fed & Macro all held flat: the Iran-Oman joint statement remains unsigned and the fee dispute unresolved; no new tokenization catalyst was found; Fed H.4.1 landed but its modest uptick reads as noise, not a policy signal. The full lineage (June committed → every draft through August 7) is printed in every report. Today's scores have been auto-stamped committed under delegated daily auto-stamp authority: **(1)** the move is a light daily re-rate, not a full weekly refresh, **(2)** the largest single-window move (CLARITY 1mo, 6 points) stays under the 8-point threshold, **(3)** the equal-weight FINAL NUMBER's call band held at Mild Bull, and **(4)** the CLARITY move rests on a direct, on-record quote corroborated by three independent outlets — not a single source. The robustness check remains a standing yellow flag, not a rubber stamp: dropping CLARITY or Tokenization still rounds the call down to Neutral — the headline conclusion continues to lean more heavily on those two pillars than on Iran, Fed, or TA. The near-term calendar is dense: the July jobs report is still pending, the Senate's mid-September return is the next real CLARITY test, and the Hormuz fee dispute is the real thing to watch on Iran, not the route-map understanding alone.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that the "Mild Bull" headline still leans on two of the five pillars more than the other three.

Sources

Each pillar report carries its full, freshly-verified source list for today's research. The master adds the engine and headline references for this August 7 update.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Iran_War / Tokenization_RWA / Fed_Macro Pillar Reports (daily re-research Aug 7) · CoinPicks_Bitcoin_TA_Quant_Pillar_Report (computed Aug 7).
- **The engine:** engine/blend.py → data/master_blend.json (score set 2026-08-07_draft in config/scores.json, full lineage back to 2026-06-19_committed; final-number window weights in config/settings.json "final_weights") · engine/mapping.py → data/pillar_scores.json (Bitstamp data through Aug 7, 2026).
