The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

*Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31** — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). **P HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was **AUTO-STAMPED** alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92. **Sept 3: held flat a further time** — nothing material found on*

any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's own commit message claimed this set was "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call). **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P. **HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time** — re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P. **HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found. **HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again** — re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50%→30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found. **HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.** Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news, **September 4**) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule. **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)** held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet. **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)"** — the new last TRUE committed baseline. **A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)** — the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his support on remains largely unchanged from the July draft, and

no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. ***P HELD FLAT at 32/47/58/82/92*** *— the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar for a move in either direction.* ***This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW.*** *The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.* ***Sept 15 (2026-09-15_draft)*** *re-rated UP to 37/53/62/83/92 on the White House's ethics concession;* ***Sept 16 (2026-09-16_draft)*** *re-rated DOWN sharply to 15/28/45/72/92 when the Sept 15 cloture vote FAILED 49-50;* ***Sept 17 (2026-09-17_draft)*** *held flat, no new dated development.* ***Sept 18 (2026-09-18_draft, this version): held flat again at 15/28/45/72/92*** *— Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor, which is consistent with, not incremental to, the existing read; no new dated development found. AUTO-STAMPED per delegated daily authority, the new last TRUE committed baseline.* ***Sept 19 (2026-09-19_draft, this version), a FULL WEEKLY refresh — the first deep multi-source research dive since Sept 12:*** *independently re-verified via a fresh primary-source WebSearch pass — no new Senate floor vote is scheduled since the Sept 15 cloture failure (49-50); Sen. Tillis's motion to reconsider remains only a procedural placeholder, and no outlet reports a scheduled re-vote. The Senate's own 2026 calendar (Roll Call, BGov, Troutman Financial Services reporting) shows it out for nearly all of October and the first week of November for the midterms (Election Day Nov 3), returning briefly (roughly two days) before the Nov 11 Veterans Day observance, then working roughly three weeks before Thanksgiving and three weeks in December before Christmas recess — leaving the post-election lame-duck session as the only realistic remaining 2026-Congress opportunity, per multiple independent outlets (Motley Fool, Sept 18; CryptoBriefing; CoinGeek; CryptoSlate). NEW THIS WEEK, logged as context and explicitly NOT used to move P: on September 17, 2026 the CFTC filed a prerule action with the White House OIRA (RIN 3038-AF80, "Regulation of Crypto Asset Transactions and Crypto Asset Markets") — confirmed via CFTC's own pressroom reference plus independent corroboration (The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein, all dated Sept 18) — an administrative fallback track running in parallel to, not a substitute for, the stalled legislative one, and its own timeline (no proposed rule before 2027) sits beyond this pillar's near-term horizons. Market prices, reported not scored: Polymarket's "signed into law in 2026" contract reads roughly ~8% as of Sept 19 (down sharply from ~82% in February 2026, before the Trump crypto-income ethics dispute intensified), though this cycle's search results showed some inconsistency on the exact current level — treated as approximate/directional, not a precise point figure; Kalshi's "CLARITY Act law before Jan 1, 2027" contract, a distinct longer-horizon market, priced around 31 cents (~31% implied), up from 24 cents days earlier. No corrections were needed to any previously reported fact this cycle — the 49-50 cloture count, the Tillis procedural-vote mechanic, and the list of seven Democratic holdouts (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) all check out against this week's independent reporting.* ***P HELD FLAT again at 15/28/45/72/92.*** *This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-19_draft is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-18_draft (15/28/45/72/92), auto-stamped Sept 18.*

sat unanswered at the White House since roughly Aug 1-3. Long-term still high — even the bears argue "slips past the midterms," not "dies."

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of September 16, 2026 (LIGHT DAILY touch, 2026-09-16_draft) — the cycle in which the Sept 15 cloture vote resolved, and failed

The crowd: treated the Sept 13-14 ethics concessions as the story and priced in a real shot at cloture — Polymarket's 2026-signed-into-law odds roughly doubled to ~35% on the c Polymarket's odds cratered to ~5% within a day.

Me: re-rated down hard on the near windows — 37/53/62/83/92 → 15/28/45/72/92 — because the vote outcome is now a resolved fact, not a probability: named Democratic negotia scheduled second try, and Lummis herself ruled out a quick floor return. The Senate calendar reinforces the near-term read — senators leave for the midterms in early October and c windows nearly as hard: the ethics concessions the White House already made are real and don't evaporate just because this particular vote failed, so they remain a foundation for a

My edge: the crowd's ~5% post-vote Polymarket read and my 15 (1mo) / 28 (3mo) P aren't the same question — Polymarket prices signature into law within calendar 2026, a much r was a real, unambiguous loss, not a "gap narrowed, didn't close" story anymore — the gap held, decisively, and I'm not going to soften that by clinging to the pre-vote optimism I pric

The Facts

As of October 10, 2026 (FULL WEEKLY refresh, score set 2026-10-10_draft, LEFT AS DRAFT). Every figure below was independently re-derived from a primary source in this cycle's adversarial-verification pass

★ NEW THIS CYCLE — OCTOBER 5–10, 2026

★ PRIMARY/MULTI-SOURCE — the CFTC published an Advance Notice of Proposed Rulemaking on October 5, 2026. CFTC Release No. 9307-26, RIN 3038-AF80 — "Regulat *leveraged/margined retail crypto transactions* (not ordinary spot trading) and creates a new "Crypto Asset Market" (CAM) designated-contract-market sub-category, a narrower calendar date because that date was not independently confirmed this cycle. **Independently adversarially re-verified** via a second, non-overlapping set of sources from this cyc of which confirm the release number, date, both proposed-regulation titles, the CEA legal basis, the new CAM category, and the 60-day comment window.

Context, correctly scoped. The ANPRM was **issued the same day as CFTC Chair Michael Selig's related remarks on crypto market structure at the Fordham Law Blockchain R** (CryptoBriefing) directly frames the ANPRM as announced at that specific speech; the rest of this cycle's coverage treats the ANPRM as a Commission action in its own right, and

This is a continuation, not a new track. RIN 3038-AF80 had been parked at prerule/OIRA status since a Sept 17 filing (already logged in this report); it has now actually published remain live and are scored separately by this pillar's existing scope.

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 26 – OCTOBER 3, 2026

★ PRIMARY — the Senate's last votes of the session were Sept 30, 2026, and none of them touched this bill. Verified individually on senate.gov's own roll-call pages: **vote 256 47**; **vote 254** (12:51 p.m.) rejected cloture on the motion to proceed to H.R. 9340, the utility/ratepayer cost-recovery bill, **57–43** against the 60-vote threshold; and **vote 253** (11:58 the session, and there is no CLARITY action anywhere in votes 250–256.

★ PRIMARY — the Senate is now adjourned until November 9, and the arithmetic of the 1-month window follows from that. dailypress.senate.gov records, verbatim, that on Th forma sessions on Oct 5 (4:00 p.m.), 6, 9, 13, 15, 19, 22, 26, 29 and Nov 2 and 5 — every one of them without business. It states: "The Senate will return for business on **Monday,** closes around Nov 3 — *before* the chamber returns. **That is why 1mo falls five points: the residual odds of floor action inside this window are not merely low, they are zero.**

★ Baseline re-confirmed, with one precision fix. The Sept 15, 2026 2:19 p.m. cloture vote on the motion to proceed to **H.R. 3633** failed **49 Yea – 50 Nay – 1 not voting** against th Republican Nays are on the official tally: **Collins (ME), Hawley (MO), Moran (KS) and Tillis (NC)**. Tillis's motion to reconsider is recorded for Sept 15, remains the bill's latest action

CORRECTED this cycle — the continuing resolution's dates. This report had implied both chambers acted around Sept 1–2. They did not. **H.R. 6500**, the Continuing Appropriatio (Roll Call 228); the **House concurred Sept 1, 2026 at 2:03 p.m., 370–48** with 14 not voting (Roll Call 286); and the President signed it **Sept 2, 2026**, funding agencies at FY2026 l duck floor availability for a crypto bill, and is a second reason 3mo is trimmed by only two points.

REPORTED, NOT SCORED. Multiple outlets now call the lame duck the bill's "last realistic opportunity" while simultaneously calling it "a long shot" and "very complicated." That is held one nomination hearing Oct 1 at 10:00 a.m. in Dirksen 538; it was not CLARITY-related, and the nominee's identity was not retrievable, so no claim is made about it.

SOURCING LIMIT, stated plainly. congress.gov returned HTTP 403 on both the bill-actions and all-actions endpoints, as did its daily-digest endpoint. The "latest action" status th below the rest of this page, and said so rather than glossed.

The Other Side

The strongest honest case this is wrong

- ★ **★ NEW, and it strengthens the bear case — the party that wanted this bill lost four of its own.** The Sept 15 failure was not a clean party-line shortfall. **Collins (ME), Hawley (MO** eleven Democrats to reach 60 while simultaneously repairing its own conference — a materially harder problem than the one this report had been describing, and the honest read
- **The composition problem cuts the other way too, and is reported as a MARKET PRICE, not scored.** A Sept 24 analysis argues the likeliest path is now a 2027 restart in a differe **are market prices in a single outlet** — barred from moving a P on both counts, and never to be confused with an institutional forecast — so they appear here as the strongest hon different people, which is a real risk to the 72 this report carries at 12 months.
- **The administration itself may be de-prioritising the legislative route.** A White House adviser said on Sept 23 that the lame duck "is not a significant focus" and that work is shift — but it points the same direction as the CFTC's own market-structure rulemaking groundwork, and if confirmed it would mean the ceiling on this pillar is administrative action rat
- ★ **★ RESOLVED, Sept 15-16: the bear case below won.** Multiple bullets in this section flagged the cloture vote as more likely to fail than the ethics concessions suggested — Punch failed 49-50, a wider margin than even those bears expected. This report's own 1mo/3mo re-rate down to 15/28 (from 37/53) reflects that the bear case, not the concession-drive hypothetical in them still applies.
- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the ser evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the et
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing clot make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of misse September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency — and now the CFTC has said the same thing.** If both the White House-aligned SEC and CFTC believe they can d speech directing staff to explore a fallback rulemaking (verified against cftc.gov) is the second such regulator-level statement this summer — a slow bleed on legislative priority,
- **Prediction markets have drifted lower again, not higher.** DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21% — near the lower end of the range this rep real signal even if it doesn't clear the sufficiency bar to move P on its own; a bear could reasonably argue this report is being too conservative in not letting corroborated market p
