Iran War Risk Pillar Report

Middle East Conflict Risk — Researched, Scored, and Personally Committed

*Originally written June 19, 2026; scores committed by me June 19, 2026. Fully re-researched July 8, 13, 18, 25, and 30, 2026, and again as a full weekly refresh on August 8, 2026 (P cut at 1mo/3mo, 24/31/41/56/77 → 20/28/41/56/77, committed and stamped by Alex, last COMMITTED baseline). The Aug 16-22 gap saw four abandoned drafts: Aug 17 (held flat), Aug 18 (cut to 17/25/38/54/76), Aug 20 (cut to 16/24/38/54/76, left for manual review over a UAE missile claim), and Aug 21 (a session got partway through delivering the Aug 20 numbers — 2 of 6 reports touched, no render/selfcheck/archive/commit — before stopping). None were rendered, archived, or committed. An Aug 22 morning catch-up cycle (score set **2026-08-22_draft**) independently re-verified the gap via four parallel primary-source research passes, then adversarially fact-checked the load-bearing new claims before delivery — a step that caught a real error (see below) — and cut P to 14/22/38/54/76, delivered as a draft flagged for manual review. **Correction #1 (confirmed accurate):** the UAE missile-attack claim (Aug 18) remains single-source (UAE MoD only, Iran denies and calls it a possible "false flag") and was NOT the first direct attack on the UAE as prior drafts framed it — UAE was hit by a missile/drone barrage Apr 1-8 and again at its Fujairah port May 4, both Iran-attributed by UAE's own government and predating Aug 18; that "novel escalation vector" framing is retired. **Correction #2 (a genuine miss, caught on adversarial re-check):** that draft initially described a fatal strike on the bulker Minoan Dignity (chief engineer killed, Aug 17-18) as "the first confirmed fatality" in the Hormuz tanker campaign — that is FALSE; it is one of a cumulative toll of seafarer deaths since the campaign began late February 2026 this report never previously surfaced or scored on. The Iranian vessel seizure (tanker Amara, held near Qeshm Island since Aug 17, first since June 22) IS confirmed accurate. **THIS VERSION (score set 2026-08-22_draft2) is a separate, later-in-the-day FULL WEEKLY refresh** — the first deep multi-source dive since Aug 8 — that independently re-researched the pillar and ran a second, dedicated adversarial-verification pass specifically re-checking (a) whether the casualty-toll figure holds up and (b) whether anything was missed Aug 19-22. It holds up, but softer than a clean number: cross-checking Wikipedia's "2026 Strait of Hormuz crisis" infobox (18 total), a mid-July gCaptain snapshot ("at least 15"), and IMO's own incident tracker (19 seafarer deaths, but scoped to the broader Middle East, not Hormuz cleanly) puts the honest range at **15-19 cumulative deaths (17-18 by the most Hormuz-specific trackers)**, not a flat "18th death" — that softened framing is carried everywhere below. A UAE missile-attack claim the adversarial pass initially flagged as a possible miss turned out, on reconciliation, to be the same Aug 18 episode already in the draft baseline, not a second incident. No new kinetic incident was found Aug 19-22. **P HELD FLAT this cycle at 14/22/38/54/76 — left as draft at delivery (full weekly refreshes are categorically excluded from auto-stamp), then reviewed and COMMITTED BY ALEX on August 23** after independent re-verification of the math and the research trail; see My Decision below. A daily catch-up draft dated August 28, 2026 (score set **2026-08-28_draft**) re-checked two more Hormuz tanker incidents and a single-source Iran-Oman revenue-sharing claim, holding P flat — but that draft was never rendered, selfchecked, archived, or committed, and is treated as abandoned/superseded, the same discipline this report has applied to every other interrupted session (Aug 17, 18, 20, and 21). **THIS VERSION (score set 2026-08-29_draft) is a NEW, independent FULL WEEKLY refresh** against the last committed baseline (2026-08-22_draft2) — the first cycle in several weeks to surface a genuinely two-sided evidence ledger: a confirmed, crypto-specific sanctions escalation (the Aug 24 "Operation Economic Outcast" package, the first Iran sanctions action to explicitly name digital assets as a sanctionable sector and list 30 on-chain addresses, confirmed via direct fetch of home.treasury.gov) against a confirmed de-escalation upgrade (Oman's own Foreign Ministry, not just Iran, co-confirming a temporary Hormuz corridor Aug 25, confirmed via direct fetch of fm.gov.om). The two roughly offset, alongside a first-of-the-crisis Hormuz transit uptick and a second straight weekly Brent decline on the bull side, and two more tanker incidents plus a firmer casualty count on the bear side. **P HELD FLAT at 14/22/38/54/76 — left as a draft, not auto-stamped,** because this is a*

full weekly refresh, categorically excluded from delegated auto-stamp authority regardless of move size (here, zero). See My Decision below. ***THIS VERSION (score set 2026-08-31_draft) is a light daily catch-up*** *covering the Aug 29-31 gap: on Aug 30, US forces struck IRGC rocket/mine-launchers on Iran's Larak Island — the first US strike on Iranian territory since Jul 29 — directly firing this pillar's own pre-declared flip line ("a resumption of direct US strikes on Iran proper"). Iran retaliated with ballistic missiles on two US-linked Jordan airbases hours later; Jordan intercepted 8 missiles; no confirmed US casualty.* ***P RE-RATED DOWN to 9/17/34/51/75*** *(from 14/22/38/54/76), front-loaded and held under 8 points per window. This is a light daily touch, not a full weekly refresh, no window moved >8 points, and the master FINAL NUMBER's call band did not flip vs. the last stamped set —* ***AUTO-STAMPED per delegated authority. THIS VERSION (score set 2026-09-01_draft) is a further light daily catch-up*** *covering Aug 31-Sept 1: escalation continued into a second day — a THIRD Hormuz tanker hit (the VLCC Senegal Prosperity, Aug 31), a disputed Iranian claim of a drone strike on the UAE's Al Minhad Air Base (UAE MoD denies the target claim but confirms it intercepted an Iranian drone over its waters), and Trump on-record Aug 31 still weighing further strikes on Iran.* ***P RE-RATED DOWN again, more modestly, to 7/15/32/50/75*** *(from 9/17/34/51/75) — no window moved more than 2 points, well under the 8-point auto-stamp threshold.* ***AUTO-STAMPED per delegated authority*** *— the new last COMMITTED baseline.* ***THIS VERSION (score set 2026-09-02_draft) is a further light daily catch-up that turned into the sharpest single-cycle move since Aug 30****: CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran — roughly 50x the scale of the single Aug 30 Larak strike — including, for the first time in this war, direct US strikes on Iranian government oil tankers under a new "tanker for tanker" policy. A US strike reportedly hit a wedding party in Kuhestak, Hormozgan (4+ dead per the Hormozgan governor's office, including a 4-year-old, 60+ injured) — flagged here as SINGLE-NARRATIVE-SOURCED at the core fact level (Iranian state/local authorities; CENTCOM has neither confirmed nor denied it), so it does not by itself move P, but it is the reported trigger for Iran's response: coordinated IRGC ballistic-missile/drone strikes Sept 2 on US-linked bases in FOUR countries at once (Jordan, Bahrain, Iraq, Kuwait) — larger in scale than the single-state Aug 30-31 Jordan strike, but all four are repeat targets, so the "widening to a further NEW state" flip-line clause does not fire.* ***P RE-RATED DOWN sharply to 1/9/27/47/74*** *(from 7/15/32/50/75), front-loaded and kept under 8 points per window.* ***COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026****, retroactively, under Alex's Sept 3 widened delegated daily auto-stamp policy: a call-band flip and the size of a move are no longer disqualifying on their own. The wedding-casualty fact was correctly kept single-narrative-sourced and never used to move P, and nothing about the sourcing or the research itself changed — only the stamping threshold did. This remains the last TRUE committed baseline: 1/9/27/47/74.* ***Sept 3:*** *Iran fired a second retaliatory wave on Kuwait and UAE — both repeat targets, no US-manned facility hit, widening clause does not fire.* ***P HELD FLAT. Sept 5, light daily catch-up (2026-09-05_draft):*** *held flat again — the Reuters weapons-expert corroboration of the Sept 1 wedding strike resolves attribution of an already-priced event, not new escalation; a Sept 5 Iranian-media report of a US strike on the tanker STARK 1 near Kharg Island is single-narrative and not used to move P.* ***CORRECTION:*** *that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here, not corrected retroactively.* ***Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:*** *independently re-verified via WebSearch — the STARK 1 incident is real and developing (Iran International separately obtained video of US radio warnings, and AP itself frames it as an Iranian accusation, not a confirmed fact) but CENTCOM has still not confirmed or denied it, so per the sufficiency rule it is NOT used to move P. None of this pillar's flip-line clauses independently fired this week.* ***HELD FLAT at 1/9/27/47/74. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6 light daily catch-up (score set 2026-09-06_draft):*** *CENTCOM's own on-the-record press release now confirms the Sept 5 tanker strike this report had withheld pending confirmation — and reveals it was materially more serious than known: THREE Iranian tankers (M/T Downy, M/T Stark 1, M/T Kylo) struck in retaliation for an unprovoked IRGC ballistic-missile attack on two US Navy warships, both of which evaded.* ***P RE-RATED DOWN, modestly, to 1/8/25/45/73*** *— no window moved more than 2 points, no flip-line clause independently fires (no confirmed US casualty, no widening to a new state, Brent short of $100), and the master call band held Neutral → Neutral.* ***AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-08_draft) is a further light daily catch-up*** *covering Sept 6-8: the new fact is Iran SNSC secretary Mohsen Rezaei's on-record Sept 6-7 announcement (state TV, Press TV, Tehran Times) that Iran will declare a new "restricted zone" from the US Navy's blockade line into the Persian Gulf, sanctioning any vessel that enters — corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu, GlobalSecurity.org) but explicitly a THREAT OF INTENT, not yet executed ("further details... yet to be announced" per Al Jazeera's Sept 7 explainer). No flip-line clause fires (DCAS still 18, Brent ~$97.29 Sept 7, no new state).* ***P RE-RATED DOWN, modestly, to 1/7/24/44/73*** *(from 1/8/25/45/73) — no window moved more than 1 point.* ***AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-09_draft) is***

a further light daily catch-up *covering Sept 8-9: CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship") confirms US forces destroyed FIVE more Iranian crude oil carriers on Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Gulf of Oman) and M/T Derya (Kharg Island) — after the IRGC targeted a US Navy warship with ballistic missiles TWICE over the preceding two days, corroborated by 5+ independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org); both Iranian missile attempts were evaded, no US personnel harmed. Separately, Brent crude crossed $100/bbl intraday Sept 9 for the first time since July 24 (CNBC, ABC News; ~$100.44, +2.57%) — a single-day intraday cross, not this pillar's own "sustained Brent >$100" flip-line threshold, so it does not independently fire that clause, but it is the closest this cycle has come to the flip line. No flip-line clause fires (no US casualty, no new state, only an intraday Brent cross).* ***P RE-RATED DOWN, modestly, to 1/6/23/43/72*** *(from 1/7/24/44/73) — no window moved more than 1 point.* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***THIS VERSION (score set 2026-09-10_draft) is a further light daily catch-up*** *covering Sept 9-10: two new dated facts. CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military). Jordan is a repeat target, so the widening clause does not fire, and both sides confirm no casualties, so the US-casualty clause does not fire either. Separately, Iran-aligned Houthi forces seized the Yemeni port of Mocha Sept 10, closing in on the Bab el-Mandeb Strait — a second global chokepoint distinct from Hormuz — confirmed by 5+ outlets (The Media Line, Times of Israel, Al Jazeera, SCMP, Jerusalem Post, Cyprus Mail), but the same Houthi/Yemen actor already priced, and no strait closure has actually been executed, so this does not independently fire a clause either. Brent has now traded near/above $100/bbl for a second straight session (CNBC: above $101 Sept 9; TradingEconomics: ~$101.25 Sept 10) — more persistent than Sept 9's intraday cross, the closest this cycle has come to the flip line, but still short of a clean sustained-close call.* ***P RE-RATED DOWN, modestly, to 1/5/22/42/72*** *(from 1/6/23/43/72) — no window moved more than 1 point, master call band unchanged (Neutral → Neutral).* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***THIS VERSION (score set 2026-09-11_draft) is a further light daily catch-up*** *covering Sept 10-11: this pillar's own "sustained Brent close above $100" flip-line clause FIRES on a third consecutive session — Brent closed Thursday Sept 10 up more than 6% above $107 after trading above $108 intraday, its highest since May 19, with WTI closing above $102 for the first time since May (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500 — 4+ independent) — alongside fuller reporting of Iran's Sept 9 shipping wave: 10 vessels attacked near Hormuz (2 US-linked ships, 8 oil tankers), the largest declared wave of the war, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill). A merchant seafarer is not a US service member, so the confirmed-US-combat-death clause does not fire.* ***P RE-RATED DOWN, modestly, to 1/4/20/40/71*** *(from 1/5/22/42/72) — 1mo held at the near-floor 1, 3mo -1, 6mo -2, 12mo -2, 36mo -1. No window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar on every scored fact, and the master FINAL NUMBER's call band did not flip anywhere.* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***THIS VERSION (score set 2026-09-12_draft) is a further light daily catch-up*** *covering Sept 11-12: Houthi forces, having seized Mocha Sept 10, swept the rest of Yemen's Red Sea coastline by Sept 11 — capturing the final government-held coastal towns (Dhubab, Murad) and Houthi naval forces seizing Mayyun (Perim) Island in the Bab al-Mandeb strait itself, with fighting continuing for Zuqar Island — a materially more severe status (actual control of a second global chokepoint's own islands) than the Sept 10 baseline's "closing in" characterization, confirmed by 6+ independent outlets (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Separately, UKMTO's own Warning 133-26 confirms four projectiles struck two more vessels near Khasab, Oman Sept 10, one set afire (Gulf News, Maritime Executive, The Hill corroborating); an IRGC claim of a Saildrone strike is single-source and not used to move P. Yemen is an existing theater, so the widening clause does not fire; no US casualty, so that clause doesn't either — this is a severity escalation of an already-fired flip-line environment, not a fresh clause firing.* ***P RE-RATED DOWN, moderately, to 1/2/18/38/70*** *(from 1/4/20/40/71) — 1mo held at the near-floor 1, 3mo -2, 6mo -2, 12mo -2, 36mo -1.* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***LATER THE SAME DAY (Sept 12): a separate FULL WEEKLY refresh (score set 2026-09-12_draft2), the first full-weekly-depth research dive since the Sept 5 full weekly refresh, ran four parallel adversarial research passes across all four qualitative pillars against the 2026-09-12_draft committed baseline (1/2/18/38/70).*** *One new dated fact clears the sufficiency bar: Saudi Arabia's East-West Pipeline (Petroline) — the kingdom's primary Hormuz-bypass oil-export route, a NEW target distinct from the already-logged Sept 8 Aramco/Jazan refinery strikes — was hit by drones launched from Iraqi territory on Sept 10 (Saudi MFA statement/confirmation issued Sept 11). PRIMARY: Saudi Arabia's own Ministry of Foreign Affairs confirmed pumping stations in the Riyadh/Medina areas were struck, causing injuries and material damage, and*

said it would not retaliate for now at Baghdad's request; corroborated by 6+ independent outlets (Al Jazeera, CNBC, CNN, Times of Israel, ABC News Australia, OilPrice.com) with satellite imagery of fire/smoke at the pumping stations, plus Iraq's own PM ordering a probe, dismissing the Maysan operations commander, and closing the Shalamcheh border crossing. No group has claimed responsibility; President Trump, in Dublin, said Iran was "probably" responsible — a single, hedged, unconfirmed remark, logged as such, NOT as established fact (the Saudi MFA statement itself attributes origin only to Iraqi territory, not to a directing state). Neither flip-line clause fires: the widening clause does NOT fire (Iraq has been an active theater since the Sept 1 IRGC strike on US facilities in Erbil province — escalation within an existing theater, not a new one), and the US-casualty clause does NOT fire (no confirmed US military casualty found); the sustained-Brent→$100 clause continues to hold (~$104.61 Sept 12, same as the morning baseline) as persistence, not a fresh trigger. Also logged, not scored: Trump's own account that the Houthis privately signaled they don't want direct US involvement in Yemen (single-source as to substance, consistent with the already-logged MBS-refused-strikes counterweight), and the BRICS New Delhi summit's joint declaration (Sept 12, all members plus Saudi Arabia/Iran/UAE) urging "maximum restraint" over the escalation — a mild long-horizon diplomatic data point relevant only to the 1yr/3yr framing. The Mayyun Island/Bab al-Mandeb seizure (Sept 10-11) was independently re-verified as still holding, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye, ZeroHedge). Sized small given a single infrastructure strike with no widening and no US casualty: ***P RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70*** *(from 1/2/18/38/70) — 3mo/6mo/12mo -1 each, 36mo held, 1mo held at the near-floor 1.* ***WEEKLY REFRESH — left as DRAFT for Alex's manual review, full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of move size.*** *Committed by Alex; Sept 13-14 light daily catch-ups held flat with nothing new clearing the sufficiency bar, AUTO-STAMPED.* ***Sept 16 (score set 2026-09-16_draft):*** *RE-RATED DOWN on the 6/12/36mo windows to 1/1/14/33/66 (from 1/1/18/38/70) — the IAEA Board of Governors voted Sept 9 to refer Iran's nuclear file to the UN Security Council, and 130 Iranian lawmakers signed a Sept 12-13 statement calling for NPT withdrawal, with a hardline MP describing an emergency bill being drafted (RFE/RL, Tehran Times, Mehr News); Pezeshkian's public no-nuclear-weapons stance and the Foreign Ministry's "still being prepared" framing kept the move modest. AUTO-STAMPED, the last TRUE committed baseline.* ***THIS VERSION (Sept 17, score set 2026-09-17_draft) HOLDS FLAT at 1/1/14/33/66*** *— re-checked, no new dated development beyond the Sept 9 IAEA referral and the Sept 12-13 NPT statement already priced; Pezeshkian's and the Foreign Ministry's positions are unchanged. AUTO-STAMPED per delegated daily authority.* ***Sept 18 (score set 2026-09-18_draft, this version) HOLDS FLAT again at 1/1/14/33/66.*** *Two dated items were found and weighed. Trump told Axios Sept 17 he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday UN General Assembly meeting with six Gulf-state leaders — dated and multi-sourced (Axios original, corroborated by Times of Israel, Politico Wire, Breitbart, RedState, Western Journal, anews — 5+ independent), but it is rhetoric about an undated future decision, and the near-term windows (1mo/3mo P=1) already price maximal active-war uncertainty, so it does not clear the bar for a further move. Separately, an initial general search surfaced a claim that the IRGC struck a Togo-flagged tanker named "Trend" in the Strait of Hormuz on Sept 18; a follow-up targeted search could not independently corroborate this from any named outlet or primary (CENTCOM/IRGC) source —* ***treated as NOT FIRED / NOT USED*** *per this report's house discipline for uncorroborated single claims. AUTO-STAMPED per delegated daily authority. See My Decision below.* ***THIS VERSION (Sept 19, score set 2026-09-19_draft) is a FULL WEEKLY refresh*** *against the last committed baseline (2026-09-18_draft) — independent primary-source research across all five windows found nothing that clears the sufficiency bar for a move. Iran's parliament continues moving toward, but has NOT enacted, NPT withdrawal: 130 lawmakers signed a further Sept 7-13 statement urging the legal Article X process, Parliament Presidium spokesman Abbas Goudarzi said withdrawal "can easily" be done, and a bill was submitted for expedited consideration — but Iran's own Foreign Ministry still calls it "in preparation," so this remains a proposal, not a completed act (Iran International, Tehran Times, IranWire, APA.az, anews, Militarnyi, IFP News — corroborated but mostly Iran-linked/state-affiliated, the same treatment this pillar has always given Iranian-sourced claims). Trump told Axios (Sept 17) he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday Sept 22 UN General Assembly sideline meeting with six Gulf-state leaders (Saudi Arabia, UAE, Qatar, Bahrain, Kuwait, Oman) — very well corroborated (Axios, Jerusalem Post, Politico/Political Wire, Israel National News, Common Dreams, Breitbart, CBN News, 5+ independent), but still rhetoric about an undated future decision;* ***the Sept 22 meeting itself is now flagged as this pillar's clearest near-term trigger to watch next cycle.*** *The UN Security Council failed 11-2-2 on Sept 17 to renew its Iran-sanctions monitoring panel, Russia and China dissenting (Somalia/Pakistan abstaining) — a primary UN press release (press.un.org, sc16455 and related), corroborated by Euronews and Security Council Report — institutional gridlock over the 2025 snapback dispute, not a new sanction or act of war. The Togo-flagged tanker "Trend" strike (Sept 17-18) this pillar could not corroborate last cycle is now CONFIRMED via the IRGC's own statement (IRNA,*

primary, via GlobalSecurity.org) plus independent outlets including The Hill, Bernama, IranWire, TFTC, Parapolitika, and Rio Times — reversing last cycle's NOT FIRED call, but it is a continuation of an already-months-long tanker campaign (the US struck three Iranian tankers Sept 1-5), not a new escalatory step, so it updates the record without moving P. Brent settled ~$103.21/bbl Sept 18 (CNBC, Al Jazeera), down 1.5% day-over-day but still near the multi-month highs reached in early September — a market price, not scored. Iran has now gone nine straight days without striking a "host state" (GlobalSecurity.org's OSINT day-by-day tracker) — a mild, fragile de-escalatory data point — while a Houthi-linked air-raid alert hit Riyadh Sept 19 for the first time since July (Times of Israel liveblog) — a mixed signal on the proxy front; neither clears the bar alone. FM Araghchi said Iran and Oman "agreed a plan" to reopen the Strait (TASS, Caspianpost) but separately clarified the Oman understanding will NOT by itself reopen Hormuz, conditioned on the US honoring the 60-day Islamabad MOU (Mehr News, corroborated by Samaa) — a net wash. ***P HELD FLAT at 1/1/14/33/66 — full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of the size of the move (here, zero) — LEFT AS DRAFT, flagged prominently for Alex's manual review.*** *See My Decision below.* ***Updated & Re-verified September 22, 2026 — LIGHT DAILY touch, score set 2026-09-22_draft: carried forward unchanged at 1/1/14/33/66 — not re-researched this cycle; Fed & Macro re-rated down instead. COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026. Updated & Re-verified September 23, 2026 — LIGHT DAILY touch, score set 2026-09-23_draft: RE-RATED UP to 3/3/16/35/66****, the first upward move since Sept 13. A senior Iranian official told Reuters (Sept 22, 8+ outlet corroboration) Iran can reopen Hormuz within 7 days if the US eases pressure and lifts its blockade; separately, US officials (Witkoff/Kushner) and Iran's FM Araghchi held a 3-hour "very productive" mediated meeting at the UN General Assembly sidelines Sept 22, the first direct US-Iran contact at this level since the war began, with another meeting scheduled soon. Sized modestly against Iran's still-steep unmet conditions (full blockade lift, all frozen assets released, end to war on every named front), Pezeshkian declining to meet Trump directly, and continued unattributed Sept 21 tanker incidents.* ***COMMITTED, AUTO-STAMPED SEPTEMBER 23, 2026.***

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 19, 2026 · **[MERGED — see merge note below] Updated & Re-verified October 15, 2026 — LIGHT DAILY touch, score set 2026-10-15_draft: RE-RATED DOWN, modestly, on 6** disclosed casualty picture — **2 of 11 Indian crew are MISSING, not merely injured**, search-and-rescue ongoing as of the most recent reporting (Oct 12-13); 9 crew rescued. Independently co was hit by an unidentified projectile the same day (fire, all 11 crew reported safe). Seatrade (Oct 13, dated) tallies **at least 18 attacks** on shipping in the Strait of Hormuz theater since the star nudge, since missing (not just injured) crew with SAR still open is a worse signal than anything previously logged. 36mo held as noise. Two thing **crew injured** (11 Indian nationals), confirmed via 5+ independent outlets (Khaleej Times, gcaptain, Seatrade Maritime, Qatar Tribune, Herald Corp); a second tanker took UKMTO-confirmed c fires — no new state widened to, no confirmed US casualty, no resumption of direct US strikes beyond the already-fired Aug 30 clause. **Stamp decision reported as LEFT AS DRAFT at deliv** advanced to `committed`, `stamped_by: "Alex"`, accepting that this set carries the Oct 10 branch forward as the baseline while the Oct 3 divergence remains a separate, still-open item for **MATERIALLY DEGRADED this cycle:** the research sandbox’s network proxy returned policy-level blocks (not ordinary flakiness or timeouts) for fred.stlouisfed.org, eia.gov, centcom.mil, and (late September, well above $100 on the official series) and is flagged here for Alex to re-pull directly via EIA/FRED once network access allows. **Diplomatically, the prior cycle’s “stalemate** messages between Washington and Tehran continuing”; separately, Iran’s Interior Minister Eskandar Momeni was in Doha the same day over the long-running detained-pilots dispute (Iran al parallel diplomatic channel stayed demonstrably alive even as the UN-sidelines track stalled Sept 28. The Rubio-ordered early UN-delegation-departure claim (around Oct 1) remains DISPU in the Strait of Hormuz/Gulf region through Oct 5 (8 Hormuz, 1 Bab el-Mandeb) — including the Liberia-flagged tanker LIPSI, struck Oct 4 (engine-room fire, crew safe) — versus the already **AWAITING ALEX’S STAMP** (a full weekly refresh is categorically excluded from delegated auto-stamp authority, independent of move size — here, zero). · **Updated & Re-verified October 3 reached a STALEMATE on Sept 28 and Iran’s delegation left New York, so that justification is gone. Prior cycle (Sept 11): the crowd will read a $108 print and a 6% up-day in Brent as the war finally repricing energy — or, watching Friday's 3% give-back on Hormuz diplomacy head firing, not a near-miss. I said so in the two prior cycles when it hadn't fired yet; the discipline only counts if it also fires when the number arrives. What it does *not* do is change what back on diplomacy headlines is logged honestly alongside it.

Prior cycle (Sept 10): the crowd is likely to either read the Al Azraq missile barrage as a dangerous new peak of the conflict, or wave off a Yemeni port city changing hands as backg own military confirm no casualties this time either — a repeat-pattern event, not a new category. The Houthi seizure of Mocha is more interesting precisely because it's easy to dism has actually been executed yet. Brent trading above $100 for a second straight session is the more important tell than either strike — not yet a sustained close, but the clearest signa

Prior cycle (Sept 9): the crowd is likely to either read Brent's intraday $100 cross as confirmation the flip line has effectively fired, or dismiss the 5-tanker CENTCOM strike as "more what this pillar's own pre-declared threshold requires — so it does not independently fire that clause, though it earns a mention in every relevant section below rather than being qui on a US Navy warship) — a continuation of an already-priced trajectory, not a new category of event, so I am re-rating down modestly again (1/6/23/43/72, from 1/7/24/44/73) rathe

Prior cycle (Sept 8): the crowd is likely to either dismiss Rezaei's restricted-zone announcement as Iran "talking tough" without follow-through, or treat it as an imminent full closure enforcement mechanism, and no confirmed incident tied to it as of this cycle's research cutoff. Re-rating down modestly (1/7/24/44/73, from 1/8/25/45/73) rather than sharply, becau Rezaei's parallel claim that an Iran-Oman corridor deal will also be signed "in the coming days" as bullish either — until it is actually signed, it's the same "very close" pattern this pill

Prior cycle (Sept 6): the crowd was likely to read CENTCOM's own confirmation of the Sept 5 tanker strike as a relief ("finally, official clarity") rather than what it actually was — a co modestly (1/8/25/45/73, from 1/9/27/47/74) rather than sharply, because none of this pillar's flip-line clauses fired on it (no US casualty, no new state, Brent short of $100) and the es strikes were explicitly not used to move P — those are Iran's own claims, unconfirmed by the US, and the sufficiency rule is exactly what stops a claim like that from doing more work

The crowd: is likely to anchor on the wedding-strike casualty claim as the emotional center of today's news, and either (a) treat it as a confirmed atrocity driving the story, or (b) disr of how the casualty dispute resolves, and is the real story this cycle.

Me: cutting sharply to 1/9/27/47/74, versus the Sept 1 baseline (7/15/32/50/75, auto-stamped). This is the largest single-cycle P move this pillar has made since the Aug 30-31 flip-lin today's four-country Iranian retaliation — is single-narrative-sourced at the level that matters (Iranian state/local authorities, CENTCOM neither confirming nor denying), even though strikes — is a genuinely novel escalation this pillar's prior single-incident sizing precedents (Jul 28 Jordan, Aug 30 Larak) don't cleanly cover, and sizing a cut for a genuinely new m That said, the cut is still evidence-bounded, not panic-sized: kept under 8 points per window, and the four-country retaliation does NOT independently fire the widening-to-a-new-st

My edge: the discipline here is refusing to let a single-source emotional fact do more work than it's earned, in either direction — not discarding it (it's genuinely the trigger for today' under-reacts to a claim like this; this pillar tries to size around it instead.

Honesty check against the tape: BTC fell from $78,038.78 (Sept 1, Bitstamp) to $76,581.44 (Sept 2) — a real, visible risk-off move that for once tracks the same direction as this pilla

The Facts

As of October 15, 2026 (LIGHT DAILY touch, score set 2026-10-15_draft, COMMITTED, AUTO-STAMPED, RE-RATED DOWN on 6mo/12mo). Research access remains degraded this cycle for the official EIA/FRED

★ NEW THIS CYCLE — OCTOBER 15, 2026

★ **THE DECISIVE NEW FACT — the Oct 11 Petro Dolphin drone attack off Sohar, Oman, now carries a worse-than-disclosed casualty picture.** The product tanker **Petro Dolphin** by the Forward Seamen's Union of India as Bir Bahadur Yadav and Amit Singh; the union's naming is not independently confirmed and is reported, not scored). Search-and-rescu conflict on the vessel's flag/ownership (Maritime Executive: UAE-owned; FSUI/embassy-linked reports: Nicaragua-flagged) — noted, not resolved, and immaterial to the casualty casualty events of this campaign.

No flip-line clause fires. No confirmed new US combat death, no resumption of direct US strikes beyond the already-fired Aug 30 clause, and no widening to a further new state blocked, so the Brent spot series behind this pillar's already-fired flip-line still could not be independently re-confirmed this cycle — carried forward as an open item.

OCTOBER 14, 2026 (CARRIED FORWARD, LIGHT DAILY TOUCH, SCORE SET 2026-10-14_DRAFT)

★ **NEW — vessel-strike FREQUENCY ticked up, but CHARACTER did not.** Trade-press reporting of UKMTO data (direct UKMTO/CENTCOM access also blocked this cycle, so th room fire, crew safe). That is a higher weekly count than the prior cycle's tally. **But the character is unchanged from the already-priced pattern:** zero deaths and zero injuries acr death flip-line clauses. Houthi/Bab el-Mandeb activity remains a continuation of the already-priced August widening to a fourth state, not a new state.

US fatalities — checked again, the flip line still does NOT fire, with the record corrected on an undercount claim. The Pentagon's DCAS tally still stands at 19; no confirmed new functionally single-origin despite appearing in two bylines, and is reported here as a **contested, anonymous-sourced undercount claim**, not as fact, and is not used to move P. N

NET READ for this cycle: the diplomatic-channel continuity (mild positive) and the elevated kinetic frequency with unchanged severity (mild negative) roughly offset, and the one FLAT.

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 26 – OCTOBER 3, 2026

★ **CORRECTION, and it is the most important item on this page — this report had Brent $12–14 a barrel too low.** The prior version stated "Brent closed $106.60 Sept 24 (+3.4%, **RBRTE**, Europe Brent Spot Price FOB) and **FRED DCOILBRENTEU**, the latter re-pulled to disk and read from the raw bytes rather than through any summarising layer — Brent was **and FRED** — there is no Sept 30, Oct 1 or Oct 2 spot print, and none is asserted here. **Root cause, now understood:** $106.60 is exactly Investing.com's Brent *front-month futures* explicit basis label. **Consequence:** the "sustained Brent close above $100" clause is not merely still fired — every reading since Sept 3 is above $100 and the latest sits about 14%

NOT USED, and why. Claims that Brent fell to $99.68 or about $102 on Oct 2 trace to TradingEconomics, which self-discloses as contract-for-difference data "supplied by a third **figure:** retail futures feeds proved irreconcilable with one another (a one-day date offset between two of them; one missing Sept 24–29 entirely while quoting a different instrume source one accepts — and that irreducible uncertainty is itself the point.

★ **CONFIRMED — the diplomatic track stalled, which is what moves P this cycle.** The indirect UN General Assembly sidelines track reached a **stalemate on Monday Sept 28**: th of State Rubio *ordered* the delegation out rests on Axios reporting citing anonymous "sources familiar," syndicated to roughly 25 outlets — *wide syndication is not independence* also been communicated to the US Department of State in advance on September 17." On sourcing grade the denial is the better-sourced of the two. The expulsion is therefore re

The channel is not dead, which is why this is one point and not a collapse to the floor. Mediators **Qatar** (principal), **Pakistan** and **Egypt** — all three confirmed in the room for the he expected talks that week, while rejecting the current terms.

★ **KINETIC EVENTS — and a framing correction that matters.** UKMTO reported **four vessels struck across Sept 28–29**, all transiting **dark (AIS off)** near Musandam, with a fifth "unknown projectile" and *no group claimed responsibility*. An earlier pass of this cycle wrote "Iran struck"; that was an inference and is withdrawn. Iran's own PGSA characterised **Aframax/LR2 class, not a VLCC**. Al Funtas (KOTC VLCC, struck Sept 28 east of Musandam, fire extinguished, crew safe, vessel continued underway) is **IMO-confirmed** as to dan category already priced since the Sept 5 and Sept 8 tanker strikes, and the trade reporting's own read is that the pressure is on the shuttle fleet rather than an attempt to close the

DCAS — an honesty caveat that now matters more than the number. The official tally stands at **19 (11 hostile, 8 non-hostile)** and is corroborated by a source quoting DCAS direc a single published figure. And it is **actively contested as an undercount**: five US officials told the Washington Post the real figure is at least 22, one said 23, and documented omi described as a non-combat-related incident and was posthumously promoted to major. "No confirmed" is not "none occurred": DCAS runs a documented 2–4 day lag, so this win

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ **THE LOAD-BEARING NEW FACT — Iran's foreign minister put a concrete plan on the record, Sept 25, 2026.** FM Abbas Araghchi, speaking to reporters *outside the UN Securi* Lebanon and Yemen; **the Strait of Hormuz reopens on day six**; and **US–Iran talks on a final nuclear deal begin on day seven**. In his words: "The choice now rests with the United upgrade over the anonymous sourcing that this pillar has repeatedly refused to score. *Sourcing precision:* the $12bn figure travels with AP/Reuters-lineage copy, while Al Jazeera existing Islamabad framework rather than presenting it as a fresh concession.

★ **NEW — Pezeshkian offers to readmit UN nuclear inspectors, in a CBS excerpt released Sept 25.** Asked whether Iran would allow UN nuclear inspectors back in, President Pe interview aired in full; the concession is explicitly **conditional on the US accepting Iran's proposal**; and the softening versus his own defiant Sept 23 UNGA address is specifically in weeks, and it is the specific reason the 12-month window takes +1.

★ **NEW — Secretary Rubio on the record, Sept 24:** the previous day's talks were "largely positive" and "human beings talked to each other yesterday," but he *declined* to call it a

CORRECTION to the Sept 23 committed set — the Sept 22 contact was MEDIATED, not direct. That set called it the "first direct-channel" US–Iran contact. Where the US envoy's

★ **FALSIFIED CLAIM — a cargo vessel WAS struck in Hormuz on Sept 23.** The abandoned Sept 24 draft stated that "no new tanker incidents dated Sept 23-24 were found." That reported. **Careful wording, because the sources genuinely do not say more:** UKMTO did *not* state whether the two casualties were killed or injured, so this report does not say " **merchant crew, not US service members**, so the US-combat-death flip line is untouched. *Basis caveat:* ukmto.org returned 403, so the advisory number could not be retrieved a

★ **NEW — two Houthi salvos at Saudi Arabia.** On **Sept 24** Saudi forces intercepted **six ballistic missiles** aimed at Taif and the Yanbu Red Sea area; overnight **Sept 25–26** the coa already in theatre, and everything incoming was intercepted.

★ **NEW STATE OF AFFAIRS — no announced US strike on Iranian territory since Sept 1, roughly 3.5 weeks.** The strikes clause that fired Aug 30 is therefore now **DORMANT, tho** the absence of wire coverage — wire/ISW-derived, not primary-verified. A discrepancy is flagged rather than printed: secondary sources date the follow-on *at-sea* tanker strike S

US fatalities — the flip line did NOT fire, with three corrections to the record. The Pentagon's DCAS total stands at **19**, unchanged through Sept 26, and breaks down as **11 hostil** described a medical incident aboard a flight to Saudi Arabia. It is explicitly non-hostile, so this pillar's flip line, which requires a confirmed new US *combat* death, does not fire. Th returned 403 and could not be read. It is potentially material to this flip line and needs a dedicated pass.

MARKET PRICES AND SHIPPING DATA — labelled, never presented as institutional estimates. *(BASIS NOTE: the figures below are ICE front-month FUTURES prints. (a) The Wall Street Journal reported Sept 25–26, citing *unnamed* Ynet and others all headline it as a *WSJ report*, and there is **no on-record White House confirmation** anywhere as of Sept 26. WSJ's own caveat is carried: officials cautioned tha **or none, and is still not used. The Other Side

The strongest honest case this is wrong

- **The cut may still be too small, even at 1/9/27/47/74.** Nearly 100 targets, the war's first direct tanker strikes, and a four-country simultaneous retaliation is a genuinely different or the real tail risk, and that keeping the cut "under 8 points per window" mechanically, out of habit from smaller prior incidents, is itself a mistake when the underlying event is this
- **Leaving it as a draft may itself be too cautious.** The independently-confirmed facts alone — CENTCOM's own ~100-target count, the first-ever tanker strikes, the four-country re call the non-disputed facts already support, rather than a genuine evidentiary gap.
- **The cut may be too small.** This report explicitly pre-declared "a resumption of direct US strikes on Iran proper" as the line that breaks the dip-buy thesis — and calibrated the act precisely because the report itself said in advance this class of event was different in kind, not just degree.
- **The cut may be too large.** One resumed-strike night after ~28-30 clean nights is, so far, a single interdiction event (stopping a mine-laying attempt) rather than evidence of a full may prove to have moved faster than the evidence ultimately warranted.
- **The Oman corridor confirmation (Aug 25) is not retracted.** Oman's own Foreign Ministry still has not walked back its Aug 25 joint statement — the first time both parties on the
- **The Aug 24 sanctions package is arguably a bigger structural story than this week's kinetic exchange.** It was the first Iran sanctions action in this war to explicitly name digital
- **No confirmed US casualty, still.** The single hardest-edged clause of this pillar's own flip line — a confirmed new US combat death — remains unfired even after this week's exch
- **Thin sample, still.** The bullish long-term read rests on a handful of dip-and-recover events, all in a bull regime — geopolitical shocks don't always V-recover, and a fresh direct st
- **Two more restraint signals landed this cycle, logged honestly — a reader could argue they're under-weighted.** The BRICS New Delhi summit's joint declaration (Sept 12) — sig don't want direct US involvement in Yemen. THE FLIP LINE AS OF SEPT 26 (full weekly refresh) — one clause still firing, one now DORMANT, two unfired: the four clauses are a confirmed new US combat death, a resumption of direct US str $119.97 (Sept 28) and **$113.96 (Sept 29, the last published reading)**; nowhere near un-firing. The $106.60/$104.37 figures previously printed here were ICE front-month FUTURES prints captioned a than primary-verified. **(3) Confirmed new US combat death: NOT FIRED** — DCAS holds at 19 (11 hostile, 8 non-hostile); the 19th died Sept 18 of a cause DCAS lists as undetermined and is explicitly n **judgement of the cycle:** it requires a signed Hormuz agreement *the US actually accepts*, holding a full week without a new shipping attack, fatality or seizure. Araghchi's seven-day plan is the most precisely why this cycle takes +2 on two windows rather than a large re-rate. **What would change my mind:** a named US official accepting or formally rejecting the plan; a confirmed new US combat fresh downside trigger; note Pezeshkian moved the *other* way this week by offering inspector access. Historical clause-by-clause log follows.

The flip line, re-leveled — TRIGGERED Aug 30, and as of Sept 11 a SECOND distinct clause (sustained Brent close above $100) has now ALSO fired: a confirmed new US combat death, a resumpti CENTCOM struck Larak Island, the first acknowledged US strike on Iranian territory since Jul 29. **As of Sept 11, the "sustained Brent close above $100" clause has fired too** — three consecutive se **already firing again at vastly greater scale** — CENTCOM confirms nearly 100 targets struck (~50x Aug 30) plus the war's first direct strikes on Iranian government tankers — but none of the OTHER (Jordan, Bahrain, Iraq, Kuwait) — every one of the four is a REPEAT target already struck earlier in this war, so "further new state with confirmed attribution" is not met; Brent rose ~5% (best session pillar had withheld — a 3-tanker retaliation for an IRGC ballistic-missile attack on 2 US Navy warships — and Sept 6 brings further single-source IRGC claims of additional strikes. Neither independen (sourcing is primary/multi-outlet, no call-band flip). **The equivalent upside flip: a signed Hormuz agreement the US actually accepts that holds past a full week without a new shipping attack, fata** whether either side's threatened "much larger"/"significantly larger" response actually materializes, a confirmed US combat death, a confirmed strike on a genuinely new state, or a sustained Brent vessel that enters — a genuine new escalatory signal, corroborated by 8+ independent outlets, but explicitly not yet executed (no boundaries announced, no confirmed incident tied to it). This does authority. **UPDATE, Sept 9:** CENTCOM confirms a FIVE-tanker strike Sept 8 (M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco, M/T Derya) in retaliation for a second IRGC missile attack on a US intraday cross is explicitly not a sustained close, so that clause does not fire either. None of the three unfired clauses independently re-fires this cycle — the cut is modest (no window moved >1 poi deal is actually signed, a confirmed US combat death, or a confirmed strike on a genuinely new state. **UPDATE, Sept 10:** the IRGC retaliates for the Sept 8 tanker strike by firing 20 missiles at Jordan confirmed, so this doesn't fire a clause either. Brent now trades above $100 for a second straight session — more persistent than Sept 9's intraday cross and the closest this cycle has come to the " have now gone further than "closing in" — they hold Yemen's entire Red Sea coastline plus Mayyun (Perim) Island inside Bab al-Mandeb itself, with fighting continuing for Zuqar Island (6+ independ — this is a severity escalation within the already-fired sustained-Brent and direct-strikes clauses, not a fresh clause. The cut is moderate (no window moved >2 points) and is AUTO-STAMPED per th new state. **UPDATE, Sept 12 (full weekly refresh):** a third distinct Saudi oil-infrastructure strike — the East-West Pipeline (Petroline), hit by drones launched from Iraqi territory Sept 10 (Saudi MFA sta cut is small (no window moved >1 point) and, because this is a FULL WEEKLY refresh, is LEFT AS DRAFT for Alex's manual review regardless of the move's size — full weekly refreshes are categori strike on a genuinely new state. **UPDATE, Sept 19 (full weekly refresh):** none of the four clauses newly fires this cycle. Iran's parliament still has not enacted NPT withdrawal (proposal-stage only); T a new sanction or act of war; the "Trend" tanker strike (Sept 17-18) is newly confirmed but is a continuation of the already-priced tanker campaign, not a widening or a fresh casualty; and Brent ease meeting, whether the NPT-withdrawal bill is actually voted on, a confirmed US combat death, or a confirmed strike on a genuinely new state.

Oct 10 FULL WEEKLY refresh (score set 2026-10-10_draft), this version — HELD FLAT at 1/1/14/33/66, identical to the Oct 3 draft below. Two independent research passes (one research pa research sandbox's network proxy returned policy-level blocks — not ordinary flakiness — for fred.stlouisfed.org, eia.gov, centcom.mil and en.wikipedia.org, so the official Brent spot series (E judgment call about the news. **Diplomatically, mildly bullish:** Qatar's Ministry of Foreign Affairs spokesperson al-Hashimi said on the record Oct 6 that "contacts and visits are ongoing... excha pilots dispute (Iran says Qatar detained 3 Iranian military personnel whose aircraft went down in Qatari airspace in March 2026; Qatar disputes "detained" and says search teams recovered at finding, which still stands and still holds P off the floor it last cycle vacated). **An earlier research pass this cycle also surfaced, and then WITHDREW on adversarial re-check, a claim that Mo proposal) and is NOT used anywhere in this report. Kinetically, mildly bearish but unchanged in character:** trade-press reporting of UKMTO data (direct UKMTO/CENTCOM access also blo injuries, and no group claiming attribution across any of them, so this is a continuation of the already-priced campaign, not a new escalation type, and does not fire the widening or combat-de rule and is reported as a contested claim, not fact, not used to move P). No resumption of direct US strikes on Iranian soil. No signed, US-accepted Hormuz-reopening clean week. **Net: the di AS DRAFT, flagged prominently for Alex's manual review** — categorically required as a full weekly refresh, independent of the fact that the move size here is zero.

Oct 3 FULL WEEKLY refresh (score set 2026-10-03_draft2, now superseded by the Oct 10 draft above, never stamped) — RE-RATED DOWN, 1/2/15/34/66 → 1/1/14/33/66. The Sept 26 set price error in this report: double-primary-confirmed EIA RBRTE / FRED DCOILBRENTEU readings put Brent at $120.92 (Sept 24) and $116.01 (Sept 25), not the $106.60/$104.37 this report had weekly refresh. It sat unstamped through this cycle, and is carried forward unchanged (see above) rather than independently re-stamped now.

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — RE-RATED DOWN, 3/3/16/35/66 → 1/2/15/34/66, and this REVERSES an earlier draft of this same cycle. That via Qatar — the US lifts the naval blockade, waives oil sanctions and releases an estimated $12bn in frozen assets over roughly four to five days, the Strait of Hormuz reopens on day six, and that the Nov 3 midterms fall outside the 1-month window and inside the 3- and 6-month ones. **What overturned it:** a Wall Street Journal report that Trump had rejected the plan was, on Friday *himself, on the record*, to reporters outside the White House: "**I reject their proposal**"; "**I've rejected their deal**"; "that deal would not be acceptable" — adding that the US has "total control" of up-move is withdrawn. **Why this is NOT a full reversal to the old 1/1/14/33/66 floor.** The catalyst behind the Sept 23 bump is dead, so the bump comes off — but two things are genuinely new dealmaking, and the midterms sit inside the 3mo and 6mo windows. Second, President Pezeshkian offered on the record to readmit UN nuclear inspectors — "That is absolutely correct" — in inspector access), and 36mo holds at 66. **STILL NOT SCORED, and this is where the discipline bites hardest:** the WSJ's *other* claims — that Trump privately told aides he expects bombing to that senior White House officials confirmed on record they have "no intention of dismantling" the blockade, was **checked and could not be found at all**; that exact phrasing traces to an April 2 be incorrect to describe recent talks as a major breakthrough," which presumes talks exist; and Iran is formally still awaiting a US response. **Stamp decision: COMMITTED BY ALEX, Septemb** review step exists for (see What Changed).

Sept 24 draft (score set 2026-09-24_draft) — WRITTEN BUT NEVER DELIVERED; SUPERSEDED above. It proposed 3/3/16/35/66 → 2/4/17/35/66 and its report edits claimed "COMMITTED **incidents dated Sept 23-24 were found" was FALSIFIED** — a cargo vessel was struck in Hormuz on Sept 23 with two casualties. Its original text follows, uncorrected, so the error is visible ra Araghchi meeting held that same day but never mentioned the speech. That omission is logged here rather than quietly folded in. Sept 5 FULL WEEKLY refresh (2026-09-05_draft2), this version: independently re-verified via WebSearch. The Sept 5 tanker report has firmed up considerably since the daily touch a few h adversarial to Tehran — obtained video of three US radio warnings ordering the crew to abandon ship before the strike, corroborating that a strike and warnings occurred. However, AP's own CENTCOM's on-the-record July 14-15 naval-blockade doctrine, under which the Curacao-flagged M/T Belma was disabled via Hellfire-into-smokestack after ignoring warnings — that preced warnings were issued and a strike occurred, but does not independently confirm US authorship versus Iran's own narrative — so this is NOT used to move P this cycle, consistent with the dai widening to a further new state (Sept 3's Kuwait/UAE strikes were both repeat targets), and Brent held ~$95-96/bbl Sept 3-4 — up roughly 9% w/w on the broader escalation but still short of

P RE-RATED DOWN SHARPLY: 1mo 7→1, 3mo 15→9, 6mo 32→27, 12mo 50→47, 36mo 75→74. Every window moved under 8 points, but this is the largest front-loaded cut since the Aug 30-3 sharply in scale, which is what's driving the size of this move.

Still a **dip-watching pillar, not a panic-selling one** — the four-country retaliation hit repeat targets, most projectiles were intercepted, and no US casualty is confirmed. But the trajectory since would each independently warrant a further, larger cut.

Why this was originally left as a draft Sept 2, pending manual review: (1) the core wedding-casualty fact — the emotional and political driver of that day's four-country retaliation — is single- 100 targets and the war's first-ever direct tanker strikes, versus two rocket/mine-launchers on Aug 30 — was a genuinely novel escalation this pillar's prior single-incident sizing precedents d equal-weight call band (Mild Bull → Neutral) versus the last stamped set — under the rules in force that day, this alone disqualified the set from delegated daily auto-stamp.
