Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 5, 2026 (light daily catch-up) · COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026

*This is a light daily catch-up against the Sept 2 committed baseline (2026-09-02 draft, auto-stamped Sept 3; a Sept 3 check found nothing material on any pillar). CLARITY Act held flat at 32/47/58/82/92 and Tokenization RWA held flat at 52/60/66/74/85: no dated catalyst found Sept 3-5. **Iran War Risk held flat** at 1/9/27/47/74: Iran fired a second retaliatory wave Sept 3 on Kuwait and the UAE, but both are repeat targets and no US-manned facility was hit, so the widening-to-a-new-state clause still does not fire; Brent held roughly flat, short of \$100. Two developments logged but not used to move P: a Reuters weapons-expert analysis corroborated the Sept 1 Kuhestak wedding strike as likely a direct US-munition hit (confirms attribution of an already-priced event, not new escalation; the US has still not accepted responsibility); and a Sept 5 Iranian-media-only report of a tanker strike near Kharg Island remains unconfirmed by any independent or US-official source — watch next cycle. **Fed & Macro re-rated down a further modest step**, to 32/31/43/54/60 from 36/35/45/55/61: the August jobs report (BLS, primary, released Sept 4) beat sharply — nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady 4.1% — and markets repriced Sept 15-16 FOMC hike odds higher off of it (CNBC, Yahoo Finance, TheStreet, U.S. News, Investing.com/Reuters). Same-day: 2yr Treasury yield +5.3bp to its highest since January 2025; Dow -0.51%, S&P -0.38%, Nasdaq -0.29%; BTC fell ~2% same-day (\$81,265.00 Sept 3 close → \$79,676.60 Sept 4 close). Bitcoin TA (computed) recomputed on today's bar: P 57/47/59/68/69 → 59/48/60/68/69; BTC \$79,646.11 (Sept 5). This is an ordinary light daily touch — research capability was not degraded and verification passed clean — so per the widened delegated daily auto-stamp policy this set is **COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026**. Full score lineage (June committed → Aug 22 committed → Aug 28/29 drafts → Aug 31 committed → Sept 1 committed → Sept 2 committed → Sept 5 committed) preserved in every report.*

THE FINAL NUMBER · SEPTEMBER 5, 2026 · EQUAL-WEIGHT MODEL (COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026)

+0.43

Neutral overall, time-arbitraged — down modestly from the last stamped set's (Sept 2) +0.49 on Fed & Macro's re-rate; no call-band flip. Equal-weight mean of the five window signals (−10 max bear ... +10 max bull). Horizon-weighted variant: **+1.00**, down from +1.04 but still Mild Bull. The structure underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. **COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026** — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled and committed September 5, 2026 (light daily catch-up, auto-stamped) · BTC \$79,646.11 (Bitstamp, September 5, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, 2026-09-05_draft, committed) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the September 5 set (a light daily catch-up vs. the Sept 2 last-stamped baseline; committed, auto-stamped Sept 5). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	SEPT 2 MASTER (PRIOR STAMPED)	THE CALL
1 month	-1.65	-1.59	Bear — Fed & Macro's re-rate adds to Iran's already-sharp drag on the near end
3 months	-1.21	-1.13	Mild Bear — Fed drags harder alongside Iran; the September FOMC still sits inside this window
6 months	+0.13	+0.17	Neutral — CLARITY and Tokenization still carry this window; Fed and Iran both drag
1 year	+1.90	+1.92	Bull — four of five pillars positive; Iran alone negative at this window
3 years	+3.00	+3.02	Strong Bull — law + adoption + cycle + value; barely moved

Formula: per pillar, $\text{Signal} = ((P - 50) \div 50) \times \text{Quality} \times \text{Impact}$, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: $|s| < 0.5$ Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Sept 2 Master" is the prior stamped reading, for exact comparison. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

+0.43 = the equal-weight mean of the five MASTER signals above $((-1.65 - 1.21 + 0.13 + 1.90 + 3.00) \div 5)$. Weighting the longer windows harder (10/15/20/30/25%) gives **+1.00**, down from Sept 2's +1.04 but still Mild Bull. No call band flips this cycle. Iran War Risk, CLARITY, and Tokenization held flat this cycle on independent re-checks (see the Iran War Risk pillar report and config/scores.json for the Sept 3-5 research, including two developments explicitly not used to move P — the still-unconfirmed Sept 5 Kharg Island tanker report and the Reuters weapons-expert corroboration of the Sept 1 Kuhestak wedding strike); Fed & Macro re-rated down a further modest step on a hot August jobs report and higher FOMC hike-odds pricing (see that pillar's own What Changed for the full check). **COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026** per the widened delegated daily auto-stamp policy — an ordinary light daily touch, research capability not degraded, verification clean. See My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — September 5 scores, a light daily catch-up, committed and auto-stamped Sept 5 (each report shows the full June → Aug 22 → Aug 28/29 drafts → Aug 31 → Sept 1 → Sept 2 → Sept 5 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	-2.45	-0.41	+1.09	+4.61	+6.38	Held flat — Sept 15 cloture unchanged, both binding disputes still unresolved
Iran War Risk (20% · 8)	-4.70	-4.26	-2.58	-0.31	+2.11	Held flat — Sept 3 Kuwait/UAE strikes are repeat targets, no new US casualty; Kharg Island report unconfirmed
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	Held flat — no dated catalyst found Sept 3-5
Fed & Macro (20% · 8)	-2.45	-2.58	-0.90	+0.48	+1.04	RE-RATED DOWN — hot August jobs report, higher FOMC hike-odds pricing; AUTO-STAMPED Sept 5
Bitcoin TA — quant (20% · 8)	+1.08	-0.22	+0.88	+1.73	+1.52	Sept 5 computed — BTC \$79,646 vs Sept 4's \$79,677
MASTER — mean of the five	-1.65	-1.21	+0.13	+1.90	+3.00	equal-wt

P lineage (June → Jul 8 → ... → Aug 16 → 22 draft2 → 28/29 drafts → 31 → Sept 1 → Sept 2 → Sept 5) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 7, committed) → **32/47/58/82/92** (Sept 5 — held flat since Aug 7) · Iran 50/55/62/75/85 → 40/47/55/70/83 → ... → 20/28/41/56/77 (Aug 16, committed) → 14/22/38/54/76 (Aug 22 draft2, committed) → 14/22/38/54/76 (Aug 29, held flat, draft) → 9/17/34/51/75 (Aug 31 — RE-RATED DOWN, flip line fired, auto-stamped committed) → 7/15/32/50/75 (Sept 1 — RE-RATED DOWN AGAIN, more modestly, on continued escalation, auto-stamped committed) → 1/9/27/47/74 (Sept 2 — RE-RATED DOWN SHARPLY on a ~50x-larger strike wave, first-ever tanker strikes, and a four-country retaliation — COMMITTED, auto-stamped Sept 3) → **1/9/27/47/74** (Sept 5 — held flat; Sept 3 Kuwait/UAE strikes repeat targets, Kharg Island report unconfirmed) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 52/60/66/74/85 (Aug 8, committed) → **52/60/66/74/85** (Sept 5 — held flat) · Fed 38/40/46/54/61 → 35/36/42/52/61 → ... → 43/41/48/56/62 (Aug 22 draft2, committed) → 36/35/45/55/61 (Aug 29, draft) → 36/35/45/55/61 (Aug 31, auto-stamped committed) → 36/35/45/55/61 (Sept 1, auto-stamped committed) → 36/35/45/55/61 (Sept 2 — held flat, auto-stamped Sept 3) → **32/31/43/54/60** (Sept 5 — RE-RATED DOWN on a hot August jobs report and higher FOMC hike-odds pricing, AUTO-STAMPED) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 49/46/54/66/69 (Aug 22 draft2) → 54/46/56/67/69 (Aug 29) → 54/46/59/68/69 (Aug 31) → 57/46/59/68/69 (Sept 1, computed) → 57/47/59/68/69 (Sept 2, computed) → **59/48/60/68/69** (Sept 5, computed on today's bar). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on September 5, 2026, a light daily catch-up (comparisons below are vs. the last stamped baseline, Sept 2's 2026-09-02_draft)

- **1 month — Bear (-1.65, a touch worse than -1.59).** CLARITY (-2.45), Tokenization (+0.29), and Iran (-4.70) held; Bitcoin TA firmed to +1.08. **Fed & Macro fell to -2.45 from -1.90** on the hot August jobs report and higher FOMC hike-odds pricing — now the second-worst 1-month signal in the matrix after Iran.
- **3 months — Mild Bear (-1.21, down from -1.13).** CLARITY (-0.41), Tokenization (+1.41), and Iran (-4.26) held; Bitcoin TA eased to -0.22; **Fed & Macro fell to -2.58 from -2.04** — the September FOMC decision sits inside this window, and the jobs-report repricing drags it harder.
- **6 months — Neutral (+0.13, down from +0.17).** CLARITY (+1.09), Tokenization (+2.18), Iran (-2.58), and Bitcoin TA (+0.88) held; **Fed & Macro fell to -0.90 from -0.64.** Still net positive but thinner.

- **1 year — Bull (+1.90, down from +1.92).** Four of five pillars still non-negative: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.48 (down from +0.60). Iran alone stays negative at this window (−0.31). Price now sits 43% below power-law fair value (\$139,417).
- **3 years — Strong Bull (+3.00, essentially unchanged from +3.02).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Iran +2.11, Bitcoin TA +1.52, Fed +1.04 (down from +1.14). A structural window one jobs report barely moves.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) re-rated down this cycle on a hot jobs print while Bitcoin TA (computed) actually firmed: P 32/31/43/54/60 (Fed, judged, cut on the August jobs beat and higher FOMC hike-odds pricing) vs 59/48/60/68/69 (Bitcoin TA, computed, ticking up at 1mo/6mo on today's data refresh). BTC itself only moved modestly net over Sept 3-5 despite the Sept 4 jobs-day selloff; the quant pillar's model reading, built on completed bars and cycle position rather than daily headlines, doesn't share Fed & Macro's near-term pessimism. Iran War Risk (P 1/9/27/47/74) remains the worst signal at every window through 1 year — held flat this cycle, not worsening further, but also not improving.

THE REAL DISAGREEMENT

Near-term: Bitcoin TA's computed near-term read (P 59/48) is now the strongest near-term pillar by a wide margin; Tokenization (P 52) follows; Fed & Macro (P 32/31) has now dropped below CLARITY (P 32) at 1mo and below it at 3mo; Iran remains sharply the clearest risk-off vote in the set (P 1). The master resolves it honestly: Bear at 1 month, essentially unchanged from Sept 2's Bear, with Fed & Macro's fresh cut replacing some of the drag that would otherwise have eased as Iran holds flat.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.11, Fed +1.04) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.3× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A light daily catch-up ran this cycle. Fed & Macro cut on a hot jobs print; Iran War Risk, CLARITY, and Tokenization held. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Fired Sept 4, 8:30am ET — HAWKISH, confirmed primary, this cycle	August jobs report (BLS, primary): nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady 4.1% (CNBC, Yahoo Finance, TheStreet, U.S. News, Investing.com/Reuters)	Fed & Macro: markets repriced Sept 15-16 FOMC hike odds higher (~60-66% range across sources); 2yr yield to a high since Jan 2025; Dow/S&P/Nasdaq lower; BTC fell ~2% same-day. Drove this cycle's -4/-4/-2/-1/-1 cut. AUTO-STAMPED SEPTEMBER 5, 2026
Fired Sept 3, CONFIRMED — widening clause still did NOT fire	Iran fired a second retaliatory wave on Ahmed al-Jaber AB, Kuwait and Al Minhad AB, UAE — a US official confirmed no US-manned facility was hit, no third night of launches reported	Iran War Risk: both repeat targets (Kuwait struck Sept 2, UAE struck earlier this war) — held flat

Reported Sept 4 — Reuters weapons-expert corroboration, attribution only	Four independent weapons experts, reviewing images/video verified by Reuters, concluded the Sept 1 Kuhestak wedding-party strike was likely a direct hit by a US munition (JSOW-type glide-bomb fragments) — the US has not accepted responsibility (VP Vance: "extremely skeptical," under investigation)	Iran War Risk: confirms attribution of an ALREADY-PRICED Sept 1-2 event, not a new escalatory act — not used to move P this cycle
Reported Sept 5 (today), SINGLE-SOURCE, developing — NOT used to move P	Iranian state/semi-official media (Fars) reported four missiles struck an Iranian oil tanker near Kharg Island, Iran's main oil-export terminal — no CENTCOM or independent Western multi-source confirmation as of this research pass	Iran War Risk: fails the sufficiency rule as-is — WATCH NEXT CYCLE; if confirmed, a materially new escalation vector (direct hit on core oil-export infrastructure)
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; no WH sign-off on the ethics text found	CLARITY: confirmation only, no P move
Checked, no fresh catalyst	Tokenization: no dated catalyst found Sept 3-5; DTCC's October 2026 full-service launch window unchanged	Tokenization: held flat
Sept 11, 2026	August CPI print — now widely flagged by market commentary as the likely decider for the Fed ahead of Sept 15-16	Fed: a hot print would reinforce this cycle's cut; a cool print would push back against it
Sept 15, 2026	Next FOMC, with SEP/dot plot; also the first CLARITY Act cloture vote, precisely dated 2:15pm ET	Fed: a hike confirms this cycle's re-rate, a hold/cut suggests the market outran the committee. CLARITY: cloture succeeds = re-rate 3mo/6mo up hard; fails = re-rate down
~Aug 31, now passed	Historical average cycle-bottom month has passed (cycle month now 28.55)	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value \$139,417	BTC \$79,646.11 sits 43% below fair value	1yr/3yr windows: the structural bull case's core, essentially unmoved by this cycle's news

The master flip line — Iran's clause fired Aug 30, escalated sharply Sept 1-2, and remains unre-fired on a FURTHER fresh clause as of Sept 5: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a sustained Brent close above \$100 (Iran) — none of these has independently fired since Sept 2 (Sept 3's Kuwait/UAE strikes are repeat targets; the Sept 5 Kharg Island report is unconfirmed). The Sept 11 CPI print and the September FOMC delivering a hike would confirm and extend this cycle's Fed read (Fed); the Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) would also be a genuine escalation. A signed, US-accepted Hormuz reopening that holds a full clean week would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	+0.08	Neutral
— drop Iran War Risk	+1.03	Mild Bull · yes
— drop Tokenization RWA	+0.00	Neutral
— drop Fed & Macro	+0.76	Mild Bull · yes
— drop Bitcoin TA	+0.29	Neutral
all five in (headline)	+0.43	Neutral

Every leave-one-out final number stays **non-negative** (+0.00 to +1.03) — the sign never flips negative — but three of the five drops (removing CLARITY, Tokenization, or Bitcoin TA) round to **Neutral**, same as the headline itself this cycle. **Iran War Risk remains the largest single swing pillar: dropping it alone moves the reading from Neutral (+0.43) to +1.03 — a full call band better, into Mild Bull territory.** Dropping Fed & Macro alone also crosses into Mild Bull (+0.76) — this cycle's fresh cut made it the second-largest swing pillar, up from a smaller effect at the last stamped set. That is the single clearest robustness signal this report can give: today's headline number is not being driven by a broad, balanced move — Iran and, to a lesser degree this cycle, Fed & Macro are doing the work. The horizon-weighted final (+1.00) is more robust and stays Mild Bull throughout even with either pillar included. This robustness check exists specifically to catch a pillar quietly driving the whole call.

My Decision

COMMITTED — SEPTEMBER 5, 2026 (2026-09-05_draft) · AUTO-STAMPED (ALEX (AUTO-STAMPED)) · ORDINARY LIGHT DAILY TOUCH, RESEARCH NOT DEGRADED, VERIFICATION CLEAN

MASTER: -1.65 / -1.21 / +0.13 / +1.90 / +3.00 · THE FINAL NUMBER: +0.43 equal-weight (Neutral) / +1.00 horizon-weighted (Mild Bull) — COMMITTED, auto-stamped Sept 5, 2026

This is a light daily catch-up against the Sept 2 committed baseline (2026-09-02_draft, auto-stamped Sept 3; a Sept 3 check found nothing material on any pillar). Three pillars were independently re-checked and **held flat**. CLARITY Act at 32/47/58/82/92: the Sept 15 2:15pm ET cloture vote remains the only scheduled action. Tokenization RWA at 52/60/66/74/85: no dated catalyst found Sept 3-5. Iran War Risk at 1/9/27/47/74: Iran fired a second retaliatory wave Sept 3 on Kuwait and the UAE, but a US official confirmed no US-manned facility was hit and both targets are repeats, so the widening clause still does not fire; Brent held roughly flat, still short of \$100. Two developments logged but not used to move P: a Reuters weapons-expert analysis corroborated the Sept 1 Kuhestak wedding strike as likely a direct US-munition hit — this confirms attribution of an already-priced event, not new escalation, and the US has still not accepted responsibility; and a Sept 5 Iranian-media-only report of a tanker strike near Kharg Island is unconfirmed by CENTCOM or any independent source, so per the sufficiency rule it is not used — watch next cycle. **Fed & Macro re-rated down a further modest step**, to 32/31/43/54/60 from 36/35/45/55/61: the August jobs report (BLS, primary, released Sept 4) beat sharply — nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady 4.1% — and markets repriced Sept 15-16 FOMC hike odds higher off of it (CNBC, Yahoo Finance, TheStreet, U.S. News, Investing.com/Reuters). Same-day: 2yr Treasury yield +5.3bp to its highest since January 2025; Dow -0.51%, S&P -0.38%, Nasdaq -0.29%; BTC fell ~2% same-day (\$81,265.00 Sept 3 close → \$79,676.60 Sept 4 close). Fed officials remain split (Warsh hawkish, Waller conditionally dovish); the Sept 11 CPI print is now flagged as the likely decider before Sept 15-16. The cut is sized comparably to the Aug 22 → 28 catch-up cut on the Warsh Jackson Hole speech alone, for a comparable single dated catalyst: 1mo -4, 3mo -4, 6mo -2, 1yr -1, 3yr -1, no window over 8 points. Bitcoin TA's computed reading firmed at 1mo/6mo on today's data refresh (P 57/47/59/68/69 → 59/48/60/68/69); BTC \$79,646.11 (Sept 5).

This is an ordinary light daily touch — not a full weekly refresh — research capability was not degraded (WebSearch fully functional throughout), and verification (Step 6) passed clean, so per the widened delegated daily auto-stamp policy this set is COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026. No call band flips versus the last stamped set.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — Iran remains the largest single swing pillar (see Robustness above: dropping it alone puts the reading at +1.03, Mild Bull), with Fed & Macro now the second-largest after this cycle's cut (dropping it alone gives +0.76). This set is COMMITTED, auto-stamped Sept 5, 2026 — the prior stamped position was Sept 2's +0.49 (2026-09-02_draft, auto-stamped, Neutral).

Sources

Each pillar report carries its full, freshly-checked source list for this light daily catch-up. The master adds the engine and headline references for this September 5 update.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Tokenization_RWA Pillar Reports (re-checked Sept 3-5, held flat) · CoinPicks_Iran_War_Pillar_Report (re-checked Sept 3-5, held flat — two developments logged, not used to move P) · CoinPicks_Fed_Macro_Pillar_Report (RE-RATED DOWN Sept 5, COMMITTED, auto-stamped) · CoinPicks_Bitcoin_TA_Quant_Pillar_Report (computed Sept 5).
- **The engine:** engine/blend.py → data/master_blend.json (score set 2026-09-05_draft in config/scores.json, status: committed; full lineage back to 2026-06-19_committed; final-number window weights in config/settings.json "final_weights") · engine/mapping.py → data/pillar_scores.json (data through Sept 5, 2026).

- **September 5 light daily catch-up — the load-bearing new facts:** CNBC, Yahoo Finance, TheStreet, U.S. News, Investing.com/Reuters — August jobs report (BLS primary, Sept 4: +162,000 payrolls vs. ~53-55,000 consensus, unemployment 4.1%) and the resulting Sept 15-16 FOMC hike-odds repricing, same-day yield/equity/BTC reaction · GlobalSecurity (Iran War 2026 Day 188-189 updates), Critical Threats — Sept 3 Iran strikes on Kuwait/UAE (repeat targets), no US-manned facility hit · Reuters (via Spokesman-Review, Nukta, Tribune, TBS News) — four weapons experts' forensic corroboration of the Sept 1 Kuhestak wedding strike as likely a direct US-munition hit; VP Vance's "extremely skeptical" comment · Times of Israel liveblog, Euronews, Newswire.lk — Sept 5 Iranian-media-only (Fars) report of a tanker strike near Kharg Island, unconfirmed by any independent or US-official source. Full citations, including single-source items explicitly flagged as such, carried in each respective pillar report's own source list.
- **Price:** BTC/USD \$79,646.11 (Sept 5, 2026, data/btc_usd_daily.csv via the GitHub Actions fetch workflow), \$81,265.00 (Sept 3) → \$79,676.60 (Sept 4) → \$79,646.11 (Sept 5); cycle low \$58,526 close (Jun 30); ATH \$124,728 close (Oct 6, 2025); power-law fair value \$139,417 (BTC 43% below fair).
