

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 13, 2026 (Fed & Macro re-rated up on new data, off the Aug 12 committed baseline)

Quant pillar recomputed on today's price. Three qualitative pillars HELD FLAT; Fed & Macro RE-RATED UP after both of its named PENDING triggers fired today. CLARITY Act unchanged at 32/47/58/82/92: the Senate remains in August recess, the Sept 15 cloture date is unchanged; a Polymarket odds slide to ~15.5% is logged as sentiment, not scored. Iran War Risk unchanged at 20/28/41/56/77: the Hormuz deal remains unsigned — Araghchi's "very close" framing today is rephrased, not new. Tokenization unchanged at 52/60/66/74/85: a third-party \$33.5B estimate circulating today doesn't reconcile with rwa.xyz's own \$38.17B figure already in this report and isn't adopted. Fed & Macro moves 40/38/47/55/62 → **43/41/48/56/62**: the July CPI print (BLS, Aug 12) landed cool and exactly in line with consensus, and initial jobless claims (week ended Aug 8, DOL, Aug 13) missed to the weak side at 209K vs. 202K expected — two independent primary releases, both already-named triggers, both confirming rather than reversing the Aug 8 dovish direction. Bitcoin TA's quant pillar moved too — 1mo P 39→43 on a sharp cycle-analog swing (a disclosed n=3 fragility, not tape strength; the tape itself softened today) and 3yr 70→71. **Net effect: the MASTER 1-month window crosses from Bear into Mild Bear — a window-level call-band change — while the FINAL NUMBER's own band holds Mild Bull throughout.** No pillar P moved more than 3 points and nothing rests on a single source (CPI and claims are both primary BLS/DOL releases) — this qualifies for, and has received, Alex's delegated daily auto-stamp authority (in effect since 2026-08-06). Full score lineage (June committed → every draft through August 13, now committed) preserved in every report.

THE FINAL NUMBER · AUGUST 13, 2026 · EQUAL-WEIGHT MODEL (COMMITTED, AUTO-STAMPED)

+0.68

Mild Bull overall, time-arbitraged — the 1-month window improves from outright Bear to Mild Bear, the first window-level call-band move in nearly a week, driven by a genuine Fed & Macro re-rate plus a Horizon-weighted variant: +1.22. The structure underneath: Mild Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outpace the storm itself modestly less severe. Today's move (+0.61 → +0.68) is real and research-driven — a cool CPI print and a weak claims print both confirmed the Fed's dovish direction, exactly as this system's own pre-committed cycles — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 13, 2026 · BTC \$63,786.51 (Bitcoin, last completed daily close, August 13, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 13 committed set, auto-stamped) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the August 13 committed set (Fed & Macro re-rated up off the Aug 12 baseline). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 12 MASTER	THE CALL
1 month	-1.37	-1.54	Mild Bear — improves out of Bear, crossing the call-band line; Fed re-rate + quant cycle
3 months	-0.82	-0.90	Mild Bear — the September FOMC still sits inside this window; nudged up on the Fed re-rate
6 months	+0.31	+0.29	Neutral — CLARITY and Tokenization still carry this window; Iran still drags harder
1 year	+2.14	+2.11	Bull — all five pillars still positive; nudged up on the Fed re-rate
3 years	+3.12	+3.11	Strong Bull — law + adoption + cycle + value, essentially unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). For exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.68 = the equal-weight mean of the five MASTER signals above ((-1.37 - 0.82 + 0.31 + 2.14 + 3.12) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.22**, up from **+0.68** on the Aug 12 baseline. What moved: Fed & Macro re-rated up (40/38/47/55/62 → 43/41/48/56/62) after both of its named PENDING triggers fired — a cool JPM report confirming the Aug 8 dovish direction. CLARITY, Iran, and Tokenization all held flat (see each pillar's own What Changed). Bitcoin TA's quant pillar also moved — 1mo P 39→43 on a sharp improvement; the tape itself softened today) and 3yr P 70→71. **This is a routine, well-evidenced daily cycle — no pillar P moved more than 3 points, and nothing rests on a single-source.** Alex's standing delegated daily authority (in effect since 2026-08-06) — see My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today.

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).
