

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 13, 2026 (Fed & Macro re-rated up on new data, off the Aug 12 committed baseline)

Quant pillar recomputed on today's price. Three qualitative pillars HELD FLAT; Fed & Macro RE-RATED UP after both of its named PENDING triggers fired today. CLARITY Act unchanged at 32/47/58/82/92: the Senate remains in August recess, the Sept 15 cloture date is unchanged; a Polymarket odds slide to ~15.5% is logged as sentiment, not scored. Iran War Risk unchanged at 20/28/41/56/77: the Hormuz deal remains unsigned — Araghchi's "very close" framing today is rephrased, not new. Tokenization unchanged at 52/60/66/74/85: a third-party \$33.5B estimate circulating today doesn't reconcile with rwa.xyz's own \$38.17B figure already in this report and isn't adopted. Fed & Macro moves 40/38/47/55/62 → **43/41/48/56/62**: the July CPI print (BLS, Aug 12) landed cool and exactly in line with consensus, and initial jobless claims (week ended Aug 8, DOL, Aug 13) missed to the weak side at 209K vs. 202K expected — two independent primary releases, both already-named triggers, both confirming rather than reversing the Aug 8 dovish direction. Bitcoin TA's quant pillar moved too — 1mo P 39→43 on a sharp cycle-analog swing (a disclosed n=3 fragility, not tape strength; the tape itself softened today) and 3yr 70→71. **Net effect: the MASTER 1-month window crosses from Bear into Mild Bear — a window-level call-band change — while the FINAL NUMBER's own band holds Mild Bull throughout.** No pillar P moved more than 3 points and nothing rests on a single source (CPI and claims are both primary BLS/DOL releases) — this qualifies for, and has received, Alex's delegated daily auto-stamp authority (in effect since 2026-08-06). Full score lineage (June committed → every draft through August 13, now committed) preserved in every report.

THE FINAL NUMBER · AUGUST 13, 2026 · EQUAL-WEIGHT MODEL (COMMITTED, AUTO-STAMPED)

+0.68

Mild Bull overall, time-arbitraged — the 1-month window improves from outright Bear to Mild Bear, the first window-level call-band move in nearly a week, driven by a genuine Fed & Macro re-rate plus a Horizon-weighted variant: +1.22. The structure underneath: Mild Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outpace the storm itself modestly less severe. Today's move (+0.61 → +0.68) is real and research-driven — a cool CPI print and a weak claims print both confirmed the Fed's dovish direction, exactly as this system's own pre-committed cycles — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 13, 2026 · BTC \$63,786.51 (Bitcoin, last completed daily close, August 13, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 13 committed set, auto-stamped) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the August 13 committed set (Fed & Macro re-rated up off the Aug 12 baseline). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 12 MASTER	THE CALL
1 month	-1.37	-1.54	Mild Bear — improves out of Bear, crossing the call-band line; Fed re-rate + quant cycle
3 months	-0.82	-0.90	Mild Bear — the September FOMC still sits inside this window; nudged up on the Fed re-rate
6 months	+0.31	+0.29	Neutral — CLARITY and Tokenization still carry this window; Iran still drags harder
1 year	+2.14	+2.11	Bull — all five pillars still positive; nudged up on the Fed re-rate
3 years	+3.12	+3.11	Strong Bull — law + adoption + cycle + value, essentially unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). For exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.68 = the equal-weight mean of the five MASTER signals above ((-1.37 - 0.82 + 0.31 + 2.14 + 3.12) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.22**, up from **+0.68** today. The **MASTER** window itself crosses from Bear into Mild Bear. What moved: Fed & Macro re-rated up (40/38/47/55/62 → 43/41/48/56/62) after both of its named PENDING triggers fired — a cool JPM report confirming the Aug 8 dovish direction. CLARITY, Iran, and Tokenization all held flat (see each pillar's own What Changed). Bitcoin TA's quant pillar also moved — 1mo P 39→43 on a sharp improvement; the tape itself softened today) and 3yr P 70→71. **This is a routine, well-evidenced daily cycle — no pillar P moved more than 3 points, and nothing rests on a single-source.**

Alex's standing delegated daily authority (in effect since 2026-08-06) — see My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today.

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	-2.45	-0.41	+1.09	+4.61	+6.38	
Iran War Risk (20% · 8)	-2.88	-2.29	-1.01	+0.62	+2.38	
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	
Fed & Macro (20% · 8)	-0.95	-1.22	-0.26	+0.72	+1.25	
Bitcoin TA — quant (20% · 8)	-0.84	-1.57	-0.44	+1.73	+1.68	
MASTER — mean of the five	-1.37	-0.82	+0.31	+2.14	+3.12	

The Story, Window by Window

- **1 month — Mild Bear (–1.37, was –1.54, Bear).** Crosses the call-band line. Two movers: Fed & Macro re-rated from –1.36 to –0.95 on a cool CPI print and a weak claims print; Bitcoin TA's fragility, not tape strength — the tape itself softened today). CLARITY (–2.45) and Iran (–2.88) held flat; Tokenization (+0.29) held flat.
- **3 months — Mild Bear (–0.82, was –0.90).** Fed & Macro moved from –1.63 to –1.22 on the same CPI/claims confirmation. CLARITY (–0.41), Iran (–2.29), Tokenization (+1.41), and Bitcoin TA (+0.29) held flat.
- **6 months — Neutral (+0.31, was +0.29).** Fed & Macro moved from –0.38 to –0.26. Tokenization (+2.18), CLARITY (+1.09), Iran (–1.01), and Bitcoin TA (–0.44) all held. Historical average cycle length is 6.5 months.
- **1 year — Bull (+2.14, was +2.11).** Fed & Macro moved from +0.60 to +0.72. All five pillars still positive: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Iran +0.62. Price sits 54% below the 1-yr moving average.
- **3 years — Strong Bull (+3.12, was +3.11).** Essentially unmoved: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.68 (up from +1.60 on a 3yr quant nudge), Fed +1.25 (held — the Fed's been a little more hawkish than expected).

The point of running qualitative and quantitative on the same standard

Fed & Macro (judged) and Bitcoin TA (computed) both improved today, from different mechanisms: P 43/41/48/56/62 vs 43/36/45/68/71 — Fed moved on genuine new primary data same 1mo P (43) by coincidence. Iran War Risk remains the worst 1-month signal in the set (−2.88), followed by CLARITY (−2.45, the cloture vote itself sits outside this window) — two independent landing near-term bearish even as the macro backdrop improves.

Near-term: Tokenization is still the strongest near-term pillar (P 52); Fed & Macro moved up to P 43, past a coin flip on the bear side but closing the gap; CLARITY remains below a coin flip (P 40). Today's check (rephrased "very close" framing, still-unsigned Hormuz deal) found nothing to move it either direction. The master resolves it honestly: Mild Bear at 1 month, improved from Bear at 3 months.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remains a bear market. Equal weight lets that gap show through honestly instead of burying it in a blend.

Two named triggers fired today (Fed CPI and claims). These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT
FIRE Aug 12	July CPI print landed cool/in-line: +0.1% m/m / +3.4% y/y headline, +0.2% m/m / +2.5% y/y core — exactly the consensus already priced in
FIRE Aug 13	Initial jobless claims, week ended Aug 8: 209K actual vs. 202K expected — a genuine weak-side miss, 8-week high
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; Senate remains in August recess. Polymarket odds slide to ~15.5% logged as sentiment, not scored
Checked, unchanged	Hormuz deal remains unsigned; Araghchi's "very close" framing today is rephrased (US "making amends" over the June MoU), not a new demand category
Checked, not found	No new dated RWA/tokenization catalyst; a third-party \$33.5B estimate circulating today doesn't reconcile with rwa.xyz's own \$38.17B figure, not adopted
PENDING, due Aug 13, 4:30pm ET	Next Fed H.4.1 balance-sheet release, week ended Aug 12 — not yet posted as of this research pass
Sept 15	First CLARITY Act procedural (cloture) vote, precisely dated 2:15pm ET; zero confirmed Democratic yes votes as of Aug 13
Pending	Actual signing of a Hormuz agreement the US accepts — the fee/compensation/sovereignty disputes (Iran wants tolls + compensation + a US/Israel ban; US wants zero) are the th Iran's unilateral announcements
September	Next FOMC (with SEP/dot plot), week of Sept 15 — Senate returns from recess the same week; the real test of whether today's dovish confirmation survives to an actual vote
~Aug 31	Historical average cycle-bottom month (cycle month 27.8 currently) passes

Power-law fair value \$137,487	BTC \$63,786.51 sits 54% below fair value
--------------------------------	---

The master flip line, updated Aug 13: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, the conflict widening to a further new state, or a sustained Brent close above \$100 (Iran Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just routine daily noise. A signed, durable close under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WEIGHTED)
— drop CLARITY Act	+0.39
— drop Iran War Risk	+1.01
— drop Tokenization RWA	+0.31
— drop Fed & Macro	+0.87
— drop Bitcoin TA	+0.82
all five in (headline)	+0.68

Every leave-one-out final number stays **positive** (+0.31 to +1.01) — the sign never flips negative — and for the first time in this stretch, only **one** of the five drops (removing Tokenization) still rounds down to Neutral rather than Mild Bull. The call base the call rests on, not just its headline size. The horizon-weighted final (+1.22) is more robust and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call now leans primarily on Tokenization, with CLARITY not noise.** This robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and today it flags one fewer than yesterday.

My Decision

✓ **COMMITTED — AUGUST 13, 2026 (FED & MACRO RE-RATED UP) · STAMPED BY ALEX (AUTO-STAMPED)**

MASTER: -1.37 / -0.82 / +0.31 / +2.14 / +3.12 · THE FINAL NUMBER: +0.68 (Mild Bull, time-arbitraged, committed)

This cycle re-rated one pillar on real new data — checking what fired since Aug 12, not re-litigating it from scratch. Three qualitative pillars HELD FLAT: CLARITY Act held at 32/47/58/82/92 — the Senate re-opening or ethics-text development was found; a Polymarket odds slide to ~15.5% is logged as sentiment, not scored (a single market-odds data point can't clear the sufficiency bar alone). Iran War Risk held at
