The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92, unchanged since Aug 8.** The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31 — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). P HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was **AUTO-STAMPED** alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's own commit message claimed this set was "AUTO-

STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call). **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P. **HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time** — re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P. **HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found. **HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again** — re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50%→30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found. **HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.** Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news, **September 4**) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)** held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)"** — the new last TRUE committed baseline. **A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)** — the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **September 10, 2026 (PRIMARY:** lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his support on remains largely unchanged from the July draft, and no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. **P HELD FLAT at 32/47/58/82/92** — the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded**

from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 5, 2026 · Updated & Re-verified September 12, 2026 (FULL WEEKLY refresh, 2026-09-12_draft2 — the first deep multi-source dive since Sept 5, run separately from and after this morning's light daily catch-up: Sen. Lummis released a revised ~630-page CLARITY text Sept 10, primary-sourced and corroborated by 6+ independent outlets, incorporating 114 Democrat-requested provisions and narrowing the DeFi/prediction-market registration scope — but leaving the Tillis-blocking ethics provision largely unchanged and drawing zero public Democratic converts; held flat at 32/47/58/82/92 under the sufficiency rule; full weekly refreshes are categorically excluded from delegated daily auto-stamp authority, so this set is LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW) · Last TRUE committed: 32/47/58/82/92 (2026-09-12_draft, auto-stamped Sept 12) · Not Financial Advice

The Scores — Committed vs. Drafts

June column committed by me June 12, 2026. Aug 16 is the prior auto-stamped daily baseline. Per house rule, drafts only collapse out of this table once a set actually commits — Aug 22 draft2 committed Aug 23 and stays visible below since it's the last committed set; the new Aug 29 column has not committed, so nothing collapses yet from here. Aug 17, 18, and 20 drafts were written but never delivered; an Aug 21 session delivered the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. The same-day Aug 22 catch-up draft (d1) held flat, was fully delivered (rendered/selfchecked/archived/committed to git), but stayed uncommitted after an adversarial fact-check caught a false claim in the Iran War Risk pillar report. The same-day full weekly refresh, **2026-08-22_draft2 (d2)**, independently re-confirmed the hold and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat) but never rendered, selfchecked, archived, or committed — treated as not delivered, dropped from this visible lineage (see What Changed for the audit note). This cycle's **2026-08-29_draft**, a FULL WEEKLY refresh, independently re-confirms the hold again via fresh primary-source research and is left as draft, AWAITING ALEX'S MANUAL REVIEW. **Aug 31 and Sept 1 are light daily catch-ups (2026-08-31_draft, 2026-09-01_draft)** that each independently re-checked for a schedule change or ethics-text development, found none, held flat, and were AUTO-STAMPED — Sept 1 (32/47/58/82/92) is the last COMMITTED set for this pillar. **Sept 2 (2026-09-02_draft)** is a further light daily catch-up, again held flat. This shared dated score set was originally left as draft, because Iran War Risk's re-rate (bundled in the same set) flipped the master call band; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy — now the last TRUE COMMITTED set for this pillar, CLARITY's own P unchanged at 32/47/58/82/92. Sept 3 held flat a further time (nothing material on any pillar). **Sept 5 light daily catch-up (2026-09-05_draft)** holds flat again; that cycle's own commit message claimed "AUTO-STAMPED," but config/scores/json's status field was never actually advanced — flagged as a correction this cycle, not itself edited (stamping is Alex's call). **Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, this version)** independently re-confirms the hold via fresh WebSearch research; categorically excluded from daily auto-stamp authority, so left for manual review — **COMMITTED BY ALEX September 5, 2026**. **Sept 6 and Sept 8 light daily catch-ups (2026-09-06_draft, 2026-09-08_draft)** each independently re-checked and held flat — no new dated legislative development, no WH sign-off on the ethics language, no fresh corroborated prediction-market pull — and were **AUTO-STAMPED**, Sept 8 the last COMMITTED baseline. **Sept 9 (2026-09-09_draft, this version)** re-checks again and holds flat a further time — Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price move only, insufficient alone to move P under the sufficiency rule — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline (see What Changed for cycle-by-cycle detail). **Sept 10 (2026-09-10_draft)** re-checks again and holds flat a further time — the Sept 15 cloture vote remains the only scheduled action, unchanged; Polymarket odds still read in the same ~16% band, insufficient alone to move P — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 11 (2026-09-11_draft)** holds flat again — the Sept 15 cloture vote is unchanged, and the only whip-count detail surfacing this cycle (Paul/Hawley firm no, Tillis conditional) is dated Sept 4, before the last two baselines, so it is not new information — **AUTO-STAMPED per delegated daily authority**, the committed baseline. **Sept 12 light daily catch-up (2026-09-12_draft), this morning:** holds flat again, no new dated development found — **AUTO-STAMPED**, the last TRUE COMMITTED baseline for this pillar. **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version):** the first deep multi-source dive since Sept 5 — Sen. Lummis released a revised ~630-page CLARITY text Sept 10 (primary source, corroborated by 6+ independent outlets) incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope, but the Tillis-blocking ethics provision is largely unchanged and no Democrat has publicly signed on — a mixed signal, net a wash, that does not clear the sufficiency bar in either direction. **Holds flat a further time at 32/47/58/82/92 — categorically excluded from daily auto-stamp authority (full weekly refresh), LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.**

Last TRUE committed P (2026-09-12_draft, light daily catch-up, auto-stamped this morning): 32 / 47 / 58 / 82 / 92 · Current draft P (2026-09-12_draft2, FULL WEEKLY refresh, AWAITING ALEX'S MANUAL REVIEW): 32 / 47 / 58 / 82 / 92 · **Weight:** 20% (equal) · **Impact:** 8 (uniform) · **Formula:** Signal = ((P – 50) ÷ 50) × Quality × Impact. Full lineage: June committed 55/60/65/85/92 (Jun 12) → ... (see prior versions of this report for the full Jul 8-Sept 8 path) → **Sept 9 light daily catch-up (2026-09-09_draft) 32/47/58/82/92** — held flat again: Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price move only, not used to move P under the sufficiency rule; no new dated legislative development found — **AUTO-STAMPED**, the committed baseline → **Sept 10 light daily catch-up (2026-09-10_draft) 32/47/58/82/92** — held flat a further time: the Sept 15 cloture vote remains the only scheduled action, unchanged; no new dated legislative development found — **AUTO-STAMPED**, the committed baseline → **Sept 11 light daily catch-up (2026-09-11_draft) 32/47/58/82/92** — held flat again: Sept 15 cloture vote unchanged; the Paul/Hawley/Tillis whip-count detail circulating this cycle is dated Sept 4, before the last two baselines, so it is not new information; Polymarket ~16% (market price) and Galaxy ~10% (analyst estimate) are reported but neither moves P — **AUTO-STAMPED**, the committed baseline → **Sept 12 light daily catch-up (2026-09-12_draft) 32/47/58/82/92** — held flat again, this morning — **AUTO-STAMPED**, the last TRUE COMMITTED baseline → **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version) 32/47/58/82/92** — held flat a further time: Sen. Lummis's revised ~630-page CLARITY text (Sept 10, primary + 6 independents) narrows DeFi/prediction-market scope but leaves the Tillis-blocking ethics provision largely unchanged, and zero Democrats have publicly signed on — a mixed signal that doesn't clear the sufficiency bar — **categorically excluded from delegated daily auto-stamp authority (full weekly refresh), LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.**

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. Held flat this cycle at 32/47/58/82/92 — unchanged since Aug 8, through the committed Aug 22 refresh (d2), the abandoned/never-delivered Aug 28 daily draft, and now this full weekly refresh (2026-08-29_draft), all independently re-verified against fresh primary sources rather than trusted at face value. The Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date, reconfirmed this cycle by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found anywhere Aug 22-29 — and it bears repeating this is a cloture vote on the motion to proceed only, not final passage, which still needs its own floor debate/amendments and its own 60 votes. Both binding disputes remain fully unresolved as of today: the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan counter-proposal — no White House sign-off or released text found this cycle) and the stablecoin-yield dispute (no update found). NEW, CONFIRMED this cycle: CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting, directed CFTC staff to explore a fallback crypto-market-structure rulemaking using the CFTC's existing authorities in case CLARITY continues to stall — adversarially verified directly against cftc.gov (PressRoom/Speeches/Testimony/opaselig10), dated **August 20, 2026** (some secondary outlets, e.g. American Banker/PYMNTS/The Hill, dated it Aug 21, likely next-day pickup; cftc.gov used as the primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will utilize its existing authorities to begin establishing a regime for crypto asset markets." This is the CFTC's analog to SEC Chair Atkins' already-logged Jul 29 unilateral-authority statement — it does not touch either binding dispute and is logged as context, not used to move P, same treatment as the SEC's earlier fallback signal. Two independent prediction-market pulls this cycle show a consistent low-teens-to-20s read: DeFiRate.com (Aug 27) cites Polymarket 13-14% ("signed in 2026") and Kalshi 20-21% ("60 votes" by Jan 1 2027); a live Aug 28 Polymarket pull separately showed 14% — both labeled as market prices, not institutional estimates, and per house rule cannot move P without a corroborating news event, none found. A "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote surfaced in this cycle's search and was cross-checked to an **August 19, 2025** (one year earlier) CoinDesk/Politico Pro story from a prior year's SALT Wyoming/Jackson Hole symposium — flagged as a likely search-engine year-confusion artifact and explicitly NOT used as

evidence of an Aug 2026 development. congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle (bot-blocking); primary-source confirmation relied on 7+ independent secondary outlets instead, consistent with how prior cycles have had to handle this. Context only, not new: the Senate passed a stopgap funding bill Aug 8 (Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a shutdown fight eating September floor time around Sept 15. The move stays flat because Republicans still hold only 53 of the 60 votes needed and roughly zero Democrats are confirmed as yes votes. The actual live blocker, unchanged since Aug 8: a *toughened* Democratic ethics counter-proposal has sat unanswered at the White House since roughly Aug 1-3. Long-term still high — even the bears argue "slips past the midterms," not "dies."

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of September 5, 2026 (FULL WEEKLY refresh, 2026-09-05_draft2), and where I differ from the consensus — flat since Aug 8, through the committed Aug 22 refresh, an abandoned/never-delivered Aug 28 daily draft, the Aug 29 full weekly re-dig, and five light daily catch-ups since (Aug 31, Sept 1, Sept 2, Sept 3, Sept 5), nothing structural moved

The crowd: is watching CFTC Chair Michael Selig's Aug 20 warning that the CFTC will move on its own "if CLARITY continues to stall because of Democratic obstruction" — a second regulator (after SEC Chair Atkins in July) publicly floating a legislative bypass. Prediction markets read this as more downside than upside: DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21%, both near cycle lows. A stray "12-18 Democrats open" quote also circulated this week, but it traces to an August 2025 story, not anything new.

Me: holding at 32/47/58/82/92 unchanged since Aug 8 — including through the committed Aug 22 full weekly refresh, an Aug 28 daily catch-up draft that was researched but never delivered (superseded, not treated as evidence), the Aug 29 full weekly refresh, the Aug 31 and Sept 1 light daily catch-ups, and now today's light daily catch-up, independently re-verifying all of it again against fresh primary sources. Today's shared score set is left as a draft pending Alex's review — see My Decision — but that is entirely on Iran War Risk's account, not this pillar's. The Sept 15 cloture date is reconfirmed with no schedule change; both binding disputes — the unanswered ethics counter-proposal and the stablecoin-yield/banking dispute — remain open as of today, with no primary-source or 2+-independent development on either found this cycle. The CFTC's Selig speech is real and confirmed directly against cftc.gov, but it's a regulatory contingency plan, not a change to either blocker, and gets the same "logged as context, not scored" treatment this report has already given the SEC's equivalent statement. Republicans still hold only 53 of 60 needed.

My edge: unchanged since June — the crowd keeps pricing a *timing* problem like a *death* problem. The House did its half a year ago (294-134). A formally filed, precisely-dated cloture vote — reconfirmed again this week via DeFiRate.com and multiple outlets with no schedule slip — is a Senate actually moving a bill rather than sitting on it. I'm not moving any window today because nothing about the structural math (still 7 Democratic votes short) changed — Polymarket (13-14%) and Kalshi (20-21%) are market prices that can't move P alone without a corroborating news event, the CFTC's fallback-rulemaking signal doesn't touch either binding dispute, and the "12-18 Democrats" quote is a year-old story mistaken for fresh news, exactly the kind of search-artifact chatter I don't chase.

The Facts

As of September 12, 2026 — FULL WEEKLY refresh (2026-09-12_draft2), the first deep multi-source research dive since the Sept 5 full weekly refresh (2026-09-05_draft2). Nine light daily catch-ups ran in between (Sept 6, 8, 9, 10, 11, and this morning's Sept 12) — see What Changed for cycle-by-cycle detail. Hard numbers only, sources on the last page. New facts from this cycle's dedicated research pass appear first; earlier facts are carried forward unchanged (still load-bearing) below.

- ★ ★ **NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, and Blockhead — 6+ independent outlets). Lummis states it "incorporated more than 114 separate provisions at my Democrat colleagues' request." Substantively it narrows the DeFi/prediction-market scope — non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities, addressing the tribal-government prediction-market objections raised earlier.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text**, per the same primary and secondary sourcing above. The report's actual binding blocker was not resolved by this release.
- **No Democrat had publicly announced support for the new text as of Sept 10-11**, despite the 114 concessions (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle's reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalshi ~15% year-end per one outlet — **single-source, flagged as such** and, like all prediction-market reads, not used to move P.
- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.
- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — the Lummis text release is well-corroborated but a mixed signal (real concessions offered, but the Tillis-blocking provision untouched and zero confirmed Democratic converts) — net a wash, not a clearance of the sufficiency bar for a move in either direction.

Carried forward from the September 5 full weekly refresh (2026-09-05_draft2, committed by Alex Sept 5) and the light daily catch-ups since (through this morning's Sept 12) — still load-bearing, re-verified this cycle, not contradicted:

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date**, reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate/CryptoRank (Aug 22), and independently adversarially re-verified this cycle, with no schedule change found anywhere Aug 22-29. This is a cloture vote on the *motion to proceed* only, not final passage — floor debate/amendments and a separate 60-vote passage threshold still follow.
- ★ ★ **NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting**, directed CFTC staff to explore a fallback crypto-market-structure rulemaking using the CFTC's existing authorities, in case CLARITY continues to stall. Adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets, e.g. American Banker/PYMNTS/The Hill, dated it Aug 21, likely next-day pickup; cftc.gov used as the primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will utilize its existing authorities to begin establishing a regime for crypto asset markets." This is the CFTC's analog to SEC Chair Atkins' already-logged Jul 29 unilateral-authority statement — it does not touch either binding dispute (ethics or stablecoin-yield) and is logged as context, NOT used to move P, same treatment as the SEC's earlier fallback signal.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan counter-proposal — no White House sign-off or released text found) and the stablecoin-yield dispute (no update found). Status quo on both.
- **Prediction markets (market prices, not institutional estimates — house rule), two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% ("signed in 2026") and Kalshi 20-21% ("60 votes" by Jan 1 2027); a live Aug 28 Polymarket pull separately showed 14%. Consistent low-teens-to-20s read across sources — but market prices alone, even corroborated by a second independent pull, can't move P under house rules without a corroborating news event, and none was found.
- ★ ★ **NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and was cross-checked to an **August 19, 2025** (one year earlier) CoinDesk/Politico Pro story from a prior year's SALT Wyoming/Jackson Hole symposium. Flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an Aug 2026 development — a caution for readers, not a real development.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** (bot-blocking) — primary-source confirmation relied on 7+ independent secondary outlets instead, consistent with how prior cycles have had to handle this.

- **Context only, not new:** the Senate passed a stopgap funding bill Aug 8 (Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a shutdown fight eating September floor time around Sept 15.
- **No change found to the confirmed Democratic yes-vote count** (still zero) or to any primary-source Senate floor action.
- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction.

Carried forward — the abandoned/never-delivered 2026-08-28 draft (daily catch-up, researched but never rendered/selfchecked/archived/committed): logged a Polymarket "signed in 2026" drift to 14% (live pull, Aug 28) from ~19.5-25% (Aug 21-22) as a real move but insufficient alone to move P; no other new development found that day. Treated as not delivered per house discipline, superseded by this cycle's independent re-verification, not contradicted.

Carried forward from the committed Aug 22 full weekly refresh (2026-08-22_draft2 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the Sept 15, 2:15pm ET cloture vote on the motion to proceed was reconfirmed via 7+ outlets** as of Aug 21 (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Banking, news.bitcoin.com, Yahoo/Motley Fool), with no schedule change found — still a motion-to-proceed vote only, not final passage.
- **Sen. Ruben Gallego, on the record at the Aug 19, 2026 SALT Wyoming Blockchain Symposium**, said the White House has not given a point-by-point response to the bipartisan Tillis-Gallego ethics counter-proposal sent before the August recess — responses have come back "blank, weaker than before, or not at all." He also explicitly warned against rushing the Sept 15 vote. Multi-source: crypto.news, Cointelegraph, FXStreet, Blockonomi.
- **White House crypto adviser Patrick Witt said Aug 19** the administration is "fully committed" to getting CLARITY passed in September and would keep negotiating with Democrats up to the vote, while publicly blaming Senate Democrats for blocking the pre-recess vote. Multi-source (Cointelegraph, Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan). Combative public messaging, not evidence of a substantive concession — not used to move P.
- **An unverified, non-journalistic X post** from a crypto project's promotional account (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision "finally has a deal on the table" and is "officially solved" — single-source, non-journalistic, and directly contradicted by Gallego's own on-record Aug 19 statement (4+ independent outlets). Not used.
- **Coinbase CEO Brian Armstrong said Aug 21** he's "pretty optimistic" the bill clears 60 votes, arguing Thune wouldn't have scheduled Sept 15 without expecting passage, and that "both sides got 90% or so of what they want." Single source (Motley Fool/Fool.com), an interested industry party's opinion — not used to move P.

Carried forward from the same-day Aug 22 catch-up draft (d1 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the SEC formally proposed "Regulation Crypto Assets" on Aug 18** (sec.gov press release 2026-76) — a token-offering exemption regime: a startup exemption ($\leq$ \$5M over 4 years), a fundraising exemption ($\leq$ \$75M over 12 months), and a conditional safe harbor from the "investment contract" definition. This is a separate SEC rulemaking track, not the CLARITY Act, and does not touch CLARITY's binding ethics-provision or stablecoin-yield disputes — not used to move P.
- ★ ★ **Trump hosted a White House crypto event on Aug 19**, with SEC Chair Atkins, CFTC Chair Selig, and industry CEOs present, and publicly pushed Congress to pass "a fair version" of CLARITY. Multi-sourced (CoinDesk, Bloomberg, Forbes). Real public pressure and rhetoric — no text change or deadlock resolution reported, so not used to move P.
- **As of Aug 21, both live disputes remain open:** the ethics-provision fight (Democrats pressing for stronger limits on officials' crypto holdings) still has no confirmed White House sign-off on the Tillis-Gallego language; the stablecoin-yield/banking dispute is also still unresolved.
- **Prediction markets logged that morning:** Polymarket "signed into law in 2026" = 25% Yes (Aug 22 direct pull); Kalshi's "reaches 60 votes" market $\approx$ 22% (Aug 21) — this cycle's fresh pull instead reads Polymarket ~19.5% (above), illustrating the kind of intra-week volatility the house rule treats as noise, not signal, on its own.
- ★ ★ **FLAGGED, NOT SCORED — Coinbase CEO Brian Armstrong's on-record prediction that CLARITY "will pass"** is single-source opinion (one person, one outlet's framing) — explicitly not used to move P per the house sufficiency rule; see the more specific Aug 21 "pretty optimistic" remarks logged above.

Carried forward from the Aug 17, 18, and 20 drafts (written but never delivered — no report/render/archive/commit followed any of them; independently re-verified today, not contradicted):

- **Sen. Ruben Gallego, speaking at the SALT Wyoming Blockchain Symposium on Aug 20**, said White House responses to the Tillis-Gallego ethics counter-proposal "have come back blank, weaker than before, or not at all," and separately warned against rushing a floor vote (Blockonomi/Cointelegraph, FXStreet, Crypto-Economy, all Aug 20) — reaffirms the existing stalemate rather than deepening it.
- **Senate Banking Chair Tim Scott said (The Block, Aug 18) the stablecoin-yield provision "we thought was all settled" has resurfaced as a live dispute**, amid community-bank lobbying against stablecoin yield eroding GOP support — still open and unresolved as of Aug 21 (see above).
- **White House digital-assets adviser Patrick Witt called himself "truly optimistic and bullish" on passage** (The Block, Aug 18) despite the stablecoin friction — rhetoric only, no new whip count given.
- **Polymarket "signed in 2026" bounced from ~16% (around Aug 14-15) to ~24% (Aug 20 live pull)** on no identified news catalyst, and has since settled to 25% (Aug 22) — noise, not used to move P.
- ★ ★ **FLAGGED FOR THE RECORD, not scored:** Galaxy Research appears to have cut its 2026-passages estimate further to 10% (from the 30% already reflected in this report's history) around Aug 14-15. This predates the Aug 16-22 window and looks like a gap in an earlier research cycle rather than new information — flagging for Alex's attention, not treating as a driver of today's score.

Carried forward from the August 16 committed baseline (still load-bearing; independently re-verified, not contradicted, this cycle):

- ★ ★ **NEW — the SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote the day before it was scheduled**, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, Genfinity). The ~400-page proposal would have created token-offering exemption pathways under a separate SEC rulemaking track — relevant context on regulatory limbo across both branches, but not a CLARITY-specific trigger; not used to move P.
- **The Senate remains in August recess; no new floor-schedule or ethics-text development found (as of Aug 16).** Re-checked Bitcoin Foundation, Troutman Financial Services, CoinDesk — all confirm the Sept 15 cloture date as the only scheduled action (Senate returns Sept 14, three weeks to work the bill), with no new reporting on the Tillis-Gallego ethics counteroffer or White House sign-off.
- **The Sept 15, 2:15pm ET cloture date remains widely corroborated** — no change from Aug 14.
- **New detail on remaining disputes:** illicit-finance provisions and reconciling the Senate Agriculture Committee's text are named as two additional sticking points ahead of the vote (PYMNTS) — consistent with, not exceeding, the "multiple unresolved fights" picture already carried.
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633.** Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoSlate) plus partial primary corroboration via the bill's own congress.gov calendar text (Calendar No. 423).
- **The real live blocker remains a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump stays silent on ethics deal," Aug 3; corroborated by Coindesk's Jul 29 report that senators were negotiating a stronger version of the original concession).
- **Zero confirmed Democratic yes votes on cloture** as of Aug 16, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.
- **Polymarket "signed in 2026" (market odds, not an institutional estimate) remains around the mid-teens** per the conflicting cached reads (13-21%) noted Aug 14 — not re-verified as of Aug 16, still well below the Jul 21 local peak of 43%. Treat the exact figure as noisy; the directional read (still depressed vs. earlier in the year) is the reliable part.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ **★ PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows Jul 28's time went to a memorial ceremony for the late Sen. Lindsey Graham plus an executive-calendar nominee vote, and Jul 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source confirmation of "no floor time" than any leadership quote — and confirms no path to passage before the Aug 7 recess.
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground on an ethics compromise (Jul 29-30). The exact text is undisclosed and White House sign-off is unconfirmed — CoinDesk's own reporting hedges "whether they've actually done it is unclear," and neither senator's office nor the White House responded to comment requests. Treat as real movement, not a completed deal.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and then rejected Jul 30 by both the White House (adviser Patrick Witt mocking the comparison) and the crypto industry (DeFi Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to issue crypto market-structure rules on its own, while still calling statute the preferred, "future-proof" path. A modest reducer of legislative urgency — noted, not scored.
- **Odds board (sentiment only) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, Jul 30) — down from the ~35% read a week ago. Galaxy Research's Alex Thorn cut his personal 2026-passage estimate from 50% to 30% — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-counted here.
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics language. Firmly committed Democratic votes: zero.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor math" inference (which was already corrected in an earlier cycle: his SC seat was refilled within 48 hours, GOP floor count restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since — carried forward as the binding constraint, now potentially loosening.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ WLFJ-related. Gillibrand: "there is no CLARITY Act without an ethics provision."
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the floor; Coinbase's ~\$1.35B/yr USDC-rewards structure survives in the text as-is.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House fast-follow plan (companion bill, Rep. Dusty Johnson) unchanged.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$77,169.40** (Bitstamp daily close, August 22, 2026) — up from \$71,882.92 on Aug 20 (+7.4%). A **GENIUS-sized move (~40–47%)** from here ≈ **~\$108–113K**. A retest of the ~\$125K high ≈ **+62%**. The anchor is real: during the GENIUS Act's passage (Senate committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K (≈+44%).

Discount both — 2025 had tailwinds 2026 doesn't, and **the GENIUS rally itself fully retraced**. And note the coil cuts both ways: prediction-market odds bottomed at a fresh record low of 13% on Aug 5, bounced to a noisy 20-27% on the cloture filing, and have since settled to 25% (Polymarket, Aug 22) and ~22% (Kalshi's 60-vote market, Aug 21) — still a real repricing from the ~74-82% readings earlier in 2026, but flat and noisy week to week rather than trending. The cloture filing is a dated procedural step, not evidence the underlying passage odds have durably moved; the odds swings are sentiment, not a scored fact. The Prize doesn't feed the math — it tells you what the lean is worth acting on, and this week's further BTC gain against a completely flat CLARITY score is itself a reminder that this pillar's signal and price action aren't the same thing.

The Other Side

The strongest honest case this is wrong

- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have actually reached an agreement. This report is giving real weight (an 8-point 6mo improvement from the Jul 18 low) to something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows, new disputes keep appearing — a pattern, not a one-off.
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture knowing it will fail, the point may be to put Democrats on the record before the midterms rather than to actually advance the bill, which would make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" and "targeted" dates — nothing guarantees the actual Sept 15-16 vote produces real movement rather than another procedural loss, and September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped from 50% to 30% independent of any single news event, suggesting professional handicappers see this as a genuine coin-toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency — and now the CFTC has said the same thing.** If both the White House-aligned SEC and CFTC believe they can deliver workable rules unilaterally, that reduces the political cost of letting CLARITY slip further. CFTC Chair Michael Selig's Aug 20, 2026 on-record speech directing staff to explore a fallback rulemaking (verified against cftc.gov) is the second such regulator-level statement this summer — a slow bleed on legislative priority, not a dramatic kill, but a second data point in the same direction.
- **Prediction markets have drifted lower again, not higher.** DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21% — near the lower end of the range this report has tracked all summer, and a live Aug 28 Polymarket pull independently confirmed 14%. Two independent readings agreeing on a low number is a real signal even if it doesn't clear the sufficiency bar to move P on its own; a bear could reasonably argue this report is being too conservative in not letting corroborated market pessimism move the needle.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set September 12, 2026 — full weekly refresh, 2026-09-12_draft2, the first deep multi-source research dive since the committed Sept 5 refresh (2026-09-05_draft2); nine light daily catch-ups ran in between with no table-level changes.

DATE	EVENT	MEANS
Surfaced Sept 10, checked Sept 13 — corroborated via 3+ independent outlets (crypto.news, Coingape, CoinSpectator)	A FOURTH named Democratic blocking issue: vertical-integration conflict-of-interest authority. Democrats want regulators empowered to set conflict-of-interest standards for vertically integrated crypto firms — one company controlling several legs of a transaction, the FTX/Alameda pattern. Republicans say they support safeguards but fear a future administration misusing the authority; industry stakeholders have pushed back on including the provision. Sens. Booker, Lummis and Boozman are negotiating it. Separately, Sen. Lummis spent Sept 11-13 publicly pressing Democrats to back the revised text ("Democrats wrote the fix, now vote for it", 115 changes incorporated) — advocacy, not a vote commitment; still zero Democrats publicly committed. Polymarket ~23% signed-into-law by Dec 31 — a market price, reported not scored	CLARITY: no P move — held flat at 32/47/58/82/92. A fourth named blocking issue two days before the vote reinforces rather than changes the already-priced read that cloture is more likely than not to fail; it does not clear the sufficiency bar for a re-rate on its own. The Sept 15, 2:15pm ET cloture vote remains the operative event and lands in the next cycle
Checked Sept 2, no change	Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in — no White House sign-off on the Tillis-Gallego ethics language, no fresh corroborated prediction-market pull	Status quo — no P move, AUTO-STAMPED alongside the other unchanged pillars
Checked Sept 1, no change	No material development found on the ethics counteroffer, the stablecoin-yield dispute, or the Sept 15 cloture schedule since the Aug 31 light daily catch-up	Status quo — no P move, AUTO-STAMPED alongside the other unchanged pillars
Fired Aug 8, reconfirmed via 7+ outlets as of Aug 21, reconfirmed again by DeFiRate.com Aug 27, adversarially re-verified Aug 29	Cloture vote on the motion to proceed to H.R. 3633 is scheduled 2:15pm ET Tuesday, Sept 15 — no schedule change found anywhere Aug 22-29 (DeFiRate.com, Motley Fool, CryptoSlate, CryptoRank); this is a motion-to-proceed cloture vote only, not final passage	Confirmation of the Aug 8 trigger, not a new one — no P move
Fired Aug 20, checked Aug 29	CFTC Chair Michael Selig's on-record speech at the Innovation Advisory Committee's inaugural meeting — directed CFTC staff to explore a fallback crypto-market-structure rulemaking under existing authorities "if CLARITY continues to stall because of Democratic obstruction"; verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10)	The CFTC's analog to SEC Chair Atkins' Jul 29 statement — logged as context, does not touch either binding dispute — no P move
Checked Aug 29 — both still open	Ethics-provision dispute (no confirmed WH sign-off on Tillis-Gallego language) and the stablecoin-yield/banking dispute both remain fully unresolved; no development found on either since Aug 22	The actual blockers, unchanged — no P move
Pulled Aug 27 (DeFiRate.com) and Aug 28 (live), checked Aug 29	Prediction markets: Polymarket 13-14%, Kalshi 20-21% — two independent pulls agreeing on a low-teens-to-20s read	Market prices, not institutional estimates — no corroborating news event found, no P move under house sufficiency rule
Traced Aug 29	NOT FIRED / NOT USED — "Sen. Tim Scott: 12-18 Democrats open" quote traced to an August 2025 (one-year-old) story, a likely search-engine year-confusion artifact	Named and excluded, not scored — a caution flag, not a trigger
Aug 8, context only, checked Aug 29	Senate passed a stopgap funding bill (Collins-Murray deal) funding the government through Dec 11, 2026	Modestly reduces (doesn't eliminate) shutdown-fight risk to September floor time around Sept 15 — no P move
Sept 15	PENDING — first cloture vote (motion to proceed), now precisely dated; Democrats call it "doomed" absent further concessions; Republicans hold 53 of 60 needed	Cloture clears = re-rate 3mo/6mo up hard, real momentum; cloture fails cleanly = re-rate down, base case shifts toward 2027
Unresolved since Jul 30; checked again Sept 10-12	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed as of Aug 29; Gallego's own Aug 19 remarks confirm no meaningful WH response as of that date. A revised ~630-page CLARITY Act text WAS released Sept 10, 2026 (Sen. Lummis, primary source + 6 independent outlets — The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, Blockhead), incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope — but the ethics/conflict-of-interest language in it is reported largely unchanged from the July draft, so this specific dispute remains unresolved.	The Sept 10 released text does NOT resolve this dispute — watch for the ethics language itself to change, or for a Democrat to publicly sign on
Ongoing	Three named Democratic blocking issues: ethics enforcement, illicit-finance/DeFi provisions, stablecoin yield (Yahoo Finance, Aug 5)	Resolution on all three before the vote = real chance of cloture succeeding; continued silence = the "doomed" framing holds
Any time	NOT FIRED — White House formally signs off on a merged text with Democratic buy-in	The single biggest unlock — Democratic votes follow; re-rate everything up

The flip line: cloture fails on Sept 15-16 with no released, WH-confirmed ethics text and no clear next-step plan = start treating 2026 passage as effectively dead, not just delayed. Keep 1-year and 3-year Bull either way — a bill with 294 House votes, a reported bipartisan ethics counteroffer, and a formally filed cloture motion is delayed, not dead.

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: a separate, deeper research pass run this afternoon, independent of this morning's light daily catch-up — the first deep multi-source dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **Sept 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, and Blockhead — 6+ independent outlets), incorporating "more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope (non-decentralized trading protocols must now register with the CFTC, confined to cash-settled spot trading in digital commodities). The ethics/conflict-of-interest provision Sen. Tillis has conditioned his support on remains largely unchanged from the July draft — the specific blocker tied to his vote was not resolved. No Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged and reconfirmed. Prediction-market reads this week were noisy and partly single-sourced — Polymarket roughly low-teens-to-20%, Kalshi ~15% year-end per one outlet (single-source, flagged) — market prices only, not used to move P. **P HELD FLAT at 32/47/58/82/92.** The Lummis release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis-blocking provision untouched and zero confirmed Democratic converts — net a wash against the already-priced whip-count picture, not a clearance of the sufficiency rule's bar (primary source or 2+ independents) for a move in either direction. **This is a FULL WEEKLY refresh — categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so this set is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW.** The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

This morning's cycle (Sept 12 light daily catch-up, score set 2026-09-12_draft): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remained unchanged; no new dated legislative development had surfaced since Sept 11 at that point. Whip-count math (53 R seats, defections from Paul/Hawley and a conditional Tillis, needing 8-10 D/I crossovers) was the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **P HELD FLAT at 32/47/58/82/92.** That cycle was a light daily touch, no window moved, master call band unchanged anywhere — so per the runbook's delegated daily auto-stamp authority, **that set was AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** Iran War Risk is the only pillar that moved that cycle — see that report.

Prior cycle (Sept 11 light daily catch-up): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remains unchanged; no new dated legislative development found since Sept 10. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 11, 2026.**

Sept 10 light daily catch-up: re-checked — the Sept 15 cloture-vote schedule unchanged since Sept 9; Polymarket 2026-passage odds still in the same ~16% band, a market-price read only; no new dated legislative development. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 10, 2026.**

Prior cycle (Sept 9 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price move only. **AUTO-STAMPED SEPTEMBER 9, 2026.**

Prior cycle (Sept 8 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the ethics-language counteroffer found; no fresh corroborating news for the prediction-market pulls. **AUTO-STAMPED SEPTEMBER 8, 2026.**

Prior cycle (Sept 6 light daily catch-up): held flat — House Whip Emmer's office pulled the Sept 21/28 voting weeks off the House calendar, but the operative Sept 15 Senate cloture vote was unchanged. **AUTO-STAMPED SEPTEMBER 6, 2026.**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch: the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the ethics-language counteroffer; Coinbase CEO Armstrong's public optimism was a single executive's opinion, not new information. **P HELD FLAT at 32/47/58/82/92. COMMITTED BY ALEX September 5, 2026.**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores.json's status field for that set was never actually advanced from "draft" — a bug in that session, not in this pillar's research. The last TRUE committed baseline for this pillar remains **2026-09-02_draft (32/47/58/82/92), auto-stamped Sept 3.** Not corrected retroactively in scores.json — stamping is Alex's call — only flagged here and reflected accurately in this report's status.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat again — unchanged since Aug 8, through the committed Aug 22 full weekly refresh (2026-08-22_draft2, stamped by Alex Aug 23) and the Aug 29, Aug 31, and Sept 1 catch-ups. Both binding disputes — the ethics/conflict-of-interest provision (Tillis-Gallego counteroffer, still no White House sign-off since Jul 30/31) and the stablecoin-yield dispute — remain fully unresolved. This shared score set (2026-09-02_draft) was originally left as draft only because Iran War Risk's sharp re-rate flipped the master FINAL NUMBER's equal-weight call band, not for any reason in this pillar — **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026) and every committed set since (32/47/58/82/92, most recently committed Sept 12, 2026, 2026-09-12_draft, auto-stamped this morning) show this pillar has been flat since Aug 8. Today's FULL WEEKLY refresh (2026-09-12_draft2) independently re-confirms the hold but, unlike the daily touches, stays a draft awaiting Alex's own review before it can become the new committed baseline.

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

FULL WEEKLY refresh, September 12, 2026 (score set 2026-09-12_draft2) — the first deep multi-source research dive since the Sept 5 full weekly refresh (2026-09-05_draft2), run separately from and after this morning's light daily catch-up; checking for changes since this morning's committed baseline (2026-09-12_draft, auto-stamped).

- ★ **★ NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, and Blockhead — 6+ independent outlets). Lummis states the text "incorporated more than 114 separate provisions at my Democrat colleagues' request." Substantively, it narrows the DeFi/prediction-market scope: non-decentralized trading protocols must now register with the CFTC and are confined to cash-settled spot trading in digital commodities — addressing the tribal-government prediction-market objections raised earlier in the process.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text.** The one binding dispute this report has tracked as the actual live blocker since early August was not resolved by this release.
- **Despite the 114 concessions, no Democrat had publicly announced support for the new text as of Sept 10-11** (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle's reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalshi ~15% year-end per one outlet — **single-source, flagged as such** — neither used to move P.
- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.

- **Score decision: P HELD FLAT at 32/47/58/82/92 across all five windows.** The Lummis text release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis-blocking provision untouched and zero confirmed Democratic converts — net a wash against the already-priced whip-count picture, not a clearance of the sufficiency bar (primary source or 2+ independents) for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW.** The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

Carried forward — what changed in this morning's Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped), for continuity:

- **Sept 12, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development found since Sept 11. Whip-count math (53 R seats, defections from Paul/Hawley and a conditional Tillis, needing 8-10 D/I crossovers) is the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged since Sept 9; Polymarket 2026-passage odds still read in the same ~16% band (a market-price move only, not used per the sufficiency rule); no new dated legislative development found. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18% (a market-price move only, not used per the sufficiency rule); no new dated legislative development found. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development, no WH sign-off on the ethics language, no fresh corroborated prediction-market pull. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged. New since Sept 5: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — affects the House timeline only, not the operative Sept 15 Senate cloture vote. Polymarket's ~18% 2026-enactment odds (market price, not an institutional estimate) reflect the same math already priced in.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved; no new dated development clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield).** The Tillis-Gallego ethics counteroffer sent to the White House remains from Jul 30/31 with no WH sign-off found. The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged via WebSearch (DeFi Rate, The Block, Bitget, Motley Fool).
- **Coinbase CEO Brian Armstrong's public prediction that the bill passes is a single executive's opinion, not new information** — reported for completeness, not used to move P.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from delegated daily auto-stamp, so it was left for manual review — **COMMITTED BY ALEX September 5, 2026.** Fed & Macro is the pillar that moved this week, on a hot August jobs report. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session. The true last-committed set remains 2026-09-02_draft. Flagged for Alex, not corrected retroactively.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in.** Score decision: HELD FLAT at 32/47/58/82/92. This shared score set was originally left as draft — Iran War Risk's sharp re-rate flipped the master call band — and was **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 31-Sept 1.** The Tillis-Gallego ethics counteroffer sent to the White House remains from Jul 30/31 with no WH sign-off found through Sept 1. The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged by multiple outlets.
- **No fresh prediction-market pull with a corroborating news event found this cycle** to clear the sufficiency bar.
- **Score decision: HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-09-01_draft) is a light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority, then the committed baseline. Iran War Risk is the pillar that moved this cycle — see that report.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 29-31.** The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged across DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, and news.bitcoin.com (all through Aug 30-31).
- **Score decision: HELD FLAT at 32/47/58/82/92.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **AUDIT NOTE — a 2026-08-28_draft daily catch-up cycle sits between this refresh and the Aug 22 commit, abandoned and never delivered.** It was researched (held flat, logged a Polymarket drift to 14% on a live Aug 28 pull) but no render/selfcheck/archive/git-commit followed it — treated as not delivered, per the same house discipline this report has applied to the Aug 17, 18, and 20 drafts and the interrupted Aug 21 session. This cycle supersedes it and independently re-verifies everything from scratch against fresh primary sources.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date remains the only scheduled floor action,** reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found anywhere Aug 22-29.
- ★ **★ NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting,** directed CFTC staff to explore a fallback crypto-market-structure rulemaking under the CFTC's existing authorities if CLARITY continues to stall. Adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets dated it Aug 21, likely next-day pickup; cftc.gov used as primary). The CFTC's analog to SEC Chair Atkins' already-logged Jul 29 statement — logged as context, not used to move P.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego counter-proposal — no White House sign-off or released text found) and the stablecoin-yield dispute (no update found).

- **Prediction markets, two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% and Kalshi 20-21%; a live Aug 28 Polymarket pull separately showed 14%. Consistent low-teens-to-20s read but market prices alone, without a corroborating news event, don't clear the sufficiency bar to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and traced to an **August 19, 2025** (one year earlier) CoinDesk/Politico Pro story — a likely search-engine year-confusion artifact, named here as a caution for readers, not used as evidence.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** — primary-source confirmation relied on 7+ independent secondary outlets instead.
- **Context only, not new:** the Senate's Aug 8 stopgap funding bill (Collins-Murray deal) funds the government through Dec 11, 2026 — modestly reduces shutdown-fight risk to September floor time around Sept 15.
- **Score decision: held flat at 32/47/58/82/92 across all five windows.** Nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction — no window moved, no call band flipped. **Left as draft, NOT auto-stamped:** this is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. The active score set is **2026-08-29_draft**, AWAITING ALEX'S MANUAL REVIEW; the last committed baseline remains 2026-08-22_draft2 (32/47/58/82/92, stamped by Alex Aug 23, 2026).

Carried forward — what changed in the Aug 22 full weekly refresh (2026-08-22_draft2), for continuity:

- **This morning's Aug 22 catch-up draft (d1) was fully delivered** — rendered, selfchecked, archived, and git-committed — but stayed uncommitted (owner-stamp sense) after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report, which held the whole score set for manual review. This is a separate, later cycle: a full weekly refresh that independently re-confirms d1's findings against fresh primary sources and lands as a new dated set, 2026-08-22_draft2, per the runbook's same-day-after-delivery rule.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date reconfirmed via 7+ outlets** (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Banking, news.bitcoin.com, Yahoo/Motley Fool) as of Aug 21, independently adversarially re-verified this cycle — no schedule change found; still a motion-to-proceed vote only, not final passage.
- ★ **★ NEW — Sen. Ruben Gallego, on the record at the Aug 19 SALT Wyoming Blockchain Symposium** (crypto.news, Cointelegraph, FXStreet, Blockonomi), confirmed the White House has not given a point-by-point response to the Tillis-Gallego ethics counter-proposal — responses "blank, weaker than before, or not at all" — and warned against rushing the Sept 15 vote. Confirms the deadlock persists, not new deterioration.
- ★ **★ NEW — WH crypto adviser Patrick Witt (Aug 19)** said the administration is "fully committed" to September passage and will keep negotiating with Democrats, while publicly blaming Senate Democrats for the pre-recess delay (Cointelegraph, Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan) — combative messaging, not a concession, not used to move P.
- **No stablecoin-yield-provision developments found this window** — still an open blocker, status quo.
- **Prediction markets, this cycle's fresh pull:** Polymarket "signed in 2026" ~19.5% as of ~Aug 21 (CCN: volatile, dipping to ~15.5% before recovering slightly), Kalshi "60 votes" ~22% (Aug 21) — trending down since earlier-2026 highs but roughly consistent with, not below, the range already carried; market prices, not used to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — an unverified, non-journalistic X post** (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision is "officially solved" — single-source, non-journalistic, and directly contradicted by Gallego's own on-record Aug 19 statement (4+ outlets). Named explicitly so it isn't mistaken for a scored fact.
- ★ **★ NEW, FLAGGED NOT SCORED — Coinbase CEO Armstrong's Aug 21 "pretty optimistic" remarks on 60 votes** (Motley Fool/Fool.com) are single-source opinion from an interested industry party — not used per the sufficiency rule, and its tone runs counter to Gallego's account.
- **Zero confirmed Democratic yes votes on cloture** — Republicans hold 53 of 60 votes needed, unchanged.
- **Score re-rates (Aug 22 d1 → Aug 22 d2):** 1-month 32 → **32** (held) · 3-month 47 → **47** (held) · 6-month 58 → **58** (held) · 1-year 82 → **82** (held) · 3-year 92 → **92** (held) — nothing found this cycle clears the sufficiency bar to move a window. **Left as draft at delivery:** no window moved and no call band flipped for CLARITY, and this cycle's own evidence was clean — but a FULL WEEKLY refresh is categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, independent of the separate Iran War Risk issue that held the earlier same-day d1 draft. **COMMITTED BY ALEX August 23, 2026** after manual review.

This cycle: the Lummis revised-text release, its scope narrowing and unresolved ethics language, whip-count reconfirmation, and this week's prediction-market reads.

- **September 12 FULL WEEKLY refresh (this version):** lummis.senate.gov — press release on the revised CLARITY Act text (PRIMARY, Sept 10, 2026), ~630 pages, incorporating "more than 114 separate provisions" requested by Democratic colleagues and narrowing DeFi/prediction-market scope to CFTC-registered, cash-settled spot trading only · The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, and Blockhead (all Sept 10-11) — 6+ independent outlets corroborating the release and noting the ethics/conflict-of-interest provision is largely unchanged from the July draft · The Block and Blockhead/Politico (Sept 10-11) — 2 independent outlets confirming no Democrat had publicly announced support for the new text · Yahoo Finance, crypto.news, cryptotimes.io — reconfirm the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date and the 53-R-seat / 8-10-crossover whip count unchanged · this cycle's prediction-market pulls (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source) — market prices only, not used to move P.
- **September 12 light daily catch-up (this morning):** re-checked the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date — unchanged (Thune's Aug 8 cloture filing; 53 Republican seats, 60-vote threshold) · Yahoo Finance, crypto.news, cryptotimes.io — whip-count math (defections from Paul/Hawley, a conditional Tillis, 8-10 D/I crossovers needed) consistent with prior cycles, no new dated development · no new dated legislative development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) as of that check.
- **September 11 light daily catch-up:** re-checked the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date — unchanged (Thune's Aug 8 cloture filing; 53 Republican seats, 60-vote threshold) · crypto.news whip-count writeup dated Sept 4 (Paul and Hawley firm no, Tillis conditional, 7-11 Democratic votes needed) — predates the Sept 8-10 baselines, logged as context, not new information · Polymarket ~16% (market price) and Galaxy Research ~10% (analyst estimate) — reported separately, neither used to move P · no new dated legislative development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield).
- **September 10 light daily catch-up:** re-checked the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date — unchanged since Sept 9 (Thune's Aug 8 cloture filing; Republicans hold 53 seats, need 7+ Democratic/independent votes) · Polymarket 2026-pass odds — still reading in the same ~16% band as Sept 9, a market price not an institutional estimate, not used to move P · no new dated legislative development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield).
- **September 9 light daily catch-up:** Yahoo Finance, CNBC ("policy gamble hanging by a thread," Sept 1), Bitget — reconfirm the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date unchanged (Thune's Aug 8 cloture filing; Republicans hold 53 seats, need 7+ Democratic/independent votes) · CNBC, cryptonews — Polymarket 2026-pass odds ~16-17%, drifted down from ~18%, a market price not an institutional estimate, not used to move P · re-checked and reconfirmed as mis-dated: the recycled "Galaxy Research cut odds 50%→30%" figure traces to the same Jul 24-25 analyst call already logged in an earlier cycle, not a fresh data point.
- **September 8 light daily catch-up:** general web search for CLARITY Act / Senate cloture schedule news dated Sept 6-8 — Yahoo Finance, The Block, Bitget, Troutman Financial Services, Bitcoin Foundation, and Governance Intelligence reconfirm the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date unchanged (Thune's cloture motion, filed Aug 8; Republicans hold 53 seats, need 7+ Democratic/independent votes); no new White House sign-off on the ethics-language counteroffer found; no fresh corroborated prediction-market pull.
- **September 6 light daily catch-up:** general web search for CLARITY Act / Senate cloture schedule / House calendar news dated Sept 5-6 — crypto.news and Yellow.com report House Majority Whip Tom Emmer's office pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (House timeline only, not the Sept 15 Senate cloture vote); the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date is reconfirmed unchanged; no new White House sign-off on the ethics-language counteroffer found; Polymarket's ~18% 2026-enactment odds (market price, not an institutional estimate) reflect the same math already priced in.
- **September 3-5 re-check:** general web search for CLARITY Act / Senate cloture schedule news dated Sept 3-5 — Sept 15, 2:15pm ET cloture-on-motion-to-proceed date reconfirmed unchanged (Thune's filed cloture motion, 53 R seats needing 7+ D/I votes); no new White House sign-off on the ethics-language counteroffer found; no fresh corroborated prediction-market pull.

- September 2 light daily catch-up:** general web search for CLARITY Act / Tillis-Gallego / stablecoin-yield / Senate schedule news dated Sept 1-2 — no new dated development found on either binding dispute or the Sept 15 cloture schedule; no fresh corroborated prediction-market pull.
- September 1 light daily catch-up:** general web search for CLARITY Act / Tillis-Gallego / stablecoin-yield / Senate schedule news dated Aug 31-Sept 1 — no new dated development found on either binding dispute or the Sept 15 cloture schedule.
- August 31 light daily catch-up:** DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, and news.bitcoin.com (all Aug 30-31) — independent re-checks reconfirming the Sept 15, 2:15pm ET cloture date with no schedule change; no new ethics-text release or White House sign-off found.
- August 29 full weekly refresh:** [cftc.gov](#) — CFTC Chair Michael Selig's on-record speech at the Innovation Advisory Committee's inaugural meeting (primary source, dated Aug 20, 2026) — directs CFTC staff to explore a fallback crypto-market-structure rulemaking under existing authorities "if CLARITY continues to stall because of Democratic obstruction"; adversarially verified directly against this [cftc.gov](#) page, correcting several secondary outlets (American Banker, PYMNTS, The Hill) that dated the speech Aug 21 · DeFiRate.com (Aug 27) — reconfirms the Sept 15, 2:15pm ET cloture date with no schedule change, and pulls Polymarket "signed in 2026" at 13-14% and Kalshi's "60 votes by Jan 1 2027" market at 20-21% · Motley Fool, CryptoSlate, and CryptoRank (all re-checked from Aug 22 reporting, no update found) — corroborate the Sept 15 date · live Polymarket pull, 14% (Aug 28) — a second independent confirmation of the DeFiRate.com read · general web search for CLARITY Act / Tillis-Gallego / stablecoin-yield / Senate schedule news dated Aug 22-29 — no new dated development found on either binding dispute · a "Sen. Tim Scott: 12-18 Democrats open" quote traced to an August 19, 2025 CoinDesk/Politico Pro story (one year old) and excluded as a likely search-artifact · congress.gov and dailypress.senate.gov — both returned HTTP 403 to direct fetch attempts this cycle · context: the Senate's Aug 8 stopgap funding bill (Collins-Murray deal), funding the government through Dec 11, 2026.
- August 28 daily catch-up cycle (researched, never delivered — treated as not delivered, superseded):** Polymarket — "Clarity Act (H.R.3633) signed into law in 2026?" live pull, 14% (Aug 28) · general web search for CLARITY Act / Tillis-Gallego / Senate schedule news dated Aug 23-28 — no new dated development found beyond the committed Aug 22 baseline. Retained here for audit continuity even though this draft was abandoned before `render/selfcheck/archive/commit`.
- August 22 full weekly refresh (draft2, committed by Alex Aug 23):** The Block, Bitcoin.com, Troutman Financial Services Blog, CCN, Disruption Banking, news.bitcoin.com, and Yahoo Finance/Motley Fool (all re-checked as of Aug 21) — 7+ independent outlets reconfirming the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date with no schedule change · crypto.news, Cointelegraph, FXStreet, and Blockonomi (all Aug 19) — independent same-speech coverage of Sen. Ruben Gallego's remarks at the SALT Wyoming Blockchain Symposium confirming the White House still hasn't substantively responded to the Tillis-Gallego ethics counter-proposal, and warning against rushing the Sept 15 vote · Cointelegraph, Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, and Cryptopolitan (all Aug 19) — independent coverage of WH adviser Patrick Witt's "fully committed" remarks blaming Senate Democrats for the pre-recess delay · CCN — Polymarket "signed in 2026" pull showing volatility, ~19.5% as of ~Aug 21 after dipping to ~15.5% · Motley Fool/Fool.com (Aug 21) — Kalshi "reaches 60 votes" ≈22%, and Coinbase CEO Brian Armstrong's "pretty optimistic" remarks on 60 votes, single-source opinion, flagged not scored · an unverified, non-journalistic X post from a promotional crypto-project account (@iotex_io), circulating ~Aug 20-21, claiming the ethics provision is "officially solved" — explicitly identified, adversarially checked against Gallego's on-record Aug 19 statement, and excluded as NOT used. This cycle independently re-verifies the underlying claims behind this morning's already-delivered Aug 22 catch-up draft (d1) against these fresh primary/reporting sources rather than treating any prior draft as ground truth.
- August 22 catch-up check (draft d1, delivered earlier the same day):** sec.gov — SEC press release 2026-76, "SEC Proposes Regulation Crypto Assets" (Aug 18), the primary source for the token-offering exemption regime (startup exemption ≤\$5M/4yrs; fundraising exemption ≤\$75M/12mo; conditional safe harbor from the "investment contract" definition) · CoinDesk, Bloomberg, and Forbes (all Aug 19) — independent coverage of Trump's White House crypto event with SEC Chair Atkins, CFTC Chair Selig, and industry CEOs, and his public push for Congress to pass "a fair version" of CLARITY · Motley Fool (Aug 21) — confirms the ethics-provision and stablecoin-yield/banking disputes both remain open, no confirmed White House sign-off on the Tillis-Gallego language · Polymarket — "signed into law in 2026" live pull, 25% (Aug 22) · Kalshi — "reaches 60 votes" market, ≈22% (Aug 21) · Coinbase CEO Brian Armstrong's on-record "will pass" prediction — single-source opinion, flagged not scored. This cycle independently re-verifies the underlying claims behind the undelivered Aug 17, 18, and 20 drafts, and the interrupted Aug 21 delivery, against these fresh primary/reporting sources rather than treating any of them as ground truth.
- August 20 draft (written, never delivered — re-verified Aug 22):** Blockonomi/Cointelegraph, FXStreet, and Crypto-Economy (all Aug 20) — independent same-speech coverage of Sen. Ruben Gallego's remarks at the SALT Wyoming Blockchain Symposium, describing White House ethics responses as "blank, weaker than before, or not at all" and warning against rushing a floor vote · The Block — Senate Banking Chair Tim Scott's stablecoin-yield comment and White House adviser Patrick Witt's "truly optimistic and bullish" remark (both Aug 18) · The Block and Troutman Financial Services Blog — re-confirmation of the Sept 15, 2:15pm ET cloture date, no change found.
- August 16 light daily check:** [crypto.news](#) — "The SEC pulled its own crypto vote and nobody saw it coming" · TechTimes — "SEC Cancels Reg Crypto Vote: CFTC Steps Up" · Genfinity — SEC sets, then cancels, Aug 14 Regulation Crypto vote · Bitcoin Foundation — CLARITY vote pushed to September, re-checked · Troutman Financial Services — Senate adjourns without vote, Sept 15 on calendar, re-checked — all confirm Sept 15 as the only scheduled action; the SEC's cancelled vote is a separate rulemaking track, logged as context only.
- August 14 light daily check:** Davis Wright Tremaine — "Senate Republicans Release Updated Crypto Market Structure Text" · CoinDesk — "Senate won't vote on crypto Clarity Act before its summer break" · Bitcoin Foundation — "The Clarity Act August 10 Final Deadline" · Motley Fool — "The Senate Just Delayed a Vote on the Clarity Act" · Yahoo Finance — "U.S. Senate Shelves Clarity Act Ahead Of Summer Break" — all reconfirm Thune's Aug 6-8 no-August-vote statements and the Senate's Sept 14 return / three-week window, consistent with the Sept 15 cloture date already carried; Polymarket cached reads (13%, 16%, 21% across different pulls) don't reconcile to one live number, logged as sentiment only per house sufficiency rules.
- August 13 light daily check:** KuCoin — "Senate Votes on CLARITY Act Cloture on Sept. 15" · news.bitcoin.com — "CLARITY Act Vote Is Set for Sept. 15: Here's What Happens Next" · PYMNTS — "Senate Hands Crypto Industry a Sept. 15 Deadline" (illicit-finance and Agriculture Committee text named as additional sticking points) · Bitcoin Foundation — "Congress Crypto Bill Delay... 2026 Passage Hopes Fade" (Polymarket odds ~15.5%, down from ~30% a week earlier) · Yahoo Finance — "Senate Keeps Clarity Act Alive With Crypto Bill Vote Set for September" — all confirm Sept 15 as the only scheduled action; the Polymarket figure is the one new data point, logged as sentiment only per house sufficiency rules.
- August 12 light daily check:** KuCoin — "Senate Votes on CLARITY Act Cloture on Sept. 15" · Disruption Banking — "CLARITY Act News: The Crypto Bill Just Slipped to a September 15 Senate Showdown" (Aug 10) · news.bitcoin.com — "CLARITY Act Vote Is Set for Sept. 15" and "CLARITY Act Heads Toward Sept. 15 Senate Vote" · The Block — original Aug 8 cloture-filing report, re-checked · CryptoPotato — "CLARITY Act Gets September 15 Senate Vote as Thune Forces the Issue" · Troutman Financial Services Blog — "Senate Adjourns Without Clarity Act Vote, But September Vote Now on the Calendar" — all confirm Sept 15 as the only scheduled action; none report new scheduling or ethics-text developments. No new dated catalyst found.
- August 11 light daily check:** CoinDesk, CryptoPotato, American Banker, Bitcoin Foundation, Forbes — all re-checked for movement beyond the Aug 8 cloture filing; none report new scheduling or ethics-text developments. No new dated catalyst found.
- August 10 light daily check:** CoinGape, Blockonomi, Disruption Banking, news.bitcoin.com — all four independently corroborate the Sept 15, 2:15pm ET cloture scheduling agreement, bringing total outlet corroboration to 7. CryptoSlate/CryptoTimes (Jul 24-27, re-checked today) — confirms the "Galaxy cuts odds to 30%" figure traces to a late-July report, already priced in; excluded as a fresh trigger. No new dated catalyst found beyond these.
- August 9 light daily check:** The Block — "Majority Leader Thune files cloture on Clarity Act, setting up Sept. 15 Senate vote" (Aug 8) · CryptoSlate — "CLARITY Act is finally headed for a 60-vote Senate showdown in September" (Aug 8) · Cointelegraph — "CLARITY Act Heads Toward Key US Senate Procedural Vote" (Aug 8) — all three corroborate the precise 2:15pm ET Sept 15 scheduling agreement; no new dated catalyst beyond this found.
