Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 13, 2026 (light daily touch) · COMMITTED — AUTO-STAMPED

*This is a light daily touch (score set 2026-09-13_draft, committed, auto-stamped) against yesterday afternoon's full weekly refresh (2026-09-12_draft2, which remains a draft awaiting Alex's manual review; the last committed set before today was 2026-09-12_draft). CLARITY Act held flat at 32/47/58/82/92 (a fourth named Democratic blocking issue surfaced — a dispute over vertical-integration conflict-of-interest authority, with Booker, Lummis and Boozman negotiating — but it reinforces rather than changes the already-priced read that the Sept 15 cloture vote is more likely than not to fail), Tokenization RWA held flat at 52/60/66/74/85 (no dated catalyst Sept 12-13; DTCC's October launch unchanged), and Fed & Macro held flat at 34/33/44/54/60 (no new BLS/Fed primary release since the August CPI and PPI prints already priced; the Sept 15-16 FOMC is the next real catalyst and has not occurred). **Iran War Risk RE-RATED UP, modestly**, to 3/3/19/39/70 (from 1/1/17/37/70) — **the first upward move on this pillar since August 6**. Iran's foreign ministry announced Friday Sept 11 that the foreign ministers of Iran, the six GCC states and Iraq will convene in Salalah, Oman on Monday Sept 14 to discuss Strait of Hormuz navigation, safe commercial shipping routes and mine clearance — the first time high-level Iranian and GCC officials have gathered in one place since the war began in February. Primary: the Iranian MFA's own statement; corroborated by 6+ independent outlets. Sized small deliberately: Bahrain said Sept 12 it will not attend, an Iranian official says no deal is expected to be signed, the agenda is about managing a strait Iran still controls, and the fighting did not pause — a commercial vessel was attacked near Qeshm Island inside Hormuz on Sept 13 (1 killed, 4 wounded) and a Houthi projectile struck Jazan, Saudi Arabia. Bitcoin TA (computed) firmed on today's bar: P 54/47/59/68/69 → 60/48/59/68/69. Net effect: **THE FINAL NUMBER** rises from +0.29 / +0.85 to **+0.36 / +0.90** — still Neutral / Mild Bull, no call-band flip anywhere.*

THE FINAL NUMBER · SEPTEMBER 13, 2026 · EQUAL-WEIGHT MODEL (COMMITTED — AUTO-STAMPED)

+0.36

Neutral overall, time-arbitraged — a modest lift from yesterday's +0.29 as the first Iran de-escalation datapoint in six weeks lands alongside a firmer computed Bitcoin TA read — no call-band flip anywhere. Equal-weight mean of the five window signals (−10 max bear ... +10 max bull). Horizon-weighted variant: **+0.90**, up from +0.85 and still Mild Bull. The structure underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Bull at 3 years — every call band unchanged from yesterday. **Leave-one-out final (drop any one pillar): −0.09 to +1.06 — SIGN FLIPS (fragile). COMMITTED — SEPTEMBER 13, 2026 (2026-09-13_draft) · AUTO-STAMPED** — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled September 13, 2026 (light daily touch, committed, auto-stamped) · BTC \$76,745.60 (local run.py quant refresh, September 13, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, 2026-09-13_draft, committed; prior set: 2026-09-12_draft2, draft) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the September 13 light daily touch (2026-09-13_draft, committed, auto-stamped) vs. yesterday afternoon's full weekly refresh (2026-09-12_draft2, draft). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	YESTERDAY'S MASTER (SEPT 12 REFRESH)	THE CALL
1 month	-1.53	-1.71	Bear — still the worst window, but the least-bad reading in a week: Iran lifts off its floor (P 1→3) on the Oman ministerial and Bitcoin TA firms to +1.20 on today's bar
3 months	-1.28	-1.35	Mild Bear — a touch shallower on Iran's P 1→3; the Sept 15-16 FOMC and the Sept 15 CLARITY cloture vote both still sit inside this window, undecided
6 months	-0.04	-0.08	Neutral — CLARITY and Tokenization still carry this window; Iran's P 17→19 lifts it a hair back toward zero, still squarely inside the Neutral band
1 year	+1.73	+1.69	Bull — four of five pillars positive; Iran's P 37→39 trims its drag slightly, but it is still the only negative pillar at this window
3 years	+2.92	+2.92	Bull — law + adoption + cycle + value; unchanged this cycle (Iran's 3yr P held at 70 — one announced meeting does not move the multi-year read)

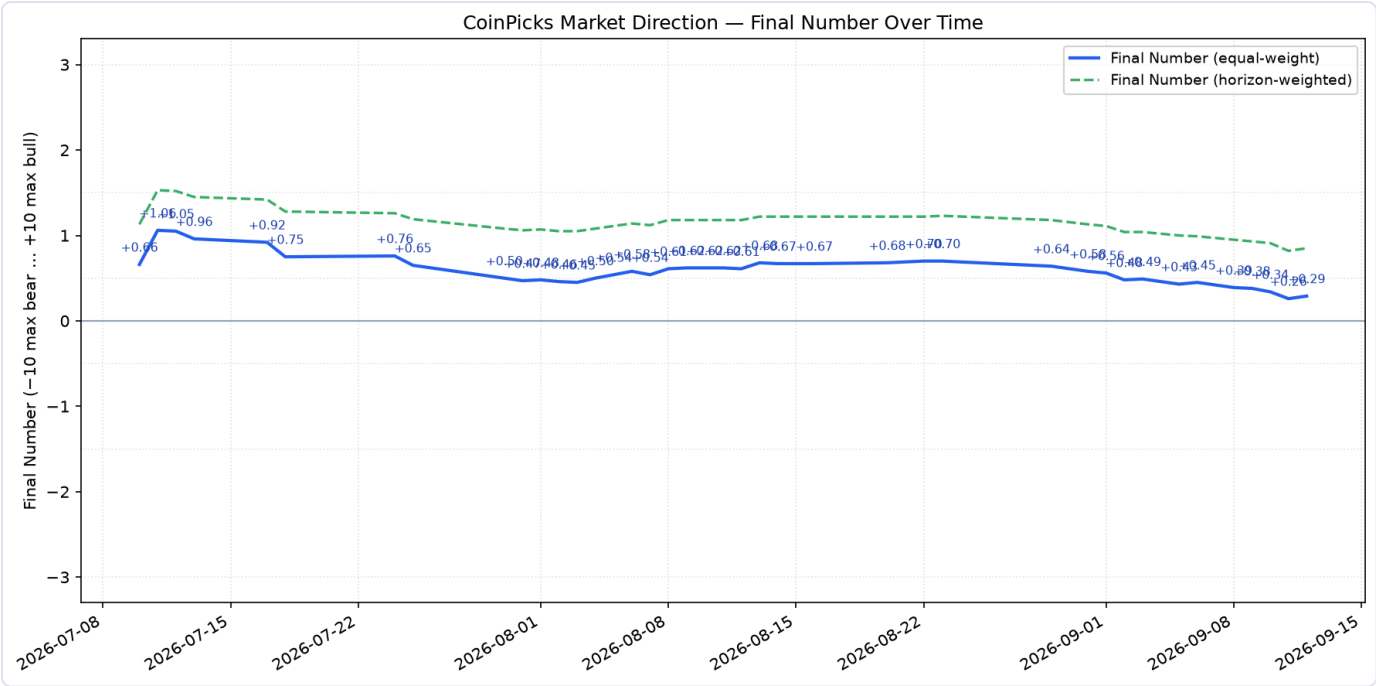

Formula: per pillar, $\text{Signal} = ((P - 50) \div 50) \times \text{Quality} \times \text{Impact}$, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: $|s| < 0.5$ Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Yesterday's Master" is the 2026-09-12_draft2 full-weekly-refresh reading (draft, awaiting Alex's stamp), for exact comparison against today's light daily touch. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

+0.36 = the equal-weight mean of the five MASTER signals above $((-1.53 - 1.28 - 0.04 + 1.73 + 2.92) \div 5)$. Weighting the longer windows harder (10/15/20/30/25%) gives **+0.90**, up from yesterday's +0.85 and still Mild Bull. No call band flips this cycle. CLARITY, Tokenization, and Fed & Macro all held flat (see each pillar's own What Changed); **Iran War Risk re-rated UP, modestly — its first upward move since August 6** — on the announced first Iran-GCC ministerial meeting in Salalah, Oman on Sept 14; Bitcoin TA (computed) firmed on today's bar as the weekly composite strengthened. **Leave-one-out final (drop any one pillar): -0.09 to +1.06 — SIGN FLIPS (fragile)** — see Robustness below. **COMMITTED — AUTO-STAMPED:** this is an ordinary light daily touch, research capability was fully available, verification reconciled clean, and per the runbook's delegated auto-stamp authority the set is stamped in this pass regardless of move size or direction. See My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — September 13 light daily touch (2026-09-13_draft), COMMITTED — AUTO-STAMPED (each report shows the full June → Aug 22 → Aug 28/29 drafts → Aug 31 → Sept 1 → Sept 2 → Sept 5 draft → Sept 5 draft2 → Sept 6 → Sept 8 → Sept 9 → Sept 10 → Sept 11 → Sept 12 draft (committed) → Sept 12 draft2 (weekly, draft) → Sept 13 (this touch, committed) lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	-2.45	-0.41	+1.09	+4.61	+6.38	Held flat — a fourth named Democratic blocking issue (vertical-integration conflict rules) surfaced, but it reinforces rather than changes the already-priced whip math
Iran War Risk (20% · 8)	-4.51	-4.89	-3.47	-1.14	+1.76	RE-RATED UP, modestly — first Iran-GCC ministerial since February convenes in Oman Sept 14; first upward move since Aug 6
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	Held flat — no dated catalyst Sept 12-13; rwa.xyz's \$39.2B Sept 8 read and DTCC's October launch both already priced
Fed & Macro (20% · 8)	-2.18	-2.31	-0.77	+0.48	+1.04	Held flat — no new BLS/Fed primary release since the Aug CPI and PPI prints; the Sept 15-16 FOMC has not occurred
Bitcoin TA — quant (20% · 8)	+1.20	-0.22	+0.79	+1.73	+1.52	Firmed on today's bar — weekly completed-bar composite +40.7, P 54/47→60/48 at 1mo/3mo; BTC \$76,745.60
MASTER — mean of the five	-1.53	-1.28	-0.04	+1.73	+2.92	equal-wt

P lineage (June → Jul 8 → ... → Aug 16 → 22 draft2 → 28/29 drafts → 31 → Sept 1 → Sept 2 → Sept 5 → Sept 6 → Sept 8 → Sept 9 → Sept 10 → Sept 11) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 7, committed) → 32/47/58/82/92 (Sept 9, held flat since Aug 7) → 32/47/58/82/92 (Sept 10, held flat) → 32/47/58/82/92 (Sept 11, held flat) → **32/47/58/82/92** (Sept 12 draft, held flat, committed, auto-stamped) → **32/47/58/82/92** (Sept 12 draft2, full weekly refresh — HELD FLAT after independent re-research; Lummis's Sept 10 revised text leaves the Tillis ethics sticking point and zero-Democrat-commitment count unchanged, a wash — DRAFT, awaiting stamp) → **32/47/58/82/92** (Sept 13, held flat — a fourth named Democratic blocking issue, vertical-integration conflict rules, reinforces rather than changes the already-priced whip math — COMMITTED, AUTO-STAMPED) · Iran 50/55/62/75/85 → 40/47/55/70/83 → ... → 20/28/41/56/77 (Aug 16, committed) → 14/22/38/54/76 (Aug 22 draft2, committed) → 14/22/38/54/76 (Aug 29, held flat, draft) → 9/17/34/51/75 (Aug 31 — RE-RATED DOWN, flip line fired, auto-stamped committed) → 7/15/32/50/75 (Sept 1 — RE-RATED DOWN AGAIN, more modestly, on continued escalation, auto-stamped committed) → 1/9/27/47/74 (Sept 2 — RE-RATED DOWN SHARPLY on a ~50x-larger strike wave, first-ever tanker strikes, and a four-country retaliation — COMMITTED, auto-stamped Sept 3) → 1/9/27/47/74 (Sept 5 draft, held flat) → 1/9/27/47/74 (Sept 5 draft2, full weekly refresh — held flat, COMMITTED BY ALEX Sept 5, 2026) → 1/8/25/45/73 (Sept 6 — RE-RATED DOWN, modestly, once CENTCOM's own press release confirmed the Sept 5 tanker strike as a 3-tanker retaliation for an IRGC missile attack on 2 US Navy warships — COMMITTED, AUTO-STAMPED Sept 6, 2026) → 1/7/24/44/73 (Sept 8 — RE-RATED DOWN, modestly, on Iran's announced intent to declare a restricted zone beyond Hormuz into the Persian Gulf, not yet executed — COMMITTED, AUTO-STAMPED Sept 8, 2026) → 1/6/23/43/72 (Sept 9 — RE-RATED DOWN, modestly, on CENTCOM's confirmed 5-tanker strike Sept 8 and Brent's intraday \$100 cross Sept 9, neither firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 9, 2026, the last TRUE committed baseline) → 1/5/22/42/72 (Sept 10 — RE-RATED DOWN, modestly, on the Al Azraq Jordan retaliation and the Houthi seizure of Mocha/Bab-el-Mandeb, neither firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 10, 2026) → 1/4/20/40/71 (Sept 11 — RE-RATED DOWN, modestly, as the "sustained Brent close above \$100" flip-line clause fired on a third consecutive session, alongside fuller reporting of Iran's 10-vessel Sept 9 Hormuz shipping wave — COMMITTED, AUTO-STAMPED SEPTEMBER 11, 2026) → **1/2/18/38/70** (Sept 12 — RE-RATED DOWN, moderately, as Houthi forces swept the rest of Yemen's Red Sea coastline and seized Bab al-Mandeb's Mayyun Island, a second global chokepoint moving under adversary-aligned control, alongside a UKMTO-confirmed strike on two more vessels near Khasab, Oman, neither independently firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 12, 2026, the new last

TRUE committed baseline) → **1/1/17/37/70** (Sept 12 draft2, full weekly refresh — RE-RATED DOWN FURTHER, modestly, on a drone strike of undetermined sponsorship hitting Saudi Arabia's East-West Pipeline (Petroline) Sept 10, primary-sourced (Saudi MFA statement/confirmation Sept 11) via a Saudi MFA statement plus 6+ independent outlets, neither the widening nor US-casualty clause firing — DRAFT, awaiting Alex's manual review; a full weekly refresh is categorically excluded from auto-stamp) → **3/3/19/39/70** (Sept 13 — RE-RATED **UP**, modestly, the first upward move on this pillar since Aug 6, on Iran's foreign ministry announcing the first Iran-GCC ministerial meeting since the war began — foreign ministers of Iran, the six GCC states and Iraq convening in Salalah, Oman on Monday Sept 14 on Hormuz navigation, safe shipping routes and mine clearance; primary Iranian MFA statement plus 6+ independent outlets, sized small against Bahrain's non-attendance, an Iranian official's "no deal expected", and continued Sept 13 fighting — COMMITTED, AUTO-STAMPED SEPTEMBER 13, 2026) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 52/60/66/74/85 (Aug 8, committed) → 52/60/66/74/85 (Sept 9, held flat since Aug 8) → 52/60/66/74/85 (Sept 10, held flat) → 52/60/66/74/85 (Sept 11, held flat) → **52/60/66/74/85** (Sept 12 draft, held flat, committed, auto-stamped) → **52/60/66/74/85** (Sept 12 draft2, full weekly refresh — HELD FLAT; rwa.xyz now reads \$39.2B and DTCC's October launch is reconfirmed, but neither clears the sufficiency bar — DRAFT, awaiting stamp) → **52/60/66/74/85** (Sept 13, held flat — no dated catalyst Sept 12-13 — COMMITTED, AUTO-STAMPED) · Fed 38/40/46/54/61 → 35/36/42/52/61 → ... → 43/41/48/56/62 (Aug 22 draft2, committed) → 36/35/45/55/61 (Aug 29, draft) → 36/35/45/55/61 (Aug 31, auto-stamped committed) → 36/35/45/55/61 (Sept 1, auto-stamped committed) → 36/35/45/55/61 (Sept 2 — held flat, auto-stamped Sept 3) → 32/31/43/54/60 (Sept 5 draft — RE-RATED DOWN on a hot August jobs report and higher FOMC hike-odds pricing) → 32/31/43/54/60 (Sept 5 draft2, full weekly refresh — RE-CONFIRMED, COMMITTED BY ALEX Sept 5, 2026) → 32/31/43/54/60 (Sept 6, held flat, auto-stamped) → 32/31/43/54/60 (Sept 8, held flat, auto-stamped) → 32/31/43/54/60 (Sept 9, held flat) → 32/31/43/54/60 (Sept 10, held flat) → 34/33/44/54/60 (Sept 11 — RE-RATED UP, modestly, once the August CPI print landed with core a tenth cooler than consensus — COMMITTED, AUTO-STAMPED SEPTEMBER 11, 2026) → **34/33/44/54/60** (Sept 12 draft, held flat, committed, auto-stamped) → **34/33/44/54/60** (Sept 12 draft2, full weekly refresh — HELD FLAT; the Sept 10 August PPI print's core reading undershot consensus, reinforcing the already-priced cooler CPI narrative — DRAFT, awaiting stamp) → **34/33/44/54/60** (Sept 13, held flat — no new BLS/Fed primary release; the Sept 15-16 FOMC has not occurred — COMMITTED, AUTO-STAMPED) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 49/46/54/66/69 (Aug 22 draft2) → 54/46/56/67/69 (Aug 29) → 54/46/59/68/69 (Aug 31) → 57/46/59/68/69 (Sept 1, computed) → 57/47/59/68/69 (Sept 2, computed) → 59/48/60/68/69 (Sept 5, computed) → 62/53/60/68/69 (Sept 6, computed) → 59/47/59/68/69 (Sept 8, computed) → 59/47/60/68/69 (Sept 9, computed) → 55/48/59/68/69 (Sept 10, computed) → 58/47/59/68/69 (Sept 11, computed) → **54/47/59/68/69** (Sept 12 draft, computed on today's bar) → **54/47/59/68/69** (Sept 12 draft2, unchanged — same trading day, quant pillar not touched by qualitative research) → **60/48/59/68/69** (Sept 13, computed on today's bar — weekly completed-bar composite +40.7). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on September 13, 2026, a light daily touch (comparisons below are vs. yesterday afternoon's full weekly refresh, 2026-09-12_draft2)

- **1 month — Bear (−1.53, up from −1.71).** CLARITY (−2.45), Tokenization (+0.29), and Fed (−2.18) all held flat; **Iran lifted to −4.51 from −4.70** as its P came off the floor (1→3) on the announced Oman ministerial, and **Bitcoin TA firmed to +1.20 from +0.48** as the weekly completed-bar composite strengthened to +40.7. Still the worst window in the set, but the least-bad reading in a week.
- **3 months — Mild Bear (−1.28, up from −1.35).** CLARITY (−0.41), Tokenization (+1.41), and Fed (−2.31) held flat; **Iran lifted to −4.89 from −5.10** (P 1→3) and Bitcoin TA eased its drag to −0.22 from −0.34. Both of this week's decisive events — the Sept 15 CLARITY cloture vote and the Sept 15-16 FOMC — still sit inside this window, undecided.
- **6 months — Neutral (−0.04, up from −0.08).** CLARITY (+1.09), Tokenization (+2.18), Fed (−0.77), and Bitcoin TA (+0.79) all held flat; **Iran rose to −3.47 from −3.70** (P 17→19). The window edges back toward zero — still squarely inside the Neutral band ($|\text{signal}| < 0.5$), not a call-band flip.
- **1 year — Bull (+1.73, up from +1.69).** Four of five pillars still non-negative: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.48 (all unchanged). **Iran rose to −1.14 from −1.35** (P 37→39), still alone negative at this window. Price now sits ~45% below power-law fair value (\$140,111).
- **3 years — Bull (+2.92, unchanged).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Bitcoin TA +1.52, Fed +1.04, **Iran +1.76 (unchanged — this cycle's re-rate deliberately did not touch the 36mo window, held at P 70; one announced meeting with no deal expected does not move the multi-year strategic read).** A structural window this cycle's re-rate does not move.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Iran War Risk (judged) re-rates UP for the first time since August 6, and Bitcoin TA (computed) firms independently on the same day: P 3/3/19/39/70 (Iran, judged, re-rated up modestly) alongside 60/48/59/68/69 (Bitcoin TA, computed, firmed on today's bar from 54/47/59/68/69). The two lenses move the same direction this cycle for entirely unrelated reasons — one on an announced diplomatic convening, the other on a weekly completed-bar composite strengthening to +40.7 — which is the kind of independent agreement this structure exists to surface. It is worth being blunt about the limit: Iran War Risk is still the worst signal at every window through 1 year, and a scheduled meeting is not a ceasefire.

THE REAL DISAGREEMENT

Near-term: Bitcoin TA (P 60) is now the strongest near-term pillar, having overtaken Tokenization (P 52) on today's recompute; Fed & Macro (P 34) and CLARITY (P 32) sit below them; Iran remains sharply the clearest risk-off vote in the set (P 3). The master resolves it honestly: Bear at 1 month, unchanged in call band from yesterday even though the number improved — Iran's drag is still large enough to hold the window negative on its own.

Long-term: the four story pillars average about +3.24 at 3 years (CLARITY +6.38, Tokenization +3.92, Fed +1.04, Iran +1.76) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.1× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A light daily touch ran today against yesterday afternoon's full weekly refresh. Iran War Risk re-rated UP, modestly — its first upward move since August 6 — on the announced first Iran-GCC ministerial meeting since the war began; CLARITY, Tokenization, and Fed & Macro all held flat. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Announced Fri Sept 11, reported Sept 11-12 — CONFIRMED via the Iranian MFA's own statement plus 6+ independent outlets; the meeting itself is PENDING Sept 14	First Iran-GCC ministerial meeting since the war began in February. Iran's foreign ministry announced that the foreign ministers of Iran, the six GCC states and Iraq will convene in Salalah, Oman on Monday Sept 14 to discuss Strait of Hormuz navigation — safe/temporary commercial shipping routes, mine clearance and short-term management of the waterway — built on weeks of Oman-mediated Iran-Oman talks. Iranian MFA: the gathering aims "to promote better understanding among the countries of the region and help strengthen shared regional security." Corroborated by Al Jazeera (Sept 11), Dawn (Sept 12), Arab News, Oman Observer, Business Standard, Business Recorder, ARMENPRESS and SBS	Iran War Risk: the sole driver of this cycle's UP re-rate (1mo/3mo/6mo/12mo up, 36mo held). It does NOT fire the pillar's upside flip line, which requires an actual ceasefire or strait reopening. Sized small against four logged counterweights: Bahrain said Sept 12 it will not attend; an Iranian official told JPost no signed deal is expected; the agenda concerns MANAGING a strait Iran still controls (Tehran is weighing a transit service-fee regime); and the fighting has not paused

Sept 13, reported same day — Iran's attribution is Iran's own and is NOT treated as established	A commercial vessel was attacked near Qeshm Island inside the Strait of Hormuz, killing 1 and wounding 4; an Iranian official blamed the "US terrorist enemy". A Houthi projectile struck Jazan, Saudi Arabia, causing injuries and damaging a mosque, and Houthi forces continued trading strikes with Yemen's internationally recognised government over Bab al-Mandeb (Al Jazeera live blog, Sept 13)	Iran War Risk: the honest counterweight to the diplomacy — logged and explicitly sized into today's restrained +2-point move. No flip-line clause fires; no US casualty is claimed or confirmed
Struck Sept 10 (Saudi MFA statement/confirmation Sept 11), CONFIRMED via a Saudi MFA statement plus 6+ independent outlets	A drone strike — launched from Iraqi territory, sponsorship undetermined; President Trump called Iran "probably" responsible in a single hedged, unconfirmed remark — hit Saudi Arabia's East-West Pipeline (Petroline)	Iran War Risk: primary-sourced and multi-outlet corroborated, but sponsorship remains undetermined — does NOT independently fire the widening clause; no US casualty, so that clause doesn't fire either. Drove yesterday's weekly-refresh cut; already priced as of today
Fired Sept 10-11, escalated to island seizure Sept 11, CONFIRMED via 6+ independent outlets	Houthi forces complete their sweep of Yemen's entire Red Sea coastline (capturing Dhubab, Murad) and seize Mayyun (Perim) Island in the Bab al-Mandeb strait; fighting continues for Zuqar Island (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Saudi Crown Prince MBS's request for direct US strikes on the Houthis was refused	Iran War Risk: same Houthi/Yemen actor and theater already priced, and already reflected in this morning's committed set — does NOT independently fire the widening clause; no US casualty, so that clause doesn't fire either
Sept 10 (UKMTO Warning 133-26), reported Sept 11 — CONFIRMED via UKMTO plus 3+ independent outlets	Four unidentified projectiles struck two vessels near Khasab, Oman, one set afire (UKMTO; Gulf News, Maritime Executive, The Hill). Logged, not scored (single-source): an IRGC claim of a Saildrone strike near the Strait entrance	Iran War Risk: continuation of the established tanker/vessel-attack pattern, already reflected in this morning's committed set
FIRE Sept 10-11 — a flip-line clause, CONFIRMED via 4+ independent market sources	"Sustained Brent close above \$100" — Brent ended Thursday Sept 10 up more than 6% above \$107 (above \$108 intraday), its highest since May 19; but gave back 4.24% on Friday Sept 11 to ~\$104.26 — the first meaningful downside session since the clause fired — attributed by wire coverage to the Hormuz diplomacy plus the IEA's demand-contraction forecast (Rigzone/Bloomberg wire, TradingEconomics, Forbes)	Iran War Risk: this clause remains fired and continues to hold above \$100 — the second distinct flip-line clause to trigger, after the Aug 30 resumption-of-direct-US-strikes clause. Friday's give-back is reported as a market price and is NOT itself what moved P this cycle (the Iranian MFA announcement is)
Fired Sept 9, CONFIRMED via CENTCOM/Jordan's own military statement	The IRGC retaliates for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military)	Iran War Risk: Jordan is a repeat target — the widening clause does not fire; both sides confirm no casualties — the US-casualty clause does not fire either
Surfaced Sept 10, checked Sept 13 — corroborated via 3+ independent outlets	A fourth named Democratic blocking issue: a dispute over vertical-integration conflict-of-interest authority (Democrats want regulators empowered to set conflict standards for firms	CLARITY: held flat. A fourth named blocking issue reinforces rather than changes the already-priced read that cloture is more likely than not to fail —

	controlling several legs of a trade — the FTX/Alameda pattern; Republicans and industry resist on misuse-by-a-future-administration grounds). Booker, Lummis and Boozman are negotiating. The Sept 15 2:15pm ET cloture vote and the 53-R/need-7-or-more-crossovers math are unchanged; Sen. Lummis spent Sept 11-13 publicly pressing Democrats to vote for the revised text (115 changes incorporated), with still zero Democrats publicly committed. Polymarket ~23% by Dec 31 — a market price, reported not scored	it does not clear the sufficiency bar for a move on its own
Checked Sept 13, no fresh catalyst	Tokenization: no dated catalyst found Sept 12-13 — no new rwa.xyz pull beyond the \$39.2B Sept 8 read already priced, and no rail failure, depeg, or counterparty default. DTCC's October 2026 full-service launch remains unchanged and on schedule	Tokenization: held flat
Checked Sept 13, no fresh catalyst	Fed & Macro: no new BLS/Fed/BEA primary release since the August CPI (Sept 11) and August PPI (Sept 10) prints already priced. Market-implied September hike odds circulated in a wide 56-90% band across sources this week — a market price, explicitly NOT used to move P	Fed & Macro: held flat
Sept 15-16, 2026	FOMC decision with SEP/dot plot — the first meeting after a core-CPI print that undershot consensus by a tenth while headline ran hot on energy	Fed: a hike confirms the hawkish read this pillar still carries; a hold would argue the market outran the committee
Sept 15, 2026	Next FOMC, with SEP/dot plot; also the first CLARITY Act cloture vote, precisely dated 2:15pm ET	Fed: a hike confirms the Sept 5 re-rate, a hold/cut suggests the market outran the committee. CLARITY: cloture succeeds = re-rate 3mo/6mo up hard; fails = re-rate down
~Aug 31, now passed	Historical average cycle-bottom month has passed (cycle month now 28.78)	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value \$140,111	BTC \$76,745.60 sits ~45% below fair value	1yr/3yr windows: the structural bull case's core, essentially unmoved by this cycle's news

The master flip line — Iran's strikes clause fired Aug 30, escalated sharply Sept 1-2, and as of Sept 11 a SECOND clause has fired too: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a sustained Brent close above \$100 (Iran). **The Brent clause fired Sept 10-11 and continues to hold** — Brent remained above \$100 through Friday Sept 11 despite a 4.24% give-back to ~\$104.26 on the Hormuz diplomacy. Two of the four clauses are still live; the other two are not: the Bab al-Mandeb chokepoint seizure is a severity escalation within an existing theater, not a widening to a further new state, and no US casualty is claimed or confirmed. **On the upside, be precise about what did and did not happen:** the Sept 14 Iran-GCC ministerial in Oman is the first credible step toward the upside flip, but the upside clause requires a signed, US-accepted Hormuz reopening that holds a full clean week — an announced meeting with no deal expected is not that,

which is why today's re-rate is +2 points and not a reversal. The Sept 15-16 FOMC delivering a hike would confirm and extend the Fed read; the Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text would also be a genuine escalation. A signed, US-accepted Hormuz reopening that holds a full clean week would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	−0.01	Neutral
— drop Iran War Risk	+1.06	Mild Bull · yes
— drop Tokenization RWA	−0.09	Neutral
— drop Fed & Macro	+0.64	Mild Bull · yes
— drop Bitcoin TA	+0.20	Neutral
all five in (headline)	+0.36	Neutral

Leave-one-out final (drop any one pillar): −0.09 to +1.06 — SIGN FLIPS (fragile). The sign still flips when Tokenization or CLARITY are dropped individually, the same fragile-reading pattern as recent cycles — and four of the five drops (removing CLARITY, Tokenization, Bitcoin TA, or nothing at all) round to **Neutral**. **Iran War Risk remains by far the largest single swing pillar: dropping it alone moves the reading from Neutral (+0.36) to +1.06 — a full call band better, into Mild Bull territory.** Dropping Fed & Macro alone also crosses into Mild Bull (+0.64) — the second-largest swing pillar this cycle. That is the single clearest robustness signal this report can give: today's headline number is not being driven by a broad, balanced move — Iran and, to a lesser degree, Fed & Macro are doing the work. The horizon-weighted final (+0.90) is more robust and stays Mild Bull throughout even with either pillar included. Note that today's Iran re-rate was *upward* and the leave-one-out spread narrowed slightly (−0.17...+1.02 → −0.09...+1.06 at the bottom end), but the reading remains genuinely fragile and should be read as such.

My Decision

COMMITTED — SEPTEMBER 13, 2026 (2026-09-13_draft) · LIGHT DAILY TOUCH · AUTO-STAMPED

**MASTER: -1.53 / -1.28 / -0.04 / +1.73 / +2.92 · THE FINAL NUMBER: +0.36
equal-weight (Neutral) / +0.90 horizon-weighted (Mild Bull) — no call-band flip
vs. yesterday's full weekly refresh (2026-09-12_draft2)**

This is a light daily touch (2026-09-13_draft) against yesterday afternoon's full weekly refresh (2026-09-12_draft2, which remains a draft awaiting Alex's manual review — the last committed set before today was 2026-09-12_draft). Three pillars were re-checked and **held flat**. CLARITY Act at 32/47/58/82/92: a fourth named Democratic blocking issue surfaced — a dispute over vertical-integration conflict-of-interest authority, with Booker, Lummis and Boozman negotiating — but it reinforces rather than changes the already-priced read that Tuesday's cloture vote is more likely than not to fail, and Sen. Lummis's Sept 11-13 public pressure campaign is advocacy, not a vote commitment; zero Democrats are publicly committed. Tokenization RWA at 52/60/66/74/85: no dated catalyst Sept 12-13, no rail failure or depeg, DTCC's October launch unchanged. Fed & Macro at 34/33/44/54/60: no new BLS/Fed primary release since the August CPI and PPI prints already priced; the Sept 15-16 FOMC is the next real catalyst and has not occurred, and the wide 56-90% band of market-implied hike odds circulating this week is a market price, not scored. **Iran War Risk RE-RATED UP, modestly**, to 3/3/19/39/70 (from 1/1/17/37/70) — **the first upward move on this pillar since August 6, and the first genuine de-escalation datapoint since the ratchet began in late August**. Iran's foreign ministry announced Friday Sept 11 that the foreign ministers of Iran, the six GCC states and Iraq will convene in Salalah, Oman on Monday Sept 14 to discuss Strait of Hormuz navigation, safe commercial shipping routes and mine clearance — the first time high-level Iranian and GCC officials have gathered in one place since the war began in February. Primary: the Iranian MFA's own statement; corroborated by 6+ independent outlets, comfortably clearing the sufficiency bar.

Why the move is +2 points and not a reversal. Four counterweights are logged and sized in, not waved away: Bahrain announced Sept 12 it will not attend, so GCC participation is incomplete; an Iranian official told JPost that no signed Hormuz deal is expected out of the meeting — this is a convening, not an outcome; the agenda concerns *managing* transit through a strait Iran still controls, with Tehran weighing a service-fee regime for vessels, which arguably institutionalises rather than lifts the blockade; and the fighting did not pause — on Sept 13 a commercial vessel was attacked near Qeshm Island inside Hormuz, killing 1 and wounding 4 (an Iranian official blamed the US; that attribution is Iran's own and is logged, not treated as established), a Houthi projectile struck Jazan, Saudi Arabia, and Houthi forces continued trading strikes with Yemen's recognised government over Bab al-Mandeb. Brent's 4.24% Friday give-back to ~\$104.26 corroborates the diplomacy read but is a market price and is reported, not used to move P. No flip-line clause fires in either direction: the upside clause requires a signed, US-accepted Hormuz reopening holding a full clean week.

Stamp decision: AUTO-STAMPED. This is an ordinary light daily touch, not a weekly refresh; research capability (WebSearch/WebFetch, primary sources) was fully available this cycle; no window moved more than 2 points; sourcing clears the primary-source-plus-multi-outlet bar; and verification reconciled clean. Per the runbook's delegated auto-stamp authority — widened Sept 2 so that move size, call-band movement, and the novelty of the underlying news are no longer grounds to withhold — the set is stamped in this pass: **status committed, stamped by "Alex (auto-stamped)"**. The direction of the move does not change that test either: the same sufficiency and sourcing rules that justified six weeks of downward re-rates justify this upward one.

One correction applied this cycle, flagged for the record. The Fed & Macro pillar report carried a stale line reading "Updated Sept 11: re-rated down a further modest step, 32/31/43/54/60 → 29/28/41/54/60" — text lifted from the abandoned, never-delivered Sept 11 draft. It contradicted both config/scores.json and the report's own scores table, which correctly show the Sept 11 set at 34/33/44/54/60 (re-rated *up* on the August CPI print). The prose has been corrected to match. No score, blend, or archived figure was affected; only the narrative line was wrong.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — Iran remains by far the largest single swing pillar (see Robustness above: dropping it alone puts the reading at +1.06, Mild Bull), with Fed & Macro

the second-largest (dropping it alone gives +0.64); the leave-one-out range this cycle (−0.09 to +1.06) still crosses zero — the sign flips depending on which pillar is dropped — a genuinely fragile reading worth watching. Two dated events inside 72 hours can move this materially: the Sept 14 Iran-GCC ministerial in Oman, and the Sept 15 CLARITY cloture vote followed by the Sept 15-16 FOMC.

Sources

Each pillar report carries its full, freshly-checked source list. The master adds the engine and headline references for this September 13 light daily touch.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Tokenization_RWA / Fed_Macro Pillar Reports (re-checked Sept 13, held flat) · CoinPicks_Iran_War_Pillar_Report (RE-RATED UP, modestly, Sept 13 — COMMITTED, AUTO-STAMPED — the announced Iran-GCC Hormuz ministerial in Oman) · CoinPicks_Bitcoin_TA_Quant_Pillar_Report (recomputed Sept 13 on a local run.py quant refresh).
- **The engine:** engine/blend.py → data/master_blend.json (score set 2026-09-13_draft in config/scores.json, status: committed, stamped_by "Alex (auto-stamped)", active_qual_set; the prior set 2026-09-12_draft2 remains status: draft, a full weekly refresh awaiting Alex's manual review; full lineage back to 2026-06-19_committed; final-number window weights in config/settings.json "final_weights") · engine/mapping.py → data/pillar_scores.json (data through Sept 13, 2026).
- **September 13 light daily touch — the load-bearing new facts:** Iranian Ministry of Foreign Affairs statement (announced Friday Sept 11) that Iran will meet the GCC foreign ministers and Iraq in Salalah, Oman on Monday Sept 14 on Strait of Hormuz navigation — corroborated by Al Jazeera (Sept 11), Dawn (Sept 12), Arab News, Oman Observer, The Business Standard, Business Recorder, ARMENPRESS and SBS (6+ independent) · Bahrain's Sept 12 announcement that it will not attend, and an Iranian official's statement (JPost) that no signed deal is expected — both logged as counterweights · Al Jazeera live blog Sept 13 — commercial vessel attacked near Qeshm Island (1 killed, 4 wounded; Iran's attribution to the US logged as Iran's own, not established), Houthi projectile on Jazan, continued Bab al-Mandeb fighting · TradingEconomics / Forbes — Brent's 4.24% Friday Sept 11 give-back to ~\$104.26, reported as a market price, not used to move P · crypto.news, Coingape, CoinSpectator — the CLARITY Act vertical-integration conflict-of-interest dispute (Booker/Lummis/Boozman negotiating), held flat. Full citations, including single-source items explicitly flagged as such, carried in each respective pillar report's own source list.
- **Price:** BTC/USD \$76,745.60 (Sept 13, 2026, data/btc_usd_daily.csv via a local run.py quant refresh) — down from \$77,289.66 (Sept 12); cycle low \$58,526 close (Jun 30); ATH \$124,728 close (Oct 6, 2025); power-law fair value \$140,111 (BTC ~45% below fair).
