The Fed & Macro Regime Pillar Report

Liquidity as the Master Driver — Researched, Scored, and Re-Rated

Originally written and scores committed by me on June 12, 2026. Fully re-researched July 8, 13, 18, 25, and 30, 2026, and again as a full weekly refresh on August 8, 2026 (re-rated up to a moderated 40/38/47/55/62 on the BLS July jobs report, committed and stamped by Alex). Re-rated up again August 13 to 43/41/48/56/62 on a cool CPI print and a weak claims print; held flat August 14, 16, and through two Aug 22 cycles (a catch-up draft, then the full weekly refresh) — committed and stamped by Alex August 23, 2026, the last true baseline. A same-day catch-up draft written August 28 (score set `2026-08-28_draft`) re-rated down to 38/37/46/55/61 on Fed Chair Warsh's hawkish Jackson Hole speech and a hot July PCE print, but was ***never rendered, selfchecked, archived, or committed*** *— it sits abandoned, superseded mid-cycle.* ***This version (August 29, score set `2026-08-29_draft`) is a FULL WEEKLY refresh and goes further, re-rating down to 36/35/45/55/61.*** *A dedicated adversarial-verification pass this cycle caught a real error in the abandoned draft: its CME FedWatch September rate-hike-odds figure (~35.4%→~45.7%) UNDERSTATED the actual market move. Independent re-pull and cross-check — Motley Fool citing CME FedWatch directly at 57.5%, CNBC's own body text at "nearly 56%," and a third independent source at "55.7%" — shows the real post-speech reading clustered tightly in the high-50s, roughly 56-58%, not 45.7%: September hike odds are now past coin-flip, not just approaching it. Two fresh facts not in the abandoned draft: initial jobless claims for the week ended Aug 22 (DOL, primary, Aug 27) came in at 203,000 vs. 208,000 consensus, a mild hawkish-adjacent tightening signal; and the Aug 26 H.4.1 balance-sheet release (federalreserve.gov, primary) showed the same reserve-drain pattern continuing (reserve balances −$10,351M w/w to $2,924,936M; TGA −$2,876M w/w to $950,736M), logged but not independently trigger-worthy. This cycle also corrects the abandoned draft's price-action framing: BTC did NOT hold a stable tape through the speech — it opened Aug 28 around $80,262, traded above $81,000 pre-speech, then fell back sharply once Warsh spoke, closing $79,613.44 that day, and continued falling to $77,666.16 by today, Aug 29 (Bitstamp) — a real, visible reaction, not a shrug.* ***Net: the corrected, larger CME move justifies a deeper cut than the abandoned draft reached.*** *1mo 43→36 (-7), 3mo 41→35 (-6), 6mo 48→45 (-3), 1yr 56→55 (-1), 3yr 62→61 (-1) — still minimal at the long end, since Warsh explicitly declined to commit to a reaction function and one repricing doesn't reach three years out. Left as draft at delivery, not auto-stamped: this is a FULL WEEKLY refresh, which the runbook's delegated daily auto-stamp authority categorically excludes regardless of move size — doubly so here since every window moved 7 points or fewer anyway. Flagged for Alex's manual review; see My Decision below.* ***THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft****, covering Aug 29-31: CME FedWatch September hike odds continued drifting up post-Warsh (CNBC Aug 28: ~45.7%; CoinSpectator/Bitcoin.com Aug 30: ~57%; CNBC Aug 31 Jackson-Hole-roundup: ~60.4%, up from ~56% Friday) — directionally the same hawkish repricing already sized into the Aug 29 cut (which used a 56-58% cluster as its basis). Per the sufficiency rule, a market-odds drift alone, without a fresh primary data print or news event, cannot move P further. No new H.4.1 (next due Sept 3, last Aug 27) or jobless claims release landed in this window.* ***P HELD FLAT at 36/35/45/55/61.*** *This is a light daily touch, no window moved, no call band flipped —* ***AUTO-STAMPED*** *per delegated daily authority.* ***Sept 1: held flat again*** *— CME FedWatch September hike odds continued the same post-Jackson-Hole drift (Forbes/KuCoin ~66% at 11:40am ET Aug 31, up from the ~60.4% CNBC read this pillar's Aug 31 baseline used), but it's the same intraday drift sequence with no new primary print or news event behind it, so per the sufficiency rule it does not independently move P; no new H.4.1 or claims release landed (Aug 31 was Labor Day). Score set 2026-09-01_draft, AUTO-STAMPED, new last COMMITTED baseline.* ***Sept 2: held flat a further time*** *— no new H.4.1 or data print found dated Sept 1-2; September 15-16 FOMC market pricing (CME FedWatch roughly 60% hold) continues the same post-Jackson-Hole drift already priced into the Sept 1 baseline, not a fresh data-driven move, so per the sufficiency rule it does not independently move P. Score set 2026-09-02_draft*

— this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Fed & Macro's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report); COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026 once Alex widened the policy — this is the last TRUE committed baseline: 36/35/45/55/61. ***Sept 3: held flat a further time*** *— light daily catch-up found nothing material on any of the four qualitative pillars; config/scores.json untouched, blend re-run against fresh quant data only.* ***Sept 5, light daily catch-up (score set 2026-09-05_draft): RE-RATED DOWN a modest further step, 36/35/45/55/61 → 32/31/43/54/60.*** *The August jobs report (BLS, primary, released Sept 4) beat sharply — nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady at 4.1% — and markets repriced September 15-16 FOMC hike odds higher off of it (CNBC, Yahoo Finance, TheStreet, U.S. News, Investing.com/Reuters — point estimates vary 60-66% by source/timestamp but are directionally consistent and higher than the Sept 2 baseline's "~60% hold" framing). Same-day reaction: 2yr Treasury yield +5.3bp to its highest since January 2025; Dow −0.51%, S&P −0.38%, Nasdaq −0.29%; BTC fell ~2% same-day ($81,265.00 Sept 3 close → $79,676.60 Sept 4 close). Fed officials remain split (Warsh hawkish; Waller says he'd lean toward holding if inflation improves), with the Sept 11 CPI print now flagged as the likely decider before Sept 15-16. Move sized comparably to the Aug 22→28 catch-up cut on the Warsh Jackson Hole speech alone (a comparable single dated catalyst): 1mo −4, 3mo −4, 6mo −2, 1yr −1, 3yr −1, no window over 8 points.* ***CORRECTION:*** *that cycle's commit message claimed "AUTO-STAMPED SEPTEMBER 5, 2026," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here and not corrected retroactively (stamping is Alex's call).* ***Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:*** *independently re-verified via WebSearch — Fed Governor Waller's genuinely dovish-leaning Sept 3 speech ("give disinflation a chance") briefly cut CME hike odds to ~48% (Semafor, CNBC, Bloomberg, PBS) before the Sept 4 jobs beat reversed that back up to 60-66% (Forbes/CME FedWatch), a net hawkish drift for the week consistent with the Sept 5 cut. No further Fed commentary or data since; the Sept 11 CPI print has not yet landed.* ***HELD FLAT at this cycle's re-rated level, 32/31/43/54/60. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size — left for manual review, and COMMITTED BY ALEX SEPTEMBER 5, 2026. Sept 6: light daily catch-up, held flat.*** *Re-checked via WebSearch: no new Fed speech, data release, or FOMC commentary since Sept 3-4 (Governor Waller's dovish-leaning Sept 3 speech and the Sept 4 BLS August payrolls beat were already captured in the Sept 5 re-rate). September 6 is a Saturday — markets and the Fed's own calendar are quiet, no data or speeches scheduled. The September 11 CPI print remains the next dated catalyst and has not yet landed.* ***HELD FLAT at 32/31/43/54/60. Sept 8: light daily catch-up, held flat again.*** *Re-checked via WebSearch: no new Fed speech, data release, or FOMC commentary since Sept 3-4; the Sept 11 CPI print and the Sept 15-16 FOMC meeting remain the next dated catalysts, not pre-empted this cycle.* ***HELD FLAT at 32/31/43/54/60. Sept 9: light daily catch-up, held flat again.*** *Re-checked directly against CME FedWatch-citing coverage — September 25bp-hike odds read ~58.7% (as of Sept 7, CNBC/cryptonews), consistent with the ~56-58% cluster already priced into the baseline, not a fresh move; no new FOMC meeting, no new BLS/DOL primary release since Sept 3-4. The Sept 11 CPI print and Sept 15-16 FOMC remain the next dated catalysts.* ***HELD FLAT at 32/31/43/54/60. Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.*** *Held flat at 32/31/43/54/60 — independently re-checked, nothing cleared the sufficiency bar. The Aug CPI release (due Sept 11) and the FOMC meeting (Sept 15-16) are both still pending per BLS/Fed calendars — no new primary data since Sept 9. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is* ***AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) RE-RATES UP, modestly, to 34/33/44/54/60.*** *This cycle deliberately held its research window open past 8:30am ET for the print this pillar has been flagging for a week, and the August CPI print landed on schedule at 8:30am ET: BLS's own release (bls.gov, primary, fetched directly and re-fetched to confirm) has headline CPI-U* ***+0.4% m/m SA*** *in August after +0.1% in July and* ***+3.4% y/y NSA****, with core (all items less food and energy)* ***+0.3% m/m*** *after +0.2% in July and* ***+2.4% y/y****; energy rose 2.1% m/m and gasoline 3.9%, accounting for over a third of the monthly increase, while shelter rose 0.3%. Against the consensus circulating pre-print (headline +0.4% m/m / 3.4% y/y; core +0.4% m/m / 2.4% y/y), headline landed exactly in line and* ***core came in one tenth cooler on the month****, core y/y in line — a modest dovish surprise in the window that brackets the Sept 15-16 FOMC. It is tempered, not clean relief: headline accelerated from +0.1% to +0.4% and the acceleration is energy-driven — the same oil shock that fires the Iran pillar's "sustained Brent >$100" clause this cycle shows up here as headline inflation. Market-implied September hike odds circulating around the print (~70% for a 25bp move) are a market price, reported and not used to move P; the BLS*

release itself is the mover. Cross-source caution logged: several aggregator summaries of this print circulating within minutes carried figures inconsistent with the BLS release (e.g. a 3.1% core y/y) — discarded in favour of the primary document. Re-rated up on the windows bracketing the FOMC only: ***1mo 32→34, 3mo 31→33, 6mo 43→44****; 12mo and 36mo held flat at 54/60 — a single in-line-to-a-tenth-cooler print does not move the multi-year regime read.* ***AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." Sept 16, light daily catch-up (2026-09-16_draft):*** *the September FOMC decision, statement, SEP and dot plot were scheduled for 2:00pm ET that day and had NOT been released at run time (~08:03 ET) — nothing new was knowable that cycle.* ***HELD FLAT at 34/33/44/54/60, AUTO-STAMPED. THIS VERSION (September 17, score set 2026-09-17_draft) RE-RATES DOWN, modestly, to 32/31/42/54/60.*** *The Sept 16 FOMC delivered its decision: the federal funds target range raised 25bp to 3.75%-4.00% (12-0 vote), the first hike in three years (federalreserve.gov statement, primary; corroborated by CNBC, Reuters/Advisor Perspectives, Coinpedia, coingape, and others). The hike itself was ~92.5% priced into CME/market odds ahead of the meeting per multiple outlets, so under the house sufficiency rule its mere occurrence is not, by itself, treated as new information — a market-price-implied outcome materializing is not a fresh primary fact. What IS new and primary-sourced: the SEP/dot plot itself, a Fed institutional document rather than a market price, shows 16 of 18 participants expecting at least one more hike in 2026 (12 of 18 specifically pencil in one more 25bp move by year-end, to 4.125%), plus a slower, more cautious rate-descent path through 2027-2028 than previously projected, with the long-run neutral-rate dots clustering tightly at 3.0%. Bitcoin's actual reaction was muted — it ticked up toward $76,300 on the statement, then drifted back to hold near $76,000-198 through Chair Warsh's press conference (CNBC, Coinpedia) — consistent with the move being mostly anticipated. Sized as a modest step, concentrated on the windows that bracket the now-confirmed additional-hike path through year-end 2026 and into Q1 2027:* ***1mo 34→32, 3mo 33→31, 6mo 44→42****; 12mo and 36mo HELD FLAT at 54/60, since the SEP's own longer-run dots (slow descent into 2027-2028, neutral rate anchored near 3.0%) are broadly consistent with what this pillar already carried, not a new multi-year signal. Light daily touch, master call band unchanged everywhere (Neutral → Neutral equal-weight) —* ***AUTO-STAMPED per delegated daily authority: status committed, stamped_by "Alex (auto-stamped)." Sept 18 (score set 2026-09-18_draft, this version) HOLDS FLAT at 32/30/38/44/58.*** *The Sept 16 FOMC dot-plot revision already drives this window's read in the currently committed set; a Sept 18 Motley Fool piece discussing "the most important number" in the SEP is single-source commentary on already-priced primary data (the same Fed projections table this pillar already cited), not a new dated fact — does not clear the sufficiency bar. AUTO-STAMPED per delegated daily authority.* ***Sept 19 (score set 2026-09-19_draft) is a FULL WEEKLY refresh that HOLDS FLAT again at 32/30/38/44/58*** *— confirmatory jobless-claims and housing prints, left as DRAFT for Alex's manual review since weekly refreshes are categorically excluded from auto-stamp regardless of finding.* ***THIS VERSION (September 22, score set 2026-09-22_draft) is a LIGHT DAILY touch, targeted single-pillar follow-up, and RE-RATES DOWN one point on the three near windows to 31/29/37/44/58.*** *Two independent primary regional Federal Reserve surveys, both dated September 2026 — the Philadelphia Fed Manufacturing Business Outlook Survey (released Sept 17: prices paid 40.9→48.6, prices received 17.7→31.3) and the New York Fed Empire State Manufacturing Survey (released Sept 15, primary, fetched directly: prices paid 58.1→63.1, the highest since July 2022, prices received 23.1→28.1) — both show headline activity cooling but input-cost and selling-price pressure re-accelerating to multi-month/multi-year highs. Two independent Fed district banks' own surveys, same week, same directional signal, clears the sufficiency bar; kept to one point because both are soft surveys whose own forward components (employment, future activity) fell, and because market pricing turned risk-on into Sept 18-19. 12mo/36mo HELD — two regional sentiment surveys say nothing about the 2027-2028 policy path. CLARITY Act, Iran War Risk, and Tokenization all carried forward unchanged this cycle. Per the runbook's delegated auto-stamp authority this is an ordinary light daily-type touch and the sourcing clears the sufficiency rule — AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."*

Last TRUE committed P (2026-10-29_draft, LIGHT DAILY touch, COMMITTED, AUTO-STAMPED under Alex's delegated daily authority, October 29, 2026): 34 / 23 / 34 / 43 / 58 · **Current P (2026-10-31_draft, FUL**
25-31 cleared the sufficiency bar: the Oct 28 FOMC hold (10-2, Cook/Hammack dissent) confirmed rather than exceeded the already-priced consensus built on Fed Chair Warsh's Oct 16 remarks; no new Fed-official
specifically (December hike/cut odds movement dated Oct 29-31) was thin and often off-target — flagged for Alex as worth a manual spot-check, though not treated as a tool-wide research degradation since every c

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds the macro regime is *good for crypto* by then — not "the Fed cuts by then." Re-rated down this cycle to **31 / 23 / 34 / 43 / 58** from the committed 33 / 26 / 36 / 44 / 5
odds. 36mo held — one hot print does not reach the 2029 liquidity regime.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. Liquidity is the tide; it moves the whole market at once.

Carried forward, still load-bearing: July PCE (bea.gov, primary, released Aug 26) printed a modestly hot headline read, +0.2% m/m / 3.7% y/y (0.1pp above consensus), core +0.
than the three named dissenters; the 30-year Treasury yield's 19-year high was substantially a fiscal-deficit story, not a clean Fed signal; both already reflected in the committed

The Claim

The thesis, and where I differ from the consensus — updated October 15, 2026 (LIGHT DAILY touch, score set 2026-10-15_draft, AUTO-STAMPED)

This cycle (Oct 15): the crowd will likely read the hot September CPI print — headline accelerating to 3.7% y/y, core to 2.6% y/y, both above consensus — as confirmation the Fed's
28 hike odds (market-priced, Kalshi/Polymarket) roughly doubled off this print, from a pre-CPI ~17% to ~34% — still a hold favorite, which is why 1mo only takes −2, not a wholesale
specifically (not just the energy-driven headline) is what argues for 6mo also moving (−2) — energy-only prints fade, core re-acceleration doesn't. **P RE-RATED DOWN on four windo**

Prior cycle (Sept 22): the crowd will likely read the Philadelphia Fed and NY Fed Empire State surveys by their falling headline-activity numbers — both surveys' general-conditions
both surveys' prices-paid and prices-received sub-indexes jumped, not fell, with Empire State prices paid hitting the highest level since July 2022. That is a genuine, if soft, re-accel
direction clears this pillar's sufficiency bar. It doesn't clear it for much: both surveys' own forward-looking components (employment, future activity) fell in the same reports, and the
1mo/3mo/6mo down one point each; 12mo/36mo held, since two regional sentiment surveys don't speak to the multi-year policy path.

Prior cycle (Sept 17): the crowd will likely read the Sept 16 FOMC's 25bp hike to 3.75%-4.00% itself as the headline event. **Me:** that hike was ~92.5% priced into market odds before
showing 16 of 18 officials expecting at least one more 2026 hike (12 of 18 specifically pencil in a year-end move to 4.125%), and a slower projected descent through 2027-2028. Bitco
incrementally more hawkish than the odds-only tracking this pillar had been running on. **P RE-RATED DOWN, modestly, to 32/31/42/54/60** — 1mo 34→32, 3mo 33→31, 6mo 44→42

Prior cycle (Sept 12, FULL WEEKLY refresh): the crowd will likely read the hot 5.4% y/y August PPI headline (BLS, Sept 10) — the highest of 2026 — as confirmation the inflation pict
and the core reading the Fed actually steers on came in under consensus, a mild disinflationary surprise. That reinforces the already-priced cooler-than-consensus CPI read from las
the CPI print itself this cycle too, with no discrepancy. **P HELD FLAT at 34/33/44/54/60.** The Sept 15-16 FOMC meeting has not yet occurred and remains the next real catalyst. This

Prior cycle (Sept 12 light daily catch-up): the crowd would likely read the ~90% market-implied hike odds circulating that morning as new information demanding a further hawkish
was the market's own reaction to a CPI print this pillar already scored, not a new dated primary fact, so per the house sufficiency rule it did not independently move P. **P HELD FLAT a**

Prior cycle (Sept 11): the crowd will take a headline that jumped from +0.1% to +0.4% m/m and read it as inflation re-accelerating into a hawkish FOMC. **Me:** look at what moved it —
acceleration. The part the Fed actually steers on, core, came in at +0.3% m/m against a +0.4% consensus, with core y/y in line at 2.4%. That is a modest dovish surprise in the wind
1yr/3yr. It only partly offsets the Sept 5 cut; this is a nudge, not a regime change.

The crowd: might read Warsh's studied refusal to commit to forward guidance as him keeping his options open, and treat the hawkish framing as just rhetoric until an actual vote. Th

Me: now at 32/31/43/54/60, down from the 36/35/45/55/61 this pillar held through Aug 29-Sept 3. That Aug 29 cycle's dedicated adversarial-verification pass re-pulled the CME Fe
checks (Aug 31, Sept 1, Sept 2) found only continued/drifting odds, not a fresh primary print, so P held; a Sept 3 check found nothing material on any pillar. **Sept 5:** the August jobs re
FOMC hike odds higher off of it, corroborated by a same-day 2yr Treasury yield move to its highest since January 2025, a modest equity selloff, and BTC falling ~2% same-day ($81
bracketing the Sept 15-16 FOMC. **Sept 6 through Sept 10** (five further light daily checks) found no new Fed speech or primary data release, so P held flat at 32/31/43/54/60 through
corroborated across CNBC, Yahoo Finance, UPI, and The Washington Times, logged as context for the CPI print due the next morning but not itself used to move P (the sufficiency b
headline in line and core a tenth cooler than consensus — see This Cycle above — moving P up to 34/33/44/54/60. **Sept 12, light daily catch-up (morning):** no new Fed speech or p
(BLS, Sept 10) examined in full — hot 5.4% y/y headline, energy-driven, with core actually undershooting consensus — reinforces rather than contradicts the CPI read and does not r
categorically excluded from auto-stamp authority. The Sept 15-16 FOMC meeting has not yet occurred and remains the next dated catalyst.

My edge: the discipline is in re-pulling the actual rate-odds venue rather than trusting the first number that circulates — this cycle that discipline caught a real error before it was eve
The August CPI print — due today and still pending as of this research pass — and the Sept 15 FOMC itself remain the real tests — Warsh explicitly declined to pre-commit to a react

The Facts

As of October 15, 2026 (LIGHT DAILY touch, score set 2026-10-15_draft, COMMITTED, AUTO-STAMPED). Every figure below was independently re-derived from a primary source in this cycle's research pass un

★ NEW THIS CYCLE — OCTOBER 15, 2026

★ THE DECISIVE NEW FACT, and the reason P moves down this cycle — the September 2026 CPI print, Bureau of Labor Statistics, released October 14, 2026, 8:30am ET. PR
consensus). **Core (ex food/energy) +2.6% y/y** (up from 2.4% in August, vs. a 2.5% consensus), +0.3% m/m. Driver: energy, specifically gasoline, **+9.1% m/m and +34.2% y/y**. T
headline spikes alone tend to fade. This extends, not merely reiterates, the Oct 8 Waller hawkish shift already priced into the baseline this cycle re-rates from, and lands in a Fed t
in most of this pillar's history earlier in 2026.

MARKET PRICES, never blended with institutional estimates, labelled explicitly throughout. Kalshi/Polymarket-derived odds of an Oct 28 hike rose to roughly **34% (hold ~66%**
flagged as the high end of a noisy range rather than a settled figure. For December 9, hike odds are elevated further to roughly **75–85%** across sources (wide spread, consistent
that window at materially elevated odds, while Oct 28 (inside the 1mo window) is still a hold favorite even after roughly doubling.

Also confirmed, not used to move P: New York Fed President Williams has previously floated "one further upward adjustment…late this year" (already partially logged in prior cyc

Score decision: P RE-RATED DOWN, 33/26/36/44/58 → 31/23/34/43/58 (−2/−3/−2/−1/0). This is an ordinary LIGHT DAILY touch, not a full weekly refresh — the sourcing (prim
flip-line clause fired, and verification raised no unresolved inconsistency. **AUTO-STAMPED under Alex's delegated daily authority: status committed, stamped_by "Alex (auto-s**

★ CARRIED FORWARD — THE WEEK OF OCTOBER 3 – OCTOBER 10, 2026

★ A negative finding, stated plainly because it was deliberately checked for: there is NO government shutdown and no data disruption. BLS's own release calendar and the Fe
Law 119-103's funding (through Dec 11, 2026) is holding as expected, with no blackout of economic data. *The exact H.4.1 reserve-balances dollar figure for the week ended Oct 7*

invented here.

★ THE DECISIVE NEW FACT, and the reason P moves down this cycle — Fed Governor Christopher Waller, Istanbul Economic Forum (hosted by the Central Bank of the Repub Dailysabah, HousingWire, Newsquawk, Bloomberg Tax — every sub-claim below is CONFIRMED. (a) Further rate increases are the likely next step if incoming data keep behaving cited the Iran-conflict-linked energy shock and AI-buildout-driven demand as upside inflationary pressures — a genuine hawkish *shift* from his more dovish, wait-and-see posture consensus), describing the labor market as "solid and stable" despite the lower jobs number. (f) He said rate hikes don't need to come at consecutive FOMC meetings, leaving roo **dovish narrative behind the prior cycle's large upward move clears the sufficiency rule on its own** — it does not need a second corroborating primary source because it IS itself

★ PRIMARY — DOL initial jobless claims, week ended Oct 3, 2026, released Oct 8, 2026 (corroborated by multiple independent outlets via a Reuters-sourced wire): **197,000**, wi some tension with the weak +29,000 September payrolls print that drove the prior cycle's big dovish move — read here as a continuation of labor-market resilience on the claims

MARKET PRICES, never blended with institutional estimates, labelled explicitly throughout. CME FedWatch-style pricing for the Oct 27–28 meeting barely moved despite Walle hike shift yet. For the Dec 8–9 meeting, sources on hike-implied odds are noisy and not internally consistent across feeds (ranging roughly **62–84%** depending on source) but agr precise December-odds number is quoted as settled; it is described as "higher, though sources disagree on the exact figure" and labelled a market price throughout. This directio

The 10-year Treasury yield was roughly FLAT this week — approximately **5.23% on Oct 8** versus approximately 5.24% on Oct 1 (the prior cycle's reading) — after an initial Walle This supports only a small (−1) 6mo trim, since no new quarterly GDP/PCE data landed this week and the long end didn't move much. 12mo and 36mo HOLD FLAT — one week of

Explicitly EXCLUDED this cycle — verification found these too weak/unreliable to use. A single wire report's claim that Goldman Sachs might shift to forecasting two more hikes yield's move this week is reported in CONFLICTING directions by two low-quality aggregators and could not be resolved (FRED access was blocked this cycle) — no 2-year yield

Score decision: P RE-RATED DOWN, 35/29/37/44/58 → 33/26/36/44/58 (−2/−3/−1/0/0), a partial reversal of the prior cycle's large +8/+4/+3/+1/0 upward move. This is a FULL **manual review.** Research capability was NOT degraded this cycle: federalreserve.gov, dol.gov, and five-plus independent outlets were all reached directly in two independent pa

★ CARRIED FORWARD — THE WEEK OF SEPTEMBER 26 – OCTOBER 3, 2026

★ PRIMARY — August PCE undershot, BEA, released Sept 30, 2026. Every element re-confirmed exact against bea.gov: headline PCE price index **+0.3% m/m and 3.4% y/y**; **c** headline survey figure was about 3.7%. **Caveat stated rather than buried:** this release embeds the *annual update of the National Economic Accounts*, with revisions reaching ba

★ PRIMARY — the September jobs report, BLS, released Oct 2, 2026 at 8:30 a.m. ET, and it contradicts the Fed's own stated rationale. Nonfarm payrolls **+29,000** against an ~ **$37.81** and **+3.0% y/y**; participation 61.8%. Prior months revised down by a combined **60,000** — July flipped from +21,000 to **−10,000** (−31,000) and August from +162,000 to +1 this page.

★ PRIMARY — Vice Chair Philip N. Jefferson, "The U.S. Economy and Monetary Policy," Darden School of Business, University of Virginia, Oct 1, 2026. Quote re-verified verb in policy should be determined by carefully examining trends in the data, the evolving outlook, and the balance of risks." A sitting Vice Chair explicitly slowing the pace. **NOT USE** Fed rural-America panel to Boston's Collins when the Board calendar shows Governor **Lisa D. Cook** there on Sept 30. Both are corroboration at best and are excluded from the re-

★ THE HAWKISH COUNTERWEIGHTS, which are why this move is single-digit and stops at 12 months. (a) Governor Michael S. Barr, "Economic Conditions and Monetary Pol *comes down to target in a timely fashion."* and *"Risks to achieving our inflation target have increased, while risks to the labor market have receded, so we need to recalibrate pol short-term policy interest rates to support achieving our dual mandate of maximum employment and stable prices." Correction to an earlier pass of this cycle, which truncated th* **jobs report — so his remarks are not a response to either.** The September FOMC statement confirms the hike: "The Committee decided to raise the target range for the federal fu **estimate, BEA, Sept 30:** real GDP revised **UP to 2.2%** annualized from 1.5% (+0.7pp), real GDI +2.6% (+0.4pp), the GDP/GDI average +2.4% (+0.6pp). Growth is accelerating, not 198,000; 4-week average 200,000, −2,500 (prior average revised 202,250 → 202,500). **(d) The long end went the wrong way:** FRED DGS10 5.17% (Sept 25) → 5.24% → 5.26% → CFD feed and is not quoted. Meanwhile DGS2 *fell*: 4.81% (Sept 25) → 4.92% (Sept 28) → 4.89% (Sept 29) → 4.88% (Sept 30) → **4.78% (Oct 1)**. **A falling 2-year against a rising 1**

CORRECTED this cycle, and it kills a claim this system has been repeating: jobless claims are NOT at or near a 57-year low. The "near 57-year lows" / "lowest since 1969" fram **FRED ICSA refutes it outright**: 197,000 is not even 2026's lowest print, with **189,000** (week of Jul 18) and **190,000** (Apr 25) both lower, besides 190,000 and 195,000 in Sept 2022 not rising, so +29,000 payrolls is a *hiring freeze*, not a firing wave — and a hiring freeze at these claims levels does not force the Fed's hand.

MARKET PRICES, never blended with the SEP. CME FedWatch October-hike odds collapsed to roughly **17–23%** (hold ~77–81%) as of Oct 2, from about 36% a week earlier. For D **verification found unsupported**; CME's own page and the CNBC article both returned HTTP 403, so this rests on conflicting secondary citations of a market price and is labelled

H.4.1, week ended Sept 30 (PRIMARY, released Oct 1, re-confirmed exact): reserve balances **$2,948,090M** from $2,930,193M, **+$17,897M w/w** — last cycle's record −$83,601M

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ PRIMARY — Fed Governor Michael S. Barr, "A Long-Term View on the Costs of Shelter," Sept 23, 2026, 10:05 a.m. EDT, at the Chicago Fed's Housing Affordability 2026 sum continuous paragraph on p.2: "Economic growth is strong and the labor market is solid, but inflation is above our 2 percent target and not clearly trending toward target in a timely balance of risks to our mandate goals. … **In my base case, further policy adjustments are likely to be needed to ensure inflation comes down to target in a timely fashion.**" He a sentence as absent and the start time as 10:20 a.m.; both "corrections" were WRONG and are withdrawn. The sentence is present, and the Board's own September calendar lists

★ PRIMARY — S&P Global flash US PMI, Sept 23, 2026. The embargoed release ("Embargoed until 0945 EDT … 23 September 2026") was retrieved directly. Composite output **5** places **input-cost inflation at its fastest since OCTOBER 2022**, attributing it to higher fuel and transport costs — and reports selling-price inflation rising too, reversing August's r is vendor/subscriber data, so it is excluded; the October-2022 characterisation, which is what actually carries the pillar, is primary.

★ PRIMARY — University of Michigan Surveys of Consumers, FINAL September, released Sept 25, 2026. Sentiment **48.1**, down 7.0% month-on-month from 51.7; current condi "**Long-run inflation expectations ticked up to 3.4%, ending three consecutive months at 3.3%.**" The long-run break is the single most consequential figure in this pillar's cycle, −1.

★ PRIMARY — DOL initial jobless claims, week ended Sept 19, 2026: advance figure **197,000** (the "near 57-year lows" characterisation carried here was later found FALSE and i this report had been carrying. A near-record-low layoff rate removes the last dovish counterweight to a further hike — and is, honestly, also a risk-on positive in its own right.

★ PRIMARY — Federal Reserve H.4.1, week ended Sept 23, 2026. Reserve balances **$2,930,193M against $3,013,794M** the prior week — a fall of exactly **$83,601M in one wee** one-week reserve drain this report has logged (prior logged weeks: −$10.4B, −$49.3B) and is a direct liquidity negative for crypto. **Honest qualifier:** it is substantially a mechanic

Two Fed voices, both DOWNGRADED on sourcing after verification — used as corroboration only, neither able to move P alone. *Boston Fed President Susan Collins, Sept 22:* t unfetchable, bostonfed.org does not carry it, and every corroborating outlet traces to the same Reuters story, so it is **effectively single-agency** and labelled as such. It had never **recharacterised, because an earlier pass misattributed it.** Williams was describing INVESTORS' forecasts, saying market pricing suggested "it's likely that another rate hike may Presenting that as his own flat assertion would be exactly the market-expectation-versus-official-estimate conflation this system forbids. No primary transcript exists (it was an u

Also logged this cycle, not scoreable. The Fed's own *Senior Credit Officer Opinion Survey* (Sept 24, primary) reports dealer pricing and non-pricing terms "remained basically un August (Sept 24) came in at **684,000 SAAR, an increase**, attributed to price reductions — which **contradicts this report's earlier "cooling rate-sensitive sectors" framing, and t** unchanged at $338.6B. No Fed speeches were delivered Sept 24, 25 or 26; the Board calendar shows the next on Sept 28.

MARKET PRICES — reported, and never blended with the SEP's institutional estimates. The 10-year Treasury yield rose **4.96% (Sept 22) → 5.11% (Sept 23) → 5.18% (Sept 24),** That *resolves* the honest caveat carried in the abandoned Sept 24 draft (FRED had not yet published Sept 23 at its research time) and *supersedes* its press-sourced "5.104%" intra moved ~53% (Sept 23) → **77.5% (Sept 24)** → ~70–76% (Sept 25), sources differing by timestamp; traders price roughly **four more hikes by the June 2027 meeting**, which contra reported that FRED's plain-text DGS10 endpoint returns September 2026 values ~125bp too low. Verification could not reproduce it — that file truncates long before 2026, so the finding. The 5.11/5.18 values are unaffected.

RE-CONFIRMED FROM PRIMARY — the Sept 16 FOMC and its dot plot. The statement reads "The Committee decided to raise the target range for the federal funds rate by 1/4 pe **3.875%, 12 at 4.125%, 4 at 4.375%**; medians 4.1% (2026), 4.1% (2027), 3.9% (2028), 3.2% longer-run. So this report's standing line — 16 of 18 officials seeing at least one more

THE TEST HAS LANDED, AND IT CAME BACK TWO-SIDED. August PCE and the Q2 GDP third estimate released **Sept 30** (BEA, primary). Core PCE printed 3.0% y/y, but roughly growth beat. The two roughly offset, so this pillar's own flip line resolves without confirming or reversing the Sept 23-26 cut — held flat on the Oct 1 daily touch.

★ ★ **NEW this cycle — Philadelphia Fed Manufacturing Business Outlook Survey, released Sept 17, 2026 (primary source page confirmed at philadelphiafed.org; that month's MarketScreener, NAM, investinglive, Kitco, Bitget, Academic Capital):** general activity fell to 37.8 from 47.4, but **prices paid rose to 48.6 from 40.9** (50.5% of respondents repo future activity fell (52.9 from 73.6), a real counterweight toward cooling.

★ ★ **NEW this cycle — New York Fed Empire State Manufacturing Survey, released Sept 15, 2026 (PRIMARY, fetched directly from newyorkfed.org):** general business condition

- **Why this clears the sufficiency bar:** two independent Federal Reserve district banks' own primary surveys, dated the same week, showing the same directional signal (headline single-source claim.
- **Why only one point:** both are soft/sentiment surveys, not hard CPI/PCE prints; both releases' own headline-activity and forward-looking components (employment, future activity 5.04% high to ~4.95%, BTC recovered) — a market price, not scored, but the honest reason not to take this further.
- **12mo/36mo HELD** — two regional sentiment surveys say nothing about the 2027-2028 policy path those windows price.
- **Score decision: P RE-RATED DOWN one point on the three near windows, 32/30/38/44/58 → 31/29/37/44/58.** Research capability fully available this cycle (WebSearch clean; **status committed, stamped_by "Alex (auto-stamped)."**

Carried forward from the September 19 FULL WEEKLY refresh (score set 2026-09-19_draft, still draft, awaiting Alex's review), still load-bearing:

★ ★ **NEW this cycle — initial jobless claims, week ended Sept 12 (DOL, primary, released Sept 17): 196,000**, the lowest since mid-July; four-week average 203,250; continuing cl trigger-worthy on its own.

★ ★ **NEW this cycle — new-residential-construction data (Census Bureau/HUD, primary, released Sept 17): housing starts 1,275K SAAR (−2.6% m/m), permits 1.394M (−2.7%** single-month and internally mixed (single-family starts actually +7.6%) — insufficient alone to move P per the sufficiency rule; flagged for next cycle if the cooling repeats.

- ★ **NEW this cycle, background color — University of Michigan preliminary September consumer sentiment (released ~Sept 11-12, primary/academic survey): fell to 47.8 fron** though it doesn't move P now — it is already implicitly reflected in the mood behind the Sept 16-17 hawkish re-rate.
- **Treasury yields backed up further into and through FOMC week:** the 10-year touched ~5.04% intraweek, a 19-year high, before settling near 4.94-4.95% by Sept 18 as oil price
- **CME FedWatch (market price, not scored):** the October 27-28 FOMC meeting priced a **55.1% probability of another 25bp hike** as of Sept 17, 2026 — compare pre-Sept-16-mee by the June 2027 meeting at roughly 51%.
- **A high-profile political story broke in parallel: President Trump and senior administration officials (the Vice President, the Treasury Secretary, and an economic counselor) p** corroborated across 8+ independent outlets (CNBC, CNN, NBC News, MS NOW, BNN Bloomberg, Fortune, The Hill, Bloomberg). A governance/Fed-independence storyline, not
- **Bank-forecaster reactions, logged not scored:** Goldman Sachs's post-meeting note expects an October hike with no December hike in its base case; an earlier BofA call for thre elsewhere. Single-house forecasts reacting to the already-priced SEP, not new primary facts.
- **Fed Vice Chair Bowman's Sept 18 speech in London (Mansion House, federalreserve.gov, primary)** covered bank stress-testing rule finalization — not a monetary-policy or rat
- **Score decision: P HELD FLAT at 32/30/38/44/58.** Full independent primary-source research this cycle (~15 targeted WebSearches, no capability degradation); nothing above cl **Alex's manual review.**

Carried forward from the September 17 light daily touch (score sets 2026-09-17_draft / draft2, merge set, committed, auto-stamped), still load-bearing:

As of September 17, 2026 (LIGHT DAILY touch, score set 2026-09-17_draft) — hard numbers only, sources on the last page. New this cycle: the Sept 16 FOMC decision and its SEP/dot plot; the Sept 12 weekly-re

★ ★ **NEW this cycle — Sept 16 FOMC decision (federalreserve.gov, primary; corroborated by CNBC, Reuters/Advisor Perspectives, Coinpedia, coingape — 5+ independent ou** beforehand — a market price, not used to move P on its own.

★ ★ **NEW this cycle — the Summary of Economic Projections / dot plot (federalreserve.gov, primary).** 16 of 18 participants project at least one more 2026 rate increase; 12 of 18 projected, with the long-run neutral-rate dots clustering tightly at 3.0%. This is a primary Fed institutional document, not a market price, and clears the sufficiency bar on its own.

- **Bitcoin's reaction was muted:** ticked up toward $76,300 on the statement, then drifted back to hold near $76,000-198 through Chair Warsh's press conference (CNBC, Coinpedi
- **Score decision: P RE-RATED DOWN, modestly, to 32/31/42/54/60** — 1mo 34→32, 3mo 33→31, 6mo 44→42; 12mo/36mo HELD FLAT at 54/60. Light daily touch, master call bar

★ **Carried forward — August PPI (BLS, primary, released Sept 10, 2026; corroborated by CNBC, CNN, Yahoo Finance — 3+ independent outlets).** Headline final demand **+0.4%** (diesel fuel +24.1% alone). Core PPI (ex food/energy) came in at **+0.3% m/m**, UNDER consensus on one reading (+0.2% m/m on a further core-ex-trade-services cut) — a mild d

- **Score-relevant read on the PPI print:** reinforces, rather than contradicts, the already-priced "cooler than consensus" August CPI narrative — **not a distinct new directional catal**
- **Re-verified August CPI (BLS, released Sept 11) independently this cycle:** headline +0.4% m/m / +3.4% y/y, core +0.3% m/m / +2.4% y/y, shelter +0.3% m/m / +3.0% y/y — mat
- **DOL initial jobless claims, week ending Sept 5 (released ~Sept 11, primary): 206,000, down 1,000 w/w, 4-week average 206,000** — steady, unremarkable, no signal.
- **CME FedWatch-tracked market-implied odds of a 25bp hike at the Sept 15-16 FOMC read ~62-69% this week (as of Sept 10-11)** — a *market price* only, not an institutional esti are reported as market-price snapshots at different times; the divergence is noted, not resolved or editorialized on.
- **Fed Chair Warsh: no new substantive remarks since the Aug 28 Jackson Hole speech.** A Sept 9 Marketplace piece characterizing him as withholding forward guidance ahead
- **The Sept 15-16, 2026 FOMC meeting had NOT yet occurred** as of the Sept 12 research pass — it has since occurred and fired; see the NEW facts above.
- **Historical score decision (Sept 12 cycle, superseded):** P HELD FLAT at 34/33/44/54/60 — FULL WEEKLY REFRESH, left as DRAFT for Alex's manual review at the time (weekly r cycle's re-rate above.

Carried forward from the Sept 12 light daily catch-up (score set 2026-09-12_draft, auto-stamped that morning), still load-bearing:

- **Re-checked — no new Fed speech or primary data release found since the Sept 11 CPI print.** Coverage of ~90% market-implied hike odds circulating that morning traced to Fe
- ★ **CARRIED FORWARD — August CPI (BLS, primary, released 8:30am ET September 11, 2026):** headline CPI-U **+0.4% m/m seasonally adjusted** after +0.1% in July, **+3.4% y/y NS** Fetched directly from bls.gov and re-fetched to confirm.
- **CARRIED FORWARD — versus consensus:** pre-print expectations circulating were headline +0.4% m/m / 3.4% y/y and core +0.4% m/m / 2.4% y/y. **Headline landed exactly in l**
- **Market-implied September hike odds around the print read ~70% for a 25bp move** — a *market price*, not an institutional estimate, reported for context and explicitly not used to
- **Data-hygiene note, logged:** several aggregator summaries of this print published within minutes carried figures inconsistent with the BLS release (for example a 3.1% core y/y).

Carried forward from the September 5 FULL WEEKLY refresh (score set 2026-09-05_draft2), still load-bearing:

★ ★ **NEW — August jobs report (BLS, primary, released Sept 4): nonfarm payrolls +162,000 vs. ~53-55,000 consensus; unemployment steady at 4.1%.** A sharp upside beat, c

★ ★ **NEW — markets repriced September 15-16 FOMC hike odds higher off the jobs beat.** Point estimates vary by source/timestamp (roughly 60-66% hike probability cited acros baseline used — i.e. the market moved further toward pricing a hike, not away from it. Fed officials remain split: Chair Warsh reiterated the need to keep fighting inflation; Governo likely deciding data point before Sept 15-16.

★ ★ **NEW — same-day market reaction, Sept 4 (multi-source corroborated): 2-year Treasury yield +5.3bp to its highest level since January 2025;** Dow −271.86 pts (−0.51%) to

- **BTC fell ~2% same-day: $81,265.00 (Sept 3 close) → $79,676.60 (Sept 4 close)** (data/btc_usd_daily.csv) — consistent with a hawkish-surprise risk-off reaction; BTC $79,646.1
- **Score decision:** this is a fresh, dated, primary-sourced print (not odds drift alone), sized comparably to the Aug 22→28 catch-up cut for a comparable single dated catalyst — P

Carried forward from the Sept 3 light daily catch-up (no new score set — nothing material found on any pillar that cycle):

- **Re-checked CME FedWatch and the H.4.1/data calendar; found no fresh primary print or news event dated Sept 2-3.** config/scores.json untouched; run.py blend re-run agains

Carried forward from the Sept 2 light daily catch-up (score set 2026-09-02_draft, still load-bearing):

- **No new H.4.1 or data print found dated Sept 1-2.** September 15-16 FOMC market pricing (CME FedWatch roughly 60% hold) continued the same post-Jackson-Hole drift already independently move P.
- **BTC traded at $76,581.44 on Sept 2** — down from $78,038.78 on Sept 1 (Bitstamp) — a real pullback, but driven by the Iran War Risk escalation covered in that pillar's report, not

Carried forward from the Sept 1 light daily catch-up (score set 2026-09-01_draft, still load-bearing):

- **CME FedWatch September hike odds read ~66% around 11:40am ET Aug 31** (Forbes/KuCoin), up from the ~60.4% CNBC read already priced into the Aug 31 baseline — the sa
- **No new H.4.1 or jobless claims release Aug 31-Sept 1** — Aug 31 was Labor Day, a US federal holiday; next H.4.1 is due Sept 3.
- **BTC traded at $78,038.78 on Sept 1** — down from $78,447.16 on Aug 31 (Bitstamp).

Carried forward from the Aug 31 light daily catch-up (score set 2026-08-31_draft, still load-bearing):

- **CME FedWatch September hike odds drifted to ~60.4% by Aug 31** (CNBC Jackson-Hole-analyst-roundup, up from ~56% Friday, Aug 28), continuing the same repricing already

Carried forward from the Aug 29 full weekly refresh (still load-bearing):

- ★ **★ ADVERSARIAL CORRECTION — the abandoned Aug 28 draft's CME FedWatch September hike-odds figure (~35.4%→~45.7%) UNDERSTATED the real market move.** A de (Aug 28), the credible cluster is roughly 56-58% — Motley Fool quotes CME FedWatch directly at 57.5%; CNBC's own body text says "nearly 56%" (its "coin flip" headline rounds figures that circulated appear to be a stale or mismatched snapshot, contradicted by this tighter high-50s cluster; figures of 59-60% seen elsewhere are within plausible range o bigger move than first drafted.
- ★ **★ CORRECTED this cycle — BTC's price action around the speech was NOT a stable tape.** The abandoned Aug 28 draft's framing ("stable tape... not one BTC visibly flinched") continued falling to **$77,666.16 by today, Aug 29** (Bitstamp), a roughly 4%+ round-trip decline from the day's high through today. BTC did react to the speech, with continued do
- ★ **★ NEW this cycle — initial jobless claims, week ended Aug 22 (DOL, primary, released Aug 27): 203,000 vs. 208,000 consensus,** down from the prior week's revised 207,000 own.
- ★ **★ NEW this cycle — Fed H.4.1, week ended Aug 26 (federalreserve.gov, primary): reserve balances $2,924,936M (−$10,351M w/w); Treasury General Account $950,736M**
- **No new CPI/PPI release in this window** — next releases Sept 10-11, unchanged from the prior baseline. No public pushback found from any other Fed official on Warsh's hawkish
- **Score decision:** the corrected, larger CME move justifies a deeper cut than the abandoned Aug 28 draft's 38/37/46/55/61 — P re-rated down to 36/35/45/55/61, concentrated or

Carried forward from the abandoned Aug 28 draft (written but never rendered, selfchecked, archived, or committed — superseded by this cycle; findings re-confirmed and incorporated, not re-litigated):

- ★ **Fed Chair Kevin Warsh's first Jackson Hole speech as Chair, Aug 28, 10:00am ET (federalreserve.gov, primary transcript, confirmed verbatim this cycle via direct fetch; cor** "Financial Innovation: Implications for Payments and Policy." Exact quote, verified against the transcript: "And while this summer's PCE and CPI readings were better than expecte work to do," and "I stand here today committed to a discipline, not to a decision." **Note on framing:** the transcript does not contain the literal words "may need to raise rates" — th Warsh quote; flagged as paraphrase here. This was his 100th day as Chairman (confirmed May 22, 2026 succession).
- ★ **July PCE (bea.gov, primary, released Aug 26): headline +0.2% m/m, 3.7% y/y (0.1pp hot vs. consensus); core +0.2% m/m, 3.3% y/y (in line).** Consumer spending +0.2% m/m trends.
- **2-year Treasury yield rose to a roughly one-month high: confirmed +6.6bp to 4.29% intraday-close** (one source cites a peak of +9bp to 4.32%); the 30-year yield eased abou
- **BTC closed at $79,613.44 on Aug 28 (Bitstamp)** — this price point is now superseded by today's $77,666.16 close (Aug 29); see the corrected price-action fact above.

Carried forward from the Aug 22 draft2 full weekly refresh (still load-bearing):

- ★ **The Jul 28-29 FOMC minutes' hawkish bloc runs wider than previously known (federalreserve.gov, primary, published Aug 19; corroborated by CNBC, Quartz, Newsquawk,** and "many participants assessed that policy tightening would likely be necessary if inflation did not decline." Inflation cited: PCE 4.1% (May actual), core 3.4%; the June staff esti
- ★ **★ NEW this cycle — the 30-year Treasury yield hit 5.31-5.33%, a ~19-year high (highest since 2007), around Aug 17-18** (Bloomberg, CNBC, Axios). Driven substantially by fis repricing story, though it compounds optically with the hawkish minutes.
- ★ **★ NEW this cycle — equities sold off Aug 20:** S&P 500 −0.87% to 7,641.16; Dow −703.84 pts (−1.32%) to 52,759.21 (partly a ~9% Walmart-earnings-driven drop, not purely Fed-
- ★ **★ NEW this cycle — CME FedWatch (September meeting) independently re-verified directly, cross-venue:** ~68-70% hold probability across multiple contemporaneous reads essentially UNCHANGED before and after the Aug 19 minutes landed, meaning the market already had the hawkish content priced in.
- ★ **★ DISCARDED — a separately-circulating claim of "93.6% September hike probability" was traced this cycle to a garbled data conflation.** It appears to be Kalshi's JULY mee
- **Jobless claims week ended Aug 15 (DOL, primary, released Aug 20): 206K, down 6K, vs. 210K consensus; 4-week average 204K.** Confirms the low-layoff, tight-labor trend al
- **Aug 22 score decision (superseded by this cycle):** the hawkish minutes detail and the noisy weak retail-sales print largely offset an already-priced rate-odds market — netted to
- **BTC closed at $77,266.84 on Aug 22 (Bitstamp)** — vs. $79,613.44 on Aug 28 and $77,666.16 on Aug 29 (see this cycle's facts above).

Carried forward from the Aug 22 draft1 catch-up cycle (independently re-confirmed, still load-bearing):

- **No new Fed H.4.1 release since the week ended Aug 19 (federalreserve.gov, primary, published Aug 20):** that remains the current release; the next H.4.1 is due Aug 27. No new baseline.
- **No new public remarks from Chair Warsh between the Jul 29 FOMC press conference and the Aug 28 Jackson Hole speech (see this cycle's facts above).**

Carried forward from Aug 20 (re-confirmed this cycle, still load-bearing):

- **FOMC minutes from the Jul 28-29 meeting confirm the known 9-3 hold vote and the Hammack/Kashkari/Logan dissent for an immediate 25bp hike.** Inflation risks characteriz task-force report will inform future deliberations, but no near-term QT-pace signal was given.
- **Offsetting signal, re-confirmed and expanded this cycle: CME FedWatch showed the odds of a September 16 hold rising to ~65% post-minutes, up from a pre-minutes ~50/5** no further material move off that level, i.e. the market stayed priced for a hold through the minutes' release.

Carried forward from Aug 16 (still load-bearing):

- **July retail sales (Census Bureau, published Aug 14, primary release): headline −0.6% m/m vs. +0.1% expected, core (ex-auto) −0.2% m/m, still +5.0% y/y.** The first monthly pulled into June). A genuine but noisy dovish-leaning counter-signal — per this pillar's own house discipline against chasing single prints, this alone doesn't move P.
- **Recalled for continuity, not re-scored:** the Aug 17 Empire State Manufacturing Survey surged to 20.6 vs. 11.0 consensus, the highest since 2022 — a hot beat cutting against the into a move.

Carried forward from Aug 13-14 (still load-bearing):

- **Fed H.4.1, week ended Aug 12 (federalreserve.gov, published 4:30pm ET Aug 13): reserve balances $2,944,059M, down $49,290M w/w; Treasury General Account $963,95** fire a fresh trigger.

Carried forward from Aug 12-13 (still load-bearing):

- **July CPI (BLS, published Aug 12): headline +0.1% m/m / +3.4% y/y; core +0.2% m/m / +2.5% y/y** — landed cool, exactly in line with consensus, drove the Aug 13 re-rate up.
- **Initial jobless claims, week ended Aug 8 (DOL/ETA, published Aug 13): 209,000 actual vs. 202,000 expected** — a genuine weak-side miss, 8-week high, the second trigger be

Carried forward from Aug 8-10 (still load-bearing):

- **Initial jobless claims for the week ended Aug 6 (published Aug 8): 262,000 actual vs. 263,000 expected** — essentially in line with consensus, noise rather than a surprise.

Carried forward from Aug 8-9 (still load-bearing):

- ★ **BLS Employment Situation, July 2026: nonfarm payrolls FELL 23,000** versus a consensus estimate of ~83,000 (WSJ-sourced; a competing 95,000 Barron's-sourced figure is l the figure is confirmed via convergent CNBC, Yahoo Finance, Kiplinger, and CBS News reporting, all citing the same BLS release — meets the 2+ independent sufficiency bar.
- **May and June payrolls revised down a combined 103,000** — confirmed, matches the light draft exactly. (One Forbes-sourced fetch this cycle produced a garbled "-252,000 tot
- **Unemployment ticked down to 4.1% from 4.2%,** but the labor-force participation rate fell to 61.4% — its lowest level in over five years.
- ★ ★ **NEW this cycle — average hourly earnings rose just 3.2% y/y,** down from 3.4% in June and now trailing CPI (3.5% June y/y) — real wages softening, a detail the same-day li
- ★ ★ **CORRECTED — CME FedWatch September-hold odds check out at ~56%,** not the light draft's ~60%. Two independent corroborating sources (CBS News, a Forbes-sourced prediction market, not CME futures-implied pricing — a different instrument, labeled separately per research discipline) shows 65% hold.
- ★ ★ **NEW this cycle — real forecaster disagreement on magnitude:** Bank of America explicitly called the report "a bit dovish on net" but is **sticking with its call for 75bp of hikes i** Morgan Stanley's Ellen Zentner says the **Aug 12 CPI print** — inside this pillar's own 1-month window — will be the deciding factor for September, not this jobs report alone.
- ★ **Jobless claims for the week ended Aug 1: 199,000, 4-week average 198,750** — the lowest of this cycle, in real tension with the weak payrolls print. Points to "low-hire, low-fire"

Carried forward from Aug 7 (still load-bearing):

- ★ **Fed H.4.1 for the week ended Aug 5 (federalreserve.gov, direct pull):** total assets $6,748,567M, reserve balances $2,993,349M — reserves +$8.78B w/w, TGA -$3.45B w/w. An

Carried forward from Jul 30-Aug 5 (still load-bearing):

- ★ ★ **CONFIRMED, PRIMARY SOURCE — the FOMC held rates at 3.50-3.75% on Jul 29, 2026, on a 9-3 vote.** Three regional-bank presidents — Beth Hammack (Cleveland), Neel K TechTimes). This is the **first unified 3-member dissent since September 2016**. No SEP/dot plot this meeting (not a projections meeting; next SEP is Sept 15-16, 2026).
- ★ **Chair Warsh's press conference was unusually combative and offered no forward guidance:** "there is no soft inflation target... not on this committee's watch"; "the five-plus ye (full day: S&P −1.52%, Dow −2.19%, Nasdaq −1.74%); the 30-year Treasury yield rose to 5.21%, its highest since July 2007 — a "bear steepener" consistent with rising inflation-c
- ★ ★ **CONFIRMED, PRIMARY SOURCE — jobless claims for the week ended Jul 25 came in at 197,000** (DOL/ETA release, fetched and read directly), a genuine +9,000 increase; th cycle: actual non-seasonally-adjusted claims fell only 9.2% w/w versus the 13.3% seasonal factors expected — meaning the "lowest since 1969" framing was real but mechanica
- ★ **The September hike-odds figure could not be reconciled to a single number this cycle, despite four direct attempts.** Live pulls produced 55.8% (Fox Business, Jul 28), 62.4% elevated, majority-hike-priced" — is the only defensible takeaway; no re-rate rests on a specific point figure.
- **H.4.1 balance sheet: no new release found for the week ended Jul 29** as of this check (normal Thursday-afternoon publication timing); the most recent confirmed release remai
- **Bank of America projects three 25bp hikes in 2026** (to 4.25-4.50%) — single-source (Forbes, citing BofA), flagged not scored.
- **Carried forward, not re-verified this cycle:** June CPI (-0.4% m/m) and PPI (-0.3% m/m), both BLS-primary-confirmed in a prior cycle; Warsh's Jul 14/15 congressional testimony alongside, not against, the still-intact disinflation trend.
- **The labor market cracked in slow motion, then partially un-cracked this week** — June payrolls +57K vs ~115K consensus (carried forward); this cycle's 197K claims print, while
- **Policy rate and balance sheet: 3.50-3.75%, next FOMC (with SEP/dot plot) is Sept 15-16, 2026.** Fed communications blackout ended with the Jul 29 meeting; watch for the first
- **BTC closed at $64,706.50 (Jul 30)** — holding up despite the hawkish FOMC surprise and confirmed equity/bond-market risk-off reaction. **Updated: BTC closed at $64,661.55 o**

The Prize

Illustrative only — not price targets, not advice

The canonical anchor: **2020-21 ZIRP + QE** ran BTC ~$3,800 → $69,044 (~15–18×) — a unique COVID/zero-rate/open-ended-QE setup, not a repeatable base case. The **2024-25** Sept 18, a real gain that arrived without any Fed-specific catalyst this week (the Sept 16 FOMC hike and hawkish SEP are already priced into this pillar's current committed score;

Discount it hard, twice. First: easing is not an automatic catalyst — the last cycle topped on a non-Fed shock. Second: the Sept 16 hike and its hawkish SEP already reflect a real r submit his own dot or commit to a reaction function, and the Oct 27-28 FOMC is the real next test. A major forecaster (BofA) has been calling for 75bp of 2026 hikes since early A turns.

The Other Side

The strongest honest case my re-rate — even the moderated one — is still wrong

- **This re-rate might not be conservative enough a read on BofA's stance.** Bank of America has been calling for 75bp of 2026 hikes since early August, straight through the cool C generous.
- **Warsh explicitly avoided committing to a reaction function — this report may be over-reading a rhetorical signal into a real repricing.** The CME odds move is real, quantified, a rather than pre-committing to a September hike, this cycle's move could unwind as fast as it appeared.
- **The adversarial-verification pass caught one error in the abandoned draft's CME figure — it may not have caught all of them.** This cycle corrected 45.7% to the high-50s clus by this report; a subsequent, cleaner pull could still move the number again.
- **I may still be over-reacting to one speech and one data print.** This pillar has already seen a claims number ("lowest since 1969") partially reverse the following week on a seasor move that partially unwinds once the actual September data (another CPI, another jobs report) lands.
- **The FOMC's own hawkish dissent hasn't gone away and now looks more, not less, mainstream.** Three regional presidents voted for an immediate hike on Jul 29, and Warsh's A
- **Downward revisions can themselves get revised.** The BLS's own benchmark process regularly adjusts prior months; May-June's combined 103,000 downward payroll revision i
- **Weak labor data plus a still-elevated inflation/oil backdrop (Iran-driven, and this cycle's Iran pillar got worse, not better) is stagflation risk, not straightforwardly bullish.** If th

The Triggers

Dated events — some prove the claim right, some prove it wrong. ***Checked Oct 30 and again Oct 31, 2026 — no change; October jobs (~Nov 6) and October CPI (~Nov 10) are still not due, and no new Fed-off consensus, growth beat — logged, no re-rate. Checked Oct 29, 2026 (LIGHT DAILY touch) — FOMC Oct 28 decision: HELD at 3.75-4.00%, 10-2 (Cook/Hammack dissent) — CONFIRMS baseline, no re-rate.*** *new BLS/BEA/Census primary data found, consistent with the Oct 17-29 FOMC blackout.* ***Re-set September 26, 2026 (FULL WEEKLY refresh).*** *The flip line below is now HALF-MET: three Fed communications (* ***are the test****, four days out. Historical re-set notes follow: originally re-set August 29, 2026, full weekly refresh.*

DATE	EVENT
LANDED Oct 29, 8:30am ET — PRIMARY (bea.gov), in line on inflation, beat on growth	**September PCE:** headline +0.5% m/m / 3.6% y/y; core +0.3% m/m / 3.1% y/y — both exactly at the pre-release consensus. **Q3 GDP advance:** +3.4% a +2.2%); Q3 core PCE +2.5% annualized.
FIRED Oct 16 — DOVISH, PRIMARY — this cycle's decisive fact	**Fed Chair Kevin Warsh, speaking alongside IMF MD Georgieva at an IMF event in Bangkok:** declined to preview the Fed's remaining 2026 decisions, e Corroborated by 7+ independent outlets (CNBC, Benzinga, Yahoo Finance, Zerohedge, Seoul Economic Daily, two independent finance-substacks). MA labelled distinctly): Oct 28 hike odds collapsed from ~33–47% to ~13–15% (CME FedWatch) / ~14% (Polymarket); Dec 9 odds (~74–79%) unchanged w
FIRED Oct 14, 8:30am ET — HAWKISH, PRIMARY — this cycle's decisive fact, extending the Oct 8 row below	**September 2026 CPI (BLS):** headline +3.7% y/y (vs. 3.6% consensus, up from 3.4%), core +2.6% y/y (vs. 2.5% consensus, up from 2.4%), +0.6% m/m energy/gasoline +9.1% m/m. Corroborated via CNBC, Advisor Perspectives, Kiplinger, USInflationCalculator. MARKET PRICES (Kalshi/Polymarket, labell (hold ~66%) from a pre-CPI ~17%; Dec 9 hike odds elevated further to ~75–85% (noisy, no single figure settled)
FIRED Oct 8 — HAWKISH, PRIMARY, adversarially verified — the decisive fact this print extends	**Fed Governor Christopher Waller, Istanbul Economic Forum:** further rate increases are the likely next step if data keep behaving as expected; inflation economy strengthened in H2 2026; explicitly cited Iran-linked energy costs and AI-buildout demand as upside inflation risks — a genuine hawkish *shift* explicitly DOWNPLAYED the weak September payrolls print (+29,000) as still "solid and stable," and said hikes needn't come at consecutive meetings, f as the next hike candidate. Verified across 5+ independent outlets (FXStreet, Dailysabah, HousingWire, Newsquawk, Bloomberg Tax)
Checked Oct 8 — PRIMARY, DOL, partially offsetting context, not independently scored	**Initial jobless claims, week ended Oct 3 (released Oct 8): 197,000**, with the prior week (ended Sept 26) revised UP 197,000→199,000. Claims have held corroborated via a Reuters-sourced wire across multiple independent outlets
Checked Oct 8 — MARKET PRICES, not institutional estimates, labelled distinctly	CME FedWatch-style odds for Oct 27–28 barely moved post-Waller (~78–82% hold vs. the prior cycle's reported 77–81%); December (Dec 8–9) hike-im (roughly 62–84% depending on source) but directionally higher than the prior cycle's "mid-60s to mid-70s%" read. The 10-year yield was roughly flat (~ Waller-driven spike partly reversed on a Trump Iran-strike comment and a solid 30-year auction
FIRED Oct 2 — PRIMARY (bls.gov), and it undercuts this pillar's own hawkish rationale	**September payrolls +29,000** against an ~84,000 consensus; **unemployment up to 4.2%**; average hourly earnings +0.1% m/m and +3.0% y/y; participa **revisions**, with July flipping to −10,000. **Governor Barr had said on Sept 29 that "risks to the labor market have receded"** — three days later the data s odds fell to ~17–23% from ~36% a week earlier (*market prices*). **The counterweight, and it matters:** initial claims were 197,000, so layoffs are NOT risin
FIRED Sept 30 — PRIMARY (bea.gov), two releases pulling opposite ways	**August PCE undershot:** headline +0.3% m/m and **3.4% y/y** against a ~3.7% consensus; **core 3.0% y/y**; real PCE +0.6%. Caveat stated: the release em Economic Accounts, revisions back to January 2021. **The same day, Q2 GDP was revised sharply UP to 2.2%** from 1.5% (+0.7pp), with real GDI +2.6%
Checked Oct 1–3 — PRIMARY, and two-sided	**Vice Chair Jefferson, Oct 1:** "My colleagues and I will need to come to our own judgment, **which may take more time**" — a sitting Vice Chair slowing th reached **5.29% on Sept 30** while DGS2 fell to 4.78% by Oct 1 — a steepening that prices less near-term tightening and more long-run inflation risk. **H.4** $2,948,090M, reversing last cycle's record drain
CORRECTED Oct 3 — a claim this pillar had been repeating is FALSE and is withdrawn	**Jobless claims are NOT at or near a 57-year low.** The DOL release contains no "lowest since" language — the strings "lowest" and "1969" do not appea not even 2026's lowest, with 189,000 (Jul 18) and 190,000 (Apr 25) both lower. The series minimum is 162,000, Nov 1968
FIRED Sept 25 — HAWKISH, PRIMARY, this cycle — the most consequential single figure	**University of Michigan final September survey:** year-ahead inflation expectations jumped 4.0% → 4.6%, and **LONG-RUN expectations ticked 3.3% → 3.3%.** Sentiment fell to 48.1 (−7.0% m/m)
FIRED Sept 24 — HAWKISH, PRIMARY, arithmetic checked	**Fed H.4.1, week ended Sept 23:** reserve balances $2,930,193M from $3,013,794M — **−$83,601M in one week**, the largest drain this report has logged -
FIRED Sept 24 — HAWKISH-ADJACENT, PRIMARY series	**DOL initial jobless claims, week ended Sept 19: 197,000**; prior week revised UP to 198,000; 4-week average 202,250
FIRED Sept 23 — HAWKISH, PRIMARY release retrieved	**S&P Global flash US PMI:** composite 58.4 (strongest since July 2021), manufacturing 57.0, services 58.7 — paired with **the fastest input-cost inflation** transport costs. The "66.4 input-prices index" figure in secondary coverage is NOT in the release and is excluded
FIRED Sept 23 — HAWKISH, PRIMARY, verbatim from the Fed's own PDF	**Governor Michael S. Barr, "A Long-Term View on the Costs of Shelter," 10:05 a.m. EDT:** "inflation is above our 2 percent target and not clearly trendin achieving our inflation target have increased, while risks to the labor market have receded … **In my base case, further policy adjustments are likely to l** local text extraction; two earlier "corrections" to this item were themselves wrong and are withdrawn
FIRED Sept 22 — hawkish, but DOWNGRADED on sourcing this cycle	**Boston Fed President Susan Collins:** "I now see an increased likelihood of future scenarios in which inflation remains notably above 2%." Quote verbat bostonfed.org does not carry it, and all corroboration traces to one Reuters story — **effectively single-agency**
FIRED Sept 24 — hawkish, but MATERIALLY RECHARACTERISED	**NY Fed President John Williams** at NIESR London was *describing investors' forecasts* — market pricing made another year-end hike "likely" — then ad thinking about it. **But we have to see.**" No primary transcript exists; genuinely independent reporting is TWO outlets, the rest being one Reuters wire
RESOLVED Sept 30, 2026 — HARD DATA LANDED, read as two-sided	**August PCE (core 3.0% y/y, but ~0.15-0.2pt of the apparent cooling is a telegraphed BEA methodology change, not fresh disinflation) and the Q2 GI annualized)** — the two offset rather than confirm or reverse the Sept 23-26 hawkish bundle
Watch — October 27–28, 2026 FOMC	**MARKET PRICES, not institutional estimates:** CME FedWatch odds of another 25bp hike moved ~53% (Sept 23) → **77.5% (Sept 24)** → ~70–76% (Sept **June 2027**, which retires this report's earlier "~51% odds of a cut by June 2027" line
Checked Sept 24–26 — NEUTRAL / counter-signal, logged	The Fed's own **SCOOS** (Sept 24, primary) shows dealer terms "basically unchanged, on net, across all counterparty types." Census **new home sales ro** goods were virtually unchanged. **No Fed speeches Sept 24, 25 or 26**
FIRED Sept 22 — mildly hawkish, primary, this cycle	**Philadelphia Fed Manufacturing Business Outlook Survey (released Sept 17, philadelphiafed.org primary, 5+ corroborating outlets): prices paid 40.9 general activity fell 47.4→37.8 and employment fell 27.9→11.8.** New York Fed Empire State Manufacturing Survey (released Sept 15, primary, fetched o July 2022), prices received 23.1→28.1, while general business conditions fell 20.6→7.6

Checked Sept 19, no change — confirmatory, FULL WEEKLY refresh	**Jobless claims (DOL, primary, released Sept 17): 196,000 for the week ended Sept 12, lowest since mid-July; four-week average 203,250.** Housing Bureau/HUD, Sept 17, primary); existing-home sales −2.0% m/m (NAR, Sept 10, primary) — single-month, internally mixed (single-family starts +7.6%)
Watch — October 27-28, 2026 FOMC (next scheduled meeting)	**CME FedWatch prices a 55.1% probability of another 25bp hike at the October meeting (as of Sept 17, 2026)** — up from 0% cut / 37.6% hold / 62.4% Polymarket/Kalshi priced the Sept hike at roughly 89-94%/54% pre-decision; Polymarket prices a cut by the June 2027 meeting at roughly 51%
Logged Sept 16-19 — governance context, not scored	**President Trump and senior administration officials (the Vice President, the Treasury Secretary, an economic counselor) publicly pressured the Fed to "1% or less" after Chair Warsh voted with a unanimous FOMC (12-0) to hike anyway.** Well-corroborated across 8+ independent outlets (CNBC, CN Fortune, The Hill, Bloomberg)
Checked Sept 18, no change	**A Sept 18 Motley Fool piece discusses "the most important number" in the Fed's Summary of Economic Projections** — commentary on the same fed Sept 17 re-rate, single-source, not a new dated fact
FIRED Sept 16, 2:00pm ET / confirmed Sept 17 — HAWKISH, primary, this cycle	**Sept 16 FOMC: 25bp hike to 3.75%-4.00% (12-0), first hike in 3 years — largely priced (~92.5% CME odds pre-meeting), not scored alone.** The SEP 16 of 18 officials expecting another 2026 hike, 12 of 18 pencilling in one more 25bp move by year-end to 4.125%; slower 2027-2028 descent projected, by CNBC, Reuters/Advisor Perspectives, Coinpedia, coingape. BTC reaction muted (~$76,300 → drifted back near $76,000-198).
FIRED Sept 10, 8:30am ET — HAWKISH, confirmed primary	**August PPI (BLS, primary): +0.4% m/m (in line), but +5.4% y/y — the highest 12-month reading of 2026, up from 4.8% in July; core PPI +4.6% y/y (** Finance, UPI, and The Washington Times. Final-demand energy +4.2% m/m, diesel fuel +24.1% — plausible early pass-through of the Iran-war oil shoc
FIRED Sept 11, 8:30am ET — resolved (carried forward)	**August CPI (BLS, primary):** headline +0.4% m/m/3.4% y/y, core +0.3% m/m/2.4% y/y — a tenth cooler than consensus on core
FIRED Sept 4, 8:30am ET — HAWKISH, confirmed primary, this cycle	**August jobs report (BLS, primary): nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady 4.1%.** Corroborated by CNBC, Yah Investing.com/Reuters
Checked Sept 3, no change	**Re-checked CME FedWatch and the H.4.1/data calendar; nothing material found dated Sept 2-3**
Checked Sept 2, no change	**No new H.4.1 or data print found dated Sept 1-2;** September 15-16 FOMC market pricing (CME FedWatch roughly 60% hold) continues the same post-J baseline
Logged Aug 31, 11:40am ET — drift, not independently trigger-worthy	**CME FedWatch September hike odds continued drifting to ~66%** (Forbes/KuCoin), up from the ~60.4% CNBC read the Aug 31 baseline used
RESOLVED — Sept 15-16, 2026 (carried forward, see the FIRED row at top)	FOMC hiked 25bp as the corrected CME FedWatch read anticipated, with a hawkish SEP/dot plot on top
FIRED Aug 28, 10:00am ET — HAWKISH, confirmed primary; CORRECTED this cycle	**Fed Chair Warsh's first Jackson Hole speech as Chair** (federalreserve.gov primary, verbatim-confirmed; CNBC, PBS, Reuters/investing.com, CNN, Yah "do not tell me that underlying trends have meaningfully improved"; media paraphrase (not a direct quote) that the Fed may need to raise rates; avoided
Fired Aug 27 — mildly hawkish-adjacent, primary, this cycle	**Initial jobless claims, week ended Aug 22 (DOL primary): 203,000 vs. 208,000 consensus,** down from the prior week's revised 207,000; continuing c
Fired Aug 26 — routine, primary, this cycle	**Fed H.4.1, week ended Aug 26 (federalreserve.gov primary): reserve balances −$10,351M w/w to $2,924,936M; TGA −$2,876M w/w to $950,736M**
FIRED Aug 26 — modestly hawkish, primary (carried forward from the abandoned Aug 28 draft)	**July PCE (bea.gov primary):** headline +0.2% m/m/3.7% y/y (0.1pp hot), core +0.2% m/m/3.3% y/y (in line)
Fired Aug 19, 2:00pm ET — confirmed hawkish-but-already-priced (carried forward)	**FOMC minutes (Jul 28-29 meeting), federalreserve.gov primary:** hawkish bloc wider than the three named dissenters ("several participants" beyond t tightening as possibly necessary)
Logged Aug 17-18 (carried forward)	**30-year Treasury yield hit 5.31-5.33%, a ~19-year high** — driven substantially by fiscal/deficit concerns, not purely Fed repricing
Fired Aug 20 (carried forward)	**Equity selloff, partial Aug 21 recovery** — attributed to the hawkish minutes and rising long yields
Fired Aug 20, confirmed Aug 22 (carried forward)	**Initial jobless claims, week ended Aug 15: 206K vs. 210K consensus** (modest hawkish beat, 4-week average 204K); prior week (Aug 8) revised up to
Fired Aug 14, logged Aug 16 (carried forward)	**July retail sales:** headline −0.6% m/m vs. +0.1% expected, core −0.2%, still +5.0% y/y — first decline in nine months, steepest since May 2025, broad-
Fired Aug 13, 4:30pm ET (carried forward)	**Fed H.4.1, week ended Aug 12:** reserve balances −$49,290M w/w to $2,944,059M, TGA +$56,626M w/w to $963,950M
Fired Aug 12-13 (carried forward)	**July CPI landed cool/in-line; jobless claims (week ended Aug 8) missed weak at 209K vs. 202K expected**
Fired Aug 7, re-confirmed independently — DOVISH, moderated (carried forward)	**BLS July jobs report:** payrolls fell 23,000 vs. ~83,000 expected, unemployment 4.1% on a falling participation rate, May/June revised down a combined
Fired Jul 29 — HAWKISH, confirmed primary (carried forward)	**FOMC held 9-3**, three regional presidents dissenting for an immediate hike — first unified 3-member dissent since Sept 2016; Bank of America still proj cool CPI
RESOLVED — Sept 15-16, 2026 (carried forward)	FOMC hiked, confirming the corrected, larger hawkish repricing this cycle's Aug 29 re-rate anticipated
Ongoing	Iran/Hormuz oil-inflation risk — see Iran War Risk pillar for the current read

The flip line, updated Oct 1 — RESOLVED, and it came back two-sided, not a confirmation. The test this pillar set for itself was whether “the next hard CPI/PCE/PPI print or FOMC communication co corroborating). **The hard-data half landed Sept 30: August PCE and the Q2 GDP third estimate.** Core PCE printed 3.0% y/y — but a telegraphed BEA methodology change (pre-announced June 20

genuine growth beat that argues the opposite direction. **Neither print, nor the two together, clears the sufficiency rule for a further move in either direction** — so −4/−4/−3/−1/0 (vs. the Sept 23 ba
two-sided facts to keep in view either way: growth is strong, layoffs are not rising (claims 197,000), new home sales rose, credit terms are unchanged, and the big reserve drain is mostly mechanical.

Prior flip line, Sept 11: the Aug 13 cool CPI and weak claims print were the last genuine dovish confirmation this pillar found. Since then, the Aug 19 minutes' wider hawkish bloc, Warsh's Jackson Ho
pointed the same hawkish direction, with CME/market-implied Sept 15-16 hike odds still cited in the ~56-60% range across sources — past coin-flip. Still not a confirmed pivot: Warsh explicitly decli
pass, is now the next real test before Sept 15-16. If the Sept 15 FOMC actually delivers a hike, treat that as the real, final confirmation and re-rate down hard. If it holds or cuts despite this cycle's tone

My Decision

HELD FLAT — OCTOBER 31, 2026 (2026-10-31_draft, FULL WEEKLY refresh, DRAFT, AWAITING ALEX'S STAMP; builds on 2026-10-29_draft, COMMITT
POST-FOMC/PCE MARKET REACTION WAS THIN THIS WINDOW (FLAGGED FOR ALEX)

P (2026-10-31_draft, FULL WEEKLY refresh, DRAFT, AWAITING ALEX'S STAMP; identical to 2026-10-29_draft, COMMITTED/AUTO-STAMPED committed baseline this builds on): 34 / 23 / 34 / 43 / 58 · Change vs. today's baseline: 0 / 0 / 0 / 0 / 0 · My Weight: 20% (equal) · Impact: 8 (un Master (equal-weight), this cycle's blend: 1mo −1.99 (Bear) · 3mo −1.71 (Bear) · 6mo −0.60 (Mild Bear) · 1yr +1.16 (Mild Bull) · 3yr +2.84 (Bull) · FINALIZED Oct 30 close ($77,256.82, GitHub Actions data relay, down 4.67% from the Oct 29 finalized close of $81,041.93), which pulled dow yesterday — no call band flipped anywhere, on any window or either FINAL NUMBER variant · Leave-one-out range: −0.76 to +0.65 (sign still pillar's own P is unaffected: October jobs (~Nov 6) and October CPI (~Nov 10) are still not due, and no new Fed-speaker guidance was found d

October 31, 2026 — FULL WEEKLY refresh (this pillar held flat; a deeper research pass run separately from, and after, this same day's light daily touch below): four independent, primary-s for a hike) was already fully priced into the baseline — confirms rather than exceeds consensus, not scored. No new Fed-official remarks were found dated Oct 29-31 from Warsh, Cook, Ham through Dec 11, 2026 — reassuring, status-quo context that removes a tail-risk of data-release disruption ahead of the Nov 6 jobs report and Nov 10 CPI, but not a directional mover, not score FOMC/post-PCE market-reaction coverage dated Oct 29-31 — no confirmed December hike/cut-odds move could be located either way for this specific window. This is a coverage gap for or bar for "research capability materially degraded this cycle" — but it is flagged prominently for Alex as worth a manual spot-check of December FedWatch/Polymarket odds before treating "no 10-29_draft), now active_qual_set. **STAMP DECISION: per CLAUDE.md, a full weekly refresh is categorically excluded from auto-stamp regardless of research quality or how flat the result**

October 30, 2026 — LIGHT DAILY touch (this pillar held flat; no qualitative pillar moved this cycle): re-checked via WebSearch. October jobs (BLS Employment Situation) and October CPI ar not primary-confirmed and are flagged as approximate). No new Fed-official remarks or guidance were found dated Oct 29-30. Current government-shutdown status for this specific window config/scores.json was NOT touched this cycle — active_qual_set remains **2026-10-29_draft**, status COMMITTED (AUTO-STAMPED), unchanged from yesterday. The computed Bitcoin TA pil FINAL NUMBER ticked to −0.04 equal-weight / +0.49 horizon-weighted this cycle, attributable entirely to that pillar's tape-composite move, not this pillar's own score.

October 15, 2026, LIGHT DAILY touch (score set 2026-10-15_draft), this version — RE-RATED DOWN, 33/26/36/44/58 → 31/23/34/43/58 (−2/−3/−2/−1/0). THE DECISIVE NEW FACT: the consensus, up from 3.4% in August), core +2.6% y/y (vs. 2.5% consensus, up from 2.4%), +0.6% m/m headline matching estimates, driven by energy/gasoline (+9.1% m/m, +34.2% y/y). This to 3.75-4.00% in September). **Sizing:** 1mo takes only −2, since market-priced (Kalshi/Polymarket) Oct 28 hike odds, while roughly doubling to ~34% from a pre-CPI ~17%, still leave a hold (~6 sources (noisy, no single figure settled). 6mo takes −2 because the core beat specifically (not just the energy-driven headline) argues for persistent re-acceleration rather than a one-print spi an ordinary LIGHT DAILY touch, sourcing clears the sufficiency rule (primary BLS data plus 4+ independent outlets; market-price hike odds explicitly labelled and kept distinct from institutiona **"Alex (auto-stamped)."**

October 10, 2026 FULL WEEKLY refresh (score set 2026-10-10_draft), prior version — RE-RATED DOWN, 35/29/37/44/58 → 33/26/36/44/58 (−2/−3/−1/0/0), a partial reversal of the Oct Republic of Türkiye), Oct 8, 2026 — PRIMARY (federalreserve.gov), adversarially verified across five-plus independent outlets not used in the first research pass (FXStreet, Dailysabah, Housi above the Fed's 2% target for roughly 5.5 years; that the US economy strengthened in the second half of 2026; and he explicitly cited the Iran-conflict-linked energy shock and AI-buildout-dr September nonfarm-payrolls print (+29,000 vs. ~84,000 consensus), describing the labor market as "solid and stable" despite the lower jobs number, and said rate hikes don't need to come a directly rebutting the dovish narrative behind the Oct 3 cycle's large upward move clears the sufficiency rule on its own; it does not need a second corroborating primary source because it IS Fed's H.4.1 (week ended Oct 7, released Oct 8 as usual) both ran on normal schedule, confirming Public Law 119-103's funding through Dec 11, 2026 holds. DOL initial jobless claims, week end 199,000 — claims have now held below 200,000 for four straight weeks, read as continued labor-market resilience in tension with, not confirmation of, the weak September payrolls print; cont hold odds, a market price, versus the prior cycle's reported 77–81% hold) — the market mostly isn't buying a near-term hike shift yet. 3mo takes the larger −3 because the Dec 8–9 meeting sit source) but agree directionally that implied odds drifted higher since the prior cycle's reported "mid-60s to mid-70s%" read — no single precise figure is quoted as settled. 6mo takes a muted strike on Iran before the November midterms and a solid 30-year Treasury bond auction — no new quarterly GDP/PCE data landed and the long end didn't move much. 12mo and 36mo HOLD **Explicitly excluded this cycle, too weak/unreliable to use:** a single wire report's claim that Goldman Sachs might shift to forecasting two more hikes is internally inconsistent (the same article and could not be resolved (FRED access was blocked this cycle) — no figure quoted; the exact H.4.1 reserve-balances dollar figure for the week ended Oct 7 could not be extracted from avail **refresh, categorically excluded from delegated auto-stamp authority regardless of move size, call-band stability, or how cleanly the sufficiency rule was satisfied — LEFT AS DRAFT, flag**

October 3, 2026 FULL WEEKLY refresh (score set 2026-10-03_draft2), prior version — RE-RATED UP, 27/25/34/43/58 → 35/29/37/44/58 (+8/+4/+3/+1/0), the largest move of that cycle 30) and September payrolls came in at +29,000 against an ~84,000 consensus, with unemployment up to 4.2% and 60,000 of downward revisions (BLS, Oct 2) — directly contradicting Gover FedWatch, a market price). 3mo took only +4 because the Dec 8–9 FOMC sits inside that window and a December hike remained the market's base case (roughly mid-60s to mid-70s percent 36mo held, nothing structural changed. This was a FULL WEEKLY refresh — categorically excluded from delegated auto-stamp authority regardless of move size — **LEFT AS DRAFT, never st**

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — RE-RATED DOWN, 31/29/37/44/58 → 27/25/34/43/58 (−4/−4/−3/−1/0), the largest move of this cycle. This sentences confirmed verbatim by local text extraction of the Fed's own PDF — "inflation is above our 2 percent target and not clearly trending toward target in a timely way," "risks to achievin flash US PMI, retrieved from the embargoed release, pairing the strongest private-sector growth since July 2021 with the fastest input-cost inflation since October 2022. **PRIMARY:** UMich's fi revised up to 198,000. **PRIMARY:** H.4.1 reserve balances down $83,601M in one week, the largest drain logged here. **Two Fed voices were downgraded on sourcing rather than leaned on:** W **size:** one unambiguous primary-sourced Governor plus hard data on costs, expectations, labour and liquidity moves an October hike from coin-flip to base case. Sized against precedent — S the abandoned Sept 24 draft's −1 *specifically* because that draft had no expectations data. 12mo takes only −1, since one survey month and a few speeches say little about H2-2027, and 36m not rising (claims 197,000); August new home sales *rose* to 684K SAAR, which contradicts this report's earlier cooling-housing read and is corrected accordingly; the Fed's own SCOOS shows **manual review** — full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of evidence quality or move size, so this went to Alex directly and he review

Sept 24 draft (score set 2026-09-24_draft) — WRITTEN BUT NEVER DELIVERED; SUPERSEDED by the Sept 26 weekly above. It proposed 31/29/37/44/58 → 29/27/36/44/58 and its report for the audit trail only. **On re-verification its evidence HELD UP in full** — both claims below are confirmed, and two later "corrections" to them were themselves wrong and withdrawn — so it i neither previously scored. **(1) PRIMARY:** Fed Governor Michael S. Barr, speaking at the Chicago Fed's Housing Affordability 2026 summit (10:05am EDT, Sept 23) — the full text was fetched ar inflation is above our 2 percent target and not clearly trending toward target in a timely way. Moreover, risks to achieving our inflation target have increased, while risks to the labor market hav Sept 16 hike, guiding on the record toward more. **(2)** The **S&P Global flash US PMI, released Sept 23**: composite output **58.4** (from 56.0), the strongest private-sector expansion since July 20 **selling-price inflation rose too** — reversing August, when selling-price inflation had slowed to a nine-month low. S&P Global's own release page returned HTTP 403 to automated fetch, so the manufacturing as 56.7, which cross-checking resolves — 56.7 is the separate manufacturing *output* index, 57.0 is the headline PMI quoted here. **Why two points and not more:** Barr's remark i strength is genuinely two-sided for crypto, since strong growth and a solid labor market are risk-on supportive; the bearish channel here is the rate path and liquidity, not the economy. 12mo a year Treasury yield rose more than 13bp to **5.104%** on Sept 23, a 19-year high and the largest one-day move in nearly 18 months, with a poorly-bid 5-year auction also cited (CNBC, CNN, Yah 4.96% — FRED posts with a one-day lag, so the 5.104% figure rests on press reporting only, is *not* primary-confirmed, and is not used to justify any part of this move. CME FedWatch odds of touch, research capability fully available, sourcing clears the sufficiency rule, verification clean.

Sept 23 LIGHT DAILY touch (score set 2026-09-23_draft), prior version: checked for changes since the Sept 22 committed baseline. Three dated items found, none clearing the sufficiency but this figure is effectively single-sourced (one aggregator citing CME, not independently pulled from CME's own site); and Fed Vice Chair Jefferson's Sept 22 speech at the NY Fed's Treasu claims, PCE, CPI, retail sales, or housing data found dated in this window; no Powell speech located. **P HELD FLAT at 31/29/37/44/58.** This is an ordinary light daily touch, research capability pillar that moved this cycle — see that report.

Sept 22 LIGHT DAILY touch (score set 2026-09-22_draft), prior version: a targeted single-pillar follow-up, not a full four-pillar pass — CLARITY Act, Iran War Risk, and Tokenization are carri cycle including the Sept 19 weekly review: the Philadelphia Fed Manufacturing Business Outlook Survey (released Sept 17, primary source page confirmed at philadelphiafed.org, 5+ independ State Manufacturing Survey (released Sept 15, PRIMARY, fetched directly from newyorkfed.org) showed general business conditions cooling sharply to 7.6 from 20.6 while **prices paid jumped** dated the same week, showing the same directional signal (headline activity cooling, input-cost and selling-price pressure both accelerating to multi-month/multi-year highs) clears the suffici releases' own forward-looking components (employment, future activity, general conditions) fell in the same reports; and market pricing actually turned risk-on into Sept 18-19 (10-year backe **windows: 32/30/38/44/58 → 31/29/37/44/58.** 12mo/36mo HELD — two regional sentiment surveys say nothing about the 2027-2028 policy path those windows price. Research capability f **daily-type touch, not a weekly refresh, and the sourcing clears the sufficiency rule — AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)"; left as "pending" here sin**

Prior cycle (Sept 19 FULL WEEKLY refresh, score set 2026-09-19_draft): a full independent primary-source research pass (~15 targeted WebSearches, no capability degradation) re-checked hawkish read. New-residential-construction data (Census Bureau/HUD, primary, Sept 17) showed starts −2.6% m/m and permits −2.7% m/m, and NAR existing-home sales (primary, Sept 10) f senior administration officials publicly pressured the Fed against hiking, with Trump demanding rates be cut to "1% or less" after Chair Warsh voted with a unanimous FOMC to hike anyway — **32/30/38/44/58.** This was a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp authority regardless of the size of the move (there, zero) — LEFT AS DRAFT,

Prior cycle (Sept 18 light daily touch, score set 2026-09-18_draft): re-checked — the Sept 16 FOMC dot-plot revision already drives this window's read in the current committed set; a Sept 18 fact. **P HELD FLAT at 32/30/38/44/58.** Light daily touch, full research access, verification clean — **AUTO-STAMPED SEPTEMBER 18, 2026** per the runbook's delegated authority. Tokenizatio

Prior cycle (Sept 17 MERGE SET, 2026-09-17_draft2) — why there were two Sept 17 sets, and what actually differed: two independent runs researched that day: the cloud routine's, which com its baseline rather than overwriting it. Three of the four pillars were carried forward from it untouched. Its CLARITY and Iran readings rested on dated facts the local run did not independently NPT-withdrawal statement on the Iran side).

This pillar is the one thing corrected, and the disagreement is narrow and factual. Both runs agree the hike was priced and the SEP is the mover; they differ on how far out it reaches. This ru 2027 in the June SEP, with 2028 at 3.9%, 2029 at 3.6% and longer run 3.2%. The cloud set described the 2027–28 path qualitatively as "a slower, more cautious descent", put the long-run ne hold: a 50bp upward revision to the one-year-out median is not a nuance about the path, it is a full year of expected easing deleted, and the 1-year window is exactly what the old 3.6% media Bear at one year.

Why 44 and not lower. The strongest argument against this correction is not a number but a person: Chair Warsh submitted no dot at all — "I have refrained from offering any projections of m meeting declined to make one. The longer-run median is still 3.2%, so easing is deferred rather than cancelled; the SEP pairs the tighter path with 2.3–2.4% real GDP and a flat 4.1% unemploy way and are why the correction was made at all.

One correction to an earlier committed note, logged here rather than edited there. The committed `2026-09-16_draft` note states that Thune filed the motion to reconsider on the CLARITY FinanceFeeds, CryptoTimes — 4+ independent). Committed sets are never edited, so the attribution is corrected for the record here; no P value is affected.

Stamp decision: AUTO-STAMPED. Ordinary light daily touch, not a weekly refresh; research capability fully available, with both Federal Reserve primary documents fetched directly rather tha

Sept 16 light daily catch-up (score set 2026-09-16_draft), prior cycle: the FOMC decision, statement, SEP and dot plot were scheduled for 2:00pm ET that day and had NOT been released a **committed, stamped_by "Alex (auto-stamped)."** Iran War Risk and CLARITY Act both moved that cycle on the Senate cloture failure and the IAEA/NPT developments — see those reports.

Prior cycle (Sept 12 FULL WEEKLY refresh, score set 2026-09-12_draft2): the week's deeper research turned up one genuinely new primary-sourced release — the August PPI (BLS, primary, the monthly gain is attributable to volatile energy costs (diesel fuel +24.1% alone), and core PPI actually undershot consensus (+0.3% m/m, or +0.2% m/m on a further core-ex-trade-services August CPI print itself (BLS, Sept 11) with no discrepancy found. Jobless claims (week ending Sept 5: 206,000, 4-week average 206,000) were steady and unremarkable. CME FedWatch-traci daily cycle's background note referenced; both are market-price snapshots at different times, the divergence noted but not resolved. A Sept 9 Marketplace piece characterizing Chair Warsh a of this research — it remains this pillar's next real catalyst, most acute on the 1mo/3mo windows. **P HELD FLAT at 34/33/44/54/60.** This is a FULL WEEKLY refresh — per the runbook, weekly finding itself is inconclusive/reinforcing, not a fresh directional catalyst), so **this set is left as DRAFT, status "draft," awaiting Alex's manual review.** Iran War Risk, CLARITY Act, and Tokeniza

Prior cycle (Sept 12 light daily catch-up, score set 2026-09-12_draft): re-checked — no new Fed speech or primary data release found since the Sept 11 CPI print. That morning's coverage of a fresh statement, and the hike-odds figure was a market price, not used to move P under the house sufficiency rule. **P HELD FLAT at 34/33/44/54/60.** Light daily touch, no window moved, n **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."** Iran War Risk was the only pillar that moved that cycle — see that report.

Sept 11 light daily catch-up (score set 2026-09-11_draft), prior cycle: the August CPI print landed on schedule at 8:30am ET: BLS's own release (bls.gov, primary, fetched directly and re-fetc **+2.4% y/y**; energy rose 2.1% m/m and gasoline 3.9%, accounting for over a third of the monthly increase, while shelter rose 0.3%. Against the consensus circulating pre-print (headline +0.4% has flagged as its next catalyst for a week, and it clears the sufficiency bar on its own. It is tempered, not clean relief: headline accelerated from +0.1% to +0.4% and the acceleration is energy around the print (~70% for a 25bp move) are a *market price*, reported and not used to move P; the BLS release itself is the mover. Cross-source caution logged: several aggregator summaries **to 34/33/44/54/60** — 1mo 32→34, 3mo 31→33, 6mo 43→44, concentrated on the windows bracketing the Sept 15-16 FOMC; 12mo and 36mo held flat at 54/60, because one print a tenth off master call band unchanged everywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated daily auto-stamp authority, **this set is AU**

Sept 10 light daily catch-up (score set 2026-09-10_draft), prior cycle: re-checked — the Aug CPI release (due Sept 11) and the Sept 15-16 FOMC meeting both remain pending per BLS/Fed c → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated daily auto-stamp authority, **this set is AUTO-STAMPED: status committed, stamped_by "A**

Prior cycle (Sept 9 light daily catch-up): re-checked directly against CME FedWatch-citing coverage — September hike odds read ~58.7%, consistent with the already-priced cluster; no new

Prior cycle (Sept 8 light daily catch-up): re-checked via WebSearch — no new Fed speech, data release, or FOMC commentary since Sept 3-4; the Sept 11 CPI print and Sept 15-16 FOMC mee

Prior cycle (Sept 6 light daily catch-up): re-checked via WebSearch — no new Fed speech or data release since Sept 3-4; Sept 6 was a Saturday, markets and the Fed's calendar quiet. **AUTO**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch: Fed Governor Waller's genuinely dovish-leaning Sept 3 speech ("g a net hawkish drift for the week consistent with the Sept 5 cut. **HELD FLAT at 32/31/43/54/60. COMMITTED BY ALEX SEPTEMBER 5, 2026.** Iran War Risk, CLARITY Act, and Tokenization all l

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but **(36/35/45/55/61), auto-stamped Sept 3**. Not corrected retroactively in scores.json — stamping is Alex's call.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat at 36/35/45/55/61; originally left as draft only because Iran War Risk's re-rate flipped the master call band, not any pillar; config/scores.json was untouched that cycle.

Prior cycle (Sept 1 light daily catch-up) — carried forward for context: re-checked CME FedWatch odds and found continued drift, not a fresh shock: September hike odds moved to ~66% (Fo STAMPED, then the committed baseline.

Prior cycle (Aug 31 light daily catch-up) — carried forward for context: re-checked CME FedWatch odds and found continued drift, not a fresh shock: September hike odds moved from the ~5 held flat, AUTO-STAMPED.

Prior cycle (Aug 29 full weekly refresh) — carried forward for context: Fed & Macro re-rated down further that cycle than a same-day catch-up draft written August 28 (score set 2026-08-28_ that draft identified: Fed Chair Warsh's first Jackson Hole speech as Chair (federalreserve.gov primary transcript, Aug 28, confirmed verbatim this cycle via direct fetch; corroborated by CNBC adversarial-verification pass this cycle caught a real error in the abandoned draft: its CME FedWatch September hike-odds figure (~35.4%→~45.7%) understated the actual market move. Inde independent read at "55.7%" — meaning September hike odds are now past coin-flip, not just approaching it. This cycle also corrects the abandoned draft's "stable tape" characterization of (week ended Aug 22) came in tight at 203K vs. 208K consensus, and the Aug 26 H.4.1 release showed the known reserve-drain pattern continuing — neither independently trigger-worthy. To the long end since Warsh explicitly declined to commit to a reaction function and one repricing doesn't reach three years out.

(That Aug 29 cycle was left as a draft solely because full weekly refreshes are categorically excluded from delegated daily auto-stamp authority, regardless of move size — not for any evide

The prior committed scores were **34 / 33 / 44 / 54 / 60** (2026-09-16_draft), re-rated down to **32 / 31 / 42 / 54 / 60** (2026-09-17_draft, cloud) and corrected further to **32 / 30 / 38 / 44 / 58** (20 **flat for two straight cycles (Sept 17, Sept 18)** — nothing this cycle cleared the sufficiency bar to move it further — **AUTO-STAMPED SEPTEMBER 18, 2026.**

October 3, 2026 — FULL WEEKLY refresh (2026-10-03_draft2), LEFT AS DRAFT: RE-RATED UP, 27/25/34/43/58 → 35/29/37/44/58 (+8/+4/+3/+1/0) — the largest move of this 3.0% core, BEA Sept 30) and September payrolls came in at +29,000 against ~84,000 expected with unemployment up to 4.2% and 60,000 of downward revisions (BLS Oct 2) — di CME FedWatch, a market price). **3mo 25 → 29, only four points:** the Dec 8–9 FOMC falls inside this window and a December hike remains the base case (roughly mid-60s to mid-70 **44, one point only:** the 10-year rose to 5.29% on Sept 30 even as the 2-year fell to 4.78%, and a steepening like that is a structural drag no single month of cooler data fixes. **36mo** revised sharply up to 2.2%, and claims at 197,000 say the labour softening is a hiring freeze rather than a firing wave. **Corrections this cycle:** the "claims near 57-year lows" claim is figure is corrected down from "above 75%"; and DGS2 for Sept 29 is 4.89%, not 4.88%.

- **Oct 2 light daily touch (quant-only; qualitative set unchanged):** re-checked this pillar via WebSearch for any new scheduled Fed speech or data release. None found for Oct 1-2 config/scores.json untouched; active set remains 2026-09-26_draft3.
- **Oct 1 light daily touch (quant-only; qualitative set unchanged) — August PCE and the Q2 GDP third estimate, the test this report flagged as outstanding, both landed Sept 30** implemented a methodology overhaul to the PCE price index on this same release (telegraphed since June 2026, independently pre-estimated by Goldman/TD Securities at roug 1.5%), with GDI +2.6% — a genuine, well-corroborated upside growth surprise that cuts the other way (hawkish-for-growth). The two releases roughly offset rather than confirmi No confirmed Treasury-yield print or FOMC commentary found dated after Sept 24-25 in this window. **HOLD FLAT — the PCE/GDP data landed but nets out two-sided, clearing**
- ★ **★ SUPERSESSION NOTICE, stated first because it affects how you should read everything else.** A `2026-09-24_draft` cycle proposed 29/27/36/44/58 on this pillar and edited `config/scores.json`. Per house convention it is treated as not-delivered, drops out of the visible lineage columns, and its claims were re-verified rather than trusted. **On this pi** withdrawn (see the next two items). Its score is superseded not because it was wrong, but because four further pieces of evidence landed after it.
- ★ **★ NEW — Fed Governor Michael S. Barr, Sept 23 (PRIMARY, verbatim, local text extraction).** All three load-bearing sentences confirmed on p.2 of *barr20260923a.pdf*, includin reported the "risks … have receded" sentence as ABSENT and moved the start time to 10:20 a.m.; the sentence **is present**, and the Board's own calendar confirms **10:05 a.m.** (10
- ★ **★ NEW — S&P Global flash US PMI, Sept 23, now PRIMARY.** The embargoed release was retrieved directly, upgrading this from secondary: composite 58.4, manufacturing 57.0, does not appear in the release — it is vendor data and is not quoted.
- ★ **★ NEW — UMich final September, Sept 25 (PRIMARY).** Year-ahead inflation expectations 4.0% → 4.6%; **long-run 3.3% → 3.4%, ending three consecutive months at 3.3%**; se
- ★ **★ NEW — DOL claims, Sept 24 (PRIMARY): 197,000** for the week ended Sept 19; prior week **revised up to 198,000** and the 4-week average now **202,250** — both correcting sta
- ★ **★ NEW — H.4.1, Sept 24 (PRIMARY, arithmetic checked): reserve balances −$83,601M week-over-week** to $2,930,193M, with TGA +$100,056M. The largest one-week drain
- **Two Fed voices, DOWNGRADED on sourcing after verification.** Collins (Sept 22) is quoted correctly but traces entirely to one Reuters story — **effectively single-agency**, and ne exists and genuinely independent reporting is two outlets. Both corroborate; neither could move P alone.
- **Why this clears the sufficiency bar:** one primary Federal Reserve source, verbatim from the Fed's own server and extracted locally rather than summarised, plus four further pri
- **MARKET PRICES, reported and never mixed with the SEP:** the 10-year yield 4.96% → 5.11% → 5.18% (Sept 22–24), highest since 2007 — now **double-primary-confirmed** by the FedWatch October-hike odds ~53% → 77.5% → ~70–76%; traders now price ~four more hikes by June 2027, retiring this report's stale "cut by June 2027" line. **A claimed FRED**
- **Score decision: RE-RATED DOWN to 27/25/34/43/58** (−4/−4/−3/−1/0). **LEFT AS DRAFT, NOT AUTO-STAMPED** — a full weekly refresh is categorically excluded from delegated S&P Global release were all reached directly.
- **What would change my mind, in order:** August PCE and Q2 GDP landed **Sept 30** and came back two-sided (see What Changed) — not itself a trigger; next is whether the Oct 27

Carried forward — what changed in the September 23 light daily touch (2026-09-23_draft, committed, auto-stamped), for continuity:

- **10-year Treasury yield ~4.96-4.97% Sept 22**, essentially flat (CNBC, TradingEconomics — two-source, but a market price, not scored).
- **CME FedWatch: 59.7% odds of an Oct 28 hike** — effectively single-sourced (one aggregator citing CME, not independently pulled from CME's own site); does not clear the bar.
- **Fed Vice Chair Jefferson's Sept 22 speech** at the NY Fed's Treasury Market Conference (primary, federalreserve.gov) — discount-window/Treasury-market plumbing, off-topic
- No new jobless claims, PCE, CPI, retail sales, or housing data found dated in this window.
- **Score decision: HELD FLAT at 31/29/37/44/58.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 22 light daily touch (2026-09-22_draft, committed, auto-stamped), for continuity:

- ★ **★ NEW this cycle — Philadelphia Fed Manufacturing Business Outlook Survey, released Sept 17, 2026 (primary source page confirmed at philadelphiafed.org, 5+ independe** from 27.9) and future activity fell (52.9 from 73.6).
- ★ **★ NEW this cycle — New York Fed Empire State Manufacturing Survey, released Sept 15, 2026 (PRIMARY, fetched directly from newyorkfed.org):** general business condition
- **Why this clears the sufficiency bar:** two independent Fed district banks' own primary surveys, same week, same directional signal (headline cooling, input-cost/selling-price pre
- **Why only one point:** both are soft/sentiment surveys whose own forward-looking components also fell, and market pricing turned risk-on into Sept 18-19 (10-year off its 5.04% h
- **CLARITY Act, Iran War Risk, and Tokenization carried forward unchanged** — not re-researched this cycle; this is a targeted single-pillar touch, not a full weekly pass.
- **Score decision: RE-RATED DOWN one point on 1mo/3mo/6mo, 32/30/38/44/58 → 31/29/37/44/58;** 12mo/36mo held. Sourcing clears the sufficiency rule — **AUTO-STAMPED:**

Carried forward — what changed in the September 19 FULL WEEKLY refresh (2026-09-19_draft, still draft), for continuity:

*FULL WEEKLY refresh, September 19, 2026 (score set **2026-09-19_draft**, draft, awaiting Alex's stamp) — checking for changes since the 2026-09-18_draft committed baseline. **This pillar HELD FLAT at 32/30/***

- ★ **★ NEW this cycle — jobless claims, week ended Sept 12 (DOL, primary, released Sept 17): 196,000**, the lowest since mid-July; four-week average 203,250. Confirmatory of the
- ★ **★ NEW this cycle — housing data (Census Bureau/HUD and NAR, primary, released Sept 17 and Sept 10): housing starts −2.6% m/m, permits −2.7% m/m, existing-home sal**
- **Background color, not scored — University of Michigan preliminary September sentiment fell to 47.8 from 51.7,** near a record low, with 1yr inflation expectations up to 4.6%; pr

- **Market-price context, not scored:** the 10-year Treasury briefly touched a 19-year high near 5.04% before settling near 4.95%; CME FedWatch prices 55.1% odds of another hike
- **Logged, not scored — a high-profile political story:** President Trump and senior administration officials publicly pressured the Fed against hiking, with Trump demanding rates b storyline, not new economic evidence.
- **Score decision: HELD FLAT at 32/30/38/44/58.** Full independent primary-source research this cycle; nothing cleared the sufficiency bar. FULL WEEKLY refresh — categorically

Carried forward — what changed in the September 18 light daily touch (2026-09-18_draft, committed, auto-stamped), for continuity:

*LIGHT DAILY touch, September 18, 2026 (score set **2026-09-18_draft**, committed, auto-stamped) — checking for changes since the 2026-09-17_draft2 committed baseline. **This pillar HELD FLAT at 32/30/38/4***

- **Re-checked for a new dated development — found none.** The Sept 16 FOMC dot-plot revision already drives this window's read in the currently committed set.
- **A Sept 18 Motley Fool piece discussing "the most important number" in the Fed's Summary of Economic Projections is single-source commentary** on the same already-price
- **Score decision: HELD FLAT at 32/30/38/44/58.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 17 light daily touch (2026-09-17_draft / draft2, committed, auto-stamped), for continuity:

*LIGHT DAILY touch, September 17, 2026 (score set **2026-09-17_draft**, committed, auto-stamped) — checking for changes since the 2026-09-16_draft committed baseline. **This pillar RE-RATED DOWN to 32/31/***

- **The September FOMC decision landed:** the Fed raised the federal funds target range 25bp to 3.75%-4.00% (12-0 vote), its first hike in three years (federalreserve.gov, primary; not alone move P.
- **The SEP/dot plot is new primary information:** 16 of 18 officials expect another 2026 hike (12 of 18 pencil in one more 25bp move by year-end to 4.125%); a slower, more cautious
- **Bitcoin's reaction was muted** (~$76,300 on the statement, drifting back to hold near $76,000-198) — consistent with the hike being anticipated; the incremental signal is in the d
- **Score decision: RE-RATED DOWN to 32/31/42/54/60** — 1mo 34→32, 3mo 33→31, 6mo 44→42; 12mo/36mo held flat. **AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

*LIGHT DAILY touch, September 16, 2026 (score set **2026-09-16_draft**, committed, auto-stamped) — checking for changes since the 2026-09-15_draft committed baseline. **This pillar HELD FLAT at 34/33/44/5***

- **The September FOMC decision had not landed yet.** The decision, statement, Summary of Economic Projections and dot plot were scheduled for **September 16 at 2:00pm ET**, w
- **No new BLS/Fed/BEA primary release found** since the August CPI/PPI prints already priced.
- **Score decision: HELD FLAT at 34/33/44/54/60.** No window moved; nothing new cleared the sufficiency bar.

Carried forward — what changed in the September 15 light daily touch (2026-09-15_draft, committed, auto-stamped), for continuity:

*LIGHT DAILY touch, September 15, 2026 (score set **2026-09-15_draft**) — checking for changes since the 2026-09-14_draft committed baseline.*

- **The September FOMC convened Sept 15, but nothing was knowable yet.** The decision, statement, SEP and dot plot did not land until Sept 16 at 2:00pm ET. Markets leaned towa market prices, never used to move a P.
- **No new BLS/Fed/BEA primary release** since the August CPI (Sept 11) and August PPI (Sept 10) already priced.
- **Score decision: HELD FLAT at 34/33/44/54/60.**

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

*LIGHT DAILY touch, September 14, 2026 (score set **2026-09-14_draft**) — checking for changes since the 2026-09-13_draft committed baseline.*

- **No new primary macro release since the last check.** Nothing from BLS, the Federal Reserve, or BEA landed Sept 13-14; the August CPI (released Sept 11) and August PPI (releas
- **The September 15-16 FOMC — with the SEP and dot plot — has not yet happened.** The decision and statement are due **September 16**. That is the next dated catalyst for this pil
- **Market-implied hike odds are a MARKET PRICE and are explicitly not used to move P.** Reads circulating this week span a wide **66-83%** band across sources for a 25bp hike —
- **Score decision: HELD FLAT at 34/33/44/54/60.** No window moved. Nothing dated and primary-sourced arrived to move it.

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 — checking for changes since this morning's committed baseline (2026-09-12_draft, auto-stamped).

- **Re-verified August CPI (BLS, released Sept 11) independently:** headline +0.4% m/m / +3.4% y/y, core +0.3% m/m / +2.4% y/y, shelter +0.3% m/m / +3.0% y/y — matches the f
- ★ **★ NEW this cycle — August PPI (BLS, primary, released Sept 10, 2026; corroborated by CNBC, CNN, Yahoo Finance — 3+ independent outlets).** Headline final demand +0.4% alone). Core PPI (ex food/energy) came in at +0.3% m/m, UNDER consensus on one reading (+0.2% m/m on a further core-ex-trade-services cut) — a mild disinflationary surpris **does not move P despite being a fresh, primary-sourced, sufficiency-qualified release.**
- **DOL initial jobless claims, week ending Sept 5 (released ~Sept 11, primary): 206,000, down 1,000 w/w, 4-week average 206,000** — steady, unremarkable, no signal.
- **CME FedWatch-tracked market-implied odds of a 25bp hike at the Sept 15-16 FOMC read ~62-69% this week (as of Sept 10-11) — a market price only, not an institutional est** both reported as market-price snapshots at different times, the divergence noted, not resolved or editorialized on.
- **Fed Chair Warsh: no new substantive remarks since the Aug 28 Jackson Hole speech.** A Sept 9 Marketplace piece characterizing him as withholding forward guidance ahead
- **The Sept 15-16, 2026 FOMC meeting has NOT yet occurred** as of this research (Sept 12) — flagged prominently as this pillar's next real catalyst, most acute on the 1mo/3mo win
- **Score decision: P HELD FLAT at 34/33/44/54/60 — FULL WEEKLY REFRESH, left as DRAFT for Alex's manual review (weekly refreshes are categorically excluded from deleg**

Carried forward — what changed in the Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped this morning), for continuity:

- **Re-checked — no new Fed speech or primary data release found since the Sept 11 CPI print.** The Sept 15-16 FOMC meeting remains the next dated catalyst.
- **Logged, not scored:** that morning's coverage of ~90% market-implied September hike odds and Fed Chair Warsh's hawkish framing traced to his Aug 28 Jackson Hole remarks,
- **Score decision: P HELD FLAT at 34/33/44/54/60.** No window moved, master call band unchanged everywhere — **AUTO-STAMPED per delegated daily authority**, the last COM

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — the Aug CPI release (due Sept 11) and the Sept 15-16 FOMC meeting both remained pending per BLS/Fed calendars; no new Fed spe

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked directly against CME FedWatch-citing coverage — September 25bp-hike odds read ~58.7% (as of Sept 7, CNBC/cryptonews), consisten FOMC remain the next dated catalysts.
- **Score decision: HELD FLAT at 32/31/43/54/60 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — no new Fed speech, data release, or FOMC commentary since Sept 3-4. The Sept 11 CPI print and the Sept 15-16 FOM
- **Score decision: HELD FLAT at 32/31/43/54/60 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — no new Fed speech, data release, or FOMC commentary since Sept 3-4 (Waller's dovish-leaning Sept 3 speech and th no data or speeches scheduled. The Sept 11 CPI print remains the next dated catalyst and has not yet landed.
- **Score decision: HELD FLAT at 32/31/43/54/60.** No window moved; nothing this cycle clears the sufficiency bar for a further move in either direction.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- ★ **★ NEW — August jobs report (BLS, primary, Sept 4): nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady 4.1%.** Corroborated by CNBC, Yahoo Fina
- ★ **★ NEW — Sept 15-16 FOMC hike-odds pricing moved higher off the jobs beat** (roughly 60-66% across sources, up from the Sept 2 baseline's "~60% hold" framing); 2yr yield
- **Score decision: RE-CONFIRMED the re-rate at 32/31/43/54/60** (1mo -4, 3mo -4, 6mo -2, 1yr -1, 3yr -1 vs. the Sept 2 TRUE committed baseline) — the fresh, dated, primary-sour from the delegated daily auto-stamp policy, so it went to manual review — **COMMITTED BY ALEX SEPTEMBER 5, 2026**.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug i

Carried forward — what changed in the Sept 3 light daily catch-up (no new score set), for continuity:

- **Re-checked CME FedWatch and the H.4.1/data calendar; nothing material found on any pillar dated Sept 2-3.** config/scores.json untouched; blend re-run against fresh quant d

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **No new H.4.1 or data print found dated Sept 1-2.** September 15-16 FOMC market pricing (CME FedWatch roughly 60% hold) continued the same post-Jackson-Hole drift already P.
- **BTC traded at $76,581.44 on Sept 2** — down from $78,038.78 on Sept 1 (Bitstamp), a real pullback driven by the Iran War Risk escalation covered in that pillar's report, not by an
- **Score decision: HELD FLAT at 36/35/45/55/61.** No window moved for this pillar. This cycle's shared score set (2026-09-02_draft) was originally left as draft — Iran War Risk's sh auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **CME FedWatch September hike odds continued drifting up, not a fresh shock:** ~60.4% (Aug 31 baseline, CNBC) → ~66% (Forbes/KuCoin, 11:40am ET Aug 31) — the same post standing discipline against chasing drift.
- **No new H.4.1 or jobless claims release landed Aug 31-Sept 1** — Aug 31 was Labor Day, a US federal holiday; next H.4.1 is due Sept 3.
- **BTC traded at $78,038.78 on Sept 1** — down from $78,447.16 on Aug 31 (Bitstamp).
- **Score decision: HELD FLAT at 36/35/45/55/61.** Light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority, then the committed

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **CME FedWatch September hike odds continued drifting up, not a fresh shock:** ~56-58% (Aug 29 baseline) → ~57% (CoinSpectator/Bitcoin.com, Aug 30) → ~60.4% (CNBC Ja
- **No new H.4.1 (next due Sept 3, last Aug 27) or jobless claims release landed in this window.**
- **BTC traded at $78,447.16 on Aug 31** — up from $77,666.16 on Aug 29 (Bitstamp).
- **Score decision: HELD FLAT at 36/35/45/55/61.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, now superseded), for continuity:

- ★ **★ ADVERSARIAL CORRECTION — the abandoned Aug 28 draft's CME FedWatch September hike-odds figure was wrong.** Corrected from ~35.4%→~45.7% to the real ~35%-
- ★ **★ CORRECTED — BTC's reaction to the speech.** Not a stable tape: BTC fell from above $81,000 pre-speech to $79,613.44 (Aug 28 close), continuing to $77,666.16 by Aug 29.
- ★ **★ NEW — jobless claims, week ended Aug 22 (DOL, primary, Aug 27): 203K vs. 208K consensus.** Mildly hawkish-adjacent, not independently trigger-worthy.
- ★ **★ NEW — Fed H.4.1, week ended Aug 26 (federalreserve.gov, primary): reserves −$10,351M w/w to $2,924,936M; TGA −$2,876M w/w to $950,736M.** Routine continuation
- **Carried forward, re-confirmed, not re-litigated — Fed Chair Warsh's first Jackson Hole speech as Chair (Aug 28) and July PCE (bea.gov, Aug 26, 3.7% y/y headline, 0.1pp ho**
- **Score re-rate: 43/41/48/56/62 → 36/35/45/55/61** — 1mo -7, 3mo -6, 6mo -3, 1yr -1, 3yr -1, deeper than the abandoned draft's -5/-4/-2/-1/-1 because the corrected market move
- **Status decision:** left as a draft, NOT auto-stamped, and flagged for Alex's manual review — this is a FULL WEEKLY refresh, categorically excluded from delegated daily auto-star

Carried forward — the abandoned Aug 28 catch-up draft (2026-08-28_draft) was written but never rendered, selfchecked, archived, or committed, for continuity:

- **That draft re-rated P to 38/37/46/55/61** on the same Warsh speech and PCE print this cycle re-verifies, using a since-corrected CME odds figure (~45.7%, now corrected to ~5 cycle above.

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity:

- **NEW — FOMC minutes' hawkish bloc wider than previously known:** beyond the three named dissenters, "several participants" also favored a hike and "many participants" saw
- **NEW — 30-year Treasury yield hit 5.31-5.33%, a ~19-year high,** around Aug 17-18, driven substantially by the CBO's raised $2.1T FY deficit projection and heavy long-bond sup
- **NEW — equities sold off Aug 20** (S&P −0.87%, Dow −1.32% partly Walmart-driven, Nasdaq −1%) with a partial Aug 21 recovery, attributed to a mix of the hawkish minutes and ri
- **NEW — CME FedWatch/Kalshi/Polymarket/investing.com/defirate.com independently re-pulled and cross-checked directly:** September-hold odds cluster ~68-70% across a
- **NEW — a circulating "93.6% September hike probability" claim was traced this cycle to a garbled conflation with Kalshi's July-meeting hold odds (~92-93% hold) and confi**
- **Re-confirmed, not new — jobless claims week ended Aug 15: 206K vs. 210K consensus, 4-week average 204K** (DOL, primary, Aug 20) — confirms the low-layoff trend alread
- **Re-confirmed, not new — July retail sales miss (-0.6% m/m vs. +0.1% consensus, still +5.0% y/y)** — a genuine but noisy dovish-leaning counter-signal, per this pillar's discipli
- **Score decision:** P held flat at 43 / 41 / 48 / 56 / 62 — the hawkish minutes detail and the noisy weak retail-sales print largely offset an already-priced rate-odds market; nets to a
- **New pending triggers logged for the next cycle:** PCE (July data, bea.gov) due Aug 26; Chair Warsh's first speech as Chair at Jackson Hole, Aug 28, 10:00am ET, theme "Financi
- **Status decision:** this score set was **left as a draft at delivery, not auto-stamped**, because it is a FULL WEEKLY refresh, categorically excluded from Alex's delegated daily auto-s cycles for self-approval, not weekly refreshes). **COMMITTED BY ALEX August 23, 2026** after independent review.
