

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 14, 2026 (light daily touch off the Aug 13 committed daily baseline — AUTO-STAMPED)

Quant pillar recomputed on today's price. This is a light daily touch — check what's changed since the Aug 13 daily refresh, not a fresh deep-dive. All four qualitative pillars HELD FLAT: nothing found today exceeds what Aug 13 already priced in. CLARITY Act unchanged at 32/47/58/82/92: the Senate remains in August recess, the Sept 15 2:15pm ET cloture vote is unchanged, and no new floor-schedule or ethics-text development was found; conflicting cached Polymarket reads (13-21%) don't reconcile to a single live number and aren't used to move P. Iran War Risk unchanged at 20/28/41/56/77: the Iran-Oman Hormuz deal remains unsigned, stuck on the same compensation/blockade/sanctions dispute; Brent eased to ~\$87-90 as Hormuz traffic stays low — a lower-boil status quo, not a new shock in either direction. Tokenization unchanged at 52/60/66/74/85: rwa.xyz's Aug 9 pull (\$38.17B total RWA TVL, \$16.21B tokenized Treasuries) was reconfirmed with added product-level detail, no new dated catalyst. Fed & Macro unchanged at 43/41/48/56/62: the H.4.1 release this report named as PENDING since Aug 13 has now posted (reserve balances −\$49,290M w/w, TGA +\$56,626M w/w) — directionally the same reserve-drain/TGA-rebuild pattern already priced in, confirmation not a fresh trigger. **This is a routine, well-evidenced daily cycle — no pillar P moved, no call band flipped — so it qualifies for, and has received, Alex's delegated daily auto-stamp authority (in effect since 2026-08-06).** Full score lineage (June committed → every draft through August 14, now committed) preserved in every report.

THE FINAL NUMBER · AUGUST 14, 2026 · EQUAL-WEIGHT MODEL (COMMITTED, AUTO-STAMPED)

+0.67

Mild Bull overall, time-arbitraged — the 1-month window remains Mild Bear, same call band as Aug 13, with every qualitative pillar held flat today. Equal-weight mean of the five window signals (−10 max 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" month window, not a research-driven change — every qualitative pillar was held flat. This reading was auto-stamped under Alex's standing delegated authority for routine daily cycles — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 14, 2026 · BTC \$62,802.46 (Bitcoin, last completed daily close, August 14, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 14 committed set, light daily, auto-stamped)

The Master Table

The whole thesis in five rows, on the August 14 committed set (a light daily touch off the Aug 13 daily baseline). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 13 MASTER	THE CALL
1 month	-1.39	-1.37	Mild Bear — unchanged call band; today's tiny move is quant mapping noise,
3 months	-0.82	-0.82	Mild Bear — the September FOMC still sits inside this window; unchanged too
6 months	+0.31	+0.31	Neutral — CLARITY and Tokenization still carry this window; Iran still drags ha
1 year	+2.14	+2.14	Bull — all five pillars still positive; the thesis window, unmoved
3 years	+3.12	+3.12	Strong Bull — law + adoption + cycle + value, unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). For exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.67 = the equal-weight mean of the five MASTER signals above ((-1.39 - 0.82 + 0.31 + 2.14 + 3.12) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.22**, unchanged.

What moved: nothing on the qualitative side — CLARITY, Iran, Tokenization, and Fed & Macro all held flat after today's research found nothing that exceeds what the Aug 13 set already priced in. H.4.1 trigger fired today and confirmed the existing reading rather than moving it). The only change anywhere is Bitcoin TA's 1-month reading (-0.84 → -0.96), pure mapping noise from today's price action.

FINAL NUMBER moves from +0.68 to +0.67 — invisible at the call-band level. **This is a routine, well-evidenced daily cycle — no pillar P moved, no call band flipped, nothing rests on a single pillar's effect since 2026-08-06) — see My Decision.**

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today.

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — August 14 committed scores, light daily touch (each report shows the full June → ... → August 14 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	−2.45	−0.41	+1.09	+4.61	+6.38	
Iran War Risk (20% · 8)	−2.88	−2.29	−1.01	+0.62	+2.38	
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	
Fed & Macro (20% · 8)	−0.95	−1.22	−0.26	+0.72	+1.25	
Bitcoin TA — quant (20% · 8)	−0.96	−1.57	−0.44	+1.73	+1.68	
MASTER — mean of the five	−1.39	−0.82	+0.31	+2.14	+3.12	

P lineage (June → Jul 8 → ... → Aug 10 → 11 → 12 → 13 → 14) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 10, committed) → 32/47/58/82/92 (Aug 11, committed) → 32/47/58/82/92 (Aug 12, committed) → 40/47/55/70/83 → ... → 20/28/41/56/77 (Aug 10) → 20/28/41/56/77 (Aug 11) → 20/28/41/56/77 (Aug 12) → 20/28/41/56/77 (Aug 13) → **20/28/41/56/77** (Aug 14, committed — held flat) · Tokenization 53/57/62/72/85 → 52/56/62/72/85 → **52/60/66/74/85** (Aug 14, committed — held flat) · Fed 38/40/46/54/61 → 35/36/42/52/61 → ... → 40/38/47/55/62 (Aug 10) → 40/38/47/55/62 (Aug 11) → 40/38/47/55/62 (Aug 12) → 43/41/48/56/62 (Aug 13, re-rated up on CPI/clause) → 40/37/45/68/70 (Aug 10) → 40/36/45/68/70 (Aug 11) → 39/36/45/68/70 (Aug 12) → 43/36/45/68/71 (Aug 13) → **42/36/45/68/71** (Aug 14 — 1mo P nudged 43→42 on mapping noise). Impact remains a uniform **8** for every pillar and is preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on August 14, 2026, light daily touch (comparisons below are vs. the Aug 13 committed baseline)

- 1 month — Mild Bear (−1.39, was −1.37).** All four qualitative pillars held flat: Fed & Macro (−0.95), Iran War Risk (−2.88), CLARITY (−2.45), Tokenization (+0.29) all unchanged from Aug 13. (BTC \$62,802.46, −1.5% vs Aug 13) — noise, not a research signal. Nothing found in today's research exceeded the Aug 13 baseline.
- 3 months — Mild Bear (−0.82, unchanged).** CLARITY (−0.41), Iran (−2.29), Tokenization (+1.41), Fed (−1.22), and Bitcoin TA (−1.57) all held.
- 6 months — Neutral (+0.31, unchanged).** Tokenization (+2.18), CLARITY (+1.09), Fed (−0.26), Iran (−1.01), and Bitcoin TA (−0.44) all held. Historical average cycle bottom (~Aug 31, cycle month 27.8) passes.
- 1 year — Bull (+2.14, unchanged).** All five pillars still positive and unchanged: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.72, Iran +0.62. Price sits 54% below power-law fair value.
- 3 years — Strong Bull (+3.12, unchanged).** Every pillar positive and unchanged: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.68, Fed +1.25. A quiet news day, by design, doing nothing.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) held their Aug 13 relationship almost exactly: P 43/41/48/56/62 vs 42/36/45/68/71 (1mo TA P nudged 43→42 on mapping noise, immediate impact) — worst 1-month signal in the set (−2.88), followed by CLARITY (−2.45, the cloture vote itself sits outside this window) — two independent stories (an unresolved, still-unsigned Hormuz/regional dispute) dovish read.

THE REAL DISAGREEMENT

Near-term: Tokenization is still the strongest near-term pillar (P 52); Fed & Macro sits at P 43, past a coin flip on the bear side; CLARITY remains below a coin flip (P 32) with the cloture vote still pending (the hardening but still-unsigned Hormuz dispute) found nothing to move it either direction. The master resolves it honestly: Mild Bear at 1 month, unchanged in call band from Aug 13.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.68 — still roughly 2.1× higher. Remember, Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

One named trigger fired today (Fed H.4.1) and confirmed rather than moved the score. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT
FIRED Aug 13, 4:30pm ET	Fed H.4.1 balance-sheet release, week ended Aug 12: reserve balances −\$49,290M w/w to \$2,944,059M, TGA +\$56,626M w/w to \$963,950M
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; Senate remains in August recess, no new floor-schedule or ethics-text development found
Checked, unchanged	Hormuz deal remains unsigned; Iran-Oman-US talks remain stuck on the same compensation/blockade/sanctions demands; Brent eased to ~\$87-90 as Hormuz traffic stays low
Checked, not found	No new dated RWA/tokenization catalyst beyond the Aug 9 rwa.xyz pull, reconfirmed with added product-level detail
Aug 20	Next Fed H.4.1 balance-sheet release and next weekly jobless-claims print (week ending Aug 15)
Sept 15	First CLARITY Act procedural (cloture) vote, precisely dated 2:15pm ET; zero confirmed Democratic yes votes as of Aug 14
Pending	Actual signing of a Hormuz agreement the US accepts — the compensation/blockade/sanctions disputes (Iran wants US amends, asset unfreezing, sanctions relief; US wants Iran to pay) are the thing to watch, not either side's unilateral announcements
September	Next FOMC (with SEP/dot plot), week of Sept 15 — Senate returns from recess the same week
~Aug 31	Historical average cycle-bottom month (cycle month 27.8 currently) passes
Power-law fair value \$137,560	BTC \$62,802.46 sits 54% below fair value

The master flip line, unchanged from Aug 13: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, the conflict widening to a further new state, or a sustained Brent close above \$ or the Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just routine daily noise. A signed (weekly close under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WEIGHTED)
— drop CLARITY Act	+0.38
— drop Iran War Risk	+1.00
— drop Tokenization RWA	+0.30
— drop Fed & Macro	+0.86
— drop Bitcoin TA	+0.82
all five in (headline)	+0.67

Every leave-one-out final number stays **positive** (+0.30 to +1.00) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-positive near-term pillars) still round down to **Neutral** (likewise round to Neutral, not Mild Bull as that day's prose stated; corrected here). The horizon-weighted final (+1.22) is more robust and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more** pillars are load-bearing, only nudged every leave-one-out figure by about −0.01 from the Bitcoin TA mapping noise. This robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues

My Decision

✓ **COMMITTED — AUGUST 14, 2026 (LIGHT DAILY TOUCH) · STAMPED BY ALEX (AUTO-STAMPED)**

MASTER: −1.39 / −0.82 / +0.31 / +2.14 / +3.12 · THE FINAL NUMBER: +0.67 (Mild Bull, time-arbitraged, committed)

This is a light daily touch off the Aug 13 committed daily baseline — checking what's changed since Aug 13, not re-litigating it from scratch. All four qualitative pillars HELD FLAT: nothing found today except recess, the cloture vote remains dated 2:15pm ET Tuesday, Sept 15, and no new floor-schedule or ethics-text development was found (Davis Wright Tremaine, CoinDesk, Bitcoin Foundation, Motley Fool, Yahoo Finance, Polymarket reads (13%, 16%, 21% across different outlets/dates) don't reconcile to one live number and sit within noise of the ~15.5% already carried — per the sufficiency rule this sentiment-only reading is 20/28/41/56/77: the Iran-Oman Hormuz deal remains unsigned as of Aug 13 (Reuters, US News, NBC, Washington Post, Al Jazeera, The Hill all re-checked) — the same stalled-on-compensation dispute already resolved, relief; Trump counter-demanding compensation for war deaths/damages across Iran, Lebanon, Syria, Yemen, and Gaza), a hardening of an existing dispute rather than a fresh escalation or breakthrough; Bitcoin TA (no closure per a live tracker) — a lower-boil, still-closed status quo. Tokenization held at 52/60/66/74/85: rwa.xyz's Aug 9 pull (\$38.17B total RWA TVL, \$16.21B tokenized Treasuries across 87 products/63,010 airdrops) was reconfirmed with added product-level detail but no new dated catalyst. Fed & Macro held at 43/41/48/56/62: the Fed H.4.1 release (week ended Aug 12, federalreserve.gov primary, published 4:30pm ET) showed \$49,290M w/w to \$2,944,059M against a \$56,626M TGA rebuild to \$963,950M — directionally the same reserve-drain/TGA-rebuild pattern already priced into this pillar's recent baselines, so this is confirmation. Bitcoin TA's ended-Aug-8 figure already incorporated into the Aug 13 re-rate (next claims release is Aug 20). The only change anywhere is Bitcoin TA's computed 1-month reading (mapping noise on today's \$62,802.46 to +0.68 to +0.67 — invisible at the call-band level. **This is exactly the kind of routine, well-evidenced daily cycle the runbook's delegated auto-stamp authority (in effect since 2026-08-06) exists for and is stamped rather than left for manual review.** The robustness check remains a standing yellow flag, not a rubber stamp: dropping CLARITY or Tokenization still rounds the call down to Neutral — the headline call calendar is dense: Aug 20 hosts the next H.4.1 and jobless-claims prints, Sept 15 now hosts both the FOMC week and the first CLARITY cloture vote, and continued Hormuz shipping attacks or an actual sign of escalation.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that this call is auto-stamped under Alex's standing delegated authority, so it is the system's official stamped position.
