Tokenization of Real-World Assets Pillar Report

Real Money On-Chain — Researched, Scored, and Personally Committed

*Originally written **June 19, 2026**; scores committed by me on **June 19, 2026**. Re-researched July 8, 13, 18, 25, and 30, 2026 against live primary sources, and again as a full weekly refresh on August 8, 2026 (nudged up at 3mo/6mo on a new RWA all-time high and two missed catalysts, committed and stamped by Alex). Held flat through the Aug 9-16 daily touches, all auto-stamped committed. Drafts written Aug 17, Aug 18, and Aug 20 were never delivered (no report/render/archive/commit followed for any of them), and an Aug 21 session began delivering the Aug 20 numbers into only two of six reports before stopping — also never finished or committed. **This version (August 22) does not take any of those abandoned drafts at face value — it independently re-verifies through a dedicated primary-source research pass and HOLDS FLAT at 52/60/66/74/85** — the rwa.xyz total-value print remains essentially unchanged (and Treasuries-specific value is confirmed distinct from the all-category total, this pillar's known mislabeling trap), the SEC's newly proposed "Regulation Crypto Assets" (Aug 18-19) is scoped to new-token capital formation rather than RWA tokenization and doesn't clear this pillar's bar, and the tokenized-stock innovation exemption this pillar is watching remains delayed/exploratory with no new dated progress. **This pillar's own evidence is clean and would have qualified for Alex's standing daily auto-stamp on its own** — but the **overall Aug 22 score set is left as a DRAFT, flagged for Alex's manual review**, because a dedicated adversarial fact-check this cycle found that the Iran War Risk pillar's report contained a materially false claim (a "first confirmed fatality" framing that was actually roughly the 18th such death) that the original research pass missed; see My Decision below. **A second, deeper session ran later the same day.** With that Aug 22 catch-up draft already delivered — rendered, archived, and git-committed — house rules require a new dated set rather than an in-place edit, so this full weekly refresh (the first since Aug 8) is scored as **2026-08-22_draft2**. Draft2 independently re-confirms the hold at 52/60/66/74/85 through fresh primary-source research, including a direct sec.gov check of a newly issued Franklin Templeton no-action letter (Aug 12) and a since-canceled (not merely delayed) SEC tokenized-equity "innovation exemption" meeting (Aug 13-15 reporting) — the two roughly offset and neither alone clears this pillar's bar. Draft2 was left as draft at delivery — this time because a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority, regardless of how clean the evidence is — **COMMITTED BY ALEX August 23, 2026** after independent review. **A daily catch-up draft dated August 28, 2026** (score set 2026-08-28_draft) was written — a direct rwa.xyz re-pull showing total distributed value $38.69B (+3.04%/30d) and tokenized Treasuries $16.00B (-0.93%/30d), both continuing trend — but it was never rendered, selfchecked, archived, or git-committed, and sits abandoned, superseded the same way this report has always treated interrupted prior sessions. **This version (August 29) does not take that abandoned draft at face value** — it runs a fresh, independent full-weekly primary-source pass and again HOLDS FLAT at 52/60/66/74/85, scored as **2026-08-29_draft**. The week's one genuine new development is **Coinbase's August 24 launch of tokenized-stock trading (NVDAc/METAc/AAPLc/GOOGLc — Nvidia, Meta, Apple, Alphabet) on its own Base blockchain**, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026 — confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25, but eligible to **non-US users only**, the exact same structural limitation this report already established (the "Robinhood Chain precedent") as insufficient alone to move P. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25, whose stated use cases touch RWA settlement) is logged as tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check this window, and DTCC's October 2026 and Nasdaq's December 6, 2026 targets are both*

Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May). This is precisely the trigger this report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting, which explicitly said "a formally re-scheduled meeting or published framework would matter" — a published framework is now exactly what happened, and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain, Coinbase's Base launch — both non-US-only), it is a US federal regulator directly authorizing on-chain tokenized-stock trading domestically, the specific structural ceiling this pillar's Other Side section had repeatedly flagged. Sizing front-loaded (1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1) because the exemption is in effect now and immediately actionable, with diminishing effect further out since the 3yr window was already near its practical ceiling and the exemption itself is temporary/conditional and sunsets in 5 years pending further Commission action — an honest counterweight, not a permanent rule, and no venue has yet announced it is live under the exemption as of this research pass. Quant (fully computed, unchanged methodology): P 59/54/59/68/69, BTC $78,046.80 (2026-09-18). Light daily touch, research capability fully available (WebSearch functioned normally; sec.gov and the Commissioner statement were both directly verifiable), verification passed clean —* ***COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026*** *per the delegated daily auto-stamp authority, under which neither the size of the move nor a call-band flip withholds the stamp on their own.*

Me: RE-RATING UP, 52/60/66/74/85 → 58/65/70/77/86. The SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary, plus Commissioner Uyeda's statement, via permissioned AMMs — for the first time, this is US-domestic access, not another geography-restricted launch. It's exactly the trigger this report's own trigger table has been wat now and immediately actionable, but I'm deliberately not treating it as a permanent regime change: it's temporary, conditional, sunsets in five years pending further Commission acti development this pillar has logged all cycle — the honest read is "the ceiling cracked," not "the ceiling is gone."

The Aug 29 full weekly dive (still the last full re-dig): a dedicated primary-source pass found one genuine, multi-sourced development that week (Coinbase's Base tokenized-stock SEC rulemaking dated Aug 22-29, and unchanged DTCC/Nasdaq timelines. An Aug 28 daily catch-up draft was written but never delivered and was not taken at face value. 52/60/66

My edge: this pillar's discipline is to notice when institutions actually ship product accessible to the broad market this pillar scores, not just when they announce intent or ship into a secondary sources dressed up as primary ones. Today, for the first time, that discipline cuts the other way: the SEC's Innovation Exemption is exactly the "actually ships to the broad 12mo/36mo move least, not because the GENIUS Act headwind changed, but because the exemption itself is temporary/conditional and those horizons were already close to this pill

★ NEW THIS CYCLE — THE WEEK OF OCTOBER 3 – 10, 2026

★ THE CYCLE'S DRIVER — OKX and ICE file to launch a Tokenized Securities Venue, Oct 4, 2026. OKX and Intercontinental Exchange (ICE, NYSE's parent) formed a 50/50 joint September 17, 2026 Innovation Exemption. The filing covers **60+ US-listed stocks** (several sources specifically say **63**) paired against stablecoins (USDC/USDG/USDT) via permi permissioning hook layered on top (the **"OKXICE TSV Hook"**) — no central limit order book. Adversarially verified nearly point-for-point across independent outlets not used in th notice PDF. **One phrasing softened on verification:** several of these sources note the AMM pools' administrative/pause/upgrade keys sit with an OKX Technology affiliate, so the

★ Cerebras Systems exercises the exemption's issuer opt-out — the first reported real-world use. Cerebras Systems filed a written objection to having its own stock included meaning the framework is now genuinely being used on both sides: a venue filing an Issuer Notice, and an issuer blocking inclusion. Under the exemption's 30-day issuer-notice independently reported. **As of October 10, 2026, OKXICE is NOT yet live.**

★ DTCC's Tokenization Service remains NOT CONFIRMED LIVE — and a single filer's claim to the contrary is EXCLUDED. Direct dtcc.com access was blocked in the research s the July 15, 2026 pilot-milestone one, and "expected October 2026" is the latest confirmed framing. **One company, Black Titan Corp, filed an SEC Form 6-K characterizing the s** by independent reporting as a full-launch confirmation. Per the sufficiency rule, this is **EXCLUDED** and is not adopted as fact anywhere in this report.

A search-derived figure this cycle (~**$14.95B** distributed value, **−5.91%** over 30 days, **109 assets**, products," then "25 assets," now "109 assets." None of these are apples-to-apples with each other. WITHDRAWN this cycle — the "fourth consecutive negative reading" framing, and the trigger claim built on it. Adversarial verification found three defects. (1) A **denominator c** scope *redefinition by the aggregator*, not a market event, so the four readings are not apples-to-apples. (2) The Aug 28–29 reading was **never independently confirmed** — app.r between Aug 29 and Sept 26 means "fourth consecutive" is fourth consecutive *observation*, not a continuous streak — and most of the $15.98B → $14.77B decline happened insi **consecutive negative" trigger cannot be treated as cleanly fired on a redefined series.**

★ THE DECISIVE NEGATIVE FINDING — DTCC's tokenization service has NOT launched. dtcc.com's own tokenization page is forward-looking as of today: "paving the way for t ("DTCC Turns Tokenization into Reality"), which says the production-trade milestone "sets the stage for the DTCC Tokenization Service to launch in October 2026." Its most recen mention of the service's launch status. **Corrected detail:** the July production trades involved "more than 30 firms," not 50+; the 50+ industry-working-group figure comes from th **not scored** — contracting flow against an unrealised catalyst is precisely the 1-month cut.

★ CORRECTED, and it is a genuine positive this report had wrong: GENIUS is no longer zero-of-six. Treasury issued the **first binding GENIUS rulemaking on Sept 30, 2026** — effective on publication and therefore binding law, though not a concluded notice-and-comment final rule. The honest formulation, replacing the old line: *no GENIUS rulemaking h* 91 FR 61580, both Sept 29) and Treasury's Section 3 NPRM (91 FR 53368) still proposed. **This is a principal reason the 6-month cut was withdrawn.** Also logged: Centrifuge brin

CORRECTED — the SEC order's "30-day" mechanic was mis-described in the prior version. Structural anchors re-verified from primary documents, which is why 12mo and 36mo hold. The **CFTC's Sept 24 FAQ**, extracted and read directly from cftc.gov/media/14671, is "Yes, so long as..." on whether an FCM or DCO may invest customer funds in tokenized forms of otherwise-permitted Regulation 1.25 investments, subject to exactly **four** conditio

★ **FIRST OFFSET — PRIMARY: the CFTC opens the door to tokenized customer collateral, Sept 24, 2026.** The Crypto Asset / Blockchain FAQ update, marked "NEW 9/24/2026," **Clearing and Risk** (an earlier pass named only two; corrected). New **Q12** asks "May an FCM or DCO invest customer funds in tokenized forms of otherwise permitted investments rights "the same or functionally equivalent"; all 1.25 liquidity, concentration and time-to-maturity terms are met; and the assets sit with an acceptable depository. **Why this is the c** flow just contracted. ★ **SECOND OFFSET — the NYSE Group / Blockchain.com MOU, Sept 23, 2026, 9:00am ET. Real, and explicitly NOT the live-venue trigger.** A non-binding memorandum of und **"subject to any required regulatory approvals,"** plus bidirectional market-data distribution via ICE Data Services to Blockchain.com's 44M+ confirmed accounts. The live-venue trigger DID NOT FIRE. No Tokenized Securities Venue is live, or announced as live, as of Sept 26. The exemption's own mechanic still gates it: a prospective venu earliest third-party-tokenized NMS trade around **mid-October**. The widely-circulated "89% of tokenized RWAs remain idle" f property-platform liquidation and a credit-protocol shutdown consists of **undated 2026 retrospectives, not events in this window**, and is deliberately not logged as new.

Unchanged, and re-verified as unchanged: the GENIUS Act still has **zero of six** agencies finalized, with the statutory backstop the earlier of Jan 18, 2027 or 120 days after final r **IS FLAGGED RATHER THAN REQUOTED:** this report's "Nasdaq Dec 6, 2026" tokenized-trading date *could not be re-verified from any source* this pass, and may be a conflation w launch remains slated but rests on **secondary reporting only** this cycle, so it is carried as unchanged *and unconfirmed*.

★ ★ **No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17, 2026 "Innovation Exemption."** A structural detail worth logging: for any NMS stock to the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18). Since the exemp window from today. This is a reason for near-term caution baked into keeping 1mo modest (58), not a reason to cut it further.

The Prize

Illustrative only — not price targets, not advice

The cleanest single-token anchor is still **ONDO**, the name most tied to the RWA narrative: from its early-trading price around **$0.22 (Jan 2024** — listing prints vary by venue**)** it ra

The round-trip, last checked July 13 (CoinGecko, not re-pulled live this cycle): **$0.3291** — market cap ~$1.6B, still ~85% below the high — even as the company keeps extending was a Trump-linked World Liberty Financial buy, not fundamentals. The durable signal stays structural, not one token: total RWA distributed value sits near its all-time high (rwa.xy categories now each exceed $1B) and tokenized Treasuries last confirmed near $16.00B (-0.93%/30d, a second consecutive slightly-negative reading as of Aug 28, still sub-1% a cycle — BlackRock's Aug 3 fund launch, Franklin Templeton's Aug 12 no-action letter, Coinbase's Aug 24 tokenized-stock launch on Base (non-US only), DTCC's October 2026 fu for the first time — are exactly the kind of adoption proof points that outlast any single token's price, even where each individually (until today) fell short of this pillar's sufficiency backdrop, not as investment guidance. The Prize doesn't feed the math — it tells you what the lean is worth acting on, euphoria and round-trip included.

The Other Side

The strongest honest case this is wrong — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; still valid, plus one new item below on the exemption's own timing mechanic)

- ★ **Partly answered today, worth stating plainly: the "non-US-only ceiling" critique this section has raised three separate times (BlackRock funds, Robinhood Chain, Coinbas** conditional (public-notice/transparency/safeguard conditions, sunsets pending further Commission action), and as of this research pass no venue has actually announced it is liv disappeared; this pillar will be watching for an actual live US venue as the next real trigger.
- **The data-access gap flagged repeatedly this cycle (rwa.xyz 403s) is a real weakness that predates today's re-rate** and wasn't resolved by it — this pillar's core primary growt
- **Tokenized Treasuries posted two consecutive negative 30-day readings in late August** (-0.39% Aug 22, then -0.93% Aug 28) — still sub-1% each and not independently reco
- **Coinbase's tokenized-stock launch, and the pattern before today, is easy to overstate in hindsight.** Nine-plus outlets covered it and there's a real regulatory permission behind Robinhood Chain, then Coinbase) that didn't actually reach the US market. Today's exemption is the first to change that pattern, but it is one day old.
- **An Ondo Stocks milestone from Aug 15 was missed for two full cycles.** That's a real research-process miss, caught only in hindsight — a reminder that "no new catalyst found"
- **Regulatory limbo is still real.** The GENIUS Act's rulemaking deadline was missed and zero of six agencies have finalized rules; the CIP comment window closed Aug 21 but produ activity rather than de-risk it. The SEC's tokenized-equity exemption meeting remains canceled with no rescheduled date as of Aug 29.
- **The RWA totals are still a small, largely institutional/permissioned number.** ~$38-39B in total distributed value is real growth, but it's still under 1% of the BCG×Ripple $9.4T-by numbers in this space need active skepticism, not just repetition.
- **It may not be "crypto."** Most volume is permissioned/institutional and may never accrue value to crypto majors. Durable market-structure law (CLARITY) still isn't passed — a rer break a routine hold.
- ★ **NEW this cycle — the exemption's own 30-day issuer-notice-and-objection mechanic is a real structural brake, not a footnote.** Any NMS stock tokenized by an unaffiliated meaning the earliest a third-party-tokenized NMS stock could legally trade under the exemption is roughly mid-October, and issuers that object can delay indefinitely. This is exa Better Markets' public pushback (Sept 2026) is the expected institutional friction this section anticipated — worth watching for an actual lawsuit or stay, which would be a materia

Adversarially verified nearly point-for-point across indepen own hosted notice PDF. **One phrasing softened on verification:** the venue is described here as *non-custodial of end-user funds held in the AMM pools* rather than a flat "no custody of partic user funds but not fully ownerless. **Separately and also verified: Cerebras Systems filed a written objection to having its stock included on the venue** — the first reported real-world exercis not just theoretically. Under the exemption's 30-day issuer-notice mechanic, the earliest plausible live-trading date is roughly **early November 2026** (an inference from the Oct 4 filing date, n real exercise of the Sept exemption on both sides) even though nothing is live yet and DTCC remains unconfirmed — a nudge, not a re-rate; 6mo/12mo/36mo HOLD, since nothing here chang October launch "expected," and its most recent service-specific release remains July 15; a single filer's SEC Form 6-K (Black Titan Corp) characterizing it as "live in production since July" wit **straight cycle** — a search-derived figure (~$14.95B distributed value, −5.91%/30d, 109 assets, ~86,221 holders) surfaces yet a THIRD distinct methodology/scope basis this year (87 products over-period comparisons of rwa.xyz's asset/product counts should be treated as unreliable until its methodology is confirmed stable, with holder-count and dollar-value direction (only, with e commentary, Crypto Briefing) now converge on **H1/Q2 2027** for Nasdaq tokenized-equity trading, strengthening this pillar's existing skepticism of the circulating "Nasdaq Dec 6, 2026" date in 2026, not yet closed); no new tokenized-RWA rail failure, stablecoin depeg, or redemption run found. **Research capability fully available this cycle (two independent passes: one research, o from Alex's delegated daily auto-stamp authority regardless of evidence quality or move size — LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW,** as score set **2026-10-10_draft**, alo

Oct 3 FULL WEEKLY refresh (score set 2026-10-03_draft2), prior version: CUT on 1mo and 3mo, 57/65/70/77/86 → 56/64/70/77/86 (−1/−1/0/0/0). Tokenized US Treasuries fell again on a lik launch — was confirmed **NOT live** (dtcc.com's own page still called it "expected"). This move was deliberately reduced from a first-pass −2/−1/−1 after adversarial verification undermined par assets, so the series was not apples-to-apples; verification also found a positive this pillar had wrong — GENIUS is no longer zero-of-six. **LEFT AS DRAFT at delivery — AWAITING ALEX'S ST** 2026-10-03_draft weekly (see The Scores section) remains outstanding and is carried forward, unresolved, into this version.

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — CUT one point on 1mo, 58/65/70/77/86 → 57/65/70/77/86, and this REVERSES the abandoned Sept 24 draft would be a genuine trend worth re-rating on." It got one: a direct rwa.xyz pull this cycle — which also **resolves the Sept 19 data gap** and retires the carried "~$39.2B as of Sept 8" figure — sh magnitude. Acting on a pre-committed trigger is the entire point of writing one down, so 1mo takes −1. **Why the abandoned Sept 24 draft was asymmetric, not merely early:** it took *+1* on 1mo verified to its primary artifact — but it is non-binding, "subject to any required regulatory approvals," the ATS is not live, no launch date or terms were disclosed, and no NYSE- or ICE-issued re explicitly not that. **Why only one point, and why the other four windows hold:** two genuine positives offset the contraction. The larger is the CFTC's Sept 24 FAQ update — primary, PDF extra channel aimed at precisely the tokenized-Treasury and money-market product whose flow just fell; and whose Q15 contemplates *public and permissionless* chains for regulatory recordkeepin as the leading candidates to move this pillar next cycle. **Honest limits on the number driving the cut:** the −6.95% magnitude is single-aggregator — corroborated in direction and rough level b as a number rather than dressed in a narrative. **Stamp decision: COMMITTED BY ALEX, September 27, 2026, after his own manual review** — full weekly refreshes are categorically excluded

It proposed 58/65/70/77/86 → 59/66/7 was never advanced past `draft`. **Its factual claim about the NYSE MOU held up on re-verification; its judgement did not** — it counted the MOU as a positive while a pre-committed downwar **memorandum of understanding, announced Sept 23, 2026**, under which Blockchain.com users would get access to tokenized US-listed stocks and ETFs on NYSE's planned digital alternativ Services. Named executives on record: Peter Smith, Blockchain.com CEO ("Connecting to the NYSE digital ATS will enable us to extend the opportunity to invest in these digital assets to tens Decrypt, PYMNTS, Bitcoin Magazine, Cointelegraph, Benzinga, CryptoTimes, Blockhead) — comfortably clearing the sufficiency bar. **Why this is worth a point:** it is the first named major-exch attracting institutional uptake rather than sitting unused on the books. **Why only one point, and only on 1mo/3mo:** it is a non-binding MOU; the NYSE digital ATS is not live; required regulatory read, and this report adopts it rather than talking around it. The Sept 18 set's own counterweight named "an actual live venue announcement" as the next real trigger — this is not that, so 6mo, than a rule or a transaction, and is not used. **Stamp decision: AUTO-STAMPED** — ordinary light daily touch, research capability fully available, sourcing clears the sufficiency rule, verification

Sept 23 LIGHT DAILY touch (score set 2026-09-23_draft), prior version: checked for changes since the Sept 22 committed baseline. One dated item found: CFTC Chairman Michael Selig, sp use as core market plumbing — corroborated by 6+ independent outlets (The Block, KuCoin News, CoinCentral, Crypto-Economy, CoinGabbar, Blockonomi). This is a rhetorical/tone signal fro GENIUS Act rule; no new DTCC or Nasdaq tokenization timeline news found; no tokenized-treasury depeg or counterparty incident found. **P HELD FLAT at 58/65/70/77/86.** This is an ordinary **per the runbook's delegated daily authority.** Iran War Risk is the only pillar that moved this cycle — see that report.

Sept 19 FULL WEEKLY refresh (score set 2026-09-19_draft), prior version: independently re-verified via extensive WebSearch (11 queries) — no Tokenized Securities Venue has announced minimum 30 calendar days before trading can start (with the issuer able to object and block it outright), making mid-October the earliest realistic date for a third-party-tokenized NMS stock to caution already baked into the modest 1mo score, not a reason to cut it further. SIFMA issued a public statement (sifma.org, primary) raising fragmentation/investor-protection concerns and u not new negative information. DTCC's October 2026 full-service launch remains slated per its own May/July press materials, unconfirmed this week either way. On-chain tokenized-equity hol confirmation of the exemption's own uptake. **DATA GAP FLAGGED, not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures ($38. independently verified figure (~$39.2B, Sept 8) rather than report an unreliable number.
