

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 11, 2026 (light daily touch off the Aug 10 committed daily baseline — AUTO-STAMPED)

Quant pillar recomputed on today's price. This is a light daily touch — check what's changed since the Aug 10 daily refresh, not a fresh deep-dive. All four qualitative pillars HELD FLAT: nothing found today exceeds what Aug 10 already priced in. CLARITY Act unchanged at 32/47/58/82/92: the Senate remains in August recess, the Sept 15 2:15pm ET cloture vote is unchanged, and no new floor-schedule or ethics-text development was found. Iran War Risk unchanged at 20/28/41/56/77: research surfaced a Houthis drone strike on Saudi Aramco's Jazan refinery (Aug 9, no injuries, fire extinguished same-day, six independent outlets) that the Aug 10 check had missed, but assessed it as continuation, not escalation, comparable to the Aug 8 ADNOC tanker hit — the Hormuz deal itself remains unsigned. Tokenization unchanged at 52/60/66/74/85: no new dated catalyst found beyond generic 2026 market-sizing coverage. Fed & Macro unchanged at 40/38/47/55/62: no new H.4.1 or BLS release since Aug 8 — the Aug 12 CPI print flagged as the real September decider is still pending. **This is a routine, well-evidenced daily cycle — no pillar P moved, no call band flipped — so it qualifies for, and has received, Alex's delegated daily auto-stamp authority (in effect since 2026-08-06).** Full score lineage (June committed → every draft through August 11, now committed) preserved in every report.

THE FINAL NUMBER · AUGUST 11, 2026 · EQUAL-WEIGHT MODEL (COMMITTED, AUTO-STAMPED)

+0.62

Mild Bull overall, time-arbitraged — the 1-month window remains outright Bear, same call band as Aug 10, with every qualitative pillar held flat today. Equal-weight mean of the five window signals (–10 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years). The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" month window, not a research-driven change — every qualitative pillar was held flat. This reading was auto-stamped under Alex's standing delegated authority for routine daily cycles — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 11, 2026 · BTC \$64,355.00 (Bitstamp, last completed daily close, August 11, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 11 committed set, light daily, auto-stamped)

The Master Table

The whole thesis in five rows, on the August 11 committed set (a light daily touch off the Aug 10 daily baseline). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 10 MASTER	THE CALL
1 month	-1.52	-1.52	Bear — unchanged; all four qualitative pillars held flat today
3 months	-0.90	-0.88	Mild Bear — the September FOMC still sits inside this window; today's tiny move is quant mapping
6 months	+0.29	+0.29	Neutral — CLARITY and Tokenization still carry this window; Iran still drags harder
1 year	+2.11	+2.11	Bull — all five pillars still positive; the thesis window, unmoved
3 years	+3.11	+3.11	Strong Bull — law + adoption + cycle + value, unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). For exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.62 = the equal-weight mean of the five MASTER signals above ((-1.52 - 0.90 + 0.29 + 2.11 + 3.11) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.18**, unchanged today. What moved: nothing on the qualitative side — CLARITY, Iran, Tokenization, and Fed & Macro all held flat after today's research found nothing that exceeds what the Aug 10 set already priced in. TA's 3-month reading (-1.46 → -1.57), pure mapping noise from today's BTC close (\$64,355.00, -1.1% vs Aug 10), which nudges MASTER 3mo from -0.88 to -0.90 while THE FINAL NUMBER flipped, nothing rests on a single-source claim — so it was auto-stamped under Alex's standing delegated daily authority (in effect since 2026-08-06) — see My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today.

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — August 11 committed scores, light daily touch (each report shows the full June → ... → August 11 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	−2.45	−0.41	+1.09	+4.61	+6.38	
Iran War Risk (20% · 8)	−2.88	−2.29	−1.01	+0.62	+2.38	
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	
Fed & Macro (20% · 8)	−1.36	−1.63	−0.38	+0.60	+1.25	
Bitcoin TA — quant (20% · 8)	−1.20	−1.57	−0.44	+1.73	+1.60	
MASTER — mean of the five	−1.52	−0.90	+0.29	+2.11	+3.11	

P lineage (June → Jul 8 → ... → Aug 7 → 8 → 9 → 10 → 11) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/44/58/82/92 (Aug 7, committed) → 32/47/58/82/92 (Aug 8, committed, full weekly) → 32/47/58/82/92 (Aug 9, committed, full weekly) · Iran 50/55/62/75/85 → 40/47/55/70/83 → ... → 24/31/41/56/77 (Aug 7, committed) → 20/28/41/56/77 (Aug 8, committed, full weekly) → 20/28/41/56/77 (Aug 9, committed, light daily) → 20/28/41/56/77 (Aug 10, committed, light daily) → 52/59/65/74/85 (Aug 7, committed) → 52/60/66/74/85 (Aug 8, committed, full weekly) → 52/60/66/74/85 (Aug 9, committed, light daily) → 52/60/66/74/85 (Aug 10, committed, light daily) → **52/60/66/74/85** (Aug 11, committed, full weekly) → 40/38/47/55/62 (Aug 9, committed, light daily) → 40/38/47/55/62 (Aug 10, committed, light daily) → **40/38/47/55/62** (Aug 11, committed, light daily — held flat) · Bitcoin TA (computed each run) 37 → **40/36/45/68/70** (Aug 11 — 3mo P nudged 37→36 on mapping noise). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June 11.

The Story, Window by Window

What the blend is saying on August 11, 2026, light daily touch (comparisons below are vs. the Aug 10 committed baseline)

- 1 month — Bear (−1.52, unchanged).** All four qualitative pillars held flat: Fed & Macro (−1.36), Iran War Risk (−2.88), CLARITY (−2.45), Tokenization (+0.29) all unchanged from Aug 10. Bitcoin TA (−1.57) unchanged.
- 3 months — Mild Bear (−0.90, was −0.88).** The only mover anywhere: Bitcoin TA's computed reading ticked from −1.46 to −1.57 on today's mapping (BTC \$64,355.00, −1.1% vs Aug 10) — unchanged from Aug 9.
- 6 months — Neutral (+0.29, unchanged).** Tokenization (+2.18), CLARITY (+1.09), Fed (−0.38), Iran (−1.01), and Bitcoin TA (−0.44) all held. Historical average cycle bottom (~Aug 31, cycle month 27.7) passes.
- 1 year — Bull (+2.11, unchanged).** All five pillars still positive and unchanged: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.60, Iran +0.62. Price sits 53% below power-law fair value.
- 3 years — Strong Bull (+3.11, unchanged).** Every pillar positive and unchanged: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.60, Fed +1.25. A quiet news day, by design, doing nothing.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) held their Aug 10 relationship almost exactly: P 40/38/47/55/62 vs 40/36/45/68/70 (3mo TA P nudged 37→36 on mapping noise, immediate change) — the worst 1-month signal in the set (−2.88), followed by CLARITY (−2.45, the cloture vote itself sits outside this window) — two independent stories (an unresolved, still-unsigned Hormuz/regime change deal) — its late-July lows.

THE REAL DISAGREEMENT

Near-term: Tokenization is still the strongest near-term pillar (P 52); Fed & Macro sits roughly at a coin flip (P 40); CLARITY remains below a coin flip (P 32) with the cloture vote still five-plus weeks away. The escalation refinery strike, still-unsigned Hormuz deal) found nothing to move it either direction. The master resolves it honestly: outright Bear at 1 month, unchanged in call band from Aug 10.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remains a gap. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Nothing fired today that exceeds the August 10 committed scores. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; Senate remains in August recess, no new floor-schedule or ethics-text development found
Fired Aug 9, found Aug 11	Houthi drone strike on Saudi Aramco's Jazan refinery (400,000 bpd) — no injuries, fire extinguished same-day, six independent outlets
Checked, not found	No new dated RWA/tokenization catalyst since the Aug 9 rwa.xyz all-time-high pull; today's searches returned only generic market-sizing coverage
Checked, not found	No new Fed H.4.1 or BLS release since Aug 8
Aug 12	July CPI print — Morgan Stanley flags this, not the jobs report alone, as the real decider for the September FOMC; lands inside the 1mo window
Aug 13	Next Fed H.4.1 balance-sheet release and next weekly jobless-claims print
Sept 15	First CLARITY Act procedural (cloture) vote, precisely dated 2:15pm ET; zero confirmed Democratic yes votes as of Aug 11
Pending	Actual signing of a Hormuz agreement the US accepts — the fee/compensation/sovereignty disputes (Iran wants tolls + compensation + a US/Israel ban; US wants zero) are the thing; unilateral announcements
September	Next FOMC (with SEP/dot plot), week of Sept 15 — Senate returns from recess the same week
~Aug 31	Historical average cycle-bottom month (cycle month 27.7 currently) passes
Power-law fair value \$137,338	BTC \$64,355.00 sits 53% below fair value

The master flip line, unchanged from Aug 8: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, the conflict widening to a further new state, or a sustained Brent close above \$100 returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just routine daily noise. A signed, durable Horowitz deal (under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WEIGHT)
— drop CLARITY Act	+0.31
— drop Iran War Risk	+0.93
— drop Tokenization RWA	+0.23
— drop Fed & Macro	+0.85
— drop Bitcoin TA	+0.77
all five in (headline)	+0.62

Every leave-one-out final number stays **positive** (+0.23 to +0.93) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-positive near-term pillars) still round down to **Neutral** and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — today's flat qualitative research didn't change which two pillars the robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

✓ **COMMITTED — AUGUST 11, 2026 (LIGHT DAILY TOUCH) · STAMPED BY ALEX (AUTO-STAMPED)**

MASTER: −1.52 / −0.90 / +0.29 / +2.11 / +3.11 · THE FINAL NUMBER: +0.62 (Mild Bull, time-arbitraged, committed)

This is a light daily touch off the Aug 10 committed daily baseline — checking what's changed since Aug 10, not re-litigating it from scratch. All four qualitative pillars HELD FLAT: nothing found today except for the recess, the cloture vote remains dated 2:15pm ET Tuesday, Sept 15, and no new floor-schedule or ethics-text development was found (Coindesk, CryptoPotato, American Banker, Bitcoin Foundation, Forbes, Bloomberg/Marine Log Aug 5 route-agreement coverage (re-checked Aug 11, no signing found) · general web search for RWA/tokenization news (Aug 10-11, generic coverage only) · Federal Reserve H.4.1 release scheduled for Aug 12, 2026, in each respective pillar report's own source list. Iran War Risk held at 20/28/41/56/77: research surfaced a Houthi drone strike on Saudi Aramco's Jazan refinery on Aug 9 (400,000 bpd, no injuries, fire extinguished successfully, assessed it as continuation, not escalation, comparable in scale to the Aug 8 ADNOC tanker hit which also didn't move P; the Hormuz deal itself remains unsigned. Tokenization held at 52/60/66/74/85: no new RWA found since Aug 8; the next RWA and jobless-claims prints are due Aug 13, and the Aug 12 CPI print flagged as the real September decider has not yet been released. Fed & Macro held at 40/38/47/55/62: no new Fed H.4.1 or BLS release has posted since Aug 8; the next H.4.1 and jobless-claims prints are due Aug 13, and the Aug 12 CPI print flagged as the real September decider has not yet been released. Bitcoin TA held at \$64,355.00 close, −1.1% vs Aug 10), nudging MASTER 3mo from −0.88 to −0.90 while THE FINAL NUMBER holds exactly at +0.62. **This is exactly the kind of routine, well-evidenced daily cycle the runband band flipped, and nothing rests on a single-source claim — so it was auto-stamped rather than left for manual review.** The robustness check remains a standing yellow flag, not a rubber stamp: dropping any one pillar would move the call more heavily on those two pillars than on Iran, Fed, or TA. The near-term calendar is dense: Aug 12 CPI and Aug 13 Fed data are the next real Fed triggers inside this month's window, Sept 15 now hosts both the Fed's rate decision and the signed deal (not Iran's unilateral announcements) are the real thing to watch on Iran.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that the call is auto-stamped under Alex's standing delegated authority, so it is the system's official stamped position.
