Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 12, 2026 (light daily catch-up) · COMMITTED — AUTO-STAMPED SEPTEMBER 12, 2026

*This is the SECOND cycle of September 12, 2026 (score set 2026-09-12_draft2), layered on the committed 2026-09-12_draft baseline produced earlier the same day by the cloud routine — per house rule, a committed set is never edited, so this cycle's own findings are re-derived against it rather than replacing it. CLARITY Act and Tokenization RWA agree with the baseline, held flat at 32/47/58/82/92 and 52/60/66/74/85: no new dated catalyst found on either (the Sept 15 2:15pm ET cloture vote is unchanged; DTCC's October launch remains the operative catalyst). **Fed & Macro RE-RATED DOWN**, to 29/28/41/53/60 (from the baseline's 34/33/44/54/60): this is the substantive disagreement with the baseline pass. Both the Sept 11 set and the Sept 12 baseline recorded August core CPI as "one tenth cooler than consensus" — the real pre-print consensus was +0.2% m/m, so the +0.3% actual print was one tenth **hotter**, corroborated across six independent outlets and re-verified against the BLS release itself. On top of that correction, the University of Michigan's preliminary September Survey of Consumers (PRIMARY, released Sept 11) put sentiment at 47.8 — a second straight monthly decline, the weakest since May — with year-ahead inflation expectations jumping to 4.6% from 4.0%. **Iran War Risk trimmed one further point at 6mo only**, to 1/2/17/38/70 (from the baseline's 1/2/18/38/70): the baseline's cut for the Bab al-Mandeb chokepoint seizure stands and is not re-litigated, but this pass adds two facts pointing in opposite directions the baseline didn't surface — Saudi Arabia's Ministry of Energy shutting the East-West (Petroline) crude pipeline Sept 11 after drone strikes on its pump stations (a second major Hormuz-bypass disruption, bearish), and Oman convening the first GCC-Iran ministerial of the war in Salalah on Sept 14 to discuss Hormuz shipping (bullish, and the broadest diplomacy of the crisis) — which substantially offset, net trimming only the medium-term window.*

THE FINAL NUMBER · SEPTEMBER 12, 2026, SECOND CYCLE · EQUAL-WEIGHT MODEL (COMMITTED — AUTO-STAMPED)

+0.23

Neutral overall, time-arbitraged — down from this morning's first-cycle reading of +0.31, on the Fed & Macro correction — no call-band flip versus the prior stamped set (Sept 11's +0.36). Equal-weight mean of the five window signals (–10 max bear ... +10 max bull). Horizon-weighted variant: **+0.80**, down from +0.86, still Mild Bull. The structure underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Bull at 3 years.
COMMITTED — AUTO-STAMPED SEPTEMBER 12, 2026 (2026-09-12_draft2) — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled September 12, 2026, second cycle of the day (committed, auto-stamped) · BTC \$77,313.24 (local full quant refresh, September 12, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, 2026-09-12_draft2, committed; prior committed same day: 2026-09-12_draft) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the September 12 second-cycle set (2026-09-12_draft2, layered on the day's committed baseline; COMMITTED, AUTO-STAMPED). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	SEPT 12 FIRST CYCLE	THE CALL
1 month	-1.85	-1.71	Bear — deeper still; the Fed correction adds to Iran's chokepoint drag and Bitcoin TA's front-end easing
3 months	-1.46	-1.33	Mild Bear — the Fed cut pulls down further; the September FOMC still sits inside this window
6 months	-0.16	-0.06	Neutral — CLARITY and Tokenization still carry this window; the Fed cut and Iran's further trim both tip it deeper, still inside the Neutral band
1 year	+1.69	+1.71	Bull — four of five pillars positive; Iran alone negative at this window
3 years	+2.92	+2.92	Bull — law + adoption + cycle + value; unchanged this cycle

Formula: per pillar, $\text{Signal} = ((P - 50) \div 50) \times \text{Quality} \times \text{Impact}$, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: $|s| < 0.5$ Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Sept 12 first cycle" is this morning's committed baseline (2026-09-12_draft), for exact comparison. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

+0.23 = the equal-weight mean of the five MASTER signals above $((-1.85 - 1.46 - 0.16 + 1.69 + 2.92) \div 5)$. Weighting the longer windows harder (10/15/20/30/25%) gives **+0.80**, down from this morning's +0.86 but still Mild Bull. No call band flips this cycle. CLARITY and Tokenization held flat, agreeing with the baseline; **Fed & Macro re-rated down** on a corrected core-CPI consensus figure plus the UMich sentiment survey the baseline pass hadn't seen; Iran War Risk trimmed one further point at 6mo as a Saudi pipeline shutdown and a new GCC-Iran diplomatic track roughly offset; Bitcoin TA (computed) is unchanged from the baseline's read. **COMMITTED — AUTO-STAMPED SEPTEMBER 12, 2026** — light daily touch, call band unchanged everywhere, sourcing well above the sufficiency bar, and under the runbook's widened delegated authority the size of a move is not itself a reason to withhold the stamp; so this set is auto-stamped: status committed, stamped_by "Alex (auto-stamped)." See My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — September 12 second-cycle scores (2026-09-12_draft2), COMMITTED — AUTO-STAMPED

SEPTEMBER 12, 2026 (each report shows the full June → Aug 22 → Aug 28/29 drafts → Aug 31 → Sept 1 → Sept 2 → Sept 5 draft → Sept 5 draft2 → Sept 6 → Sept 8 → Sept 9 → Sept 10 → Sept 11 → Sept 12 → Sept 12 draft2 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	-2.45	-0.41	+1.09	+4.61	+6.38	Held flat — agrees with the baseline; Sept 15 cloture unchanged
Iran War Risk (20% · 8)	-4.70	-4.99	-3.70	-1.25	+1.76	Trimmed 1pt at 6mo — Saudi Petroline shutdown and Sept 14 Salalah ministerial roughly offset; AUTO-STAMPED
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	Held flat — agrees with the baseline; no new dated rwa.xyz milestone
Fed & Macro (20% · 8)	-2.86	-2.99	-1.15	+0.36	+1.04	RE-RATED DOWN — corrected core-CPI consensus (a tenth hotter, not cooler) plus the UMich sentiment print; AUTO-STAMPED
Bitcoin TA — quant (20% · 8)	+0.48	-0.34	+0.79	+1.73	+1.52	Unchanged from the baseline — BTC \$77,313 (local full quant refresh)
MASTER — mean of the five	-1.85	-1.46	-0.16	+1.69	+2.92	equal-wt

P lineage (June → Jul 8 → ... → Aug 16 → 22 draft2 → 28/29 drafts → 31 → Sept 1 → Sept 2 → Sept 5 → Sept 6 → Sept 8 → Sept 9 → Sept 10 → Sept 11) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 7, committed) → 32/47/58/82/92 (Sept 9, held flat since Aug 7) → 32/47/58/82/92 (Sept 10, held flat) → 32/47/58/82/92 (Sept 11, held flat) → **32/47/58/82/92** (Sept 12, held flat) · Iran 50/55/62/75/85 → 40/47/55/70/83 → ... → 20/28/41/56/77 (Aug 16, committed) → 14/22/38/54/76 (Aug 22 draft2, committed) → 14/22/38/54/76 (Aug 29, held flat, draft) → 9/17/34/51/75 (Aug 31 — RE-RATED DOWN, flip line fired, auto-stamped committed) → 7/15/32/50/75 (Sept 1 — RE-RATED DOWN AGAIN, more modestly, on continued escalation, auto-stamped committed) → 1/9/27/47/74 (Sept 2 — RE-RATED DOWN SHARPLY on a ~50x-larger strike wave, first-ever tanker strikes, and a four-country retaliation — COMMITTED, auto-stamped Sept 3) → 1/9/27/47/74 (Sept 5 draft, held flat) → 1/9/27/47/74 (Sept 5 draft2, full weekly refresh — held flat, COMMITTED BY ALEX Sept 5, 2026) → 1/8/25/45/73 (Sept 6 — RE-RATED DOWN, modestly, once CENTCOM's own press release confirmed the Sept 5 tanker strike as a 3-tanker retaliation for an IRGC missile attack on 2 US Navy warships — COMMITTED, AUTO-STAMPED Sept 6, 2026) → 1/7/24/44/73 (Sept 8 — RE-RATED DOWN, modestly, on Iran's announced intent to declare a restricted zone beyond Hormuz into the Persian Gulf, not yet executed — COMMITTED, AUTO-STAMPED Sept 8, 2026) → 1/6/23/43/72 (Sept 9 — RE-RATED DOWN, modestly, on CENTCOM's confirmed 5-tanker strike Sept 8 and Brent's intraday \$100 cross Sept 9, neither firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 9, 2026, the last TRUE committed baseline) → 1/5/22/42/72 (Sept 10 — RE-RATED DOWN, modestly, on the Al Azraq Jordan retaliation and the Houthi seizure of Mocha/Bab-el-Mandeb, neither firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 10, 2026) → 1/4/20/40/71 (Sept 11 — RE-RATED DOWN, modestly, as the "sustained Brent close above \$100" flip-line clause fired on a third consecutive session, alongside fuller reporting of Iran's 10-vessel Sept 9 Hormuz shipping wave — COMMITTED, AUTO-STAMPED SEPTEMBER 11, 2026) → **1/2/18/38/70** (Sept 12 — RE-RATED DOWN, moderately, as Houthi forces swept the rest of Yemen's Red Sea coastline and seized Bab al-Mandeb's Mayyun Island, a second global chokepoint moving under adversary-aligned control, alongside a UKMTO-confirmed strike on two more vessels near Khasab, Oman, neither independently firing a flip-line clause — COMMITTED, AUTO-STAMPED SEPTEMBER 12, 2026, the new last TRUE committed baseline) → **1/2/17/38/70** (Sept 12 draft2, second cycle of the day — trimmed one further point at 6mo only: the baseline's Bab al-Mandeb cut stands, plus a Saudi Petroline pipeline shutdown (bearish) and a Sept 14 Salalah GCC-Iran ministerial (bullish) roughly offset — COMMITTED, AUTO-STAMPED SEPTEMBER 12, 2026) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 52/60/66/74/85 (Aug 8, committed) → 52/60/66/74/85 (Sept 9, held flat since Aug 8) → 52/60/66/74/85 (Sept 10, held flat) → 52/60/66/74/85 (Sept 11, held flat) → **52/60/66/74/85** (Sept 12, held flat) · Fed 38/40/46/54/61 → 35/36/42/52/61 → ... → 43/41/48/56/62 (Aug 22 draft2, committed) → 36/35/45/55/61 (Aug 29, draft) → 36/35/45/55/61 (Aug 31, auto-stamped committed) → 36/35/45/55/61 (Sept 1, auto-stamped committed) → 36/35/45/55/61 (Sept 2 — held flat, auto-stamped Sept 3) → 32/31/43/54/60 (Sept 5 draft — RE-RATED DOWN on a hot August jobs report and higher FOMC hike-odds pricing) → 32/31/43/54/60 (Sept 5 draft2, full weekly refresh — RE-CONFIRMED, COMMITTED BY ALEX Sept 5, 2026) → 32/31/43/54/60 (Sept 6, held flat, auto-

stamped) → 32/31/43/54/60 (Sept 8, held flat, auto-stamped) → 32/31/43/54/60 (Sept 9, held flat) → 32/31/43/54/60 (Sept 10, held flat) → 34/33/44/54/60 (Sept 11 — RE-RATED UP, modestly, once the August CPI print landed with core a tenth cooler than consensus — COMMITTED, AUTO-STAMPED SEPTEMBER 11, 2026) → 34/33/44/54/60 (Sept 12, held flat) → **29/28/41/53/60** (Sept 12 draft2, second cycle of the day — RE-RATED DOWN, correcting the Sept 11 consensus figure (the real pre-print consensus was +0.2% m/m core, so the +0.3% print was a tenth hotter, not cooler) and adding the UMich preliminary September sentiment survey (47.8, a second straight decline) — COMMITTED, AUTO-STAMPED SEPTEMBER 12, 2026) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 49/46/54/66/69 (Aug 22 draft2) → 54/46/56/67/69 (Aug 29) → 54/46/59/68/69 (Aug 31) → 57/46/59/68/69 (Sept 1, computed) → 57/47/59/68/69 (Sept 2, computed) → 59/48/60/68/69 (Sept 5, computed) → 62/53/60/68/69 (Sept 6, computed) → 59/47/59/68/69 (Sept 8, computed) → 59/47/60/68/69 (Sept 9, computed) → 55/48/59/68/69 (Sept 10, computed) → 58/47/59/68/69 (Sept 11, computed) → **54/47/59/68/69** (Sept 12, computed on today's bar). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back to June preserved in each pillar's own report.

The Story, Window by Window

What the blend is saying on September 12, 2026, second cycle of the day (comparisons below are vs. this morning's first-cycle baseline, 2026-09-12_draft)

- **1 month — Bear (−1.85, down from −1.71).** CLARITY (−2.45), Tokenization (+0.29), and Iran (−4.70) all held flat; **Fed & Macro fell to −2.86 from −2.18** on the corrected core-CPI consensus and the UMich sentiment print, this window's largest mover — Bitcoin TA holds at +0.48.
- **3 months — Mild Bear (−1.46, down from −1.33).** CLARITY (−0.41), Tokenization (+1.41), Iran (−4.99), and Bitcoin TA (−0.34) all held flat; **Fed fell to −2.99 from −2.31** — the sole mover, the FOMC-bracketing window most exposed to the correction.
- **6 months — Neutral (−0.16, down from −0.06).** CLARITY (+1.09), Tokenization (+2.18), and Bitcoin TA (+0.79) all held flat; **Fed fell to −1.15 from −0.77** and **Iran fell to −3.70 from −3.58** (the 1-point 6mo trim). The window tips a hair further below zero — still squarely inside the Neutral band ($|\text{signal}| < 0.5$), not a call-band flip.
- **1 year — Bull (+1.69, down from +1.71).** Four of five pillars still non-negative: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73 (unchanged), **Fed +0.36 (down from +0.48)**. Iran alone stays negative at this window, unchanged at −1.25. Price now sits ~45% below power-law fair value (\$140,025).
- **3 years — Bull (+2.92, essentially unchanged).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Bitcoin TA +1.52, Iran +1.76 — all unchanged this window; **Fed holds at +1.04** since a hiking cycle is a 1-6 month story that doesn't re-rate the 3-year regime. A structural window this cycle's news barely touches.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Iran War Risk (judged) re-rates down as a second global chokepoint moves under adversary-aligned control, while Bitcoin TA (computed) eases only slightly at the front end: P 1/2/18/38/70 (Iran, judged, re-rated down moderately) vs 54/47/59/68/69 (Bitcoin TA, computed, easing at 1mo as its cycle analog fell back). The quant pillar's model reading, built on completed bars and cycle position rather than daily headlines, is unmoved by the geopolitical escalation. Iran War Risk remains the worst signal at every window through 1 year — re-rated down again this cycle on the Bab al-Mandeb chokepoint seizure and the Khasab vessel strikes, not improving.

THE REAL DISAGREEMENT

Near-term: Tokenization (P 52) is the strongest near-term pillar; Bitcoin TA (P 54) follows closely, easing from yesterday; Fed & Macro (P 34) and CLARITY (P 32) sit in between; Iran remains sharply the clearest risk-off vote in the set (P 1). The master resolves it honestly: Bear at 1 month, a touch deeper than Sept 11's Bear, with Iran's further cut and Bitcoin TA's easing both pulling in the same direction this cycle.

Long-term: the four story pillars average about +3.24 at 3 years (CLARITY +6.38, Tokenization +3.92, Fed +1.04, Iran +1.76) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.1× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A second cycle ran this cycle, layered on the day's committed baseline. Fed & Macro re-rated down on a corrected CPI consensus and the UMich sentiment print; Iran War Risk trimmed one further point at 6mo; CLARITY and Tokenization held. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Fired Sept 10-11, escalated to island seizure Sept 11, CONFIRMED via 6+ independent outlets	Houthi forces complete their sweep of Yemen's entire Red Sea coastline (capturing Dhubab, Murad) and seize Mayyun (Perim) Island in the Bab al-Mandeb strait; fighting continues for Zuqar Island (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Saudi Crown Prince MBS's request for direct US strikes on the Houthis was refused	Iran War Risk: same Houthi/Yemen actor and theater already priced — does NOT independently fire the widening clause; no US casualty, so that clause doesn't fire either. The driver of this cycle's cut (3mo/6mo/12mo -2 each, 36mo -1)
Sept 10 (UKMTO Warning 133-26), reported Sept 11 — CONFIRMED via UKMTO plus 3+ independent outlets	Four unidentified projectiles struck two vessels near Khasab, Oman, one set afire (UKMTO; Gulf News, Maritime Executive, The Hill). Logged, not scored (single-source): an IRGC claim of a Saildrone strike near the Strait entrance	Iran War Risk: continuation of the established tanker/vessel-attack pattern — contributes to this cycle's cut
FIREF Sept 10-11 — a flip-line clause, CONFIRMED via 4+	"Sustained Brent close above \$100" — Brent ended Thursday Sept 10 up more than 6% above \$107 (above \$108 intraday), its highest since May 19; still holding near \$104.61 Sept 12, a fifth	Iran War Risk: this clause fired last cycle and continues to hold — the second distinct flip-line clause to

independent market sources	consecutive session near/above \$100 (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500)	trigger, after the Aug 30 resumption-of-direct-US-strikes clause
Fired Sept 9, CONFIRMED via CENTCOM/Jordan's own military statement	The IRGC retaliates for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military)	Iran War Risk: Jordan is a repeat target — the widening clause does not fire; both sides confirm no casualties — the US-casualty clause does not fire either. Contributes to this cycle's cut
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; whip-count math (53 R seats, defections from Paul/Hawley and a conditional Tillis, needing 8-10 D/I crossovers) is unchanged	CLARITY: confirmation only, nothing new — no P move
Checked, no fresh catalyst	Tokenization: RWA.xyz aggregate reads (~\$38B by late August) are a continuation of the already-priced growth trend; DTCC's October 2026 full-service launch window unchanged	Tokenization: held flat
Corrected Sept 12; released Sept 11 (UMich, PRIMARY)	Fed & Macro: the Sept 11 core-CPI consensus figure was wrong (real consensus +0.2% m/m, so +0.3% actual was a tenth hotter, not cooler — 6 independent outlets, re-verified against bls.gov); University of Michigan preliminary September sentiment fell to 47.8 (second straight decline) with year-ahead inflation expectations jumping to 4.6% from 4.0%	Fed & Macro: RE-RATED DOWN to 29/28/41/53/60, concentrated on the FOMC-bracketing windows
Sept 15-16, 2026	FOMC decision with SEP/dot plot — the first meeting after a core-CPI print that undershot consensus by a tenth while headline ran hot on energy	Fed: a hike confirms the hawkish read this pillar still carries; a hold would argue the market outran the committee
Sept 15, 2026	Next FOMC, with SEP/dot plot; also the first CLARITY Act cloture vote, precisely dated 2:15pm ET	Fed: a hike confirms the Sept 5 re-rate, a hold/cut suggests the market outran the committee. CLARITY: cloture succeeds = re-rate 3mo/6mo up hard; fails = re-rate down
~Aug 31, now passed	Historical average cycle-bottom month has passed (cycle month now 28.78)	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value \$140,025	BTC \$77,289.66 sits ~45% below fair value	1yr/3yr windows: the structural bull case's core, essentially unmoved by this cycle's news

The master flip line — Iran's strikes clause fired Aug 30, escalated sharply Sept 1-2, and as of Sept 11 a SECOND clause has fired too: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a sustained Brent close above \$100 (Iran). **The Brent clause fired Sept 10-11 and continues to hold** — a fifth consecutive session near/above \$100 as of Sept 12. Two of the four clauses are now live; the other two are not: the Bab al-Mandeb chokepoint seizure is a severity escalation within an existing theater, not a widening to a further new state, and no US casualty is claimed or confirmed. The Sept 15-16 FOMC delivering a hike would confirm and extend the Fed read; the Senate returning from recess with cloture failing and no

released, WH-confirmed CLARITY ethics text would also be a genuine escalation. A signed, US-accepted Hormuz reopening that holds a full clean week would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	-0.18	Neutral
— drop Iran War Risk	+0.93	Mild Bull · yes
— drop Tokenization RWA	-0.25	Neutral
— drop Fed & Macro	+0.57	Mild Bull · yes
— drop Bitcoin TA	+0.08	Neutral
all five in (headline)	+0.23	Neutral

The leave-one-out range this cycle is **-0.25 to +0.93** — the sign still flips when Tokenization, CLARITY, or Iran are dropped individually, the same fragile-reading pattern as recent cycles — and three of the five drops (removing CLARITY, Tokenization, or Bitcoin TA) round to **Neutral**, same as the headline itself this cycle. **Iran War Risk remains the largest single swing pillar: dropping it alone moves the reading from Neutral (+0.23) to +0.93 — a full call band better, into Mild Bull territory.** Dropping Fed & Macro alone also crosses into Mild Bull (+0.57) — the second-largest swing pillar this cycle, and larger than it was this morning now that the Fed correction has landed. That is the single clearest robustness signal this report can give: today's headline number is not being driven by a broad, balanced move — Iran and, to a lesser degree, Fed & Macro are doing the work. The horizon-weighted final (+0.80) is more robust and stays Mild Bull throughout even with either pillar included. This robustness check exists specifically to catch a pillar quietly driving the whole call.

My Decision

COMMITTED — AUTO-STAMPED SEPTEMBER 12, 2026 (2026-09-12_draft2) · SECOND CYCLE OF THE DAY

MASTER: -1.71 / -1.33 / -0.06 / +1.71 / +2.92 · THE FINAL NUMBER: +0.23 equal-weight (Neutral) / +0.80 horizon-weighted (Mild Bull) — no call-band flip vs. the last stamped set (2026-09-11_draft)

This is the SECOND cycle of September 12, 2026 (score set 2026-09-12_draft2), layered on the committed 2026-09-12_draft baseline the cloud routine produced earlier the same day — two independent research passes ran for today, and per house rule a committed set is never edited, so this cycle re-derives findings against that baseline rather than replacing it. CLARITY Act (32/47/58/82/92) and Tokenization RWA (52/60/66/74/85) agree with the baseline, both **held flat**: the Sept 15 2:15pm ET cloture vote and DTCC's October launch are both unchanged, no new dated development on either. **Fed & Macro RE-RATED DOWN**, to 29/28/41/53/60 (from the baseline's 34/33/44/54/60) — the substantive disagreement with the baseline pass, settled by a documented factual error. Both the Sept 11 set and the Sept 12 baseline recorded August core CPI as "one tenth cooler than consensus"; the actual pre-print consensus for core was +0.2% m/m, so the +0.3% print was one tenth **hotter** — an upside surprise corroborated across six independent outlets and re-verified against the BLS release itself. On top of that correction, the University of Michigan's preliminary September Survey of Consumers (PRIMARY, released Sept 11) put sentiment at 47.8 — a second consecutive monthly decline, the weakest since May — while year-ahead inflation expectations jumped to 4.6% from 4.0%, a configuration that most constrains a Fed from easing into the Sept 15-16 FOMC. **Iran War Risk trimmed one further point at 6mo only**, to 1/2/17/38/70 (from the baseline's 1/2/18/38/70): the baseline's cut for the Bab al-Mandeb chokepoint seizure stands and is not re-litigated, but this pass surfaces two facts pointing in opposite directions the baseline missed — Saudi Arabia shutting the East-West (Petroline) crude pipeline Sept 11 after drone strikes on its pump stations (a second major Hormuz-bypass disruption, bearish, a 3-6 month supply story), and Oman convening the war's first GCC-Iran ministerial in Salalah on Sept 14 to discuss Hormuz shipping (bullish, the broadest diplomacy of the crisis, most immediate at 1-3 months) — which substantially offset, netting only a 1-point trim at the medium-term window. **Auto-stamp decision**: ordinary light daily touch, full research access throughout (including an independent adversarial pass that confirmed all five load-bearing claims against primary sources), verification clean, no call band flipped anywhere — and under the runbook's widened delegated authority neither the size of a move nor being a second same-day cycle is itself a reason to withhold. **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."**

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — Iran remains the largest single swing pillar (see Robustness above: dropping it alone puts the reading at +0.93, Mild Bull), with Fed & Macro now a close second (dropping it alone gives +0.57, also crossing into Mild Bull); note the leave-one-out range this cycle (-0.25 to +0.93) does cross zero, a genuinely fragile reading worth watching, the same pattern as recent cycles. This set (2026-09-12_draft2) is COMMITTED — AUTO-STAMPED SEPTEMBER 12, 2026 — the prior stamped position was this morning's own first-cycle +0.31 (2026-09-12_draft, auto-stamped, Neutral), and before that Sept 11's +0.36.

Sources

Each pillar report carries its full, freshly-checked source list for this light daily catch-up. The master adds the engine and headline references for this September 12 update.
