The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

*Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched & updated on **July 8, 2026** — this version carries re-rated **DRAFT** scores awaiting my stamp.*

COINPICKS PILLAR REPORT · WEIGHT: 25% OF MY THESIS

Written June 5, 2026 · Updated & Re-verified July 8, 2026 · Not Financial Advice

The Scores — June Committed vs. July 8 Draft

June column committed by me June 12, 2026. Draft column re-rated July 8, 2026 from fresh research — NOT stamped yet. Signals below run off the draft.

WINDOW	MY JUNE P	DRAFT P (JUL 8)	QUALITY	IMPACT	SIGNAL	MY CALL
1 month	55	52	0.85	9	+0.3	Neutral — binary cloture window
3 months	60	56	0.85	9	+0.9	Mild Bull
6 months	65	61	0.85	9	+1.7	Bull
1 year	85	83	0.90	9	+5.3	Very Strong Bull
3 years	92	92	0.95	9	+7.2	Very Strong Bull

Draft P: 52 / 56 / 61 / 83 / 92 · **My Weight:** 25% · **My Impact:** 9 · **Formula:** Signal = $((P - 50) \div 50) \times \text{Quality} \times \text{Impact}$. Draft scores re-rated July 8, 2026 from the June baseline (55 / 60 / 65 / 85 / 92) — awaiting my stamp.

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. Near-term it's now genuinely binary: one ethics deal and one cloture motion inside ~19 usable Senate days decide the next month. Long-term still high — even the bears argue "slips past the midterms," not "dies."

Quality — how trustworthy the evidence is. Every source is on the last page — click and judge for yourself. Two caveats this round: congress.gov blocked our direct pull, and Kalshi prices came secondhand. Both flagged in Sources.

Impact — 9 out of 10. This bill writes the rules for the entire market.

The Claim

The thesis as of July 8, 2026, and where I differ from the consensus

The crowd: whipsawing. Polymarket's 2026-signing odds hit a YTD low of **39% on July 1** (the trading day after Trump's \$1.4B crypto-income disclosure dropped June 30), spiked to **~56%** over the July 4 weekend on law-enforcement news, and settled at **46–47% by July 7–8**. The loud story: "no cloture motion, ~19 days, it's dead."

Me: draft ~52% for the next month — a coin flip, honestly — but still ~92% that a crypto rules law exists within 3 years.

My edge: unchanged since June — the crowd keeps pricing a *timing* problem like a *death* problem. The House did its half a year ago (294-134). The Section 604 police wall just cracked: the first law-enforcement endorsement ever landed July 3, and the big sheriffs went neutral July 4. The whole fight has narrowed to **one variable** — an ethics deal — and one-variable problems get solved or slipped, not killed.

The Facts

As of July 8, 2026 — hard numbers only, sources on the last page

- **The calendar, exactly:** no cloture motion filed and **no floor date** as of July 8 — the bill has sat at Senate Calendar No. 423 since June 1. The Senate returns from the July 4 recess **Monday, July 13**; the last session day before the August break is **Friday, August 7** — roughly **19–20 working days**, and the **NDAA eats week one**. TD Cowen (June 29): procedural steps the week of July 13 or July 20, with **July 24** the critical date so the House can act before its own recess. One July 7 report says the floor-vote target has slipped toward **August 6**.
- ★ **The June 30 ethics bomb.** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ WLFI-related, \$197M in USD1 stake sales (outlets differ on the WLFI token-sale split). Warren and other Democrats escalated. Gillibrand: "*there is no CLARITY Act without an ethics provision*" (exact wording via Yahoo's reporting; the substance — ethics language as a floor-vote prerequisite — is corroborated by crypto.news).
- **Ethics talks are still broken.** Collapsed June 9, not publicly restarted as of July 8 — "the last issue to be finalized." White House Crypto Council ED Patrick Witt is running three-party talks, but the White House refuses any language singling out Trump. In committee: Van Hollen's ethics amendment failed 11–13; Republicans withdrew state-AG enforcement and offered US-AG oversight (Democrats rejected it); Lummis floated a revised state-AG proposal June 29.
- ★ **The Section 604 wall is cracking.** After White House meetings ~June 29–July 1: NOBLE's endorsement letter to Thune and Schumer — **the first from any law-enforcement organization** — was dated **July 1** (reported July 2–3); on **July 4, the Major County Sheriffs of America moved from opposed to neutral**. Still opposed: the National Sheriffs' Association, FOP, the district attorneys (NDAA), and IACP.
- **The vote math:** still only **Gallego and Alsobrooks** on record — and both now say their committee votes don't guarantee floor votes without an ethics deal. Warner and Cortez Masto still condition support on law-enforcement sign-off. With Hawley and Paul expected R defections, that's **~51 reliable Republican votes → 7–9 Democrats needed. Firmly committed: zero.**
- **The stablecoin-yield fight is unresolved:** the ABA says the bill's pass-through-yield language loopholes GENIUS's issuer-interest ban; Coinbase's **~\$1.35B/yr** in USDC rewards is what's at stake.
- ★ **New: Trump himself is a signature risk.** He's threatening to withhold his signature on a housing bill unless Congress passes the SAVE Act — a hostage play that squeezes scarce floor time and puts non-trivial signature risk on CLARITY itself.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**; Banking–Agriculture staff are reconciling committee texts over the recess.
- **Odds board (sentiment only):** Polymarket **46–47%** (Jul 7–8, after the 39% → ~56% whipsaw) · Kalshi as of **July 7** (via Deadspin): passage by end-of-July **~6¢**, by end-of-2026 **~46¢** (a July 1 snapshot had July at 0.1% and August at 13% — prices whipsawed with the news) · Galaxy **cut 60% → 50%** (June 29: "Thune must announce floor time by early July" or it slips to September/midterms) · JPMorgan **<50%** (in-house) · Jefferies (June 30) flagged **Polymarket at 48%, down from 70% mid-May** — a market price it cited, not a house estimate · TD Cowen: "far from assured" before the midterms.

The Prize

Illustrative only — not price targets, not advice

Anchor updated to the July 8 close (**BTC \$62,274**, Bitstamp). A **GENIUS-sized move (~40–47%)** from ~\$62.3K ≈ **~\$87–92K**. A retest of the ~\$126K high ≈ **+100%**. The anchor is real: during the GENIUS Act's passage (Senate committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K (≈+44%).

Discount both — 2025 had tailwinds 2026 doesn't, and **the GENIUS rally itself fully retraced**. And note the July 4 weekend tell: one piece of good news (police softening) moved Polymarket ~17 points in days — this market is coiled. The Prize doesn't feed the math — it tells you what the lean is worth acting on.

The Other Side

The strongest honest case this is wrong

- **The calendar is worse than June:** ~19 usable days, the NDAA eats the first week, no cloture motion filed, and the leader is still only "looking at" floor time (June 29). Galaxy's own early-July deadline for a Thune announcement has already passed unmet.
- **The ethics fight got harder, not easier:** a \$1.4B presidential crypto disclosure is a gift to every Democrat who wants to say no. Gillibrand's "no CLARITY Act without an ethics provision" meets a White House that refuses any Trump-specific language — immovable object, irresistible force, 19 days.
- **The signer is now a risk:** Trump is already playing signature-hostage on another bill. A Senate that grinds out 60 votes could still watch the bill die on his desk.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Set July 8, 2026.

DATE	EVENT	MEANS
July 13	Senate returns; NDAA first in the queue	CLARITY floor time is realistically late July at best
Week of July 20	Cloture motion filed on CLARITY	2026 path alive — snap the 1-month draft back to 58–60
July 24	TD Cowen's critical date (House needs runway before its recess)	Passes with no cloture = re-rate the 1- and 3-month down
~August 6	Reported floor-vote target	Last realistic pre-recess vote window
August 7	Last Senate session day passes with no floor vote	September collides with the midterms — 2027 becomes the base case for signing
Any time	Witt's three-party ethics talks produce a deal	The single biggest unlock — Democratic votes follow; re-rate everything up

The flip line: no cloture by ~**July 24** = start treating 2026 as slipping. The last session day (**August 7**) passes with no vote = a 2027 signing is my base case. Keep 1-year and 3-year Bull either way — a bill with 294 House votes, two committee Democrats, and police opposition now cracking is delayed, not dead.

My Decision

🕒 **UPDATED DRAFT — JULY 8, 2026 · AWAITING MY STAMP**

Draft P: 52 / 56 / 61 / 83 / 92 · My Weight: 25% · My Impact: 9

The re-rate is honest, not panicked: the July 1 down-trigger fired (no floor date, no ethics deal, plus the \$1.4B disclosure), partially offset within days by real Section 604 progress. Near-term trimmed to a coin flip, long-term barely touched, 3-year held — this is a timing fight, not a direction fight.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026) remain the last human-stamped values.

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

Re-researched July 8, 2026 (previous check June 19, 2026)

- ★ **A June trigger FIRED.** "July 1: still no floor date + no ethics deal → re-rate the 1-month down" — fired exactly as written. OGE released Trump's ~\$1.4B crypto-income disclosure June 30, and Polymarket hit its YTD low of 39% on July 1. The "~July 4 Thune schedules floor time" trigger did **not** fire — no cloture motion, no floor date as of July 8. The early-August recess trigger is live and unresolved.
- ★ **Material new facts:** the \$1.4B OGE disclosure (June 30); the first-ever law-enforcement endorsement (NOBLE letter dated July 1, reported July 2–3) and MCSA moving to neutral (July 4); Galaxy cutting its odds 60% → 50% (June 29); and Trump's SAVE Act signature-hostage play putting new signature risk on CLARITY itself.

- **Odds refreshed:** Polymarket ~45% → **46–47%** after a 39% → ~56% whipsaw; Kalshi by-end-2026 ~50% → ~46¢ (July 7, secondhand); Galaxy 60% → **50%**; JPMorgan <50% unchanged; Jefferies note (June 30) cited Polymarket 48%, down from 70% mid-May.
- **Scores re-rated (June committed → July 8 draft):** 1-month 55 → 52 · 3-month 60 → 56 · 6-month 65 → 61 · 1-year 85 → 83 · 3-year 92 → 92 (hold). Draft only — awaiting my stamp.
