The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

*AI-researched draft, truth-checked by a verification swarm — then re-verified and
timeline-corrected on June 19, 2026. Scores committed by me on June 12, 2026.*

COINPICKS PILLAR REPORT · WEIGHT: 25% OF MY THESIS

Written June 5, 2026 · Last Checked June 19, 2026 · Not Financial Advice

My Committed Scores

Committed by me on June 12, 2026 — AI drafts shown for the record. Re-verified June 19; corrections were factual (timeline + odds), so scores stand.

WINDOW	MY P	AI DRAFT	QUALITY	IMPACT	SIGNAL	MY CALL
1 month	55	50	0.85	9	+0.8	Bull
3 months	60	52	0.85	9	+1.5	Bull
6 months	65	62	0.85	9	+2.3	Bull
1 year	85	85	0.90	9	+5.7	Bull
3 years	92	92	0.95	9	+7.2	Bull

My Weight: 25% (AI suggested 30%) · **My Impact:** 9 (confirmed from subject selection) · **Formula:** Signal = ((P – 50) ÷ 50) × Quality × Impact. Positive = Bull · negative = Bear · zero = Neutral. Math re-verified.

THE THREE INPUTS, IN PLAIN ENGLISH

- P** — the odds this is *good for crypto* by then. Near-term a coin flip (the ethics talks just broke down); long-term high (even the bears say "slips to 2027," not "dies").
- Quality** — how trustworthy the evidence is. Every source is on the last page — click and judge for yourself.
- Impact** — 9 out of 10. This bill writes the rules for the entire market.

The Claim

The thesis, and where I differ from the consensus

The crowd: Polymarket prices a 2026 signing around a coin flip (~45% on June 19, swung up near ~60% mid-June). The loud story: "the Senate clock is a wall."

Me: ~55% for 2026 — and ~90% that a crypto rules law exists within 3 years.

My edge: the crowd is pricing a *timing* problem like a *death* problem. The House already did its half (passed July 2025); the Senate is sliding the date, not killing the bill — Kalshi's "by August" odds crashed, but its "before 2027" odds held a coin flip.

The Facts

As of June 19, 2026 — hard numbers only, sources on the last page

- ★ **The House already passed it.** The House passed H.R. 3633 (the CLARITY Act) on **July 17, 2025, 294-134** (bipartisan, Roll Call #199). The House chamber is done.
- ★ **The Senate is writing its own bill.** The **Senate Banking Committee** advanced a *separate* market-structure substitute **15-9 on May 14, 2026**; Democrats Gallego (AZ) and Alsobrooks (MD) crossed over. It must later be **reconciled** with the House-passed CLARITY Act.
- Placed on the Senate Legislative Calendar (No. 423) on June 1. **No floor date scheduled**; Majority Leader Thune has not committed floor time as of June 19.
- Needs **60 votes** = at least 7 Democrats. Committed so far: **zero**.

- Ethics talks (over Trump-family crypto money) **collapsed ~June 9–10**; a restart was expected but isn't confirmed. Damaged, not dead.
- Law-enforcement groups (sheriffs / FOP / DAs) still block the **Section 604 developer-protection** language — gating two swing votes (Cortez Masto, Warner).
- **~6 usable weeks** of floor time before the August break — with competing must-pass items (incl. FISA, funding) crowding the calendar.
- Odds board (*sentiment only*): **Polymarket ~45%** · **Kalshi before-2027 ~50%** · **Galaxy 60%** · **JPMorgan <50%** · **TD Cowen 40%** (raised from ~33% after the May 14 markup).
- **Bitcoin ~\$63K**, down ~22% from a mid-May ~\$82K peak — on ETF outflows and macro, not this bill. All-time high ~\$126K (Oct 6, 2025).

The Prize

Illustrative only — not price targets, not advice

A **GENIUS-sized move (~40–47%)** from ~\$63K ≈ **~\$89–93K**. A retest of the ~\$126K high ≈ **+100%**. The anchor is real: during the GENIUS Act's passage (Senate committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K (≈+44%).

Discount both — 2025 had tailwinds 2026 doesn't, and **the GENIUS rally itself fully retraced** (BTC is back near \$63K). The Prize doesn't feed the math — it tells you what the lean is worth acting on.

The Other Side

The strongest honest case this is wrong

- **The calendar is brutal:** ~6 weeks, no scheduled date, a leader who won't commit, and must-pass items eating the floor.
- **No Democratic upside:** Democrats gain nothing politically from handing Trump a win — and the ethics fight just got uglier.
- **The midterms are the real wall:** miss August and election politics own the floor. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events — some prove the claim right, some prove it wrong

DATE	EVENT	MEANS
~July 4	Thune schedules floor time	Pre-recess path alive — odds jump
July 1	Still no floor date + no ethics deal	Re-rate the 1-month down
Early August	Recess starts with no floor vote	2026 signing in doubt — re-rate 3/6-month
Any time	Senate floor vote reaches 60	Passes; reconciliation with the House bill is next

The flip line: August recess + no floor vote + no ethics deal = treat a 2026 signing as unlikely. Keep 1-year and 3-year Bull — slipping isn't dying, and the House already did its half.

My Decision

✓ **COMMITTED BY ME ON JUNE 12, 2026**

My P: 55 / 60 / 65 / 85 / 92 · My Weight: 25% · My Impact: 9

I read the full report and overrode the AI near-term: its 1-month Neutral (P 50) is my mild Bull (P 55), and I trimmed the weight from 30% to 25%. The long-term calls I kept as drafted.

My numbers ARE my call. The trade plan comes when all my pillars combine in the master spreadsheet.

What Changed Since Last Check

Re-verified June 19, 2026 (originally written June 5 · committed June 12)

- ★ **Timeline corrected.** Now states the House already passed H.R. 3633 (294-134, July 17, 2025); the May 14 15-9 vote is relabeled as the **Senate Banking Committee's separate substitute**, which must be reconciled with the House bill. The earlier framing read a chamber behind.
- **Odds refreshed** since the June 12 check: Kalshi before-2027 ~58% → **~50%**; TD Cowen ~33% → **40%** (raised after the May 14 markup); Polymarket ~49% → **~45%** (swung up near ~60% mid-June). Galaxy 60% and JPMorgan <50% unchanged.
- **The "~June 19" Thune trigger passed without firing** — no floor time scheduled. Next checkpoint moves to pre-July-4 / pre-August recess.
- *Scores unchanged — the corrections were factual, not directional.*
