

COINPICKS · RESEARCH & EDUCATION

Master Direction Report

Five Pillars, One Table, One Number — Light Daily Refresh, July 11, 2026

*Quant pillar recomputed on data through July 11; the four qualitative pillars given a light 1-day re-research (CLARITY, Iran, and Tokenization nudged on genuine new developments; Fed & Macro held flat — no fresh H.4.1/claims data since July 10). Full score lineage (June committed → July 8 draft → July 10 draft → July 11 draft) preserved in every report. **Draft scores and the equal-weight model await my stamp.***

THE FINAL NUMBER · JULY 11, 2026 · EQUAL-WEIGHT MODEL

+1.06

Mild Bull overall, time-arbitraged. Equal-weight mean of the five window signals (−10 max bear ... +10 max bull). Horizon-weighted variant: **+1.53**. The structure underneath: Mild Bear at 1 month, Neutral at 3 months, Mild Bull at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" signal.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled July 11, 2026 · BTC \$64,128 (daily, mid-session) · Engine: engine/blend.py — run.py blend (equal-weight, July 11 drafts) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the July 11 drafts. Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	JUL 10 MASTER	THE CALL
1 month	-0.64	-0.77	Mild Bear — Fed still the drag; CPI Tuesday; Iran talks live but MoU still "over"
3 months	-0.26	-0.34	Neutral — Sept-hike window + Aug 7 recess cliff; watch \$58,526
6 months	+0.66	+0.53	Mild Bull — basing; DTCC October, Nasdaq Dec 6, peak hawkishness passes
1 year	+2.34	+2.34	Bull — all five pillars positive; the thesis window
3 years	+3.19	+3.19	Strong Bull — law + adoption + cycle + value

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: |s| < 0.5 Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Jul 10 Master" is the prior cycle's reading, shown for comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+1.06 = the equal-weight mean of the five MASTER signals above ((-0.64 - 0.26 + 0.66 + 2.34 + 3.19) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.53**. Both read **Mild Bull**, up modestly from July 10's +0.99 / +1.48. What moved: the near-term window (1mo -0.77 → -0.64) on CLARITY firming to a concrete July 20 floor-vote target, Iran cooling slightly (active Oman-mediated Hormuz talks, no new strikes since Jul 8-9), and Tokenization's continued acceleration (treasuries +2.8% in a day); the 6-month window also ticked up (+0.53 → +0.66) as the Bitcoin-TA cycle analog firmed. Fed & Macro and the 1yr/3yr windows are unchanged — no fresh primary Fed data landed today, and nothing in one day moves a structural 3-year view. **The near-term risk is real, and the 1-year-out case still outweighs it.**

The Full Pillar Matrix

Every pillar's signal on every window — July 11 draft scores (each report shows the full June → Jul 8 → Jul 10 → Jul 11 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	+0.27	+0.68	+1.50	+4.61	+6.38	Jul 11 draft
Iran War Risk (20% · 8)	−0.58	0.00	+0.78	+2.08	+2.90	Jul 11 draft
Tokenization RWA (20% · 8)	+0.58	+1.27	+2.04	+3.00	+3.92	Jul 11 draft
Fed & Macro (20% · 8)	−2.18	−1.90	−0.77	+0.36	+1.14	held flat
Bitcoin TA — quant (20% · 8)	−1.32	−1.34	−0.26	+1.63	+1.60	Jul 11 computed
MASTER — mean of the five	−0.64	−0.26	+0.66	+2.34	+3.19	equal-wt

P lineage (June → Jul 8 → Jul 10 → Jul 11) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → 50/54/60/82/92 → **52/55/61/82/92** · Iran 50/55/62/75/85 → 40/47/55/70/83 → 42/49/56/70/83 → **44/50/57/70/83** · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → 53/58/64/74/85 → **54/59/65/74/85** · Fed 38/40/46/54/61 → 35/36/42/52/61 → 34/36/44/53/61 → **34/36/44/53/61 (held)** · Bitcoin TA 37/37/46/67/70 → 39/38/44/67/70 → **39/38/47/67/70** (computed). P and Quality unchanged in structure; Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five.

The Story, Window by Window

What the blend is saying on July 11, 2026

- 1 month — Mild Bear (−0.64, was −0.77).** The Fed is still the dominant drag (−2.18, held flat: hawkish June minutes, ~62-66% Sept-hike odds, CPI lands Tuesday July 14). Iran improved but stays negative (−0.58, was −0.77: no new strikes since Jul 8-9, Iran's FM in Oman on Hormuz, but Trump still calls the MoU "over"). CLARITY turned mildly positive (+0.27, was 0.00) on a firmer, dated Senate floor-vote target (July 20) and a Polymarket uptick to ~46-47%. Tokenization firmed too (+0.58, was +0.43) on another day of treasury growth.
- 3 months — Neutral (−0.26, was −0.34).** Iran crossed to flat (0.00, was −0.10) as the near-term picture cools; CLARITY (+0.68) and Tokenization (+1.27) both firmed slightly; the Fed (−1.90) and the quant tape (−1.34: prior cycles 0-for-3 over the next quarter, median −12%) remain the drags. The window still holds the Sept-hike decision, the Aug 7 recess cliff, and the ~Aug 16 MoU expiry.
- 6 months — Mild Bull (+0.66, was +0.53).** Tokenization remains the strongest near-structural pillar (+2.04: DTCC's Russell-1000 pilot running this month, full launch October; Nasdaq Dec 6 target); CLARITY firms further (+1.50); Iran ticks up (+0.78); the Fed drag (−0.77) is unchanged; the tape's drag shrank (−0.53 → −0.26) as the 6-month cycle analog flipped from 0-of-3 to 1-of-3 positive (n=3 — soft, still net negative). Historical average cycle bottom (~Aug 30) sits inside this window.
- 1 year — Bull (+2.34, unchanged).** All five pillars positive: Legislation +4.61, Tokenization +3.00, Iran +2.08, Bitcoin TA +1.63, Fed +0.36. Cycle analogs 3-for-3 (median +27%), price 52% below power-law fair value, labor cracking fast enough to force the easing cycle into view. The window the whole thesis is built around.
- 3 years — Strong Bull (+3.19, unchanged).** Every pillar positive and the structural case compounds: CLARITY +6.38, Tokenization +3.92, Iran +2.90, Bitcoin TA +1.60, Fed +1.14. One day of incremental news doesn't move a 3-year structural view — that's by design.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged, held flat) and Bitcoin TA (computed) still trace a similar path: P 34/36/44/53/61 vs 39/38/47/67/70 — within 5 points at 1 month, 2 at 3 months, and just 3 points apart at 6 months (44 vs 47, was an exact match on Jul 10 before the quant 6-month analog firmed). Two methods that share no inputs keep landing on "bearish quarter, softening half-year." Iran no longer votes fully with them near-term — it's cooled to -0.58 as talks progress.

THE REAL DISAGREEMENT

Near-term: Tokenization and CLARITY both say the structural news is mildly good *right now* (P 54 and 52, records + a dated floor vote); macro and the tape still say risk-off (P 34–39). The master resolves it honestly: Mild Bear now, and the bullish pillars get paid in the windows where their evidence is strongest.

Long-term: the four story pillars average about +3.6 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.90, Fed +1.14) versus the Bitcoin-TA pillar's +1.60 — roughly 2.2× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Fired July 8–11 triggers are already IN the draft scores. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Weekend Jul 12	Weekly close vs the 200-week MA (~\$62.9K)	Close above = TA repair signal #1 confirmed; below = bounce failed
Jul 13	Senate returns (NDAA eats week one) · merged CLARITY text expected this week	Text drops with White House sign-off = CLARITY up; without = timing risk stays
Jul 14	June CPI, 8:30am (nowcast ~3.96% headline)	Fed 1/3-month; cooler print = first crack in the hike case
Jul 17	Iran oil-waiver wind-down completes · NCUA GENIUS comments close	Iran/oil; Tokenization rules-sequencing
Jul 18	GENIUS implementing-rules statutory deadline	Core Treasury/OCC rules land = de-risked; total silence = headwind (partial miss is the base case)
Jul 20 (targeted)	Senate floor vote now targeted for CLARITY, per reporting — merged text due week of Jul 13 first	Vote held & cloture clears → CLARITY 1mo snaps up hard; slips again → 2026 fading further (Polymarket ~46-47%)
Jul 28–29	FOMC (hold ~70–77% priced) + June PCE Jul 25	Fed all windows; hike or hike-signal = re-rate down
Aug 7	Last Senate session day before recess	No CLARITY vote by now → 2026 signing in real doubt

~Aug 16	Islamabad Memorandum 60-day window expires	Iran: deal/extension = up hard; formal collapse = down hard
~Aug 30	Historical average cycle-bottom month (28) passes	TA: higher low after this + improving momentum = basing confirmed
\$58,526 / \$64,432 / ~\$69.9K	TA levels: June-30 low · falling weekly trendline (~0.5% overhead) · 20-week MA	Break below the low = flush live; trendline + 20-week reclaims = repair #2 and #3
Coming days	Iran expected to publicly state Hormuz is open / vessels safe (per US officials, not yet delivered)	Statement delivered = Iran near-term up; continued silence/conditional-only stance = re-rate flat to down

The master flip line (unchanged): the Iran flip line (sustained wider war + full Hormuz shock — the strait is already "severe"-rated) and the TA flip line (weekly close under \$50,000) firing together turns the near-term Mild Bear into a full Bear and puts the 6-month Neutral under review. Either alone is a re-rate, not a regime change.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WT)	CALL · STILL POSITIVE?
— drop CLARITY Act	+0.65	Mild Bull · yes
— drop Iran War Risk	+1.06	Mild Bull · yes
— drop Tokenization RWA	+0.78	Mild Bull · yes
— drop Fed & Macro	+1.49	Bull · yes
— drop Bitcoin TA	+1.30	Mild Bull · yes
all five in (headline)	+1.06	Mild Bull

Every leave-one-out final number stays positive (+0.65 to +1.49) — **no single pillar is doing the work**; the Mild Bull conclusion survives dropping any one of them. The horizon-weighted final (+1.53) agrees. The near-term Mild Bear and the long-term Bull/Strong Bull calls also hold across all five drops. The one honest caveat: dropping the most-bullish pillar (CLARITY) gives the lowest final (+0.65) and dropping the most-bearish (Fed) the highest (+1.49) — magnitude shifts; the sign never does.

My Decision

🕒 **COMPILED JULY 11, 2026 · QUANT RECOMPUTED, PILLARS LIGHTLY RE-RATED · AWAITING MY STAMP**

MASTER: -0.64 / -0.26 / +0.66 / +2.34 / +3.19 · THE FINAL NUMBER: +1.06
(Mild Bull, time-arbitraged)

This is a light 1-day refresh: the quant pillar was fully recomputed on fresh price data, and the four qualitative pillars got a targeted re-check for what genuinely changed since July 10 (CLARITY's floor-vote date firmed, Iran's diplomacy advanced, Tokenization kept accelerating) rather than a full re-research — Fed & Macro was held flat because no new H.4.1 or claims data has landed since the last cycle (next H.4.1 release July 16). The full lineage (June committed → July 8 → July 10 → July 11) is printed in every report. Awaiting my signature: **(1)** the five draft P-paths, **(2)** the equal-weight model and the final-number window weighting (leave-one-out shows the call is robust either way). The near-term calendar is dense — CPI Tuesday, the GENIUS deadline Saturday the 18th, the targeted CLARITY floor vote July 20 — and each pillar's trigger table says exactly what to re-rate when those land.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above.
