

Tokenization of Real-World Assets Pillar Report

Real Money On-Chain — Researched, Scored, and Personally Committed

Originally written **June 19, 2026**; scores committed by me on **June 19, 2026**. Re-researched July 8, 13, 18, 25, and 30, 2026 against live primary sources, and again as a full weekly refresh on August 8, 2026 (nudged up at 3mo/6mo on a new RWA all-time high and two missed catalysts, committed and stamped by Alex). Held flat through the Aug 9-16 daily touches, all auto-stamped committed. Drafts written Aug 17, Aug 18, and Aug 20 were never delivered (no report/render/archive/commit followed for any of them), and an Aug 21 session began delivering the Aug 20 numbers into only two of six reports before stopping — also never finished or committed. **This version (August 22) does not take any of those abandoned drafts at face value — it independently re-verifies through a dedicated primary-source research pass and HOLDS FLAT at 52/60/66/74/85** — the rwa.xyz total-value print remains essentially unchanged (and Treasuries-specific value is confirmed distinct from the all-category total, this pillar's known mislabeling trap), the SEC's newly proposed "Regulation Crypto Assets" (Aug 18-19) is scoped to new-token capital formation rather than RWA tokenization and doesn't clear this pillar's bar, and the tokenized-stock innovation exemption this pillar is watching remains delayed/exploratory with no new dated progress. **This pillar's own evidence is clean and would have qualified for Alex's standing daily auto-stamp on its own** — but the **overall Aug 22 score set is left as a DRAFT, flagged for Alex's manual review**, because a dedicated adversarial fact-check this cycle found that the Iran War Risk pillar's report contained a materially false claim (a "first confirmed fatality" framing that was actually roughly the 18th such death) that the original research pass missed; see My Decision below. **A second, deeper session ran later the same day**. With that Aug 22 catch-up draft already delivered — rendered, archived, and git-committed — house rules require a new dated set rather than an in-place edit, so this full weekly refresh (the first since Aug 8) is scored as **2026-08-22_draft2**. Draft2 independently re-confirms the hold at 52/60/66/74/85 through fresh primary-source research, including a direct sec.gov check of a newly issued Franklin Templeton no-action letter (Aug 12) and a since-canceled (not merely delayed) SEC tokenized-equity "innovation exemption" meeting (Aug 13-15 reporting) — the two roughly offset and neither alone clears this pillar's bar. Draft2 was left as draft at delivery — this time because a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority, regardless of how clean the evidence is — **COMMITTED BY ALEX August 23, 2026** after independent review. **A daily catch-up draft dated August 28, 2026** (score set 2026-08-28_draft) was written — a direct rwa.xyz re-pull showing total distributed value \$38.69B (+3.04%/30d) and tokenized Treasuries \$16.00B (-0.93%/30d), both continuing trend — but it was never rendered, selfchecked, archived, or git-committed, and sits abandoned, superseded the same way this report has always treated interrupted prior sessions. **This version (August 29) does not take that abandoned draft at face value** — it runs a fresh, independent full-weekly primary-source pass and again HOLDS FLAT at 52/60/66/74/85, scored as **2026-08-29_draft**. The week's one genuine new development is **Coinbase's August 24 launch of tokenized-stock trading (NVDAC/METAC/AAPLC/GOOGLc — Nvidia, Meta, Apple, Alphabet) on its own Base blockchain**, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026 — confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25, but eligible to **non-US users only**, the exact same structural limitation this report already established (the "Robinhood Chain precedent") as insufficient alone to move P. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25, whose stated use cases touch RWA settlement) is logged as tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check this window, and DTCC's October 2026 and Nasdaq's December 6, 2026 targets are both unchanged. **rwa.xyz's own site (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle** — a data-access gap flagged for next cycle — so this pass relies on the report's own most recent primary pull (the abandoned Aug 28 draft's rwa.xyz read), loosely corroborated by secondary citations, showing tokenized Treasuries

specifically posting a **second consecutive negative 30-day reading** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% and not independently reconfirmed this cycle, but the closest thing in this pillar to a trend worth watching. **This full weekly refresh was left as a DRAFT, not auto-stamped** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality. **THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft**, covering Aug 29-31: sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) are consistent with the Aug 28 direct pull already priced in — same trend, not a fresh dated catalyst; rwa.xyz itself was not independently re-pulled this cycle. **P HELD FLAT at 52/60/66/74/85**. This is a light daily touch, not a full weekly refresh, no window moved, and the master call band is unchanged — **AUTO-STAMPED** per delegated daily authority. **Sept 1: held flat again** — only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot), no fresh dated catalyst, no rail failure/depeg/counterparty default. Score set 2026-09-01_draft, AUTO-STAMPED, new last COMMITTED baseline. **Sept 2: held flat a further time** — no dated catalyst found Sept 1-2 (the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events). Score set 2026-09-02_draft — this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Tokenization's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report); **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the policy — this is the last TRUE committed baseline. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — no dated catalyst found Sept 3-5; DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participating institutions) remains unchanged background. This pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — a bug, flagged for Alex, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch (DTCC's October launch remains the operative unchanged catalyst; no new dated milestone found). **HELD FLAT again at 52/60/66/74/85. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants including BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, and Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found. **HELD FLAT at 52/60/66/74/85. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July 15 production-trade stress test; 50+ firm industry working group, no new dated milestone found. **HELD FLAT at 52/60/66/74/85. Sept 9: light daily catch-up, held flat again** — rwa.xyz aggregate reads circulating today (~\$39.2B total distributed value) are single-source press-summary figures without a direct rwa.xyz pull this cycle, read as organic continuation of the already-priced growth trend (no rail failure, depeg, or counterparty default found); DTCC's October full-service launch remains the operative catalyst, unchanged. **HELD FLAT at 52/60/66/74/85. Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 52/60/66/74/85 — independently re-checked, nothing cleared the sufficiency bar. No new dated rwa.xyz pull, no rail failure/depeg/counterparty event found. DTCC's October full-service launch remains the unchanged operative catalyst. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 11) is a light daily catch-up, score set 2026-09-11_draft**, covering Sept 10-11: re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found, and DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries) remains the unchanged operative catalyst. **P HELD FLAT at 52/60/66/74/85.** Iran War Risk and Fed & Macro are the pillars that moved this cycle (Iran down on its Brent flip-line clause firing, Fed up modestly on a core-CPI print a tenth cooler than consensus). Light daily touch, no window of this pillar moved — **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." Sept 12 light daily catch-up (2026-09-12_draft), this morning's cycle:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) read as continuation of the already-priced growth trend, not a new milestone; no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **P HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)," the new last TRUE committed baseline. Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version)** independently re-confirms the hold: rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced smooth growth curve, not a step-change or new

milestone; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B, a structural-breadth note. **DTCC's October 2026 full-service tokenization launch is reconfirmed on schedule, no delay** (primary: DTCC.com, corroborated by Forkast's "From Pilot to Plumbing," Tradeweb, and Crowdfund Insider — 2+ independents) — the July 15 live-production trades remain already priced in. Two freshly-dated items this week were found but are each effectively single-source (a press release syndicated across aggregator sites, not independently reported) and incremental, not step-changes: Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting Casper onto the ERC-3643/T-REX Ledger tokenization standard network — both logged as context, not used to move P per the sufficiency rule. No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions were found dated within the last two weeks. **P HELD FLAT at 52/60/66/74/85.** This is a **FULL WEEKLY refresh**, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW**, as score set **2026-09-12_draft2**. This morning's 2026-09-12_draft remains the last TRUE committed baseline. **Sept 13-16** light daily catch-ups each independently re-checked and held flat, all **AUTO-STAMPED**, Sept 16 the last TRUE committed baseline before this pillar moved. **Sept 17: held flat a further time** — the only dated news found was Aave's Sept 16 RWA-lending-hub announcement on Avalanche using Tether's USAT, a single-product continuation not clearing this pillar's own bar — **AUTO-STAMPED**, the new last TRUE committed baseline. **SEPT 18: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86 — the first move this pillar has made since Aug 8.** PRIMARY: the SEC issued its "Innovation Exemption" (sec.gov press release 2026-90, published Sept 17, 2026, plus a corroborating statement from Commissioner Uyeda, also on sec.gov), granting Tokenized Securities Venues temporary, conditional, 5-year exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market makers, subject to public-notice, transaction-transparency, stoppage-coordination, books-and-records, and technology-safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May). This is precisely the trigger this report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting, which explicitly said "a formally re-scheduled meeting or published framework would matter" — a published framework is now exactly what happened, and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain, Coinbase's Base launch — both non-US-only), it is a US federal regulator directly authorizing on-chain tokenized-stock trading domestically, the specific structural ceiling this pillar's Other Side section had repeatedly flagged. Sizing front-loaded (1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1) because the exemption is in effect now and immediately actionable, with diminishing effect further out since the 3yr window was already near its practical ceiling and the exemption itself is temporary/conditional and sunsets in 5 years pending further Commission action — an honest counterweight, not a permanent rule, and no venue has yet announced it is live under the exemption as of this research pass. Quant (fully computed, unchanged methodology): P 59/54/59/68/69, BTC \$78,046.80 (2026-09-18). Light daily touch, research capability fully available (WebSearch functioned normally; sec.gov and the Commissioner statement were both directly verifiable), verification passed clean — **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per the delegated daily auto-stamp authority, under which neither the size of the move nor a call-band flip withholds the stamp on their own.

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 19, 2026 · Updated & Re-verified September 18, 2026 (LIGHT DAILY touch, 2026-09-18_draft: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86, on the SEC's Sept 17 "Innovation Exemption" — the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting has been watching since Aug 13-15 — granting US-domestic tokenized-NMS-stock trading via permissioned AMMs, the first structural break of the non-US-only ceiling this pillar has repeatedly flagged; auto-stamped Sept 18) · Updated & Re-verified September 19, 2026 (FULL WEEKLY refresh, 2026-09-19_draft: **HELD FLAT at 58/65/70/77/86** — no Tokenized Securities Venue has announced going live; the objection mechanic makes a live third-party-tokenized NMS stock unlikely before mid-October in most cases; SIFMA and Better Markets publicly pushed back as expected institutional friction, no litigation found; on-chain tokenized-equity holder counts continue climbing (~1.9M addresses, +134% MoM) but that's continuation of an existing trend, not fresh confirmation of the exemption's own impact. DATA is not yet available; used — continuing to cite the last verified ~\$39.2B, Sept 8 figure. This is a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp authority regardless of the size of the move, as the move is not yet confirmed. **HELD FLAT at 58/65/70/77/86** — committed: 58/65/70/77/86 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-verified September 22, 2026 (LIGHT DAILY touch, score set 2026-09-22_draft): carried forward unchanged at 58/65/70/77/86 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-verified September 23, 2026 (LIGHT DAILY touch, score set 2026-09-23_draft): **HELD FLAT at 58/65/70/77/86** — no Tokenized Securities Venue has announced going live; the objection mechanic makes a live third-party-tokenized NMS stock unlikely before mid-October in most cases; SIFMA and Better Markets publicly pushed back as expected institutional friction, no litigation found; on-chain tokenized-equity holder counts continue climbing (~1.9M addresses, +134% MoM) but that's continuation of an existing trend, not fresh confirmation of the exemption's own impact. [illegible]

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. RE-RATED UP this cycle, 52/60/66/74/85 → 58/65/70/77/86, on the SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90) — s

HTTP 403 on repeated attempts this cycle — could not independently re-pull live figures. Relying on the report's own most recent primary pull (Aug 28, from the abandoned daily-catch-up p

Treasuries \$16.00B (-0.93% vs. 30 days ago), across the same 87-product set tracked all cycle. Loosely corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug 19-25; discontinuity, but not an independent primary re-confirmation. This is now the **second consecutive cycle with a negative 30-day reading on tokenized Treasuries specifically** (Aug 22: -0. reconfirmed this cycle, so it does not move P now, but it's flagged for a genuinely independent rwa.xyz pull next cycle since it's the one figure in this pillar closest to actually mattering. Leaders Franklin iBENJI ~\$1.7-1.72B. No new RWA-rail failure, depeg, or counterparty default was found; two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$ 23) — but both are ordinary DeFi protocols, not tokenized-RWA/Treasury rails, and are not applicable to this pillar's risk watch.

★ **NEW — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026, primary):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own statement of exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated transaction-transparency, stoppage-coordination, books-and-records, and technology-safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (Crowdfund Insider, Seeking Alpha, Richey May). This is precisely the trigger this pillar's own table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption matter") — and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain EU/EEA-only, Coinbase's Base launch non-US-only), this is a US federal regulator directly announcing this pillar's Other Side section has repeatedly flagged as the limiting factor. Honest counterweights: "temporary" and "conditional" — this is relief under existing exemptive authority while the Commission has yet announced it is live under the exemption as of this research pass; the order is one day old and un-stress-tested.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value shared by every pillar in the equal-weight model. If tokenization compounds, it pulls trillions of TradFi assets onto rails crypto controls.

★ **NEW — Coinbase launches tokenized-stock trading on Base (Aug 24, primary + 9 outlets):** Coinbase launched tokenized-stock trading — NVDac, METac, AAPLc, GOOGLc (Nvidia, Meta, Apple share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026. Confirmed on Coinbase's tokenized-stocks product page) and corroborated by 9+ independent outlets, all dated Aug 24-25. Eligible to **non-US users only** — structurally identical to the Robinhood Chain precedent (not tokenized-stock trading). Coinbase says more stocks are coming "in the coming weeks." Treated the same way for consistency: real, multi-sourced, does not clear the sufficiency bar alone.

Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25): Standard Chartered's Anchorpoint Financial (backed by Standard Chartered, HKT, Animoca) began institutional launch to include settlement and distribution of tokenized real-world assets. This is a stablecoin launch, not an RWA-tokenization event itself — logged as context, not adopted as a trigger.

For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026: multiple press-release-syndication outlets report this milestone. It predates the Aug 22-29 research window and the audit trail; not treated as new evidence this cycle — using it now would double-count an old fact as if timely.

SEC and DTCC/Nasdaq, unchanged this cycle: no new SEC rulemaking, no-action letter, or press release dated Aug 22-29 was found on a direct sec.gov check; the tokenized-equity "innovation" October 2026 full-launch target is unchanged, no delay reported. Nasdaq's Dec 6, 2026 target is unchanged.

Carried forward, still load-bearing — Franklin Templeton SEC no-action letter (Aug 12, primary, confirmed direct on sec.gov): the SEC's Division of Investment Management issued a 081226 permitting Franklin Templeton to use its own investor-services affiliate, Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain U.S. fund, without physical-certificate requirement, as a cash-management sleeve for other Franklin funds. Confirmed by 7+ independent outlets (The Block, Tech Times, ETHNews, coinpatrika, BigGo Finance). Plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, possibly starting Q4 2026. Genuine but narrow institutional-plumbing positive, already reflected in the commitment.

Aug 3 catalyst (carried forward, committed): BlackRock launched two new tokenized money-market funds — BSTBL (BlackRock Select Treasury-Based Liquidity Fund) and BRSRV (BlackRock Short-Term Reserves Fund) prospectus filing Aug 1. Both hold cash, short-term Treasuries, and repo agreements; BRSRV is purpose-built as a reserve asset for stablecoin issuers, targeting GENIUS Act eligibility. Security audit BUIDL. Confirmed by 7+ independent outlets.

GENIUS Act status, unchanged this cycle: Treasury's Section 3 NPRM (Federal Register, Aug 18, comment deadline Oct 19) and the joint FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Program milestones — no new rulemaking action found Aug 22-29. No final rule expected until 2027. An unchanged, already-priced mild headwind against the Jan 18, 2027 statutory effective date —

The Claim

The thesis, and where I differ from the consensus — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; HELD FLAT — no venue live yet under the Sept 17 exemption, SIFMA/Better Markets all-inclusive)

The crowd: is treating Coinbase's Aug 24 tokenized-stock launch on Base as the moment tokenized equities go mainstream. It's a real, well-documented development — 9+ independent outlets reporting to the Robinhood Chain launch this report already priced in as insufficient alone. Treating a geography-restricted product launch as the catalyst risks exactly the kind of overreach this report has warned against, and I'm careful below not to overreact to it either.

Me: RE-RATING UP, 52/60/66/74/85 → 58/65/70/77/86. The SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary, plus Commissioner Uyeda's statement, corroborated by 7+ independent outlets) is a conditional exemptive relief to trade tokenized NMS stock via permissioned AMMs — for the first time, this is US-domestic access, not another geography-restricted launch. It's exactly the trigger for the meeting cancellation. I'm sizing it front-loaded (1mo +6, tapering to 3yr +1) because the exemption is in effect now and immediately actionable, but I'm deliberately not treating it as a permanent Commission action, and no venue has yet announced it's actually live under it. That's why 3yr moves only +1 despite the exemption being the biggest structural development this pillar has logged.

The Aug 29 full weekly dive (still the last full re-dig): a dedicated primary-source pass found one genuine, multi-sourced development that week (Coinbase's Base tokenized-stock launch) that triggered the stablecoin launch (Anchorpoint's HKDAP), no new SEC rulemaking dated Aug 22-29, and unchanged DTCC/Nasdaq timelines. An Aug 28 daily catch-up draft was written but never delivered and four straight cycles (Aug 29, Aug 31, Sept 1, Sept 2).

My edge: this pillar's discipline is to notice when institutions actually ship product accessible to the broad market this pillar scores, not just when they announce intent or ship into a single excluded venue, honestly rather than paper over them with secondary sources dressed up as primary ones. Today, for the first time, that discipline cuts the other way: the SEC's Innovation Exemption is exactly the trigger I've been waiting for, so 1mo moves the most (+6) precisely because it's immediately actionable. 12mo/36mo move least, not because the GENIUS Act headwind changed, but because the exemption itself is the practical ceiling.

The Sept 19 full weekly dive (the first full re-dig since the Sept 18 re-rate): same discipline, applied against the new baseline — a dedicated primary-source pass (11 WebSearch queries) found the issuer-notice-and-objection window means "live" is unlikely before mid-October in most cases — exactly the kind of "announced intent, not shipped product" gap this pillar refuses to score early. No new negative, and no litigation has been filed. The ~1.9M-address holder-count figure is a real number but a continuation of an existing growth curve, not confirmation the exemption itself is working. Product, applied to adoption metrics instead of launches. And when this week's rwa.xyz reads came back internally inconsistent, the discipline is the same as ever: flag the gap, don't quietly suppress the direction — **HELD FLAT at 58/65/70/77/86.**

The Facts

As of September 19, 2026, independently re-verified through a dedicated FULL WEEKLY primary-source research pass (11 WebSearch queries) — hard numbers with exact dates, sources on the last page. Covers the Sept 18 review (full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy, regardless of evidence quality).

- ★ ★ **No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17, 2026 "Innovation Exemption."** A structural detail worth logging: for any NMS stock tokenized under the exemption, a minimum 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decryp). A party-tokenized NMS stock could legally trade under it is roughly mid-October — mostly outside a 1-month window from today. This is a reason for near-term caution baked into keeping 1mo.
- **SIFMA issued a public statement (sifma.org, primary, Sept 2026)** raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets all-inclusive implicit in "temporary/conditional" — no litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- **DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026** per DTCC's own May/July 2026 press materials, corroborated by CBO. "October, unconfirmed this week" is the working assumption, not a positive surprise; doesn't move P.
- **On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month)** per AMBCrypto and CoinGabbbar (both Sept 2026, likely drawing on the same underlying data). Confirms continuing adoption momentum but is a continuation of a pre-existing growth trend, not specific new evidence about the Sept 17 exemption's real-world uptake — doesn't independently move.
- ★ ★ **DATA GAP, flagged not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date in the sandbox). Continuing to cite the last independently verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number; the discrepancy is flagged explicitly rather than silently upon.
- **No corrections needed** to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up below — still true, now still true two days later. No new market-price/odds.
- **Research capability:** full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attempt. Direct fetches — a partial research-depth limitation, flagged honestly, not a capability failure.
- **Score decision: HELD FLAT at 58/65/70/77/86.** Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. **LEFT AS DRAFT, AWAITING** from Alex's delegated daily auto-stamp authority regardless of evidence quality or move size (here, zero).

Carried forward from September 18, 2026 (LIGHT DAILY touch, RE-RATED UP; still relevant background):

- ★ ★ **NEW, PRIMARY — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own (5-year) exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned transparency, stoppage-coordination, books-and-records, and technology-safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (Seeking Alpha, Richey May). This is precisely the trigger this report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting (Robinhood Chain EU/EEA-only, Coinbase's Base launch non-US-only), this is US-federal-regulator-authorized domestic tokenized-stock trading, the exact structural ceiling this pillar's Other
- **Honest counterweights, same day:** "temporary" and "conditional" — this is relief under existing exemptive authority while the Commission takes public comment on further steps, not a permission research pass; the order is one day old and un-stress-tested.
- **Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.** Sizing front-loaded: 1mo +6 (58) — in effect now, immediately actionable; 3mo +5 (65); 6mo +4 (70); 1yr +3 (77) — some window was already near its practical ceiling and the exemption itself sunsets in 5 years. **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per delegated daily authority.

Carried forward from September 12, 2026 FULL WEEKLY refresh (independently re-confirmed through Sept 17, still relevant background):

- ★ ★ **rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026** (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late Aug to new milestone. Six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B — a structural-breadth note.
- ★ ★ **DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed ON SCHEDULE, no delay** (primary: DTCC.com, corroborated by Forkast). Remains the unchanged, operative forward catalyst; the July 15 live-production trades are already priced in.
- **Two freshly-dated items this week, each effectively single-source** (a press release syndicated across many aggregator sites, not independently reported) — incremental infrastructure news rule: (a) Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; (b) Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain network.
- **No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions found dated within the last two weeks.**
- **Score decision: P HELD FLAT at 52/60/66/74/85.** Nothing this cycle is both newly dated within the lookback window and clears the primary-source-or-2+-independent-outlets bar for a material continuations, and the two freshly-dated items are single-source-equivalent. **LEFT AS DRAFT** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority.

Carried forward from August 29, 2026 (independently reconfirmed that cycle, still relevant):

- ★ ★ **NEW, primary + 9 outlets — Coinbase launches tokenized-stock trading on Base (Aug 24):** NVDaC, METaC, AAPLc, GOOGLc (Nvidia, Meta, Apple, Alphabet), each backed 1:1 by a permission Coinbase received Aug 11, 2026. Confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25. Eligible to non-US users only — the same structural insufficient alone. Coinbase says more stocks are coming "in the coming weeks."
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed Anchorpoint Financial began institutional distribution of HKDAP, a Hong Kong-dollar RWAs. A stablecoin launch, not an RWA-tokenization event — logged as context only.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29** found on a direct sec.gov check; the tokenized-equity "innovation exemption" meeting remains canceled with no
- **DTCC's October 2026 full-launch target and Nasdaq's Dec 6, 2026 target are both unchanged** — no delay reported this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found.** Two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$8.5M, A both are ordinary DeFi protocols, not tokenized-RWA/Treasury rails, and are not applicable to this pillar's risk watch.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** (multiple press-release-syndication outlets) — this predates the Aug 22-29 window and appears to have been missing evidence this cycle.
- ★ ★ **Data-quality flag — rwa.xyz direct access blocked this cycle (Aug 29):** app.rwa.xyz returned HTTP 403 on repeated attempts; could not independently re-pull live figures. Relying on the draft: total RWA distributed value \$38.69B (+3.04%/30d); tokenized Treasuries \$16.00B (-0.93%/30d). Loosely corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug discontinuity, but not an independent re-confirmation.
- ★ ★ **NEW — second consecutive negative 30-day reading on tokenized Treasuries:** Aug 22 read -0.39%, Aug 28 read -0.93% — both sub-1% in absolute magnitude, and this cycle's figur genuinely independent rwa.xyz pull next cycle — it's the one thing in this pillar closest to actually mattering.
- **BTC (pipeline reference) closed at \$77,666.16 on Aug 29** — up modestly from \$77,266.84 on Aug 22 (Bitstamp).

Carried forward from Aug 22 (independently reconfirmed that cycle, still relevant):

- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** total RWA distributed value \$38.32B, +2.30% vs. 30 days ago — essentially flat versus the Aug 16 baseline (\$38.17-38.24B); normal drift, no c
- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** tokenized US Treasuries \$15.98B, -0.39% vs. 30 days ago, across 87 products — the first slightly-negative 30-day reading this pillar had track
- ★ **Primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** the SEC's Division of Investment Management issued a no-action letter dated 2026-08-12 (sec.gov Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain U.S. Government Money Fund (BENJI, on Stellar), carved out of Rule 17f-2's phy Times, ETHNews, coinprika, BigGo Finance, UEX, KuCoin), all dated Aug 12-13. Separately, Bloomberg (Aug 20) reports a plan to embed tokenized BENJI shares inside conventional ET
- ★ **SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** a planned SEC meeting on the exemption, expected around Aug 14, was canceled/p Bloomberg/Yahoo-sourced coverage) attributes the delay to White House concerns and SIFMA opposition, plus a stated desire not to unsettle tokenization-adjacent provisions being negotiat the causal level. Still canceled, no new date announced as of Aug 29.
- **GENIUS Act rulemaking proceeded on its pre-set procedural schedule:** Treasury's Section 3 NPRM was published in the Federal Register Aug 18 (comment deadline Oct 19), and the jo 0101 / OCC-2026-0331) closed on schedule Aug 21, 2026 — process, not news; no rule has been finalized. Too soon to score.
- ★ **Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock trading volume on Robinhood Chain crossed \$1B cumulative as of Aug 21 (multi-source: crypto.news, cryptoco observed in Coinbase's Aug 24 Base launch.

Carried forward from Aug 17 (independently reconfirmed, still relevant):

- **Multi-sourced (The Block, crypto.news, Benzinga, Blockzeit) — Aug 17:** SEC Chair Atkins met with President Trump, CFTC Chair Selig, NYSE, CME, DTCC, and crypto firms; the SEC and CFTC launched an Innovation Advisory Committee. Per crypto.news, the discussed 24/7 tokenized-stock "innovation exemption" remained explicitly exploratory — "no final framework, eligibil a separate, formal SEC meeting specifically on the exemption, expected ~Aug 14 (i.e., before this Aug 17 multi-agency meeting), was itself reported canceled/postponed (Aug 13-15 reporting exemption track it discusses remains stalled.

Carried forward from Aug 16 (still load-bearing):

- **No new dated RWA/tokenization catalyst was found as of Aug 16.** General web search had surfaced only recirculating market-size commentary — a \$33.5B "liquid on-chain value" figure own tracked \$38.17B distributed-value number already in this report; not adopted as a replacement metric.

Carried forward from Aug 9-14 (still load-bearing):

- **rwa.xyz's Aug 9 pull, reconfirmed Aug 14 with added product-level detail:** tokenized Treasuries \$16.21B across 87 products and 63,010 unique addresses; Circle's USYC leads at \$3.00 \$1.72B — the same dated figures already in this report, not a new catalyst.
- **rwa.xyz's \$38.17B total distributed-value print, dated Sunday Aug 9 (Bitcoin News, CoinSpectator), is the same all-time-high move already folded into prior sets' language** — still

Carried forward from Aug 8-9 (still load-bearing):

- ★ **Total RWA distributed value hit a new all-time high of \$38.24B** (rwa.xyz direct pull, Aug 8), up from \$34.67B roughly two and a half weeks earlier — a genuine +10% move, not stagnation (87 products, 62,997 holders, 7d yield 3.29%).

- ★ **★ CORRECTION, again — the \$34.67B figure was never "tokenized Treasuries."** KuCoin's "Tokenized Treasuries Dip to \$34.67 Billion" headline (~Jul 22) mislabels the total-RWA distributed-value figure as a Treasuries number (the figure was caught twice. Do not cite that figure as a Treasuries number anywhere in this system).
- ★ **★ NEW — the Central Bank of Ireland cleared Aviva Investors' tokenized USD Liquidity Fund on the XRP Ledger (Jul 29)**, the first time a major EU regulator has approved a public-blockchain-based fund (the fund is a public-blockchain-based layer) — confirmed by 6+ independent outlets, missed entirely by the daily "no new catalyst" checks.
- ★ **★ NEW — Ripple took equity stakes in Zilo and Licuido (Aug 3)**, converting a commercial relationship into ownership and adding regulated transfer-agency, issuance, and collateral-mobility to the network (press release + 5 outlets).
- **rwa.xyz also separately reports a "Represented Asset Value" of \$373.55B** (down 1.70% over 30 days) — a different metric (off-chain assets referenced via tokenization infrastructure, not the on-chain distributed-value figure).
- **No new RWA-rail failure, depeg, or counterparty default found** in the Jul 30 - Aug 8 window.

Carried forward from Aug 6-7 (still load-bearing):

- **GENIUS Act rulemaking status:** FDIC's BSA/AML comment period closed Aug 4; a joint five-agency CIP comment period runs through Aug 21; no agency has published a final rule. Realist's statutory effective date — an already-priced, mild headwind.

Carried forward from Aug 6 (still load-bearing):

- ★ **BlackRock launched two tokenized money-market funds on Aug 3, 2026.** BSTBL and BRSRV, following an SEC prospectus filing Aug 1, via Securitize (same transfer agent as BUIDL), tPMMNTS, Cointribune, BitcoinWorld, Solana Compass, and CoinPaprika (7 independent outlets).

Carried forward from the July 30 full refresh (still load-bearing):

- ★ **★ CORRECTION — the "\$34.67B tokenized Treasuries pulling back" headline circulating this week (and cited in the Jul 29/30 daily touches) is a metric mislabel, again.** That figure was a conflation of tokenized Treasuries specifically — the same conflation an earlier full refresh already corrected once. Multiple outlets (including one whose own body text contradicts its headline, admitting "tokenized Treasuries" but then showing a pull from rwa.xyz pull (Jul 30) shows tokenized Treasuries at **\$16.18B**, essentially flat versus \$16.20B a week ago — not declining).
- ★ **NEW, direct pull — BlackRock's BUIDL continues recovering, not declining.** BUIDL sits at **\$2.64B** (Jul 30), up from \$2.52B (Jul 22 wobble low) and \$2.61B (Jul 25) — a steady +4.8% recovery forward from a stale Jul 22 snapshot.
- ★ **NEW, confirmed 4+ outlets — Robinhood Chain's on-chain RWA activity jumped roughly 5x to ~\$70M (Jul 25).** Tokenized-stock trading grew in size, with tokenized SpaceX overtaking Cryptopolitan, Incrypted, Crowdfund Insider). TVL roughly tripled to ~\$312M, though stablecoins/memecoins still dominate overall activity. Separately, a Jul 29 report cites \$885.5M in Robinhood Chain concentration conflated with the RWA-value numbers above.
- ★ **NEW — Securitize Capital (BlackRock BUIDL's transfer-agent/tokenization partner) registered with the SEC as an investment adviser (Jul 27)**, and Citi initiated a Buy rating on Securitize (positive side sentiment).
- **All-RWA totals, direct pull (Jul 30): Distributed Value ~\$36.93B** (+0.3% over 5 days), **Represented Value ~\$370.55B** (~2.6% over 5 days, single-pull, unconfirmed trend), **stablecoin total ~\$1.6T** (+0.1% over 5 days).
- **GENIUS Act: no new final rules in this window.** FDIC's BSA/sanctions comment window remains open (closes Aug 4); the joint CIP comment window remains open (closes Aug 21). No agency has published a final rule.
- **DTCC's tokenization pilot continues as planned** — Russell 1000 stocks/ETFs/Treasuries, 50+ firms including BofA, Citi, Morgan Stanley, Robinhood, Circle, Ondo, Anchorage; October 2026 full-service launch reconfirmed on schedule.
- **Risk check: clean window, no new incidents.** No RWA-protocol hack, tokenized-treasury depeg, or counterparty failure found Jul 25-30 (the Jul 15 Ostium oracle exploit, ~\$18-24M, remained isolated; Chain concentration remains an unresolved fragility point, not re-verified this cycle).
- **OUSD (Open USD) 140+-partner credibility dispute (Samsung/Dunamu/Upbit denials) remains unresolved** — no new statements found this window.
- **The treasury leaderboard, July 30 (rwa.xyz, direct pull):** Circle's **USYC \$3.01B** > BlackRock's **BUIDL \$2.64B** > Ondo's **USDY \$2.15B** > Franklin Templeton's **iBENJI \$1.76B** > Centrifuge's **USDC \$1.6B**.
- **Circle won final OCC approval for a national trust bank (Jul 10, carried forward).** "Circle National Trust" puts Circle under direct federal (OCC) oversight for fiduciary digital-asset custody.
- **Swift's blockchain ledger (17 banks, 6 continents, carried forward)** continues running 24/7 cross-border tokenized-deposit payments over Chainlink CCIP — framed as banks' competitive advantage.
- **Ondo keeps extending its franchise (carried forward):** Broadridge proxy-voting partnership, IVV/Micron tokenization, "Ondo Perps." Ondo DAO also voted to burn 100M ONDO (1% of supply).
- **Nasdaq and the SEC: no change.** Nasdaq's 23/5 tokenized-trading target remains Dec 6, 2026, unchanged.
- **The TAM anchor stands:** BCG × Ripple (Apr 7, 2025) projects **~\$9.4T by 2030 / \$18.9T by 2033**. Current on-chain value is still **<1%** of any endpoint.

The Prize

Illustrative only — not price targets, not advice

The cleanest single-token anchor is still **ONDO**, the name most tied to the RWA narrative: from its early-trading price around **\$0.22 (Jan 2024 — listing prints vary by venue)** it ran to a **\$2.14** (Jul 25) peak, then retraced to a **\$1.6B** (Jul 25) low, then recovered to a **\$2.64B** (Jul 30) high. The round-trip, last checked July 13 (CoinGecko, not re-pulled live this cycle): **\$0.3291** — market cap ~\$1.6B, still ~85% below the high — even as the company keeps extending its franchise (the token burn on Jul 25). Part of the Dec-2024 spike was a Trump-linked World Liberty Financial buy, not fundamentals. The durable signal stays structural, not one token: total RWA distributed value ~\$38.69B, Aug 28, continuation of the already-priced growth curve, not a new milestone; six asset categories now each exceed \$1B) and tokenized Treasuries last confirmed near \$16.00B (~1% and not independently reconfirmed since) while the token trades ~85% off its peak, and the confirmed institutional moves stacked through this cycle — BlackRock's Aug 3 fund launch, Franklin Templeton's Sep 17 launch on Base (non-US only), DTCC's October 2026 full-service launch reconfirmed on schedule, and now the SEC's Sept 17 Innovation Exemption authorizing US-domestic tokenized-stock trading. No single token's price, even where each individually (until today) fell short of this pillar's sufficiency bar. Pipeline reference: BTC closed at \$81,224.46 on Sept 19, up sharply from \$78,046.8 on Sept 18. The Prize doesn't feed the math — it tells you what the lean is worth acting on, euphoria and round-trip included.

The Other Side

The strongest honest case this is wrong — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; still valid, plus one new item below on the exemption's own timing mechanic)

- **★ Partly answered today, worth stating plainly: the "non-US-only ceiling" critique this section has raised three separate times (BlackRock funds, Robinhood Chain, Coinbase's tokenized-equity launch) — but only partly.** The exemption is temporary (5 years), conditional (public-notice/transparency/safeguard conditions, sunsets pending further Commission action), and as of this research period the regulatory framework is not the same as adoption. The honest read is the structural ceiling cracked, not that it disappeared; this pillar will be watching for an actual live US venue as the next real trigger.
- **The data-access gap flagged repeatedly this cycle (rwa.xyz 403s) is a real weakness that predates today's re-rate** and wasn't resolved by it — this pillar's core primary growth metric is still broken.
- **Tokenized Treasuries posted two consecutive negative 30-day readings in late August** (-0.39% Aug 22, then -0.93% Aug 28) — still sub-1% each and not independently reconfirmed since.
- **Coinbase's tokenized-stock launch, and the pattern before today, is easy to overstate in hindsight.** Nine-plus outlets covered it and there's a real regulatory permission behind it, but it's a one-time tokenized-equity launch (BlackRock funds, Robinhood Chain, then Coinbase) that didn't actually reach the US market. Today's exemption is the first to change that pattern, but it is one day of permission.
- **An Ondo Stocks milestone from Aug 15 was missed for two full cycles.** That's a real research-process miss, caught only in hindsight — a reminder that "no new catalyst found" claims in this space are often premature.
- **Regulatory limbo is still real.** The GENIUS Act's rulemaking deadline was missed and zero of six agencies have finalized rules; the CIP comment window closed Aug 21 but produced no rule. The SEC's tokenized-equity exemption meeting remains canceled with no rescheduled date as of Aug 21.
- **The RWA totals are still a small, largely institutional/permissioned number.** ~\$38-39B in total distributed value is real growth, but it's still under 1% of the BCG×Ripple \$9.4T-by-2030 TAM. The mislabeled RWA figures — a reminder that headline numbers in this space need active skepticism, not just repetition.

- **It may not be "crypto."** Most volume is permissioned/institutional and may never accrue value to crypto majors. Durable market-structure law (CLARITY) still isn't passed — a reminder that exactly the kind of novel development that would break a routine hold.
- **★ NEW this cycle — the exemption's own 30-day issuer-notice-and-objection mechanic is a real structural brake, not a footnote.** Any NMS stock tokenized by an unaffiliated third party takes 30 days, and the issuer can object and block it outright — meaning the earliest a third-party-tokenized NMS stock could legally trade under the exemption is roughly mid-October, and issuers that gap this section flagged Sept 18; it's now dated and specific rather than a general caution. SIFMA's and Better Markets' public pushback (Sept 2026) is the expected institutional friction this signals, a materially different signal than a comment letter.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set August 29, 2026 (full weekly refresh); re-checked August 31 through September 17, 2026 (light daily catch-ups, full weekly refreshes) — no char planned RWA lending hub on Avalanche (Tether's USAT) is single-product continuation, not independently trigger-worthy — no P move. **FIRE**D Sept 18: the SEC's tokenized-equity exemption meeting row below — flagged sin matter" — is now marked FIRE

DATE	EVENT
Logged, not scored (Sept 23-24, surfaced this Sept 26 full weekly refresh)	NYSE Group / Blockchain.com MOU (primary: ir.theice.com; 6+ independent outlets incl. Yahoo Finance, PYMNTS, Decrypt, Blockhead, News.Bitcoin.com): Blockchain.com's 44M+ users to eventually access tokenized NYSE-listed equities/ETFs via NYSE's planned digital ATS — exploratory, "subject to any required regulatory approvals," no launch date, no TSV filed, platform not live
Logged, not scored (Sept 24)	CFTC staff released updated FAQs (cftc.gov primary, corroborated by 7+ independent outlets incl. Unchained, CoinPaprika, Cryptonomist) clarifying that customer funds may be invested in tokenized forms of otherwise-permitted investments, and that blockchain-based systems can satisfy CFTC recordkeeping requirements without redundant off-chain copies
Watch, not fired (checked Sept 19)	No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 Innovation Exemption. Structural detail: for any NMS stock tokenized by an unaffiliated third party, the TSV must give the issuer written notice and wait a minimum 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18) — the earliest a third-party-tokenized NMS stock could legally trade is roughly mid-October, mostly outside a 1-month window from today
Logged, not scored (Sept 19)	SIFMA issued a public statement (sifma.org, primary, Sept 2026) raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets separately criticized the exemption. No litigation filed as of Sept 19
Checked Sept 19, unconfirmed	DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) remains slated per DTCC's own May/July 2026 press materials, corroborated by Coindesk/CNBC/FFNews — no update this week confirming or denying it's still on track
FIRED Sept 18, 2026	The SEC issued its "Innovation Exemption" (sec.gov press release 2026-90, primary + Commissioner Uyeda statement; 7+ independent outlets): temporary 5-year conditional exemptive relief letting Tokenized Securities Venues trade tokenized NMS stock via permissioned AMMs, plus a companion dealer exemption for AMM liquidity providers, subject to public-notice/transparency/safeguard conditions with a comment period open
Checked Sept 13, no change	No dated catalyst found Sept 12-13 — no new rwa.xyz pull beyond the \$39.2B Sept 8 primary read already priced, and no rail failure, depeg, or counterparty default. DTCC's October 2026 full-service launch (Russell 1000 equities, major ETFs, Treasuries) remains unchanged and on schedule
Checked Sept 2, no change	No dated catalyst found Sept 1-2; the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events
Checked Sept 1, no change	Only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot); no fresh dated catalyst, no rail failure/depeg/counterparty default
Fired Aug 24, 2026	Coinbase launched tokenized-stock trading (NVDaC/METAc/AAPLc/GOOGLc) on its own Base blockchain, 1:1 Alpaca-custodied, under an ADGM permission received Aug 11; primary + 9 outlets. Non-US users only
Fired Aug 24-25, 2026	Standard Chartered-backed Anchorpoint began distributing HKDAP, a HK-dollar stablecoin citing RWA settlement/distribution as a use case
Checked Aug 29, unresolved	rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts — could not independently re-pull live figures this cycle; relying on the Aug 28 carried-forward primary pull
Checked Aug 28 (carried forward), watch	Tokenized Treasuries posted a second consecutive negative 30-day reading: -0.93% to \$16.00B, following -0.39% Aug 22
Aug 28, not delivered	A daily catch-up draft (2026-08-28_draft) was written but never rendered, selfchecked, archived, or committed — abandoned, not trusted at face value
For the record, dated Aug 15	Ondo Stocks crossed \$1.01B TVL (press-release syndication) — predates this research window, missed by the Aug 22 pass
Fired Aug 21, 2026	Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only. CEO Tenev called (Aug 18) for a US framework
Fired Aug 21, 2026	GENIUS Act joint CIP comment period (FinCEN-2026-0101 / OCC-2026-0331) closed on schedule (Federal Register; Freshfields, Sullivan & Cromwell memos; Forkast) — procedural close only, no rule yet; final rule anticipated 2027, compliance 12mo after
Fired Aug 18, 2026	Treasury's GENIUS Act Section 3 NPRM published in the Federal Register — comment deadline Oct 19, 2026
Fired Aug 18-19, 2026	SEC formally proposed "Regulation Crypto Assets" (sec.gov press release 2026-76) — startup (≤\$5M/4yr) and fundraising (≤\$75M/12mo) exemptions plus an investment-contract safe harbor for NEW crypto-token capital formation; scoped away from tokenization of existing real-world securities
Fired Aug 13-15, 2026; RESOLVED Sept 18	SEC's planned tokenized-equity "innovation exemption" meeting (expected ~Aug 14) was CANCELED/postponed (Ledger Insights, CryptoTimes, CoinReporter, Bloomberg/Yahoo-sourced coverage) — cited causes: White House concerns, SIFMA opposition, CLARITY Act friction; causal reasons not independently corroborated
Fired Aug 12, 2026	SEC no-action letter (confirmed direct on sec.gov) lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar); Bloomberg (Aug 20) reports a plan to embed BENJI in conventional ETFs/mutual funds, possibly Q4 2026
Fired Aug 17, still watch	SEC Chair Atkins met Trump, CFTC Chair Selig, NYSE, CME, DTCC, crypto firms; SEC reportedly proposed rules exempting certain token offerings, CFTC launched Innovation Advisory Committee — superseded by the Aug 13-15 cancellation above
Checked Aug 22 draft2, flat/first-negative	Direct rwa.xyz pull (primary): total distributed value \$38.32B (+2.30%/30d, flat), tokenized Treasuries \$15.98B (-0.39%/30d, first slightly-negative 30d reading tracked) — both confirmed distinct and clean; the Aug 20 draft's "\$13.7B Treasuries" scraping-artifact conflict is not reconfirmed
Aug 17-21, not delivered	Drafts written Aug 17, 18, and 20 were never delivered; an Aug 21 session delivered the Aug 20 numbers into only two of six reports before stopping — none trusted at face value; independently re-verified this cycle
Jul 29 - Aug 8	Total RWA distributed value hit a new all-time high (~\$38.2B); Central Bank of Ireland cleared Aviva's XRPL fund; Ripple took equity in Zilo/Licuido
Fired Aug 3	BlackRock launched BSTBL and BRSRV, two tokenized money-market funds targeting GENIUS Act stablecoin-reserve eligibility, via Securitize

Watch	Whether BRSRV actually gets adopted by a major stablecoin issuer as reserve backing, or stays unused
Watch	Whether the Aviva/Ripple XRPL institutional build-out attracts further EU-regulated fund launches, or stays a one-off
Ongoing	GENIUS Act: zero of six agencies have finalized rules; FDIC comment window closed Aug 4, joint CIP window closes Aug 21
Oct 2026	DTCC tokenization full launch — target unchanged
Dec 6, 2026	Nasdaq 23/5 tokenized trading — SEC-approved target launch (unchanged)
Jan 18, 2027	GENIUS Act 18-month statutory backstop effective date
H1 2027	Nasdaq equity-token services "operational" · bank Tokenized Deposit Network go-live · DTCC-Stellar public-chain deployment target
Any time	Tokenized-treasury depeg / counterparty failure (USYC's Binance/BNB-Chain concentration, not re-verified this cycle)

The flip line: if the GENIUS rules drift into Q4 unfinished, the DTCC and Nasdaq launches slip past their October and December windows, and the growth that remains keeps rotating to permissioned rails, bank failing. Adoption that never touches public, crypto-controlled rails is TradFi, not crypto.

P (2026-09-26_draft2, DRAFT, FULL WEEKLY REFRESH — HELD FLAT): 58 / 65 / 70 / 77 / 86 · Prior committed P (2026-09-26_draft, light daily touch, Signals (unchanged): 1mo +1.15 · 3mo +2.11 · 6mo +2.72 · 1yr +3.37 · 3yr +4.03 · My Weight: 20% (equal) · Impact: 8 (uniform) · Master (equal-weight +2.81 (Bear/Bear/Mild Bear/Mild Bull/Bull) · THE FINAL NUMBER: -0.07 equal-weight (Neutral) / +0.47 horizon-weighted (Neutral) · Leave-one-out with that moved this cycle; THIS pillar is unchanged and did not drive this cycle's move.

Sept 26 **LIGHT DAILY touch** (score set 2026-09-26 draft), prior version: checked for changes since the Sept 23 committed baseline. One dated item found: CFTC staff released updated FAQs Sept 24 on Paprika, Digital Today, Cryptonomist, UseTheBitcoin, Hokanews, and CryptoTimes) clarifying that customer funds may be invested in tokenized forms of otherwise-permitted investments, and that block-off-chain copies. Genuine, dated, and well-sourced, but this is staff guidance applying EXISTING rules to a blockchain context, not a new rule, a live venue, or a product launch – consistent with this pillar (the treatment of the TSV notice mechanic and the Sept 23 Selig speech), it is **LOGGED, NOT SCORED**. No Tokenized Securities Venue has yet announced going live under the SEC's Sept 17 exemption; DT has this cycle; no tokenized-treasury depeg or counterparty incident found. **P HELD FLAT at 58/65/70/77/86**. This is an ordinary light daily touch, research capability was fully available (WebSearch clean), no **runbook's delegated daily authority**. Iran War Risk is the only pillar that moved this cycle (a reversal of its own Sept 23 re-rate) – see that report.

Sept 19 FULL WEEKLY refresh (score set 2026-09-19_draft), prior version: independently re-verified via extensive WebSearch (11 queries) — no Tokenized Securities Venue has announced going live, a TSV to give the issuer written notice and wait a minimum 30 calendar days before trading can start (with the issuer able to object and block it outright), making mid-October the earliest realistic date for a corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io) — a reason for near-term caution already baked into the modest 1mo score, not a reason to cut it further. SIFMA issued a public urging formal notice-and-comment rulemaking, and Better Markets separately criticized the exemption — expected institutional pushback, no litigation filed, not new negative information. DTCC's October 2 this week either way. On-chain tokenized-equity holder counts continue climbing (~1.9M addresses, +134% MoM per AMBCrypto/CoinGabbbar) — continuation of a pre-existing growth trend, not fresh confirmation of this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B vs. \$23.25B for adjacent dates) that could not be verified directly (WebFetch to app.rwa.xyz blocked on 8) rather than report an unreliable number. WebFetch to sec.gov and app.rwa.xyz was also blocked this cycle for every domain attempted, so primary-source content relies on WebSearch's indexed summary of a capability failure. **P HELD FLAT at 58/65/77/77/86.** This is a FULL WEEKLY refresh, categorically excluded from Alex's delegated daily auto-stamp authority regardless of the size of the move (here, zero), and remains the last TRUE committed baseline.

Prior cycle (Sept 16 light daily touch): re-checked — no new dated rwa.xyz pull beyond the \$38.89B mid-September read already priced Sept 15; no rail failure, depeg, or counterparty default. **P HELD FLA**

Prior cycle (Sept 12 light daily catch-up, this morning): re-checked — no new dated catalyst found. RWA.xyz aggregate reads (~\$38B tokenized value by late August) read as continuation of already-priced catalyst. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 12, 2026 (2026-09-12_draft) — the last TRUE committed baseline.** Iran War Risk was the only pillar that moved that cycle.

Prior cycle (Sept 10 light daily catch-up): re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst.

Prior cycle (Sept 9 light daily catch-up): re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct pull, read as catalyst. **AUTO-STAMPED SEPTEMBER 9, 2026.**

Prior cycle (Sept 8 light daily catch-up): re-checked via WebSearch — no new dated catalyst found; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 8**

Prior cycle (Sept 6 light daily catch-up): re-checked via WebSearch — DTCC's October launch remained the operative unchanged catalyst, no new dated milestone. **AUTO-STAMPED SEPTEMBER 6, 2023**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch, no new dated catalyst found. **P HELD FLAT at 52/60/66/74/85. COMMITTED B**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/score session. The last TRUE committed baseline for this pillar remains **2026-09-02_draft (52/60/66/74/85), auto-stamped Sept 3**. Not corrected retroactively in scores.json — stamping is Alex's call.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat, no dated catalyst found Sept 1-2. This shared score set was originally left as draft only because Iran War Risk's sharp re-rate pillar — **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Prior cycle (Sept 1 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 31-Sept 1; none found — only stale/recycled RWA market-size summaries turned committed baseline.

Prior cycle (Aug 31 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 29-31; none found — sector-level figures cited that window (total tokenized RWA Aug 9 rwa.xyz snapshot) were consistent with the Aug 28 pull already priced in, not a fresh catalyst; rwa.xyz was not independently re-pulled. P held flat, AUTO-STAMPED.

Prior cycle (Aug 29 full weekly refresh) — carried forward for context: this was the first full weekly refresh since Aug 22 draft2 — an independent primary-source pass that does not take the abandoned, new 52/60/66/74/85. The week's one genuine, multi-sourced development is Coinbase's Aug 24 launch of tokenized-stock trading (NVDAC/METAC/AAPLC/GOOGLc) on its own Base blockchain, under an ADG — not-US-only, the same structural limitation that already kept the Robinhood Chain launch from clearing this pillar's bar; treated the same way for consistency. Standard Chartered-backed Anchorpoint's rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check Aug 22-29, and DTCC's October 2026 / Nasdaq's Dec 6, 2026 targets are unchanged. **rwa.xy** access gap, flagged for next cycle — so this pass relies on the report's most recent primary pull (Aug 28, carried forward from the abandoned draft): total distributed value \$38.69B (+3.04%/30d), tokenized on Treasuries specifically (Aug 22-: 0.39%). Still sub-1% and not independently reconfirmed this cycle — not sufficient alone to move P, but worth a genuinely independent re-pull next cycle. No new RWA-Finance, Arrakis, both Aug 23) don't apply to this pillar's risk watch. Nothing here clears the sufficiency bar to move P.

(That Aug 29 cycle was left as a draft solely because full weekly refreshes are categorically excluded from delegated daily auto-stamp authority, regardless of evidence quality — not for any evidentiary rea

The June committed scores (**53 / 57 / 62 / 72 / 85**, committed June 19, 2026) and every committed set from Aug 8 through Sept 17 (52/60/66/74/85) show this pillar held flat for six weeks; **today's Sept 18** (committed) → Aug 28 draft (abandoned, not delivered) → Aug 29 full weekly refresh (held flat, left as draft) → Aug 31 light daily catch-up (held flat, AUTO-STAMPED) → Sept 1 light daily catch-up (2026-09-05 draft) → **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** → Sept 3 (no new score set, held flat) → Sept 5 light daily catch-up (2026-09-05_draft, held flat → commit message wrongly claimed auto — COMMITTED BY ALEX SEPTEMBER 5, 2026) → Sept 6-12 light daily catch-ups (held flat, AUTO-STAMPED) → Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, held flat, left as draft, committed by 17 the last TRUE committed baseline) → **Sept 18 (2026-09-18_draft), RE-RATED UP TO 58/65/70/77/86 on the SEC's Innovation Exemption — COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026 (19_draft, this version), HELD FLAT at 58/65/70/77/86** — no venue live yet under the exemption (30-day issuer-notice mechanic makes mid-October the earliest realistic date), SIFMA/Better Markets push for count growth read as continuation not fresh confirmation, and this week's rwa.xyz reads flagged as internally inconsistent and not used — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW** (full w/o regard of move size).

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

FULL WEEKLY refresh, September 26, 2026 (score set 2026-09-26_draft2, draft, awaiting Alex's stamp) — checking for changes since the 2026-09-26_draft committed baseline. This pillar HELD FLAT at 58/65/70/77/86.

- Re-confirmed the Sept 24 CFTC staff FAQ is correctly logged-not-scored (existing-rules guidance, not a new rule or live product).
- ★ ★ NEW this cycle — NYSE Group / Blockchain.com MOU, Sept 23-24, 2026 (primary: ir.theice.com; corroborated by Yahoo Finance, PYMNTS, Decrypt, Blockhead, News.Bitcoin.com, T access tokenized NYSE-listed equities/ETFs via NYSE's planned digital ATS (24/7, fractional, stablecoin-funded, on-chain settlement). Explicitly exploratory/distribution MOU, "subject to any
- Why this doesn't clear the sufficiency bar: weaker than the Aug 24 Coinbase/Robinhood Chain launches this pillar already held insufficient (those were live, non-US-only products); this is SCORED.
- Zero of six GENIUS Act agencies have finalized a rule; DTCC's October launch remains unconfirmed either way; SEC Innovation Exemption issuer notices still expected "next quarter" (Q4).
- Score decision: HELD FLAT at 58/65/70/77/86. FULL WEEKLY refresh — categorically excluded from delegated auto-stamp authority regardless of finding — LEFT AS DRAFT for Alex's

Carried forward — what changed in the September 26 light daily touch (2026-09-26_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 26, 2026 (score set 2026-09-26_draft, committed, auto-stamped) — checking for changes since the 2026-09-23_draft baseline. This pillar HELD FLAT at 58/65/70/77/86.

- CFTC staff released updated FAQs Sept 24 (cftc.gov primary, 7+ independent outlets) clarifying that customer funds may be invested in tokenized forms of permitted investments, and that sourced, but staff guidance applying existing rules, not a new rule or product launch — LOGGED, NOT SCORED.
- No Tokenized Securities Venue has yet gone live under the SEC's Sept 17 exemption; DTCC's October launch remains the operative unconfirmed catalyst; no depeg or counterparty incident
- Score decision: HELD FLAT at 58/65/70/77/86. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 23 light daily touch (2026-09-23_draft, committed, auto-stamped), for continuity:

- CFTC Chairman Selig's Sept 22 speech at the NY Fed's Treasury Market Conference — "mass tokenization," 24/7 trading, broader stablecoin use as core market plumbing — corroborated by CoinGabbar, Blockonomi). A rhetorical/tone signal, not a rule or transaction; does not move P.
- Score decision: HELD FLAT at 58/65/70/77/86. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 22 light daily touch (2026-09-22_draft, committed, auto-stamped), for continuity:

- Not independently re-researched that cycle — a targeted single-pillar Fed & Macro follow-up (two regional Fed survey findings; see that pillar's report), not a fresh Tokenization/RWA research
- Score decision: HELD FLAT at 58/65/70/77/86. Not re-researched that cycle (targeted single-pillar touch) — carried forward from the Sept 19 weekly review. AUTO-STAMPED alongside Fe

Carried forward — the September 19 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 19, 2026 (score set 2026-09-19_draft, DRAFT, awaiting Alex's manual review) — checking for changes since the 2026-09-18_draft committed baseline via a dedicated full-weekly primary-sc

- No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 "Innovation Exemption." A structural detail worth logging: for any NMS stock tokenized by an u 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Security tokenized NMS stock could legally trade under it is roughly mid-October — mostly outside a 1-month window from today. This is a reason for near-term caution already baked into keeping 1n
- SIFMA issued a public statement (sifma.org, primary, Sept 2026) raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets al implicit in "temporary/conditional" — no litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026 per DTCC's own May/July 2026 press materials, corroborated by C "October, unconfirmed this week" is the working assumption, not a positive surprise; doesn't move P.
- On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month) per AMBCrypto and CoinGabbar (both Sept 2026, likely drawing on the same underlying Confirms continuing adoption momentum but is a continuation of a pre-existing growth trend, not specific new evidence about the Sept 17 exemption's real-world uptake — doesn't independe
- DATA GAP, flagged not papered over: this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent dat Continuing to cite the last independently verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number, flagging this discrepancy explicitly rather than silently updating.
- No corrections needed to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up — still true, now still true two days later. No new market-price/odds data
- Research capability: full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attem direct fetches — flagged, especially re: the SEC press release and the rwa.xyz figure (handled by not reporting an unverified number, see above). A partial research-depth limitation, not a cap
- Score decision: HELD FLAT at 58/65/70/77/86. Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. LEFT AS DRAFT, AWAI from Alex's delegated daily auto-stamp authority, regardless of evidence quality or move size (here, zero).

Carried forward — what changed in the September 18 light daily touch (2026-09-18_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 18, 2026 (score set 2026-09-18_draft, committed, auto-stamped) — checking for changes since the 2026-09-17_draft committed baseline. This pillar RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.

- PRIMARY: the SEC issued its "Innovation Exemption" for tokenized-stock trading (sec.gov press release 2026-90, published Sept 17, 2026, plus Commissioner Uyeda's corrobor conditional (5-year) exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via per conditions, with a comment period open. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey M
- This is exactly the trigger this pillar's own table has been watching since the Aug 13-15 cancellation of the SEC's earlier tokenized-equity exemption meeting ("a formally re-sched tokenized-equity launch this pillar has logged (Robinhood Chain, Coinbase's Base launch, both non-US-only), it is US-federal-regulator-authorized domestic tokenized-stock trading, the exac
- Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86. Sizing front-loaded per window: 1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1 — heaviest near-term because the exemption is temporary/conditional (sunsets in 5 years) and the 3yr window was already near its practical ceiling. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 17 light daily touch (2026-09-17_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 17, 2026 (score set 2026-09-17_draft, committed, auto-stamped) — checking for changes since the 2026-09-16_draft committed baseline. This pillar HELD FLAT at 52/60/66/74/85.

- Only dated news found: Aave's Sept 16 announcement of a planned RWA lending hub on Avalanche using Tether's USAT. Consistent with this pillar's own house treatment of single-p stock launches), a single-product announcement does not by itself clear the bar for a P move.
- No rail failure, depeg, counterparty default, or DTCC/Nasdaq timeline change found.
- Score decision: HELD FLAT at 52/60/66/74/85. No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 16, 2026 (score set 2026-09-16_draft, committed, auto-stamped) — checking for changes since the 2026-09-15_draft committed baseline. This pillar HELD FLAT at 52/60/66/74/85.

- No new dated rwa.xyz pull found beyond the \$38.89B mid-September read already priced Sept 15.
- No rail failure, depeg, or counterparty default found in the window since the last check.
- DTCC's October full-service launch (Russell 1000, major ETFs, Treasuries) remains unchanged and on schedule — already priced, no new dated milestone.

- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 14, 2026 (score set **2026-09-14_draft**) — checking for changes since the 2026-09-13_draft committed baseline.

- **No dated catalyst found Sept 13-14.** No fresh rwa.xyz aggregate pull beyond the ~\$39.2B Sept 8 read already priced, and no rail failure, depeg, or counterparty default on any tokenization.
- **DTCC's October 2026 full-service launch** — Russell 1000 equities, major index ETFs, and US Treasuries — **remains unchanged and on schedule.** No delay, no scope change, nothing new.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved. The growth curve is continuing on trend, which is what the current P already assumes.

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 — checking for changes since the Sept 12 committed baseline (2026-09-12_draft, auto-stamped this morning).

- **Sept 12, FULL WEEKLY refresh (2026-09-12_draft2):** rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary, corroborated by CryptoRank/Crowdfund Insider). Asset categories now each exceed \$1B. DTCC's October 2026 full-service launch reconfirmed on schedule, no delay (DTCC.com primary + 2 independents: Forkast, Tradeweb, Crowdfund Insider). Expansion; Sept 7-8 MAKE Group's "AstralBeam" Casper bridge) are each single-source-equivalent, logged as context only, not used to move P. No new rail failure, depeg, counterparty default.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Nothing this cycle clears the sufficiency bar. **LEFT AS DRAFT — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp policy.** Manual review as 2026-09-12_draft2.

Carried forward — what changed in the Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped, this morning's cycle), for continuity:

- **Sept 12, light daily catch-up:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) are a continuation of the already-priced growth. DTCC's October 2026 full-service launch (Russell 1000 equities, major-index ETFs, US Treasuries) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service launch remained the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct rwa.xyz pull. DTCC's October 2026 full-service launch remained the operative unchanged catalyst. No rail failure, depeg, or counterparty default found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto assets; Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; no new dated catalyst clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated tokenization catalyst found Sept 1-2.** General web search found nothing beyond unchanged background (the DTCC pilot's possible October 2026 commercial-launch window). No rail failure, depeg, or counterparty default found.
- **BTC (pipeline reference): \$76,581.44 on Sept 2 vs. \$78,038.78 on Sept 1** — a real pullback on the day, driven by the Iran escalation covered in that pillar's report, not by anything here.
- **No new dated tokenization catalyst found** via WebSearch this cycle — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participants in the pilot) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp policy regarding SEPTEMBER 5, 2026. Fed & Macro is the pillar that moved this week, on a hot August jobs report. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session corrected retroactively.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **No dated catalyst found Sept 1-2.** Score decision: HELD FLAT at 52/60/66/74/85. This shared score set was originally left as draft — Iran War Risk's sharp re-rate flipped the master call band. Widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 31-Sept 1.** General web search turned up only stale/recycled RWA market-size summaries — dated to Q1 2026 or the already-priced Aug 31 read. No new rail failure, depeg, or counterparty default found.
- **BTC (pipeline reference): \$78,038.78 on Sept 1 vs. \$78,447.16 on Aug 31** — modest pullback.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority, then the committed baseline. Iran War Risk.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 29-31.** Sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow report). No new dated catalyst. Same trend, not fresh. rwa.xyz was not independently re-pulled this cycle.
- **BTC (pipeline reference): \$78,447.16 on Aug 31 vs. \$77,666.16 on Aug 29** — further gain.
- **Score decision: HELD FLAT at 52/60/66/74/85.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **★ Coinbase launched tokenized-stock trading on Base (Aug 24):** NVDac, METAc, AAPLc, GOOGLc (Nvidia, Meta, Apple, Alphabet), 1:1 Alpaca-custodied, under an ADGM FSRA permit (Aug 24-25). Non-US users only — same structural limitation as the Robinhood Chain precedent, insufficient alone for consistency.
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed, citing RWA settlement/distribution as a use case; a stablecoin launch, not RWA tokenization.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29 found** on a direct sec.gov check; the tokenized-equity exemption meeting remains canceled with no new dated catalyst.
- **DTCC's October 2026 and Nasdaq's Dec 6, 2026 targets are both unchanged** this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found;** two unrelated DeFi incidents (Term Finance ~\$8.5M, Arrakis V1/G-UNI, both Aug 23) are ordinary DeFi.

- ★ **Data-quality flag** — [rwa.xyz \(app.rwa.xyz\)](#) returned **HTTP 403** on repeated attempts this cycle. Could not independently re-pull live figures; relying on the report's most recent primary \$38.69B (+3.04%/30d) vs. \$38.32B (+2.30%/30d) Aug 22 — continued sub-1%-per-week growth, same trend. Tokenized Treasuries \$16.00B (-0.93%/30d) vs. \$15.98B (-0.39%/30d) Aug 22 — independently reconfirmed this cycle; flagged for a genuinely independent pull next cycle.
- For the record** — **Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** — predates this window, missed by the Aug 22 research pass; logged for the audit trail, not counted as new evidence.
- BTC (pipeline reference): \$77,666.16 on Aug 29 vs. \$77,266.84 on Aug 22** — modest gain.
- Score decision: held flat at 52/60/66/74/85** — nothing this cycle clears the sufficiency bar. **Left as draft, not auto-stamped:** this is a full weekly refresh, categorically excluded from Alex's **08-29_draft**, awaiting Alex's manual review.

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity: Three earlier drafts (Aug 17, 18, 20) were written but never delivered, and an Aug 21 session delivered the Aug 22 catch-up. ran a fresh full-weekly primary-source pass on top of the already-delivered Aug 22 catch-up.

- Why a new set instead of editing the delivered Aug 22 draft:** per house rules, a same-day draft may only be amended in place before delivery; the Aug 22 catch-up draft was already rendered 2026-08-22_draft2.
- rwa.xyz total RWA distributed value: essentially flat.** Direct pull Aug 22 draft2 (primary) shows \$38.32B (+2.30%/30d) vs. the Aug 16 baseline (\$38.17-38.24B) — normal drift, no discontinuity.
- ★ **rwa.xyz tokenized Treasuries: first slightly-negative 30-day reading tracked.** \$15.98B, -0.39%/30d, across 87 products (primary) — prior cycles reported flat/slightly-up figures around \$16B single datapoint — not sufficient alone to move P, flagged to watch next cycle.
- ★ **NEW, primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar), ca ETHNews, coinpaprka, BigGo Finance, UEX, KuCoin). Bloomberg (Aug 20) separately reports a plan to embed BENJI in conventional ETFs/mutual funds, possibly starting Q4 2026. Genuine.
- ★ **NEW — SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** the planned ~Aug 14 meeting was called off. Multi-sourced (Ledger Insights, the stated causes (White House concerns, SIFMA opposition, CLARITY Act friction) trace to reporting that looks like one originating story — flagged as uncorroborated at the causal level. Incorporated into Franklin Templeton letter above.
- GENIUS Act rulemaking proceeding exactly on its pre-set procedural schedule:** Treasury's Section 3 NPRM published in the Federal Register Aug 18 (comment deadline Oct 19); the joint Sullivan & Cromwell memos; Forkast). Process, not news — no rule finalized. Not yet a trigger.
- ★ **NEW — Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only. Continued organic growth off a small base, not an acceleration.
- No new RWA-rail failure, depeg, or counterparty default found** in this window; the Jul 15 Ostium exploit (\$18-24M) remains closed and non-recurring, no follow-up developments found.
- BTC (pipeline reference): \$77,169.40 on Aug 22 vs. \$71,882.92 on Aug 20, +7.4%.**
- Score decision:** 1mo 52 → **52** · 3mo 60 → **60** · 6mo 66 → **66** · 12mo/36mo held at 74/85 — the Franklin Templeton positive and the SEC exemption-cancellation negative are both multi-sourced score; the first negative Treasuries reading is sub-1% and a single datapoint. **Left as draft at delivery, not auto-stamped:** this pillar's own evidence would have met the routine conditions for delegation covers ordinary daily re-rates only — this is a full weekly refresh, categorically excluded regardless of evidence quality. **COMMITTED BY ALEX August 23, 2026** after manual review.

Sources

Retrieved & graded September 19, 2026, FULL WEEKLY refresh — click and judge the quality yourself. Official records & rules first, then live data, reporting, and prices. This cycle: 11 WebSearch queries covering the Innovation Act and tokenized-equity holder-count growth; WebFetch to sec.gov and app.rwa.xyz was blocked in this sandbox for every domain attempted, so primary-source content relies on WebSearch's indexed summaries rather than direct.

- September 19 FULL WEEKLY refresh (this cycle):** [CNBC](#), [Coindesk](#), [Crowdfund Insider](#), [Decrypt](#), [Securities.io](#) (all Sept 17-18, 2026) — corroborating coverage of the SEC's Innovation Exemption mechanics, including [SIFMA.org](#) (Sept 2026, primary) — public statement raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets separately criticized the exemption (no litigation holder counts ~1.9M addresses, +134% month-over-month (likely the same underlying analytics dataset, one corroborated data point, not fully independent triangulation) · [DTCC.com](#) (May/July 2026 press releases, background) · **DATA-GAP FLAG:** app.rwa.xyz reads attempted this cycle returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date) that could not be verified directly (WebFetch to app.rwa.xyz from the Sept 12 full weekly refresh) is cited instead · GitHub Actions data-fetch workflow — BTC pipeline reference, unchanged from Sept 18.
