

The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31 — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). P HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was **AUTO-STAMPED** alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's own commit message claimed this set was "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to

committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call). **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P. **HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time** — re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P. **HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found. **HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again** — re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50%→30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found. **HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.** Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news, **September 4**) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)** held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)"** — the new last TRUE committed baseline. **A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)** — the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his support on remains largely unchanged from the July draft, and no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Político — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. **P HELD FLAT at 32/47/58/82/92** — the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-**

stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning. **Sept 15 (2026-09-15_draft)** re-rated UP to 37/53/62/83/92 on the White House's ethics concession; **Sept 16 (2026-09-16_draft)** re-rated DOWN sharply to 15/28/45/72/92 when the Sept 15 cloture vote FAILED 49-50; **Sept 17 (2026-09-17_draft)** held flat, no new dated development. **Sept 18 (2026-09-18_draft, this version): held flat again at 15/28/45/72/92** — Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor, which is consistent with, not incremental to, the existing read; no new dated development found. AUTO-STAMPED per delegated daily authority, the new last TRUE committed baseline. **Sept 19 (2026-09-19_draft, this version), a FULL WEEKLY refresh — the first deep multi-source research dive since Sept 12:** independently re-verified via a fresh primary-source WebSearch pass — no new Senate floor vote is scheduled since the Sept 15 cloture failure (49-50); Sen. Tillis's motion to reconsider remains only a procedural placeholder, and no outlet reports a scheduled re-vote. The Senate's own 2026 calendar (Roll Call, BGov, Troutman Financial Services reporting) shows it out for nearly all of October and the first week of November for the midterms (Election Day Nov 3), returning briefly (roughly two days) before the Nov 11 Veterans Day observance, then working roughly three weeks before Thanksgiving and three weeks in December before Christmas recess — leaving the post-election lame-duck session as the only realistic remaining 2026-Congress opportunity, per multiple independent outlets (Motley Fool, Sept 18; CryptoBriefing; CoinGeek; CryptoSlate). NEW THIS WEEK, logged as context and explicitly NOT used to move P: on September 17, 2026 the CFTC filed a prerule action with the White House OIRA (RIN 3038-AF80, "Regulation of Crypto Asset Transactions and Crypto Asset Markets") — confirmed via CFTC's own pressroom reference plus independent corroboration (The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein, all dated Sept 18) — an administrative fallback track running in parallel to, not a substitute for, the stalled legislative one, and its own timeline (no proposed rule before 2027) sits beyond this pillar's near-term horizons. Market prices, reported not scored: Polymarket's "signed into law in 2026" contract reads roughly ~8% as of Sept 19 (down sharply from ~82% in February 2026, before the Trump crypto-income ethics dispute intensified), though this cycle's search results showed some inconsistency on the exact current level — treated as approximate/directional, not a precise point figure; Kalshi's "CLARITY Act law before Jan 1, 2027" contract, a distinct longer-horizon market, priced around 31 cents (~31% implied), up from 24 cents days earlier. No corrections were needed to any previously reported fact this cycle — the 49-50 cloture count, the Tillis procedural-vote mechanic, and the list of seven Democratic holdouts (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) all check out against this week's independent reporting. **P HELD FLAT again at 15/28/45/72/92.** This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-19_draft is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-18_draft (15/28/45/72/92), auto-stamped Sept 18.

The Scores — Committed vs. Drafts

Sept 26 (2026-09-26_draft3, this version): FULL WEEKLY refresh, HELD FLAT at 15/28/45/72/92 — LEFT AS DRAFT, awaiting Alex's stamp (full weekly refreshes are categorically excluded from delegated auto-stamp authority; an intervening Sept 24 draft was written but never delivered and so gets no column here, per this report's convention for abandoned drafts. Historical notes follow. June column committed by me June 12, 2026, committed Aug 23 and stays visible below since it's the last committed set; the new Aug 29 column has not committed, so nothing collapses yet from here. Aug 17, 18, and 20 drafts were written but never delivered; an Aug 21 session fully delivered (rendered/selfchecked/archived/committed to git), but stayed uncommitted after an adversarial fact-check caught a false claim in the Iran War Risk pillar report. The same-day full weekly refresh, **2026-08-22_draft2 08-28_draft** daily catch-up cycle was researched (held flat) but never rendered, selfchecked, archived, or committed — treated as not delivered, dropped from this visible lineage (see What Changed for the audit note). This cycle's 2026 ALEX'S MANUAL REVIEW. **Aug 31 and Sept 1 are light daily catch-ups (2026-08-31_draft, 2026-09-01_draft)** that each independently re-checked for a schedule change or ethics-text development, found none, held flat, and were up, again held flat. This shared dated score set was originally left as draft, because Iran War Risk's re-rate (bundled in the same set) flipped the master call band; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex wide Sept 3 held flat a further time (nothing material on any pillar). **Sept 5 light daily catch-up (2026-09-05_draft)** holds flat again; that cycle's own commit message claimed "AUTO-STAMPED," but config/scores.json's status field was **05_draft2, this version**) independently re-confirms the hold via fresh WebSearch research; categorically excluded from daily auto-stamp authority, so left for manual review — **COMMITTED BY ALEX September 5, 2026. I released a revised ~630-page CLARITY text Sept 10 (primary source, corroborated by 6+ independent outlets) incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope, but the Tillis-blocking ethics either direction. **Holds flat a further time at 32/47/58/82/92 — categorically excluded from daily auto-stamp authority (full weekly refresh), LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW. Lummis reconfirmed Sept 15-16 the bill will not return to the floor, consistent with, not incremental to, the existing read — **AUTO-STAMPED per delegated research, HOLDS FLAT again at 15/28/45/72/92** — no new Senate vote scheduled, lame-duck remains the only realistic path, CFTC's Sept 17 OIRA rulemaking filing logged as context not scored. Categorically excluded from daily unchanged at 15/28/45/72/92 — not re-researched this cycle (Fed & Macro is the pillar that moved — see that report). Last TRUE committed P (2026-09-23_draft, light daily touch, auto-stamped): 15 / 28 / 45 / 72 / 92 · Current P (2026-09-24_draft, LIGHT DAILY touch, AUTO-STAMPED, HELD FLAT): 15 / 28 / 45 / 72 / 92 · Weight: 20% (equally weighted, no new Democratic yes votes, no movement on the ethics dispute, no primary congressional action. The Sept 15 cloture failure (49-50, eleven short of the 60 required) remains the operative fact and is already fully priced in.)

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. Held flat this cycle at 32/47/58/82/92 — unchanged since Aug 8, through the committed Aug 22 refresh (d2), the abandoned/never-delivered Aug 22 floor date, the abandoned/never-delivered Aug 22 sources rather than trusted at face value. The Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date, reconfirmed this cycle by DeFiRate.com (Aug 27, 2025) — bears repeating this is a cloture vote on the motion to proceed only, not final passage, which still needs its own floor debate/amendments and its own 60 votes. Both binding disputes remain unresolved (no White House sign-off or released text found this cycle) and the stablecoin-yield dispute (no update found). NEW, CONFIRMED this cycle: CFTC Chair Michael Selig, in an on-record speech at the CFTC's rulemaking using the CFTC's existing authorities in case CLARITY continues to stall — adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10), dated **August 19, 2025** (one year earlier) — cftc.gov used as the primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will utilize its existing authorities to begin establishing a regime for digital assets — it does not touch either binding dispute and is logged as context, not used to move P, same treatment as the SEC's earlier fallback signal. Two independent prediction-market pulls this cycle at 20-21% ("60 votes" by Jan 1 2027); a live Aug 28 Polymarket pull separately showed 14% — both labeled as market prices, not institutional estimates, and per house rule cannot move P without a 2/3 vote. Both surfaced in this cycle's search and was cross-checked to an **August 19, 2025** (one year earlier) CoinDesk/Politico Pro story from a prior year's SALT Wyoming/Jackson Hole symposium — flagged on congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle (bot-blocking); primary-source confirmation relied on 7+ independent secondary outlets including the funding bill Aug 8 (Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a shutdown fight eating September floor time around the funding bill. Confirmed as yes votes. The actual live blocker, unchanged since Aug 8: a *toughened* Democratic ethics counter-proposal has sat unanswered at the White House since roughly Aug 1-3. Loss of the funding bill is a real, unambiguous loss, not a "gap narrowed, didn't close" story anymore — the gap held, decisively, and I'm not going to soften that by clinging to the pre-vote optimism I priced in.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.
Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of September 16, 2026 (LIGHT DAILY touch, 2026-09-16_draft) — the cycle in which the Sept 15 cloture vote resolved, and failed

The crowd: treated the Sept 13-14 ethics concessions as the story and priced in a real shot at cloture — Polymarket's 2026-signed-into-law odds roughly doubled to ~35% on the concession news. Polymarket's odds cratered to ~5% within a day.
Me: re-rated down hard on the near windows — 37/53/62/83/92 → 15/28/45/72/92 — because the vote outcome is now a resolved fact, not a probability: named Democratic negotiators (including Lummis) rather than a scheduled second try, and Lummis herself ruled out a quick floor return. The Senate calendar reinforces the near-term read — senators leave for the midterms in early October and don't re-cut the 1yr or 3yr windows nearly as hard: the ethics concessions the White House already made are real and don't evaporate just because this particular vote failed, so they remain a foundation for the future.
My edge: the crowd's ~5% post-vote Polymarket read and my 15 (1mo) / 28 (3mo) P aren't the same question — Polymarket prices signature into law within calendar 2026, a much narrower bar than the crowd: this was a real, unambiguous loss, not a "gap narrowed, didn't close" story anymore — the gap held, decisively, and I'm not going to soften that by clinging to the pre-vote optimism I priced in.

The Facts

As of September 16, 2026 — LIGHT DAILY touch (2026-09-16_draft), the cycle in which this pillar re-rated DOWN for the first time since June. Hard numbers only, sources on the last page. New facts from this cycle appear first; earlier facts are in italics.

- ★ ★ **NEW, September 26, 2026** — the roll call, verified line by line, and it is a **HARDER** read than this report had been giving. Senate **Roll Call Vote 234** (senate.gov, primary, Sept 15, 2:15pm ET) counted in this cycle's verification pass: **exactly four Republicans — Collins (ME), Hawley (MO), Moran (KS) and Tillis (NC)** — plus 44 Democrats and 2 Independents (King, Sanders). The **never mentioned the Republican defections**, framing the failure as purely Democratic. Losing 4 of 53 in your own conference is materially worse for the bill's prospects than a clean party-line vote.
- ★ ★ **NEW, September 26, 2026** — a **development three consecutive prior cycles missed, logged rather than buried**. On **Sept 17**, seven Democratic negotiators — **Gallego, Gillibrand, Alcaraz, Cortez Masto, Warner, Booker, and Warnock** — **"This week was a setback, but not the end of that important work. We remain committed to working in a bipartisan fashion to get this legislation passed."** It is primary-sourced and each recorded "no new dated development found." That is a research-coverage gap, not a scoring error, and it is named here so the lineage is honest. It does not move P on its own: it is a development above.
- ★ **The Senate calendar, from the primary source, September 26, 2026:** senate.gov's own 2026 schedule lists **"Oct 05 – Nov 06 — State Work Period,"** exactly five work weeks. That makes **3633 action and no scheduled re-vote**; the Senate reconvened at 3 p.m. Monday Sept 28. Tillis's motion to reconsider preserves the option but sets no date.
- ★ ★ **NEW — September 15, 2026, 2:15pm ET: the Senate cloture vote on the motion to proceed to H.R. 3633 FAILED, 49–50** — well short of the 60 votes required, and support did not even reach 50. CoinDesk, CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call.
- ★ ★ **NEW — named Democrats who were negotiating the bill voted No**, including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto — Gallego, flagged in the primary source.
- ★ ★ **CORRECTED September 26 — procedural aftermath, September 15–16, 2026. It was Sen. TILLIS, not Majority Leader Thune, who entered the motion to reconsider** — and this report's Tuesday, Sept 15) records: "Senator Tillis voted no in order to make a motion to reconsider," entered at 3:01 p.m. He voted Yea, then switched to Nay specifically in order to preserve the option to reconsider. dailypress times the vote at 2:18 p.m. against 2:19 p.m. on the roll-call page); Sen. Lummis told reporters the bill will not return to the floor; Sen. Kennedy said any renewed push likely waits for the election.
- ★ **MARKET PRICE, reported not scored:** Polymarket's "CLARITY Act signed into law in 2026" odds crashed from roughly 35% pre-vote to roughly 5% post-vote (KuCoin, Yahoo Finance, Coinglass).

Carried forward from the September 15 light daily touch — still load-bearing, not contradicted:

- ★ **September 13, 2026: the White House agreed to an ethics package for the CLARITY Act and transmitted the language to Senate Republicans.** A senior administration official called it "a win" to Yahoo/Politico and congress.net — 4+ independent outlets. This is the first movement on the blocker that has sat unanswered at the White House since roughly Aug 1–3.
- ★ ★ **NEW — September 14, 2026: Sens. Lummis, Boozman and Scott posted the FINAL CLARITY Act text one day before the cloture vote.** Versus the July draft, the ethics division **drops the bar on state-attorney-general enforcement** and gives state AGs standing to sue, and **raises civil penalties from "10% of the take or \$500,000, whichever is less" to "20% or \$500,000, whichever is more"** for issuing or sponsoring digital assets for compensation while in office. The sponsors say the draft incorporates 126 substantive Democrat-requested changes. Corroborated by The Block, The Daily Beast, and others.
- ★ ★ **CORRECTION, September 26, 2026 — this report previously stated the OPPOSITE of the primary source, and the error is fixed here rather than quietly removed.** Earlier versions said Lummis's own summary of the final text, "What's New in the Final Clarity Act Text" (lummis.senate.gov, Sept 14), downloaded and text-extracted directly, states verbatim under Ethics: **"Clear rule consistent with the Ethics in Government Act of 1978." The honest framing is REAL BUT DELAYED, not absent.** The same primary text also provides, verbatim: state attorney general enforcement exchanges listing an asset issued in violation of the ban; civil monetary penalties of "20 percent of the consideration received in the prohibited transaction or \$500,000 (adjusted for inflation), whichever is more." **final rule implementing section 10102, whichever is sooner.** *Scope discipline, stated because it limits what can be claimed:* a research pass additionally reported a \$15,000 significant-finance penalty **appear anywhere in the cited primary document**, which says only "covered individuals" — so they are **not printed here** pending a different primary citation.
- ★ ★ **CORRECTION, September 26, 2026 — the stablecoin-yield dispute is NOT "unresolved with no update found," as this report had been carrying.** The same Lummis primary summary says Secretary is directed to "promulgate rules restricting stablecoin rewards available to payment stablecoin holders" — and, verbatim, **"This authority expires 18 months after date of enactment."**
- ★ **September 14, 2026: Sen. Warren called the provision a "weak fig leaf that will do nothing to stop him from making his next \$1.4 billion in crypto profits"** and went to the Senate floor.
- ★ **September 14, 2026: Sen. Gallego — the lead Democratic negotiator and the most likely yes vote — said the Republican text "as it currently stands falls short,"** naming ethics, consumer protection, and state attorney general enforcement.
- ★ **Late Monday, September 14, 2026: Senate Democrats sent a counteroffer to Republicans** on the eve of the vote (CoinDesk, Sept 15). CoinDesk could not confirm its contents beyond that the language would still block state attorneys general from directly suing the U.S. president.
- ★ **The vote itself had not happened when this cycle ran.** The cloture vote on the motion to proceed to H.R. 3633 ripens Tuesday, September 15 at 2:15pm ET, 60 votes required; this run executed on Sept 14. The cloture vote is committed. It is a vote on the motion to proceed only — floor debate, amendments and a separate 60-vote passage threshold still follow.
- ★ **MARKET PRICE, reported not scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to ~34.5% on the ethics deal, versus the ~23% Dec-31 read priced Sept 13. Markets are volatile.

Carried forward from the September 12 full weekly refresh and the daily touches since — still load-bearing, not contradicted:

- ★ ★ **NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Daily Beast, and others) **than 114 separate provisions at my Democrat colleagues' request.** Substantively it narrows the DeFi/prediction-market scope — non-decentralized trading protocols must register with the CFTC. **market objections raised earlier.**
- ★ **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text**, per the primary source.
- ★ **No Democrat had publicly announced support for the new text as of Sept 10–11**, despite the 114 concessions (The Block and Blockhead/Politico — 2 independent outlets).
- ★ **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8–10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- ★ **Prediction markets (market prices, not institutional estimates — house rule), this cycle's reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalsbeek, P.
- ★ **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.
- ★ **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — the Lummis text release is well-corroborated but a mixed signal (real concessions offered, but the Tillis-blocker move in either direction).

Carried forward from the September 5 full weekly refresh (2026-09-05_draft2, committed by Alex Sept 5) and the light daily catch-ups since (through this morning's Sept 12) — still load-bearing, re-verified this cycle, not contradicted:

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date**, reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate (Aug 22–29). This is a cloture vote on the *motion to proceed* only, not final passage — floor debate/amendments and a separate 60-vote passage threshold still follow.
- ★ ★ **NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting**, directed CFTC staff to explore a fallback crypto-asset rule directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets, e.g. American Banker/PYMNTS/The Hill, dated it Aug 21, likely next-obstruction, the CFTC will utilize its existing authorities to begin establishing a regime for crypto asset markets." This is the CFTC's analog to SEC Chair Atkins' already-logged Jul 29 unilateral-used to move P, same treatment as the SEC's earlier fallback signal.
- ★ **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan counter-proposal — no White House sign-off or released text yet).
- ★ **Prediction markets (market prices, not institutional estimates — house rule), two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13–14% ("signed in 2026") and Kalsbeek, P. read across sources — but market prices alone, even corroborated by a second independent pull, can't move P under house rules without a corroborating news event, and none was found.
- ★ ★ **NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12–18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and was cross-checked to an A. Flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an Aug 2026 development — a caution for readers, not a real development.
- ★ **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** (bot-blocking) — primary-source confirmation relied on 7+ independent secondary sources.
- ★ **Context only, not new:** the Senate passed a stopgap funding bill Aug 8 (Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a government shutdown.
- ★ **No change found to the confirmed Democratic yes-vote count** (still zero) or to any primary-source Senate floor action.
- ★ **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction.

Carried forward — the abandoned/never-delivered 2026-08-28 draft (daily catch-up, researched but never rendered/selfchecked/archived/committed): logged a Polymarket "signed in 2026" drift to 14% (live pull, Aug 28) from ~19% discipline, superseded by this cycle's independent re-verification, not contradicted.

Carried forward from the committed Aug 22 full weekly refresh (2026-08-22, draft2 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the Sept 15, 2:15pm ET cloture vote on the motion to proceed was reconfirmed via 7+ outlets** as of Aug 21 (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Bank) passage.
- **Sen. Ruben Gallego, on the record at the Aug 19, 2026 SALT Wyoming Blockchain Symposium**, said the White House has not given a point-by-point response to the bipartisan Tillis-Gallego ethics counter-proposal "at all." He also explicitly warned against rushing the Sept 15 vote. Multi-source: crypto.news, Cointelegraph, FXStreet, Blockonomi.
- **White House crypto adviser Patrick Witt said Aug 19** the administration is "fully committed" to getting CLARITY passed in September and would keep negotiating with Democrats up to the point of passage. Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan). Combative public messaging, not evidence of a substantive concession — not used to move P.
- **An unverified, non-journalistic X post** from a crypto project's promotional account (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision "finally has a deal on the table" and is "on track" (4+ independent outlets). Not used.
- **Coinbase CEO Brian Armstrong said Aug 21** he's "pretty optimistic" the bill clears 60 votes, arguing Thune wouldn't have scheduled Sept 15 without expecting passage, and that "both sides are committed to move P."

Carried forward from the same-day Aug 22 catch-up draft (d1 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the SEC formally proposed "Regulation Crypto Assets" on Aug 18** (sec.gov press release 2026-76) — a token-offering exemption regime: a startup exemption ($\leq \$5M$ over 4 years), a full-scale exemption ($\leq \$10M$ over 4 years), and a separate SEC rulemaking track, not the CLARITY Act, and does not touch CLARITY's binding ethics-provision or stablecoin-yield disputes — not used to move P.
- ★ ★ **Trump hosted a White House crypto event on Aug 19**, with SEC Chair Atkins, CFTC Chair Selig, and industry CEOs present, and publicly pushed Congress to pass "a fair version" of CLARITY. Reported, so not used to move P.
- **As of Aug 21, both live disputes remain open:** the ethics-provision fight (Democrats pressing for stronger limits on officials' crypto holdings) still has no confirmed White House sign-off on the ethics counter-proposal.
- **Prediction markets logged that morning:** Polymarket "signed into law in 2026" = 25% Yes (Aug 22 direct pull); Kalshi's "reaches 60 votes" market $\approx$ 22% (Aug 21) — this cycle's fresh pull independent on its own.
- ★ ★ **FLAGGED, NOT SCORED — Coinbase CEO Brian Armstrong's on-record prediction that CLARITY "will pass"** is single-source opinion (one person, one outlet's framing) — explicitly not used to move P.

Carried forward from the Aug 17, 18, and 20 drafts (written but never delivered — no report/render/archive/commit followed any of them; independently re-verified today, not contradicted):

- **Sen. Ruben Gallego, speaking at the SALT Wyoming Blockchain Symposium on Aug 20**, said White House responses to the Tillis-Gallego ethics counter-proposal "have come back blank" (crypto.news, TechTimes, all Aug 20) — reaffirms the existing stalemate rather than deepening it.
- **Senate Banking Chair Tim Scott said (The Block, Aug 18) the stablecoin-yield provision "we thought was all settled" has resurfaced as a live dispute**, amid community-bank lobbying.
- **White House digital-assets adviser Patrick Witt called himself "truly optimistic and bullish" on passage** (The Block, Aug 18) despite the stablecoin friction — rhetoric only, no new whip.
- **Polymarket "signed in 2026" bounced from ~16% (around Aug 14-15) to ~24% (Aug 20 live pull)** on no identified news catalyst, and has since settled to 25% (Aug 22) — noise, not used to move P.
- ★ ★ **FLAGGED FOR THE RECORD, not scored:** Galaxy Research appears to have cut its 2026-passage estimate further to 10% (from the 30% already reflected in this report's history) around Aug 21, flagging for Alex's attention, not treating as a driver of today's score.

Carried forward from the August 16 committed baseline (still load-bearing; independently re-verified, not contradicted, this cycle):

- ★ ★ **NEW — the SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote the day before it was scheduled**, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, all Aug 14) — relevant context on regulatory limbo across both branches, but not a CLARITY-specific trigger; not used to move P.
- **The Senate remains in August recess; no new floor-schedule or ethics-text development found (as of Aug 16).** Re-checked Bitcoin Foundation, Troutman Financial Services, CoinDesk — no new reporting on the Tillis-Gallego ethics counteroffer or White House sign-off.
- **The Sept 15, 2:15pm ET cloture date remains widely corroborated** — no change from Aug 14.
- **New detail on remaining disputes:** illicit-finance provisions and reconciling the Senate Agriculture Committee's text are named as two additional sticking points ahead of the vote (PYMNTS, all Aug 16).
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633.** Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoSlate, all Aug 8).
- **The real live blocker remains a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump stays on ethics counter-proposal" the original concession).
- **Zero confirmed Democratic yes votes on cloture** as of Aug 16, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.
- **Polymarket "signed in 2026" (market odds, not an institutional estimate) remains around the mid-teens** per the conflicting cached reads (13-21%) noted Aug 14 — not re-verified as of Aug 16 (earlier in the year) is the reliable part.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows July 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source confirmation of "no floor time" than any leadership quote — and corroborated by the Senate's own reporting.
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground. CoinDesk's own reporting hedges "whether they've actually done it is unclear," and neither senator's office nor the White House responded to comment requests. Treat as real movement, not a concession.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and the House Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to issue rules in the face of legislative urgency — noted, not scored.
- **Odds board (sentiment only) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, Jul 30) — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-counted here.
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics counter-proposal.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor" (restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since Jul 29.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ in other crypto income.
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the House floor.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House Banking Committee advanced its own substitute **15-9 on May 14, 2026**.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$81,224.46** (September 19, 2026). A **GENIUS-sized move (~40–47%)** from here $\approx$ **~\$114–119K**. A retest of the ~\$125K cycle high $\approx$ **+53.6%**. The anchor is real: during the GENIUS move, the CLARITY analog just showed the other side of the coil: Polymarket's 2026-signed-into-law odds crashed from ~35% pre-vote to ~5% post-vote (Sept 15-16) on votes on Clarity Act"). The Prize doesn't feed the math — it tells you what the lean is worth acting on, and this cycle is a live example of the pillar's own honesty rule: the score moved on evidence.

The Other Side

The strongest honest case this is wrong

- ★ **★ NEW, and it strengthens the bear case — the party that wanted this bill lost four of its own.** The Sept 15 failure was not a clean party-line shortfall. **Collins (ME), Hawley (MO), Moran (AZ)** and **Republicans** needs eleven Democrats to reach 60 while simultaneously repairing its own conference — a materially harder problem than the one this report had been describing, and the honest case for the bill is weaker.
- **The composition problem cuts the other way too, and is reported as a MARKET PRICE, not scored.** A Sept 24 analysis argues the likeliest path is now a 2027 restart in a differently-composed Senate. **Those are market prices in a single outlet** — barred from moving a P on both counts, and never to be confused with an institutional forecast — so they appear here as the strongest case for the bill, not the bear case. Different bill negotiated by different people, which is a real risk to the 72 this report carries at 12 months.
- **The administration itself may be de-prioritising the legislative route.** A White House adviser said on Sept 23 that the lame duck “is not a significant focus” and that work is shifting to federal agencies. **Effectively single-source** — but it points the same direction as the CFTC’s own market-structure rulemaking groundwork, and if confirmed it would mean the ceiling on this pillar is administrative, not legislative.
- ★ **★ RESOLVED, Sept 15-16: the bear case below won.** Multiple bullets in this section flagged the cloture vote as more likely to fail than the ethics concessions suggested — Punchbowl's "doomed" score. The vote failed 49-50, a wider margin than even those bears expected. This report's own 1mo/3mo re-rate down to 15/28 (from 37/53) reflects that the bear case, not the concession-driven case, is the real signal. Because every specific hypothetical in them still applies.
- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows, another opens.
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture knowing it will fail, which would make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" procedural loss, and September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped from 35% to 27% toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency — and now the CFTC has said the same thing.** If both the White House-aligned SEC and CFTC believe they can deliver workable rules, on-record speech directing staff to explore a fallback rulemaking (verified against cftc.gov) is the second such regulator-level statement this summer — a slow bleed on legislative priority, not urgency.
- **Prediction markets have drifted lower again, not higher.** DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21% — near the lower end of the range this report has tracked. A low number is a real signal even if it doesn't clear the sufficiency bar to move P on its own; a bear could reasonably argue this report is being too conservative in not letting corroborated market prices speak.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set September 16, 2026 — light daily touch, 2026-09-16_draft, the cycle in which the cloture-vote trigger fired (and failed) and this pillar re-rated down. Re new context-only administrative-track item logged below (CFTC OIRA filing).

DATE	EVENT
Checked Sept 19, no change to the legislative read	No new Senate floor vote is scheduled since the Sept 15 cloture failure. Sen. Tillis's motion to reconsider remains only a procedural placeholder; the Senate's 2026 Financial Services) shows it out for nearly all of October and the first week of November for the midterms, returning briefly before the Nov 11 Veterans Day observance and Thanksgiving and three weeks in December before Christmas recess — leaving the lame-duck session as the only realistic remaining 2026 opportunity (Motley Fool)
Fired Sept 17, 2026 — confirmed via 4 independent outlets (The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein, all Sept 18)	CFTC files prerule OIRA action (RIN 3038-AF80, "Regulation of Crypto Asset Transactions and Crypto Asset Markets") — an administrative fallback rulemaking track, its own timeline not reaching a proposed rule before 2027
Checked Sept 18, no change	Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor — consistent with, not incremental to, the existing read established the day of the failure was found
Checked Sept 17, no change	No new dated development found since the Sept 15 cloture-vote failure. A policy advocate's Sept 16 comment that the bill "could get another shot during lame-duck" anticipated in the Sept 16 baseline's own note (Sen. Kennedy's remark), not a new dated fact
Surfaced Sept 10, checked Sept 13 — corroborated via 3+ independent outlets (crypto.news, Coingape, CoinSpectator)	A FOURTH named Democratic blocking issue: vertical-integration conflict-of-interest authority. Democrats want regulators empowered to set conflict-of-interest rules for crypto firms — one company controlling several legs of a transaction, the FTX/Alameda pattern. Republicans say they support safeguards but fear a future administration might have pushed back on including the provision. Sens. Booker, Lummis and Boozman are negotiating it. Separately, Sen. Lummis spent Sept 11-13 publicly pressing DeFi to write the fix, now vote for it", 115 changes incorporated) — advocacy, not a vote commitment; still zero Democrats publicly committed. Polymarket ~23% signed-in, not scored
Checked Sept 2, no change	Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in — no White House sign-off on the Tillis-Gallego ethics language, no
Checked Sept 1, no change	No material development found on the ethics counteroffer, the stablecoin-yield dispute, or the Sept 15 cloture schedule since the Aug 31 light daily catch-up
Fired Aug 8, reconfirmed via 7+ outlets as of Aug 21, reconfirmed again by DeFiRate.com Aug 27, adversarially re-verified Aug 29	Cloture vote on the motion to proceed to H.R. 3633 is scheduled 2:15pm ET Tuesday, Sept 15 — no schedule change found anywhere Aug 22-29 (DeFiRate.com) is a motion-to-proceed cloture vote only, not final passage
Fired Aug 20, checked Aug 29	CFTC Chair Michael Selig's on-record speech at the Innovation Advisory Committee's inaugural meeting — directed CFTC staff to explore a fallback crypto-market structure if CLARITY continues to stall because of Democratic obstruction"; verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10)
Checked Aug 29 — both still open	Ethics-provision dispute (no confirmed WH sign-off on Tillis-Gallego language) and the stablecoin-yield/banking dispute both remain fully unresolved; no
Pulled Aug 27 (DeFiRate.com) and Aug 28 (live), checked Aug 29	Prediction markets: Polymarket 13-14%, Kalshi 20-21% — two independent pulls agreeing on a low-teens-to-20s read
Traced Aug 29	NOT FIRED / NOT USED — "Sen. Tim Scott: 12-18 Democrats open" quote traced to an August 2025 (one-year-old) story, a likely search-engine year-confusion artifact
Aug 8, context only, checked Aug 29	Senate passed a stopgap funding bill (Collins-Murray deal) funding the government through Dec 11, 2026
Sept 15	PENDING — first cloture vote (motion to proceed), now precisely dated; Democrats call it "doomed" absent further concessions; Republicans hold 53 of 60 needed
Unresolved since Jul 30; checked again Sept 10-12	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed as of Aug 29; Gallego's own response as of that date. A revised ~630-page CLARITY Act text WAS released Sept 10, 2026 (Sen. Lummis, primary source + 6 independent outlets — The Block, Coingape, Blockhead), incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope — but the ethics/conflict-of-interest language remains unresolved from the July draft, so this specific dispute remains unresolved.
Ongoing	Three named Democratic blocking issues: ethics enforcement, illicit-finance/DeFi provisions, stablecoin yield (Yahoo Finance, Aug 5)
PARTIALLY FIRED Sept 13–14, 2026 — 6+ independent outlets	White House signs off on ethics language and Senate Republicans post the final text — the Sept 14 text drops the Jan 20, 2029 sunset, restores state-attorney general penalties to 20% or \$500,000 whichever is greater. But it is <i>not</i> a merged text with Democratic buy-in: no divestment requirement, zero Democrats publicly committed, counteroffered late Monday Sept 14.
FIRED & RESOLVED — Sept 15, 2026, 2:15pm ET	The cloture vote on the motion to proceed to H.R. 3633 FAILED, 49-50, with 1 not voting (60 needed) — support did not even reach 50. CORRECTED Sept 26 — Yeas were ALL Republicans, zero Democrats; the 50 Nays included FOUR REPUBLICANS — Collins (ME), Hawley (MO), Moran (KS), Tillis (NC) — plus 44 Democrats not voting. Named Democrats who were negotiating the bill (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) voted No — then recommitted. TILLIS, not Thune , entered the motion to reconsider (procedural only); Lummis told reporters the bill will not return to the floor. 6+ independent outlets (CNBC, CoinDesk, HomeCryptoInvest) plus the Senate's own roll call.
Sept 16, context only	Senate calendar: senators leave Washington in early October for the midterms (7 weeks out) and do not return until after the election; Sen. Kennedy said any revenue bill would wait for the lame-duck session; the SEC's "Regulation Crypto Assets" workstream and CFTC spot-market drafting remain the live administrative fallback tracks.

The flip line, re-stated Sept 26 — it fired on the DOWNSIDE Sept 16 and nothing since has un-fired it: cloture failing with no released, White-House-confirmed ethics text and no clear next-step plan = start of one session week left (Sept 28 – Oct 2) before a five-week recess ("Oct 05 – Nov 06 — State Work Period"), with **no re-vote scheduled** and Tillis's motion to reconsider an unexercised placeholder that sets no date for a vote — that it "is not a significant focus." **The equivalent upside flip:** a renewed cloture vote that actually passes, or eleven named Democratic yes votes materialising. The Sept 17 seven-Democrat recommitted to the zero vote commitments attached, and it is offset by the discovery that four Republicans defected. **What would change my mind fastest:** a scheduled floor date in the Sept 28 – Oct 2 week, or a single named Democrat's support for the regulatory route, which would cap this pillar at whatever the CFTC and SEC can do without Congress.

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — HELD FLAT at 15/28/45/72/92 on the score, but this was the most consequential cycle this pillar has had in weeks for material one: this report had stated that the final CLARITY text "does not require divestment or blind-trust placement of preexisting crypto holdings." Senator Lummis's own summary of that text says verb consistent with the Ethics in Government Act of 1978." The honest framing is *real but delayed* — effective 360 days after enactment, or 60 days after the section 10102 final rule, whichever is sooner — and **corrected:** the stablecoin-yield dispute was being carried as "fully unresolved, no update found," when the same text contains a Treasury circuit breaker whose authority expires 18 months after enactment, **mentioned that four Republicans — Collins, Hawley, Moran and Tillis — voted against cloture**, which makes the Sept 15 failure a harder read than a clean party-line shortfall. **A coverage gap is named** Sept 17, Sept 18 and Sept 19 cycles — the last a full weekly — each recorded "no new dated development found." **Why the score nonetheless holds flat:** the two items that clear the sufficiency bar cut in negative information — and both are already embedded in an outcome, the 49-50 failure, that is fully priced at these levels. 1mo holds at 15 because the primary Senate calendar confirms one session week price the same Sept 15 fact twice. 3mo holds at 28 because the lame-duck window is the whole 3mo story and it is unchanged. 6mo holds at 45 as a genuine wash. 12mo and 36mo hold at 72 and 92: the K publicly committed to continuing all remain intact. **Reported but not scored, per the sufficiency rule:** a White House adviser's Sept 23 remark that the lame duck "is not a significant focus" (effectively sir Polymarket quote on 2026 enactment sitting on \$12,700 of daily volume — market prices, one outlet, an effectively dead market; Fairshake's \$30M against Sherrod Brown (real, but electoral rather than leg this is a full weekly refresh. Sept 24 LIGHT DAILY touch (score set 2026-09-24_draft), this version — HELD FLAT at 15/28/45/72/92. Checked for changes since the Sept 23 committed baseline. Nothing dated Sept 23-24 clears t congressional action. The Sept 15 cloture failure — 49-50, eleven votes short of the 60 required — remains the operative fact, and it is already fully priced in the active set. Secondary trackers continue to p **STAMPED** alongside this cycle's Fed & Macro re-rate, Iran window split, and Tokenization nudge.

Sept 23 LIGHT DAILY touch (score set 2026-09-23_draft), prior version: checked for changes since the Sept 22 committed baseline. One dated item found: a SINGLE-SOURCE CoinDesk report (Sept 22, crypto market structure "can't wait" for a possible post-election lame-duck CLARITY Act revival, and framing the CFTC/SEC administrative rulemaking track as where near-term action now sits — a CoinSpec new Senate floor scheduling, no Democratic senator publicly committing to a yes vote, and no movement on the ethics-provision dispute were found since Sept 15. Polymarket's "signed into law in 2026" c snapshots this week cited inconsistent figures, so this is flagged as approximate/directional only. **P HELD FLAT at 15/28/45/72/92.** This is an ordinary light daily touch, research capability was fully available **daily authority.** Iran War Risk is the only pillar that moved this cycle — see that report.

FULL WEEKLY refresh, September 26, 2026 (score set **2026-09-26_draft3, DRAFT — NOT STAMPED**) — checked against the last COMMITTED baseline, 2026-09-23_draft (15/28/45/72/92). One primary-source research pass plus a

- ★ **CORRECTION 1, MATERIAL — this report said the OPPOSITE of a primary source.** It had stated the final text "does not require divestment or blind-trust placement." Lummis's "What's covered individuals to divest significant financial interests or place in a qualified blind trust, consistent with the Ethics in Government Act of 1978." Corrected to *real but delayed* — effective penalties of 20% of consideration or \$500,000, whichever is greater. *A first pass also reported a \$15,000 threshold and spouse/officials-elect coverage; those do NOT appear in the cited document*
- ★ **CORRECTION 2 — the stablecoin-yield fight is not "unresolved, no update found."** The same primary text carries a **Treasury circuit breaker:** on a written determination of substantial months after date of enactment." A compromise existed; it just did not satisfy the Democratic negotiators.

- ★ ★ **CORRECTION 3 — TILLIS, not Thune, entered the motion to reconsider.** A Senate primary (dailypress.senate.gov, Tuesday Sept 15): "Senator Tillis voted no in order to make a motion to reconsider."
- ★ ★ **CORRECTION 4 — FOUR REPUBLICANS defected, which this report had never mentioned.** Roll Call Vote 234 (senate.gov, primary) rejected cloture **49–50, 1 not voting.** Nay list counts: 10 Democrats, 1 Republican, zero Democrats. Coons (D-DE) not voting. Losing 4 of 53 in your own conference is a harder read than a party-line shortfall, and it now appears in The Facts and The Other Side.
- ★ ★ **COVERAGE GAP, named not buried — a primary-source development sat public while three cycles reported nothing.** On **Sept 17**, seven Democratic negotiators (Gallego, Gillibrand, etc.) **a setback, but not the end of that important work.** We remain committed to working in a bipartisan fashion to get this legislation passed." The Sept 17, Sept 18 and Sept 19 cycles — the last.
- **The primary calendar, which is why 1mo does not move:** senate.gov's 2026 schedule lists "**Oct 05 – Nov 06 — State Work Period**" — five work weeks — making **Sept 28 – Oct 2 the last**.
- **Why the score HOLDS FLAT despite all of the above:** the two items clearing the sufficiency bar point in *opposite* directions — Democratic recommitment versus Republican defections — and the same fact twice.
- **REPORTED, NOT SCORED, per the sufficiency rule:** a White House adviser's Sept 23 Georgetown remark that the lame duck "is not a significant focus" and that work is shifting to regulators; Tillis's own Sept 16 "this is not the end" post (single-source); a Sept 24 analysis arguing a 2027 restart on prediction-market midterm odds (~61% Democratic sweep, ~92% House) — a **market** (Brown 4+ outlets, electoral not legislative); and Blockchain Association CEO Summer Mersinger's Sept 25 departure with Kristin Smith returning as interim.
- **PREDICTION MARKETS, labelled as market prices and never as institutional estimates:** a live Polymarket pull Sept 26 has "CLARITY signed into law in 2026" at **6.45% Yes on just \$12.7k** horizon 16%/20%/32% reads rest on a **single** DeFiRate snapshot because Kalshi's own API returned an empty market set, and are labelled single-source.
- **Score decision: HELD FLAT at 15/28/45/72/92. LEFT AS DRAFT, NOT AUTO-STAMPED** — categorically, as a full weekly refresh; and independently, the four corrections above are exactly what and schedule pages, which are the better primary anyway.

- **Full weekly refresh, full WebSearch access, no degradation this cycle:** WebFetch to arbitrary domains remains blocked in this sandbox (a documented, minor sourcing-depth caveat, not a **bar** — the CFTC filing below is corroborated by 4 independent outlets regardless).
- **No new Senate floor vote is scheduled since the Sept 15 cloture failure (49-50).** Sen. Tillis's motion to reconsider remains only a procedural placeholder — no outlet reports a scheduled vote.
- ★ ★ **NEW — the Senate's 2026 calendar shows it is out for nearly all of October and the first week of November for the midterms** (Election Day Nov 3), returning briefly (roughly two days) in December before Christmas recess — leaving the post-election lame-duck session as the only realistic remaining 2026-Congress opportunity. Corroborated by Roll Call, BGov, The Well News, CryptoBriefing, CoinGeek, and CryptoSlate.
- ★ ★ **NEW, LOGGED AS CONTEXT, NOT USED TO MOVE P — on September 17, 2026 the CFTC filed a prerule action with the White House's Office of Information and Regulatory Affairs** (pressroom reference plus independent corroboration (The Block, Yahoo Finance/247WallSt, CryptoTimes, and Gokhshtein, all dated Sept 18) — 4 independent outlets. This is an administrative timeline (no proposed rule before 2027) sits beyond this pillar's near-term horizons, so it is not used to move P.
- **MARKET PRICE, reported not scored:** Polymarket's "signed into law in 2026" contract reads roughly ~8% as of Sept 19 — down sharply from ~82% in February 2026, before the Trump crypto level (one source implied a rebound to higher single digits from a recent low), so treat this as approximate/directional, not a precise point figure. Kalshi's "CLARITY Act law before Jan 1, 2027" is
- **No corrections needed to any previously reported fact this cycle** — the 49-50 cloture count, the Tillis procedural-vote mechanic, and the list of seven Democratic holdouts (Gillibrand, Warner, etc.)
- **Score decision: HELD FLAT at 15/28/45/72/92.** No window moved; full independent primary-source research was done but nothing cleared the sufficiency bar (primary source or 2+ independent sources) — **delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-19_draft is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW**

Carried forward — what changed in the September 17 light daily touch (2026-09-17_draft, committed, auto-stamped), for continuity:

- **Re-checked for a new dated development since the Sept 15 cloture-vote failure — found none.** A policy advocate's Sept 16 comment (CoinSpectator/Cointelegraph) that the bill "could not pass" (repeating Kennedy's remark) — not a new dated fact, does not move P.
- **Score decision: HELD FLAT at 15/28/45/72/92.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 FAILED, 49–50** — well short of the 60 needed, and support did not even reach 50, a steeper shortfall than the Sept 12 cloture vote. Corroborated by CryptoTimes, Coinpedia, Bitget, HomeCryptolInvest) plus the Senate's own roll call — clears the sufficiency bar comfortably.
- ★ ★ **NEW — named Democrats who were working on the bill voted No**, including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto. Sen. Gallego — the lead Democrat — Sept 14 was not accepted.
- **Procedural aftermath.** Majority Leader Thune filed a motion to reconsider, a procedural preservation, not a scheduled revote. Sen. Lummis told reporters the bill will *not* return to the floor. Sen. Lummis: "The difference between dead and mostly dead." Senators leave Washington in early October for the midterms (7 weeks out) and do not return until after the election. The SEC's "Regulation Crypto" is
- **MARKET PRICE, reported but NOT scored:** Polymarket's "CLARITY Act signed into law in 2026" odds crashed from roughly 35% pre-vote to roughly 5% post-vote (KuCoin, Yahoo Finance, Crypto.com, etc.)
- **Score decision: RE-RATED DOWN, 37/53/62/83/92 → 15/28/45/72/92.** Per window: **1mo 37→15** — the one near-term floor catalyst this pillar was tracking is now resolved and lost by a window of **53→28** — a lame-duck attempt is a real but uncertain path, so some residual odds survive inside the window, down sharply from the pre-vote optimism. **6mo 62→45** — a new Congress seat the midterms. **1yr 83→72** — the concessions the White House already made on ethics language are a real foundation carried into any future round, so the one-year read stays comparatively high. **3yr 92→72**

Carried forward — what changed in the September 15 light daily touch (2026-09-15_draft, committed, auto-stamped), for continuity:

- ★ ★ **NEW — the White House agreed to an ethics package on September 13, 2026** and transmitted the language to Senate Republicans, a senior administration official calling it "the most significant ethics package the White House since roughly Aug 1–3. Corroborated across independent outlets (CNBC, The Hill, Forbes, congress.net, Yahoo/Politico).
- ★ ★ **NEW — Lummis, Boozman and Scott posted the FINAL CLARITY text on September 14, 2026, one day before the cloture vote, and it concedes three of the four standing Democratic** the ethics section expire with Trump's term; (b) **REVERSES the July text's outright bar on state-attorney-general enforcement**, giving state AGs standing to sue, which was an explicit Democratic position whichever is *greater*." The bar covers the president, vice president, members of Congress, federal judges and *their spouses* from issuing or sponsoring digital assets for compensation while in office (The Hill) — clears the sufficiency bar comfortably. Lummis/Boozman/Scott state the draft incorporates 126 substantive Democrat-requested changes (up from the 114 logged Sept 10).

- **The honest counterweight, same-day and equally well sourced.** The concession does *not* include the Tillis–Gallego divestment/blind-trust ask — preexisting crypto holdings need not be disclosed. “The next \$1.4 billion in crypto profits” and took it to the floor. Sen. Gallego — the lead Democratic negotiator and the most likely yes vote — said the Republican text “as it currently stands falls short of a **counteroffer** to Republicans late Monday, September 14 (CoinDesk, Sept 15): negotiation was still live on the eve of the vote.
- **SINGLE-SOURCE, reported but NOT scored:** CoinDesk alone reports the Democratic objection that the new language would still *block state attorneys general from directly suing the U.S. president*. It cannot move a P by itself.
- **MARKET PRICE, reported but NOT scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to **~34.5%** on the ethics deal, versus the ~23% Dec-31 read priced Sept 13. The market is blended, never used to move P.
- **The whip math itself is unchanged.** Zero Democrats publicly committed; Republicans hold 53 seats and need roughly 7–9 crossovers against likely GOP defections. **The 2:15pm ET cloture vote** is the outcome lands in the next cycle, and it remains a vote on the motion to proceed only, not final passage.
- **Score decision: RE-RATED UP, 32/47/58/82/92 → 37/53/62/83/92.** Per window: **1mo 32–37** — the top-cited blocker got real, text-level concessions hours before the vote, but the lead Democrat *fail*; the gap narrowed, it did not close. **3mo 47–53** — the largest move: a White House that has now demonstrably moved, plus a live Democratic counteroffer, makes a second bite within the window. The medium-term read was already high and barely changes. **3yr 92, held flat** — a single negotiation round does not move the multi-year read.

Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, D.C. press; more than 114 separate provisions at my Democrat colleagues’ request.” Substantively, it narrows the DeFi/prediction-market scope: non-decentralized trading protocols must now register with the SEC. Prediction-market objections raised earlier in the process.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text.** The original text was not in the bill.
- **Despite the 114 concessions, no Democrat had publicly announced support for the new text as of Sept 10-11** (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle’s reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalsbeek’s was 30%.
- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.
- **Score decision: P HELD FLAT at 32/47/58/82/92 across all five windows.** The Lummis text release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis-Gallego picture, not a clearance of the sufficiency bar (primary source or 2+ independents) for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded from the runbook’s stamping, AWAITING ALEX’S MANUAL REVIEW.** The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

Carried forward — what changed in this morning’s Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped), for continuity:

- **Sept 12, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development found since Sept 11. Whip-count materialized (Yahoo Finance, crypto.news, cryptotimes.io). **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged since Sept 9; Polymarket 2026-passage odds still read in the same ~16% band. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18% (a market-price change). **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development, no WH sign-off on the bill. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged. New since Sept 5: House Majority Whip Tom Emmer’s office has a timeline only, not the operative Sept 15 Senate cloture vote. Polymarket’s ~18% 2026-enactment odds (market price, not an institutional estimate) reflect the same math already priced in.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved; no new dated development clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield).** The Tillis-Gallego ethics counteroffer sent to the White House remains from July 2025. Rate, The Block, Bitget, Motley Fool).
- **Coinbase CEO Brian Armstrong’s public prediction that the bill passes is a single executive’s opinion, not new information** — reported for completeness, not used to move P.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from delegated daily auto-stamp, so it was left for manual review. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft’s commit message claimed it was auto-stamped, but config/scores.json’s status field was never actually advanced — a bug in that session.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in.** Score decision: HELD FLAT at 32/47/58/82/92. This shared score set was originally left as draft. **Score decision: HELD FLAT at 32/47/58/82/92.** This shared score set was originally left as draft. **2026** once Alex widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 31-Sept 1.** The Tillis-Gallego ethics counteroffer sent to the White House remains unchanged by multiple outlets.
- **No fresh prediction-market pull with a corroborating news event found this cycle** to clear the sufficiency bar.
- **Score decision: HELD FLAT at 32/47/58/82/92.** This cycle’s score set (2026-09-01_draft) is a light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 29-31.** The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged again.
- **Score decision: HELD FLAT at 32/47/58/82/92.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **AUDIT NOTE — a 2026-08-28_draft daily catch-up cycle sits between this refresh and the Aug 22 commit, abandoned and never delivered.** It was researched (held flat, logged a Polymarket per the same house discipline this report has applied to the Aug 17, 18, and 20 drafts and the interrupted Aug 21 session. This cycle supersedes it and independently re-verifies everything from
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date remains the only scheduled floor action,** reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate
- ★ **★ NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting,** directed CFTC staff to explore a fallback crypto-against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets dated it Aug 21, likely next-day pickup; cftc.gov used as primary). The CFTC's

- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** — primary-source confirmation relied on 7+ independent secondary outlets instead.
- **Context only, not new:** the Senate's Aug 8 stopgap funding bill (Collins-Murray deal) funds the government through Dec 11, 2026 — modestly reduces shutdown-fight risk to September floor
- **Score decision: held flat at 32/47/58/82/92 across all five windows.** Nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction — excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. The active score set is **2026-08-29_draft**, AWAITING ALEX'S MANUAL REVIEW

Carried forward — what changed in the Aug 22 full weekly refresh (2026-08-22_draft2), for continuity:

- **This morning's Aug 22 catch-up draft (d1) was fully delivered** — rendered, selfchecked, archived, and git-committed — but stayed uncommitted (owner-stamp sense) after a fact-check that This is a separate, later cycle: a full weekly refresh that independently re-confirms d1's findings against fresh primary sources and lands as a new dated set, 2026-08-22_draft2, per the runbook
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date reconfirmed via 7+ outlets** (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Banking, news.b still a motion-to-proceed vote only, not final passage.
- ★ **★ NEW — Sen. Ruben Gallego, on the record at the Aug 19 SALT Wyoming Blockchain Symposium** (crypto.news, Cointelegraph, FXStreet, Blockonomi), confirmed the White House has not at all" — and warned against rushing the Sept 15 vote. Confirms the deadlock persists, not new deterioration.
- ★ **★ NEW — WH crypto adviser Patrick Witt (Aug 19)** said the administration is "fully committed" to September passage and will keep negotiating with Democrats, while publicly blaming Sen CryptoSlate, Cryptopolitan) — combative messaging, not a concession, not used to move P.
- **No stablecoin-yield-provision developments found this window** — still an open blocker, status quo.
- **Prediction markets, this cycle's fresh pull:** Polymarket "signed in 2026" ~19.5% as of ~Aug 21 (CCN: volatile, dipping to ~15.5% before recovering slightly), Kalshi "60 votes" ~22% (Aug 21) not used to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — an unverified, non-journalistic X post** (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision is "officially solved" — single-source so it isn't mistaken for a scored fact.
- ★ **★ NEW, FLAGGED NOT SCORED — Coinbase CEO Armstrong's Aug 21 "pretty optimistic" remarks on 60 votes** (Motley Fool/Fool.com) are single-source opinion from an interested individual
- **Zero confirmed Democratic yes votes on cloture** — Republicans hold 53 of 60 votes needed, unchanged.
- **Score re-rates (Aug 22 d1 → Aug 22 d2):** 1-month 32 → **32** (held) · 3-month 47 → **47** (held) · 6-month 58 → **58** (held) · 1-year 82 → **82** (held) · 3-year 92 → **92** (held) — nothing found this cycle CLARITY, and this cycle's own evidence was clean — but a FULL WEEKLY refresh is categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. **COMMITTED BY ALEX August 23, 2026** after manual review.
