Iran War Risk Pillar Report

Middle East Conflict Risk — Researched, Scored, and Personally Committed

*Originally written June 19, 2026; scores committed by me June 19, 2026. Fully re-researched July 8, 13, 18, 25, and 30, 2026, and again as a full weekly refresh on August 8, 2026 (P cut at 1mo/3mo, 24/31/41/56/77 → 20/28/41/56/77, committed and stamped by Alex, last COMMITTED baseline). The Aug 16-22 gap saw four abandoned drafts: Aug 17 (held flat), Aug 18 (cut to 17/25/38/54/76), Aug 20 (cut to 16/24/38/54/76, left for manual review over a UAE missile claim), and Aug 21 (a session got partway through delivering the Aug 20 numbers — 2 of 6 reports touched, no render/selfcheck/archive/commit — before stopping). None were rendered, archived, or committed. An Aug 22 morning catch-up cycle (score set **2026-08-22_draft**) independently re-verified the gap via four parallel primary-source research passes, then adversarially fact-checked the load-bearing new claims before delivery — a step that caught a real error (see below) — and cut P to 14/22/38/54/76, delivered as a draft flagged for manual review. **Correction #1 (confirmed accurate):** the UAE missile-attack claim (Aug 18) remains single-source (UAE MoD only, Iran denies and calls it a possible "false flag") and was NOT the first direct attack on the UAE as prior drafts framed it — UAE was hit by a missile/drone barrage Apr 1-8 and again at its Fujairah port May 4, both Iran-attributed by UAE's own government and predating Aug 18; that "novel escalation vector" framing is retired. **Correction #2 (a genuine miss, caught on adversarial re-check):** that draft initially described a fatal strike on the bulker Minoan Dignity (chief engineer killed, Aug 17-18) as "the first confirmed fatality" in the Hormuz tanker campaign — that is FALSE; it is one of a cumulative toll of seafarer deaths since the campaign began late February 2026 this report never previously surfaced or scored on. The Iranian vessel seizure (tanker Amara, held near Qeshm Island since Aug 17, first since June 22) IS confirmed accurate. **THIS VERSION (score set 2026-08-22_draft2) is a separate, later-in-the-day FULL WEEKLY refresh** — the first deep multi-source dive since Aug 8 — that independently re-researched the pillar and ran a second, dedicated adversarial-verification pass specifically re-checking (a) whether the casualty-toll figure holds up and (b) whether anything was missed Aug 19-22. It holds up, but softer than a clean number: cross-checking Wikipedia's "2026 Strait of Hormuz crisis" infobox (18 total), a mid-July gCaptain snapshot ("at least 15"), and IMO's own incident tracker (19 seafarer deaths, but scoped to the broader Middle East, not Hormuz cleanly) puts the honest range at **15-19 cumulative deaths (17-18 by the most Hormuz-specific trackers)**, not a flat "18th death" — that softened framing is carried everywhere below. A UAE missile-attack claim the adversarial pass initially flagged as a possible miss turned out, on reconciliation, to be the same Aug 18 episode already in the draft baseline, not a second incident. No new kinetic incident was found Aug 19-22. **P HELD FLAT this cycle at 14/22/38/54/76 — left as draft at delivery (full weekly refreshes are categorically excluded from auto-stamp), then reviewed and COMMITTED BY ALEX on August 23** after independent re-verification of the math and the research trail; see My Decision below. A daily catch-up draft dated August 28, 2026 (score set **2026-08-28_draft**) re-checked two more Hormuz tanker incidents and a single-source Iran-Oman revenue-sharing claim, holding P flat — but that draft was never rendered, selfchecked, archived, or committed, and is treated as abandoned/superseded, the same discipline this report has applied to every other interrupted session (Aug 17, 18, 20, and 21). **THIS VERSION (score set 2026-08-29_draft) is a NEW, independent FULL WEEKLY refresh** against the last committed baseline (2026-08-22_draft2) — the first cycle in several weeks to surface a genuinely two-sided evidence ledger: a confirmed, crypto-specific sanctions escalation (the Aug 24 "Operation Economic Outcast" package, the first Iran sanctions action to explicitly name digital assets as a sanctionable sector and list 30 on-chain addresses, confirmed via direct fetch of home.treasury.gov) against a confirmed de-escalation upgrade (Oman's own Foreign Ministry, not just Iran, co-confirming a temporary Hormuz corridor Aug 25, confirmed via direct fetch of fm.gov.om). The two roughly offset, alongside a first-of-the-crisis Hormuz transit uptick and a second straight weekly Brent decline on the bull side, and two more tanker incidents plus a firmer casualty count on the bear side. **P HELD FLAT at 14/22/38/54/76 — left as a draft, not auto-stamped,** because this is a*

full weekly refresh, categorically excluded from delegated auto-stamp authority regardless of move size (here, zero). See My Decision below. ***THIS VERSION (score set 2026-08-31_draft) is a light daily catch-up*** *covering the Aug 29-31 gap: on Aug 30, US forces struck IRGC rocket/mine-launchers on Iran's Larak Island — the first US strike on Iranian territory since Jul 29 — directly firing this pillar's own pre-declared flip line ("a resumption of direct US strikes on Iran proper"). Iran retaliated with ballistic missiles on two US-linked Jordan airbases hours later; Jordan intercepted 8 missiles; no confirmed US casualty.* ***P RE-RATED DOWN to 9/17/34/51/75*** *(from 14/22/38/54/76), front-loaded and held under 8 points per window. This is a light daily touch, not a full weekly refresh, no window moved >8 points, and the master FINAL NUMBER's call band did not flip vs. the last stamped set —* ***AUTO-STAMPED per delegated authority. THIS VERSION (score set 2026-09-01_draft) is a further light daily catch-up*** *covering Aug 31-Sept 1: escalation continued into a second day — a THIRD Hormuz tanker hit (the VLCC Senegal Prosperity, Aug 31), a disputed Iranian claim of a drone strike on the UAE's Al Minhad Air Base (UAE MoD denies the target claim but confirms it intercepted an Iranian drone over its waters), and Trump on-record Aug 31 still weighing further strikes on Iran.* ***P RE-RATED DOWN again, more modestly, to 7/15/32/50/75*** *(from 9/17/34/51/75) — no window moved more than 2 points, well under the 8-point auto-stamp threshold.* ***AUTO-STAMPED per delegated authority*** *— the new last COMMITTED baseline.* ***THIS VERSION (score set 2026-09-02_draft) is a further light daily catch-up that turned into the sharpest single-cycle move since Aug 30****: CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran — roughly 50x the scale of the single Aug 30 Larak strike — including, for the first time in this war, direct US strikes on Iranian government oil tankers under a new "tanker for tanker" policy. A US strike reportedly hit a wedding party in Kuhestak, Hormozgan (4+ dead per the Hormozgan governor's office, including a 4-year-old, 60+ injured) — flagged here as SINGLE-NARRATIVE-SOURCED at the core fact level (Iranian state/local authorities; CENTCOM has neither confirmed nor denied it), so it does not by itself move P, but it is the reported trigger for Iran's response: coordinated IRGC ballistic-missile/drone strikes Sept 2 on US-linked bases in FOUR countries at once (Jordan, Bahrain, Iraq, Kuwait) — larger in scale than the single-state Aug 30-31 Jordan strike, but all four are repeat targets, so the "widening to a further NEW state" flip-line clause does not fire.* ***P RE-RATED DOWN sharply to 1/9/27/47/74*** *(from 7/15/32/50/75), front-loaded and kept under 8 points per window.* ***COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026****, retroactively, under Alex's Sept 3 widened delegated daily auto-stamp policy: a call-band flip and the size of a move are no longer disqualifying on their own. The wedding-casualty fact was correctly kept single-narrative-sourced and never used to move P, and nothing about the sourcing or the research itself changed — only the stamping threshold did. This remains the last TRUE committed baseline: 1/9/27/47/74.* ***Sept 3:*** *Iran fired a second retaliatory wave on Kuwait and UAE — both repeat targets, no US-manned facility hit, widening clause does not fire.* ***P HELD FLAT. Sept 5, light daily catch-up (2026-09-05_draft):*** *held flat again — the Reuters weapons-expert corroboration of the Sept 1 wedding strike resolves attribution of an already-priced event, not new escalation; a Sept 5 Iranian-media report of a US strike on the tanker STARK 1 near Kharg Island is single-narrative and not used to move P.* ***CORRECTION:*** *that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here, not corrected retroactively.* ***Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:*** *independently re-verified via WebSearch — the STARK 1 incident is real and developing (Iran International separately obtained video of US radio warnings, and AP itself frames it as an Iranian accusation, not a confirmed fact) but CENTCOM has still not confirmed or denied it, so per the sufficiency rule it is NOT used to move P. None of this pillar's flip-line clauses independently fired this week.* ***HELD FLAT at 1/9/27/47/74. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6 light daily catch-up (score set 2026-09-06_draft):*** *CENTCOM's own on-the-record press release now confirms the Sept 5 tanker strike this report had withheld pending confirmation — and reveals it was materially more serious than known: THREE Iranian tankers (M/T Downy, M/T Stark 1, M/T Kylo) struck in retaliation for an unprovoked IRGC ballistic-missile attack on two US Navy warships, both of which evaded.* ***P RE-RATED DOWN, modestly, to 1/8/25/45/73*** *— no window moved more than 2 points, no flip-line clause independently fires (no confirmed US casualty, no widening to a new state, Brent short of $100), and the master call band held Neutral → Neutral.* ***AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-08_draft) is a further light daily catch-up*** *covering Sept 6-8: the new fact is Iran SNSC secretary Mohsen Rezaei's on-record Sept 6-7 announcement (state TV, Press TV, Tehran Times) that Iran will declare a new "restricted zone" from the US Navy's blockade line into the Persian Gulf, sanctioning any vessel that enters — corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu, GlobalSecurity.org) but explicitly a THREAT OF INTENT, not yet executed ("further details... yet to be announced" per Al Jazeera's Sept 7 explainer). No flip-line clause fires (DCAS still 18, Brent ~$97.29 Sept 7, no new state).* ***P RE-RATED DOWN, modestly, to 1/7/24/44/73***

(from 1/8/25/45/73) — no window moved more than 1 point. ***AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-09_draft) is a further light daily catch-up*** *covering Sept 8-9: CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship") confirms US forces destroyed FIVE more Iranian crude oil carriers on Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Gulf of Oman) and M/T Derya (Kharg Island) — after the IRGC targeted a US Navy warship with ballistic missiles TWICE over the preceding two days, corroborated by 5+ independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org); both Iranian missile attempts were evaded, no US personnel harmed. Separately, Brent crude crossed $100/bbl intraday Sept 9 for the first time since July 24 (CNBC, ABC News; ~$100.44, +2.57%) — a single-day intraday cross, not this pillar's own "sustained Brent >$100" flip-line threshold, so it does not independently fire that clause, but it is the closest this cycle has come to the flip line. No flip-line clause fires (no US casualty, no new state, only an intraday Brent cross).* ***P RE-RATED DOWN, modestly, to 1/6/23/43/72*** *(from 1/7/24/44/73) — no window moved more than 1 point.* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***THIS VERSION (score set 2026-09-10_draft) is a further light daily catch-up*** *covering Sept 9-10: two new dated facts. CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military). Jordan is a repeat target, so the widening clause does not fire, and both sides confirm no casualties, so the US-casualty clause does not fire either. Separately, Iran-aligned Houthi forces seized the Yemeni port of Mocha Sept 10, closing in on the Bab el-Mandeb Strait — a second global chokepoint distinct from Hormuz — confirmed by 5+ outlets (The Media Line, Times of Israel, Al Jazeera, SCMP, Jerusalem Post, Cyprus Mail), but the same Houthi/Yemen actor already priced, and no strait closure has actually been executed, so this does not independently fire a clause either. Brent has now traded near/above $100/bbl for a second straight session (CNBC: above $101 Sept 9; TradingEconomics: ~$101.25 Sept 10) — more persistent than Sept 9's intraday cross, the closest this cycle has come to the flip line, but still short of a clean sustained-close call.* ***P RE-RATED DOWN, modestly, to 1/5/22/42/72*** *(from 1/6/23/43/72) — no window moved more than 1 point, master call band unchanged (Neutral → Neutral).* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***THIS VERSION (score set 2026-09-11_draft) is a further light daily catch-up*** *covering Sept 10-11: this pillar's own "sustained Brent close above $100" flip-line clause FIRES on a third consecutive session — Brent closed Thursday Sept 10 up more than 6% above $107 after trading above $108 intraday, its highest since May 19, with WTI closing above $102 for the first time since May (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500 — 4+ independent) — alongside fuller reporting of Iran's Sept 9 shipping wave: 10 vessels attacked near Hormuz (2 US-linked ships, 8 oil tankers), the largest declared wave of the war, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill). A merchant seafarer is not a US service member, so the confirmed-US-combat-death clause does not fire.* ***P RE-RATED DOWN, modestly, to 1/4/20/40/71*** *(from 1/5/22/42/72) — 1mo held at the near-floor 1, 3mo -1, 6mo -2, 12mo -2, 36mo -1. No window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar on every scored fact, and the master FINAL NUMBER's call band did not flip anywhere.* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***THIS VERSION (score set 2026-09-12_draft) is a further light daily catch-up*** *covering Sept 11-12: Houthi forces, having seized Mocha Sept 10, swept the rest of Yemen's Red Sea coastline by Sept 11 — capturing the final government-held coastal towns (Dhubab, Murad) and Houthi naval forces seizing Mayyun (Perim) Island in the Bab al-Mandeb strait itself, with fighting continuing for Zuqar Island — a materially more severe status (actual control of a second global chokepoint's own islands) than the Sept 10 baseline's "closing in" characterization, confirmed by 6+ independent outlets (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Separately, UKMTO's own Warning 133-26 confirms four projectiles struck two more vessels near Khasab, Oman Sept 10, one set afire (Gulf News, Maritime Executive, The Hill corroborating); an IRGC claim of a Saildrone strike is single-source and not used to move P. Yemen is an existing theater, so the widening clause does not fire; no US casualty, so that clause doesn't either — this is a severity escalation of an already-fired flip-line environment, not a fresh clause firing.* ***P RE-RATED DOWN, moderately, to 1/2/18/38/70*** *(from 1/4/20/40/71) — 1mo held at the near-floor 1, 3mo -2, 6mo -2, 12mo -2, 36mo -1.* ***AUTO-STAMPED per delegated daily authority*** *— status committed, stamped_by "Alex (auto-stamped)".* ***LATER THE SAME DAY (Sept 12): a separate FULL WEEKLY refresh (score set 2026-09-12_draft2), the first full-weekly-depth research dive since the Sept 5 full weekly refresh, ran four parallel adversarial research passes across all four qualitative pillars against the 2026-09-12_draft committed baseline (1/2/18/38/70).*** *One new dated fact clears the sufficiency bar: Saudi Arabia's East-West Pipeline (Petroline) — the kingdom's primary Hormuz-bypass oil-export route, a NEW target distinct from the already-logged Sept 8*

Aramco/Jazan refinery strikes — was hit by drones launched from Iraqi territory on Sept 10 (Saudi MFA statement/confirmation issued Sept 11). PRIMARY: Saudi Arabia's own Ministry of Foreign Affairs confirmed pumping stations in the Riyadh/Medina areas were struck, causing injuries and material damage, and said it would not retaliate for now at Baghdad's request; corroborated by 6+ independent outlets (Al Jazeera, CNBC, CNN, Times of Israel, ABC News Australia, OilPrice.com) with satellite imagery of fire/smoke at the pumping stations, plus Iraq's own PM ordering a probe, dismissing the Maysan operations commander, and closing the Shalamcheh border crossing. No group has claimed responsibility; President Trump, in Dublin, said Iran was "probably" responsible — a single, hedged, unconfirmed remark, logged as such, NOT as established fact (the Saudi MFA statement itself attributes origin only to Iraqi territory, not to a directing state). Neither flip-line clause fires: the widening clause does NOT fire (Iraq has been an active theater since the Sept 1 IRGC strike on US facilities in Erbil province — escalation within an existing theater, not a new one), and the US-casualty clause does NOT fire (no confirmed US military casualty found); the sustained-Brent→$100 clause continues to hold (~$104.61 Sept 12, same as the morning baseline) as persistence, not a fresh trigger. Also logged, not scored: Trump's own account that the Houthis privately signaled they don't want direct US involvement in Yemen (single-source as to substance, consistent with the already-logged MBS-refused-strikes counterweight), and the BRICS New Delhi summit's joint declaration (Sept 12, all members plus Saudi Arabia/Iran/UAE) urging "maximum restraint" over the escalation — a mild long-horizon diplomatic data point relevant only to the 1yr/3yr framing. The Mayyun Island/Bab al-Mandeb seizure (Sept 10-11) was independently re-verified as still holding, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye, ZeroHedge). Sized small given a single infrastructure strike with no widening and no US casualty: ***P RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70*** *(from 1/2/18/38/70) — 3mo/6mo/12mo -1 each, 36mo held, 1mo held at the near-floor 1.* ***WEEKLY REFRESH — left as DRAFT for Alex's manual review, full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of move size.*** *Committed by Alex; Sept 13-14 light daily catch-ups held flat with nothing new clearing the sufficiency bar, AUTO-STAMPED.* ***Sept 16 (score set 2026-09-16_draft):*** *RE-RATED DOWN on the 6/12/36mo windows to 1/1/14/33/66 (from 1/1/18/38/70) — the IAEA Board of Governors voted Sept 9 to refer Iran's nuclear file to the UN Security Council, and 130 Iranian lawmakers signed a Sept 12-13 statement calling for NPT withdrawal, with a hardline MP describing an emergency bill being drafted (RFE/RL, Tehran Times, Mehr News); Pezeshkian's public no-nuclear-weapons stance and the Foreign Ministry's "still being prepared" framing kept the move modest. AUTO-STAMPED, the last TRUE committed baseline.* ***THIS VERSION (Sept 17, score set 2026-09-17_draft) HOLDS FLAT at 1/1/14/33/66*** *— re-checked, no new dated development beyond the Sept 9 IAEA referral and the Sept 12-13 NPT statement already priced; Pezeshkian's and the Foreign Ministry's positions are unchanged. AUTO-STAMPED per delegated daily authority.* ***Sept 18 (score set 2026-09-18_draft, this version) HOLDS FLAT again at 1/1/14/33/66.*** *Two dated items were found and weighed. Trump told Axios Sept 17 he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday UN General Assembly meeting with six Gulf-state leaders — dated and multi-sourced (Axios original, corroborated by Times of Israel, Politico Wire, Breitbart, RedState, Western Journal, anews — 5+ independent), but it is rhetoric about an undated future decision, and the near-term windows (1mo/3mo P=1) already price maximal active-war uncertainty, so it does not clear the bar for a further move. Separately, an initial general search surfaced a claim that the IRGC struck a Togo-flagged tanker named "Trend" in the Strait of Hormuz on Sept 18; a follow-up targeted search could not independently corroborate this from any named outlet or primary (CENTCOM/IRGC) source —* ***treated as NOT FIRED / NOT USED*** *per this report's house discipline for uncorroborated single claims. AUTO-STAMPED per delegated daily authority. See My Decision below.* ***THIS VERSION (Sept 19, score set 2026-09-19_draft) is a FULL WEEKLY refresh*** *against the last committed baseline (2026-09-18_draft) — independent primary-source research across all five windows found nothing that clears the sufficiency bar for a move. Iran's parliament continues moving toward, but has NOT enacted, NPT withdrawal: 130 lawmakers signed a further Sept 7-13 statement urging the legal Article X process, Parliament Presidium spokesman Abbas Goudarzi said withdrawal "can easily" be done, and a bill was submitted for expedited consideration — but Iran's own Foreign Ministry still calls it "in preparation," so this remains a proposal, not a completed act (Iran International, Tehran Times, IranWire, APA.az, anews, Militarnyi, IFP News — corroborated but mostly Iran-linked/state-affiliated, the same treatment this pillar has always given Iranian-sourced claims). Trump told Axios (Sept 17) he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday Sept 22 UN General Assembly sideline meeting with six Gulf-state leaders (Saudi Arabia, UAE, Qatar, Bahrain, Kuwait, Oman) — very well corroborated (Axios, Jerusalem Post, Politico/Political Wire, Israel National News, Common Dreams, Breitbart, CBN News, 5+ independent), but still rhetoric about an undated future decision;* ***the Sept 22 meeting itself is now flagged as this pillar's clearest near-term trigger to watch next cycle.*** *The UN Security Council failed 11-2-2 on Sept 17 to*

renew its Iran-sanctions monitoring panel, Russia and China dissenting (Somalia/Pakistan abstaining) — a primary UN press release (press.un.org, sc16455 and related), corroborated by Euronews and Security Council Report — institutional gridlock over the 2025 snapback dispute, not a new sanction or act of war. The Togo-flagged tanker "Trend" strike (Sept 17-18) this pillar could not corroborate last cycle is now CONFIRMED via the IRGC's own statement (IRNA, primary, via GlobalSecurity.org) plus independent outlets including The Hill, Bernama, IranWire, TFTC, Parapolitika, and Rio Times — reversing last cycle's NOT FIRED call, but it is a continuation of an already-months-long tanker campaign (the US struck three Iranian tankers Sept 1-5), not a new escalatory step, so it updates the record without moving P. Brent settled ~$103.21/bbl Sept 18 (CNBC, Al Jazeera), down 1.5% day-over-day but still near the multi-month highs reached in early September — a market price, not scored. Iran has now gone nine straight days without striking a "host state" (GlobalSecurity.org's OSINT day-by-day tracker) — a mild, fragile de-escalatory data point — while a Houthi-linked air-raid alert hit Riyadh Sept 19 for the first time since July (Times of Israel liveblog) — a mixed signal on the proxy front; neither clears the bar alone. FM Araghchi said Iran and Oman "agreed a plan" to reopen the Strait (TASS, Caspianpost) but separately clarified the Oman understanding will NOT by itself reopen Hormuz, conditioned on the US honoring the 60-day Islamabad MOU (Mehr News, corroborated by Samaa) — a net wash. ***P HELD FLAT at 1/1/14/33/66 — full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of the size of the move (here, zero) — LEFT AS DRAFT, flagged prominently for Alex's manual review.*** *See My Decision below.* ***Updated & Re-verified September 22, 2026 — LIGHT DAILY touch, score set 2026-09-22_draft: carried forward unchanged at 1/1/14/33/66 — not re-researched this cycle; Fed & Macro re-rated down instead. COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026. Updated & Re-verified September 23, 2026 — LIGHT DAILY touch, score set 2026-09-23_draft: RE-RATED UP to 3/3/16/35/66****, the first upward move since Sept 13. A senior Iranian official told Reuters (Sept 22, 8+ outlet corroboration) Iran can reopen Hormuz within 7 days if the US eases pressure and lifts its blockade; separately, US officials (Witkoff/Kushner) and Iran's FM Araghchi held a 3-hour "very productive" mediated meeting at the UN General Assembly sidelines Sept 22, the first direct US-Iran contact at this level since the war began, with another meeting scheduled soon. Sized modestly against Iran's still-steep unmet conditions (full blockade lift, all frozen assets released, end to war on every named front), Pezeshkian declining to meet Trump directly, and continued unattributed Sept 21 tanker incidents.* ***COMMITTED, AUTO-STAMPED SEPTEMBER 23, 2026.***

Prior cycle (Sept 16): the crowd's attention today is almost entirely on the CLARITY Act vote failure, not Iran — but two real, dated escalatory facts landed this week on the nuclear tr Pezeshkian's own public no-nukes line plus the Foreign Ministry calling the bill "still being prepared" both cut against reading this as a fait accompli. That's why the move lands entir didn't independently move anything.

Prior cycle (Sept 12, full weekly refresh): the crowd will likely either read the Petroline pipeline strike as proof Iran is now hitting Saudi Arabia's core oil-export infrastructure directly week, and that pattern — not the unconfirmed attribution — is what earns a further small cut. I am explicit that Trump's Dublin remark is a single hedged guess, not evidence, and sc declaration and Trump's own account of Houthi reluctance to draw in the US are both logged honestly as counterweights, because a system that only reports escalation isn't honest

Prior cycle (Sept 12 daily): the crowd will likely either treat the Bab al-Mandeb island seizures as a headline-grabbing new front that should crater risk assets, or dismiss it as "just Ye no clause in this pillar's own flip line technically fires (Yemen is existing theater, no US casualty). I am sizing this cut larger than the recent 1-point daily touches for exactly that reaso cuts the other way: the US is not chasing every escalation into a wider war.

Prior cycle (Sept 11): the crowd will read a $108 print and a 6% up-day in Brent as the war finally repricing energy — or, watching Friday's 3% give-back on Hormuz diplomacy head discipline only counts if it also fires when the number arrives. What it does *not* do is change what the war is: still no confirmed US combat death since Sept 4, still no strike on a furth

Prior cycle (Sept 10): the crowd is likely to either read the Al Azraq missile barrage as a dangerous new peak of the conflict, or wave off a Yemeni port city changing hands as backg category. The Houthi seizure of Mocha is more interesting precisely because it's easy to dismiss: it's the same actor this pillar has tracked in the Red Sea/Bab al-Mandeb theater for clearest signal yet that markets are pricing this as durable rather than a one-day spike. Re-rating down modestly again (1/5/22/42/72, from 1/6/23/43/72), consistent with the sizing t

Prior cycle (Sept 9): the crowd is likely to either read Brent's intraday $100 cross as confirmation the flip line has effectively fired, or dismiss the 5-tanker CENTCOM strike as "more fire that clause, though it earns a mention in every relevant section below rather than being quietly dropped. The CENTCOM-confirmed 5-tanker strike is a larger single incident than 1/7/24/44/73) rather than sharply, consistent with the Sept 6 and Sept 8 cuts.

Prior cycle (Sept 8): the crowd is likely to either dismiss Rezaei's restricted-zone announcement as Iran "talking tough" without follow-through, or treat it as an imminent full closure cutoff. Re-rating down modestly (1/7/24/44/73, from 1/8/25/45/73) rather than sharply, because none of this pillar's flip-line clauses fire on it (no US casualty, no new state, Brent sh pillar has discounted for weeks.

Prior cycle (Sept 6): the crowd was likely to read CENTCOM's own confirmation of the Sept 5 tanker strike as a relief ("finally, official clarity") rather than what it actually was — a co pillar's flip-line clauses fired on it (no US casualty, no new state, Brent short of $100) and the escalation — while more serious than previously known — was still a continuation of the more work than it's earned.

The crowd: is likely to anchor on the wedding-strike casualty claim as the emotional center of today's news, and either (a) treat it as a confirmed atrocity driving the story, or (b) disr

Me: cutting sharply to 1/9/27/47/74, versus the Sept 1 baseline (7/15/32/50/75, auto-stamped). This is the largest single-cycle P move this pillar has made since the Aug 30-31 flip-lin matters (Iranian state/local authorities, CENTCOM neither confirming nor denying), even though it's widely reported; my confidence in today's sizing is lower than for a cleanly multi- new magnitude of event is exactly the kind of judgment call the runbook says shouldn't be quietly self-approved; (3) both sides are now on-record threatening much larger response

My edge: the discipline here is refusing to let a single-source emotional fact do more work than it's earned, in either direction — not discarding it (it's genuinely the trigger for today'

The flip line, re-leveled — TRIGGERED Aug 30, and as of Sept 11 a SECOND distinct clause (sustained Brent close above $100) has now ALSO fired: a confirmed new US combat death, a resumpti **of Sept 11, the "sustained Brent close above $100" clause has fired too** — three consecutive sessions above $100, including a close above $107 on Sept 10, its highest since May 19. Two of the fou OTHER three clauses has independently fired fresh: the "confirmed new US combat death" clause remains unfired (no confirmed US casualty found as of this run); the widening-to-a-further-new-st nonetheless the largest single-cycle escalation since the flip line itself fired, which is why P moved sharply down that cycle. **UPDATE, Sept 6:** CENTCOM has now confirmed the Sept 5 tanker strike t moved >2 points) and, unlike the Sept 2 cycle, is AUTO-STAMPED per the delegated daily authority (sourcing is primary/multi-outlet, no call-band flip). **The equivalent upside flip: a signed Hormuz** confirmed, whether either side's threatened "much larger"/"significantly larger" response actually materializes, a confirmed US combat death, a confirmed strike on a genuinely new state, or a susta independent outlets, but explicitly not yet executed (no boundaries announced, no confirmed incident tied to it). This does not independently re-fire any of the three unfired clauses (no confirmed U missile attack on a US Navy warship — a repeat pattern, not a widening to a new state, and no confirmed US casualty, so neither of those clauses fires. Brent crosses $100/bbl intraday for the first ti cycle for: whether Brent sustains a close above $100 (it is now closer to that threshold than at any prior point in this war), whether the restricted zone is actually declared and enforced, whether the Bab el-Mandeb — a second chokepoint, but the same actor/theater already priced, and no strait closure has actually been confirmed, so this doesn't fire a clause either. Brent now trades above $10 **UPDATE, Sept 12:** the Houthis have now gone further than "closing in" — they hold Yemen's entire Red Sea coastline plus Mayyun (Perim) Island inside Bab al-Mandeb itself, with fighting continuing sustained-Brent and direct-strikes clauses, not a fresh clause. The cut is moderate (no window moved >2 points) and is AUTO-STAMPED per the delegated daily authority. Watch next cycle for: whe launched from Iraqi territory Sept 10 (Saudi MFA statement Sept 11) — does not independently fire either the widening clause (Iraq is existing theater, active since the Sept 1 Erbil strike) or the US-cas authority. Watch next cycle for: whether responsibility for the pipeline strike is claimed or independently confirmed, whether the Houthis actually close or interdict shipping through Bab al-Mandeb, a states meeting it references is now a dated, watchable event; the UN Security Council's failed Sept 17 sanctions-panel renewal is institutional gridlock, not a new sanction or act of war; the "Trend" t outcome of the Sept 22 UN General Assembly Gulf-states meeting, whether the NPT-withdrawal bill is actually voted on, a confirmed US combat death, or a confirmed strike on a genuinely new stat
