

The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31 — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). P HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was **AUTO-STAMPED** alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's own commit message claimed this set was "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to

committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call). **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P. **HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time** — re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P. **HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found. **HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again** — re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50%→30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found. **HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.** Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news, **September 4**) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)** held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)"** — the new last TRUE committed baseline. **A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)** — the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his support on remains largely unchanged from the July draft, and no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Político — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. **P HELD FLAT at 32/47/58/82/92** — the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-**

stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 5, 2026 · Updated & Re-verified September 17, 2026 (LIGHT DAILY touch, 2026-09-17_draft: this pillar **HELD FLAT at 22/30/38/70/88**, the level it re-rated down to on Sept 16 after the Sena to H.R. 3633 by **49-50** on Sept 15 — eleven short of 60 and one short of even a simple majority (PRIMARY: U.S. Senate Daily Press Gallery, senate.gov). Zero Democrats voted yes; four Republicans voted think we're done. It's over." Nothing new cleared the bar today: the Tillis motion to reconsider, filed 3:01pm ET Sept 15, is still pending and unacted-on, and the only fresh item is Sen. Lummis publicly ch (CryptoTimes, Sept 17) — post-mortem politics, not a procedural event, and it moves no window. AUTO-STAMPED per the delegated daily authority.) · Prior committed: 37/53/62/83/92 (2026-09-15_draft

The Scores — Committed vs. Drafts

June column committed by me June 12, 2026. Aug 16 is the prior auto-stamped daily baseline. Per house rule, drafts only collapse out of this table once a set actually commits — Aug 22 draft2 committed Aug 23 and stays visible because not committed, so nothing collapses yet from here. Aug 17, 18, and 20 drafts were written but never delivered; an Aug 21 session delivered the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. The same-day (rendered/selfchecked/archived/committed to git), but stayed uncommitted after an adversarial fact-check caught a false claim in the Iran War Risk pillar report. The same-day full weekly refresh, **2026-08-22_draft2 (d2)**, independent **August 23, 2026** — the last committed baseline. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat) but never rendered, selfchecked, archived, or committed — treated as not delivered, dropped from the **2026-08-29_draft**, a FULL WEEKLY refresh, independently re-confirms the hold again via fresh primary-source research and is left as draft, AWAITING ALEX'S MANUAL REVIEW. **Aug 31 and Sept 1 are light daily catch-ups (2026-08-29_draft)**, checked for a schedule change or ethics-text development, found none, held flat, and were AUTO-STAMPED — Sept 1 (32/47/58/82/92) is the last COMMITTED set for this pillar. **Sept 2 (2026-09-02_draft)** is a further light daily catch-up, left as draft, because Iran War Risk's re-rate (bundled in the same set) flipped the master call band; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy — now the last TRUE COMMITTED baseline. Sept 3 held flat a further time (nothing material on any pillar). **Sept 5 light daily catch-up (2026-09-05_draft)** holds flat again; that cycle's own commit message claimed "AUTO-STAMPED," but config/scores.json correction this cycle, not itself edited (stamping is Alex's call). **Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, this version)** independently re-confirms the hold via fresh WebSearch research; categorically excluded from daily auto-stamp authority. **ALEX September 5, 2026. Sept 6 and Sept 8 light daily catch-ups (2026-09-06_draft, 2026-09-08_draft)** each independently re-checked and held flat — no new dated legislative development, no WH sign-off on the ethics language. **AUTO-STAMPED**, Sept 8 the last COMMITTED baseline. **Sept 9 (2026-09-09_draft, this version)** re-checks again and holds flat a further time — Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price movement. **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline (see What Changed for cycle-by-cycle detail). **Sept 10 (2026-09-10_draft)** re-checks again and holds flat a further time — the Sept 15 cloture vote is unlikely (Paul/Hawley firm no, Tillis conditional) is dated Sept 4, before the last two baselines, so it is not new information — **AUTO-STAMPED per delegated daily authority**, the committed baseline. **Sept 11 (2026-09-11_draft)** holds flat again — the Sept 15 cloture vote is unlikely (Paul/Hawley firm no, Tillis conditional) is dated Sept 4, before the last two baselines, so it is not new information — **AUTO-STAMPED per delegated daily authority**, the committed baseline. **Sept 12 light daily catch-up (2026-09-12_draft)** development found — **AUTO-STAMPED**, the last TRUE COMMITTED baseline for this pillar. **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version):** the first deep multi-source dive since Sept 5 — Sen. Lummis released a bill, corroborated by 6+ independent outlets) incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope, but the Tillis-blocking ethics provision is largely unchanged and no Democrat has publicly signalled support. **Hold flat a further time at 32/47/58/82/92 — categorically excluded from daily auto-stamp authority (full weekly refresh), LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.**

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. Held flat this cycle at 32/47/58/82/92 — unchanged since Aug 8, through the committed Aug 22 refresh (d2), the abandoned/never-delivered Aug 26-08-29_draft), all independently re-verified against fresh primary sources rather than trusted at face value. The Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found anywhere Aug 22-29 — and it bears repeating this is a cloture vote on the motion to proceed, not the motion to amend. P needs its own floor debate/amendments and its own 60 votes. Both binding disputes remain fully unresolved as of today: the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan compromise released text found this cycle) and the stablecoin-yield dispute (no update found). NEW, CONFIRMED this cycle: CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee (Aug 22) to explore a fallback crypto-market-structure rulemaking using the CFTC's existing authorities in case CLARITY continues to stall — adversarially verified directly against cftc.gov (PressRoom/Speeches) (some secondary outlets, e.g. American Banker/PYMNTS/The Hill, dated it Aug 21, likely next-day pickup; cftc.gov used as the primary date). Direct quote: "If CLARITY continues to stall because of the existing authorities to begin establishing a regime for crypto asset markets." This is the CFTC's analog to SEC Chair Atkins' already-logged Jul 29 unilateral-authority statement — it does not to be used, not used to move P, same treatment as the SEC's earlier fallback signal. Two independent prediction-market pulls this cycle show a consistent low-teens-to-20s read: DeFiRate.com (Aug 27) closed at 14-20-21% ("60 votes" by Jan 1 2027); a live Aug 28 Polymarket pull separately showed 14% — both labeled as market prices, not institutional estimates, and per house rule cannot move P without 60 votes. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote surfaced in this cycle's search and was cross-checked to an **August 19, 2025** (one year earlier) CoinDesk/Politico Pro story from a 2025 symposium — flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an Aug 2026 development. congress.gov and dailypress.senate.gov both returned no results (blocking); primary-source confirmation relied on 7+ independent secondary outlets instead, consistent with how prior cycles have had to handle this. Context only, not new: the Senate passed the bill funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a shutdown fight eating September floor time around Sept 15. The move stays flat because it's not a bill, and roughly zero Democrats are confirmed as yes votes. The actual live blocker, unchanged since Aug 8: a *toughened* Democratic ethics counter-proposal has sat unanswered at the White House. Even the bears argue "slips past the midterms," not "dies."

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The thesis as of September 17, 2026 (LIGHT DAILY touch, 2026-09-17_draft, held flat) — the base analysis below remains on the record, but the vote has overtaken it.

The prior base analysis, as of September 5, 2026 (FULL WEEKLY refresh, 2026-09-05_draft2) — flat since Aug 8, through the committed Aug 22 refresh, an abandoned/never-delivered Aug 28 daily draft, the Aug 29 full weekly re-dig (Sept 5), nothing structural moved

The Facts

As of September 17, 2026 — LIGHT DAILY touch (2026-09-17_draft), this pillar HELD FLAT at the level it re-rated down to on Sept 16. The vote that decided this pillar's year is the first block below. Hard numbers only, sources on the bearing).

As of September 17, 2026 — LIGHT DAILY touch (2026-09-17_draft), this pillar HELD FLAT at the level it re-rated down to on Sept 16. The vote that decided this pillar's year is the first block below. Hard numbers only, sources on the bearing).

- CoinPicks · September 17, 2026 · Research & Education · Not Financial Advice

- **The honest counterweights, and they are why this was not a floor-to-zero re-rate:** the Tillis motion to reconsider is live and would let leadership re-run the same cloture question without Senate calendar; the WH-blessed final ethics text of Sept 13–14 now exists in public as a ready-made starting point for a 2027 reintroduction; the House passed the underlying bill with 294 votes independently — CFTC Chair Selig's Aug 20 fallback-rulemaking direction and SEC Chair Atkins' Jul 29 statement are the active 2026 policy path.
- **★ NEW, checked today (September 17): nothing has moved.** The Tillis motion to reconsider is still **pending and unacted-on**; the Senate floor moved to S.4668 on Sept 16. The day's only Alsobrooks over her no vote (CryptoTimes, Sept 17) — post-mortem politics between two senators, not a procedural or vote-count event. **It moves no window. P HELD FLAT at 22/30/38/7**
- **MARKET REACTION, reported as a market price and explicitly NOT a score input:** BTC fell from nearly \$79,530 pre-vote to a \$75,750 session low, the lowest since Aug 21 and –4.2% on 2 index prints; this system's own Bitstamp feed, which is what the quant pillar scores, puts the Sept 15 low at \$74,913.43 and the close at \$75,577.29 — different venues, same story, and the two and Fed-hike expectations cited alongside the vote as joint causes.

Carried forward from the September 15 light daily touch (2026-09-15_draft, committed) — the concession that preceded the vote, still the relevant record of how the text got to where it is:

- ★ **★ NEW — September 13, 2026: the White House agreed to an ethics package for the CLARITY Act and transmitted the language to Senate Republicans.** A senior administration official: "ethics provision in history." Corroborated by CNBC, The Hill, Forbes, Yahoo/Politico and congress.net — 4+ independent outlets. This is the first movement on the blocker that has sat unanswering.
- ★ **★ NEW — September 14, 2026: Sens. Lummis, Boozman and Scott posted the FINAL CLARITY Act text one day before the cloture vote.** Versus the July draft, the ethics division **drops** the ethics section with Trump's term), **reverses the July text's outright bar on state-attorney-general enforcement** and gives state AGs standing to sue, and **raises civil penalties from "10% or \$500,000, whichever is greater."** It bars the president, vice president, members of Congress, federal judges and their spouses from issuing or sponsoring digital assets for compensation within 126 substantive Democrat-requested changes. Corroborated by The Block, The Defiant, CNBC, crypto.news, BelnCryto, CryptoBriefing and The Hill — 6+ independent outlets.
- **What the concession does NOT do:** it does not require divestment or blind-trust placement of preexisting crypto holdings — the core of the bipartisan Tillis–Gallego counterproposal.
- **September 14, 2026: Sen. Warren called the provision a "weak fig leaf that will do nothing to stop him from making his next \$1.4 billion in crypto profits"** and went to the Senate floor.
- **September 14, 2026: Sen. Gallego — the lead Democratic negotiator and the most likely yes vote — said the Republican text "as it currently stands falls short,"** naming ethics, consumer protection and market integrity as provisions that "must be strengthened."
- **Late Monday, September 14, 2026: Senate Democrats sent a counteroffer to Republicans** on the eve of the vote (CoinDesk, Sept 15). CoinDesk could not confirm its contents beyond that the bill would be amended. CoinDesk alone reports the Democratic objection that the new language would still block state attorneys general from directly suing the U.S. president.
- **The vote itself had not happened when this cycle ran.** The cloture vote on the motion to proceed to H.R. 3633 ripens Tuesday, September 15 at 2:15pm ET, 60 votes required; this run executed by roughly 7–9 Democratic/independent crossovers; zero are publicly committed. It is a vote on the motion to proceed only — floor debate, amendments and a separate 60-vote passage threshold.
- **MARKET PRICE, reported not scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to ~34.5% on the ethics deal, versus the ~23% Dec-31 read priced Sept 13. Markets moved and never move a P; the two quotes may not share a question basis.

Carried forward from the September 12 full weekly refresh and the daily touches since — still load-bearing, not contradicted:

- ★ **★ NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, DKB, Blockhead — 6+ independent outlets). Lummis states it "incorporated more than 114 separate provisions at my Democrat colleagues' request." Substantively it narrows the DeFi/prediction-market to cash-settled spot trading in digital commodities, addressing the tribal-government prediction-market objections raised earlier.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text,** per the report's actual binding blocker was not resolved by this release.
- **No Democrat had publicly announced support for the new text as of Sept 10-11,** despite the 114 concessions (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle's reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalsbeek **flagged as such** and, like all prediction-market reads, not used to move P.
- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.
- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — the Lummis text release is well-corroborated but a mixed signal (real concessions offered, but the Tillis–blocker Democratic converts) — net a wash, not a clearance of the sufficiency bar for a move in either direction.

Carried forward from the September 5 full weekly refresh (2026-09-05_draft2, committed by Alex Sept 5) and the light daily catch-ups since (through this morning's Sept 12) — still load-bearing, re-verified this cycle, not contradicted:

- ★ **★ NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date,** reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate.com (Aug 27). re-verified this cycle, with no schedule change found anywhere Aug 22-29. This is a cloture vote on the *motion to proceed* only, not final passage — floor debate/amendments and a separate 60-vote passage threshold.
- ★ **★ NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting,** directed CFTC staff to explore a fallback crypto-asset rulemaking, in case CLARITY continues to stall. Adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets, likely next-day pickup; cftc.gov used as the primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will utilize its existing authorities to begin enforcement of the CFTC's analog to SEC Chair Atkins' already-logged Jul 29 unilateral-authority statement — it does not touch either binding dispute (ethics or stablecoin-yield) and is logged as context, NOT a fallback signal.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan counter-proposal — no White House sign-off or released text yet found). Status quo on both.
- **Prediction markets (market prices, not institutional estimates — house rule), two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% ("signed in 2026") and Kalsbeek 14%. Polymarket pull separately showed 14%. Consistent low-teens-to-20s read across sources — but market prices alone, even corroborated by a second independent pull, can't move P under house rule.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and was cross-checked to an August 2026 story from a prior year's SALT Wyoming/Jackson Hole symposium. Flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an Aug 2026 development.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** (bot-blocking) — primary-source confirmation relied on 7+ independent secondary sources that had to handle this.
- **Context only, not new:** the Senate passed a stopgap funding bill Aug 8 (Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a shutdown around Sept 15.
- **No change found to the confirmed Democratic yes-vote count** (still zero) or to any primary-source Senate floor action.
- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction.

Carried forward — the abandoned/never-delivered 2026-08-28_draft (daily catch-up, researched but never rendered/selfchecked/archived/committed): logged a Polymarket "signed in 2026" drift to 14% (live pull, Aug 28) from ~19% to ~14% P; no other new development found that day. Treated as not delivered per house discipline, superseded by this cycle's independent re-verification, not contradicted.

Carried forward from the committed Aug 22 full weekly refresh (2026-08-22_draft2 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ **★ the Sept 15, 2:15pm ET cloture vote on the motion to proceed was reconfirmed via 7+ outlets** as of Aug 21 (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Bank, etc.). re-verified this cycle, with no schedule change found — still a motion-to-proceed vote only, not final passage.
- **Sen. Ruben Gallego, on the record at the Aug 19, 2026 SALT Wyoming Blockchain Symposium,** said the White House has not given a point-by-point response to the bipartisan Tillis–Gallego counterproposal. re-verified this cycle, with no recess — responses have come back "blank, weaker than before, or not at all." He also explicitly warned against rushing the Sept 15 vote. Multi-source: crypto.news, Cointelegraph, FXStreet, Bloomberg, etc.

- **White House crypto adviser Patrick Witt said Aug 19** the administration is "fully committed" to getting CLARITY passed in September and would keep negotiating with Democrats up to the blocking the pre-recess vote. Multi-source (Cointelegraph, Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan). Combative public messaging, not evidence P.
- **An unverified, non-journalistic X post** from a crypto project's promotional account (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision "finally has a deal on the table" and is "officially" directly contradicted by Gallego's own on-record Aug 19 statement (4+ independent outlets). Not used.
- **Coinbase CEO Brian Armstrong said Aug 21** he's "pretty optimistic" the bill clears 60 votes, arguing Thune wouldn't have scheduled Sept 15 without expecting passage, and that "both sides are committed" (Motley Fool/Fool.com), an interested industry party's opinion — not used to move P.

Carried forward from the same-day Aug 22 catch-up draft (d1 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the SEC formally proposed "Regulation Crypto Assets" on Aug 18** (sec.gov press release 2026-76) — a token-offering exemption regime: a startup exemption ($\leq \$5M$ over 4 years), a full conditional safe harbor from the "investment contract" definition. This is a separate SEC rulemaking track, not the CLARITY Act, and does not touch CLARITY's binding ethics-provision or stablecoin yield/banking dispute.
- ★ ★ **Trump hosted a White House crypto event on Aug 19**, with SEC Chair Atkins, CFTC Chair Selig, and industry CEOs present, and publicly pushed Congress to pass "a fair version" of CLARITY in response to public pressure and rhetoric — no text change or deadlock resolution reported, so not used to move P.
- **As of Aug 21, both live disputes remain open:** the ethics-provision fight (Democrats pressing for stronger limits on officials' crypto holdings) still has no confirmed White House sign-off on the ethics-provision; the yield/banking dispute is also still unresolved.
- **Prediction markets logged that morning:** Polymarket "signed into law in 2026" = 25% Yes (Aug 22 direct pull); Kalshi's "reaches 60 votes" market $\approx$ 22% (Aug 21) — this cycle's fresh pull indicates a kind of intra-week volatility the house rule treats as noise, not signal, on its own.
- ★ ★ **FLAGGED, NOT SCORED — Coinbase CEO Brian Armstrong's on-record prediction that CLARITY "will pass"** is single-source opinion (one person, one outlet's framing) — explicitly not used to move P. more specific Aug 21 "pretty optimistic" remarks logged above.

Carried forward from the Aug 17, 18, and 20 drafts (written but never delivered — no report/render/archive/commit followed any of them; independently re-verified today, not contradicted):

- **Sen. Ruben Gallego, speaking at the SALT Wyoming Blockchain Symposium on Aug 20**, said White House responses to the Tillis-Gallego ethics counter-proposal "have come back blank" and "warned against rushing a floor vote" (Blockonomi/Cointelegraph, FXStreet, Crypto-Economy, all Aug 20) — reaffirms the existing stalemate rather than deepening it.
- **Senate Banking Chair Tim Scott said (The Block, Aug 18) the stablecoin-yield provision "we thought was all settled" has resurfaced as a live dispute**, amid community-bank lobbying for a more open and unresolved as of Aug 21 (see above).
- **White House digital-assets adviser Patrick Witt called himself "truly optimistic and bullish" on passage** (The Block, Aug 18) despite the stablecoin friction — rhetoric only, no new whip counts.
- **Polymarket "signed in 2026" bounced from ~16% (around Aug 14-15) to ~24% (Aug 20 live pull)** on no identified news catalyst, and has since settled to 25% (Aug 22) — noise, not used to move P.
- ★ ★ **FLAGGED FOR THE RECORD, not scored:** Galaxy Research appears to have cut its 2026-passage estimate further to 10% (from the 30% already reflected in this report's history) around Aug 21, likely a gap in an earlier research cycle rather than new information — flagging for Alex's attention, not treating as a driver of today's score.

Carried forward from the August 16 committed baseline (still load-bearing; independently re-verified, not contradicted, this cycle):

- ★ ★ **NEW — the SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote the day before it was scheduled**, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, Genious). The token-offering exemption pathways under a separate SEC rulemaking track — relevant context on regulatory limbo across both branches, but not a CLARITY-specific trigger; not used to move P.
- **The Senate remains in August recess; no new floor-schedule or ethics-text development found (as of Aug 16).** Re-checked Bitcoin Foundation, Troutman Financial Services, CoinDesk — no scheduled action (Senate returns Sept 14, three weeks to work the bill), with no new reporting on the Tillis-Gallego ethics counteroffer or White House sign-off.
- **The Sept 15, 2:15pm ET cloture date remains widely corroborated** — no change from Aug 14.
- **New detail on remaining disputes:** illicit-finance provisions and reconciling the Senate Agriculture Committee's text are named as two additional sticking points ahead of the vote (PYMNTS). The "unresolved fights" picture already carried.
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633.** Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoSlate). See congress.gov calendar text (Calendar No. 423).
- **The real live blocker remains a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump stays in office"; CoinDesk's Jul 29 report that senators were negotiating a stronger version of the original concession).
- **Zero confirmed Democratic yes votes on cloture** as of Aug 16, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.
- **Polymarket "signed in 2026" (market odds, not an institutional estimate) remains around the mid-teens** per the conflicting cached reads (13-21%) noted Aug 14 — not re-verified as of Aug 22. Treat the exact figure as noisy; the directional read (still depressed vs. earlier in the year) is the reliable part.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows Justice Dept. Sen. Lindsey Graham plus an executive-calendar nominee vote, and Jul 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source confirmation — and confirms no path to passage before the Aug 7 recess.
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground on the ethics-provision, but the deal is undisclosed and White House sign-off is unconfirmed — CoinDesk's own reporting hedges "whether they've actually done it is unclear," and neither senator's office nor the White House reported a completed deal.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and the White House (via Patrick Witt mocking the comparison) and the crypto industry (DeFi Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to issue rules by calling statute the preferred, "future-proof" path. A modest reducer of legislative urgency — noted, not scored.
- **Odds dead (sentiment only) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, Jul 30). Research's Alex Thorn cut his personal 2026-passage estimate from 50% to 30% — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-counted here.
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics-provision.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor" earlier cycle: his SC seat was refilled within 48 hours, GOP floor count restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since then, and potentially loosening.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ in White House crypto income, and an ethics provision."
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the stablecoin-yield fight survives in the text as-is.

- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House unchanged.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$77,169.40** (Bitstamp daily close, August 22, 2026) — up from \$71,882.92 on Aug 20 (+7.4%). A **GENIUS-sized move (~40–47%)** from here ≈ **~\$108–113K**. A retest of the ~\$120K GENIUS Act's passage (Senate committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K (≈+44%).

Discount both — 2025 had tailwinds 2026 doesn't, and **the GENIUS rally itself fully retraced**. And note the coil cuts both ways: prediction-market odds bottomed at a fresh record low of 13% after cloture filing, and have since settled to 25% (Polymarket, Aug 22) and ~22% (Kalshi's 60-vote market, Aug 21) — still a real repricing from the ~74-82% readings earlier in 2026, but flat and no longer a record. Filing is a dated procedural step, not evidence the underlying passage odds have durably moved; the odds swings are sentiment, not a scored fact. The Prize doesn't feed the math — it tells you what the market thinks. Further BTC gain against a completely flat CLARITY score is itself a reminder that this pillar's signal and price action aren't the same thing.

The Other Side

The strongest honest case this is wrong

- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have the real weight (an 8-point 6mo improvement from the Jul 18 low) to something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows, another opens — one-off.
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture knowing it won't pass, it's a record before the midterms rather than to actually advance the bill, which would make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" votes. Actual Sept 15-16 vote produces real movement rather than another procedural loss, and September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped from 30% to 20%, suggesting professional handicappers see this as a genuine coin-toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency — and now the CFTC has said the same thing.** If both the White House-aligned SEC and CFTC believe they can deliver workable rules, letting CLARITY slip further. CFTC Chair Michael Selig's Aug 20, 2026 on-record speech directing staff to explore a fallback rulemaking (verified against cftc.gov) is the second such regulator-led move in the legislative priority, not a dramatic kill, but a second data point in the same direction.
- **Prediction markets have drifted lower again, not higher.** DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21% — near the lower end of the range this report has tracked. Two independent readings agreeing on a low number is a real signal even if it doesn't clear the sufficiency bar to move P on its own; a bear could reasonably argue that corroborated market pessimism move the needle.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set September 17, 2026 — light daily touch, 2026-09-17_draft. The single biggest trigger this table has ever carried has now RESOLVED, and it resolved ago

DATE	EVENT	MEANS
FIRE — Sept 15, 2026, 2:18–3:00pm ET. PRIMARY: senate.gov. RESOLVED AGAINST.	Cloture on the motion to proceed to H.R. 3633 FAILED, 49–50 — eleven short of 60, one short of a simple majority. Zero Democratic yes votes, including all seven Democratic negotiators; four Republican no votes (Collins, Hawley, Moran on the merits; Tillis procedurally). Sponsor Lummis: “I think we’re done. It’s over.” 6+ independent outlets on top of the primary record.	Fired the 37/53/60 — effective Bull by 60
LIVE but unacted-on — filed Sept 15, 3:01pm ET; re-checked Sept 17, still pending	Sen. Tillis’ motion to reconsider. He switched from yes to no expressly so that, as a member of the prevailing side, he could file it. It leaves the bill technically available to be called up again without restarting the process.	The single “stop” — leadership expires
Checked Sept 17, no change	Senate floor time. The chamber moved to S.4668 (the college sports bill) on Sept 16 per the senate.gov floor schedule; midterm-season floor time is scarce. Only fresh item found today: Sen. Lummis publicly challenging Sen. Alsobrooks over her no vote (CryptoTimes, Sept 17).	Post-mortem retry is a
Surfaced Sept 10, checked Sept 13 — corroborated via 3+ independent outlets (crypto.news, Coingape, CoinSpectator)	A FOURTH named Democratic blocking issue: vertical-integration conflict-of-interest authority. Democrats want regulators empowered to set conflict-of-interest standards for vertically integrated crypto firms — one company controlling several legs of a transaction, the FTX/Alameda pattern. Republicans say they support safeguards but fear a future administration misusing the authority; industry stakeholders have pushed back on including the provision. Sens. Booker, Lummis and Boozman are negotiating it. Separately, Sen. Lummis spent Sept 11-13 publicly pressing Democrats to back the revised text (“Democrats wrote the fix, now vote for it”, 115 changes incorporated) — advocacy, not a vote commitment; still zero Democrats publicly committed. Polymarket ~23% signed-into-law by Dec 31 — a market price, reported not scored	CLARITY named by more than 300 than 300 than not its own event ar
Checked Sept 2, no change	Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in — no White House sign-off on the Tillis-Gallego ethics language, no fresh corroborated prediction-market pull	Status quo unchanged
Checked Sept 1, no change	No material development found on the ethics counteroffer, the stablecoin-yield dispute, or the Sept 15 cloture schedule since the Aug 31 light daily catch-up	Status quo unchanged
Fired Aug 8, reconfirmed via 7+ outlets as of Aug 21, reconfirmed again by DeFiRate.com Aug 27, adversarially re-verified Aug 29	Cloture vote on the motion to proceed to H.R. 3633 is scheduled 2:15pm ET Tuesday, Sept 15 — no schedule change found anywhere Aug 22-29 (DeFiRate.com, Motley Fool, CryptoSlate, CryptoRank); this is a motion-to-proceed cloture vote only, not final passage	Confirmed
Fired Aug 20, checked Aug 29	CFTC Chair Michael Selig’s on-record speech at the Innovation Advisory Committee’s inaugural meeting — directed CFTC staff to explore a fallback crypto-market-structure rulemaking under existing authorities “if CLARITY continues to stall because of Democratic obstruction”; verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10)	The CFTC as conte
Checked Aug 29 — both still open	Ethics-provision dispute (no confirmed WH sign-off on Tillis-Gallego language) and the stablecoin-yield/banking dispute both remain fully unresolved; no development found on either since Aug 22	The actu
Pulled Aug 27 (DeFiRate.com) and Aug 28 (live), checked Aug 29	Prediction markets: Polymarket 13-14%, Kalshi 20-21% — two independent pulls agreeing on a low-teens-to-20s read	Market event fo
Traced Aug 29	NOT FIRED / NOT USED — “Sen. Tim Scott: 12-18 Democrats open” quote traced to an August 2025 (one-year-old) story, a likely search-engine year-confusion artifact	Named
Aug 8, context only, checked Aug 29	Senate passed a stopgap funding bill (Collins-Murray deal) funding the government through Dec 11, 2026	Modestly Septemb
Sept 15	PENDING — first cloture vote (motion to proceed), now precisely dated; Democrats call it “doomed” absent further concessions; Republicans hold 53 of 60 needed	Cloture fails clea
Unresolved since Jul 30; checked again Sept 10-12	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed as of Aug 29; Gallego’s own Aug 19 remarks confirm no meaningful WH response as of that date. A revised ~630-page CLARITY Act text WAS released Sept 10, 2026 (Sen. Lummis, primary source + 6 independent outlets — The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, Blockhead), incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope — but the ethics/conflict-of-interest language in it is reported largely unchanged from the July draft, so this specific dispute remains unresolved.	The Sept for the e publicly
Ongoing	Three named Democratic blocking issues: ethics enforcement, illicit-finance/DeFi provisions, stablecoin yield (Yahoo Finance, Aug 5)	Resolution succeed
PARTIALLY FIRED Sept 13–14, 2026 — 6+ independent outlets	White House signs off on ethics language and Senate Republicans post the final text — the Sept 14 text drops the Jan 20, 2029 sunset, restores state-attorney-general standing to sue, and raises civil penalties to 20% or \$500,000 whichever is greater. But it is <i>not</i> a merged text with Democratic buy-in: no divestment requirement, zero Democrats publicly committed, Gallego says it “falls short,” and Democrats counteroffered late Monday Sept 14.	The half → 37/53/60 in — ren
PENDING — today, Sept 15, 2:15pm ET	The cloture vote on the motion to proceed to H.R. 3633. Had not occurred when this cycle ran (08:01 ET).	Passes = below.

The old flip line FIRED on Sept 15 and the re-rate was built to it. It read: “cloture fails on Sept 15-16 ... = start treating 2026 passage as effectively dead, not just delayed. Keep 1-year and 3-year Bull either way and 1-year and 3-year were kept Bull, exactly as written. Two facts made the outcome *worse* than the “cloture probably fails” base case that already sat behind the pre-concession 32/47/58/82/92 line: the Republican declared the bill over. **The new flip line, set Sept 17:** if leadership actually schedules a vote on the Tillis motion to reconsider, or any named Democrat publicly commits to a revised text, this pillar re-rates 3mo and motion to reconsider expires unused and the Senate adjourns for the midterms without touching market structure again, cut 6mo further and treat the 12-month Bull as resting entirely on a 2027 reintroduction pl

My Decision

COMMITTED — SEPTEMBER 17, 2026 (2026-09-17_draft) · LIGHT DAILY TOUCH · AUTO-STAMPED · THIS PILLAR HELD FLAT

P (2026-09-17_draft, COMMITTED — light daily touch, auto-stamped; HELD FLAT): 22 / 30 / 38 / 70 / 88 · Prior committed P (2026-09-15_draft, 92 · Intervening set 2026-09-16_draft (22/30/38/70/88) was written but never stamped or committed — status still draft, flagged for Alex · W (uniform) · This pillar's own signals: 1mo -3.81 (Bear, from -1.77) · 3mo -2.72 (Bear, from +0.41) · 6mo -1.63 (Bear, from +1.63) · 1yr +2.88 (Strong Bull, from +6.38) · Master (equal-weight) this cycle: 1mo -1.94 · 3mo -1.74 · 6mo -0.76 · 1yr +1.15 · 3yr +2.76 · THE FINAL NUMBER: -0.76 horizon-weighted (Neutral) — down from +0.01 / +0.56 on the same quant data with yesterday's score set, the fall driven by the Fed & Macro Master Report for the full cross-pillar blend

Sept 17 LIGHT DAILY touch (score set 2026-09-17_draft), this version — HELD FLAT at 22/30/38/70/88. There was nothing left to move. The vote that decided this pillar's year happened on Tuesday. The motion to proceed failed 49–50, zero Democrats crossed, three Republicans opposed on substance, and the sponsor said out loud that it was over. Today's check found the Tillis motion to reconsider still in business, and one senator publicly rounding on another about her vote. That last item is genuinely the day's news in this space, and it is genuinely worth nothing to a score: recriminations are not a whip count, and the delegated daily authority.

Note for Alex, on lineage rather than research: the re-rate down to 22/30/38/70/88 was made in score set 2026-09-16_draft, and that set was never stamped and never committed to git — its status is still draft. Its own note text says it was auto-stamped. Yesterday's run appears to have stopped between writing the scores and stamping them. Today's run did not edit that set, because the runbook only permits in-progress sets. The numbers are carried forward into today's committed set instead, and the lineage above shows it honestly as an unstamped draft. Your call whether to stamp it retroactively.

Sept 15 LIGHT DAILY touch (score set 2026-09-15_draft), prior cycle — the first UPWARD re-rate on this pillar since June, and it was overtaken by events within hours. The standing trigger "White House FIRED. On Sept 13 the White House agreed an ethics package and sent it to Senate Republicans; on Sept 14, one day before the cloture vote, Lummis, Boozman and Scott posted the FINAL CLARITY text, vowing to support the bar on state-attorney-general enforcement, and raises civil penalties to 20% or \$500,000, whichever is greater (from 10% or \$500,000, whichever is less). Six-plus independent outlets; clears the sufficient threshold for a divestment/blind-trust ask is still not met, Warren calls it a "weak fig leaf", lead Democratic negotiator Gallego says the text "as it currently stands falls short", and Democrats sent a counteroffer late Monday. The counteroffer occurred when this ran at 08:01 ET, is still more likely than not to fail. **P 32/47/58/82/92 → 37/53/62/83/92.** Light daily touch, full research access, verification clean — **AUTO-STAMPED SEPTEMBER 15, 2026.** Sept 2, under which the size of a move is explicitly not a reason to withhold the stamp.

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: a separate, deeper research pass run this afternoon, independent of this morning's light daily catch-up — the first deep multi-pillar refresh. Lummis released a revised ~630-page CLARITY Act text on **Sept 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BelnCrypto, Coingap, etc., incorporating "more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope (non-decentralized trading protocols must now register with the CBO, etc. commodities). The ethics/conflict-of-interest provision Sen. Tillis has conditioned his support on remains largely unchanged from the July draft — the specific blocker tied to his vote was not resolved. No D/I (defections) text as of Sept 10-11 (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged and reconfirmed. Prediction market sourced — Polymarket roughly low-teens-to-20%, Kalshi ~15% year-end per one outlet (single-source, flagged) — market prices only, not used to move P. **P HELD FLAT at 32/47/58/82/92.** The Lummis re-rate concessions offered, but the specific Tillis-blocking provision untouched and zero confirmed Democratic converts — net a wash against the already-priced whip-count picture, not a clearance of the sufficient threshold for a move in either direction. **This is a FULL WEEKLY refresh — categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so the pillar remains AWAITING ALEX'S MANUAL REVIEW.** The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

This morning's cycle (Sept 12 light daily catch-up, score set 2026-09-12_draft): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remained unchanged; no new dated legislative development had since Sept 10 (53 R seats, defections from Paul/Hawley and a conditional Tillis, needing 8-10 D/I crossovers) was the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **P HELD FLAT at 32/47/58/82/92.** The Lummis re-rate moved, master call band unchanged anywhere — so per the runbook's delegated daily auto-stamp authority, **that set was AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** Iran War Risk's sharp re-rate that report.

Prior cycle (Sept 11 light daily catch-up): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remains unchanged; no new dated legislative development found since Sept 10. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 11, 2026.**

Sept 10 light daily catch-up: re-checked — the Sept 15 cloture-vote schedule unchanged since Sept 9; Polymarket 2026-passage odds still in the same ~16% band, a market-price read only; no new dated legislative development. **SEPTEMBER 10, 2026.**

Prior cycle (Sept 9 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price move only.

Prior cycle (Sept 8 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the ethics-language counteroffer found; no fresh corroborated news. **STAMPED SEPTEMBER 8, 2026.**

Prior cycle (Sept 6 light daily catch-up): held flat — House Whip Emmer's office pulled the Sept 21/28 voting weeks off the House calendar, but the operative Sept 15 Senate cloture vote was unchanged. **AUTO-STAMPED SEPTEMBER 6, 2026.**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch: the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the ethics-language counteroffer found; CEO Armstrong's public optimism was a single executive's opinion, not new information. **P HELD FLAT at 32/47/58/82/92. COMMITTED BY ALEX September 5, 2026.**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores.json reported "draft" — a bug in that session, not in this pillar's research. The last TRUE committed baseline for this pillar remains **2026-09-02_draft (32/47/58/82/92), auto-stamped Sept 3.** Not corrected retroactively. Flagged here and reflected accurately in this report's status.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat again — unchanged since Aug 8, through the committed Aug 22 full weekly refresh (2026-08-22_draft2, stamped by Alex Aug 22). The Iran War Risk's sharp re-rate binding disputes — the ethics/conflict-of-interest provision (Tillis-Gallego counteroffer, still no White House sign-off since Jul 30/31) and the stablecoin-yield dispute — remain fully unresolved. This shared the same status only because Iran War Risk's sharp re-rate flipped the master FINAL NUMBER's equal-weight call band, not for any reason in this pillar — **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex was available.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026) and every committed set since (32/47/58/82/92, most recently committed Sept 12, 2026, 2026-09-12_draft, auto-stamped this morning). Today's FULL WEEKLY refresh (2026-09-12_draft2) independently re-confirms the hold but, unlike the daily touches, stays a draft awaiting Alex's own review before it can become the new committed baseline.

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

LIGHT DAILY touch, September 17, 2026 (score set 2026-09-17_draft, committed, auto-stamped) — checking for changes since the 2026-09-15_draft committed baseline. **This pillar HELD FLAT at 22/30/38/70/88.**

- The decisive change happened on Sept 15 and was scored on Sept 16:** cloture on the motion to proceed to H.R. 3633 failed **49–50** (senate.gov, PRIMARY) — zero Democratic yes votes in the Senate, zero Republican no votes, and sponsor Lummis saying "I think we're done. It's over." That fired the standing flip line and drove the re-rate 37/53/62/83/92 → 22/30/38/70/88.
- Checked today, Sept 17 — nothing new cleared the bar.** The Tillis motion to reconsider, filed 3:01pm ET Sept 15, remains pending and unacted-on. The Senate floor moved to S.4668 on Sept 16, challenging Sen. Alsobrooks over her no vote (CryptoTimes, Sept 17) — post-mortem politics, not a procedural or vote-count event.
- Score decision: HELD FLAT at 22/30/38/70/88.** No window moved. **AUTO-STAMPED.**
- Lineage note for Alex:** the Sept 16 set that carried this re-rate was never stamped and never committed — still status: draft. Today's run left it untouched per the runbook and carries its lineage.

Carried forward — what changed in the September 15 light daily touch (2026-09-15_draft, committed, auto-stamped), for continuity. **This pillar RE-RATED UP — the first upward move here since June.**

- ★ ★ NEW — the White House agreed to an ethics package on September 13, 2026** and transmitted the language to Senate Republicans, a senior administration official calling it "the most significant step in our history." This is the pillar's single most-cited blocker, unanswered at the White House since roughly Aug 1–3. Corroborated across independent outlets (CNBC, The Hill, Forbes, congress.net, YCharts, etc.).
- ★ ★ NEW — Lummis, Boozman and Scott posted the FINAL CLARITY text on September 14, 2026, one day before the cloture vote, and it concedes three of the four standing Democratic demands:** (a) **DROPS the January 20, 2029 sunset** — the July text let the ethics section expire with Trump's term; (b) **REVERSES the July text's outright bar on state-attorney-general enforcement** — the July text let the ethics section expire with Trump's term; (c) **REVERSES the July text's outright bar on state-attorney-general enforcement** — the July text let the ethics section expire with Trump's term.

- explicit Democratic ask; and (c) **raises civil penalties** from “10% of the take or \$500,000, whichever is *less*” to “20% or \$500,000, whichever is *greater*.” The bar covers the president, vice president, spouses from issuing or sponsoring digital assets for compensation while in office. Corroborated by 6+ independent outlets (The Block, The Defiant, CNBC, crypto.news, BelnCrypto, CryptoBriefing, Lummis/Boozman/Scott state the draft incorporates 126 substantive Democrat-requested changes (up from the 114 logged Sept 10).
- **The honest counterweight, same-day and equally well sourced.** The concession does *not* include the Tillis-Gallego divestment/blind-trust ask — preexisting crypto holdings need not be disclosed; provision a “weak fig leaf that will do nothing to stop him from making his next \$1.4 billion in crypto profits” and took it to the floor. Sen. Gallego — the lead Democratic negotiator and the most respected senator currently stands falls short” on ethics, consumer protection, illicit finance, conflicts of interest and market integrity. And Senate Democrats sent a **counteroffer** to Republicans late Monday, Sept 12, to live on the eve of the vote.
 - **SINGLE-SOURCE, reported but NOT scored:** CoinDesk alone reports the Democratic objection that the new language would still *block state attorneys general from directly suing the U.S. president*. Uncorroborated as of this run; under the house sufficiency rule it cannot move a P by itself.
 - **MARKET PRICE, reported but NOT scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to **~34.5%** on the ethics deal, versus the ~23% Dec-31 read priced Sept 13. The odds and the two quotes may not share a question basis — house rule, never blended, never used to move P.
 - **The whip math itself is unchanged.** Zero Democrats publicly committed; Republicans hold 53 seats and need roughly 7–9 crossovers against likely GOP defections. **The 2:15pm ET cloture vote occurred at run time (this cycle executed 08:01 ET)** — its outcome lands in the next cycle, and it remains a vote on the motion to proceed only, not final passage.
 - **Score decision: RE-RATED UP, 32/47/58/82/92 → 37/53/62/83/92.** Per window: **1mo 32→37** — the top-cited blocker got real, text-level concessions hours before the vote, but the lead Democrat was still in flight, so cloture today remains more likely than not to *fail*; the gap narrowed, it did not close. **3mo 47→53** — the largest move: a White House that has now demonstrably moved, a bite within the quarter materially more plausible even if today’s cloture fails. **6mo 58→62** — same logic, decayed. **1yr 82→83** — the medium-term read was already high and barely changes. The score move the multi-year read.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

- **Sept 14, light daily touch:** Schumer convened a Democratic caucus Sunday Sept 13 to settle the party’s position on CLARITY ahead of the cloture vote (6+ independent outlets), but no public action followed, so the whip count was unchanged from Friday. **P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED SEPTEMBER 14, 2026.**

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 (score set 2026-09-12_draft2) — the first deep multi-source research dive since the Sept 5 full weekly refresh (2026-09-05_draft2), run separately from and after this morning’s light daily catch-up (2026-09-12_draft, auto-stamped).

- ★ **★ NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Dismal, Blockhead — 6+ independent outlets). Lummis states the text “incorporated more than 114 separate provisions at my Democrat colleagues’ request.” Substantively, it narrows the DeFi/prediction market must now register with the CFTC and are confined to cash-settled spot trading in digital commodities — addressing the tribal-government prediction-market objections raised earlier in the process.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text.** The original live blocker since early August was not resolved by this release.
- **Despite the 114 concessions, no Democrat had publicly announced support for the new text as of Sept 10-11** (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle’s reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalsbeek **flagged as such** — neither used to move P.
- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.
- **Score decision: P HELD FLAT at 32/47/58/82/92 across all five windows.** The Lummis text release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis-Gallego Democratic converts — net a wash against the already-priced whip-count picture, not a clearance of the sufficiency bar (primary source or 2+ independents) for a move in either direction. **THE WHIP COUNT FROM THE RUNBOOK’S DELEGATED DAILY AUTO-STAMP AUTHORITY REGARDLESS OF THE SIZE OF THE MOVE (here, zero) — LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX’S MANUAL REVIEW** (2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

Carried forward — what changed in this morning’s Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped), for continuity:

- **Sept 12, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development found since Sept 11. Whip-count material (Tillis, needing 8-10 D/I crossovers) is the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED SEPTEMBER 12, 2026.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged since Sept 9; Polymarket 2026-passage odds still read in the same ~16% band (house rule sufficiency rule); no new dated legislative development found. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18% (a market-priced legislative development found. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development, no WH sign-off on the market pull. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged. New since Sept 5: House Majority Whip Tom Emmer’s office has a House voting calendar (crypto.news, Yellow.com) — affects the House timeline only, not the operative Sept 15 Senate cloture vote. Polymarket’s ~18% 2026-enactment odds (market price, not institutional estimates) already priced in.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved; no new dated development clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield).** The Tillis-Gallego ethics counteroffer sent to the White House remains from July 2026. 2:15pm ET cloture date is reconfirmed unchanged via WebSearch (DeFi Rate, The Block, Bitget, Motley Fool).
- **Coinbase CEO Brian Armstrong’s public prediction that the bill passes is a single executive’s opinion, not new information** — reported for completeness, not used to move P.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from delegated daily auto-stamp, so it was left for market price. 2026. Fed & Macro is the pillar that moved this week, on a hot August jobs report. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft’s commit message claimed it was auto-stamped, but config/scores.json’s status field was never actually advanced — a bug in that session. Flagged for Alex, not corrected retroactively.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in.** Score decision: HELD FLAT at 32/47/58/82/92. This shared score set was originally left as draft for market price band — and was **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 31-Sept 1.** The Tillis-Gallego ethics counteroffer sent to the White House through Sept 1. The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged by multiple outlets.
- **No fresh prediction-market pull with a corroborating news event found this cycle** to clear the sufficiency bar.
- **Score decision: HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-09-01_draft) is a light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority. This is the pillar that moved this cycle — see that report.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 29-31.** The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged across Bitcoin Foundation, Qz, and news.bitcoin.com (all through Aug 30-31).
- **Score decision: HELD FLAT at 32/47/58/82/92.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **AUDIT NOTE — a 2026-08-28_draft daily catch-up cycle sits between this refresh and the Aug 22 commit, abandoned and never delivered.** It was researched (held flat, logged a Polymarket render/selfcheck/archive/git-commit followed it — treated as not delivered, per the same house discipline this report has applied to the Aug 17, 18, and 20 drafts and the interrupted Aug 21 draft) and verifies everything from scratch against fresh primary sources.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date remains the only scheduled floor action,** reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate anywhere Aug 22-29.
- ★ **★ NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting,** directed CFTC staff to explore a fallback crypto-ethics provision if CLARITY continues to stall. Adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets dated it as Aug 19, 2026, but it is a primary). The CFTC's analog to SEC Chair Atkins' already-logged Jul 29 statement — logged as context, not used to move P.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego counter-proposal — no White House sign-off or released text found) and the stablecoin yield provision (no new developments found this window).
- **Prediction markets, two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% and Kalshi 20-21%; a live Aug 28 Polymarket pull separately showed 14%. Consistent with, not below, the range already carried; market prices, not used to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and traced to an **August 19, 2026** likely search-engine year-confusion artifact, named here as a caution for readers, not used as evidence.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** — primary-source confirmation relied on 7+ independent secondary outlets instead.
- **Context only, not new:** the Senate's Aug 8 stopgap funding bill (Collins-Murray deal) funds the government through Dec 11, 2026 — modestly reduces shutdown-fight risk to September floor action.
- **Score decision: held flat at 32/47/58/82/92 across all five windows.** Nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction. **draft, NOT auto-stamped:** this is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. **ALEX'S MANUAL REVIEW;** the last committed baseline remains 2026-08-22_draft2 (32/47/58/82/92, stamped by Alex Aug 23, 2026).

Carried forward — what changed in the Aug 22 full weekly refresh (2026-08-22_draft2), for continuity:

- **This morning's Aug 22 catch-up draft (d1) was fully delivered** — rendered, selfchecked, archived, and git-committed — but stayed uncommitted (owner-stamp sense) after a fact-check of the Risk pillar report, which held the whole score set for manual review. This is a separate, later cycle: a full weekly refresh that independently re-confirms d1's findings against fresh primary sources and the runbook's same-day-after-delivery rule.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date reconfirmed via 7+ outlets** (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Banking, news.bitcoin.com) independently adversarially re-verified this cycle — no schedule change found; still a motion-to-proceed vote only, not final passage.
- ★ **★ NEW — Sen. Ruben Gallego, on the record at the Aug 19 SALT Wyoming Blockchain Symposium** (crypto.news, Cointelegraph, FXStreet, Blockonomi), confirmed the White House has no ethics counter-proposal — responses "blank, weaker than before, or not at all" — and warned against rushing the Sept 15 vote. Confirms the deadlock persists, not new deterioration.
- ★ **★ NEW — WH crypto adviser Patrick Witt (Aug 19)** said the administration is "fully committed" to September passage and will keep negotiating with Democrats, while publicly blaming Sen. Tillis for the stalemate. Sources: Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan — combative messaging, not a concession, not used to move P.
- **No stablecoin-yield-provision developments found this window** — still an open blocker, status quo.
- **Prediction markets, this cycle's fresh pull:** Polymarket "signed in 2026" ~19.5% as of ~Aug 21 (CCN: volatile, dipping to ~15.5% before recovering slightly), Kalshi "60 votes" ~22% (Aug 21) consistent with, not below, the range already carried; market prices, not used to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — an unverified, non-journalistic X post** (@iotech_io) circulating ~Aug 20-21 claimed the ethics provision is "officially solved" — single-source claim, no independent verification, Gallego's own on-record Aug 19 statement (4+ outlets). Named explicitly so it isn't mistaken for a scored fact.
- ★ **★ NEW, FLAGGED NOT SCORED — Coinbase CEO Armstrong's Aug 21 "pretty optimistic" remarks on 60 votes** (Motley Fool/Fool.com) are single-source opinion from an interested and biased source; the tone runs counter to Gallego's account.
- **Zero confirmed Democratic yes votes on cloture** — Republicans hold 53 of 60 votes needed, unchanged.
- **Score re-rates (Aug 22 d1 → Aug 22 d2):** 1-month 32 → 32 (held) · 3-month 47 → 47 (held) · 6-month 58 → 58 (held) · 1-year 82 → 82 (held) · 3-year 92 → 92 (held) — nothing found this cycle to move the score. **draft at delivery:** no window moved and no call band flipped for CLARITY, and this cycle's own evidence was clean — but a FULL WEEKLY refresh is categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, independent of the separate Iran War Risk issue that held the earlier same-day d1 draft. **COMMITTED BY ALEX August 23, 2026** after manual review.
