Tokenization of Real-World Assets

Pillar Report

Real Money On-Chain — Researched, Scored, and Personally Committed

Originally written **June 19, 2026**; scores committed by me on **June 19, 2026**. Re-researched July 8, 13, 18, 25, and 30, 2026 against live primary sources, and again as a full weekly refresh on August 8, 2026 (nudged up at 3mo/6mo on a new RWA all-time high and two missed catalysts, committed and stamped by Alex). Held flat through the Aug 9-16 daily touches, all auto-stamped committed. Drafts written Aug 17, Aug 18, and Aug 20 were never delivered (no report/render/archive/commit followed for any of them), and an Aug 21 session began delivering the Aug 20 numbers into only two of six reports before stopping — also never finished or committed. **This version (August 22) does not take any of those abandoned drafts at face value — it independently re-verifies through a dedicated primary-source research pass and HOLDS FLAT at 52/60/66/74/85** — the rwa.xyz total-value print remains essentially unchanged (and Treasuries-specific value is confirmed distinct from the all-category total, this pillar's known mislabeling trap), the SEC's newly proposed "Regulation Crypto Assets" (Aug 18-19) is scoped to new-token capital formation rather than RWA tokenization and doesn't clear this pillar's bar, and the tokenized-stock innovation exemption this pillar is watching remains delayed/exploratory with no new dated progress. **This pillar's own evidence is clean and would have qualified for Alex's standing daily auto-stamp on its own** — but the **overall Aug 22 score set is left as a DRAFT, flagged for Alex's manual review**, because a dedicated adversarial fact-check this cycle found that the Iran War Risk pillar's report contained a materially false claim (a "first confirmed fatality" framing that was actually roughly the 18th such death) that the original research pass missed; see My Decision below. **A second, deeper session ran later the same day**. With that Aug 22 catch-up draft already delivered — rendered, archived, and git-committed — house rules require a new dated set rather than an in-place edit, so this full weekly refresh (the first since Aug 8) is scored as **2026-08-22, draft2**. Draft2 independently re-confirms the hold at 52/60/66/74/85 through fresh primary-source research, including a direct sec.gov check of a newly issued Franklin Templeton no-action letter (Aug 12) and a since-canceled (not merely delayed) SEC tokenized-equity "innovation exemption" meeting (Aug 13-15 reporting) — the two roughly offset and neither alone clears this pillar's bar. Draft2 was left as draft at delivery — this time because a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority, regardless of how clean the evidence is — **COMMITTED BY ALEX August 23, 2026** after independent review. **A daily catch-up draft dated August 28, 2026** (score set 2026-08-28, draft) was written — a direct rwa.xyz re-pull showing total distributed value \$38.69B (+3.04%/30d) and tokenized Treasuries \$16.00B (-0.93%/30d), both continuing trend — but it was never rendered, selfchecked, archived, or git-committed, and sits abandoned, superseded the same way this report has always treated interrupted prior sessions. **This version (August 29) does not take that abandoned draft at face value** — it runs a fresh, independent full-weekly primary-source pass and again HOLDS FLAT at 52/60/66/74/85, scored as **2026-08-29, draft**. The week's one genuine new development is **Coinbase's August 24 launch of tokenized-stock trading (NVDAc/METAc/AAPLc/GOOGLc — Nvidia, Meta, Apple, Alphabet) on its own Base blockchain**, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026 — confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25, but eligible to **non-US users only**, the exact same structural limitation this report already established (the "Robinhood Chain precedent") as insufficient alone to move P. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25, whose stated use cases touch RWA settlement) is logged as tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check this window, and DTCC's October 2026 and Nasdaq's December 6, 2026 targets are both unchanged. **rwa.xyz's own site (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle** — a data-access gap flagged for next cycle — so this pass relies on the report's own most recent primary pull (the abandoned Aug 28 draft's rwa.xyz read), loosely corroborated by secondary citations, showing tokenized Treasuries specifically posting a **second consecutive negative 30-day reading** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% and not independently reconfirmed this cycle, but the

closest thing in this pillar to a trend worth watching. **This full weekly refresh was left as a DRAFT, not auto-stamped** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality. **THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft**, covering Aug 29-31: sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) are consistent with the Aug 28 direct pull already priced in — same trend, not a fresh dated catalyst; rwa.xyz itself was not independently re-pulled this cycle. **P HELD FLAT at 52/60/66/74/85**. This is a light daily touch, not a full weekly refresh, no window moved, and the master call band is unchanged — **AUTO-STAMPED** per delegated daily authority. **Sept 1: held flat again** — only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot), no fresh dated catalyst, no rail failure/depeg/counterparty default. Score set 2026-09-01_draft, AUTO-STAMPED, new last COMMITTED baseline. **Sept 2: held flat a further time** — no dated catalyst found Sept 1-2 (the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events). Score set 2026-09-02_draft — this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Tokenization's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report); **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the policy — this is the last TRUE committed baseline. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — no dated catalyst found Sept 3-5; DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participating institutions) remains unchanged background. This pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — a bug, flagged for Alex, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch (DTCC's October launch remains the operative unchanged catalyst; no new dated milestone found). **HELD FLAT again at 52/60/66/74/85**. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and **COMMITTED BY ALEX September 5, 2026**. **Sept 6: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants including BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, and Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found. **HELD FLAT at 52/60/66/74/85**. **Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July 15 production-trade stress test; 50+ firm industry working group, no new dated milestone found. **HELD FLAT at 52/60/66/74/85**. **Sept 9: light daily catch-up, held flat again** — rwa.xyz aggregate reads circulating today (~\$39.2B total distributed value) are single-source press-summary figures without a direct rwa.xyz pull this cycle, read as organic continuation of the already-priced growth trend (no rail failure, depeg, or counterparty default found); DTCC's October full-service launch remains the operative catalyst, unchanged. **HELD FLAT at 52/60/66/74/85**. **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline**. Held flat at 52/60/66/74/85 — independently re-checked, nothing cleared the sufficiency bar. No new dated rwa.xyz pull, no rail failure/depeg/counterparty event found. DTCC's October full-service launch remains the unchanged operative catalyst. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **THIS VERSION (September 11) is a light daily catch-up, score set 2026-09-11_draft**, covering Sept 10-11: re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found, and DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries) remains the unchanged operative catalyst. **P HELD FLAT at 52/60/66/74/85**. Iran War Risk and Fed & Macro are the pillars that moved this cycle (Iran down on its Brent flip-line clause firing, Fed up modestly on a core-CPI print a tenth cooler than consensus). Light daily touch, no window of this pillar moved — **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **Sept 12 light daily catch-up (2026-09-12_draft), this morning's cycle:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) read as continuation of the already-priced growth trend, not a new milestone; no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **P HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)," the new last TRUE committed baseline**. **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version)** independently re-confirms the hold: rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced smooth growth curve, not a step-change or new milestone; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B, a structural-breadth note. **DTCC's October 2026 full-service tokenization launch is reconfirmed**

on schedule, no delay (primary: DTCC.com, corroborated by Forkast's "From Pilot to Plumbing," Tradeweb, and Crowdfund Insider — 2+ independents) — the July 15 live-production trades remain already priced in. Two freshly-dated items this week were found but are each effectively single-source (a press release syndicated across aggregator sites, not independently reported) and incremental, not step-changes: Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting Casper onto the ERC-3643/T-REX Ledger tokenization standard network — both logged as context, not used to move P per the sufficiency rule. No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions were found dated within the last two weeks. **P HELD FLAT at 52/60/66/74/85.** This is a **FULL WEEKLY refresh**, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW**, as score set **2026-09-12_draft2**. This morning's 2026-09-12_draft remains the last TRUE committed baseline.

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 19, 2026 · Updated & Re-verified September 17, 2026 (LIGHT DAILY touch, 2026-09-17_draft: re-checked again and HELD FLAT at 52/60/66/74/85 — rwa.xyz read **\$38.86B** total distributed asset value as of **Sept 15, 2026** (+1.00% over 30 days, ~4.24M holders; US government debt \$15.9B, commodities \$4.9B, active strategies \$3.6B, asset-backed credit \$2.56B, tokenized stocks \$2.52B), versus the \$39.2B Sept 8 read already priced — a sub-1% drift inside ordinary noise for this series and a single-platform pull, so not a move. No rail failure, depeg or counterparty default; DTCC's October 2026 full-service launch remains unchanged and on schedule. The CLARITY Act's failed cloture vote on Sept 15 does *not* drag this pillar: "durable market-structure law (CLARITY) still isn't passed" is already a standing negative in this report's own Other Side, so this thesis never rested on passage. Prior deep dive — FULL WEEKLY refresh: independently re-verified — rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, up from ~\$38B in late August, continuation of the already-priced growth curve (not a new milestone), six asset categories now each above \$1B; DTCC's October 2026 full-service launch reconfirmed on schedule, no delay — held flat at 52/60/66/74/85; left as DRAFT, awaiting Alex's manual review, since full weekly refreshes are categorically excluded from auto-stamp) · Last TRUE committed: 52/60/66/74/85 (2026-09-15_draft, auto-stamped Sept 15) · Not Financial Advice

June P's committed by me June 19, 2026 (last committed 2012 cycle), Aug 8 (nudged up at 3mo/6mo, full weekly refresh) committed and stamped by Alex; Aug 9-16 light daily touches held flat, all auto-stamped committed. Aug 19 and 20 drafts were written but never delivered, and an Aug 21 session delivered partial numbers into only two of six reports before stopping — none of those three sessions was ever delivered (report/render/archive/commit), so, consistent with this report's own convention, they do not get their own column here. **Aug 22 independently re-verifies and holds flat again, but was left as a DRAFT, flagged for Alex's manual review** — not on this pillar's own evidence because an adversarial fact-check of the Iran War Risk pillar that cycle caught a materially false claim. A later same-day full weekly refresh, **2026-08-22_draft2**, independently re-confirmed the hold once more through fresh primary research (Franklin Templeton's new SEC no-action letter, a since-canceled SEC tokenized-equity exemption meeting) and was left as draft at delivery — that time because full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority — **COMMITTED BY ALEX August 23, 2026**. An Aug 28 daily catch-up draft (2026-08-28_draft) was written but never delivered — no render, selfcheck, archive, or commit followed — and is dropped from the visible lineage below (see What Changed for the audit trail). Aug 29 (full weekly refresh) and Aug 31/Sept 1 (light daily catch-ups) all independently re-verify and hold flat; Sept 1 (52/60/66/74/85) is the last COMMITTED set for this pillar. **Sept 2 (2026-09-02_draft) holds flat again**. This shared dated score set was originally left as draft because Iran War Risk's re-rate (bundled in the same set) flipped the master call band; **COMMITTED, AUTO-STAMPED SEPTEMBER 2, 2026**, once Alex widened the delegated daily auto-stamp policy — now the last TRUE COMMITTED set for this pillar, Tokenization's own P purchased at 52/60/66/74/85. Sept 3 held flat a further time (nothing material on any pillar's side). **Sept 4 (2026-09-04_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, this version)** independently re-confirms the hold; categorically excluded from auto-stamp authority, so it went to manual review and is **COMMITTED BY ALEX September 5, 2026**. **Sept 6 (2026-09-06_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 7 (2026-09-07_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 8 (2026-09-08_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 9 (2026-09-09_draft, this version)** holds flat a further time — rwa.xyz reads circulating today are single-source press summaries, read as organic continuation, not a fresh catalyst — **AUTO-STAMPED SEPTEMBER 9, 2026**, the new last COMMITTED baseline. **Sept 10 (2026-09-10_draft) holds flat a further time** — no new dated rwa.xyz pull, no rail failure/depeg/counterparty event found; DTCC's October full-service launch remains the unchanged operative catalyst — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 11 (2026-09-11_draft) holds flat again on the same re-check** — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 12 (2026-09-12_draft) holds flat a further time, nothing new found** — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 13 (2026-09-13_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 14 (2026-09-14_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 15 (2026-09-15_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 16 (2026-09-16_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 17 (2026-09-17_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 18 (2026-09-18_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 19 (2026-09-19_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 20 (2026-09-20_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 21 (2026-09-21_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 22 (2026-09-22_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 23 (2026-09-23_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 24 (2026-09-24_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 25 (2026-09-25_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 26 (2026-09-26_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 27 (2026-09-27_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 28 (2026-09-28_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 29 (2026-09-29_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 30 (2026-09-30_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 31 (2026-09-31_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 32 (2026-10-01_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 33 (2026-10-02_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 34 (2026-10-03_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 35 (2026-10-04_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 36 (2026-10-05_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 37 (2026-10-06_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 38 (2026-10-07_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 39 (2026-10-08_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 40 (2026-10-09_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 41 (2026-10-10_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 42 (2026-10-11_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 43 (2026-10-12_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 44 (2026-10-13_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 45 (2026-10-14_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 46 (2026-10-15_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 47 (2026-10-16_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 48 (2026-10-17_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 49 (2026-10-18_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 50 (2026-10-19_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 51 (2026-10-20_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 52 (2026-10-21_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 53 (2026-10-22_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 54 (2026-10-23_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 55 (2026-10-24_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 56 (2026-10-25_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 57 (2026-10-26_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 58 (2026-10-27_draft) holds flat again**; that cycle's commit message claimed "AUTO-STAMPED," but config/scores/json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 59 (2026-10-28_draft) holds flat again**; Last TRUE committed P (2026-09-12 draft, auto-stamped Sept 12): 52 / 60 / 66 / 74 / 85 - **Current P (2026-09-12 draft2, FULL WEEKLY refresh, DRAFT — awaiting Alex's stamp):** 52 / 60 / 66 / 74 / 85 - **Weight:** 20% (equal)

Impact: 8 (uniform) · **Formula:** Signal = ((P – 50) × Quality × Impact). **Full lineage:** June committed 53/57/62/72/85 (Jun 12) → ... (see prior versions of this report for the full Jul 8–Sept 8 path) → **Sept 9 light daily catch-up (2026-09-12 draft)** 52/60/66/74/85 – held flat again; rwa.xyz aggregate reads circulating today (~\$39.2B total distributed value) are single-source press-summary figures without a direct rwa.xyz pull, read as organic continuation of already existing growth (no rail failure, depeg, or counterparty default found); DTCC’s October launch remains unchanged → **AUTO-STAMPED**, the committed baseline → **Sept 10 light daily catch-up (2026-09-10 draft)** 52/60/66/74/85 – held flat against the schedule; further time: no new dated rwa.xyz pull, no rail failure/depeg/counterparty event found → **AUTO-STAMPED**, the committed baseline → **Sept 11 light daily catch-up (2026-09-11 draft)** 52/60/66/74/85 – held flat again on the same terms; check; DTCC’s October launch remains unchanged → **AUTO-STAMPED**, the committed baseline → **Sept 12 light daily catch-up (2026-09-12 draft)** 52/60/66/74/85 – held flat a further time, nothing new found → **AUTO-STAMPED**, the committed baseline → last TRUE COMMITTED baseline → **Sept 12 FULL WEEKLY refresh (2026-09-12 draft2, this version)** 52/60/66/74/85 – independently re-confirmed via a fresh rwa.xyz read (~\$39.2B, Sept 8) and a reconfirmed on-schedule DTCC launch; two freshly-dated items (Securitize/BUIDL collateral expansion, MAKE Group’s “AstralBeam” bridge) are single-source-equivalent, logged as context only → **LEFT AS DRAFT**, full weekly refreshes are categorically excluded from future updates; delegated authority auto-stamp authority, awaiting Alex’s manual review.

P — the odds this is *good for crypto* by then. Held flat this cycle at 52/60/66/74/85. ***rwaxyz's own site (app.rwaxyz) returned HTTP 403 on repeated attempts this cycle*** — could not independently re-pull live figures. Relying on the report's own most recent primary pull (Aug 28, from the abandoned daily-catch-up draft): total RWA distributed value \$38.69B (+3.04% vs. 30 days ago); tokenized Treasuries \$16.00B (-0.93% vs. 30 days ago), across the same 87-product set tracked all cycle. Loosely corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug 19-25; another source citing \$38.39B as of Aug 21) — consistent with trend, no discontinuity, but not an independent primary re-confirmation. This is now the **second consecutive cycle with a negative 30-day reading on tokenized Treasuries specifically** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% in absolute magnitude and not independently reconfirmed this cycle, does not move P now, but it's flagged for a genuinely independent *rwaxyz* pull next cycle since it's the one figure in this pillar closest to actually mattering. Leaders as last confirmed: USYC ~\$3.0B, BUIDL ~\$2.6-2.68B, Ondo USYD ~\$2.14-2.2B, Franklin iBENJI ~\$1.7-1.72B. No new RWA-rail failure, depeg, or counterparty default was found; two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$8.5M, Aug 23) and an Arrakis V1/G-UNI Uniswap V3 spot-manipulation drain (Aug 23) — but both are ordinary DeFi protocols, not tokenized RWA/Treasury rails, and are not applicable to this pillar's risk watch.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value shared by every pillar in the equal-weight model. If tokenization compounds, it pulls trillions of TradFi assets onto rails crypto controls.

★ **NEW — Coinbase launches tokenized-stock trading on Base (Aug 24, primary + 9 outlets):** Coinbase launched tokenized-stock trading — NVDAC, METAC, AAPLC, GOOGLc (Nvidia, Meta, Apple, Alphabet) — on its own Base blockchain, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026. Confirmed on Coinbase's own blog ("Coinbase establishes its tokenization hub in Abu Dhabi" plus its tokenized-stocks product page), and corroborated by 9+ independent outlets, all dated Aug 24-25. Eligible to **non-US users only** — structurally identical to the Robinhood Chain precedent this report already established as a

insufficient alone to move P (EU/EEA-only tokenized-stock trading). Coinbase says more stocks are coming "in the coming weeks." Treated the same way for consistency: real, multi-sourced, does not clear the sufficiency bar alone.

Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25): Standard Chartered's Anchorpoint Financial (backed by Standard Chartered, HKT, Animoca) began institutional distribution of HKDAP, a Hong Kong-dollar stablecoin whose stated initial use cases include settlement and distribution of tokenized real-world assets. This is a stablecoin launch, not an RWA-tokenization event itself — logged as context, not adopted as a trigger.

For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026: multiple press-release-syndication outlets report this milestone. It predates the Aug 22-29 research window and appears to have been missed by the prior (Aug 22) research pass. Logged here for the audit trail; not treated as new evidence this cycle — using it now would double-count an old fact as if timely.

SEC and DTCC/Nasdaq, unchanged this cycle: no new SEC rulemaking, no-action letter, or press release dated Aug 22-29 was found on a direct sec.gov check; the tokenized-equity "innovation exemption" meeting remains canceled with no new date announced. DTCC's October 2026 full-launch target is unchanged, no delay reported. Nasdaq's Dec 6, 2026 target is unchanged.

Carried forward, still load-bearing — Franklin Templeton SEC no-action letter (Aug 12, primary, confirmed direct on sec.gov): the SEC's Division of Investment Management issued a no-action letter dated 2026-08-12 (sec.gov URL confirmed: <https://www.sec.gov/division/investment/letters-no-action/2026-08-12-franklin-templeton-081226>) permitting Franklin Templeton to use its own investor-services affiliate, Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain U.S. Government Money Fund (BENJI, on Stellar) — carved out of Rule 17f-2's physical-certificate requirement, as a cash-management sleeve for other Franklin funds. Confirmed by 7+ independent outlets (The Block, Tech Times, ETHNews, coinaprika, BigGo Finance, UEX, KuCoin), all dated Aug 12-13. Separate Bloomberg (Aug 20) reports a plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, possibly starting Q4 2026. Genuine but narrow institutional-plumbing positive, already reflected in the committed baseline.

Aug 3 catalyst (carried forward, committed): BlackRock launched two new tokenized money-market funds — BSTBL (BlackRock Select Treasury-Based Liquidity Fund) and BRSRV (BlackRock Daily Reinvestment Stablecoin Reserve Vehicle), following an SEC prospectus filing Aug 1. Both hold cash, short-term Treasuries, and repo agreements; BRSRV is purpose-built as a reserve asset for stablecoin issuers, targeting GENIUS Act eligibility. Securitize is transfer agent and tokenization provider for both, the same role it plays for BUIDL. Confirmed by 7+ independent outlets.

GENIUS Act status, unchanged this cycle: Treasury's Section 3 NPRM (Federal Register, Aug 18, comment deadline Oct 19) and the joint FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Program (CIP) comment period (closed Aug 21) remain the most recent milestones — no new rulemaking action found Aug 22-29. No final rule expected until 2027. An unchanged, already-priced mild headwind against the Jan 18, 2027 statutory effective date — holds 12mo/36mo flat.

The Claim

The thesis, and where I differ from the consensus — updated September 12, 2026 (re-checked as part of today's FULL WEEKLY refresh; no new findings beyond what's already in The Facts above — held flat since Sept 5 through Sept 10, 11, and now this full weekly pass)

The crowd: is treating Coinbase's Aug 24 tokenized-stock launch on Base as the moment tokenized equities go mainstream. It's a real, well-documented development — 9+ independent outlets and ADGM regulatory permission behind it — but it's non-US-only, structurally identical to the Robinhood Chain launch this report already priced in as insufficient alone. Treating a geography-restricted product launch as the catalyst risks exactly the kind of overreach this report has repeatedly had to correct.

Me: holding at 52/60/66/74/85. Today's search found no dated catalyst Sept 1-2 — the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are an unchanged background, not new events — and rwa.xyz itself was not independently re-pulled this cycle either. That leaves the Aug 28 primary pull (\$38.69B total distributed value, tokenized Treasuries at \$16.00B, -0.93%/30d, the second consecutive negative reading) as the most recent independently-confirmed figure — still sub-1% and unconfirmed by a fresh pull, so it doesn't move P. Today's shared score set is left as a draft pending Alex's review — see My Decision — but that is entirely on Iran War Risk's account, not this pillar's.

The Aug 29 full weekly dive (still the last full re-dig): a dedicated primary-source pass found one genuine, multi-sourced development that week (Coinbase's Base tokenized-stock launch) that does not clear the bar for the same structural reason as its predecessor, one tangential stablecoin launch (Anchorpoint's HKDAP), no new SEC rulemaking dated Aug 22-29, and unchanged DTCC/Nasdaq timelines. An Aug 28 daily catch-up draft was written but never delivered and was not taken at face value. 52/60/66/74/85 has now held across all five windows for four straight cycles (Aug 29, Aug 30, Sept 1, Sept 2).

My edge: this pillar's discipline is to notice when institutions actually ship product accessible to the broad market this pillar scores, not just when they announce intent or ship into a single excluded jurisdiction — and to flag data-access gaps (rwa.xyz's repeated non-response) honestly rather than paper over them with secondary sources dressed up as primary ones. 1mo holds because there's no acute 30-day catalyst; 12mo/36mo hold because the GENIUS Act rulemaking timeline is unchanged and remains an already-priced headwind roughly offsetting the adoption tailwinds at those horizons.

The Facts

As of September 12, 2026, independently re-verified through a dedicated FULL WEEKLY primary-source research pass — hard numbers with exact dates, sources on the last page. Covers the Sept 5-12 gap. This section reflects a full weekly refresh, score set 2026-09-12_draft2, left as DRAFT pending Alex's manual review (full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy, regardless of evidence quality).

- ★ ★ **rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026** (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced smooth growth curve, NOT a step-change or new milestone. Six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B — a structural-breadth note.
- ★ ★ **DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed ON SCHEDULE, no delay** (primary: DTCC.com, corroborated by Forkast's "From Pilot to Plumbing," Tradeweb, and Crowdfund Insider — 2+ independents). Remains the unchanged, operative forward catalyst; the July 15 live-production trades are already priced in.
- **Two freshly-dated items this week, each effectively single-source** (a press release syndicated across many aggregator sites, not independently reported) — incremental infrastructure new step-changes, logged as context and NOT used to move P per the sufficiency rule: (a) Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; (b) Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting Casper onto the ERC-3643/T-REX Ledger tokenization standard network.
- **No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions found dated within the last two weeks.**
- **Score decision: P HELD FLAT at 52/60/66/74/85.** Nothing this cycle is both newly dated within the lookback window and clears the primary-source-or-2+-independent-outlets bar for a material non-gradual development — rwa.xyz's growth and DTCC's schedule are continuations, and the two freshly-dated items are single-source-equivalent. **LEFT AS DRAFT** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality.

Carried forward from August 29, 2026 (independently reconfirmed that cycle, still relevant):

- ★ ★ **NEW, primary + 9 outlets — Coinbase launches tokenized-stock trading on Base (Aug 24):** NVDAc, METAac, AAPLc, GOOGLc (Nvidia, Meta, Apple, Alphabet), each backed 1:1 by a share in regulated custody with Alpaca, under an Abu Dhabi Global Market FSRA permission Coinbase received Aug 11, 2026. Confirmed on coinbase.com and corroborated by 9+ independent outlets dated Aug 24-25. Eligible to non-US users only — the same structural limitation as the Robinhood Chain precedent this report already established as insufficient alone. Coinbase says more stocks are coming "in the coming weeks."
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed Anchorpoint Financial began institutional distribution of HKDAP, a Hong Kong-dollar stablecoin whose stated initial use cases include settlement/distribution of tokenized RWAs. A stablecoin launch, not an RWA-tokenization event — logged as context only.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29** found on a direct sec.gov check; the tokenized-equity "innovation exemption" meeting remains canceled with no new date announced.
- **DTCC's October 2026 full-launch target and Nasdaq's Dec 6, 2026 target are both unchanged** — no delay reported this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found.** Two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$8.5M, Aave) and an Arrakis V1/G-UNI Uniswap V3 spot-manipulation drain (Aug 23) — but both are ordinary DeFi protocols, not tokenized-RWA/Treasury rails, and are not applicable to this pillar's risk window.

- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** (multiple press-release-syndication outlets) — this predates the Aug 22-29 window and appears to have been missed by the prior (Aug 22) research pass. Logged for the audit trail; not treated as new evidence this cycle.
- ★ **★ Data-quality flag — rwa.xyz direct access blocked this cycle (Aug 29):** app.rwa.xyz returned HTTP 403 on repeated attempts; could not independently re-pull live figures. Relying on the report's own most recent primary pull (Aug 28, from the abandoned daily-catch-up draft): total RWA distributed value \$38.69B (+3.04%/30d); tokenized Treasuries \$16.00B (-0.93%/30d). Loose corroborated by secondary citations (a Stobox weekly digest ~\$38.48 for Aug 19-25; another source citing \$38.39B as of Aug 21) — consistent with trend, no discontinuity, but not an independent re-confirmation.
- ★ **★ NEW — second consecutive negative 30-day reading on tokenized Treasuries:** Aug 22 read -0.39%, Aug 28 read -0.93% — both sub-1% in absolute magnitude, and this cycle's figure could not be independently reconfirmed, so it does not move P now. Flagged for a genuinely independent rwa.xyz pull next cycle — it's the one thing in this pillar closest to actually mattering.
- **BTC (pipeline reference) closed at \$77,666.16 on Aug 29** — up modestly from \$77,266.84 on Aug 22 (Bitstamp).

Carried forward from Aug 22 (independently reconfirmed that cycle, still relevant):

- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** total RWA distributed value \$38.32B, +2.30% vs. 30 days ago — essentially flat versus the Aug 16 baseline (\$38.17-38.24B); normal drift, no discontinuity.
- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** tokenized US Treasuries \$15.98B, -0.39% vs. 30 days ago, across 87 products — the first slightly-negative 30-day reading this pillar had tracked over time, confirmed distinct from the all-category total above.
- ★ **Primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** the SEC's Division of Investment Management issued a no-action letter dated 2026-08-12 (sec.gov/.../franklin-templeton-081226) permitting Franklin Templeton to use its own affiliate, Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain Government Money Fund (BENJI, on Stellar), carved out of Rule 17f-2's physical-certificate requirement. Confirmed by 7+ independent outlets (The Block, Tech Times, ETHNews, coinpaprika, E Finance, UEX, KuCoin), all dated Aug 12-13. Separately, Bloomberg (Aug 20) reports a plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, integration possibly starting in 2026.
- ★ **SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** a planned SEC meeting on the exemption, expected around Aug 14, was canceled/postponed. Multi-sourced (Ledger Insights, CryptoTimes, CoinReporter, plus Bloomberg/Yahoo-sourced coverage) attributes the delay to White House concerns and SIFMA opposition, plus a stated desire to unsettle tokenization-adjacent provisions being negotiated in the CLARITY Act; the causal reasons remain not independently corroborated at the causal level. Still canceled, no new date announced as of Aug 29.
- **GENIUS Act rulemaking proceeded on its pre-set procedural schedule:** Treasury's Section 3 NPRM was published in the Federal Register Aug 18 (comment deadline Oct 19), and the joint SEC/CFTC (Customer Identification Program) rulemaking comment period (FinCEN-2026-0101 / OCC-2026-0331) closed on schedule Aug 21, 2026 — process, not news; no rule has been finalized. Too soon to score.
- ★ **Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock trading volume on Robinhood Chain crossed \$1B cumulative as of Aug 21 (multi-source: crypto.news, cryptonon.com). Still EU/EEA-only, no US retail access — the same structural limitation later observed in Coinbase's Aug 24 Base launch.

Carried forward from Aug 17 (independently reconfirmed, still relevant):

- **Multi-sourced (The Block, crypto.news, Benzinga, Blockzeit) — Aug 17:** SEC Chair Atkins met with President Trump, CFTC Chair Selig, NYSE, CME, DTCC, and crypto firms; the SEC reported on proposed rules exempting certain token offerings from securities law, and the CFTC launched an Innovation Advisory Committee. Per crypto.news, the discussed 24/7 tokenized-stock "innovation exemption" remained explicitly exploratory — "no final framework, eligibility criteria, or implementation date has been announced." **Context added this cycle:** a separate, formal SEC meeting specifically on the exemption, expected ~Aug 14 (i.e., before this Aug 17 multi-agency meeting), was itself reported canceled/postponed (Aug 13-15 reporting) — see the finding above; the blockchain Aug 17 meeting proceeded, but the dedicated exemption track it discusses remains stalled.

Carried forward from Aug 16 (still load-bearing):

- **No new dated RWA/tokenization catalyst was found as of Aug 16.** General web search had surfaced only recirculating market-size commentary — a \$33.5B "liquid on-chain value" figure from a different provider's methodology, tripling YoY) that doesn't reconcile with rwa.xyz's own tracked \$38.17B distributed-value number already in this report; not adopted as a replacement metric.

Carried forward from Aug 9-14 (still load-bearing):

- **rwa.xyz's Aug 9 pull, reconfirmed Aug 14 with added product-level detail:** tokenized Treasuries \$16.21B across 87 products and 63,010 unique addresses; Circle's USYC leads at \$3.00B, BlackRock's BUIDL \$2.68B, Ondo's USYD \$2.14B, Franklin Templeton's iBENJI \$1.72B — the same dated figures already in this report, not a new catalyst.
- **rwa.xyz's \$38.17B total distributed-value print, dated Sunday Aug 9 (Bitcoin News, CoinSpectator), is the same all-time-high move already folded into prior sets' language** — still the most recent dated RWA fact.

Carried forward from Aug 8-9 (still load-bearing):

- ★ **Total RWA distributed value hit a new all-time high of \$38.24B** (rwa.xyz direct pull, Aug 8), up from \$34.67B roughly two and a half weeks earlier — a genuine +10% move, not stagnation. Tokenized Treasuries specifically grew modestly and in-trend, \$15.86B → \$16.21B (87 products, 62,997 holders, 7d yield 3.29%).
- ★ **★ CORRECTION, again — the \$34.67B figure was never "tokenized Treasuries."** KuCoin's "Tokenized Treasuries Dip to \$34.67 Billion" headline (~Jul 22) mislabels the total-RWA distributed value figure as Treasuries-specific; this is the same conflation this report has now caught twice. Do not cite that figure as a Treasuries number anywhere in this system.
- ★ **★ NEW — the Central Bank of Ireland cleared Aviva Investors' tokenized USD Liquidity Fund on the XRP Ledger (Jul 29),** the first time a major EU regulator has approved a public-blockchain tokenized fund structure (BNY Mellon custody, Komainu/Licuido on-chain layer) — confirmed by 6+ independent outlets, missed entirely by the daily "no new catalyst" checks.
- ★ **★ NEW — Ripple took equity stakes in Zilo and Licuido (Aug 3),** converting a commercial relationship into ownership and adding regulated transfer-agency, issuance, and collateral-mobility infrastructure directly to the XRPL stack that powered the Aviva launch (Ripple.com press release + 5 outlets).
- **rwa.xyz also separately reports a "Represented Asset Value" of \$373.55B** (down 1.70% over 30 days) — a different metric (off-chain assets referenced via tokenization infrastructure, not total actually distributed on-chain). Never quote this interchangeably with the \$38.24B distributed-value figure.
- **No new RWA-rail failure, depeg, or counterparty default found** in the Jul 30 - Aug 8 window.

Carried forward from Aug 6-7 (still load-bearing):

- **GENIUS Act rulemaking status:** FDIC's BSA/AML comment period closed Aug 4; a joint five-agency CIP comment period runs through Aug 21; no agency has published a final rule. Realistic rule timing has slipped toward late 2026/early 2027 against a fixed Jan 18, 2027 statutory effective date — an already-priced, mild headwind.

Carried forward from Aug 6 (still load-bearing):

- ★ **BlackRock launched two tokenized money-market funds on Aug 3, 2026.** BSTBL and BRSRV, following an SEC prospectus filing Aug 1, via Securitize (same transfer agent as BUIDL), targeted GENIUS Act stablecoin-reserve eligibility. Confirmed by CoinDesk, KuCoin, PYMNTS, Cointribune, BitcoinWorld, Solana Compass, and CoinPaprika (7 independent outlets).

Carried forward from the July 30 full refresh (still load-bearing):

- ★ **★ CORRECTION — the "\$34.67B tokenized Treasuries pulling back" headline circulating this week (and cited in the Jul 29/30 daily touches) is a metric mislabel, again.** That figure is total cross-category RWA "Distributed Value" (all asset classes), not tokenized Treasuries specifically — the same conflation an earlier full refresh already corrected once. Multiple outlets (including one whose own body text contradicts its headline, admitting "tokenized U.S. treasuries lead at \$15.86 billion") ran versions of this mislabeled headline. A direct rwa.xyz pull (Jul 30) shows tokenized Treasuries at **\$16.18B**, essentially flat versus \$16.20B a week ago — not declining.

- ★ **NEW, direct pull — BlackRock's BUIDL continues recovering, not declining.** BUIDL sits at **\$2.64B** (Jul 30), up from \$2.52B (Jul 22 wobble low) and \$2.61B (Jul 25) — a steady +4.8% recovery opposite of the "down 12.22% w/w" framing the daily touches carried forward from a stale Jul 22 snapshot.
- ★ **NEW, confirmed 4+ outlets — Robinhood Chain's on-chain RWA activity jumped roughly 5x to ~\$70M (Jul 25).** Tokenized-stock trading grew in size, with tokenized SpaceX overtaking tokenized GameStop as the chain's largest RWA holding (CoinDesk, CryptoTimes, Cryptopolitan, Incrypted, Crowdfund Insider). TVL roughly tripled to ~\$312M, though stablecoins/memecoin dominate overall activity. Separately, a Jul 29 report cites \$885.5M in Robinhood Chain's *cumulative transfer volume* — a flow metric, not a balance figure; not conflated with the RWA-value number above.
- ★ **NEW — Securitize Capital (BlackRock BUIDL's transfer-agent/tokenization partner) registered with the SEC as an investment adviser (Jul 27),** and Citi initiated a Buy rating on Securitize stock (SECZ), calling it "critical infrastructure" for RWA tokenization (Jul 27, sell-side sentiment).
- **All-RWA totals, direct pull (Jul 30): Distributed Value ~\$36.93B** (+0.3% over 5 days), **Represented Value ~\$370.55B** (−2.6% over 5 days, single-pull, unconfirmed trend), **stablecoin total ~\$296.86B** (−0.4%). USDT \$188.95B, USDC \$72.14B.
- **GENIUS Act: no new final rules in this window.** FDIC's BSA/sanctions comment window remains open (closes Aug 4); the joint CIP comment window remains open (closes Aug 21). No agency completed rulemaking Jul 25-30.
- **DTCC's tokenization pilot continues as planned** — Russell 1000 stocks/ETFs/Treasuries, 50+ firms including BofA, Citi, Morgan Stanley, Robinhood, Circle, Ondo, Anchorage; October 2026 full-service launch target unchanged, no new catalyst this window.
- **Risk check: clean window, no new incidents.** No RWA-protocol hack, tokenized-treasury depeg, or counterparty failure found Jul 25-30 (the Jul 15 Ostium oracle exploit, ~\$18-24M, remained outside this window and was already logged last cycle). USYC's Binance/BNB-Chain concentration remains an unresolved fragility point, not re-verified this cycle.
- **USD (Open USD) 140+-partner credibility dispute (Samsung/Dunamu/Upbit denials) remains unresolved** — no new statements found this window.
- **The treasury leaderboard, July 30 (rwa.xyz, direct pull):** Circle's **USYC \$3.01B** > BlackRock's **BUIDL \$2.64B** > Ondo's **USDY \$2.15B** > Franklin Templeton's **iBENJI \$1.76B** > Centrifuge's **J \$881M**.
- **Circle won final OCC approval for a national trust bank (Jul 10, carried forward).** "Circle National Trust" puts Circle under direct federal (OCC) oversight for fiduciary digital-asset custody. Closed ~\$66.79 (Jul 20).
- **Swift's blockchain ledger (17 banks, 6 continents, carried forward)** continues running 24/7 cross-border tokenized-deposit payments over Chainlink CCIP — framed as banks' competitive response to stablecoins.
- **Ondo keeps extending its franchise (carried forward):** Broadridge proxy-voting partnership, IVV/Micron tokenization, "Ondo Perps." Ondo DAO also voted to burn 100M ONDO (1% of supply 25) — tokenomics, not core-RWA news.
- **Nasdaq and the SEC: no change.** Nasdaq's 23/5 tokenized-trading target remains Dec 6, 2026, unchanged.
- **The TAM anchor stands:** BCG × Ripple (Apr 7, 2025) projects **~\$9.4T by 2030 / \$18.9T by 2033**. Current on-chain value is still <1% of any endpoint.

The Prize

Illustrative only — not price targets, not advice

The cleanest single-token anchor is still **ONDO**, the name most tied to the RWA narrative: from its early-trading price around **\$0.22 (Jan 2024 — listing prints vary by venue)** it ran to a **\$2.14 time high (Dec 16, 2024)** — roughly **~10× in 11 months**.

The round-trip, last checked July 13 (CoinGecko, not re-pulled live this cycle): **\$0.3291** — market cap ~\$1.6B, still ~85% below the high — even as the company keeps extending its franchise (Broadridge proxy-voting integration, IVV/Micron tokenization, DAO-voted 100M-token burn on Jul 25). Part of the Dec-2024 spike was a Trump-linked World Liberty Financial buy, not fundamentals. The durable signal stays structural, not one token: total RWA distributed value sits near its all-time high (rwa.xyz aggregate read ~\$39.2B, Sept 8 — up from ~\$38.69B, Aug 28, continuation of the already-priced growth curve, not a new milestone; six asset categories now each exceed \$1B) and tokenized Treasuries last confirmed near \$16.00B (−0.93%/30d, a second consecutive slightly-negative reading as of Aug 28, still sub-1% and not independently reconfirmed since) while the token trades ~85% off its peak, and the confirmed institutional moves stack through this cycle — BlackRock's Aug 3 fund launch, Franklin Templeton's Aug 12 no-action letter, Coinbase's Aug 24 tokenized-stock launch on Base (non-US only), and DTCC's October 2026 full-service launch reconfirmed on schedule — are exactly the kind of adoption proof points that outlast any single token's price, even where each individually falls short of this pillar's sufficiency bar. Pipeline reference: BTC closed at \$76,745.60 on Sept 13, essentially flat against \$76,581.44 on Sept 2 (the last dated pipeline reading in this report) — noted here only as context for the market backdrop, not as investment guidance. The Prize doesn't feed the math — it tells you what the lean is worth acting on, euphoria and round-trip included.

The Other Side

The strongest honest case this is wrong — updated September 12, 2026 (re-checked as part of today's FULL WEEKLY refresh; still valid, no new findings beyond what's already in The Facts above)

- **The data-access gap is a real weakness in today's read, not a cosmetic one.** rwa.xyz returned HTTP 403 on every attempt this cycle, so this pillar's core primary metric wasn't independently pulled — it's leaning on a figure carried forward from an abandoned, never-delivered draft, loosely corroborated by secondary syndication. That's a thinner evidentiary base than this report usually accepts for a "held flat" call.
- **Tokenized Treasuries have now posted two consecutive negative 30-day readings.** −0.39% (Aug 22) then −0.93% (Aug 28) — still sub-1% each and not independently reconfirmed this cycle. Two in a row is a pattern, not noise, and this pillar said explicitly last cycle it would be watching for exactly this.
- **Coinbase's tokenized-stock launch is easy to overstate.** Nine-plus outlets covered it and there's a real regulatory permission behind it, but it's non-US-only — the third time in two months this pillar has logged a headline-grabbing tokenized-equity launch (BlackRock funds, Robinhood Chain, now Coinbase) that doesn't actually reach the US market this system is scoring for. At some point "another jurisdiction-restricted launch" should itself start to look like the ceiling, not a stepping stone.
- **An Ondo Stocks milestone from Aug 15 was missed for two full cycles.** That's a real research-process miss, caught only in hindsight — a reminder that "no new catalyst found" claims in previous cycles weren't airtight.
- **Regulatory limbo is still real.** The GENIUS Act's rulemaking deadline was missed and zero of six agencies have finalized rules; the CIP comment window closed Aug 21 but produced no rule, final rule not expected until 2027 — nearly a year of mid-market issuers operating under an incomplete rulebook, which can chill activity rather than de-risk it. The SEC's tokenized-equity exemption meeting remains canceled with no rescheduled date as of Aug 29.
- **The RWA totals are still a small, largely institutional/permissioned number.** ~\$38-39B in total distributed value is real growth, but it's still under 1% of the BCG×Ripple \$9.4T-by-2030 TAM anchor, and this pillar has repeatedly had to correct press coverage that inflated or mislabeled RWA figures — a reminder that headline numbers in this space need active skepticism, not just repetition.
- **It may not be "crypto."** Most volume is permissioned/institutional and may never accrue value to crypto majors. Durable market-structure law (CLARITY) still isn't passed — a reminder that this pillar's calm holds inside a portfolio where other pillars are watched closely for exactly the kind of novel development that would break a routine hold.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set August 29, 2026 (full weekly refresh); re-checked August 31 through September 12, 2026 (light daily catch-ups, and today's FULL WEEKLY refresh) — no beyond what's already in The Facts above.

DATE	EVENT	MEANS
Checked Sept 16, no change	rwa.xyz read \$38.86B total distributed value as of Sept 15, 2026 (+1.00% over 30 days, ~4.24M holders) — versus the \$39.2B Sept 8 pull already priced. No rail failure, depeg or counterparty default; DTCC's October 2026 full-service launch unchanged and on schedule. Separately, the CLARITY Act cloture vote failed 49–50 on Sept 15 (senate.gov primary)	No P move — a sub-1% drift on a single-platform series is inside noise, not a trend. CLARITY failure is scored in <i>that</i> pillar and deliberately not double-counted here: this report's Other Side already carries "no durable market-structure law" as a standing negative, so the thesis never assumed passage. HELD FLAT at 52/60/66/74/85, AUTO-STAMPED with the cycle
Checked Sept 13, no change	No dated catalyst found Sept 12-13 — no new rwa.xyz pull beyond the \$39.2B Sept 8 primary read already priced, and no rail failure, depeg, or counterparty default. DTCC's October 2026 full-service launch (Russell 1000 equities, major ETFs, Treasuries) remains unchanged and on schedule	No P move — held flat at 52/60/66/74/85, AUTO-STAMPED along with the cycle
Checked Sept 2, no change	No dated catalyst found Sept 1-2; the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events	No P move — this cycle's shared score set is left as DRAFT (Iran War Risk, not this pil pending Alex's review
Checked Sept 1, no change	Only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot); no fresh dated catalyst, no rail failure/depeg/counterparty default	No P move — AUTO-STAMPED alongside the other unchanged pillars
Fired Aug 24, 2026	Coinbase launched tokenized-stock trading (NVDaC/METAc/AAPLc/GOOGLc) on its own Base blockchain, 1:1 Alpaca-custodied, under an ADGM permission received Aug 11; primary + 9 outlets. Non-US users only	Same structural limitation as Robinhood Chain — no P move; US retail access, or a materially larger scope, would clear the bar
Fired Aug 24-25, 2026	Standard Chartered-backed Anchorpoint began distributing HKDAP, a HK-dollar stablecoin citing RWA settlement/distribution as a use case	Tangential — a stablecoin launch, not RWA tokenization itself; no P move, logged as context
Checked Aug 29, unresolved	rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts — could not independently re-pull live figures this cycle; relying on the Aug 28 carried-forward primary pull	No P move — data-quality gap flagged; a genuinely independent re-pull is needed n cycle
Checked Aug 28 (carried forward), watch	Tokenized Treasuries posted a second consecutive negative 30-day reading: -0.93% to \$16.00B, following -0.39% Aug 22	No P move — sub-1%, unconfirmed independently this cycle; a third consecutive neg reading would be a genuine trend worth re-rating on
Aug 28, not delivered	A daily catch-up draft (2026-08-28_draft) was written but never rendered, selfchecked, archived, or committed — abandoned, not trusted at face value	No P move — superseded by this cycle's independent re-verification
For the record, dated Aug 15	Ondo Stocks crossed \$1.01B TVL (press-release syndication) — predates this research window, missed by the Aug 22 pass	No P move — logged for the audit trail, not counted as new evidence this cycle
Fired Aug 21, 2026	Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only. CEO Tenev called (Aug 18) for a US framework	Continued organic growth, small base — no P move; US retail access would clear the
Fired Aug 21, 2026	GENIUS Act joint CIP comment period (FinCEN-2026-0101 / OCC-2026-0331) closed on schedule (Federal Register; Freshfields, Sullivan & Cromwell memos; Forkast) — procedural close only, no rule yet; final rule anticipated 2027, compliance 12mo after	No P move — watch for a proposed or final rule following review
Fired Aug 18, 2026	Treasury's GENIUS Act Section 3 NPRM published in the Federal Register — comment deadline Oct 19, 2026	Process, not news — no P move; watch the comment period and any resulting final r
Fired Aug 18-19, 2026	SEC formally proposed "Regulation Crypto Assets" (sec.gov press release 2026-76) — startup (≤\$5M/4yr) and fundraising (≤\$75M/12mo) exemptions plus an investment-contract safe harbor for NEW crypto-token capital formation; scoped away from tokenization of existing real-world securities	Tangential — no P move for this pillar; would matter only if scope later expanded to RWA tokenization
Fired Aug 13-15, 2026	SEC's planned tokenized-equity "innovation exemption" meeting (expected ~Aug 14) was CANCELED/postponed (Ledger Insights, CryptoTimes, CoinReporter, Bloomberg/Yahoo-sourced coverage) — cited causes: White House concerns, SIFMA opposition, CLARITY Act friction; causal reasons not independently corroborated	Incremental negative, roughly offset by the Franklin Templeton letter below — no P alone; a formally re-scheduled meeting or published framework would matter
Fired Aug 12, 2026	SEC no-action letter (confirmed direct on sec.gov) lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar); Bloomberg (Aug 20) reports a plan to embed BENJI in conventional ETFs/mutual funds, possibly Q4 2026	Genuine but narrow institutional-plumbing positive, roughly offset by the SEC exemp cancellation above — no P move alone; a live BENJI-in-wrapper product or a second family following suit would clear the bar
Fired Aug 17, still watch	SEC Chair Atkins met Trump, CFTC Chair Selig, NYSE, CME, DTCC, crypto firms; SEC reportedly proposed rules exempting certain token offerings, CFTC launched Innovation Advisory Committee — superseded by the Aug 13-15 cancellation above	No P move — see the cancellation row above
Checked Aug 22 draft2, flat/first-negative	Direct rwa.xyz pull (primary): total distributed value \$38.32B (+2.30%/30d, flat), tokenized Treasuries \$15.98B (-0.39%/30d, first slightly-negative 30d reading tracked) — both confirmed distinct and clean; the Aug 20 draft's "\$13.7B Treasuries" scraping-artifact conflict is not reconfirmed	Held flat — sub-1%, single datapoint, insufficient alone; watch for repeat next cycle
Aug 17-21, not delivered	Drafts written Aug 17, 18, and 20 were never delivered; an Aug 21 session delivered the Aug 20 numbers into only two of six reports before stopping — none trusted at face value; independently re-verified this cycle	Held flat — no P move
Jul 29 - Aug 8	Total RWA distributed value hit a new all-time high (~\$38.2B); Central Bank of Ireland cleared Aviva's XRPL fund; Ripple took equity in Zilo/Licuido	Drove the Aug 8 3mo/6mo nudge up — already IN the committed baseline
Fired Aug 3	BlackRock launched BSTBL and BRSRV , two tokenized money-market funds targeting GENIUS Act stablecoin-reserve eligibility, via Securitize	Confirmed, reflected in prior baselines — not double-counted this cycle
Watch	Whether BRSRV actually gets adopted by a major stablecoin issuer as reserve backing, or stays unused	Adoption = re-rate up further; no uptake after a quarter = the launch was noise, not

Watch	Whether the Aviva/Ripple XRPL institutional build-out attracts further EU-regulated fund launches, or stays a one-off	Follow-on launches = re-rate up further (broadening adoption); no follow-through = incremental only
Ongoing	GENIUS Act: zero of six agencies have finalized rules; FDIC comment window closed Aug 4, joint CIP window closes Aug 21	Fast finalization after close = the miss was survivable; drift with no progress = deeper limbo (3-mo)
Oct 2026	DTCC tokenization full launch — target unchanged	On time = the biggest institutional-rails catalyst of the year lands before Nasdaq; a slip or drift confirmed (3–6 mo)
Dec 6, 2026	Nasdaq 23/5 tokenized trading — SEC-approved target launch (unchanged)	A live launch = landmark public-market proof; another slip toward H1 2027 = drift confirmed (6-mo)
Jan 18, 2027	GENIUS Act 18-month statutory backstop effective date	The actual regulatory-clarity resolution point lands almost exactly at the 6-month mark (6-mo)
H1 2027	Nasdaq equity-token services "operational" · bank Tokenized Deposit Network go-live · DTCC-Stellar public-chain deployment target	Which rails win — public chains or bank ledgers — starts getting decided here (1-yr)
Any time	Tokenized-treasury depeg / counterparty failure (USYC's Binance/BNB-Chain concentration, not re-verified this cycle)	Plumbing fragility realized — re-rate down immediately

The flip line: if the GENIUS rules drift into Q4 unfinished, the DTCC and Nasdaq launches slip past their October and December windows, and the growth that remains keeps rotating to permissioned rails, bank deposit networks, and institution-controlled coins — treat the crypto-relevance thesis as failing. Adoption that never touches public, crypto-controlled rails is TradFi, not crypto.

My Decision

COMMITTED — SEPTEMBER 17, 2026 (2026-09-17_draft) · LIGHT DAILY TOUCH · AUTO-STAMPED · THIS PILLAR HELD FLAT

P (2026-09-17_draft, COMMITTED — light daily touch, auto-stamped; HELD FLAT): 52 / 60 / 66 / 74 / 85 · Prior committed P (2026-09-15_draft, light daily touch): 52 / 60 / 66 / 74 / 85 · Intervening set 2026-09-16_draft was written but never stamped or committed — status still draft, flagged for Alex · Signals: 1mo +0.29 · 3mo +1.41 · 6mo +2.18 · 1yr +3.00 · 3yr +3.92 — unchanged, and now the only pillar positive on every window · My Weight: 20% (equal) · Impact: 8 (uniform) · Master (equal-weight) this cycle: 1mo -1.94 · 3mo -1.74 · 6mo -0.76 · 1yr +1.15 · 3yr +2.76 · THE FINAL NUMBER: -0.11 equal-weight (Neutral) / +0.43 horizon-weighted (Neutral) — down from +0.01 / +0.56 on the same quant data with yesterday's score set, driven by the Fed & Macro re-rate on the September FOMC projections. Leave-one-out check: drop this pillar and the final number falls to -0.67, the largest single-pillar swing in the blend — it is currently carrying the upside

Sept 17 LIGHT DAILY touch (score set 2026-09-17_draft), this version: held flat for a fifteenth consecutive cycle, and the case for holding got slightly more interesting rather than less. This week the other three qualitative pillars all absorbed a decisive dated event — a failed cloture vote, a hawkish Fed, an oil-supply swing — and this one absorbed none, because nothing in its own evidence base moved: the rwa.xyz read is the same \$38.86B Sept 15 pull already priced, there has been no rail failure, no depeg and no counterparty default, and DTCC's October full-service launch is still on schedule. That is worth stating rather than glossing, because it is exactly why this pillar now carries the blend's upside: the leave-one-out check says removing it drops THE FINAL NUMBER from -0.11 to -0.67. A thesis that does not move while everything around it does is either genuinely structural or quietly stale, and the honest answer here is that its next real test is the October DTCC launch, not this week's news cycle. **AUTO-STAMPED** per the delegated daily authority.

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: independently re-confirms the hold. rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced growth curve, not a step-change; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B. **DTCC's October 2026 full-service tokenization launch is reconfirmed on schedule, no delay** (DTCC.com primary + Forkast/Tradeweb/Crowdfund Insider, 2+ independents) — remains the operative unchanged catalyst. Two freshly-dated items this week were found but are each effectively single-source (Sept 7 Securitize/BUIDL off-exchange collateral expansion; Sept 7-8 MAKE Group's "AstralBeam" Casper-to-ERC-3643/T-Rex Ledger bridge) — logged as context, not used to move P per the sufficiency rule. No new rail failure, stablecoin depeg, counterparty default, or RWA-tokenization-specific enforcement action found dated within the last two weeks. **P HELD FLAT at 52/60/66/74/85. This is a FULL WEEKLY refresh, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality — LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.** This morning's light daily catch-up (2026-09-12_draft) remains the last TRUE committed baseline.

Prior cycle (Sept 12 light daily catch-up, this morning): re-checked — no new dated catalyst found. RWA.xyz aggregate reads (~\$38B tokenized value by late August) read as continuation of already-priced growth, not a new milestone; DTCC's October launch remained the operative unchanged catalyst. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 12, 2026 (2026-09-12_draft) — the last TRUE committed baseline.** Iran War Risk was the only pillar that moved that cycle.

Prior cycle (Sept 11 light daily catch-up): re-checked — no new dated catalyst found. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 11, 2026.**

Prior cycle (Sept 10 light daily catch-up): re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 10, 2026.**

Prior cycle (Sept 9 light daily catch-up): re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct pull, read as organic continuation; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 9, 2026.**

Prior cycle (Sept 8 light daily catch-up): re-checked via WebSearch — no new dated catalyst found; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 8, 2026.**

Prior cycle (Sept 6 light daily catch-up): re-checked via WebSearch — DTCC's October launch remained the operative unchanged catalyst, no new dated milestone. **AUTO-STAMPED SEPTEMBER 6, 2026.**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch, no new dated catalyst found. **P HELD FLAT at 52/60/66/74/85. COMMITTED BY ALEX SEPTEMBER 5, 2026.**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores.json status field for that set was never actually advanced from "draft" — a bug in that session. The last TRUE committed baseline for this pillar remains **2026-09-02_draft (52/60/66/74/85), auto-stamped Sept 2, 2026**. Not corrected retroactively in scores.json — stamping is Alex's call.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat, no dated catalyst found Sept 1-2. This shared score set was originally left as draft only because Iran War Risk's sharp re-rate flipped the master FINAL NUMBER's equal-weight call band, not for any reason in this pillar — **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp pool.

Prior cycle (Sept 1 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 31-Sept 1; none found — only stale/recycled RWA market-size summaries turned up, no fresh dated catalyst. P held flat at 52/60/66/74/85, AUTO-STAMPED, then the committed baseline.

Prior cycle (Aug 31 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 29-31; none found — sector-level figures cited that window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) were consistent with the Aug 28 pull already priced in, not a fresh catalyst; rwa.xyz was not independently re-pulled. P held flat, AUTO-STAMPED.

Prior cycle (Aug 29 full weekly refresh) — carried forward for context: this was the first full weekly refresh since Aug 22 draft2 — an independent primary-source pass that does not take the abandoned, never delivered Aug 28 daily catch-up draft at face value. Tokenization held flat again at 52/60/66/74/85. The week's one genuine, multi-sourced development is Coinbase's Aug 24 launch of tokenized-stock track (NVDAC/METAC/AAPLC/GOOGL) on its own Base blockchain, under an ADGM permission received Aug 11 — confirmed on coinbase.com and 9+ independent outlets, but non-US-only, the same structural limitation that already kept the Robinhood Chain launch from clearing this pillar's bar; treated the same way for consistency. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25) is tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check Aug 22-29, and DTCC's October 2026 / Nasdaq's Dec 6, 2026 targets are unchanged. **rwa.xyz's own site returned HTTP 403 on repeated attempts this cycle** — a real data-access gap, flagged for next cycle — so this pass relies on the report's most recent primary pull (Aug 28, carried forward from the abandoned draft): total distributed value \$38.69B (+3.04%/30d), tokenized Treasuries \$16.00B (-0.93%/30d), the **second consecutive negative 30-day reading** on Treasuries specifically (Aug 22: -0.39%). Still sub-1% and not independently reconfirmed this cycle — not sufficient alone to move P, but worth a genuinely independent re-pull next cycle. No new RWA-rail failure, depeg, or counterparty default found; two unrelated DeFi incidents (Term Finance, Arrakis, both Aug 23) don't apply to this pillar's risk watch. Nothing here clears the sufficiency bar to move P.

(That Aug 29 cycle was left as a draft solely because full weekly refreshes are categorically excluded from delegated daily auto-stamp authority, regardless of evidence quality — not for any evidentiary reason.)

The June committed scores (**53 / 57 / 62 / 72 / 85**, committed June 19, 2026) and every committed set since (52/60/66/74/85, most recently committed Sept 3, 2026, 2026-09-02_draft) show this pillar has been flat since Aug 8; today's held-flat draft continues that. Lineage: Aug 22 draft2 (committed) → Aug 28 draft (abandoned, not delivered) → Aug 29 full weekly refresh (held flat, left as draft) → Aug 31 light daily catch-up (held flat, AUTO-STAMPED) → Sept 1 light daily catch-up (2026-09-01_draft, held flat, AUTO-STAMPED) → Sept 2 light daily catch-up (2026-09-02_draft, held flat — COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026 — the last TRUE committed baseline) → Sept 3 (no new score set, held flat) → Sept 5 light daily catch-up (2026-09-05_draft, held flat — commit message wrongly claimed auto-stamp, corrected here) → **Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, this version), held flat — COMMITTED BY ALEX SEPTEMBER 5, 2026.**

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

LIGHT DAILY touch, September 17, 2026 (score set 2026-09-17_draft, committed, auto-stamped) — checking for changes since the 2026-09-15_draft committed baseline (the intervening 2026-09-16_draft was written but never stamped or committed). This pillar HELD FLAT at 52/60/66/74/85 for a fifteenth consecutive cycle.

- **No new rwa.xyz pull to price.** The latest read remains **\$38.86B** total distributed asset value as of **Sept 15, 2026** (+1.00% over 30 days, ~4.24M holders; US government debt \$15.9B, commodities \$4.9B, active strategies \$3.6B, asset-backed credit \$2.56B, tokenized stocks \$2.52B) — versus the \$39.2B Sept 8 read already priced. A sub-1% drift on a single-platform series is noise, not a trend.
- **No rail failure, depeg or counterparty default found** — the three things that would actually break this thesis.

- **DTCC's October 2026 full-service launch remains on schedule**, following the July 15 live production trades with 25+ firms across traditional finance and digital assets, against the \$114T of custodied assets the service is designed to reach. This is the pillar's next real test.
- **The week's two big events do not drag this pillar.** The CLARITY Act's cloture failure is already covered: "durable market-structure law still isn't passed" is a standing negative in this report's Other Side, so the thesis never rested on passage. The Fed's hawkish September projections raise the discount rate against which tokenized-Treasury demand is judged — but tokenized Treasuries are a *rate-bearing* product, and a higher-for-longer path is not straightforwardly bad for them, so it is logged as ambiguous and explicitly not scored either way.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Nothing dated moved. **AUTO-STAMPED.**

Carried forward — what changed in the September 16 touch (2026-09-16_draft, written but never stamped or committed), for continuity:

- **rwa.xyz mid-September read: \$38.89B distributed asset value** (represented asset value \$361.91B), versus the **\$39.2B September 8** read already priced. Flat-to-marginally-lower — inside ordinary noise for this series, and a single-platform pull; not a move.
- **No rail failure, depeg, or counterparty default found** in the window since the last check.
- **DTCC's October full-service launch** (Russell 1000, major ETFs, Treasuries) remains unchanged and on schedule — already priced, no new dated milestone.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 14, 2026 (score set **2026-09-14_draft**) — checking for changes since the 2026-09-13_draft committed baseline.

- **No dated catalyst found Sept 13-14.** No fresh rwa.xyz aggregate pull beyond the ~\$39.2B Sept 8 read already priced, and no rail failure, depeg, or counterparty default on any tokenization.
- **DTCC's October 2026 full-service launch** — Russell 1000 equities, major index ETFs, and US Treasuries — **remains unchanged and on schedule.** No delay, no scope change, nothing new announced this cycle.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved. The growth curve is continuing on trend, which is what the current P already assumes.

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 — checking for changes since the Sept 12 committed baseline (2026-09-12_draft, auto-stamped this morning).

- **Sept 12, FULL WEEKLY refresh (2026-09-12_draft2):** rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary, corroborated by CryptoRank/Crowdfund Insider aggregation) — continuation of the already-priced growth curve, not a step-change; six asset categories now each exceed \$1B. DTCC's October 2026 full-service launch reconfirmed on schedule with no delay (DTCC.com primary + 2 independents: Forkast, Tradeweb, Crowdfund Insider). Two freshly-dated items (Sept 7 Securitize/BUIDL off-exchange collateral expansion; Sept 7-8 MAKE Group "AstralBeam" Casper bridge) are each single-source-equivalent, logged as context only, not used to move P. No new rail failure, depeg, counterparty default, or RWA-tokenization-specific enforcement action found.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Nothing this cycle clears the sufficiency bar. **LEFT AS DRAFT — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality** — awaiting Alex's manual review as 2026-09-12_draft2.

Carried forward — what changed in the Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped, this morning's cycle), for continuity:

- **Sept 12, light daily catch-up:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) are a continuation of the already-priced growth curve, not a new milestone; no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service launch (Russell 1000 equities, major-index ETFs, US Treasuries) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service launch remained the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct rwa.xyz pull read as organic continuation of already-priced growth; DTCC's October 2026 full-service launch remained the operative unchanged catalyst. No rail failure, depeg, or counterparty default found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants including BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; no new dated catalyst clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated tokenization catalyst found Sept 1-2.** General web search found nothing beyond unchanged background (the DTCC pilot's possible October 2026 commercial-launch window ~\$33.5B on-chain RWA figure). No new rail failure, depeg, or counterparty default found.
- **BTC (pipeline reference): \$76,581.44 on Sept 2 vs. \$78,038.78 on Sept 1** — a real pullback on the day, driven by the Iran escalation covered in that pillar's report, not by anything here.
- **No new dated tokenization catalyst found** via WebSearch this cycle — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participants including BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, Ripple Prime) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero), so it went to manual review — **COMMITTED BY ALEX SEPTEMBER 5, 2026.** Fed & Macro is the pillar that moved this week, on a hot August jobs report. See that report's My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session. The true last-committed set remains 2026-09-02_draft. Flagged for Alex, not corrected retroactively.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **No dated catalyst found Sept 1-2.** Score decision: HELD FLAT at 52/60/66/74/85. This shared score set was originally left as draft — Iran War Risk's sharp re-rate flipped the master call band, so the score was **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 31-Sept 1.** General web search turned up only stale/recycled RWA market-size summaries — dated to Q1 2026 or the already-priced Aug 9 snapshot (\$38.17B total RWA, \$16.21B tokenized Treasuries) — not a fresh dated catalyst. No new rail failure, depeg, or counterparty default found.
- **BTC (pipeline reference): \$78,038.78 on Sept 1 vs. \$78,447.16 on Aug 31** — modest pullback.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority, then the committed baseline. Risk is the pillar that moved this cycle — see that report.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 29-31.** Sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) are consistent with the Aug 28 pull already priced in — same trend, not fresh. rwa.xyz was not independently re-pulled this cycle.
- **BTC (pipeline reference): \$78,447.16 on Aug 31 vs. \$77,666.16 on Aug 29** — further gain.
- **Score decision: HELD FLAT at 52/60/66/74/85.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **★ Coinbase launched tokenized-stock trading on Base (Aug 24):** NVDAC, METAC, AAPLC, GOOGLc (Nvidia, Meta, Apple, Alphabet), 1:1 Alpaca-custodied, under an ADGM FSRA permission received Aug 11, 2026. Confirmed on coinbase.com and 9+ independent outlets (Aug 24-25). Non-US users only — same structural limitation as the Robinhood Chain precedent, insufficient for consistency.
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed, citing RWA settlement/distribution as a use case; a stablecoin launch, not RWA token itself.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29 found** on a direct sec.gov check; the tokenized-equity exemption meeting remains canceled with no new dated evidence.
- **DTCC's October 2026 and Nasdaq's Dec 6, 2026 targets are both unchanged** this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found;** two unrelated DeFi incidents (Term Finance ~\$8.5M, Arrakis V1/G-UNI, both Aug 23) are ordinary DeFi protocols, not applicable to this pillar's risk watch.
- **★ Data-quality flag — rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle.** Could not independently re-pull live figures; relying on the report's most recent primary (Aug 28, carried forward from the abandoned draft): total distributed value \$38.69B (+3.04%/30d) vs. \$38.32B (+2.30%/30d) Aug 22 — continued sub-1%-per-week growth, same trend. Tokenized Treasuries \$16.00B (-0.93%/30d) vs. \$15.98B (-0.39%/30d) Aug 22 — the **second consecutive negative 30-day reading**, still sub-1% and not independently reconfirmed this cycle; flagged for genuinely independent pull next cycle.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** — predates this window, missed by the Aug 22 research pass; logged for the audit trail, not counted as new evidence this cycle.
- **BTC (pipeline reference): \$77,666.16 on Aug 29 vs. \$77,266.84 on Aug 22** — modest gain.
- **Score decision: held flat at 52/60/66/74/85** — nothing this cycle clears the sufficiency bar. **Left as draft, not auto-stamped:** this is a full weekly refresh, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality. Active set: **2026-08-29_draft**, awaiting Alex's manual review.

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity: Three earlier drafts (Aug 17, 18, 20) were written but never delivered, and an Aug 21 session delivered the Aug 20 number only two of six reports before stopping; none of that is trusted at face value. That cycle ran a fresh full-weekly primary-source pass on top of the already-delivered Aug 22 catch-up.

- **Why a new set instead of editing the delivered Aug 22 draft:** per house rules, a same-day draft may only be amended in place before delivery; the Aug 22 catch-up draft was already rendered, archived, and git-committed, so this full weekly refresh is scored as a new set, 2026-08-22_draft2.
- **rwa.xyz total RWA distributed value: essentially flat.** Direct pull Aug 22 draft2 (primary) shows \$38.32B (+2.30%/30d) vs. the Aug 16 baseline (\$38.17-38.24B) — normal drift, no discontinuity.
- **★ rwa.xyz tokenized Treasuries: first slightly-negative 30-day reading tracked.** \$15.98B, -0.39%/30d, across 87 products (primary) — prior cycles reported flat/slightly-up figures around \$16.21B. Confirmed distinct from the all-category total above. Sub-1% and a single datapoint — not sufficient alone to move P, flagged to watch next cycle.
- **★ NEW, primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar), carved out of Rule 17f-2. Confirmed by 7+ independent outlets (The Block, Tech Times, ETHNews, coinaprika, BigGo Finance, UEE, KuCoin). Bloomberg (Aug 20) separately reports a plan to embed BENJI in conventional ETFs/mutual funds, possibly starting Q4 2026. Genuine but narrow institutional-plumbing positive.
- **★ NEW — SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** the planned ~Aug 14 meeting was called off. Multi-sourced (Ledger Insights, CryptoTimes, CoinReporter, Bloomberg/Yahoo-sourced) on the cancellation itself; the stated causes (White House concerns, SIFMA opposition, CLARITY Act friction) trace to reporting that locked one originating story — flagged as uncorroborated at the causal level. Incremental negative versus the prior "delayed/exploratory" framing, roughly offsetting the Franklin Templeton letter above.
- **GENIUS Act rulemaking proceeding exactly on its pre-set procedural schedule:** Treasury's Section 3 NPRM published in the Federal Register Aug 18 (comment deadline Oct 19); the joint comment period closed on schedule Aug 21 (Federal Register; Freshfields, Sullivan & Cromwell memos; Forkast). Process, not news — no rule finalized. Not yet a trigger.
- **★ NEW — Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only, no retail access. CEO Tenev called (Aug 18) for a US regulatory framework. Continued organic growth off a small base, not an acceleration.
- **No new RWA-rail failure, depeg, or counterparty default found** in this window; the Jul 15 Ostium exploit (\$18-24M) remains closed and non-recurring, no follow-up developments found.
- **BTC (pipeline reference):** \$77,169.40 on Aug 22 vs. \$71,882.92 on Aug 20, +7.4%.
- **Score decision:** 1mo 52 → 52 · 3mo 60 → 60 · 6mo 66 → 66 · 12mo/36mo held at 74/85 — the Franklin Templeton positive and the SEC exemption-cancellation negative are both multi-sourced, roughly offset in magnitude, and neither alone is large enough to move a score; the first negative Treasuries reading is sub-1% and a single datapoint. **Left as draft at delivery, not auto-stamped:** this pillar's own evidence would have met the routine conditions for Alex's standing daily auto-stamp delegation (in effect since 2026-08-06), but that delegation covers ordinary daily re-rates — this is a full weekly refresh, categorically excluded regardless of evidence quality. **COMMITTED BY ALEX August 23, 2026** after manual review.

Sources

Retrieved & graded September 12, 2026, FULL WEEKLY refresh — click and judge the quality yourself. Official records & rules first, then live data, reporting, and prices. This cycle: dedicated full-weekly primary-source pass for a fresh aggregate read, a DTCC schedule reconfirmation, and a rail-failure/depeg/enforcement risk check.

- **September 12 FULL WEEKLY refresh (this cycle):** rwa.xyz — aggregate tokenized RWA value (primary), ~\$39.2B as of Sept 8, 2026, corroborated by CryptoRank and Crowdfund Insider aggregation coverage; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) each above \$1B · **DTCC.com** — October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed on schedule, corroborated by Forkast ("From Pilot to Plumbing"), Tradeweb, and Crowdfund Insider · single-source-equivalent press coverage (syndicated, not independently reported) — Securitize/BlackRock off-exchange collateral expansion (Sept 7) and MAKE Group's "AstralBeam" Casper-to-ERC-3643/T-REX Ledger bridge (Sept 7-8) — logged as context, not used to move P · general web search, risk check — no new rail failure, stablecoin depeg, counterparty default, or RWA-tokenization-specific regulatory enforcement action found dated within the last two weeks.
- **September 12 light daily catch-up (this morning's cycle):** Stobox "State of RWA 2026" mid-year report, InvestaX Q3 2026 RWA market report — RWA.xyz aggregate ~\$38B tokenized value by late August 2026 (up from ~\$20.6B a year earlier, holder base past 2.5M) — continuation of the already-priced growth trend, not a new dated milestone; DTCC's October 2026 full-service-launch window (Russell 1000 equities, major ETFs, Treasuries) reconfirmed unchanged; no new SEC rulemaking or no-action letter found.
- **September 11 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 10-11 — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October full-service-launch window (Russell 1000 equities, major ETFs, Treasuries) reconfirmed unchanged; no new SEC rulemaking or no-action letter found.

- September 10 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 9-10 — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service-launch window reconfirmed unchanged; no new SEC rulemaking or no-action letter found.
- September 9 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 8-9 — press summaries citing rwa.xyz put total distributed value at ~\$39.2B, a single-source figure without rwa.xyz pull this cycle, read as organic continuation of the already-priced growth trend; DTCC's October 2026 full-service-launch window reconfirmed unchanged; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- September 8 light daily catch-up:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 6-8 (DTCC.com, Tradeweb, CoinDesk, CoinGabbbar) — DTCC's October 2026 full-service-launch window confirmed unchanged since the July 15 production-trade stress test; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- September 6 light daily catch-up:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 5-6 — DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries, 50+ TradFi/crypto participants incl. BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, Ripple Prime) confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- September 3-5 re-check:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 3-5 — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, U.S. Treasuries; 50+ participants incl. BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo, Ripple Prime) confirmed unchanged; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- September 2 light daily catch-up (this cycle):** general web search for DTCC/Nasdaq/GENIUS Act/SEC/rwa.xyz-sourced RWA news dated Sept 1-2 — returned no fresh dated catalyst beyond unchanged background (the pilot's possible October 2026 commercial-launch window, the ~\$33.5B on-chain RWA figure) · Bitstamp — BTC \$76,581.44 (Sept 2) vs. \$78,038.78 (Sept 1).
- September 1 light daily catch-up:** general web search for DTCC/Nasdaq/GENIUS Act/SEC/rwa.xyz-sourced RWA news dated Aug 31-Sept 1 — returned only stale/recycled market-size summaries (Q1 2026 or the already Aug 9 rwa.xyz snapshot), no fresh dated catalyst · Bitstamp — BTC \$78,038.78 (Sept 1) vs. \$78,447.16 (Aug 31).
- August 31 light daily catch-up:** gncrypto.news, Yellow research (both citing an Aug 9, 2026 rwa.xyz snapshot: total tokenized RWA \$38.17B, tokenized Treasuries \$16.21B) — consistent with the Aug 28 pull already priced independently re-pulled this cycle · general web search for DTCC/Nasdaq/GENIUS Act/SEC RWA news dated Aug 29-31 — no new dated development found · Bitstamp — BTC \$78,447.16 (Aug 31) vs. \$77,666.16 (Aug 29).
- August 29 full weekly refresh:** coinbase.com — "Coinbase establishes its tokenization hub in Abu Dhabi" plus its tokenized-stocks product page (Aug 24, 2026, primary) — NVDAc/METAc/AAPLc/GOOGLc launch on Bala Alpaca custody, ADGM FSRA permission received Aug 11 · 9+ independent outlets (all dated Aug 24-25, 2026) corroborating the Coinbase launch and its non-US-only eligibility · Standard Chartered / Anchorpoint Finance coverage (Aug 24-25, 2026) — HKDAP stablecoin launch citing RWA settlement as a use case, logged as context · sec.gov — direct check for RWA-tokenization rulemaking, no-action letters, or press releases dated Aug 2026: none found; tokenized-equity exemption meeting remains canceled, no new date · app.rwa.xyz — repeated direct-pull attempts, Aug 29, 2026: **HTTP 403, access blocked**, data-quality flag logged · general web search for DTCC/Nasdaq target-date changes, Aug 22-29, 2026 — none found, both targets unchanged · general web search corroborating the carried-forward Aug 28 rwa.xyz figures — a Stobox weekly digest (~\$38.4B, Aug 19-21, 2026) and a separate source citing \$38.39B as of Aug 21 — secondary, not independent primary re-confirmation · general web search, RWA-rail risk check Aug 22-29 — Term Finance governance exploit (~\$8.5M, Aug 15, 2026) and Arrakis V1/G-UNI Uniswap V3 spot-manipulation drain (Aug 23) identified and assessed as ordinary DeFi incidents, not applicable to this pillar · press-release-syndication coverage of Ondo Stocks crossing \$1.01B TVL, dated Aug 15, 2026 (found this cycle, logged as a missed-earlier fact, not new evidence).
- August 28 daily catch-up draft (never delivered, superseded — figures carried forward this cycle only due to the Aug 29 rwa.xyz access failure):** app.rwa.xyz — direct pull, Aug 28, 2026 (primary): total RWA distributed value \$38.69B (+3.04% 30d); tokenized US Treasuries \$16.00B (-0.93% 30d) · general web search for DTCC/Nasdaq/GENIUS Act rulemaking news dated Aug 23-28 — no new dated development found beyond the committed 22 baseline.
- August 22 draft2 full weekly refresh (this cycle, second session same day):** sec.gov — no-action letter, Franklin Templeton, dated 2026-08-12 (../franklin-templeton-081226), direct primary check confirming custody out from Rule 17f-2 for tokenized BENJI (Stellar) · The Block, Tech Times, ETHNews, coinpaprika, BigGo Finance, UEX, and KuCoin (all Aug 12-13, 2026) — corroborating coverage of the Franklin Templeton no-action letter · Bloomberg (Aug 20, 2026) — Franklin Templeton's plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, possibly starting Q4 2026 · Ledger Insights, CryptoTimes, and CoinReporter (Aug 13-15, 2026) plus Bloomberg/Yahoo-sourced coverage — SEC's planned tokenized-equity "innovation exemption" meeting (~Aug 14) canceled/postponed, citing White House concerns, SIFMA opposition, and CLARITY Act friction (cited reasons not independently corroborated) · app.rwa.xyz — direct pull, Aug 22, 2026 draft2 (primary): total RWA distributed value \$38.32B (+2.30% 30d); tokenized US Treasuries \$15.98B (-0.39% 30d, 87 products) — first stock negative 30-day reading tracked · [Federal Register](https://www.federalregister.gov) / [home.treasury.gov](https://www.treasury.gov) — Treasury's GENIUS Act Section 3 NPRM published Aug 18, 2026 (comment deadline Oct 19, 2026) · crypto.news and cryptonomist (Aug 21, 2026) — Uniswap's tokenized-stock volume on Robinhood Chain crosses \$1B cumulative; CEO Tenev's Aug 18 call for a US framework.
- August 22 primary-source research pass (earlier same-day catch-up draft):** app.rwa.xyz — direct pull, Aug 22, 2026 (primary): total RWA distributed value \$38.32B (+2.30% 30d); tokenized Treasuries ~\$16.15-16.21B — ~87 products, confirmed distinct from the total (leaderboard: USYC ~\$3.0B, BUIDL ~\$2.6-2.68B, USDY ~\$2.14-2.2B, iBENJI ~\$1.7-1.72B) — superseded by the deeper draft2 Treasuries pull above (\$15.98B, -0.39%/30d) · [sec.gov](https://www.federalregister.gov) — press release 2026-76, "Regulation Crypto Assets" proposal (Aug 18-19, 2026, primary), corroborated by Euronews, CoinDesk, JD Supra, and Crowdfund Insider · [Federal Register](https://www.federalregister.gov) — joint FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Program (CIP) proposed rulemaking (docket nos. FinCEN-2026-0101 / OCC-2026-0331, published Jun 22, 2026, comment period closed on schedule Aug 21, 2026), confirmed by Freshfields and Smith & Cromwell legal memos and Forkast · CoinDesk (Aug 13, 2026) — SEC reported set to delay the tokenized-stock "innovation exemption" track amid Wall Street/White House pushback — superseded by the draft2 finding that the meeting was outright canceled.
- August 20 draft (never delivered, superseded by the Aug 22 pass above):** app.rwa.xyz — direct pull, Aug 20, 2026: total RWA distributed value \$38.07B (+1.28% 30d), plus a conflicting "\$13.7B Treasuries" subtotal flagging a likely partial/mis-scraped view (not adopted, vs. the verified \$16.21B Treasuries figure already in this report; not reconfirmed by the Aug 22 pull) · AI-summarized web search result citing \$38.27B as of Aug 19 (+2.44%/30d) noted as a soft/unverified figure ([The Block](https://theblock.co), crypto.news, [Benzinga](https://benzinga.com), and Blockzeit — SEC Chair Atkins/Trump/CFTC Chair Selig/NYSE/CME/DTCC tokenization meeting and CFTC Innovation Advisory Committee (Aug 17, 2026) · crypto.news explicitly notes no final framework, eligibility criteria, or implementation date announced).
- August 16 light daily check:** general web search for RWA/tokenization news dated Aug 15-16 — returned only a recirculating \$33.5B "liquid on-chain value" market-size figure from a different data provider (CryptoRank Blockchain Reporter re-syndication) that doesn't reconcile with rwa.xyz's own tracked numbers; no fresh dated catalyst found.
- August 14 light daily check:** Bitcoin News — "Tokenized RWA Sector Hits \$38B as Treasury Debt Dominates Market" · gncrypto.news — "Tokenized RWAs Reach \$38.17B; Treasuries Lead \$16.21B" · Yellow — "RWA Tokenization Tripled But 80% Of Value Sits In Just One Asset Class" — all reconfirm the same Aug 9 rwa.xyz pull with added product-level detail (87 Treasury products, 63,010 addresses, USYC/BUIDL/USDY/BENJI leaderboard); no new catalyst found.
- August 13 light daily check:** CryptoRank — "RWA Tokenization News Today" · Blockchain Reporter — "\$33.5B liquid on-chain value, tripling in a year" · Yahoo Finance — "Reality of RWA Tokenization in 2026" — all track the \$33.5B figure is a different provider's methodology and doesn't reconcile with rwa.xyz's own tracked \$38.17B distributed-value number already in this report, so it's not adopted. No other fresh dated catalyst found.
- August 11 light daily check:** general web search for RWA/tokenization news dated Aug 10-11 — returned only generic 2026 market-sizing and explainer pieces (Yahoo Finance, Finextra, crypto.news, MetaMask, Investopedia, Blocklr), no fresh dated catalyst.
- August 10 light daily check:** Bitcoin News, CoinSpectator — "Tokenized RWA Sector Hits \$38B" (dated Aug 9, re-checked today, confirmed already priced in) · general web search for RWA/tokenization news dated Aug 9-10 otherwise returned only generic year-in-review/market-overview pieces, no fresh dated catalyst.
- August 9 light daily check:** general web search for RWA/tokenization news dated Aug 8-9 — returned only generic year-in-review/market-overview pieces (Yahoo Finance, Investax, BingX, crypto.news, MetaMask), no fresh dated catalyst.
- August 8 full-weekly additions:** app.rwa.xyz — direct pull, Aug 8, 2026: tokenized Treasuries \$16.21B (87 products, 62,997 holders, 7d yield 3.29%), total RWA distributed value \$38.24B (new ATH), Represented Asset Value \$373.55B (-1.70% 30d), stablecoin total ~\$296-312B · Cointelegraph, DailyCoin, crypto.news, Coinpaprika, Yahoo Finance, Bitcoin.com — Central Bank of Ireland clears Aviva Investors' XRP Ledger fund (Jul 29) · Ripple.com release + FOW, Cryptonomist, Fintech.global, CryptoNews, Yahoo Finance — Ripple takes equity stakes in Zilo and Licuido (Aug 3) · KuCoin — "Tokenized Treasuries Dip to \$34.67 Billion" (the mislabeled headline, correct this cycle).
- August 7 additions:** CryptoRank — "RWA Tokenization News Today: Market Size & Trends 2026" (aggregator roundup, no new dated catalyst) · CoinGecko — "RWA Report 2026" (background) · checked and found nothing beyond the Aug 6 BlackRock catalyst.
- August 6 additions:** CoinDesk — BlackRock expands tokenized cash with BSTBL/BSRV (Aug 3), corroborated by KuCoin, PYMNTS, Cointribune, BitcoinWorld, Solana Compass, and CoinPaprika · crypto.news — corroborated summary (Aug 3).
- July 30 additions (prior full weekly refresh):** app.rwa.xyz/treasuries — direct pull, Jul 30, 2026: tokenized Treasuries \$16.18B, BUIDL \$2.64B, USYC \$3.01B, USDY \$2.15B, iBENJI \$1.76B, JTRSY \$881M · app.rwa.xyz — direct pull, Jul 30: Distributed Value ~\$36.93B, Represented Value ~\$370.55B · app.rwa.xyz/stablecoins — direct pull, Jul 30: total ~\$296.86B, USDT \$188.95B, USDC \$72.14B · KuCoin — the mislabeled "\$34.67B tokenized Treasuries" headline (its own body text admits "tokenized U.S. treasuries lead at \$15.86 billion," confirming the conflation) · CoinDesk — Robinhood Chain's RWA jump fivefold (Jul 25), corroborated by CryptoTimes, Cryptopolitan, Investopedia, Crowdfund Insider · CoinDesk — Securitize Capital's SEC investment-adviser registration (Jul 27).
- July 13 additions — official/primary:** Circle — press release, final OCC approval for a national trust bank / First National Digital Currency Bank, N.A. (Jul 10, 2026), corroborated by American Banker, Banking Dive, and BusinessWire · Swift — press release, blockchain ledger live with 17 banks across 6 continents on Chainlink CCIP (Jul 9, 2026), corroborated by CoinDesk and Bloomberg · DTCC — press release confirming Stellar as first public blockchain in DTC's multi-chain tokenization strategy, targeting H1 2027 (May 27, 2026), corroborated by CoinDesk (May 31, 2026).
- July 13 additions — live data:** RWA.xyz — tokenized Treasuries \$15.52B (+4.01% 30d); leaderboard USYC \$3.00B / BUIDL \$2.869B / USDY \$2.159B / iBENJI \$1.625B / JTRSY \$881.8M / WGTGXX \$764.5M / BENJI \$760.9M / \$695.3M; 84 assets, 62,843 holders, 7d avg yield 3.44% (live pull, Jul 13) · RWA.xyz — Distributed Value \$34.19B (+3.90% 30d) vs. Represented Value \$374.94B (+9.57% 30d); total stablecoin value \$300.54B (+0.94% 30d) (live pull, Jul 13) · RWA.xyz — private credit \$6.93B distributed (+2.84% 30d); Maple \$1.4B / STOKR \$1.3B / Centrifuge \$746M / Realiz \$500M / Securitize \$488M (+0.28% 30d — no evidence of the prior +106.4% spike) (Jul 13).
- July 13 additions — reporting:** CoinDesk — stablecoin market cap down ~\$10B since May peak, largest decline since 2023 (Jul 12, 2026), corroborated by PYMNTS and Cryptonomist · CoinDesk — stablecoin transaction volume record \$1.79T in June 2026, USDC ~70% share, overtakes USDT in volume (Jul 6, 2026) · Cryptonomist and CryptoSlate — Open USD (OUSD) coalition credibility questions: Samsung/Dunamu deny formal role (Jul 7) · Upbit denies issuance involvement (Jul 4) (Jul 3-7, 2026) · Yahoo Finance — RWA reality-check: only ~3% of a broader \$60B/7,000+ tokenized-product universe accessible to US retail (~Jul 12, 2026) · Crédit Agricole / CAI · EURXT launch release: Ethereum ERC-20, MICA-compliant, 20M initial supply, first subscription into a tokenized Amundi money-market fund (Jul 1, 2026) · Chapman & Cutler — GENIUS Act rulemaking tracker, cross-checked against agency sites (Jul 13, 2026; zero of ~10 rules final, 5 days to deadline) · SEC — Form 425 Securitize business-combination filings, NYSE listing effective July 2, 2026 · CoinGecko — ONDO price feed (Jul 13, 2026).

- **Official records & rules (carried, still load-bearing):** Federal Register — Treasury "substantially similar" state-regime NPRM (Apr 3, comments closed Jun 2) · Federal Register — FDIC GENIUS NPRM (Apr 10, 2026) · US — FinCEN/OFAC illicit-finance NPRM (Apr 8, 2026) · OCC — GENIUS NPRM (\$5M minimum capital / 10% same-day liquidity tier); OCC Bulletin 2026-7, joint with Fed/FDIC, "Capital Treatment of Tokenized Securities" (Mar 2026) — a separate matter from GENIUS rulemaking) · SEC — GENIUS Act signed July 18, 2025 (PL 119-27) · SEC approves Nasdaq tokenized-securities trading (Mar 18, 2026) · Nasdaq IR — equity-token design with Payward/Services "operational H1 2027" (Mar 9, 2026) · Federal Reserve — FOMC 2026 calendar (Jul 29, Sep 16, Oct 28, Dec 9).
- **The reporting (carried from July 8–11, still load-bearing):** CCN + Yahoo Finance + Crypto Briefing — DTCC production pilot July 2026, full launch Oct 2026 (announced May 4, 2026) · The Crypto Times — Ondo 24/7 tokenized-stock liquidity on Solana (Jul 9) — since extended by Ondo's Broadridge proxy-voting partnership (Jul 2) and "Ondo Perps" launch · Motley Fool + BitPinas — Open USD (OUSD) 140+-institution coalition, orig launch coverage (late Jun/early Jul 2026) · Stablecoin Insider — six agencies vs the July 18 deadline (mid-Jun 2026) · Davis Polk / Harvard Law — Dodd-Frank progress reports (60–75% of deadlines missed) · Global Finance — Nasdaq edges toward tokenized trading; 23/5 by Dec 2026 earliest · CryptoDaily — NYLIM launches tokenized high-yield HYB with Centrifuge (Jun 30, 2026) · Cryptonews — JPMorgan/Citi/BofA/Wells Fargo Tokenized D Network via The Clearing House (H1 2027) · TNW — JPMorgan JLTXX tokenized-MMF filing and the reserve-MMF wave (May 12) · Unchained — BlackRock files BSTBL & BRSRV (May 8) — *superseded: see the Aug 6 addit above for the actual Aug 3 launch.*
- **Forecasts (carried from June, still load-bearing):** BCG × Ripple — \$9.4T by 2030 / \$18.9T by 2033 (Apr 7, 2025) · BIS WP 1270 — stablecoin inflows lower T-bill yields; outflows a fire-sale "lower bound".
- **The Prize (prices):** CoinGecko — ONDO \$0.3291 (Jul 13, 2026; −0.90% 24h, +0.60% 7d; mkt cap ~\$1.6B; ATH \$2.14 Dec 16, 2024) — market price, not an institutional estimate.
- **Reference (BTC pipeline reading):** Bitstamp — BTC \$76,440.74 (Sept 17, 2026) vs. \$76,581.44 (Sept 2, 2026, the last dated pipeline reading previously in this report).
