Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 5, 2026 (catch-up covering the full week since the July 30 full refresh)

*This report was not regenerated for the Aug 1-4 light daily touches even though the underlying scores changed each of those days; this is a catch-up pass covering the whole July 31 → August 5 arc in one narrative. Quant pillar recomputed on today's price. The pillar actually in motion this week was Iran War Risk, and it moved both ways: Aug 1 nudged up on a reported quiet night with no new US strikes and a Saudi-led Multinational Maritime Defense Alliance drawing 14-country backing; Aug 2 gave back part of that gain on multi-source-corroborated fresh attacks on Hormuz shipping (a Qatari LNG tanker and a separate vessel disabled); Aug 3 held flat; Aug 4 nudged up again after Trump canceled a planned joint US-Israeli strike on Iranian energy infrastructure following reports "the perimeters of a deal" were agreed; Aug 5 moved further on the first public disclosure of concrete interim Strait-of-Hormuz deal terms (a 60-day dual-lane transit mechanism, no tolls, mines cleared from the median lane within 30 days) — net for the week: 16/25/37/55/77 → 22/29/40/56/77, still short of a signed agreement (a CNN-cited Gulf official put the odds at only 50-50 as of Aug 5) and still punctuated by active attacks (a bulker was struck and blacked out Aug 4). CLARITY Act, Tokenization, and Fed & Macro all held flat all week — daily monitoring found no cloture motion filed for CLARITY (Aug 5 was the filing deadline for a possible Aug 7 procedural vote, with the Senate's actual recess confirmed to start Aug 10, not Aug 7 as earlier notes assumed), no new dated Tokenization catalyst, and no Fed data release since July 30's H.4.1 (the next H.4.1 and jobless-claims print are both due Aug 6). Full score lineage (June committed → every draft through August 5) preserved in every report. **The August 5 scores and the equal-weight model have been reviewed and stamped committed by Alex.***

THE FINAL NUMBER · AUGUST 5, 2026 · EQUAL-WEIGHT MODEL

+0.54

Mild Bull overall, time-arbitraged — back over the Neutral/Mild-Bull line after a week hovering just under it.

Equal-weight mean of the five window signals (−10 max bear ... +10 max bull). Horizon-weighted variant: **+1.11**. The structure underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm

is priced, the recovery isn't" signal, and this week the near-end storm eased slightly (up from July 31's +0.47 / +1.06) as Iran War Risk's cumulative de-escalation signals outweighed its own mid-week reversal.
The whole thesis in five rows, on the August 5 committed set (a week of light daily touches since the July 30 full refresh). Signal range -10 (max bear) to +10 (max bull).

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH			
Compiled August 5, 2026 · BTC \$64,661.55 (Bitstamp, last completed daily close, August 5, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 5 committed set) · Not Financial Advice			
1 month	WT) -1.59	MASTER -1.73	Bear — Iran remains the heaviest single drag even after a week of net de-escalation
3 months	-1.10	-1.18	Mild Bear — the September FOMC still sits inside this window at majority-hike-priced odds
6 months	+0.17	+0.12	Neutral — CLARITY and Tokenization still carry this window; Iran and Fed still drag harder
1 year	+2.09	+2.05	Bull — all five pillars still positive; the thesis window, essentially unchanged
3 years	+3.11	+3.11	Strong Bull — law + adoption + cycle + value, unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: |s| < 0.5 Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. "Jul 31 Master" is the prior real report update (the last day reports/current was actually regenerated before this catch-up), recomputed from the Jul 31 score set for exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.54 = the equal-weight mean of the five MASTER signals above ((-1.59 - 1.10 + 0.17 + 2.09 + 3.11) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.11**. Both still read **Mild Bull**, up from July 31's +0.47 / +1.06 — and back over the Neutral/Mild-Bull line the interim daily figures (0.45-0.48) had been sitting just under. What moved: the near-term windows firmed (1mo -1.73 → -1.59, 3mo -1.18 → -1.10), driven almost entirely by Iran War Risk's cumulative front-end improvement over five days of daily monitoring (P 16/25/37/55/77 → 22/29/40/56/77) — a real up-down-up week (a quiet night and a Saudi-led naval coalition, reversed in part by fresh Hormuz tanker attacks, then a canceled joint strike and finally the first public terms of a 60-day interim Hormuz deal) that netted out to genuine, if still unsigned, de-escalation. CLARITY Act, Tokenization, and Fed & Macro all held their July 30/31 levels across the whole week — no material corroborated change turned up in daily checks. Bitcoin TA firmed slightly too (price +1.7% since July 31). The 1-year window ticked up only fractionally (+2.05 → +2.09) and 3-year didn't move (+3.11 → +3.11) — this remains a near-term chop, structurally bullish read, with this week's news flow modestly reducing the near-term storm rather than adding to it.

The Full Pillar Matrix

Every pillar's signal on every window — August 5 committed scores (each report shows the full June → ... → August 5 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	-1.63	-0.41	+1.09	+4.61	+6.38	Held flat all week (no cloture motion filed)
Iran War Risk (20% · 8)	-2.69	-2.18	-1.12	+0.62	+2.38	In motion all week — net improved (still unsigned)
Tokenization RWA (20% · 8)	+0.00	+0.99	+2.04	+3.00	+3.92	Held flat all week (no new catalyst)
Fed & Macro (20% · 8)	-2.18	-2.31	-0.64	+0.48	+1.25	Held flat all week (next release Aug 6)
Bitcoin TA — quant (20% · 8)	-1.44	-1.57	-0.53	+1.73	+1.60	Aug 5 computed
MASTER — mean of the five	-1.59	-1.10	+0.17	+2.09	+3.11	equal-wt

P lineage (June → Jul 8 → 10 → 11 → 12 → 13 → 17 → 18 → 24 → 25 → 29 → 30 → 31 → Aug 1 → 2 → 3 → 4 → 5) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → 50/54/60/82/92 → 52/55/61/82/92 → 52/55/61/82/92 (held) → 50/54/61/82/92 → 48/52/61/82/92 → 44/48/59/82/92 → 50/54/62/83/92 → 42/50/61/83/92 → 46/54/62/83/92 → 40/47/58/82/92 → 38/47/58/82/92 → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → 38/47/58/82/92 (held) → **38/47/58/82/92** (held) · Iran 50/55/62/75/85 → 40/47/55/70/83 → 42/49/56/70/83 → 44/50/57/70/83 → 44/50/57/70/83 (held) → 38/45/53/68/83 → 32/39/48/65/82 → 24/33/44/60/79 → 18/27/38/56/77 → 20/29/40/57/78 → 25/30/40/57/78 → 16/25/37/55/77 → 16/25/37/55/77 (held) → 19/26/37/55/77 → 15/23/37/55/77 → 15/23/37/55/77 (held) → 19/27/39/56/77 → **22/29/40/56/77** · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → 53/58/64/74/85 → 54/59/65/74/85 → 54/59/65/74/85 (held) → 54/59/65/74/85 (held) → 54/59/65/74/85 (held) → 50/56/65/74/85 → 48/54/65/74/85 → 49/56/65/74/85 → 48/54/65/74/85 → 50/57/65/74/85 → 50/57/65/74/85 (held) → 50/57/65/74/85 (held) → 50/57/65/74/85 (held) → 50/57/65/74/85 (held) → **50/57/65/74/85** (held) · Fed 38/40/46/54/61 → 35/36/42/52/61 → 34/36/44/53/61 → 34/36/44/53/61 (held) → 34/36/44/53/61 (held) → 34/36/44/53/61 (held) → 38/40/47/55/62 → 42/40/47/55/62 → 45/44/49/55/62 → 36/35/45/54/62 → 39/38/46/54/62 → 34/33/45/54/62 → 34/33/45/54/62 (held) → 34/33/45/54/62 (held) → 34/33/45/54/62 (held) → 34/33/45/54/62 (held) → 34/33/45/54/62 (held) → **34/33/45/54/62** (held) · Bitcoin TA (computed each run) 37/37/46/67/70 → ... → 40/37/46/67/70 (Jul 18) → 40/36/43/68/70 (Jul 25) → 39/37/46/67/70 (Jul 30) → 37/36/45/67/70 (Jul 31) → 37/34/44/67/71 (Aug 1) → 37/35/44/67/71 (Aug 2) → 37/34/44/67/71 (Aug 3) → 37/35/44/67/70 (Aug 4) → **38/36/44/68/70** (Aug 5). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five.

The Story, Window by Window

What the blend is saying on August 5, 2026 (comparisons below are vs. the July 31 baseline — the last day this report was actually regenerated before this catch-up)

- 1 month — Bear (−1.59, was −1.73).** Iran War Risk firmed the most (−2.69, was −3.26) on the week's net de-escalation — Trump's canceled joint strike and the first public Hormuz-deal terms outweighed the mid-week reversal from fresh tanker attacks. Bitcoin TA firmed slightly (−1.44, was −1.56) on the price recovery. CLARITY (−1.63, unchanged) and Fed & Macro (−2.18, unchanged) both held — no material corroborated change in either this week. Tokenization was flat (+0.00, unchanged).
- 3 months — Mild Bear (−1.10, was −1.18).** Iran's improvement (−2.18, was −2.60) is again the whole story here; the September FOMC still sits squarely inside this window at majority-hike-priced odds per the Fed pillar (−2.31, unchanged); CLARITY (−0.41, unchanged) and Tokenization (+0.99, unchanged) both held; the quant tape held essentially flat (−1.57, was −1.57).

- **6 months — Neutral (+0.17, was +0.12).** Tokenization remains the strongest pillar here (+2.04, unchanged); CLARITY still holds constructive (+1.09, unchanged); Iran's drag eased (−1.12, was −1.46); the Fed drag is unchanged at this horizon (−0.64); the tape's drag widened marginally (−0.53, was −0.44). Historical average cycle bottom (~Aug 31, cycle month 27.53) sits inside this window.
- **1 year — Bull (+2.09, was +2.05).** All five pillars still positive: CLARITY +4.61 (unchanged), Tokenization +3.00 (unchanged), Bitcoin TA +1.73 (was +1.63), Iran +0.62 (was +0.52, up on the week's de-escalation), Fed +0.48 (unchanged). Price sits 53% below power-law fair value (\$136,886). The window the whole thesis is built around, essentially unchanged.
- **3 years — Strong Bull (+3.11, was +3.11).** Every pillar positive and the structural case compounds: CLARITY +6.38 (unchanged), Tokenization +3.92 (unchanged), Iran +2.38 (unchanged), Bitcoin TA +1.60 (unchanged), Fed +1.25 (unchanged). A single week of Iran headlines, by design, doesn't move this window.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) still trace a very similar path: P 34/33/45/54/62 vs 38/36/44/68/70 — within 5 points at 1 and 3 months, and just 1 point apart at 6 months (45 vs 44). Two methods that share no inputs keep landing on "soft near term, still-questionable half-year." Iran, despite this week's improvement, remains the worst 1-month signal in the set (−2.69) — genuine de-escalation news still hasn't caught up to the Fed's own near-term drag.

THE REAL DISAGREEMENT

Near-term: Tokenization is the only pillar reading non-negative near-term (P 50, neutral); CLARITY sits well below a coin flip (P 38) on the confirmed no-cloture-filed blockage; the Fed and the tape both lean bearish (P 34, 38); Iran remains the clearest risk-off vote even after this week's improvement (P 22). The master resolves it honestly: Bear now, and the one non-negative pillar gets paid in the windows where its evidence is strongest.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.60 — still roughly 2.2× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

Fired since July 31 are already IN the August 5 committed scores. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
Fired Aug 1	First quiet night with no new US strikes on Iran; Brent fell ~2% on the pause; Saudi-led Multinational Maritime Defense Alliance drew 14-country backing	Iran 1mo/3mo nudged up — already IN this committed set
Fired Aug 1-2	Multi-source-corroborated fresh attacks on Hormuz shipping (a Qatari LNG tanker struck transiting; a separate vessel disabled off Musandam) reversed part of the Aug 1 gain	Iran 1mo/3mo cut back partially — already IN this committed set

Fired Aug 4	Trump canceled a planned joint US-Israeli strike on Iranian energy infrastructure after reports "the perimeters of a deal" were agreed; Iran still denies direct US talks	Iran 1mo/3mo/6mo/12mo nudged up — already IN this committed set
Fired Aug 4	A bulker was struck by a projectile and suffered a full blackout in the Strait — active attacks continued even as the deal text emerged	Kept the Aug 5 Iran move small and short-horizon-only
Fired Aug 5	First public terms of a 60-day interim Hormuz deal (dual shipping lanes, no tolls, mines cleared from the median lane in 30 days); a Gulf official cited by CNN puts odds of signing by Friday at 50-50	Iran 1mo/3mo/6mo nudged up further — already IN this committed set, still unsigned
Checked daily Aug 1-5, no motion filed	Senate's own floor schedule confirms CLARITY was not brought up for cloture; Aug 5 was the filing deadline for a possible Aug 7 procedural vote before the Senate's actual Aug 10 recess	CLARITY held flat all week
Corrected this week	Multiple sources confirm the Senate's formal August recess begins Aug 10, not Aug 7 as earlier notes in this file assumed — Aug 7 is merely the last-realistic-floor-time framing used in CLARITY coverage	Factual correction only, not score-moving
Checked daily Aug 1-5, no new catalyst	Tokenized Treasuries held ~\$15.86B, essentially flat vs. the July 30 corrected baseline (\$16.18B)	Tokenization held flat all week
Unreconciled	A TradingEconomics-sourced 218K jobless-claims figure (week ended Jul 26) surfaced but conflicts with the DOL-primary 197K/week-ended-Jul-25 figure already baked in — could not be traced to a primary DOL release	Not used to move Fed P this cycle, per the sufficiency rule
Aug 6	Next Fed H.4.1 balance-sheet release and DOL jobless-claims print — both due tomorrow	Fed & Macro's real near-term re-rating trigger
Aug 5-7	CLARITY's last realistic pre-recess floor window (cloture filing deadline Aug 5, possible procedural vote Aug 7)	CLARITY: a filed cloture motion = up; the window closing with nothing filed = down
September	Next FOMC (with SEP/dot plot), Sept 15-16; first realistic post-recess CLARITY floor-time window	Both pillars' real re-rating events — watch closely
~Aug 16	Islamabad Memorandum 60-day window expires	Iran: deal/extension = up hard; formal collapse = down hard
~Aug 31	Historical average cycle-bottom month (cycle month 27.53 currently) passes	TA: higher low after this + improving momentum = basing confirmed
Power-law fair value \$136,886	BTC \$64,661.55 sits 53% below fair value	1yr/3yr windows: the gap the structural bull case is priced against
Ongoing	Oman remains the sole channel for US-Iran contact; the interim Hormuz deal is drafted but not yet signed	The thing to watch for the next real Iran re-rate, up or down

The master flip line, re-leveled: a confirmed new US combat death, a resumption of US strikes on Iran proper, or a sustained Brent close above \$100 (Iran); a September FOMC hike landing into still-historically-low claims (Fed); or the Senate returning from recess with no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just this week's re-rate. A signed, durable Hormuz reopening would be the equivalent upside flip for Iran. The TA flip line (weekly close under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WT)	CALL · STILL POSITIVE?
— drop CLARITY Act	+0.17	Neutral · barely, yes
— drop Iran War Risk	+0.82	Mild Bull · yes
— drop Tokenization RWA	+0.17	Neutral · barely, yes
— drop Fed & Macro	+0.84	Mild Bull · yes
— drop Bitcoin TA	+0.68	Mild Bull · yes
all five in (headline)	+0.54	Mild Bull

Every leave-one-out final number stays **positive** (+0.17 to +0.84) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-negative near-term pillars) still round down to **Neutral** rather than Mild Bull, essentially unchanged from last week's thinner-than-usual robustness result. The horizon-weighted final (+1.11) is more robust and stays Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — this week's Iran improvement widened Iran's own leave-one-out margin (+0.80 → +0.82) but didn't change which two pillars are load-bearing for the headline call. This robustness check exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

✓ **COMMITTED — AUGUST 5, 2026 (CATCH-UP COVERING JUL 31 → AUG 5) · STAMPED BY ALEX**

MASTER: -1.59 / -1.10 / +0.17 / +2.09 / +3.11 · THE FINAL NUMBER: +0.54 (Mild Bull, time-arbitraged)

This report caught up five days of light daily research that scores.json had captured but reports/current hadn't republished: the quant pillar was recomputed on today's price; Iran War Risk moved both ways across the week — up on a quiet night and a Saudi-led naval coalition (Aug 1), back down on fresh Hormuz tanker attacks (Aug 2), flat (Aug 3), up on Trump canceling a planned joint strike (Aug 4), and up again on the first public terms of a 60-day interim Hormuz deal (Aug 5) — netting to a real, if still unsigned, improvement (16/25/37/55/77 → 22/29/40/56/77); CLARITY Act, Tokenization, and Fed & Macro all held their July 30/31 levels the entire week, with daily checks finding no cloture motion filed, no new tokenization catalyst, and no Fed data release beyond what was already priced in. The full lineage (June committed → every draft through August 5) is printed in every report. **Signed off: (1)** the five P-paths, **(2)** the equal-weight model and the final-number window weighting. The robustness check remains a standing yellow flag, not a rubber stamp: dropping CLARITY or Tokenization still rounds the call down to Neutral — the headline conclusion continues to lean more heavily on those two pillars than on Iran, Fed, or TA. The near-term calendar is dense: Fed H.4.1 and jobless claims land tomorrow (Aug 6), CLARITY's last pre-recess floor window runs Aug 5-7, and each pillar's trigger table says exactly what to re-rate when those land.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that the "Mild Bull" headline still leans on two of the five pillars more than the other three.

Sources

Each pillar report carries its full, freshly-verified source list for this week's daily research. The master adds the engine and headline references for this August 5 catch-up.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Iran_War / Tokenization_RWA / Fed_Macro Pillar Reports (daily re-research Jul 31 → Aug 5) · CoinPicks_Bitcoin_TA_Quant_Pillar_Report (computed Aug 5).
- **The engine:** engine/blend.py → data/master_blend.json (score set 2026-08-05_draft in config/scores.json, full lineage back to 2026-06-19_committed; final-number window weights in config/settings.json "final_weights") · engine/mapping.py → data/pillar_scores.json (Bitstamp data through Aug 5, 2026).
- **Headline checks (Jul 31-Aug 5):** full citations for the Iran War Risk week (the Aug 1 quiet night and Saudi-led coalition, the Aug 1-2 Hormuz tanker attacks, the Aug 4 canceled joint strike, and the Aug 5 public Hormuz-deal terms), the CLARITY Act no-cloture-filed confirmation and the Aug 7-vs-Aug 10 recess-date correction, and the Tokenization/Fed daily-monitoring checks are carried in full in each respective pillar report's own source list — not duplicated here to avoid stale or mismatched links in the master.
- **Price:** Bitstamp BTC/USD daily \$64,661.55 (last completed daily close, Aug 5, 2026); cycle low \$58,526 close (Jun 30); ATH \$124,728 close (Oct 6, 2025); power-law fair value \$136,886 (BTC 53% below fair); cross-checked against Coinbase.
