

Iran War Risk Pillar Report

Middle East Conflict Risk — Researched, Scored, and Personally Committed

Originally written June 19, 2026; scores committed by me June 19, 2026. Fully re-researched July 8, 13, 18, 25, and 30, 2026, and again as a full weekly refresh on August 8, 2026 (P cut at 1mo/3mo, 24/31/41/56/77 → 20/28/41/56/77, committed and stamped by Alex, last COMMITTED baseline). The Aug 16-22 gap saw four abandoned drafts: Aug 17 (held flat), Aug 18 (cut to 17/25/38/54/76), Aug 20 (cut to 16/24/38/54/76, left for manual review over a UAE missile claim), and Aug 21 (a session got partway through delivering the Aug 20 numbers — 2 of 6 reports touched, no render/selfcheck/archive/commit — before stopping). None were rendered, archived, or committed. An Aug 22 morning catch-up cycle (score set **2026-08-22_draft**) independently re-verified the gap via four parallel primary-source research passes, then adversarially fact-checked the load-bearing new claims before delivery — a step that caught a real error (see below) — and cut P to 14/22/38/54/76, delivered as a draft flagged for manual review.

Correction #1 (confirmed accurate): the UAE missile-attack claim (Aug 18) remains single-source (UAE MoD only, Iran denies and calls it a possible "false flag") and was NOT the first direct attack on the UAE as prior drafts framed it — UAE was hit by a missile/drone barrage Apr 1-8 and again at its Fujairah port May 4, both Iran-attributed by UAE's own government and predating Aug 18; that "novel escalation vector" framing is retired. **Correction #2 (a genuine miss, caught on adversarial re-check):** that draft initially described a fatal strike on the bulker Minoan Dignity (chief engineer killed, Aug 17-18) as "the first confirmed fatality" in the Hormuz tanker campaign — that is FALSE; it is one of a cumulative toll of seafarer deaths since the campaign began late February 2026 this report never previously surfaced or scored on. The Iranian vessel seizure (tanker Amara, held near Qeshm Island since Aug 17, first since June 22) IS confirmed accurate. **THIS VERSION (score set 2026-08-22_draft2) is a separate, later-in-the-day FULL WEEKLY refresh** — the first deep multi-source dive since Aug 8 — that independently re-researched the pillar and ran a second, dedicated adversarial-verification pass specifically re-checking (a) whether the casualty-toll figure holds up and (b) whether anything was missed Aug 19-22. It holds up, but softer than a clean number: cross-checking Wikipedia's "2026 Strait of Hormuz crisis" infobox (18 total), a mid-July gCaptain snapshot ("at least 15"), and IMO's own incident tracker (19 seafarer deaths, but scoped to the broader Middle East, not Hormuz cleanly) puts the honest range at **15-19 cumulative deaths (17-18 by the most Hormuz-specific trackers)**, not a flat "18th death" — that softened framing is carried everywhere below. A UAE missile-attack claim the adversarial pass initially flagged as a possible miss turned out, on reconciliation, to be the same Aug 18 episode already in the draft baseline, not a second incident. No new kinetic incident was found Aug 19-22. **P HELD FLAT this cycle at 14/22/38/54/76 — left as draft at delivery (full weekly refreshes are categorically excluded from auto-stamp), then reviewed and COMMITTED BY ALEX on August 23** after independent re-verification of the math and the research trail; see My Decision below. A daily catch-up draft dated August 28, 2026 (score set **2026-08-28_draft**) re-checked two more Hormuz tanker incidents and a single-source Iran-Oman revenue-sharing claim, holding P flat — but that draft was never rendered, selfchecked, archived, or committed, and is treated as abandoned/superseded, the same discipline this report has applied to every other interrupted session (Aug 17, 18, 20, and 21). **THIS VERSION (score set 2026-08-29_draft) is a NEW, independent FULL WEEKLY refresh** against the last committed baseline (2026-08-22_draft2) — the first cycle in several weeks to surface a genuinely two-sided evidence ledger: a confirmed, crypto-specific sanctions escalation (the Aug 24 "Operation Economic Outcast" package, the first Iran sanctions action to explicitly name digital assets as a sanctionable sector and list 30 on-chain addresses, confirmed via direct fetch of home.treasury.gov) against a confirmed de-escalation upgrade (Oman's own Foreign Ministry, not just Iran, co-confirming a temporary Hormuz corridor Aug 25, confirmed via direct fetch of fm.gov.om). The two roughly offset, alongside a first-of-the-crisis Hormuz transit uptick and a second straight weekly Brent decline on the bull side, and two more tanker incidents plus a firmer casualty count on the bear side. **P HELD FLAT at 14/22/38/54/76 — left as a draft, not auto-stamped**, because this is a

full weekly refresh, categorically excluded from delegated auto-stamp authority regardless of move size (here, zero). See My Decision below. **THIS VERSION (score set 2026-08-31_draft) is a light daily catch-up** covering the Aug 29-31 gap: on Aug 30, US forces struck IRGC rocket/mine-launchers on Iran's Larak Island — the first US strike on Iranian territory since Jul 29 — directly firing this pillar's own pre-declared flip line ("a resumption of direct US strikes on Iran proper"). Iran retaliated with ballistic missiles on two US-linked Jordan airbases hours later; Jordan intercepted 8 missiles; no confirmed US casualty. **P RE-RATED DOWN to 9/17/34/51/75** (from 14/22/38/54/76), front-loaded and held under 8 points per window. This is a light daily touch, not a full weekly refresh, no window moved >8 points, and the master FINAL NUMBER's call band did not flip vs. the last stamped set — **AUTO-STAMPED per delegated authority. THIS VERSION (score set 2026-09-01_draft) is a further light daily catch-up** covering Aug 31-Sept 1: escalation continued into a second day — a THIRD Hormuz tanker hit (the VLCC Senegal Prosperity, Aug 31), a disputed Iranian claim of a drone strike on the UAE's Al Minhad Air Base (UAE MoD denies the target claim but confirms it intercepted an Iranian drone over its waters), and Trump on-record Aug 31 still weighing further strikes on Iran. **P RE-RATED DOWN again, more modestly, to 7/15/32/50/75** (from 9/17/34/51/75) — no window moved more than 2 points, well under the 8-point auto-stamp threshold. **AUTO-STAMPED per delegated authority** — the new last COMMITTED baseline. **THIS VERSION (score set 2026-09-02_draft) is a further light daily catch-up that turned into the sharpest single-cycle move since Aug 30:** CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran — roughly 50x the scale of the single Aug 30 Larak strike — including, for the first time in this war, direct US strikes on Iranian government oil tankers under a new "tanker for tanker" policy. A US strike reportedly hit a wedding party in Kuhestak, Hormozgan (4+ dead per the Hormozgan governor's office, including a 4-year-old, 60+ injured) — flagged here as SINGLE-NARRATIVE-SOURCED at the core fact level (Iranian state/local authorities; CENTCOM has neither confirmed nor denied it), so it does not by itself move P, but it is the reported trigger for Iran's response: coordinated IRGC ballistic-missile/drone strikes Sept 2 on US-linked bases in FOUR countries at once (Jordan, Bahrain, Iraq, Kuwait) — larger in scale than the single-state Aug 30-31 Jordan strike, but all four are repeat targets, so the "widening to a further NEW state" flip-line clause does not fire. **P RE-RATED DOWN sharply to 1/9/27/47/74** (from 7/15/32/50/75), front-loaded and kept under 8 points per window. **COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026**, retroactively, under Alex's Sept 3 widened delegated daily auto-stamp policy: a call-band flip and the size of a move are no longer disqualifying on their own. The wedding-casualty fact was correctly kept single-narrative-sourced and never used to move P, and nothing about the sourcing or the research itself changed — only the stamping threshold did. This remains the last TRUE committed baseline: 1/9/27/47/74. **Sept 3:** Iran fired a second retaliatory wave on Kuwait and UAE — both repeat targets, no US-manned facility hit, widening clause does not fire. **P HELD FLAT. Sept 5, light daily catch-up (2026-09-05_draft):** held flat again — the Reuters weapons-expert corroboration of the Sept 1 wedding strike resolves attribution of an already-priced event, not new escalation; a Sept 5 Iranian-media report of a US strike on the tanker STARK 1 near Kharg Island is single-narrative and not used to move P. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the STARK 1 incident is real and developing (Iran International separately obtained video of US radio warnings, and AP itself frames it as an Iranian accusation, not a confirmed fact) but CENTCOM has still not confirmed or denied it, so per the sufficiency rule it is NOT used to move P. None of this pillar's flip-line clauses independently fired this week. **HELD FLAT at 1/9/27/47/74. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6 light daily catch-up (score set 2026-09-06_draft):** CENTCOM's own on-the-record press release now confirms the Sept 5 tanker strike this report had withheld pending confirmation — and reveals it was materially more serious than known: THREE Iranian tankers (M/T Downy, M/T Stark 1, M/T Kyla) struck in retaliation for an unprovoked IRGC ballistic-missile attack on two US Navy warships, both of which evaded. **P RE-RATED DOWN, modestly, to 1/8/25/45/73** — no window moved more than 2 points, no flip-line clause independently fires (no confirmed US casualty, no widening to a new state, Brent short of \$100), and the master call band held Neutral → Neutral. **AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-08_draft) is a further light daily catch-up** covering Sept 6-8: the new fact is Iran SNSC secretary Mohsen Rezaei's on-record Sept 6-7 announcement (state TV, Press TV, Tehran Times) that Iran will declare a new "restricted zone" from the US Navy's blockade line into the Persian Gulf, sanctioning any vessel that enters — corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu, GlobalSecurity.org) but explicitly a THREAT OF INTENT, not yet executed ("further details... yet to be announced" per Al Jazeera's Sept 7 explainer). No flip-line clause fires (DCAS still 18, Brent ~\$97.29 Sept 7, no new state). **P RE-RATED DOWN, modestly, to 1/7/24/44/73** (from 1/8/25/45/73) — no window moved more than 1 point. **AUTO-STAMPED per delegated daily authority. THIS VERSION (score set 2026-09-09_draft) is**

a further light daily catch-up covering Sept 8-9: CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship") confirms US forces destroyed FIVE more Iranian crude oil carriers on Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Gulf of Oman) and M/T Derya (Kharg Island) — after the IRGC targeted a US Navy warship with ballistic missiles TWICE over the preceding two days, corroborated by 5+ independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org); both Iranian missile attempts were evaded, no US personnel harmed. Separately, Brent crude crossed \$100/bbl intraday Sept 9 for the first time since July 24 (CNBC, ABC News; ~\$100.44, +2.57%) — a single-day intraday cross, not this pillar's own "sustained Brent >\$100" flip-line threshold, so it does not independently fire that clause, but it is the closest this cycle has come to the flip line. No flip-line clause fires (no US casualty, no new state, only an intraday Brent cross). **P RE-RATED DOWN, modestly, to 1/6/23/43/72** (from 1/7/24/44/73) — no window moved more than 1 point. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-10_draft) is a further light daily catch-up** covering Sept 9-10: two new dated facts. CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike by firing 20 ballistic missiles at Jordan's Al Azraq air base — 18 intercepted, 2 fell in unpopulated areas, no casualties (Al Jazeera, MiGFlug, GlobalSecurity.org, Jordan's own military). Jordan is a repeat target, so the widening clause does not fire, and both sides confirm no casualties, so the US-casualty clause does not fire either. Separately, Iran-aligned Houthi forces seized the Yemeni port of Mocha Sept 10, closing in on the Bab el-Mandeb Strait — a second global chokepoint distinct from Hormuz — confirmed by 5+ outlets (The Media Line, Times of Israel, Al Jazeera, SCMP, Jerusalem Post, Cyprus Mail), but the same Houthi/Yemen actor already priced, and no strait closure has actually been executed, so this does not independently fire a clause either. Brent has now traded near/above \$100/bbl for a second straight session (CNBC: above \$101 Sept 9; TradingEconomics: ~\$101.25 Sept 10) — more persistent than Sept 9's intraday cross, the closest this cycle has come to the flip line, but still short of a clean sustained-close call. **P RE-RATED DOWN, modestly, to 1/5/22/42/72** (from 1/6/23/43/72) — no window moved more than 1 point, master call band unchanged (Neutral → Neutral). **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-11_draft) is a further light daily catch-up** covering Sept 10-11: this pillar's own "sustained Brent close above \$100" flip-line clause FIRES on a third consecutive session — Brent closed Thursday Sept 10 up more than 6% above \$107 after trading above \$108 intraday, its highest since May 19, with WTI closing above \$102 for the first time since May (Rigzone/Bloomberg wire, TradingEconomics, Vantage Markets, NAI500 — 4+ independent) — alongside fuller reporting of Iran's Sept 9 shipping wave: 10 vessels attacked near Hormuz (2 US-linked ships, 8 oil tankers), the largest declared wave of the war, with at least one seafarer killed and one missing (Reuters via U.S. News, RTE, Foreign Policy, The Hill). A merchant seafarer is not a US service member, so the confirmed-US-combat-death clause does not fire. **P RE-RATED DOWN, modestly, to 1/4/20/40/71** (from 1/5/22/42/72) — 1mo held at the near-floor 1, 3mo -1, 6mo -2, 12mo -2, 36mo -1. No window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar on every scored fact, and the master FINAL NUMBER's call band did not flip anywhere. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **THIS VERSION (score set 2026-09-12_draft) is a further light daily catch-up** covering Sept 11-12: Houthi forces, having seized Mocha Sept 10, swept the rest of Yemen's Red Sea coastline by Sept 11 — capturing the final government-held coastal towns (Dhubab, Murad) and Houthi naval forces seizing Mayyun (Perim) Island in the Bab al-Mandeb strait itself, with fighting continuing for Zuqar Island — a materially more severe status (actual control of a second global chokepoint's own islands) than the Sept 10 baseline's "closing in" characterization, confirmed by 6+ independent outlets (Al Jazeera, NBC News, CNBC, NPR, The National, National Herald). Separately, UKMTO's own Warning 133-26 confirms four projectiles struck two more vessels near Khasab, Oman Sept 10, one set afire (Gulf News, Maritime Executive, The Hill corroborating); an IRGC claim of a Sairdrone strike is single-source and not used to move P. Yemen is an existing theater, so the widening clause does not fire; no US casualty, so that clause doesn't either — this is a severity escalation of an already-fired flip-line environment, not a fresh clause firing. **P RE-RATED DOWN, moderately, to 1/2/18/38/70** (from 1/4/20/40/71) — 1mo held at the near-floor 1, 3mo -2, 6mo -2, 12mo -2, 36mo -1. **AUTO-STAMPED per delegated daily authority** — status committed, stamped_by "Alex (auto-stamped)". **LATER THE SAME DAY (Sept 12): a separate FULL WEEKLY refresh (score set 2026-09-12_draft2), the first full-weekly-depth research dive since the Sept 5 full weekly refresh, ran four parallel adversarial research passes across all four qualitative pillars against the 2026-09-12_draft committed baseline (1/2/18/38/70).** One new dated fact clears the sufficiency bar: Saudi Arabia's East-West Pipeline (Petroline) — the kingdom's primary Hormuz-bypass oil-export route, a NEW target distinct from the already-logged Sept 8 Aramco/Jazan refinery strikes — was hit by drones launched from Iraqi territory on Sept 10 (Saudi MFA statement/confirmation issued Sept 11). PRIMARY: Saudi Arabia's own Ministry of Foreign Affairs confirmed pumping stations in the Riyadh/Medina areas were struck, causing injuries and material damage, and

said it would not retaliate for now at Baghdad's request; corroborated by 6+ independent outlets (Al Jazeera, CNBC, CNN, Times of Israel, ABC News Australia, OilPrice.com) with satellite imagery of fire/smoke at the pumping stations, plus Iraq's own PM ordering a probe, dismissing the Maysan operations commander, and closing the Shalamchah border crossing. No group has claimed responsibility; President Trump, in Dublin, said Iran was "probably" responsible — a single, hedged, unconfirmed remark, logged as such, NOT as established fact (the Saudi MFA statement itself attributes origin only to Iraqi territory, not to a directing state). Neither flip-line clause fires: the widening clause does NOT fire (Iraq has been an active theater since the Sept 1 IRGC strike on US facilities in Erbil province — escalation within an existing theater, not a new one), and the US-casualty clause does NOT fire (no confirmed US military casualty found); the sustained-Brent→\$100 clause continues to hold (~\$104.61 Sept 12, same as the morning baseline) as persistence, not a fresh trigger. Also logged, not scored: Trump's own account that the Houthis privately signaled they don't want direct US involvement in Yemen (single-source as to substance, consistent with the already-logged MBS-refused-strikes counterweight), and the BRICS New Delhi summit's joint declaration (Sept 12, all members plus Saudi Arabia/Iran/UAE) urging "maximum restraint" over the escalation — a mild long-horizon diplomatic data point relevant only to the 1yr/3yr framing. The Mayyun Island/Bab al-Mandeb seizure (Sept 10-11) was independently re-verified as still holding, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye, ZeroHedge). Sized small given a single infrastructure strike with no widening and no US casualty: **P RE-RATED DOWN FURTHER, modestly, to 1/1/17/37/70** (from 1/2/18/38/70) — 3mo/6mo/12mo -1 each, 36mo held, 1mo held at the near-floor 1. **WEEKLY REFRESH — left as DRAFT for Alex's manual review, full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of move size.** Committed by Alex; Sept 13-14 light daily catch-ups held flat with nothing new clearing the sufficiency bar, AUTO-STAMPED. **Sept 16 (score set 2026-09-16_draft):** RE-RATED DOWN on the 6/12/36mo windows to 1/1/14/33/66 (from 1/1/18/38/70) — the IAEA Board of Governors voted Sept 9 to refer Iran's nuclear file to the UN Security Council, and 130 Iranian lawmakers signed a Sept 12-13 statement calling for NPT withdrawal, with a hardline MP describing an emergency bill being drafted (RFE/RL, Tehran Times, Mehr News); Pezeshkian's public no-nuclear-weapons stance and the Foreign Ministry's "still being prepared" framing kept the move modest. AUTO-STAMPED, the last TRUE committed baseline. **THIS VERSION (Sept 17, score set 2026-09-17_draft) HOLDS FLAT at 1/1/14/33/66** — re-checked, no new dated development beyond the Sept 9 IAEA referral and the Sept 12-13 NPT statement already priced; Pezeshkian's and the Foreign Ministry's positions are unchanged. AUTO-STAMPED per delegated daily authority. **Sept 18 (score set 2026-09-18_draft, this version) HOLDS FLAT again at 1/1/14/33/66.** Two dated items were found and weighed. Trump told Axios Sept 17 he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday UN General Assembly meeting with six Gulf-state leaders — dated and multi-sourced (Axios original, corroborated by Times of Israel, Politico Wire, Breitbart, RedState, Western Journal, anews — 5+ independent), but it is rhetoric about an undated future decision, and the near-term windows (1mo/3mo P=1) already price maximal active-war uncertainty, so it does not clear the bar for a further move. Separately, an initial general search surfaced a claim that the IRGC struck a Togo-flagged tanker named "Trend" in the Strait of Hormuz on Sept 18; a follow-up targeted search could not independently corroborate this from any named outlet or primary (CENTCOM/IRGC) source — **treated as NOT FIRED / NOT USED** per this report's house discipline for uncorroborated single claims. AUTO-STAMPED per delegated daily authority. See My Decision below. **THIS VERSION (Sept 19, score set 2026-09-19_draft) is a FULL WEEKLY refresh** against the last committed baseline (2026-09-18_draft) — independent primary-source research across all five windows found nothing that clears the sufficiency bar for a move. Iran's parliament continues moving toward, but has NOT enacted, NPT withdrawal: 130 lawmakers signed a further Sept 7-13 statement urging the legal Article X process, Parliament Presidium spokesman Abbas Goudarzi said withdrawal "can easily" be done, and a bill was submitted for expedited consideration — but Iran's own Foreign Ministry still calls it "in preparation," so this remains a proposal, not a completed act (Iran International, Tehran Times, IranWire, APA.az, anews, Militarnyi, IFP News — corroborated but mostly Iran-linked/state-affiliated, the same treatment this pillar has always given Iranian-sourced claims). Trump told Axios (Sept 17) he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a Tuesday Sept 22 UN General Assembly sideline meeting with six Gulf-state leaders (Saudi Arabia, UAE, Qatar, Bahrain, Kuwait, Oman) — very well corroborated (Axios, Jerusalem Post, Politico/Political Wire, Israel National News, Common Dreams, Breitbart, CBN News, 5+ independent), but still rhetoric about an undated future decision; **the Sept 22 meeting itself is now flagged as this pillar's clearest near-term trigger to watch next cycle.** The UN Security Council failed 11-2-2 on Sept 17 to renew its Iran-sanctions monitoring panel, Russia and China dissenting (Somalia/Pakistan abstaining) — a primary UN press release (press.un.org, sc16455 and related), corroborated by Euronews and Security Council Report — institutional gridlock over the 2025 snapback dispute, not a new sanction or act of war. The Togo-flagged tanker "Trend" strike (Sept 17-18) this pillar could not corroborate last cycle is now CONFIRMED via the IRGC's own statement (IRNA,

primary, via GlobalSecurity.org) plus independent outlets including The Hill, Bernama, IranWire, TFTC, Parapolitika, and Rio Times — reversing last cycle's NOT FIRED call, but it is a continuation of an already-months-long tanker campaign (the US struck three Iranian tankers Sept 1-5), not a new escalatory step, so it updates the record without moving P. Brent settled ~\$103.21/bbl Sept 18 (CNBC, Al Jazeera), down 1.5% day-over-day but still near the multi-month highs reached in early September — a market price, not scored. Iran has now gone nine straight days without striking a "host state" (GlobalSecurity.org's OSINT day-by-day tracker) — a mild, fragile de-escalatory data point — while a Houthi-linked air-raid alert hit Riyadh Sept 19 for the first time since July (Times of Israel liveblog) — a mixed signal on the proxy front; neither clears the bar alone. FM Araghchi said Iran and Oman "agreed a plan" to reopen the Strait (TASS, Caspianpost) but separately clarified the Oman understanding will NOT by itself reopen Hormuz, conditioned on the US honoring the 60-day Islamabad MOU (Mehr News, corroborated by Samaa) — a net wash. **P HELD FLAT at 1/1/14/33/66 — full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of the size of the move (here, zero) — LEFT AS DRAFT, flagged prominently for Alex's manual review.** See My Decision below. **Updated & Re-verified September 22, 2026 — LIGHT DAILY touch, score set 2026-09-22_draft: carried forward unchanged at 1/1/14/33/66 — not re-researched this cycle; Fed & Macro re-rated down instead. COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026. Updated & Re-verified September 23, 2026 — LIGHT DAILY touch, score set 2026-09-23_draft: RE-RATED UP to 3/3/16/35/66, the first upward move since Sept 13.** A senior Iranian official told Reuters (Sept 22, 8+ outlet corroboration) Iran can reopen Hormuz within 7 days if the US eases pressure and lifts its blockade; separately, US officials (Witkoff/Kushner) and Iran's FM Araghchi held a 3-hour "very productive" mediated meeting at the UN General Assembly sidelines Sept 22, the first direct US-Iran contact at this level since the war began, with another meeting scheduled soon. Sized modestly against Iran's still-steep unmet conditions (full blockade lift, all frozen assets released, end to war on every named front), Pezeshkian declining to meet Trump directly, and continued unattributed Sept 21 tanker incidents. **COMMITTED, AUTO-STAMPED SEPTEMBER 23, 2026.**

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 19, 2026 · **[MERGED — see merge note below] Updated & Re-verified October 10, 2026 — FULL WEEKLY refresh, score set 2026-10-10_draft: HELD FLAT at 1/1/14/33/66** (ideally via fred.stlouisfed.org, eia.gov, centcom.mil, and en.wikipedia.org — so the official Brent spot series (EIA RBRTE / FRED DCOILBRENTU) this pillar's own "sustained >\$100" downsides are directly via EIA/FRED once network access allows. **Diplomatically, the prior cycle's "stalemate" framing is corrected in emphasis, not reversed:** Qatar's Ministry of Foreign Affairs spokespeople said Sept 18, 2026, that the US and Iran have agreed to a "ceasefire" — separately, Iran's Interior Minister Eskandar Momeni was in Doha the same day over the long-running detained-pilots dispute (Iran alleges Qatar detained 3 Iranian military personnel whose lives are being held for ransom; a channel stayed demonstrably alive even as the UN-sidelines track stalled Sept 28. The Rubio-ordered early UN-delegation-departure claim (around Oct 1) remains DISPUTED by Iran's own UN warnings issued in the Strait of Hormuz/Gulf region through Oct 5 (8 Hormuz, 1 Bab el-Mandeb) — including the Liberia-flagged tanker LIPSI, struck Oct 4 (engine-room fire, crew safe) — **five windows HELD FLAT. STILL LEFT AS DRAFT — AWAITING ALEX'S STAMP** (a full weekly refresh is categorically excluded from delegated auto-stamp authority, independent of move size; **3mo/6mo/12mo explicitly because "talks are still live"; the indirect UN-sidelines track reached a STALEMATE on Sept 28 and Iran's delegation left New York, so that justification is gone** — **were ICE front-month FUTURES prints captioned as the spot series, understating oil by \$12–14 a barrel. Oil is materially HIGHER than this report has been saying, and the "sustained above \$100" is a CBS excerpt released Sept 25. This is the same Houthi/Yemen actor and executed a blockade — so it does not independently fire a flip-line clause either. Separately, Brent crude has now traded near/above \$100/bbl for a second straight session (CNBC this pillar’s own conservative standard; flagged as the closest this cycle has come to the flip line and worth close watching next cycle, but it does not independently fire that clause **near-floor 1 (no further room), 3mo 6→5, 6mo 23→22, 12mo 43→42, 36mo held at 72** (a repeat regional strike and a same-theater territorial shift do not move the multi-year the weighted) — so per the runbook’s delegated daily auto-stamp authority, **this set is AUTO-STAMPED: status committed, stamped_by “Alex (auto-stamped).”**

Prior to this cycle: P was RE-RATED DOWN SHARPLY to 1/9/27/47/74 (Sept 2, committed Sept 3, then HELD FLAT through Sept 3’s Kuwait/UAE repeat-target strikes and the Sept Alex’s widened daily auto-stamp policy. **BEARISH and CONFIRMED, the load-bearing new fact: the conflict escalated materially Sept 1-2, confirming exactly the risk this pillar’** — roughly 50x the scale of the single Aug 30 Larak Island strike (multi-source: Axios, CNBC, CNN, Bloomberg, UPI). For the first time in this war, the US struck Iranian government weeks — to ~\$95-96.6/bbl, WTI to ~\$91-92, still short of the \$100 flip line. A US strike on Kuhestak, Sirik County, Hormozgan (near the Strait) reportedly hit a wedding party: the casualty claim originates with Iranian state and local authorities, and CENTCOM’s Cmdr. Tim Hawkins told CBS News the US has neither confirmed nor denied it — so per the suff what it triggered: Iran’s IRGC launched coordinated ballistic-missile and drone strikes Sept 2 at US-linked bases in FOUR countries simultaneously — Jordan, Bahrain, Iraq, and Kuwait various points since Feb-Jul 2026 per this war’s own tracker pages), so the pillar’s own “widening to a FURTHER NEW state with confirmed attribution” flip-line clause does NOT found as of this run — so neither the casualty clause nor the widening clause independently fires either. The already-fired (Aug 30) “resumption of direct US strikes on Iran proper Iran retaliates further; an unnamed senior Iranian military source told press Tehran’s response would be “many times greater” (CNBC) — read as continued war-escalation risk, no **reasons:** (1) the wedding-casualty fact — the emotional and political driver of today’s four-country retaliation — is single-narrative-sourced even though widely reported, so conf

sizing precedent; (3) both sides' on-record threats of much larger responses ahead raised the cost of a miscalibrated cut. A THIRD Hormuz tanker was hit Aug 31: the Liberian-flagged VLCC Senegal Prosperity, struck by a missile, follows the already-priced Metro Venetian (Aug 24) and Al Salam II (Aug 25) incidents. Iran's army (not IRGC) claimed a drone strike on the UAE's Al Minhad Air Base near Dubai; Iran's claim, but a CONFIRMED cross-border drone incursion, a genuine (if unconfirmed-as-a-hit) attempt to widen beyond the repeat-target Jordan pattern. Jordan was struck again Aug 31 (CBS News, Breitbart, Yahoo — on-record, multi-source) — explicitly not signaling de-escalation. Brent crude continued higher into Sept 1 (~+2% Tuesday per multiple market sources), so this does NOT independently fire a fresh flip-line clause on its own — neither the "confirmed new US combat death" clause nor a clean "further new state struck" clause fires on Sept 17→15, 6mo 34→32, 12mo 51→50, 36mo 75→75 (flat). Corroborated across CBS News, Al Jazeera, Breitbart, Yahoo, Jerusalem Post, ABC News, Seatrade Maritime, Iran International, Tim Hawkins confirmed on the record, corroborated by 20+ independent outlets (Bloomberg, CNBC, NBC News, Reuters, Newsweek, ABC News, Al Jazeera, Fox News, RFE/RL, etc.), and explicitly cited as part of its bullish case, and it directly fired this pillar's own pre-declared downside flip line ("a resumption of direct US strikes on Iran proper... = treat the dip-buy as a move with ballistic missiles at two US-linked airbases in Jordan (King Hussein, Al-Azraq); Jordan's military said it intercepted 8 missiles, and Iran claims "heavy damage" to base infrastructure, precedent for a comparable single-incident shock: 1mo 14→9, 3mo 22→17, 6mo 38→34, 12mo 54→51 and 36mo 76→75. Prior to that, the Aug 29 full weekly refresh had held P flat for 12 weeks. Launches Unprecedented Campaign Against Iranian Regime on Economic D-Day") and sb0614 (Bessent's remarks), plus an OFAC recent-actions entry dated 20260824 — corroborated by China, Malaysia, UAE, Singapore, and Switzerland under five sectoral determinations (EO 13902). Critically, this is the FIRST TIME digital assets was explicitly named as a sanction target, and this is real, primary-confirmed, and directly crypto-relevant — a genuine escalation. It continued Aug 28 with a new Bank Melli-Dubai designation. Two more Hormuz "unknown pattern" strikes established pattern. CENTCOM commander Adm. Brad Cooper gave an on-record briefing Aug 28 (corroborated by UPI, The National, Washington Times, The Hill, RedState, Iran's own media, etc.) — the blockade; no oil has been exported from Iran since the blockade resumed — read as continuation/intensification of an existing posture, not a new shock. IMO's six-month case for confirmation, not a new shock. **BULLISH and CONFIRMED: Oman's own Foreign Ministry co-confirmed a Hormuz corridor, Aug 25.** Directly fetched from fm.gov.om/en/53722 (corroborated by a wide joint navigational corridor (entry/exit through Iranian waters), a joint mine-clearing project, and continuing technical talks toward a permanent corridor per the "Islamabad Memorandum of Understanding" separate IRGC spokesman claim (Aug 26) of an Iran-Oman revenue-sharing deal remains single-source and unconfirmed by Oman — correctly excluded from scoring, same treatment as the first. The first quantified Hormuz transit-volume increase of the entire crisis: +30%+ week-over-week for the week of Aug 17-23 (USNI News, citing Lloyd's List Intelligence — quasi-confirmed uptick of the whole crisis. Brent eased for a SECOND straight week: ~\$88.24 (Aug 25) → ~\$89.13-89.3 (Aug 27, weekly loss >5%) → ~\$88.29-90.55 (Aug 28) — down from ~\$90.55 directly — one initial-looking hit, Sgt. Michael Emmanuel Swinton, was actually killed Jul 18-19, already counted in the standing casualty total, not a new event) — the flip line remains on **escalation roughly offset**. The pillar's own explicit upside flip line — a signed, US-accepted Hormuz deal holding a full clean week without a new attack/fatality/seizure — is NOT a new event. direction: P HELD FLAT on all five windows.

Quality — how trustworthy the evidence is. This cycle's load-bearing fact — the Petroline pipeline drone strike — is corroborated by a primary Saudi Ministry of Foreign Affairs statement, and it move P. The prior cycle's load-bearing fact — the Bab al-Mandeb chokepoint seizure — remains corroborated across 6+ independent outlets (Al Jazeera, NBC News, CNBC, NPR, etc.). 0.60/0.65/0.70/0.65/0.55 for 1/3/6/12/36mo.

Impact — 8 out of 10, the uniform value shared by every pillar in the equal-weight model. BTC traded at \$76,916.53 on Sept 14, firming from \$76,808.69 on Sept 13 and \$77,269.21 on Sept 12. In context, BTC traded at \$76,581.44 on Sept 2, down from \$78,038.78 on Sept 1 — the real, visible risk-off pullback logged when this pillar's evidence last moved sharply negative.

The Claim

The thesis, and where I differ from the consensus — updated September 16, 2026 (light daily touch, P re-rated down on the 6/12/36mo windows as the nuclear track escalates alongside the shooting war)

This cycle (Sept 16): the crowd's attention today is almost entirely on the CLARITY Act vote failure, not Iran — but two real, dated escalatory facts landed this week on the nuclear track, but bounded — a parliamentary push and an institutional referral are documented facts, not a completed NPT exit, and Pezeshkian's own public no-nukes line plus the Foreign Minister's statement, and the pillar's floor of 1 with no room left to express further deterioration. The shooting-war facts this pillar has tracked for weeks — the Saudi pipeline, the Salalah postponement, Hormuz zone, etc. — are all confirmed, but the pillar's own explicit upside flip line — a signed, US-accepted Hormuz deal holding a full clean week without a new attack/fatality/seizure — is NOT a new event.

Prior cycle (Sept 12, full weekly refresh): the crowd will likely either read the Petroline pipeline strike as proof Iran is now hitting Saudi Arabia's core oil-export infrastructure directly, or dismiss it as "just Yemen" — a kind of target (Saudi Arabia's primary Hormuz-bypass export artery, not a refinery this time) for the third time this week, and that pattern — not the unconfirmed attribution — is what matters. Infrastructure strike with no widening (Iraq is already an active theater since the Sept 1 Erbil strike) and no US casualty — not because I am siding with either the "Iran did it" or "no proof" either.

Prior cycle (Sept 12 daily): the crowd will likely either treat the Bab al-Mandeb island seizures as a headline-grabbing new front that should crater risk assets, or dismiss it as "just Yemen" — islands in a SECOND global oil corridor, not merely "closing in" on one, and that upgrades the standing risk even though no clause in this pillar's own flip line technically fires (Yemeni claims, declared, falsifiable definitions — and I'd rather be criticized for under-reacting to a real structural shift than for inventing a new flip-line clause after the fact to justify a bigger move).

Prior cycle (Sept 11): the crowd will read a \$108 print and a 6% up-day in Brent as the war finally repricing energy — or, watching Friday's 3% give-back on Hormuz diplomacy headlines, as a close above \$107, is that clause firing, not a near-miss. I said so in the two prior cycles when it hadn't fired yet; the discipline only counts if it also fires when the number arrives. What matters is this is a further modest cut, not a regime change — and the give-back on diplomacy headlines is logged honestly alongside it.

Prior cycle (Sept 10): the crowd is likely to either read the Al Azraq missile barrage as a dangerous new peak of the conflict, or wave off a Yemeni port city changing hands as background noise. Both CENTCOM and Jordan's own military confirm no casualties this time either — a repeat-pattern event, not a new category. The Houthi seizure of Mocha is more interesting precisely because it's a structural development worth flagging even though no blockade has actually been executed yet. Brent trading above \$100 for a second straight session is the more important tell than the fact that sizing this pillar has used for every cycle since Sept 6.

Prior cycle (Sept 9): the crowd is likely to either read Brent's intraday \$100 cross as confirmation the flip line has effectively fired, or dismiss the 5-tanker CENTCOM strike as "more of the same" — sustained close above \$100, which is what this pillar's own pre-declared threshold requires — so it does not independently fire that clause, though it earns a mention in every relevant report (Iran's own claim, Island) responding to the same kind of provocation (an IRGC missile attack on a US Navy warship) — a continuation of an already-priced trajectory, not a new category of event, so I don't fire it.

Prior cycle (Sept 8): the crowd is likely to either dismiss Rezaei's restricted-zone announcement as Iran "talking tough" without follow-through, or treat it as an imminent full closure of the Persian Gulf — act — no boundaries, no enforcement mechanism, and no confirmed incident tied to it as of this cycle's research cutoff. Re-rating down modestly (1/7/24/44/73, from 1/8/25/45/73) — unexecuted escalatory statements. I am explicitly not treating Rezaei's parallel claim that an Iran-Oman corridor deal will also be signed "in the coming days" as bullish either — until it happens.

Prior cycle (Sept 6): the crowd was likely to read CENTCOM's own confirmation of the Sept 5 tanker strike as a relief ("finally, official clarity") rather than what it actually was — a confirmed strike on three tankers. Re-rated down modestly (1/8/25/45/73, from 1/9/27/47/74) rather than sharply, because none of this pillar's flip-line clauses fired on it (no US casualty, no new state, etc.). Sept 6's separate IRGC claims of further tanker/vessel/drone strikes were explicitly not used to move P — those are Iran's own claims, unconfirmed by the US, and the sufficiency rule requires confirmation.

The crowd: is likely to anchor on the wedding-strike casualty claim as the emotional center of today's news, and either (a) treat it as a confirmed atrocity driving the story, or (b) dismiss it as a multi-source confirmed regardless of how the casualty dispute resolves, and is the real story this cycle.

Me: cutting sharply to 1/9/27/47/74, versus the Sept 1 baseline (7/15/32/50/75, auto-stamped). This is the largest single-cycle P move this pillar has made since the Aug 30-31 flip-line — the political and emotional driver of today's four-country Iranian retaliation — is single-narrative-sourced at the level that matters (Iranian state/local authorities, CENTCOM neither confirmed nor denied the jump — ~50x the Aug 30 strike, plus the war's first direct tanker strikes — is a genuinely novel escalation this pillar's prior single-incident sizing precedents (Jul 28 Jordan, Aug 30 China, etc.) — responses ahead — a miscalibrated cut here is more costly than usual given what could follow. That said, the cut is still evidence-bounded, not panic-sized: kept under 8 points per window.

My edge: the discipline here is refusing to let a single-source emotional fact do more work than it's earned, in either direction — not discarding it (it's genuinely the trigger for today's move), but not over-reacting to it. The crowd either over- or under-reacts to a claim like this; this pillar tries to size around it instead.

Honesty check against the tape: BTC fell from \$78,038.78 (Sept 1, Bitstamp) to \$76,581.44 (Sept 2) — a real, visible risk-off move that for once tracks the same direction as this pillar's evidence. An honesty check for the reader.

The Facts

As of October 10, 2026 (FULL WEEKLY refresh, score set 2026-10-10_draft, LEFT AS DRAFT, HELD FLAT). Research access was materially degraded this cycle for the official EIA/FRED Brent series, CENTCOM and

★ NEW THIS CYCLE — THE WEEK OF OCTOBER 3–10, 2026

★ **DEGRADED ACCESS, disclosed plainly** — the official Brent spot series could NOT be independently re-checked this week. The research sandbox's network proxy returned a 404 error, and the line clause is written against the official EIA RBRTE / FRED DCOILBRETEU Europe Brent Spot FOB series — the same series the Oct 3 cycle used to correct a \$12–14/bbl mislabel. The network access allows, rather than taking this report's own prior citation on faith indefinitely. No other figure below rests on a blocked source without a basis label.

★ **NEW** — Qatar's own Foreign Ministry says, on the record, that the US–Iran channel is still live, Oct 6, 2026. MOFA spokesperson Dr. Majed al-Hashimi said contacts and visits are ongoing, but the record government statement; corroborated by wire pickups). This corrects the EMPHASIS of the Sept 28 "stalemate" finding, not the finding itself — the UN-sidelines track is still live. Not, by itself, enough to earn back the point this pillar cut when the stalemate fired — a general statement that contacts continue is weaker than the concrete seven-day plan that was.

★ **NEW** — Iran's Interior Minister in Doha the same day, over the long-running detained-pilots dispute. Eskandar Momeni met Qatari counterparts in Doha Oct 6, 2026 to discuss the pilot's remains. Independently confirmed via multiple outlets. The two sides agreed to send a technical delegation to continue working the issue — a narrow, unresolved dispute, but the US–Iran channel is still live. Islamabad on Oct 5, 2026 to discuss a Pakistan/Qatar "joint de-escalation framework" with PM Shehbaz Sharif. Independent adversarial verification found this is a **conflation of two reports**, **withdrawn as inaccurate and is not used anywhere in this report**.

★ **NEW** — vessel-strike FREQUENCY ticked up, but CHARACTER did not. Trade-press reporting of UKMTO data (direct UKMTO/CENTCOM access also blocked this cycle, so the tanker LIPSI, struck Oct 4 (engine-room fire, crew safe). That is a higher weekly count than the prior cycle's tally. But the character is unchanged from the already-priced pattern of escalation type, and does NOT independently fire the widening or combat-death flip-line clauses. Houthis/Bab el-Mandeb activity remains a continuation of the already-priced August activity.

★ **US fatalities** — checked again, the flip line still does NOT fire, with the record corrected on an undercount claim. The Pentagon's DCAS tally still stands at 19; no confirmed new fatalities. The sufficiency rule it remains functionally single-origin despite appearing in two bylines, and is reported here as a **contested, anonymous-sourced undercount claim**, not as fact, and not as a basis label.

★ **NET READ for this cycle:** the diplomatic-channel continuity (mild positive) and the elevated kinetic frequency with unchanged severity (mild negative) roughly offset, and the one-sidedness of the direction. All five windows HELD FLAT.

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 26 – OCTOBER 3, 2026

★ **CORRECTION, and it is the most important item on this page** — this report had Brent \$12–14 a barrel too low. The prior version stated "Brent closed \$106.60 Sept 24 (+3.4%, (petroleum/pri/spt, series RBRTE, Europe Brent Spot Price FOB) and FRED DCOILBRETEU, the latter re-pulled to disk and read from the raw bytes rather than through any summary source (Sept 29). Sept 29 is the last published reading in both EIA and FRED — there is no Sept 30, Oct 1 or Oct 2 spot print, and none is asserted here. Root cause, now understood: \$12–14 is a fix is to the caption as much as to the digits, and every oil figure in this report now carries an explicit basis label. Consequence: the "sustained Brent close above \$100" clause is **NOT USED, and why**. Claims that Brent fell to \$99.68 or about \$102 on Oct 2 trace to TradingEconomics, which self-discloses as contract-for-difference data "supplied by a third party, and deliberately not published here as a figure: retail futures feeds proved irreconcilable with one another (a one-day date offset between two of them; one missing Sept 24–29 entirely). The large and anomalous — roughly \$11–21 depending on which futures source one accepts — and that irreducible uncertainty is itself the point.

★ **CONFIRMED** — the diplomatic track stalled, which is what moves P this cycle. The indirect UN General Assembly sidelines track reached a stalemate on Monday Sept 28: the US–Iran channel is still live, as established: that Secretary of State Rubio ordered the delegation out rests on Axios reporting citing anonymous "sources familiar," syndicated to roughly 25 outlets — wide syndication. New York on Monday evening, in accordance with the schedule that had also been communicated to the US Department of State in advance on September 17." On sourcing grade the channel is still live.

★ **The channel is not dead, which is why this is one point and not a collapse to the floor**. Mediators Qatar (principal), Pakistan and Egypt — all three confirmed in the room for the talks. Trump said publicly on Sept 27 that he expected talks that week, while rejecting the current terms.

★ **KINETIC EVENTS** — and a framing correction that matters. UKMTO reported four vessels struck across Sept 28–29, all transiting dark (AIS off) near Musandam, with a fifth vessel, the primary and trade source says "unknown projectile" and no group claimed responsibility. An earlier pass of this cycle wrote "Iran struck"; that was an inference and is withdrawn. The operator is ADNOC, not Sinokor; and Sinbad, at 115,949 dwt, is Aframax/LR2 class, not a VLCC. Al Funtas (KOTC VLCC, struck Sept 28 east of Musandam, fire extinguished, crew safe, the US-casualty flip clause is untouched. None of it fires a fresh clause either: it is the same category already priced since the Sept 5 and Sept 8 tanker strikes, and the trade report is unchanged.

★ **DCAS — an honesty caveat that now matters more than the number**. The official tally stands at 19 (11 hostile, 8 non-hostile) and is corroborated by a source quoting DCAS directly. Epic Fury, which ended May 5), not a single published figure. And it is actively contested as an undercount: five US officials told the Washington Post the real figure is at least 22. Wilkerson, 37, of Norfolk, Virginia, who died Sept 18 in what is explicitly described as a non-combat-related incident and was posthumously promoted to major. "No confirmed" is not a basis label.

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ **THE LOAD-BEARING NEW FACT** — Iran's foreign minister put a concrete plan on the record, Sept 25, 2026. FM Abbas Araghchi, speaking to reporters outside the UN Security Council, announced a ceasefire on all fronts including Lebanon and Yemen; the Strait of Hormuz reopens on day six; and US–Iran talks on a final nuclear deal begin on day seven. In his words: "The ceasefire is a categorical upgrade over the anonymous sourcing that this pillar has repeatedly refused to score. Sourcing precision: the \$12bn figure is not new — "They are all already in the MOU" — which ties the plan to the existing Islamabad framework rather than presenting it as a fresh concession.

★ **NEW** — Pezeshkian offers to readmit UN nuclear inspectors, in a CBS excerpt released Sept 25. Asked whether Iran would allow UN nuclear inspectors back in, President Pezeshkian said "Yes, we will accept them." Sept 27 broadcast, not a Sept 25 interview aired in full; the concession is explicitly conditional on the US accepting Iran's proposal; and the softening versus his own defiant Sept 25 interview. Even so, inspector access is the first movement on the nuclear file in weeks, and it is the specific reason the 12-month window takes +1.

★ **NEW** — Secretary Rubio on the record, Sept 24: the previous day's talks were "largely positive" and "human beings talked to each other yesterday," but he declined to call it a breakthrough. **CORRECTION to the Sept 23 committed set** — the Sept 22 contact was MEDIATED, not direct. That set called it the "first direct-channel" US–Iran contact. Witkoff's own on-record statement was rather than smoothed over: Iranian state broadcaster IRIB described it as a meeting between Araghchi and Witkoff held at Witkoff's request, and Trump said his envoys "met with Araghchi."

★ **FALSIFIED CLAIM** — a cargo vessel WAS struck in Hormuz on Sept 23. The abandoned Sept 24 draft stated that "no new tanker incidents dated Sept 23–24 were found." That was a lie. The vessel was evacuated, with two casualties reported. Careful wording, because the sources genuinely do not say more: UKMTO did not state whether the two casualties were killed or injured. (The 19 Indian nationals aboard) — not to UKMTO. Either way these are merchant crew, not US service members, so the US-combat-death flip line is untouched. Basis caveat: ukmtot.com.

★ **NEW** — two Houthi salvos at Saudi Arabia. On Sept 24 Saudi forces intercepted six ballistic missiles aimed at Taif and the Yanbu Red Sea area; overnight Sept 25–26 the coast of Saudi Arabia is a repeat target already in theatre, and everything incoming was intercepted.

★ **NEW STATE OF AFFAIRS** — no announced US strike on Iranian territory since Sept 1, roughly 3.5 weeks. The strikes clause that fired Aug 30 is therefore now DORMANT, though the US–Iran channel is still live. (Partner Military Operations) plus the absence of wire coverage — wire/ISW-derived, not primary-verified. A discrepancy is flagged rather than printed: secondary sources date the strikes as Sept 1, 2026.

★ **US fatalities** — the flip line did NOT fire, with three corrections to the record. The Pentagon's DCAS total stands at 19, unchanged through Sept 26, and breaks down as 11 hostile and 8 non-hostile. The combat-related and a defense official described a medical incident aboard a flight to Saudi Arabia. It is explicitly non-hostile, so this pillar's flip line, which requires a confirmed new fatality, does not fire. US troops have died than the Pentagon has disclosed; the article returned 403 and could not be read. It is potentially material to this flip line and needs a dedicated pass.

★ **MARKET PRICES AND SHIPPING DATA** — labelled, never presented as institutional estimates. (BASIS NOTE: the figures below are ICE front-month FUTURES prints. They were not actuals. (FUTURES basis) closed \$106.60 on Sept 24, up 3.4%, with an intraday high of \$108.23, then closed \$104.37 on Sept 25, down 2.09% — roughly +20% on the month and well above the pre-war baseline of about \$80. The price moved to nine on Thursday Sept 24 from 14 the previous day, against a 10-day average of 18, versus a pre-war baseline of about 125 large commercial vessels per day (confirmed in the 2020 baseline, so it is not comparable with the Reuters series and the two are not mixed; Reuters also caveats that vessels running with transponders off are not counted, so actuals may differ). market definitions conflate Israel–Iran with US–Iran, so no number is quoted.

★ **REPORTED BUT EXPLICITLY NOT SCORED** — and the most important one cuts AGAINST this cycle's up-move. (a) The Wall Street Journal reported Sept 25–26, citing unnamed sources, that the US–Iran channel is still live. Bloomberg, CNBC, The Hill, JPost, Ynet and others all headline it as a WSJ report, and there is no on-record White House confirmation anywhere as of Sept 26. WSJ's own caveat is that the report applies that rule symmetrically: the item argues for a smaller up-move or none, and is still not used. (b) The National's Sept 23 "road map" remains single-original-source; Semerari's Sept 25 report via Qatar — and the two are deliberately not merged. (c) An IRGC claim of a cluster-warhead anti-ship missile test near a US carrier (Sept 20, via Al Jazeera) is Iran's own unconfirmed claim.

- ★ ★ **NEW — the UN Security Council failed 11-2-2 (Russia and China vetoing, Somalia/Pakistan abstaining) on Sept 18, 2026 to renew the panel of independent experts monitoring the situation on the ground, so it doesn't move P.**
- ★ ★ **NEW — Trump told Axios (Sept 17, 2026) he faces a "big decision" on whether to "annihilate" the Iranian regime, ahead of a planned Tuesday Sept 22 UN General Assembly session.** Rhetoric about an undated future decision, not an action — this pillar's clearest near-term trigger to watch next cycle.
- ★ ★ **CORROBORATION UPDATE, reverses last cycle's "not fired" call:** the Togo-flagged tanker "Trend" strike in the Strait of Hormuz on Sept 17-18, 2026 is now confirmed via the Togo flag, reversing the months-long tanker campaign, not a new escalatory step, so it updates the record without moving P.
- ★ ★ **NEW — the IAEA Board of Governors voted Sept 9, 2026 to refer Iran's nuclear file to the UN Security Council.** A primary institutional action by the IAEA itself, escalating into a UN Security Council vote.
- ★ ★ **NEW — 130 Iranian lawmakers signed a statement Sept 12-13, 2026 calling on parliament to begin the legal process for Iran's withdrawal from the Nuclear Non-Proliferation Treaty.** Iranian state-affiliated, so treated as corroborated reporting of a documented parliamentary act rather than independent Western confirmation.
- **Counterweight, same sourcing set:** President Pezeshkian publicly reiterated Iran is not seeking nuclear weapons, even as the parliamentary push proceeds. Foreign Ministry spokesman said Iran is not seeking nuclear weapons.
- **Nothing new found** on the Salalah Iran-GCC ministerial (still postponed, no new date), the Saudi East-West pipeline (still offline), or Hormuz shipping beyond what the Sept 15 barrel price update said.

Carried forward from the September 12 full weekly refresh and the daily touches since — still load-bearing, not contradicted:

- ★ ★ **NEW — Saudi Arabia's East-West Pipeline (Petroline), the kingdom's primary Hormuz-bypass oil-export route, was hit by drones launched from Iraqi territory Sept 10 (Saudi state media).** Injuries and material damage, and said it would not retaliate for now at Baghdad's request (Al Jazeera, CNBC, CNN, Times of Israel, ABC News Australia, OilPrice.com — 6+ independent sources).
- **Attribution caveat, stated carefully:** no group has claimed responsibility for the pipeline strike; the Saudi MFA statement attributes origin only to Iraqi territory, not to a directing source.
- **Neither flip-line clause fires:** the widening clause does NOT fire (Iraq has been an active theater since the Sept 1 IRGC strike on US facilities in Erbil province); the US-casualty clause does NOT fire.
- **Counterweight, logged:** Trump's own account (same Dublin remarks) that the Houthis privately signaled they don't want direct US involvement in Yemen — single-source as to source, but "maximum restraint" and voiced concern over attacks on civilian/nuclear infrastructure — a mild, long-horizon diplomatic data point (1yr/3yr framing only), not used to move P.
- **Re-verified independently:** the Mayyun (Perim) Island/Bab al-Mandeb seizure (Sept 10-11) still holds, not disputed (Euronews, Al Jazeera, NBC News, NPR, Eurasia Review, Middle East Eye).

Carried forward from the Sept 12 light daily catch-up (score set 2026-09-12_draft, auto-stamped — still load-bearing):

- ★ ★ **NEW — Houthi forces complete their sweep of Yemen's entire Red Sea coastline (capturing Dhubab and Murad by Sept 11, the last government-held coastal towns) and seize control of the entire coast.** The National, National Herald — 6+ independent). Yemen is existing theater, so the widening clause does not fire.
- **Counterweight, logged:** Saudi Crown Prince Mohammed bin Salman twice asked the President for direct US strikes on the Houthis and was refused — intelligence/targeting-data point.
- ★ ★ **NEW — UKMTO's own Warning 133-26 (issued 1910 UTC Sept 10) confirms four unidentified projectiles struck two vessels ~4nm west of Khasab, Oman, setting one afire.**
- **Logged, single-source, NOT used to move P:** IRGC's own claim to have separately struck a US Navy Saildrone Explorer-type unmanned vessel near the Strait entrance — no US casualties.
- **Brent held near/above \$104 for a fifth consecutive session** (settled ~\$104.61 Sept 12, TradingEconomics/psuconnect.in) — confirming persistence of the already-fired "sustained above \$100" clause.
- **BTC traded at \$76,916.53 on Sept 14** — up 1.4% from \$76,808.69 on Sept 13, which itself eased from \$77,269.22 on Sept 12 (local run.py quant refresh).
- ★ **CARRIED FORWARD — the "sustained Brent close above \$100" flip-line clause FIRES: Brent ended Thursday Sept 10 up more than 6% above \$107, after trading above \$108 in the previous session.** (Sept 10, TradingEconomics Sept 10-11, Vantage Markets, NAI500 — 4+ independent). Three consecutive sessions above \$100, two of them confirmed closes and one decisively above.
- ★ ★ **NEW — fuller reporting of the Sept 9 shipping wave: Iran attacked 10 vessels near the Strait of Hormuz — 2 US-linked ships and 8 oil tankers — the largest declared wave since the 2019-2020 conflict.** member, so the confirmed-US-combat-death clause does NOT fire.
- **Logged, single-source, NOT used to move P:** a compilation of Hormuz transit data puts throughput at 7 transits on Sept 9 against a Kpler 10-day moving average of 10-13 commodities.
- **Counterweight, logged:** Friday Sept 11's ~3% Brent give-back is attributed to diplomatic efforts around the Strait of Hormuz and to the IEA's forecast of a 2.5 mb/d contraction in oil demand.
- ★ **CARRIED FORWARD — CENTCOM/Jordan confirm the IRGC fired 20 ballistic missiles at Jordan's Al Azraq (Muwaffaq Salti) air base Sept 9, in retaliation for the Sept 8 five-tanker strike.** is a repeat target (struck Aug 30-31), so the widening-to-a-further-new-state clause does not fire.
- ★ ★ **NEW — Iran-aligned Houthi forces seized the Yemeni Red Sea port city of Mocha on Sept 10, closing in on control of the Bab el-Mandeb Strait,** a SECOND global shipping corridor, or interdiction has actually been confirmed — outlets describe Houthis as "closing in on," not as having executed a blockade.
- ★ ★ **NEW — Brent crude has now traded near/above \$100/bbl for a second straight session,** more persistent than Sept 9's single-day intraday cross (CNBC: above \$101 Wednesday).
- **NEW — no widening to a further new state and no confirmed US casualty:** Jordan is a repeat target, and CENTCOM/Jordan both confirm no casualties from the Al Azraq strike; the confirmed-US-combat-death clause does NOT fire.
- **BTC traded at \$77,063 on Sept 11** — down from \$77,993.99 on Sept 10 and \$79,052.40 on Sept 9 (local full quant refresh this cycle, run.py quant).

Carried forward from Sept 9 (re-verified this cycle — still load-bearing):

- ★ ★ **NEW — CENTCOM confirms US forces destroyed FIVE more Iranian crude oil carriers Sept 8 — M/T Kaviz, M/T Charminar, M/T Horizon 1, M/T Riesco (Gulf of Oman), and M/T ...** (GlobalSecurity.org) in addition to CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship") — clears the sufficiency bar.
- ★ ★ **NEW — Brent crude crossed \$100/bbl intraday Sept 9 for the first time since July 24,** trading ~\$100.44 (+2.57%) on U.S.-Iran tit-for-tat strike fears (CNBC "Brent crude tops \$100 for first time since July 24" cycle has come to it).
- **NEW — both Iranian missile attempts on the US Navy warship were evaded, no US personnel harmed** — the confirmed-US-casualty flip-line clause remains unfired.
- **NEW — no widening to a further new state:** Gulf of Oman and Kharg Island are both existing theater already struck in this war.
- **Iran's Sept 6-7 SNSC "restricted zone" announcement remains not-yet-executed** — no new dated development, not re-scored a second time.
- **BTC traded at \$79,052.40 on Sept 9** — up from \$78,435.62 on Sept 8 and \$79,090.41 on Sept 7 (data via the GitHub Actions fetch workflow).

Carried forward from Sept 8 (re-verified this cycle — still load-bearing):

- ★ **Iran SNSC secretary Mohsen Rezaei announced on-record, Sept 6-7, that Iran will declare a new "restricted zone" beyond the Strait of Hormuz "in the coming days."** The zor Anadolu Agency, Newsbytes, WFLA/Nexstar, GlobalSecurity.org) in addition to Iranian state media (Press TV, Tehran Times) — clears the sufficiency bar.
- **This is a threat of intent, not yet executed:** Al Jazeera's own Sept 7 explainer states "further details, including the precise boundaries, have yet to be announced." Rezaei separately said "we will not back down."
- **GlobalSecurity's Day 192 (Sept 7) tracker puts the blockade count at 92 vessels redirected, 3 disabled, 2 boarded** — up from Day 190's 87/3/2 (Sept 3), a continuation of the a
- **BTC traded at \$78,435.62 on Sept 8** — down from \$79,090.41 on Sept 7 and \$80,338.98 on Sept 6 (data via the GitHub Actions fetch workflow).

Carried forward from Sept 6 (re-verified this cycle — still load-bearing):

- ★ **CENTCOM's own on-the-record press release (centcom.mil) confirms US forces struck THREE Iranian crude oil tankers Sept 5, resolving the tanker report this pillar had with** missiles at two US Navy warships (an aircraft carrier and a guided-missile destroyer), both of which evaded multiple attacks with no American personnel harmed. Corroborated by
- ★ **This revealed a materially more serious escalation than the Sept 5 baseline knew:** not a quiet single-tanker interdiction, but a direct, unprovoked IRGC missile attack on US Navy
- **Sept 6's IRGC claims of further strikes on three more tankers plus three "US-linked" vessels and a US naval drone** (Al Jazeera live blog, Euronews) remain US-unconfirmed as
- **BTC traded at \$79,929.30 on Sept 6** — up from \$79,646.11 on Sept 5 (data via the GitHub Actions fetch workflow).

Carried forward from Sept 2 (re-verified through the Sept 5 full weekly refresh and this cycle — still load-bearing):

- ★ **CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran, roughly 50x the scale of the Aug 30 Larak Island strike.** Targets included IRGC air-defense sites, n

- ★ ★ **NEW** — for the first time in this war, the US struck Iranian government oil tankers directly (engine rooms), under a newly reported Trump-approved "tanker for tanker" policy.
- ★ ★ **NEW** — Brent rose ~5% Tuesday Sept 1, its best session in 5 weeks, to ~\$95-96.6/bbl; WTI to ~\$91-92 — still short of the \$100/bbl flip line.
- ★ ★ **NEW, FLAGGED SINGLE-NARRATIVE-SOURCED** — a US strike on Kuestak, Sirik County, Hormozgan (near the Strait) reportedly hit a wedding party. The Hormozgan governor's casualty claim itself originates with Iranian state/local authorities — wide Western-outlet pickup of that one narrative is not the same as independent multi-sourcing of the event.
- ★ ★ **NEW** — Iran's IRGC retaliated Sept 2 with coordinated ballistic-missile and drone strikes on US-linked bases in FOUR countries simultaneously: Jordan, Bahrain, Iraq, and Saudi Arabia (all struck at various points Feb-Jul 2026), so the "widening to a FURTHER NEW state with confirmed attribution" flip-line clause does NOT fire.
- **NEW** — most projectiles were intercepted: Jordan (~10 of 25 intercepted, 3 landed, no reported casualties); Bahrain (most of roughly two dozen drones intercepted). No confirmed strikes on US-linked bases.
- **NEW** — both sides now on-record threatening larger future action: President Trump threatened a "significantly larger response" if Iran retaliates further; an unnamed senior Iranian official threatened a "larger response" if the US strikes further.
- **BTC traded at \$76,581.44 on Sept 2** — down from \$78,038.78 on Sept 1 (Bitstamp), a real risk-off move.

Carried forward from the Sept 1 light daily catch-up (score set 2026-09-01_draft, now superseded — still load-bearing):

- ★ **A THIRD Hormuz tanker hit this week, Aug 31, CONFIRMED via UKMTO plus multi-source reporting.** The Liberian-flagged VLCC Senegal Prosperity was struck by three unknown missiles (Reuters, Newsweek, ABC News, Al Jazeera, Fox News, RFE/RL, Epoch Times, Daily Caller, OANN, FXStreet, Korea Times, India TV, and Time. The first acknowledged US strike on a tanker was the \$100M+ Al Jazeera-owned Metro Venetian (Aug 24) and Al Salam II (Aug 25) incidents — the third such hit in the same window.
- ★ **Iran's army claims a drone strike on the UAE's Al Minhad Air Base; the UAE Ministry of Defense DENIES that base was targeted while CONFIRMING a separate cross-border drone strike on a UAE military base.** A drone detected over UAE territorial waters, approaching from Iran. So: a disputed target claim, but a CONFIRMED cross-border drone incursion — reported via CBS News, Al Jazeera, and Reuters.
- ★ **President Trump said on-record Aug 31 he is still weighing further strikes on Iran**, calling it "a relatively little war for us" (CBS News, Breitbart, Yahoo — on-record, multi-sourced).
- **Brent crude continued higher into Sept 1 (~+2% Tuesday per multiple market-desk reports)** on fresh-clash fears — the session after the long Labor Day weekend, the second straight day of gains.
- **Jordan was struck again Aug 30-31**, but remained a repeat, not a "further new," state per this pillar's own framing (already struck Jul 28 and again as part of the Aug 30 IRGC retaliation).
- **BTC traded at \$78,038.78 on Sept 1** — down from \$78,447.16 on Aug 31 (Bitstamp).

Carried forward from the Aug 31 light daily catch-up (score set 2026-08-31_draft, now superseded — still load-bearing):

- ★ **Resumed direct US strike on Iranian territory, Aug 30, CONFIRMED via on-record CENTCOM spokesperson plus 20+ independent outlets.** US forces struck two IRGC rocket/mortar launchers (Reuters, Newsweek, ABC News, Al Jazeera, Fox News, RFE/RL, Epoch Times, Daily Caller, OANN, FXStreet, Korea Times, India TV, and Time. The first acknowledged US strike on Iranian territory was the \$100M+ Al Jazeera-owned Metro Venetian (Aug 24) and Al Salam II (Aug 25) incidents — the third such hit in the same window.
- ★ **IRGC retaliatory ballistic-missile strikes on two US-linked Jordan airbases, Aug 30-31, CONFIRMED via Jordan's own military statement plus multi-source reporting.** IRGC said it struck two US-linked Jordan airbases (Reuters, Newsweek, ABC News, Al Jazeera, Fox News, RFE/RL, Epoch Times, Daily Caller, OANN, FXStreet, Korea Times, India TV, and Time. The first acknowledged US strike on Iranian territory was the \$100M+ Al Jazeera-owned Metro Venetian (Aug 24) and Al Salam II (Aug 25) incidents — the third such hit in the same window.
- **Press (Reuters/CNBC) framed the renewed exchange as weighing on Asian equities and US futures**, reversing the prior two-week Brent decline.
- **BTC traded at \$78,447.16 on Aug 31** — up from \$77,666.16 on Aug 29 (Bitstamp).

Carried forward from the Aug 29 full weekly refresh (score set 2026-08-29_draft, now superseded — still load-bearing):

- ★ **"Operation Economic Outcast" sanctions package, Aug 24, CONFIRMED via direct fetch of home.treasury.gov.** Press releases sb0613 ("Treasury Launches Unprecedented Campaign to Isolate Iran's Economy" — TRM Labs, Chainalysis, CryptoTimes) plus law-firm client alerts. ~60 entities/individuals/vessels designated across Hong Kong, China, Malaysia, UAE, Singapore, and Switzerland. The "promised but not landed" sanctions rhetoric, this is real, primary-confirmed, and directly crypto-relevant. Continued Aug 28 with a new Bank Melli-Dubai designation.
- ★ ★ **NEW** — Oman's OWN Foreign Ministry co-confirmed a temporary Hormuz corridor, Aug 25, CONFIRMED via direct fetch of fm.gov.om/en/53722. A genuine upgrade: in evidence of a joint mine-clearing project, and continuing technical talks toward a permanent corridor per the "Islamabad Memorandum." Still explicitly described as "temporary" — Iran itself denied the corridor, and the source and unconfirmed by Oman — correctly excluded.
- **NEW** — two more Hormuz "unknown projectile" tanker incidents. Aug 24, off Oman's coast (engine-room damage, vessel disabled, no casualties, UKMTO); Aug 27 (fire onboard, vessel disabled, no casualties, UKMTO).
- **NEW** — CENTCOM commander Adm. Brad Cooper's on-record briefing, Aug 28 (corroborated by UPI, The National, Washington Times, The Hill, RedState, IranWire): US forces are not evading the blockade; no oil has been exported from Iran since the blockade resumed. Read as continuation/intensification of an existing posture, not a fresh shock.
- **NEW** — IMO's six-month casualty count (Aug 28, quasi-primary IMO briefing, corroborated by 4 outlets) settles at 19-20 dead (seafarers + port workers) across 68-70 incidents.
- **NEW** — Trump declared the Strait "demined" Aug 25 with a "zero tolerance" policy on new mines (Reuters, Axios, France24, US News) — undercut two days later by the Aug 27 report of a new mine.
- **NEW** — the first quantified Hormuz transit-volume increase of the whole crisis: +30%+ week-over-week for the week of Aug 17-23 (USNI News, citing Lloyd's List Intelligence). A genuine first uptick.
- **NEW** — Brent eased for a SECOND straight week: ~\$88.24 (Aug 25) → ~\$89.13-89.3 (Aug 27, weekly loss >5%) → ~\$88.29-90.55 (Aug 28) — down from ~\$93-95 (Aug 20-21), a second straight weekly gain (~6%), the highest since late July — now reversed by this cycle's two-week Brent decline above.
- **NEW** — no new confirmed US combat death Aug 22-29 (checked directly — one initial-looking hit, Sgt. Michael Emmanuel Swinton, was actually killed Jul 18-19, already counted).
- **NEW** — no new US/CENTCOM strikes on Iran found — GlobalSecurity's Day-181 tracker (checked Aug 27) confirms a 28th consecutive night with no confirmed strike.
- **BTC closed at \$77,666.16 on Aug 29** — up modestly from \$77,266.84 on Aug 22 (Bitstamp).

Carried forward from the abandoned Aug 28 draft (2026-08-28_draft — never rendered, selfchecked, archived, or committed; re-confirmed independently this cycle, not taken on faith): the two Aug 24/Aug 27 tankers.

Carried forward from the Aug 22 full weekly refresh (score set 2026-08-22_draft2, committed by Alex Aug 23 — still load-bearing):

- ★ **Casualty toll (as of Aug 22): real, but a range, not a point figure.** That cycle cross-checked the cumulative Hormuz-campaign death toll directly: Wikipedia's "2026 Strait of Hormuz" page (as of Aug 21, but appears to aggregate the broader Middle East (possibly including a separate Aug 12 Bab al-Mandeb/Houthi strike that killed 6, per Al Jazeera), not the Strait of Hormuz specifically).
- **No new kinetic incident found Aug 19-22.** Independent re-checking for vessel strikes, seizures, or Iran-related military incidents in that window found nothing beyond the Aug 21 strike.
- **The UAE missile-attack claim reconciles to the same known Aug 18 episode, not a new one.** Aug 19-dated reporting (Washington Post, NBC News, Haaretz, The Week, EgyptToday) dated the Aug 18 strike / Aug 19 embargo response) — a one-day cross-outlet dating variance describing one event. Iran's foreign ministry denies responsibility, calling it a possible "false flag" claim.
- **CENTCOM's blockade/interdiction tally was climbing incrementally as of Aug 22** (68 vessels redirected vs. ~67 shortly before) — now superseded by this cycle's Aug 28 briefing.
- **The Iran-Oman single-corridor deal remained unsigned as of Aug 22;** the underlying 60-day US-Iran negotiation window (from the June 17 Versailles MOU) expired Aug 17 with no deal.
- **Brent was ~\$93-95/bbl as of Aug 20-21**, a second straight weekly gain (~6%), the highest since late July — now reversed by this cycle's two-week Brent decline above.
- **Strait of Hormuz traffic: trackers disagreed on the exact daily transit count as of Aug 22** (estimates ranged ~1% to ~20% of the pre-war ~130-170/day baseline) — now superseded by this cycle's Aug 28 briefing.

From the Aug 22 morning draft (score set 2026-08-22_draft) — carried forward, casualty framing softened above:

- ★ ★ **NEW** — a fatal strike on the Hormuz tanker-attack campaign's latest victim (CORRECTED: not the first fatality, contrary to this draft's earlier framing). The Liberia-flagged tanker Amara was boarded near Qeshm Island Aug 17; Iran's Fars News says it's held for non-payment (Reuters, Newsweek, ABC News, Al Jazeera, Fox News, RFE/RL, Epoch Times, Daily Caller, OANN, FXStreet, Korea Times, India TV, and Time. The first acknowledged US strike on Iranian territory was the \$100M+ Al Jazeera-owned Metro Venetian (Aug 24) and Al Salam II (Aug 25) incidents — the third such hit in the same window.
- ★ ★ **NEW** — the first Iranian vessel seizure since June 22. The Liberia-flagged tanker Amara was boarded near Qeshm Island Aug 17; Iran's Fars News says it's held for non-payment (Reuters, Newsweek, ABC News, Al Jazeera, Fox News, RFE/RL, Epoch Times, Daily Caller, OANN, FXStreet, Korea Times, India TV, and Time. The first acknowledged US strike on Iranian territory was the \$100M+ Al Jazeera-owned Metro Venetian (Aug 24) and Al Salam II (Aug 25) incidents — the third such hit in the same window.
- ★ **Correction to the record:** the UAE missile-attack claim (Aug 18) remains single-source (UAE MoD only; Iran denies, calls it a possible "false flag") and is NOT the first direct attack on a UAE military base.
- **No new US/CENTCOM strikes on Iran since the Aug 1 stand-down** (GlobalSecurity Day-175 tracker) — the pause holds, a modest stabilizing factor.
- **Sanctions remain mostly rhetoric.** Treasury Secretary Bessent has repeatedly promised the "toughest sanctions in history" / to "collapse Iran's economy," with the actual package, which has not yet been unveiled.
- **Brent ~\$93-95/bbl (Aug 21)** (TradingEconomics, Vantage, Fortune) — up modestly on sanctions anticipation, still well under the \$100 flip line.

- **Iran said Aug 22 it will allow Iraqi oil tankers through the Strait** (state media) — a mild, narrow normalizing signal amid otherwise hardening posture.
- **Mediation continues without a breakthrough**; Qatar/Oman still pushing diplomacy. Tehran "dismissed" Trump's sanctions threats Aug 21 and called the new sanctions a "declaration of war."
- **No new confirmed US combat death found in this window.**
- **BTC closed at \$77,169.40 on Aug 22** — up +7.4% from Aug 20's close of \$71,882.92 (Bitstamp). See The Claim for the honesty check on this divergence from the pillar's own evidence.

Carried forward from Aug 18-20 (still load-bearing — the UAE "novel escalation" framing is corrected above, not repeated here):

- **The UAE reported Iran fired two ballistic missiles at its territory Aug 18; Iran denies it, calling it a possible "false flag."** Bloomberg, CNN, and CP24 (Aug 18) report the UAE says it was hit by two ballistic missiles. Iran denies it, calling it a possible "false flag."
- **The UAE suspended all trade, commercial, and financial dealings with Iran, announced Aug 19** (CNN, Washington Post, Fortune) — a dated, corroborated, structural response, was initially flagged as a possible second incident by this cycle's adversarial pass — confirmed on reconciliation to be the same Aug 18 episode, not a new one.
- **A commercial vessel was struck by an unknown projectile in the Strait, Aug 18**, causing engine damage and one crew injury (UK Maritime Trade Operations).
- **The Iran-Oman Hormuz route deal remains unsigned as of Aug 20-22.** Iran claims route coordinates were agreed Aug 18; Oman has not confirmed.

Carried forward from Aug 16-18 (independently re-verified against fresh primary sources this cycle — all confirmed accurate, still load-bearing):

- ★ **The 60-day MoU window formally lapsed Monday, Aug 18, without a signed deal.** CBS News's live desk (direct-fetched) reports the deadline expired that day; Iran's foreign minister said "the window is closed." Trump told reporters he has "no time schedule" to resolve the conflict (a framing he softened, per above, on Aug 19).
- ★ **Trump threatened Oman.** In a Fox News interview (Aug 17, per CBS's live desk), Trump said the US would take action if Oman "gets in the way" of reopening the Strait, and that "the US is not going to let anyone block the Strait."
- ★ **Strait of Hormuz traffic collapsed further.** CBS News's live desk, citing maritime monitors, reports only 3-5 vessel transits over the Aug 15-16 weekend, versus 31 the prior week. *more defensible figure is closer to ~110/day. The discrepancy is flagged here for transparency; it does not change the direction or size of the collapse, which is stark under either framing.*
- **Brent rose to ~\$90.9-91.0/bbl (Aug 17-18)** — up 2.7% on Aug 17 per Yahoo Finance/Fortune/TradingEconomics, from the \$87-90 range priced in Aug 13-16 — still well under the \$100/bbl mark.
- **BTC closed at \$64,285.10 on Aug 18** — +2.1% vs. Aug 16's close of \$62,937.03 (Bitstamp).

Carried forward from Aug 14-16 (still load-bearing):

- ★ **Three ADNOC tanker incidents in 48 hours (Aug 14-15), comparable in kind to the established pattern.** The UAE accused Iran/IRGC of striking two ADNOC vessels Aug 14 (Al Jazeera) and Aug 15 (Reuters), called it "piracy." No new state targeted, no casualties at the time — now compounding into the Aug 18 shipping-collapse picture above.

Carried forward from Aug 11-14 (still load-bearing):

- **Aug 13 — Hormuz deal remains unsigned, stuck on hardened compensation demands from both sides.** Reuters, US News, NBC, Washington Post, Al Jazeera, and The Hill (six days) all report the deal is "very close" but stuck on "hardened" compensation demands. Demand to include damages "to the people of Lebanon, Syria, Yemen, and Gaza" — a hardening of the same dispute, not a new demand category.
- **Brent eased to ~\$87-90/bbl** (from the \$98-100+ spikes logged in late July) as Hormuz traffic stayed low as of Aug 13-14; a live tracker (straits.live) showed the Strait at "day 166" of closure.
- **Aug 13 — Araghchi again called the Hormuz deal "very close" while conditioning full reopening on the US "making amends" over the June MoU** (CNN, NPR, Al Jazeera, France 24).
- ★ **Aug 11 — a Houthi "double-tap" missile strike on the cargo vessel Tihamah in the Bab al-Mandeb Strait (Red Sea, not Hormuz) killed 6 (4 crew, 2 rescue workers)** per Yemeni sources. Aug 9 Jazan refinery strike already logged without moving P.
- **Iran's Supreme Leader reshuffled top military leadership (new armed-forces chief of staff, new IRGC commander)** — a structural development with an ambiguous, not-yet-legible impact.
- ★ **Houthi forces drone-struck Saudi Aramco's Jazan refinery on Aug 9**, a 400,000 bpd facility on Saudi Arabia's Red Sea coast. NBC News, Al Jazeera, CBC, NPR, UPI, and Al Jazeera reported.

Carried forward from Aug 8-10 (still load-bearing):

- ★ **Iranian FM Araqchi says the Oman shipping-route deal is "very close" but conditions full reopening on new demands, including US compensation to Iran.** Reuters (via Investing.com) reports Araqchi said the deal is "very close" but conditions full reopening on new demands, including US compensation to Iran. Reuters (via Investing.com) reports Araqchi said the deal is "very close" but conditions full reopening on new demands, including US compensation to Iran.
- ★ **The UAE says Iran struck another ship in the strait; Oman condemns "repeated attacks."** The same Reuters report: the UAE separately reported a fresh Iranian strike on a vessel in the Strait.

Carried forward from Aug 1-8 (still load-bearing):

- ★ **Five separate Hormuz tanker/shipping incidents, Jul 31 - Aug 5, that daily two-day checks missed or undercounted.** The LNG carrier Gaslog Shanghai was struck and disabled Aug 5; explosions were reported near Kumzar (Aug 5). The IMO's cumulative incident tally now stands at 65 since the war began (Bloomberg/UANI), with Hormuz traffic described as "at a standstill."
- ★ ★ **NEW — a new front: Iran-backed Houthi forces struck Najran, Saudi Arabia on Aug 7**, wounding 11 civilians (7 Saudi, 1 Yemeni, 2 Egyptian, 1 Pakistani, including a 4-year-old child).
- ★ ★ **NEW — Saudi Arabia, Turkey, and Pakistan signed a mutual-defense "Mecca" pact on Aug 7** (an attack on one is an attack on all) — a structural, deterrence-oriented development.
- **Aug 7-8 — Iran announced what it calls a finalized agreement with Oman on Hormuz shipping**, banning American and Israeli vessels and fining violators up to 20% of cargo value. The deal is unresolved, not narrowed. This claim's specific draft terms trace to Fars News (Iranian state media, citing one parliamentarian) and should be labeled Iran-sourced, not independent.
- **Correction: Trump's Aug 2 "perimeters of a deal" framing was contested by his own later remarks.** Two days after claiming "the perimeters of a deal has been agreed to," Trump continued attacks or contradictions within 1-2 days each time).
- **Brent held a \$82-86/bbl range through the week** — up modestly, not pricing a resolved crisis.
- **BTC closed at \$65,006.64 on Aug 8** — essentially flat vs. Aug 7's close of \$65,000.00.

Carried forward from Aug 1-7 (still load-bearing):

- ★ **Aug 7 — the Iran-Oman joint statement remained unsigned as of that check, still in final drafting.** Iran's Foreign Ministry spokesman Baghaei described the statement outlining the deal.

Carried forward from Aug 1-6 (still load-bearing):

- ★ **Aug 6 — Iran and Oman reached an "understanding in principle" on the Hormuz route map.** Iran's Deputy Foreign Minister Kazem Gharibabadi told IRNA: "an understanding in principle has been reached."
- ★ **Aug 6 — the fee dispute first surfaced as the remaining obstacle.** Iran is seeking fees of 5-7% of cargo value from transiting ships; Oman is discussing fees around 3%; Washington Post reports.

Carried forward from Aug 1-5 (still load-bearing):

- ★ **Aug 1 — the first quiet night in days.** globalsecurity.org's day-by-day war tracker reported no new US strikes on Iran overnight Jul 31 following the heavy Jul 29-30 wave; Brent fell to \$80/bbl.
- ★ **Aug 1-2 — fresh, multi-source-corroborated attacks on Hormuz shipping.** Bloomberg: a Qatari LNG tanker (Gaslog Shanghai) was struck while transiting the Strait. UKMTO/globalsecurity.org reports.
- **Aug 2 — the Saudi-led naval coalition kept solidifying.** Al Jazeera, The National, DefenseMirror, and Tribune reported 14 confirmed member countries and 43 nations represented.
- ★ **Aug 4 — Trump canceled a planned joint US-Israeli strike on Iranian energy infrastructure.** Multiple outlets (NPR, Axios, Al Jazeera, NBC, Washington Times, Breitbart, JPost, The New York Times) reported the cancellation.
- **Aug 4 — Iran continues to deny any direct US talks.** Foreign Ministry spokesman Baghaei: "we currently have no negotiations with the United States; the negotiations are with Oman."
- ★ **Aug 4 — a bulker was struck by a projectile and suffered a full blackout in the Strait** (globalsecurity.org, iransitrep.com) — active attacks continued even as the diplomatic framing shifted.
- ★ **Aug 5 — the first public terms of a 60-day interim Hormuz deal.** Axios, Deccan Chronicle, Israel Hayom, InvestingLive, The National, and Al-Quds report the US, Iran, and Oman agreed to a 60-day interim deal within 30 days. The US aimed to announce the deal Aug 6.
- **Aug 5 — still unsigned.** CNN quotes a Gulf official putting the odds of an Iran-Oman deal by Friday at only 50-50. The Strait remains formally impassable to normal traffic pending a deal.

- **BTC closed at \$64,661.55 on Aug 5** — up ~1.7% from the \$63,579.68 close on Jul 31, continuing its resilience through a week where the war’s own risk signal moved both up and

Carried forward from the July 30 full refresh (still load-bearing):

- ★ **The lull was real, then it broke: Iran's IRGC struck a US/CENTCOM base at Muwaffaq Salti, Jordan (Jul 28).** Confirmed by 5+ independent outlets (Al Jazeera, CNN, Axios, RT, etc). Trump was publicly touting "very friendly" talks with Netanyahu at the White House — both things happened.
- ★ **The US retaliated with a "heavy wave of strikes" (Jul 29)** — explosions reported at Bandar Abbas, Kish Island, Qeshm Island, and Khuzestan Province (CNN). Trump: "it's our turn to strike."
- ★ **NEW FRONT — Iraq: US and Saudi Arabia conducted joint strikes on Iran-backed Popular Mobilisation Forces across Iraq (Jul 29),** CENTCOM-confirmed, hitting sites in Baghdad and Basra, a direct co-belligerent in this war. A claim that "six Iranian IRGC advisors" were also killed is single-source (unnamed Iraqi militia officials) — flagged, not used.
- ★ **NEW FRONT — Egypt: a drone hit a US-owned FSRU vessel and a tanker at Egypt's Damietta port (Jul 29)** — the first strike on Egyptian soil in this war (Al Jazeera, CNBC, Times of Israel).
- **Brent rebounded from the lull-low.** Brent fell to ~\$90/bbl (-6.7%) during the Jul 25-27 lull, then rose back to ~\$92-93/bbl by Jul 30 (+~3.5% day-over-day, +24.6% month-over-month).
- **Iran continues rejecting a direct-talks framing even as Trump claims progress.** Iran FM spokesman Baghaei, Jul 27: "We have no negotiations with the United States at present." Iran rejected a US management proposal on Jul 28, insisting on controlling its own lane.
- **Congress split on competing War Powers resolutions (Jul 23, carried forward, no new action since):** House passed a nonbinding one 214-208 (4 GOP defectors); the Senate's version is still pending.
- ★ **The Pentagon casualty-count dispute (18 vs. 14) is confirmed stale, not a fresh Jul 30 event.** The DCAS toll briefly rose to 18 (Jul 23) then reverted to 14 (Jul 24) amid a credibility article as if it were new; it is not.
- **Strait of Hormuz remains effectively closed to normal commercial traffic** — ~10 transits/day versus a normal baseline near 88/day (IMF PortWatch), unchanged from prior cycles.
- **No formal MoU withdrawal by either side.** The 60-day window to ~**Aug 16** remains intact and un-triggered.
- **Israel remains out of direct engagement** — no confirmed direct Israel-Iran exchange since June 7-8; the widened fronts (Iraq, Egypt) involve the US, Saudi Arabia, and unclaimed others.
- **The "Layla" tanker claim (Jul 23) remains unconfirmed** after a full week — AIS data dark, no primary confirmation found. Downgraded from "watch" to "discard pending new evidence."
- **The baseline (still true, still load-bearing):** June 2025 "12-Day War" — BTC dipped to a **~\$98,225 intraday low**, reclaimed \$107k+ within days, a fast V. The far larger 2026 war would be a different story.

The Prize

Illustrative only — not price targets, not advice

The upside is still the **"buy-the-invasion" rebound**. Anchors: Russia-Ukraine (Feb 24, 2022) — BTC fell ~8% to a **~\$34,300 intraday low**, posted a +14.5% up-day on Feb 28, ending the cycle with a new high. The Aug 30-Sept 2 direct US-Iran exchange escalated sharply (a ~50x-larger US strike wave, the war's first direct strikes on Iranian government tankers, a four-country Iranian retaliation, unretracted, but has not been confirmed reopened either. As of this cycle (Sept 19), the picture is mixed rather than clearly escalating further: Iran has gone nine straight days without a new attack, but **\$81,224.46** on Sept 19, up sharply from \$78,046.80 on Sept 18 — this pillar's own P held flat this cycle, so that move tracks other pillars' news (notably nothing that cleared any price ceiling, unchanged in shape: a fee/compensation/sovereignty compromise both sides actually accept, signed and holding a full clean week without a new attack, fatality, or seizure, would be a good move could move this either way — the Prize doesn't feed the math, it tells you what the lean is worth acting on.

The Other Side

The strongest honest case this is wrong

- **The cut may still be too small, even at 1/9/27/47/74.** Nearly 100 targets, the war's first direct tanker strikes, and a four-country simultaneous retaliation is a genuinely different order of magnitude from this pillar has always flagged as the real tail risk, and that keeping the cut "under 8 points per window" mechanically, out of habit from smaller prior incidents, is itself a mistake worth noting.
- **Leaving it as a draft may itself be too cautious.** The independently-confirmed facts alone — CENTCOM's own ~100-target count, the first-ever tanker strikes, the four-country retaliation, and the Omani corridor — caveat as an excuse to soften a call the non-disputed facts already support, rather than a genuine evidentiary gap.
- **The cut may be too small.** This report explicitly pre-declared "a resumption of direct US strikes on Iran proper" as the line that breaks the dip-buy thesis — and calibrated the action to a routine tanker incident, precisely because the report itself said in advance this class of event was different in kind, not just degree.
- **The cut may be too large.** One resumed-strike night after ~28-30 clean nights is, so far, a single interdiction event (stopping a mine-laying attempt) rather than evidence of a full-scale escalation. If it follows in the next few days, this cut may prove to have moved faster than the evidence ultimately warranted.
- **The Oman corridor confirmation (Aug 25) is not retracted.** Oman's own Foreign Ministry still has not walked back its Aug 25 joint statement — the first time both parties on the other side of the corridor have been named in a scoped shock.
- **The Aug 24 sanctions package is arguably a bigger structural story than this week's kinetic exchange.** It was the first Iran sanctions action in this war to explicitly name digital assets.
- **No confirmed US casualty, still.** The single hardest-edged clause of this pillar's own flip line — a confirmed new US combat death — remains unfired even after this week's exchange.
- **Thin sample, still.** The bullish long-term read rests on a handful of dip-and-recover events, all in a bull regime — geopolitical shocks don't always V-recover, and a fresh direct strike would be a different story.
- **Two more restraint signals landed this cycle, logged honestly — a reader could argue they're under-weighted.** The BRICS New Delhi summit's joint declaration (Sept 12) — signaling Houthis privately signaling they don't want direct US involvement in Yemen. Neither moves P (one is purely diplomatic, the other single-source as to substance), but this pillar log scoring decision is defensible.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. **As of Oct 10 (full weekly refresh, score set 2026-10-10_draft):** the Brent flip-line clause's basis could not be independently re-checked and Interior Minister kept a parallel Doha channel visibly active Oct 6, correcting the Sept 28 "stalemate" finding's emphasis without reversing it. P HELD FLAT on all five windows. **As of Sept 19 (full weekly refresh):** with six Gulf-state leaders; the NPT-withdrawal process continues moving but remains unacted (new row below); and the UN Security Council failed 11-2-2 on Sept 17 to renew its Iran-sanctions monitoring process could not be corroborated and was NOT USED — see the top rows. As of Sept 16, 2026: the IAEA's UNSC referral (Sept 9) and the 130-lawmaker NPT-withdrawal push (Sept 12-13) are the newest entries, driving statements and 20+ independent outlets; escalation continued sharply Sept 1-2 — a materially larger strike wave and a four-country retaliation; the Sept 5 tanker strike is CENTCOM-CONFIRMED and revealed its intraday Sept 9 for the first time since July 24; the IRGC retaliates for that strike by hitting Jordan's Al Azraq air base Sept 9, and Houthi forces seize the Yemeni port of Mocha Sept 10 closing in on Bab el-Mandeb. **Yemen's Red Sea coastline and seized Bab al-Mandeb's Mayyun Island** — a second global chokepoint moving from "closing in on" to actual island-level control, though it does not independently fire a fresh flip line. **Monday Sept 14 on Strait of Hormuz navigation, safe shipping routes and mine clearance — the first such gathering since the war began in February (Iranian MFA statement, primary, plus 6+ independent continued fighting on Sept 13 (a fatal vessel attack near Qeshm Island, a Houthi projectile on Jazan, ongoing Bab al-Mandeb combat). It does NOT fire the upside flip line, which requires a signed, US-accepted Sept 11), sponsorship undetermined (Trump's "probably Iran" is a single hedged remark) — neither the widening clause (Iraq is existing theater) nor the US-casualty clause fires.**

DATE	EVENT
Checked Oct 10 — UNVERIFIED this cycle, disclosed plainly, not re-asserted	The “sustained Brent close above \$100” clause could NOT be independently re-checked this week. The research sandbox's network blocks are eia.gov (the official EIA RB RTE / FRED DCOILBRENT EU series this clause is written against), plus centcom.mil and en.wikipedia.org. and carried forward on that basis only — not re-confirmed, not silently assumed unchanged
Checked Oct 10 — vessel-strike FREQUENCY up, CHARACTER unchanged, no fresh clause fires	Nine UKMTO warnings issued in October through Oct 5 (8 Strait of Hormuz, 1 Bab el-Mandeb) per trade-press relay of UKMTO data. Liberia-flagged tanker LIPSI, struck Oct 4 (engine-room fire, crew safe). Zero deaths, zero injuries across all nine; no group claimed responsibility for origin
Checked Oct 10 — diplomatic channel more alive than “stalemate” alone implied, but not enough to earn back a point	Qatar’s own MOFA said on the record Oct 6 that US–Iran contacts and message exchanges are ongoing (confirmed via multiple outlets). Interior Minister was in Doha the same day over the detained-pilots dispute, and the two sides agreed to send a technical delegation to Baghdad. EMPHASIS , not the finding itself — a parallel Doha channel stayed active even as the narrower UN-sidelines track went quiet
FIRE d Sept 28 — CONFIRMED ; the grounds for sitting above the floor are gone	The indirect UNGA-sidelines track reached a stalemate — the White House expected progress Monday morning, and by late afternoon Araghchi, left New York that evening. Reported with its grade: that Rubio <i>ordered</i> them out rests on one anonymous Axios original. first-party and on the record , citing a schedule communicated to State on Sept 17 — so the expulsion is DISPUTED and only the state's claim is confirmed. and Egypt have a revised draft realigning blockade, inspector-return and oil-waiver sequencing, and Trump said Sept 27 he expected that
CL AUSE LAST CONFIRMED FIRE d Oct 3, by a wider margin than this report had stated — UNVERIFIED this cycle (Oct 10), see the row above	As of the Oct 3 double-primary confirmation, the “sustained Brent close above \$100” clause was fired by roughly 14%, not marginally — Spot FOB: \$130.80 (Sept 15 peak) ... \$120.92 (Sept 24), \$116.01 (Sept 25), \$119.97 (Sept 28), \$113.96 (Sept 29, the last published re-confirmed) \$106.60/\$104.37 for Sept 24–25 — those were ICE front-month FUTURES prints mislabelled as the spot series. This cycle (Oct 10): network blocks, so no newer reading could be independently pulled — this figure is carried forward on the Sept 29 basis, not re-verified
Checked Oct 3 — vessel strikes continue, but NO fresh clause fires and attribution is NOT established	Four vessels struck Sept 28–29 (UKMTO), all transiting dark near Musandam, plus the Kuwait-flagged KOTC VLCC Kazimah III on Oct 2. Every source says “unknown projectile” and no group claimed responsibility — attribution to Iran is NOT established. Zero deaths corrected: Mersin Prosperity's operator is ADNOC, not Sinokor; Sinbad (115,949 dwt) is Aframax/LR2, not a VLCC. Al Funtas is IMO-
FIRE d Sept 25 — DE-ESCALATORY , named principal ON THE RECORD , 3 independent originals	FM Abbas Araghchi detailed a SEVEN-DAY plan outside the UN Security Council, conveyed to Washington via Qatar: ~4–5 days of estimated \$12bn in frozen assets, ceasefire on all fronts including Lebanon and Yemen), Strait reopens day six , nuclear talks begin. Reuters and Al Jazeera as independent originals. He added the US steps “are all already in the MOU”
FIRE d Sept 25 — DE-ESCALATORY , nuclear file, but CONDITIONAL	Pezeshkian offers to readmit UN nuclear inspectors in a CBS excerpt released Sept 25 ahead of the Sunday Sept 27 broadcast: “Trump commit to” — explicitly <i>if</i> the US accepts Iran's proposal. Materially softer than his own Sept 23 UNGA address <i>on inspector access</i>
FIRE d Sept 23 — ESCALATORY , and it FALSIFIES the abandoned Sept 24 draft	A cargo vessel was struck by an unknown projectile in the Strait of Hormuz , caught fire, lost control and drifted; crew evacuated; incidents occurred Sept 23–24 — wrong. UKMTO did not say killed or injured, so this report does not say “two killed” ; the vessel confirmed fatality is attributed to the Indian Embassy in Oman (19 Indian nationals aboard). ukmt0.org 403'd — wire-derived, not primary
FIRE d Sept 24 and overnight Sept 25–26 — escalatory, multi-source	Two Houthi salvos at Saudi Arabia: six ballistic missiles intercepted toward Taif and the Yanbu area (Sept 24); two more plus two d-
DORMANT as of Sept 26 — a previously fired clause has lapsed	No announced US strike on Iranian territory since SEPT 1 , roughly 3.5 weeks. centcom.mil returned 403 on both release indexes, so to report”) plus the absence of wire coverage — wire/ISW-derived, not primary-verified
LAST CONFIRMED FIRE d — a flip-line clause, market price (UNVERIFIED this cycle, Oct 10 — see the top rows)	As of its last confirmation, Brent remained well above \$100 — and by MORE than this report had stated; see the Oct 3 correction — closes were \$120.92 and \$116.01 , with \$113.96 on Sept 29 (the last published reading this report could reach). The figures that follow are \$106.60 Sept 24 (+3.4%, intraday high \$108.23) , then \$104.37 Sept 25 (–2.09%) , ~+20% on the month. This supersedes the last read. Oct 10: fred.stlouisfed.org and eia.gov both returned policy-level network blocks, so this could not be re-pulled this week
NOT FIRE d — checked Sept 26, no recovery	Hormuz transits: nine on Thursday Sept 24 from 14 the previous day, 10-day average 18 , against a pre-war baseline of ~125 large tankers 14% of normal . An IMF PortWatch reading of 1 is dated Sept 20 and uses PortWatch's own 85/day baseline — not comparable, and
NOT FIRE d — the combat-death clause, checked again Oct 10, an anonymous-sourced undercount claim resolved to single-origin	Pentagon DCAS holds at 19 (last updated through Sept 26: 11 hostile, 8 non-hostile). The 19th was Capt. Bianca C. Wilkerson, 37, killed by the cause as “undetermined,” not “medical.” No new US combat death found this window. The open thread is now resolved, not — Washington Post and AP, traces on checking to the same pool of anonymous US officials in both outlets’ reporting — so under the two bylines, and is reported here as a contested, anonymous-sourced undercount claim, not fact
REPORTED , NOT SCORED — and it argues AGAINST this cycle's up-move	The WSJ reported Sept 25–26, citing UNNAMED US officials, that Trump REJECTED the seven-day plan and expects to resume briefings. source: Bloomberg, CNBC, The Hill, JPost and Ynet all cite the WSJ; no on-record White House confirmation exists . WSJ's own change again”
REPORTED, NOT SCORED — still single-original-source	The National's Sept 23 60-day “road map”: Semafor attributes it verbatim to “The National reported” rather than confirming independent days with Qatari/Pakistani/Egyptian mediation versus seven days via Qatar
WATCH — the next concrete signal either way	Whether the US responds ON THE RECORD to the seven-day plan. Rubio called the Sept 24 talks “largely positive” but explicitly not said Sept 25 it “will not stop punishing the US until Iran's seven conditions are met”
FIRE d Sept 24 (event dated Sept 22) — on-record, multi-sourced, this cycle	President Trump’s UN General Assembly address, Sept 22, 2026 (Axios, NBC News, CBS News, Times of Israel, PBS, Bloomberg, etc.) made with Iran that lets them rebuild and create a far greater country than it ever was before ... or do I annihilate the Islamic Republic right after the election because it doesn't make sense for them not to. They're waiting to see how I do in the midterm election.” Not Witkoff/Kushner-Araghchi meeting but not the speech — that omission is logged, not folded in quietly
Sept 23 — REPORTED , NOT SCORED (single-narrative source)	<i>The National</i> (Sept 23) reported Iran presented the US a “road map”: a regionwide ceasefire of up to 60 days, phased Strait of Hormuz via Qatari, Pakistani and Egyptian mediators. Gulf News and Aaj English TV carry it but label it “report” in their own headlines — syn-

Sept 17, reported Sept 17-18; UPCOMING Tuesday Sept 22 — dated, multi-sourced (Axios original, plus Jerusalem Post, Politico/Political Wire, Israel National News, Common Dreams, Breitbart, CBN News — 5+ independent)	Trump told Axios he faces a "big decision" on whether to "annihilate" the Iranian regime or not , ahead of a Tuesday Sept 22 UN (Saudi Arabia, UAE, Qatar, Bahrain, Kuwait, Oman)
Struck Sept 17-18 — CONFIRMED via IRGC's own statement (IRNA, primary, via GlobalSecurity.org reprint) plus independent outlets (The Hill, Bernama, IranWire, TFTC, Parapolitika, Rio Times)	The IRGC struck the Togo-flagged tanker "Trend" in the Strait of Hormuz on Sept 17-18; crew reported safe, no confirmed spill; no C
Sept 7-13, still unenacted as of Sept 19 — corroborated but mostly Iran-linked/state-affiliated (Iran International, Tehran Times, IranWire, APA.az, anews, Militaryni, IFP News)	Iran's parliament continues moving toward, but has NOT enacted, NPT withdrawal : 130 lawmakers signed a further Sept 7-13 sta Presidium spokesman Abbas Goudarzi said withdrawal "can easily" be done; a bill was submitted for expedited consideration but is "still being prepared"
Sept 18 — PRIMARY (UN press releases sc16455 and related) plus Euronews and Security Council Report's monthly forecast	The UN Security Council failed 11-2-2 (Russia and China vetoing) to renew its panel of independent experts monitoring reimpos Pakistan abstaining, deepening the ongoing Russia/China-vs-E3 legal dispute over the 2025 "snapback" sanctions reimposition

Sept 10 light daily catch-up (score set 2026-09-10_draft), prior cycle: two new dated facts since the Sept 9 baseline. (1) CENTCOM/Jordan confirm the IRGC retaliated for the Sept 8 five-tanker strike (corroborating Jordan's own military statement). Jordan is a repeat target (struck previously Aug 30-31), so the widening-to-a-further-new-state clause does NOT fire; CENTCOM/Jordan both confirmed and rejected as uncorroborated against CENTCOM's own no-casualties statement). (2) Iran-aligned Houthi forces seized the Yemeni Red Sea port city of Mocha on Sept 10, closing in on control of the clearing the sufficiency bar. This is the same Houthi/Yemen actor and theater already priced (not a strike on a further new state), and no strait closure or shipping interdiction has actually been confirmed. **\$100/bbl for a second straight session (CNBC: Brent above \$101 Wednesday Sept 9 for the first time since May; TradingEconomics: ~\$101.25 Thursday Sept 10) — more persistent than Sept 9's \$100/bbl clause. Net: a repeat-pattern regional strike plus a new-but-same-actor Yemen/Red Sea territorial escalation, both intensifying the trend already priced without crossing any flip-line threshold (thesis). No window moved more than 1 point, sourcing clears the primary-source-plus-multi-outlet bar, and the master FINAL NUMBER's call band did not flip (Neutral→Neutral equal-weight, no change).**

Sept 9 light daily catch-up (score set 2026-09-09_draft), prior cycle: CENTCOM's own press release ("US Destroys 5 IRGC Tankers After Iran Targets Another American Warship," centcom.mil) confirmed missiles TWICE over the preceding two days. Corroborated by 5+ independent outlets (NBC News, CBS News, SBS, RedState, GlobalSecurity.org) in addition to CENTCOM's own release — clearing the sufficiency bar. This is the same Houthi/Yemen actor and theater already priced (not a strike on a further new state), and no strait closure or shipping interdiction has actually been confirmed. **\$100/bbl for a second straight session (CNBC: Brent above \$101 Wednesday Sept 9 for the first time since May; TradingEconomics: ~\$101.25 Thursday Sept 10) — more persistent than Sept 9's \$100/bbl clause. Sept 8 light daily catch-up (score set 2026-09-08_draft), prior cycle: Iran's SNSC secretary Mohsen Rezaei announced on-record (Iranian state TV, carried by Press TV and Tehran Times), that an Oman corridor agreement would be signed "in the coming days." Corroborated by 8+ independent outlets (Al Jazeera, The Hill, RTE, Anadolu Agency, Newsbytes, WFLA/Nexstar, GlobalSecurity.org). **boundaries, have yet to be announced," and no zone had actually been declared as of this cycle's research cutoff. None of this pillar's flip-line clauses independently fire: DCAS US KIA remains at 18 (up from Day 190's 87/3/2 on Sept 3) is a continuation of the already-priced trend, not scored separately. No permanent Iran-Oman corridor deal has been signed. P RE-RATED DOWN, modestly: 1mo held at the near-floor 1, 3mo 7→6, 6mo 24→23, 12mo 44→43, 36mo 72→71. Auto-stamp decision: this is an ordinary light daily touch, research access was full (WebSearch/WebFetch w/ no restrictions). **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."****

Sept 6 light daily catch-up (score set 2026-09-06_draft), prior cycle: CENTCOM's own on-the-record press release (centcom.mil) now confirms the Sept 5 tanker strike this pillar had explicitly priced (permanently disabled near Jask), and M/T Kylo (completely destroyed in the Gulf of Oman) — in retaliation for the IRGC firing ballistic missiles at two US Navy warships (an aircraft carrier and a destroyer). **sufficiency bar the Sept 5 baseline explicitly withheld on, and reveals a direct, unprovoked IRGC missile attack on US Navy vessels rather than a quiet single-tanker interdiction. Separately, Sept 5's \$100/bbl clause. Net: a repeat-pattern regional strike plus a new-but-same-actor Yemen/Red Sea territorial escalation, both intensifying the trend already priced without crossing any flip-line threshold (thesis). No window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar (CENTCOM's own release), and the master FINAL NUMBER's equal-weight call band did not flip (Neutral→Neutral equal-weight, no change).**

Sept 3-5 re-check, held flat: Iran fired a second retaliatory wave Sept 3 on Ahmed al-Jaber AB (Kuwait) and Al Minhad AB (UAE) — a US official confirmed no US-manned facility was hit and no US casualties were reported. **developments logged, NOT used to move P: (1) Reuters shared images/video with four independent weapons experts who concluded the Sept 1 Kuhestak wedding-party strike was likely a direct result of Iranian responsibility (VP Vance: "extremely skeptical," Sept 4, calling it under investigation), and the confirmation resolves attribution of an ALREADY-PRICED Sept 1-2 event rather than describing new fact. (2) independent Western multi-source confirmation as of this research pass, so per the sufficiency rule this single-narrative claim is NOT used to move P. WATCH NEXT CYCLE: if independently confirmed, the Taher ridge would trigger a "large-scale attack" on Israel; the IDF took the ridge Sept 3, but no such attack has been confirmed as of this run — a live pending trigger, not a fired one. P HELD flat. Auto-stamp decision: this is an ordinary light daily touch, research access was full (WebSearch/WebFetch w/ no restrictions). **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."****

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2), this version: independently re-verified via WebSearch. The Sept 5 tanker report has firmed up considerably since the daily touch a few hours ago. **broadcaster editorially independent of and adversarial to Tehran — obtained video of three US radio warnings ordering the crew to abandon ship before the strike, corroborating that a strike occurred, but does not independently confirm or denying this specific strike as of this research pass (distinct from CENTCOM's on-the-record July 14-15 naval-blockade doctrine, under which the Curacao-flagged M/T Belmar was targeted). Separately, Sept 5's \$100/bbl clause. Net: a repeat-pattern regional strike plus a new-but-same-actor Yemen/Red Sea territorial escalation, both intensifying the trend already priced without crossing any flip-line threshold (thesis). No window moved more than 2 points, sourcing clears the primary-source-plus-multi-outlet bar (CENTCOM's own release), and the master FINAL NUMBER's equal-weight call band did not flip (Neutral→Neutral equal-weight, no change).**

This is a light daily catch-up against the Sept 1 baseline (7/15/32/50/75, auto-stamped) — but it turned into the sharpest single-cycle move since the flip line itself fired Aug 30. **The load-bearing development is that Houthi forces, an Iran-aligned proxy, have moved from "closing in on" to actual is giving them Yemen's entire Red Sea coastline, and separately seized Mayyun (Perim) Island in the strait itself, with fighting continuing for Zuqar Island — confirmed by 6+ independent outlets counterweight, logged honestly. Separately, UKMTO's own Warning 133-26 confirms two more vessels struck near Khasab, Oman Sept 10 (one afire); an IRGC claim of a Sallidrone strike is significant. **US-casualty clause fires — this is a severity escalation of an already-fired flip-line environment, not a new flip-line event, but is a bigger step than the routine daily grind. P RE-RATED DOWN to 1/17/37/70** (from 1/2/18/38/70) — 3mo/6mo/12mo -1 each, 36mo held at the near-floor 1, 3mo 5→4, 6mo 22→20, 12mo 42→40, 36mo 72→71. **Auto-stamp decision:** this is an ordinary light daily touch, research access was full (WebSearch/WebFetch w/ no restrictions). **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."****

P RE-RATED DOWN SHARPLY: 1mo 7→1, 3mo 15→9, 6mo 32→27, 12mo 50→47, 36mo 75→74. Every window moved under 8 points, but this is the largest front-loaded cut since the Aug 30-31 "Iran proper" clause is escalating sharply in scale, which is what's driving the size of this move.

Still a **dip-watching pillar, not a panic-selling one** — the four-country retaliation hit repeat targets, most projectiles were intercepted, and no US casualty is confirmed. But the trajectory since the Aug 30-31 "Iran proper" clause is escalating sharply in scale, which is what's driving the size of this move.

Why this was originally left as a draft Sept 2, pending manual review: (1) the core wedding-casualty fact — the emotional and political driver of that day's four-country retaliation — is single-source; (2) the jump in scale — nearly 100 targets and the war's first-ever direct tanker strikes, versus two rocket/mine-launchers on Aug 30 — was a genuinely novel escalation this pillar's prior research pass. **misescalated cut. It also independently flipped the master FINAL NUMBER's equal-weight call band (Mild Bull → Neutral) versus the last stamped set — under the rules in force that day, this a**

September 3, 2026 update: Alex reviewed this cycle's research (delivered as PDFs Sept 2) and widened the delegated daily auto-stamp policy in CLAUDE.md: a call-band flip and the size of the narrative wedding-casualty claim was correctly kept out of the P move under the sufficiency rule. Nothing about the underlying facts, sourcing, or the sizing of the cut changed — only the stamp authority, **this set is AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."**

Historical note: the paragraph above was the Sept 2 cycle's original manual-review flag, superseded by the Sept 3 auto-stamp policy widening and, again, by this cycle's own auto-stamp. L

What Changed Since Last Check

FULL WEEKLY refresh, October 10, 2026 (score set 2026-10-10_draft, LEFT AS DRAFT — AWAITING ALEX'S STAMP) — checked against the superseded 2026-10-03_draft2 (11/14/33/66) and the last COMMITTED BY ALEX, September 27, 2026): checked against the then-last-committed baseline, 2026-09-23_draft (3/3/16/35/66), via one primary-source research pass, a dedicated adversarial review, and a dedicated update. **see the divergence note in My Decision.**

October 10, 2026 — FULL WEEKLY refresh (score set 2026-10-10_draft), THIS VERSION, supersedes the quant-only daily touch immediately below: ran a full primary-source research pass on every load-bearing new claim. **Research access was MATERIALLY DEGRADED this cycle:** the sandbox's network proxy returned policy-level blocks (not fully accessible) — carried forward as last confirmed FIRED (Sept 29, \$113.96) rather than re-verified; flagged prominently for Alex to re-pull EIA/FRED directly once access allows. Two findings roughly

agreeing to send a technical delegation forward; this corrects the Sept 28 "stalemate" finding's EMPHASIS (a parallel channel stayed alive) without reversing the finding itself; (b) **million** zero injuries, no attribution claimed), so no flip-line clause fires. **One claim surfaced and then WITHDRAWN on adversarial re-check:** an initial pass produced a claim that Iran's Intercontinental Ballistic Missile (ICBM) test on Sept 28 was a "false alarm" report. A contested anonymous-sourced claim that the US combat-death toll is really 22–23 (WaPo/AP) traces to the same pool of anonymous officials in both outlets and remains **scored** for Alex's manual review — categorically required as a full weekly refresh, independent of the fact that the move size here is zero and that research access was itself degraded this week.

October 10, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged): re-checked this pillar's trigger table against primary sources via WebSearch. No UKMTO advisory board meeting since Oct 7. Rubio, Vance, Araghchi or Pezeshkian found dated since Oct 7. **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudication of the divergence against the independently-researched second October 3 weekly (see My Decision).

October 9, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged, but a cluster of dated UKMTO incidents re-checked and logged): re-checked this pillar's trigger table against primary sources via WebSearch. No new dated CENTCOM confirmed US combat casualty in this window; it does not add a new one-directional primary fact beyond what the Oct 7/8 cycles already logged, and the near-term escalation warning remains **scored** for Alex's manual review. config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudication of the divergence against the independently-researched second October 3 weekly (see My Decision).

October 8, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged): re-checked this pillar's trigger table against primary sources via WebSearch, specifically re-checked the Sept 28 and Iran's delegation left New York. **1mo held at 1** (already the floor) and **36mo held at 66** (nothing structural changed). The move is one point, not a collapse, because the mediation attempt was not merged. **Score decision: RE-RATED UP, modestly: 1mo 1→3, 3mo 1→3, 6mo 14→16, 12mo 33→35, 36mo held at 66.** No window moved more than 2 points; sourcing clears the primary-sufficiency rule. config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudication of the divergence against the independently-researched second October 3 weekly (see My Decision).

October 7, 2026 — LIGHT DAILY touch (qualitative set unchanged, but genuine new dated material found and logged): re-checked this pillar's trigger table against primary sources via WebSearch. No new dated primary fact found. **Athens press availability, multi-outlet:** Secretary of State Rubio said Iran has "lost complete control" of the Strait of Hormuz, that the strait is open, and that "there's almost as much freedom of navigation as there ever was." but it is directly contradicted by independent transit tracking: IMF PortWatch/TankerMap AIS data put Oct 4 Hormuz commercial transits at roughly 5–25% of the ~85/day pre-crisis level. here as what it is — an official claim — and not treated as verified fact. **(2) CNBC/AI Jazeera/NBC, Sept 30 and reconfirmed Oct 6, multi-independent, data-based:** a genuinely different perspective on the war, and at real cost: per the Joint Maritime Information Center (via CNBC), Iran attacked roughly 2 of every 100 vessels transiting the strait in Q3, with nearly 20 commercial ships hit in the last 3 months. mean the war itself has cooled. **(3) Vance, Oct 7, PRIMARY (Reuters exclusive interview):** VP Vance said Iran must make a "meaningful" reduction in nuclear enrichment capacity to reaffirm rejecting Iran's latest offer and warned operations could intensify after the midterms — consistent with, not a reversal of, this report's already-priced Sept 26 rejection and the Sept 28 and Iran's delegation left New York. **HOLD FLAT.** The de-escalatory export-recovery finding and the escalatory post-midterm-intensification warning are both genuine, dated, and multi/primary-sourced, and they roughly balance each other. **Score decision: RE-RATED UP, modestly: 1mo 1→3, 3mo 1→3, 6mo 14→16, 12mo 33→35, 36mo held at 66.** No window moved more than 2 points; sourcing clears the primary-sufficiency rule. config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudication of the divergence against the independently-researched second October 3 weekly (see My Decision).

- **Oct 1 light daily touch (quant-only; qualitative set unchanged):** re-checked this pillar via WebSearch against the Sept 26 baseline. Found two offsetting, multi-sourced developments: (a) the US and Iran exchanged a formal proposal and counterproposal via Qatar (Iran confirmed the proposal, though IAEA reports no actual verification activity on the ground). - ★ ★ **THIS CYCLE REVERSED ITS OWN CALL, and the reversal is logged in full rather than presented as the original conclusion.** An earlier draft of this same Sept 26 cycle scored the reasoning and the reason it failed are kept below, because a reader should be able to see the judgement change and audit it.
- ★ ★ **THE DECIDING FACT — PRIMARY, Sept 26:** speaking to reporters outside the White House, Trump said **"I reject their proposal," "I've rejected their deal,"** and "that deal would not be accepted." remarks. **The only person with authority to accept the plan rejected it on the record,** so under the sufficiency rule this both may and must move P.
- ★ ★ **THE CATALYST THAT IS NOW DEAD — Araghchi's seven-day plan, Sept 25.** Outside the UN Security Council, conveyed via Qatar: ~4–5 days of US steps (lift the blockade, withdraw US forces, etc.) originals; Araghchi added the US steps "are all already in the MOU." Real, well-sourced, and *refused* — which is why it ends up reversing the Sept 23 bump rather than extending it.
- **Why NOT a full reversal to the old 1/1/14/33/66 floor.** Two things are genuinely new since that floor, both on the record. **(1)** Trump paired the rejection with "I like making a deal to end the war." Pezeshkian offered on the record to readmit UN nuclear inspectors ("That is absolutely correct"), in a CBS excerpt released Sept 25 ahead of the Sunday Sept 27 broadcast — **scored** for Alex's manual review.
- **STILL NOT SCORED, and this is where the rule bites hardest — the excluded claims are the most bearish ones.** The WSJ's other assertions — that Trump privately told aides he was "not ready" to accept the plan, that *senior White House officials confirmed on record* they have "no intention of dismantling" the blockade was checked and **could not be found at all**; that the US and Iran exchanged a formal proposal and counterproposal via Qatar — **scored** for Alex's manual review.
- **LIVE CONTRARY EVIDENCE, weighed not buried:** Reuters (Sept 25–26, unnamed US official) has the US in "positive, constructive discussions with Iran through mediators" on the record. **Score decision: RE-RATED UP, modestly: 1mo 1→3, 3mo 1→3, 6mo 14→16, 12mo 33→35, 36mo held at 66.** No window moved more than 2 points; sourcing clears the primary-sufficiency rule. config/scores.json untouched; active set remains **2026-09-26_draft3**.
- ★ ★ **FALSIFIED — a cargo vessel WAS struck in Hormuz on Sept 23,** caught fire, lost control and drifted; crew evacuated; **two casualties.** UKMTO did not specify killed or injured US service members, so the combat-death clause is untouched. ukmt.org 403'd, so this is wire-derived rather than primary-verified.
- **CORRECTION to the Sept 23 committed set:** it called the Sept 22 contact the "first direct-channel" US–Iran contact. Witkoff's own account says the talks ran "through the mediation of a third party." **Score decision: RE-RATED UP, modestly: 1mo 1→3, 3mo 1→3, 6mo 14→16, 12mo 33→35, 36mo held at 66.** No window moved more than 2 points; sourcing clears the primary-sufficiency rule. config/scores.json untouched; active set remains **2026-09-26_draft3**.

Brent (these were FUTURES prints, and were wrongly captioned as the EIA spot series — Sept 24 from 14 the day before, 10-day average 18, against ~125/day pre-war — a first research pass had put this at 7–13/day, which understated it, and is corrected.** An IMF PortWatch/TankerMap AIS data put Oct 4 Hormuz commercial transits at roughly 5–25% of the ~85/day pre-crisis level. here as what it is — an official claim — and not treated as verified fact. **Score decision: RE-RATED UP, modestly: 1mo 1→3, 3mo 1→3, 6mo 14→16, 12mo 33→35, 36mo held at 66.** No window moved more than 2 points; sourcing clears the primary-sufficiency rule. config/scores.json untouched; active set remains **2026-09-26_draft3**.

- ★ ★ **NEW** — Oman's OWN Foreign Ministry co-confirmed a temporary Hormuz corridor, Aug 25, CONFIRMED via direct fetch of fm.gov.om/en/53722. A genuine upgrade: even "temporary" — Iran itself said Aug 26 the Strait "remains closed" pending US compliance. No fee terms disclosed.
- **NEW** — two more Hormuz "unknown projectile" tanker incidents, Aug 24 (off Oman, engine-room damage, disabled, no casualties, UKMTO) and Aug 27 (fire onboard, extinguished).
- **NEW** — CENTCOM commander Adm. Brad Cooper's on-record briefing, Aug 28: Iranian sea mines cleared from the shipping lanes; ~1,500 vessels transited since blockade ended.
- **NEW** — IMO's six-month casualty count settles at 19-20 dead across 68-70 incidents — the upper end of the prior 15-19 range.
- **NEW** — Trump announced Aug 25 the Strait had been demined, with a "zero tolerance" policy on new mines (Reuters, Axios, France24, US News) — undercut two days later by Iran.
- **NEW** — first confirmed Hormuz transit-volume uptick of the whole crisis: +30%+ week-over-week for the week of Aug 17-23 (USNI News/Lloyd's List) — 114 transits vs. 87 the prior.
- **NEW, FLAGGED AND NOT USED** — an IRGC spokesman's Aug 26 claim of an Iran-Oman Hormuz revenue-sharing agreement (Sepah News, Iranian state military source) is unconfirmed.
- **Brent eased for a SECOND straight week:** ~\$88.24 (Aug 25) → ~\$89.13-89.3 (Aug 27) → ~\$88.29-90.55 (Aug 28), down from ~\$93-95 (Aug 20-21) — moving further from the \$100 line.
- **No new confirmed US combat death Aug 22-29;** no new US/CENTCOM strikes found (GlobalSecurity Day-181 tracker, 28th consecutive clean night).
- **BTC closed at \$77,666.16 (Aug 29)** — up modestly from \$77,266.84 (Aug 22, Bitstamp).
- **Score decision: HELD FLAT at 14/22/38/54/76** — the confirmed sanctions escalation and the confirmed Oman corridor upgrade roughly offset; neither independently clears the threshold.

- **Aug 21 (partially delivered, then abandoned):** a session began delivering the Aug 20 draft's numbers but updated only 2 of 6 reports and never ran render/selfcheck/archive/commit.
- ★ **Aug 22 morning draft — a fatal strike in the Hormuz tanker-attack campaign,** Aug 17-18: bulker Minoan Dignity's chief engineer killed, 7+ independent sources. That draft first (17/25/38/54/76).
- ★ **Aug 22 morning draft — the first Iranian vessel seizure since June 22,** the tanker Amara, boarded near Qeshm Island Aug 17, still detained Aug 19. Confirmed accurate on adverse impact.
- ★ **Aug 22 morning draft — CORRECTION: the UAE missile claim is NOT the first direct attack on the UAE** as prior drafts framed it; UAE was hit in April and at Fujairah May 4. The "first" claim was a counterclaim.
- ★ ★ **NEW this cycle (draft2) — casualty toll re-verified as a range, not a point figure.** Second dedicated adversarial pass cross-checked Wikipedia's "2026 Strait of Hormuz crisis" (and **specific trackers**). This softens the morning draft's "roughly the 18th" framing, which was more precise than the sources support; corrected everywhere in this report.
- ★ ★ **NEW this cycle (draft2) — the UAE missile claim reconciles to one episode, not two.** Aug 19-dated reporting (Washington Post, NBC News, Haaretz, The Week, EgyptToday) confirmed.
- **★ NEW this cycle (draft2) — no new kinetic incident found Aug 19-22** on independent re-checking; CENTCOM's blockade tally continues climbing incrementally (68 vessels recorded).
- **No new US/CENTCOM strikes since Aug 1; sanctions remain mostly rhetoric** (one narrow OFAC-adjacent Hezbollah designation Aug 22, not the promised Iran-economy package).
- **BTC closed at \$77,169.40 (Aug 22)** — +7.4% vs. the Aug 20 close of \$71,882.92, a further move against the direction of this pillar's own evidence — logged as an honesty check.
- **Score decision (draft2):** versus the Aug 16 committed baseline: 1mo 20 → 14 · 3mo 28 → 22 · 6mo 41 → 38 · 12mo 56 → 54 · 36mo 77 → 76 — unchanged from the Aug 22 morning reasoning.

Retrieved & graded October 10, 2026, FULL WEEKLY refresh (score set 2026-10-10_draft; earlier sources below still stand for facts not re-checked this cycle) — click and judge the quality yourself. Official/primary sources are not re-checked. en.wikipedia.org — so the Brent entry immediately below could NOT be re-pulled this cycle and is carried forward at its Oct 3 reading, labelled as such; UKMTO/CENTCOM maritime data likewise rests on trade-reporting.

- **Qatar/Doha diplomatic track (Oct 6, 2026):** Qatar's Ministry of Foreign Affairs, spokesperson Dr. Majed al-Hashimi, on the record: US-Iran "contacts and visits are ongoing... exchange of messages... contact between pilots dispute (Iran: 3 military personnel held after a March 2026 aircraft incident in Qatari airspace; Qatar disputes "detained," cites recovered remains) and the agreement to send a technical delegation for investigation."
- **Maritime incidents, this cycle (through Oct 5, 2026):** trade-press relay of UKMTO data (direct UKMTO/CENTCOM retrieval blocked this cycle) — nine warnings issued in October (8 Strait of Hormuz, 1 Bahrain).
- **US combat-death undercount claim, re-checked:** Washington Post and AP both report a 22-23 figure (vs. DCAS's 19); checked and found to trace to the same pool of anonymous US officials in both outlets.
- **Brent crude (PRIMARY, double-confirmed Oct 3, 2026; UNVERIFIED this cycle — see the degraded-access note above):** EIA API v2 petroleum/pri/spt, series RB RTE (Europe Brent Spot Price FOB), cross-checked.
- **Explicitly NOT used (disclosed):** TradingEconomics Brent (self-described contract-for-difference data that "do not represent official Brent crude benchmarks," and internally inconsistent across two retrieval attempts).
