

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified August 16, 2026 (light daily touch off the Aug 14 committed daily baseline — AUTO-STAMPED)

Quant pillar recomputed on today's price. This is a light daily touch — check what's changed since the Aug 14 daily refresh (no daily cycle ran Aug 15), not a fresh deep-dive. All four qualitative pillars HELD FLAT: nothing found today exceeds what Aug 14 already priced in. CLARITY Act unchanged at 32/47/58/82/92: the Sept 15 2:15pm ET cloture vote is unchanged; the SEC's separate Aug 14 "Regulation Crypto" rulemaking vote was cancelled the day before citing an "unforeseen scheduling issue" — regulatory-limbo context, not a CLARITY-specific trigger. Iran War Risk unchanged at 20/28/41/56/77: three more ADNOC tanker incidents (two Aug 14, one Aug 15), no injuries, no direct Iranian claim of responsibility — comparable in kind to the Aug 8-13 pattern; the report's own "~Aug 16" 60-day Hormuz-window marker passed without a formal MoU withdrawal by either side, and Bloomberg's Aug 15 coverage still frames the interim arrangement as advancing, not collapsed. Tokenization unchanged at 52/60/66/74/85: no new dated catalyst found. Fed & Macro unchanged at 43/41/48/56/62: July retail sales (Census Bureau, Aug 14) missed hard (-0.6% m/m vs +0.1% expected) — a primary print reinforcing the Aug 13 dovish re-rate's direction, but not a previously-named pending trigger, logged as context. **This is a routine, well-evidenced daily cycle — no pillar P moved, no call band flipped — so it qualifies for, and has received, Alex's delegated daily auto-stamp authority (in effect since 2026-08-06).** Full score lineage (June committed → every draft through August 16, now committed) preserved in every report.

THE FINAL NUMBER · AUGUST 16, 2026 · EQUAL-WEIGHT MODEL (COMMITTED, AUTO-STAMPED)

+0.67

Mild Bull overall, time-arbitraged — the 1-month window remains Mild Bear, same call band as Aug 14, with every qualitative pillar held flat today. Equal-weight mean of the five window signals (-10 max 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. The number is positive because the far windows outweigh the near ones — it is *not* a buy-today signal; it is a "the storm is priced, the recovery isn't" 1-month window, not a research-driven change — every qualitative pillar was held flat. This reading was auto-stamped under Alex's standing delegated authority for routine daily cycles — see My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled August 16, 2026 · BTC \$62,937.03 (Bitcoin, last completed daily close, August 16, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, August 16 committed set, light daily, auto-stamped)

The Master Table

The whole thesis in five rows, on the August 16 committed set (a light daily touch off the Aug 14 daily baseline — no daily cycle ran Aug 15). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	AUG 14 MASTER	THE CALL
1 month	-1.41	-1.39	Mild Bear — unchanged call band; today's tiny move is quant mapping noise,
3 months	-0.82	-0.82	Mild Bear — the September FOMC still sits inside this window; unchanged too
6 months	+0.31	+0.31	Neutral — CLARITY and Tokenization still carry this window; Iran still drags ha
1 year	+2.14	+2.14	Bull — all five pillars still positive; the thesis window, unmoved
3 years	+3.12	+3.12	Strong Bull — law + adoption + cycle + value, unmoved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). For exact comparison. Machine-verified two ways.

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED

+0.67 = the equal-weight mean of the five MASTER signals above ((-1.41 - 0.82 + 0.31 + 2.14 + 3.12) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+1.22**, unchanged: nothing on the qualitative side — CLARITY, Iran, Tokenization, and Fed & Macro all held flat after today's research found nothing that exceeds what the Aug 14 set already priced in (see 1-month reading (-0.96 → -1.08), pure mapping noise from today's BTC close (\$62,937.03, +0.2% vs Aug 14), which nudges MASTER 1mo from -1.39 to -1.41 while THE FINAL NUMBER holds steady. **nothing moved, no call band flipped, nothing rests on a single-source claim — so it was auto-stamped under Alex's standing delegated daily authority (in effect since 2026-08-06) — see M**

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today.

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — August 16 committed scores, light daily touch (each report shows the full June → ... → August 16 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	−2.45	−0.41	+1.09	+4.61	+6.38	
Iran War Risk (20% · 8)	−2.88	−2.29	−1.01	+0.62	+2.38	
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	
Fed & Macro (20% · 8)	−0.95	−1.22	−0.26	+0.72	+1.25	
Bitcoin TA — quant (20% · 8)	−1.08	−1.57	−0.44	+1.73	+1.68	
MASTER — mean of the five	−1.41	−0.82	+0.31	+2.14	+3.12	

P lineage (June → Jul 8 → ... → Aug 12 → 13 → 14 → 16) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 12, committed) → 32/47/58/82/92 (Aug 13, committed) → 32/47/58/82/92 (Aug 14, committed) → 20/28/41/56/77 (Aug 12) → 20/28/41/56/77 (Aug 13) → 20/28/41/56/77 (Aug 14) → **20/28/41/56/77** (Aug 16, committed — held flat) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 52/60/66/74/85 (Aug 12) → 52/60/66/74/85 (Aug 13) → 52/60/66/74/85 (Aug 14) → 52/60/66/74/85 (Aug 16, committed — held flat) · Fed & Macro 35/36/42/52/61 → ... → 40/38/47/55/62 (Aug 12) → 43/41/48/56/62 (Aug 13, re-rated up on CPI/claims) → 43/41/48/56/62 (Aug 14, held flat, H.4.1 confirmed) → **43/41/48/56/62** (Aug 16, committed — held flat, retail sales miss log) · Bitcoin TA 42/36/45/68/71 (Aug 14) → **41/36/45/68/71** (Aug 16 — 1mo P nudged 42→41 on mapping noise). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five.

The Story, Window by Window

What the blend is saying on August 16, 2026, light daily touch (comparisons below are vs. the Aug 14 committed baseline; no daily cycle ran Aug 15)

- 1 month — Mild Bear (−1.41, was −1.39).** All four qualitative pillars held flat: Fed & Macro (−0.95), Iran War Risk (−2.88), CLARITY (−2.45), Tokenization (+0.29) all unchanged from Aug 14. (BTC \$62,937.03, +0.2% vs Aug 14) — noise, not a research signal. Nothing found in today's research exceeded the Aug 14 baseline.
- 3 months — Mild Bear (−0.82, unchanged).** CLARITY (−0.41), Iran (−2.29), Tokenization (+1.41), Fed (−1.22), and Bitcoin TA (−1.57) all held.
- 6 months — Neutral (+0.31, unchanged).** Tokenization (+2.18), CLARITY (+1.09), Fed (−0.26), Iran (−1.01), and Bitcoin TA (−0.44) all held. Historical average cycle bottom (~Aug 31, cycle mo
- 1 year — Bull (+2.14, unchanged).** All five pillars still positive and unchanged: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.72, Iran +0.62. Price sits 54% below power-law fair
- 3 years — Strong Bull (+3.12, unchanged).** Every pillar positive and unchanged: CLARITY +6.38, Tokenization +3.92, Iran +2.38, Bitcoin TA +1.68, Fed +1.25. A quiet news day, by design, do

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Fed & Macro (judged) and Bitcoin TA (computed) held their Aug 14 relationship almost exactly: P 43/41/48/56/62 vs 41/36/45/68/71 (1mo TA P nudged 42→41 on mapping noise, immo

worst 1-month signal in the set (−2.88), followed by CLARITY (−2.45, the cloture vote itself sits outside this window) — two independent stories (an unresolved, still-unsigned Hormuz/regional

read.

THE REAL DISAGREEMENT

Near-term: Tokenization is still the strongest near-term pillar (P 52); Fed & Macro sits at P 43, past a coin flip on the bear side; CLARITY remains below a coin flip (P 32) with the cloture vote st

more tanker incidents, still no signed Hormuz deal) found nothing to move it either direction. The master resolves it honestly: Mild Bear at 1 month, unchanged in call band from Aug 14.

Long-term: the four story pillars average about +3.5 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.38, Fed +1.25) versus the Bitcoin-TA pillar's +1.68 — still roughly 2.1× higher. Remo

Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

No named trigger fired today; three tanker incidents and a soft-window pass were checked and assessed as continuation. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT
Fired Aug 14-15, logged Aug 16	Three more ADNOC tanker incidents in the Strait of Hormuz (two Aug 14, one Aug 15) — no injuries, UAE/IRGC attribution, no direct Iranian claim
Passed Aug 16, not fired	The report's own "~Aug 16" 60-day Hormuz-window marker (dated from the June 15 MoU) passed without a formal MoU withdrawal by either side; Bloomberg (Aug 15) still frames talks as advancing
Fired Aug 14, checked Aug 16	SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote, citing an "unforeseen scheduling issue" — a separate rulemaking track from CLARITY
Fired Aug 14, checked Aug 16	July retail sales (Census Bureau): headline −0.6% m/m vs +0.1% expected, core −0.2% — first decline in nine months
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; Senate remains in August recess, no new floor-schedule or ethics-text development found
Checked, not found	No new dated RWA/tokenization catalyst beyond figures already priced in
Aug 19	FOMC minutes from the July 28-29 meeting (9-3 vote, first three-way same-direction dissent since Sept 2016)
Aug 20	Next Fed H.4.1 balance-sheet release and next weekly jobless-claims print (week ending Aug 15)
Sept 15	First CLARITY Act procedural (cloture) vote, precisely dated 2:15pm ET; zero confirmed Democratic yes votes as of Aug 16
Pending	Actual signing of a Hormuz agreement the US accepts — the compensation/blockade/sanctions disputes are the thing to watch, not either side's unilateral announcements
September	Next FOMC (with SEP/dot plot), week of Sept 15 — Senate returns from recess the same week

~Aug 31	Historical average cycle-bottom month (cycle month 27.9 currently) passes
Power-law fair value \$137,708	BTC \$62,937.03 sits 54% below fair value

The master flip line, unchanged from Aug 14: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, the conflict widening to a further new state, or a sustained Brent close above \$ or the Senate returning from recess with cloture failing and no released, WH-confirmed CLARITY ethics text (CLARITY) — any one of these firing would be a genuine escalation, not just routine daily noise. A signed (weekly close under \$50,000) remains unchanged.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

FINAL NUMBER WITH THIS PILLAR REMOVED	FINAL # (EQUAL-WT)
— drop CLARITY Act	+0.37
— drop Iran War Risk	+0.99
— drop Tokenization RWA	+0.30
— drop Fed & Macro	+0.86
— drop Bitcoin TA	+0.82
all five in (headline)	+0.67

Every leave-one-out final number stays **positive** (+0.30 to +0.99) — the sign never flips negative — but two of the five drops (removing CLARITY or Tokenization, the two least-positive near-term pillars) still round down to **Neutral** Mild Bull throughout. **The honest read: the "Mild Bull" headline call still leans more heavily on CLARITY and Tokenization than the other three pillars** — today's flat qualitative research didn't change which two pillars are loaded exists specifically to catch a single pillar (or two) quietly driving the whole call, and it continues to flag the same two.

My Decision

✓ **COMMITTED — AUGUST 16, 2026 (LIGHT DAILY TOUCH) · STAMPED BY ALEX (AUTO-STAMPED)**

MASTER: -1.41 / -0.82 / +0.31 / +2.14 / +3.12 · THE FINAL NUMBER: +0.67 (Mild Bull, time-arbitraged, committed)

This is a light daily touch off the Aug 14 committed daily baseline (no daily cycle ran Aug 15) — checking what's changed since Aug 14, not re-litigating it from scratch. All four qualitative pillars HELD FLAT: Senate remains in August recess, the cloture vote remains dated 2:15pm ET Tuesday, Sept 15, and no new floor-schedule or ethics-text development was found (Bitcoin Foundation, Troutman Financial Services' ~400-page proposal for token-offering exemptions, unrelated to CLARITY itself — was cancelled the day before, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, Genfinity) — regulatory-litigation the UAE accused Iran/IRGC of striking two more ADNOC vessels Aug 14 (Al Jazeera, no injuries) and a further ADNOC vessel was hit in the hull Aug 15 (CBS News live desk citing UKMTO, no injuries) — three new state targeted, no direct Iranian claim of responsibility); this report's own "~Aug 16" 60-day Hormuz-window marker (dated from the June 15 MoU signing) passed today without a formal MoU withdrawal ("Attacks Mount") still frames the interim arrangement as advancing, not collapsed — Araghchi's "very close" framing, conditioned on US compliance with the June MoU, is unchanged; WTI ~\$81/bbl, well under \$100, recirculating \$33.5B market-size figures don't clear the sufficiency bar as a new data point. Fed & Macro held at 43/41/48/56/62: July retail sales (Census Bureau, primary release, published Aug 14) missed 0.1% primary print reinforcing the same cooling-economy/dovish direction as the Aug 13 CPI-and-claims re-rate, but it was not a previously-named pending trigger for this pillar, so it's logged as reinforcing context. FOMC minutes from the Jul 28-29 meeting (due Aug 19) remain the next actual pending item. The only change anywhere is Bitcoin TA's computed 1-month reading (mapping noise on today's \$62,937.03 close) is invisible at the call-band level. **This is exactly the kind of routine, well-evidenced daily cycle the runbook's delegated auto-stamp authority (in effect since 2026-08-06) exists for: no pillar P move left for manual review.** The robustness check remains a standing yellow flag, not a rubber stamp: dropping CLARITY or Tokenization still rounds the call down to Neutral — the headline conclusion continues to host FOMC minutes, Aug 20 hosts the next H.4.1 and jobless-claims prints, Sept 15 now hosts both the FOMC week and the first CLARITY cloture vote, and continued Hormuz shipping attacks or an actual

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that this is auto-stamped under Alex's standing delegated authority, so it is the system's official stamped position.
