The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

*Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. **November 7, 2026 — FULL WEEKLY refresh, score set 2026-11-07_draft2, LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW:** four independent primary-source-first research passes (one per qualitative pillar) swept the full week, not just the daily delta. For CLARITY: the Senate returns for its lame-duck session Monday Nov 9 with a permitting bill first on the floor, not CLARITY; no floor, committee, or cloture action since the Sept 15 failed cloture vote; Alaska and Mississippi Senate races remain uncalled but don't change the already-priced Democratic chamber-control read; no SEC/CFTC/Federal Register action dated Nov 5-7; Warren's expected Banking-chair role unchanged. Nothing cleared the sufficiency rule. **HELD FLAT at 10/25/43/70/91**, identical to the 2026-11-07_draft committed baseline (this morning's light daily touch) it builds on. Per CLAUDE.md, full weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of outcome. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31** — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). **P HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was **AUTO-STAMPED** alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master*

call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; ***COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026****, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92.* ***Sept 3: held flat a further time*** *— nothing material found on any pillar that cycle.* ***Sept 5, light daily catch-up (2026-09-05_draft): held flat again*** *— the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures.* ***CORRECTION:*** *that cycle's own commit message claimed this set was "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call).* ***Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:*** *independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P.* ***HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time*** *— re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P.* ***HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again*** *— re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found.* ***HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again*** *— re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50%→30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found.* ***HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority****, the new last COMMITTED baseline.* ***Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.*** *Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is* ***AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.*** *Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news,* ***September 4****) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule.* ***AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)*** *held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet.* ***AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)"*** *— the new last TRUE committed baseline.* ***A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)*** *— the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on* ***September 10, 2026*** *(PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his*

support on remains largely unchanged from the July draft, and no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. ***P HELD FLAT at 32/47/58/82/92*** *— the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar for a move in either direction.* ***This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW.*** *The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.* ***Sept 15 (2026-09-15_draft)*** *re-rated UP to 37/53/62/83/92 on the White House's ethics concession;* ***Sept 16 (2026-09-16_draft)*** *re-rated DOWN sharply to 15/28/45/72/92 when the Sept 15 cloture vote FAILED 49-50;* ***Sept 17 (2026-09-17_draft)*** *held flat, no new dated development.* ***Sept 18 (2026-09-18_draft, this version): held flat again at 15/28/45/72/92*** *— Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor, which is consistent with, not incremental to, the existing read; no new dated development found. AUTO-STAMPED per delegated daily authority, the new last TRUE committed baseline.* ***Sept 19 (2026-09-19_draft, this version), a FULL WEEKLY refresh — the first deep multi-source research dive since Sept 12:*** *independently re-verified via a fresh primary-source WebSearch pass — no new Senate floor vote is scheduled since the Sept 15 cloture failure (49-50); Sen. Tillis's motion to reconsider remains only a procedural placeholder, and no outlet reports a scheduled re-vote. The Senate's own 2026 calendar (Roll Call, BGov, Troutman Financial Services reporting) shows it out for nearly all of October and the first week of November for the midterms (Election Day Nov 3), returning briefly (roughly two days) before the Nov 11 Veterans Day observance, then working roughly three weeks before Thanksgiving and three weeks in December before Christmas recess — leaving the post-election lame-duck session as the only realistic remaining 2026-Congress opportunity, per multiple independent outlets (Motley Fool, Sept 18; CryptoBriefing; CoinGeek; CryptoSlate). NEW THIS WEEK, logged as context and explicitly NOT used to move P: on September 17, 2026 the CFTC filed a prerule action with the White House OIRA (RIN 3038-AF80, "Regulation of Crypto Asset Transactions and Crypto Asset Markets") — confirmed via CFTC's own pressroom reference plus independent corroboration (The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein, all dated Sept 18) — an administrative fallback track running in parallel to, not a substitute for, the stalled legislative one, and its own timeline (no proposed rule before 2027) sits beyond this pillar's near-term horizons. Market prices, reported not scored: Polymarket's "signed into law in 2026" contract reads roughly ~8% as of Sept 19 (down sharply from ~82% in February 2026, before the Trump crypto-income ethics dispute intensified), though this cycle's search results showed some inconsistency on the exact current level — treated as approximate/directional, not a precise point figure; Kalshi's "CLARITY Act law before Jan 1, 2027" contract, a distinct longer-horizon market, priced around 31 cents (~31% implied), up from 24 cents days earlier. No corrections were needed to any previously reported fact this cycle — the 49-50 cloture count, the Tillis procedural-vote mechanic, and the list of seven Democratic holdouts (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) all check out against this week's independent reporting.* ***P HELD FLAT again at 15/28/45/72/92.*** *This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-19_draft is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-18_draft (15/28/45/72/92), auto-stamped Sept 18.*

P — the odds this is *good for crypto* by then. Held flat this cycle at 32/47/58/82/92 — unchanged since Aug 8, through the committed Aug 22 refresh (d2), the abandoned/never-delivered Aug this cycle by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found anywhere Aug 22-29 — and it bears repeating this is a cloture vote House sign-off or released text found this cycle) and the stablecoin-yield dispute (no update found). NEW, CONFIRMED this cycle: CFTC Chair Michael Selig, in an on-record speech at the Inno (PressRoom/SpeechesTestimony/opaselig10), dated **August 20, 2026** (some secondary outlets, e.g. American Banker/PYMNTS/The Hill, dated it Aug 21, likely next-day pickup; cftc.gov used a authority statement — it does not touch either binding dispute and is logged as context, not used to move P, same treatment as the SEC's earlier fallback signal. Two independent prediction-m institutional estimates, and per house rule cannot move P without a corroborating news event, none found. A "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote surfaced in 2026 development. congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle (bot-blocking); primary-source confirmation relied on 7+ independent s shutdown fight eating September floor time around Sept 15. Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of September 16, 2026 (LIGHT DAILY touch, 2026-09-16_draft) — the cycle in which the Sept 15 cloture vote resolved, and failed. Re-framed November 4, 2026 for the midterm result (first paragraph below).

Nov 4 re-frame, after the midterms: the question is no longer only whether this Congress finds 60 votes. It is whether a lame duck run by a *departing* majority can pass a bill that the *incoming* r gains by waiting, and H.R. 3633 dies Jan 3, 2027 if it is not passed. The 2027 path becomes a Democratic-shaped bill that a Republican president can veto. I cut 3mo/6mo/1yr by 2–3 points and 3y

The crowd: treated the Sept 13-14 ethics concessions as the story and priced in a real shot at cloture — Polymarket's 2026-signed-into-law odds roughly doubled to ~35% on the concession new

Me: re-rated down hard on the near windows — 37/53/62/83/92 → 15/28/45/72/92 — because the vote outcome is now a resolved fact, not a probability: named Democratic negotiators (includi midterms in early October and don't return until after the election, leaving a lame-duck session as the earliest realistic floor-time window Kennedy named. I did not cut the 1yr or 3yr windows nea

My edge: the crowd's ~5% post-vote Polymarket read and my 15 (1mo) / 28 (3mo) P aren't the same question — Polymarket prices signature into law within calendar 2026, a much narrower bar clinging to the pre-vote optimism I priced in yesterday.
