Tokenization of Real-World Assets Pillar Report

Real Money On-Chain — Researched, Scored, and Personally Committed

*Originally written **June 19, 2026**; scores committed by me on **June 19, 2026**. Re-researched July 8, 13, 18, 25, and 30, 2026 against live primary sources, and again as a full weekly refresh on August 8, 2026 (nudged up at 3mo/6mo on a new RWA all-time high and two missed catalysts, committed and stamped by Alex). Held flat through the Aug 9-16 daily touches, all auto-stamped committed. Drafts written Aug 17, Aug 18, and Aug 20 were never delivered (no report/render/archive/commit followed for any of them), and an Aug 21 session began delivering the Aug 20 numbers into only two of six reports before stopping — also never finished or committed. **This version (August 22) does not take any of those abandoned drafts at face value — it independently re-verifies through a dedicated primary-source research pass and HOLDS FLAT at 52/60/66/74/85** — the rwa.xyz total-value print remains essentially unchanged (and Treasuries-specific value is confirmed distinct from the all-category total, this pillar's known mislabeling trap), the SEC's newly proposed "Regulation Crypto Assets" (Aug 18-19) is scoped to new-token capital formation rather than RWA tokenization and doesn't clear this pillar's bar, and the tokenized-stock innovation exemption this pillar is watching remains delayed/exploratory with no new dated progress. **This pillar's own evidence is clean and would have qualified for Alex's standing daily auto-stamp on its own** — but the **overall Aug 22 score set is left as a DRAFT, flagged for Alex's manual review**, because a dedicated adversarial fact-check this cycle found that the Iran War Risk pillar's report contained a materially false claim (a "first confirmed fatality" framing that was actually roughly the 18th such death) that the original research pass missed; see My Decision below. **A second, deeper session ran later the same day.** With that Aug 22 catch-up draft already delivered — rendered, archived, and git-committed — house rules require a new dated set rather than an in-place edit, so this full weekly refresh (the first since Aug 8) is scored as **2026-08-22_draft2**. Draft2 independently re-confirms the hold at 52/60/66/74/85 through fresh primary-source research, including a direct sec.gov check of a newly issued Franklin Templeton no-action letter (Aug 12) and a since-canceled (not merely delayed) SEC tokenized-equity "innovation exemption" meeting (Aug 13-15 reporting) — the two roughly offset and neither alone clears this pillar's bar. Draft2 was left as draft at delivery — this time because a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority, regardless of how clean the evidence is — **COMMITTED BY ALEX August 23, 2026** after independent review. **A daily catch-up draft dated August 28, 2026** (score set 2026-08-28_draft) was written — a direct rwa.xyz re-pull showing total distributed value $38.69B (+3.04%/30d) and tokenized Treasuries $16.00B (-0.93%/30d), both continuing trend — but it was never rendered, selfchecked, archived, or git-committed, and sits abandoned, superseded the same way this report has always treated interrupted prior sessions. **This version (August 29) does not take that abandoned draft at face value** — it runs a fresh, independent full-weekly primary-source pass and again HOLDS FLAT at 52/60/66/74/85, scored as **2026-08-29_draft**. The week's one genuine new development is **Coinbase's August 24 launch of tokenized-stock trading (NVDAc/METAc/AAPLc/GOOGLc — Nvidia, Meta, Apple, Alphabet) on its own Base blockchain**, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026 — confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25, but eligible to **non-US users only**, the exact same structural limitation this report already established (the "Robinhood Chain precedent") as insufficient alone to move P. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25, whose stated use cases touch RWA settlement) is logged as tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check this window, and DTCC's October 2026 and Nasdaq's December 6, 2026 targets are both unchanged. **rwa.xyz's own site (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle** — a data-access gap flagged for next cycle — so this pass relies on the report's own most recent primary pull (the abandoned Aug 28 draft's rwa.xyz read), loosely corroborated by secondary citations, showing tokenized Treasuries specifically posting a **second consecutive negative 30-day reading** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% and not independently reconfirmed this cycle, but the*

closest thing in this pillar to a trend worth watching. ***This full weekly refresh was left as a DRAFT, not auto-stamped*** *— full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality.* ***THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft****, covering Aug 29-31: sector-level figures cited this window (total tokenized RWA ~$38.17B, tokenized Treasuries ~$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) are consistent with the Aug 28 direct pull already priced in — same trend, not a fresh dated catalyst; rwa.xyz itself was not independently re-pulled this cycle.* ***P HELD FLAT at 52/60/66/74/85.*** *This is a light daily touch, not a full weekly refresh, no window moved, and the master call band is unchanged —* ***AUTO-STAMPED*** *per delegated daily authority.* ***Sept 1: held flat again*** *— only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot), no fresh dated catalyst, no rail failure/depeg/counterparty default. Score set 2026-09-02_draft — this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Tokenization's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report);* ***COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026*** *once Alex widened the policy — this is the last TRUE committed baseline.* ***Sept 3: held flat a further time*** *— nothing material found on any pillar that cycle.* ***Sept 5, light daily catch-up (2026-09-05_draft): held flat again*** *— no dated catalyst found Sept 3-5; DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participating institutions) remains unchanged background. This pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures.* ***CORRECTION:*** *that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — a bug, flagged for Alex, not corrected retroactively.* ***Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:*** *independently re-verified via WebSearch (DTCC's October launch remains the operative unchanged catalyst; no new dated milestone found).* ***HELD FLAT again at 52/60/66/74/85. on schedule, no delay *(primary: DTCC.com, corroborated by Forkast's "From Pilot to Plumbing," Tradeweb, and Crowdfund Insider — 2+ independents) — the July 15 live-production trades remain already priced in. Two freshly-dated items this week were found but are each effectively single-source (a press release syndicated across aggregator sites, not independently reported) and incremental, not step-changes: Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting Casper onto the ERC-3643/T-REX Ledger tokenization standard network — both logged as context, not used to move P per the sufficiency rule. No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions were found dated within the last two weeks.* ***P HELD FLAT at 52/60/66/74/85.*** *This is a* ***FULL WEEKLY refresh****, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality —* ***LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW****, as score set* ***2026-09-12_draft2****. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May). This is precisely the trigger this report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting, which explicitly said "a formally re-scheduled meeting or published framework would matter" — a published framework is now exactly what happened, and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain, Coinbase's Base launch — both non-US-only), it is a US federal regulator directly authorizing on-chain tokenized-stock trading domestically, the specific structural ceiling this pillar's Other Side section had repeatedly flagged. Sizing front-loaded (1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1) because the exemption is in effect now and immediately actionable, with diminishing effect further out since the 3yr window was already near its practical ceiling and the exemption itself is temporary/conditional and sunsets in 5 years pending further Commission action — an honest counterweight, not a permanent rule, and no venue has yet announced it is live under the exemption as of this research pass. Quant (fully computed, unchanged methodology): P 59/54/59/68/69, BTC $78,046.80 (2026-09-18). Light daily touch, research capability fully available (WebSearch functioned normally; sec.gov and the Commissioner statement were both directly verifiable), verification passed clean —* ***COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026*** *per the delegated daily auto-stamp authority, under which neither the size of the move nor a call-band flip withholds the stamp on their own.*

Carried forward, still load-bearing — Franklin Templeton SEC no-action letter (Aug 12, primary, confirmed direct on sec.gov): the SEC's Division of Investment Management issued a n tokenized Franklin OnChain U.S. Government Money Fund (BENJI, on Stellar) — carved out of Rule 17f-2's physical-certificate requirement, as a cash-management sleeve for other Franklin fun ETFs/mutual funds, possibly starting Q4 2026. Aug 3 catalyst (carried forward, committed): BlackRock launched two new tokenized money-market funds — BSTBL (BlackRock Select Treasury-Based Liquidity Fund) and BRSRV (BlackRock eligibility. Securitize is transfer agent and tokenization provider for both, the same role it plays for BUIDL. Confirmed by 7+ independent outlets.

The crowd: is treating Coinbase's Aug 24 tokenized-stock launch on Base as the moment tokenized equities go mainstream. It's a real, well-documented development — 9+ independent outlets kind of overreach this report has repeatedly had to correct. Today's SEC exemption is different in kind, not degree — and I'm careful below not to overreact to it either.

Me: RE-RATING UP, 52/60/66/74/85 → 58/65/70/77/86. The SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary, plus Commissioner Uyeda's statement, corroborated b exactly the trigger this report's own trigger table has been watching since the Aug 13-15 exemption-meeting cancellation. I'm sizing it front-loaded (1mo +6, tapering to 3yr +1) because the exer live under it. That's why 3yr moves only +1 despite the exemption being the biggest structural development this pillar has logged all cycle — the honest read is "the ceiling cracked," not "the ceili

The Aug 29 full weekly dive (still the last full re-dig): a dedicated primary-source pass found one genuine, multi-sourced development that week (Coinbase's Base tokenized-stock launch) that c written but never delivered and was not taken at face value. 52/60/66/74/85 has now held across all five windows for four straight cycles (Aug 29, Aug 31, Sept 1, Sept 2).

My edge: this pillar's discipline is to notice when institutions actually ship product accessible to the broad market this pillar scores, not just when they announce intent or ship into a single exclud Innovation Exemption is exactly the "actually ships to the broad, US market" catalyst this pillar has said all cycle it was waiting for, so 1mo moves the most (+6) precisely because it's immediately a

The Sept 19 full weekly dive (the first full re-dig since the Sept 18 re-rate): same discipline, applied against the new baseline — a dedicated primary-source pass (11 WebSearch queries) found n pillar refuses to score early. SIFMA and Better Markets pushing back publicly is expected institutional friction, not a new negative, and no litigation has been filed. The ~1.9M-address holder-coun launches. And when this week's rwa.xyz reads came back internally inconsistent, the discipline is the same as ever: flag the gap, don't quietly substitute a number that can't be verified. Nothing he

WITHDRAWN this cycle — the "fourth consecutive negative reading" framing, and the trigger claim built on it. Adversarial verification found three defects. (1) A **denominator discont** Aug 28–29 reading was **never independently confirmed** — app.rwa.xyz returned HTTP 403 at the time, and this report itself recorded that it "could not independently re-pull live figures." (3) **real; the trend claim built on top of it was not, and this pillar's pre-committed "third consecutive negative" trigger cannot be treated as cleanly fired on a redefined series.**

SOURCING GRADE, stated plainly. These are **aggregator** figures with an undefined and evidently *changing* basis. rwa.xyz does not define "distributed" versus "represented" on-page; the hea any external source; and the **cause remains unknown** (redemptions, quarter-end effects, possible reclassification). Reported as a number, not a narrative.

★ THE DECISIVE NEGATIVE FINDING — DTCC's tokenization service has NOT launched. dtcc.com's own tokenization page is forward-looking as of today: "paving the way for the **expecte** Tokenization Service to launch in October 2026." Its most recent tokenization-adjacent release of any kind, **Sept 16, 2026** (Fund/SERV adding Ondo's Oasis Pro Markets as first tokenization m consequential near-term catalyst for this pillar is confirmed not live, in either direction, and is **logged, not scored** — contracting flow against an unrealised catalyst is precisely the 1-month cu

CORRECTED — the SEC order's "30-day" mechanic was mis-described in the prior version. Re-verified via the Federal Register API (document 2026-19388): "Order Granting Temporary Co **comment deadline and no DATES section**. The 30 days is an **issuer-notice condition** — "Trading of a Tokenized NMS Stock on the TSV may not commence until at least 30 calendar days fro first third-party-tokenized NMS trade around mid-October does not follow from the text and is withdrawn.

Structural anchors re-verified from primary documents, which is why 12mo and 36mo hold. The **CFTC's Sept 24 FAQ**, extracted and read directly from cftc.gov/media/14671, is confirme permitted Regulation 1.25 investments, subject to exactly **four** conditions: a permitted underlying asset; the tokenized form granting "the same or functionally equivalent" legal and economic network (as opposed to a private and/or permissioned blockchain network)." **Honesty note:** the FAQ states it represents "only the views of the Divisions," creates no rights, and is "not intende

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ THE FIRED TRIGGER, and the reason this pillar is cut rather than raised — rwa.xyz direct pull, Sept 26, 2026. Three subpages were fetched directly this cycle, which **resolves the Sept committed, in its own words, that "a third consecutive negative reading would be a genuine trend worth re-rating on"** — and this is the third (−0.39% Aug 22, −0.93% Aug 28, −6.95% the figures were pulled directly, but *no independent aggregator reproduces the −6.95% specifically*, so the magnitude is labelled single-aggregator. ★ SECOND OFFSET — the NYSE Group / Blockchain.com MOU, Sept 23, 2026, 9:00am ET. Real, and explicitly NOT the live-venue trigger. A non-binding memorandum of understandi to Blockchain.com's 44M+ confirmed accounts. On-record quotes from Peter Smith (Blockchain.com CEO) and Lynn Martin (NYSE Group President), corroborated across 8+ independent outle ICE-issued primary release could be found (ir.theice.com returned 404), so the only primary artifact is **Blockchain.com's own PR Newswire release (302887041)** — company-issued PR from **that** — which is precisely why taking +1 for it while ignoring the fired Treasury trigger, as the abandoned Sept 24 draft did, was asymmetric.

The live-venue trigger DID NOT FIRE. No Tokenized Securities Venue is live, or announced as live, as of Sept 26. The exemption's own mechanic still gates it: a prospective venue must publis likely first filers "as early as Q4 2026" — a forecast, not a fact, and not used.

Logged, not scored — the SEC exemption's Federal Register publication, Sept 22, 2026. The Prize

Illustrative only — not price targets, not advice

The cleanest single-token anchor is still **ONDO**, the name most tied to the RWA narrative: from its early-trading price around **$0.22 (Jan 2024** — listing prints vary by venue**)** it ran to a **$2.14**

The round-trip, last checked July 13 (CoinGecko, not re-pulled live this cycle): **$0.3291** — market cap ~$1.6B, still ~85% below the high — even as the company keeps extending its franchise (token: total RWA distributed value sits near its all-time high (rwa.xyz aggregate read ~$39.2B, Sept 8 — up from ~$38.69B, Aug 28, continuation of the already-priced growth curve, not a new token trades ~85% off its peak, and the confirmed institutional moves stacked through this cycle — BlackRock's Aug 3 fund launch, Franklin Templeton's Aug 12 no-action letter, Coinbase's A exactly the kind of adoption proof points that outlast any single token's price, even where each individually (until today) fell short of this pillar's sufficiency bar. Pipeline reference: BTC closed a round-trip included.

The Other Side

The strongest honest case this is wrong — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; still valid, plus one new item below on the exemption's own timing mechanic)

- ★ **Partly answered today, worth stating plainly: the "non-US-only ceiling" critique this section has raised three separate times (BlackRock funds, Robinhood Chain, Coinbase's Base** as of this research pass no venue has actually announced it is live under it — an authorized-but-unused framework is not the same as adoption. - **Coinbase's tokenized-stock launch, and the pattern before today, is easy to overstate in hindsight.** Nine-plus outlets covered it and there's a real regulatory permission behind it, but it v that pattern, but it is one day old.
- **An Ondo Stocks milestone from Aug 15 was missed for two full cycles.** That's a real research-process miss, caught only in hindsight — a reminder that "no new catalyst found" claims in p
- **Regulatory limbo is still real.** The GENIUS Act's rulemaking deadline was missed and zero of six agencies have finalized rules; the CIP comment window closed Aug 21 but produced no rule, rescheduled date as of Aug 29.
- **The RWA totals are still a small, largely institutional/permissioned number.** ~$38-39B in total distributed value is real growth, but it's still under 1% of the BCG×Ripple $9.4T-by-2030 TAM
- **It may not be "crypto."** Most volume is permissioned/institutional and may never accrue value to crypto majors. Durable market-structure law (CLARITY) still isn't passed — a reminder that
- ★ **NEW this cycle — the exemption's own 30-day issuer-notice-and-objection mechanic is a real structural brake, not a footnote.** Any NMS stock tokenized by an unaffiliated third par mid-October, and issuers that object can delay indefinitely. This is exactly the kind of "authorized but not yet real" gap this section flagged Sept 18; it's now dated and specific rather than a g

- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29 found** on a direct sec.gov check; the tokenized-equity exemption meeting remains canceled with no new date
- **DTCC's October 2026 and Nasdaq's Dec 6, 2026 targets are both unchanged** this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found;** two unrelated DeFi incidents (Term Finance ~$8.5M, Arrakis V1/G-UNI, both Aug 23) are ordinary De
- **★ Data-quality flag — rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle.** Could not independently re-pull live figures; relying on the report's most recent prima (-0.39%/30d) Aug 22 — the **second consecutive negative 30-day reading**, still sub-1% and not independently reconfirmed this cycle; flagged for a genuinely independent pull next cycle.
- **For the record — Ondo Stocks crossed $1.01B TVL, dated Aug 15, 2026** — predates this window, missed by the Aug 22 research pass; logged for the audit trail, not counted as new evide
- **BTC (pipeline reference): $77,666.16 on Aug 29 vs. $77,266.84 on Aug 22** — modest gain.
- **Score decision: held flat at 52/60/66/74/85** — nothing this cycle clears the sufficiency bar. **Left as draft, not auto-stamped:** this is a full weekly refresh, categorically excluded from Alex's

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity: Three earlier drafts (Aug 17, 18, 20) were written but never delivered, and an Aug 21 session delivered the Aug 20 num

- **Why a new set instead of editing the delivered Aug 22 draft:** per house rules, a same-day draft may only be amended in place before delivery; the Aug 22 catch-up draft was already rend
- **rwa.xyz total RWA distributed value: essentially flat.** Direct pull Aug 22 draft2 (primary) shows $38.32B (+2.30%/30d) vs. the Aug 16 baseline ($38.17-38.24B) — normal drift, no discontinu
- **★ rwa.xyz tokenized Treasuries: first slightly-negative 30-day reading tracked.** $15.98B, -0.39%/30d, across 87 products (primary) — prior cycles reported flat/slightly-up figures around
- **★ NEW, primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar), carv starting Q4 2026. Genuine but narrow institutional-plumbing positive.
- **★ NEW — SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** the planned ~Aug 14 meeting was called off. Multi-sourced (Ledger Insight uncorroborated at the causal level. Incremental negative versus the prior "delayed/exploratory" framing, roughly offsetting the Franklin Templeton letter above.
- **GENIUS Act rulemaking proceeding exactly on its pre-set procedural schedule:** Treasury's Section 3 NPRM published in the Federal Register Aug 18 (comment deadline Oct 19); the joint
- **★ NEW — Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock volume on Robinhood Chain crossed $1B cumulative (crypto.news, cryptonomist); still EU/EEA-only,
- **No new RWA-rail failure, depeg, or counterparty default found** in this window; the Jul 15 Ostium exploit ($18-24M) remains closed and non-recurring, no follow-up developments found.
- **BTC (pipeline reference):** $77,169.40 on Aug 22 vs. $71,882.92 on Aug 20, +7.4%.
- **Score decision:** 1mo 52 → **52** · 3mo 60 → **60** · 6mo 66 → **66** · 12mo/36mo held at 74/85 — the Franklin Templeton positive and the SEC exemption-cancellation negative are both multi-sourc the routine conditions for Alex's standing daily auto-stamp delegation (in effect since 2026-08-06), but that delegation covers ordinary daily re-rates only — this is a full weekly refresh, catego
