

Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 3, 2026 (light daily catch-up, researched Sept 2) · COMMITTED — AUTO-STAMPED

*This is a light daily catch-up against the Sept 1 committed baseline (2026-09-01_draft, auto-stamped). CLARITY Act held flat at 32/47/58/82/92: the Sept 15 cloture vote and both binding disputes (ethics, stablecoin-yield) remain unchanged. Tokenization RWA held flat at 52/60/66/74/85: no dated catalyst found. Fed & Macro held flat at 36/35/45/55/61: no new H.4.1 or data print found, CME FedWatch pricing continues the same post-Jackson-Hole drift already priced in. **Iran War Risk re-rated down sharply,** to 1/9/27/47/74 from 7/15/32/50/75: CENTCOM-confirmed US strikes Sept 1-2 hit nearly 100 targets across Iran — roughly 50x the scale of the single Aug 30 Larak Island strike — including, for the first time in this war, direct US strikes on Iranian government oil tankers under a newly reported "tanker for tanker" policy. A US strike reportedly hit a wedding party in Kuhestak, Hormozgan (Hormozgan governor's office: 4+ dead incl. a 4-year-old, 60+ injured) — flagged single-narrative-sourced at the core fact level (CENTCOM has neither confirmed nor denied it) and NOT independently used to move P; reported as context for Iran's response: coordinated IRGC strikes Sept 2 on FOUR countries at once (Jordan, Bahrain, Iraq, Kuwait) — all repeat targets, so the widening-to-a-new-state clause does not fire. Multi-source corroborated (Axios, CNBC, CNN, Bloomberg, UPI, Al Jazeera, Yahoo, CBS News, RFE/RL). Bitcoin TA (computed) ticked at 3mo on the day's data refresh; BTC fell to \$76,581.44 (Sept 2) from \$78,038.78 (Sept 1) on the Iran escalation, quant P 57/46/59/68/69 → 57/47/59/68/69. Originally left as draft, awaiting manual review, since this cycle's equal-weight FINAL NUMBER call band flips (Mild Bull → Neutral) versus the last stamped set and Iran War Risk's own report separately flagged a single-narrative-sourced core fact and a genuinely novel escalation scale. **COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy. Full score lineage (June committed → Aug 22 committed → Aug 28/29 drafts → Aug 31 committed → Sept 1 committed → Sept 2 committed, auto-stamped Sept 3) preserved in every report.*

THE FINAL NUMBER · SEPTEMBER 2, 2026 · EQUAL-WEIGHT MODEL (COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026)

+0.48

Neutral overall, time-arbitraged — down from the last stamped set's (Sept 1) +0.56 on Iran War Risk's sharp re-rate, and the call band itself flips. Equal-weight mean of the five window signals (–10 max bear underneath: Bear at 1 month, Mild Bear at 3 months, Neutral at 6 months, Bull at 1 year, Strong Bull at 3 years. Originally left as a DRAFT Sept 2, flagged for Alex's manual review; COMMITTED — AUTO-STAMPED

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled September 2, 2026, committed September 3, 2026 (light daily catch-up) · BTC \$76,581.44 (Bitstamp, September 2, 2026) · Engine: engine/blend.py — run.py blend (equal-weight, 2026-09-02_dr

The Master Table

The whole thesis in five rows, on the September 2 set (a light daily catch-up vs. the Sept 1 last-stamped baseline; committed, auto-stamped Sept 3). Signal range -10 (max bear) to +10 (max bull).

WINDOW	MASTER (EQUAL-WT)	SEPT 1 MASTER (PRIOR STAMPED)	THE CALL
1 month	-1.59	-1.47	Bear — Iran War Risk's sharp re-rate pulls the near end down
3 months	-1.13	-1.03	Mild Bear — Iran drags harder; the September FOMC still sits
6 months	+0.17	+0.28	Neutral — CLARITY and Tokenization still carry this window;
1 year	+1.92	+1.99	Bull — four of five pillars positive; Iran alone turns negative a
3 years	+3.02	+3.03	Strong Bull — law + adoption + cycle + value; barely moved

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform 8 for every pillar. MASTER = the simple mean of all five pillar signals — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Exact comparison. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

+0.48 = the equal-weight mean of the five MASTER signals above ((-1.59 - 1.13 + 0.17 + 1.92 + 3.02) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives +1.04, down from Neutral versus the last stamped set — the horizon-weighted variant does not flip. Three pillars (CLARITY, Tokenization, Fed & Macro) held flat this cycle on independent re-checks; Iran War Risk for the full check). Originally left as draft Sept 2 (the call-band flip alone disqualified delegated daily auto-stamp under the then-current rules, and Iran War Risk's own report separately declining). COMMITTED — AUTO-STAMPED SEPTEMBER 3, 2026 once Alex widened the policy so a call-band flip is no longer disqualifying on its own. See My Decision.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

CoinPicks Market Direction — Final Number

Generated by engine/history.py from every committed master_blend snapshot in reports/archive/. Rebuilt automatically on every run.py archive (or manually via run.py history).

The Full Pillar Matrix

Every pillar's signal on every window — September 2 scores, a light daily catch-up, committed and auto-stamped Sept 3 (each report shows the full June → Aug 22 → Aug 28/29 drafts → Aug 31 → Sept 1 → Sept 2 lineage).

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	
CLARITY Act (20% · 8)	-2.45	-0.41	+1.09	+4.61	+6.38	Held flat — Sept 15
Iran War Risk (20% · 8)	-4.70	-4.26	-2.58	-0.31	+2.11	RE-RATED DOWN SHARPLY — ~50x-larger strikes
Tokenization RWA (20% · 8)	+0.29	+1.41	+2.18	+3.00	+3.92	Held
Fed & Macro (20% · 8)	-1.90	-2.04	-0.64	+0.60	+1.14	Held flat — no new
Bitcoin TA — quant (20% · 8)	+0.84	-0.34	+0.79	+1.73	+1.52	Sept 2 c
MASTER — mean of the five	-1.59	-1.13	+0.17	+1.92	+3.02	

P lineage (June → Jul 8 → ... → Aug 16 → 22 draft2 → 28/29 drafts → 31 → Sept 1 → Sept 2 draft) — CLARITY 55/60/65/85/92 → 52/56/61/83/92 → ... → 32/47/58/82/92 (Aug 7, committed) → **32/47/58/82/92** (Sept 2 — held flat since committed) → 14/22/38/54/76 (Aug 29, held flat, draft) → 9/17/34/51/75 (Aug 31 — RE-RATED DOWN, flip line fired, auto-stamped committed) → 7/15/32/50/75 (Sept 1 — RE-RATED DOWN AGAIN, more modestly, on continued es ever tanker strikes, and a four-country retaliation — COMMITTED, auto-stamped Sept 3 retroactively under the widened policy) · Tokenization 53/57/62/72/85 → 52/56/62/73/85 → ... → 52/60/66/74/85 (Aug 8, committed) → **52/60/36/35/45/55/61** (Aug 29, draft) → 36/35/45/55/61 (Aug 31, auto-stamped committed) → 36/35/45/55/61 (Sept 1 — held flat, auto-stamped committed) → **36/35/45/55/61** (Sept 2 — held flat) · Bitcoin TA (computed each run) 37/33/36/35/45/55/61 (Sept 1, computed) → **57/47/59/68/69** (Sept 2, computed on today's bar). Impact remains a uniform **8** for every pillar and every pillar carries an equal **20%** weight — the MASTER row is the simple mean of the five. Full lineage back

The Story, Window by Window

What the blend is saying on September 2, 2026, a light daily catch-up (comparisons below are vs. the last stamped baseline, Sept 1's 2026-09-01_draft)

- 1 month — Bear (–1.59, down a full band from Mild Bear's –1.47).** CLARITY (–2.45), Tokenization (+0.29), and Fed & Macro (–1.90) held; Bitcoin TA held near flat (+0.84). **Iran War Risk** f tanker strikes, a four-country retaliation — the worst 1-month signal in the whole matrix by a wide margin and the reason the whole window drops a full call band.
- 3 months — Mild Bear (–1.13, down from –1.03).** CLARITY (–0.41), Tokenization (+1.41), and Fed & Macro (–2.04) held; Bitcoin TA ticked to –0.34; **Iran fell to –4.26 from –3.64** — the Se
- 6 months — Neutral (+0.17, down from +0.28).** CLARITY (+1.09), Tokenization (+2.18), Fed & Macro (–0.64), and Bitcoin TA (+0.79) held; **Iran fell to –2.58 from –2.02**. Still net positive bu
- 1 year — Bull (+1.92, down from +1.99).** Four of five pillars still non-negative: CLARITY +4.61, Tokenization +3.00, Bitcoin TA +1.73, Fed +0.60. **Iran turns negative at this window for the** not just thin. Price now sits 45% below power-law fair value (\$139,151). The window the whole thesis is built around, still positive overall but carried entirely by the other four pillars now.
- 3 years — Strong Bull (+3.02, essentially unchanged from +3.03).** Every pillar still positive: CLARITY +6.38, Tokenization +3.92, Iran +2.11, Bitcoin TA +1.52, Fed +1.14. A structural window

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

Iran War Risk (judged) re-rated down sharply this cycle while Bitcoin TA (computed) barely moved — the widest such gap yet: P 1/9/27/47/74 (Iran, judged, cut sharply on a ~50x-larg computed, ticking marginally at 3mo on today's data refresh). BTC itself did move — down real dollars on the day — but the quant pillar's model reading, built on completed bars and cycle po is now the worst signal at every window through 1 year, negative even at the 1-year mark for the first time — a genuine, structural divergence from the computed pillar, not a modeling artifact

THE REAL DISAGREEMENT

Near-term: Bitcoin TA's computed near-term read (P 57/47) is now the strongest near-term pillar by a wide margin; Tokenization (P 52) follows; Fed & Macro (P 36/35) sits below both; CLARIT risk-off vote in the set (P 1), having cut sharply off its own already-fired flip line. The master resolves it honestly: Bear at 1 month, a full call band worse than Sept 1's Mild Bear, driven almost e
Long-term: the four story pillars average about +3.4 at 3 years (CLARITY +6.38, Tokenization +3.92, Iran +2.11, Fed +1.14) versus the Bitcoin-TA pillar's +1.52 — still roughly 2.3× higher. Remo Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A light daily catch-up ran this cycle. Iran War Risk cut sharply, escalating the already-fired flip line to a much larger scale without independently re-firing a FURTHER fresh clause; CLARITY, Tokenization, and Fed & Macro held. These

DATE / LEVEL	EVENT	RE-RATES
Fired Sept 1-2, CONFIRMED via 9 independent outlets	CENTCOM-confirmed US strikes hit nearly 100 targets across Iran — IRGC air-defense sites, radar, mine-laying capability, comms sites, anti-ship cruise-missile/drone launchers — roughly 50x the scale of the Aug 30 Larak strike (Axios, CNBC, CNN, Bloomberg, UPI)	Iran War Risk: th clause continuin
Fired Sept 1-2, CONFIRMED, novel	For the first time in this war, the US struck Iranian government oil tankers directly (engine rooms) under a newly reported "tanker for tanker" policy	Iran War Risk: a y
Reported Sept 1-2, SINGLE-NARRATIVE-SOURCED — NOT independently used to move P	A US strike on Kuhestak, Hormozgan reportedly hit a wedding party — Hormozgan governor's office: 4 of at least 5 dead (incl. a 4-year-old), 60+ injured; CENTCOM has neither confirmed nor denied it	Iran War Risk: th triggered
Fired Sept 2, CONFIRMED — widening clause did NOT fire	IRGC coordinated ballistic-missile/drone strikes on US-linked bases in FOUR countries at once: Jordan, Bahrain, Iraq, Kuwait — most projectiles intercepted, no confirmed new US combat death	Iran War Risk: all materially to the
Fired Aug 30 — CONFIRMED, FLIP LINE TRIGGERED	US forces struck two IRGC rocket/mine-launchers on Iran's Larak Island — the first US strike on Iranian territory since Jul 29, ending a ~28-30-night clean streak. Directly fired this pillar's own pre-declared flip line ("a resumption of direct US strikes on Iran proper")	Iran War Risk: re this flip line first
Checked, unchanged	CLARITY cloture vote remains dated 2:15pm ET Tuesday, Sept 15; no WH sign-off on the ethics text found	CLARITY: confirm
Checked, no fresh catalyst	Tokenization: no dated catalyst found Sept 1-2	Tokenization: he
Checked, drift only	No new H.4.1 or data print found Sept 1-2; CME FedWatch pricing continues the same post-Jackson-Hole drift already priced in — market-odds drift alone doesn't clear the sufficiency bar	Fed & Macro: he

Sept 15, 2026	Next FOMC, with SEP/dot plot; also the first CLARITY Act cloture vote, precisely dated 2:15pm ET	Fed: a hike confirms the cycle's Fed reaction rate 3mo/6mo update
~Aug 31, now passed	Historical average cycle-bottom month has passed (cycle month now 28.45)	TA: higher low at 28.45 (+1.8) is an early sign of a new cycle
Power-law fair value \$139,151	BTC \$76,581.44 sits 45% below fair value, down from \$78,038.78 on Sept 1 on the Iran escalation	1yr/3yr windows

The master flip line — Iran's clause fired Aug 30, ESCALATING SHARPLY IN SCALE Sept 1-2, still not re-fired on a FURTHER fresh clause: a confirmed new US combat death, a resumption of direct US strikes above \$100 (Iran) — **the "resumption of direct US strikes on Iran proper" clause fired Aug 30** and is now firing again at roughly 50x the scale, including the war's first direct US strikes on Iranian tankers; as of Sept 2, a genuinely new state despite a four-country Iranian retaliation — all four targets are repeats, Brent up ~5% but short of \$100). The September FOMC delivering a hike would confirm and extend this cycle's Fed reaction rate (CLARITY) would also be a genuine escalation. A signed, US-accepted Hormuz reopening that holds a full clean week would be the equivalent upside flip for Iran — now considerably further away than it was even with the price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	+0.14
— drop Iran War Risk	+1.09
— drop Tokenization RWA	+0.06
— drop Fed & Macro	+0.74
— drop Bitcoin TA	+0.37
all five in (headline)	+0.48

Every leave-one-out final number stays **positive** (+0.06 to +1.09) — the sign never flips negative — but three of the five drops (removing CLARITY, Tokenization, or Bitcoin TA) round to **Neutral**, same as the headline itself this cycle. — **a full call band better, into Mild Bull territory.** That is the single clearest robustness signal this report can give: today's headline number is not being driven by a broad, balanced move — it is being driven overwhelmingly by one pillar. The Iran War Risk pillar is more robust and stays Mild Bull throughout even with Iran included. This robustness check exists specifically to catch a single pillar quietly driving the whole call, and this cycle it caught exactly that.

My Decision

COMMITTED — SEPTEMBER 3, 2026 (2026-09-02_draft) · AUTO-STAMPED (ALEX (AUTO-STAMPED)) · CALL-BAND FLIP NO LONGER DISQUALIFYING OUR CALL

MASTER: -1.54 / -1.13 / +0.17 / +1.92 / +3.02 · THE FINAL NUMBER: +0.49 equal-weight (Neutral) / +1.04 horizon-weighted (Mild Bull) — COIN PICKS CALLS FOR A CALL BAND FLIP

qualitative research is unchanged from Sept 2)

This is a light daily catch-up against the Sept 1 committed baseline (2026-09-01_draft, auto-stamped). Three pillars were independently re-checked and **held flat**. CLARITY Act at 32/47/58/82/92: the Sept 1-2 strike wave was unanswerd at the White House. Tokenization RWA at 52/60/66/74/85: no dated catalyst found Sept 1-2. Fed & Macro at 36/35/45/55/61: no new H.4.1 or data print found, CME FedWatch pricing continued to rise **sharply**, to 1/9/27/47/74 from 7/15/32/50/75: the conflict escalated materially Sept 1-2, confirming exactly the risk that pillar's own Sept 1 note flagged as a possibility. Multi-source corroborated (Axios, CNBC) targets across Iran — IRGC air-defense sites, radar, mine-laying capability, comms sites, anti-ship cruise-missile/drone launchers — roughly 50x the scale of the single Aug 30 Larak Island strike; for the first time, a policy. Brent rose ~5% Tuesday Sept 1 (best session in 5 weeks) to ~\$95-96.6, WTI to ~\$91-92, still short of the \$100 flip line. A US strike on Kuhestak, Hormozgan reportedly hit a wedding party — the Hormozgan wedding-strike casualty claim (single-narrative-sourced, per this report's own sufficiency rule — see the Iran War Risk pillar report for the full treatment) — a materially larger, four-country simultaneous retaliation versus the single-state Jordanian "new state" flip-line clause does NOT fire. Most projectiles were intercepted and no confirmed new US combat death has been found, so that clause and the casualty clause also don't independently fire — the scale jump is sharply in scale, which is why P moves down this much. Both sides are now on-record threatening larger future action (Trump: "significantly larger response"; an Iranian military source: "many times greater, 12mo -3, 36mo -1. Bitcoin TA's computed reading ticked at 3mo on today's data refresh (P 57/46/59/68/69 → 57/47/59/68/69); BTC fell to \$76,581.44 (Sept 2) from \$78,038.78 (Sept 1), a real risk-off move. Independently sufficient reasons under the rules in force that day: (1) the equal-weight FINAL NUMBER's call band FLIPPED (Mild Bull → Neutral) versus the last stamped set, which the runbook then treated as a call band flip given that its core wedding-casualty fact is single-narrative-sourced, the scale jump (~50x, first-ever tanker strikes) is genuinely novel beyond its prior sizing precedents, and both sides were threatening strikes.

September 3, 2026 update: Alex reviewed the delivered research and widened the delegated daily auto-stamp policy in CLAUDE.md — a call-band flip and the size of a move are no longer disqualifying our call. Verification inconsistency. Neither applied here: the research was thoroughly multi-sourced, verification passed clean, and the wedding-casualty claim was correctly kept single-narrative and out of the P move.

Read as an investment posture: don't chase the bounce this month; the windows that pay are 6-plus months out; the levels and dates that would change this are printed above — and note that dropping Iran alone puts the reading back at +1.09, Mild Bull). This set is COMMITTED, auto-stamped Sept 3, 2026 — the prior stamped position was Sept 1's +0.56 (2026-09-01_draft, auto-stamped).
