

The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31 — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). P HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was **AUTO-STAMPED** alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's own commit message claimed this set was "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to

committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call). **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P. **HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time** — re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P. **HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found. **HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again** — re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50%→30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found. **HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.** Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news, **September 4**) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)** held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet. **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)"** — the new last TRUE committed baseline. **A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)** — the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his support on remains largely unchanged from the July draft, and no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Político — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/~8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalshi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. **P HELD FLAT at 32/47/58/82/92** — the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-**

stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning. **Sept 15 (2026-09-15_draft)** re-rated UP to 37/53/62/83/92 on the White House's ethics concession; **Sept 16 (2026-09-16_draft)** re-rated DOWN sharply to 15/28/45/72/92 when the Sept 15 cloture vote FAILED 49-50; **Sept 17 (2026-09-17_draft)** held flat, no new dated development. **Sept 18 (2026-09-18_draft, this version): held flat again at 15/28/45/72/92** — Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor, which is consistent with, not incremental to, the existing read; no new dated development found. AUTO-STAMPED per delegated daily authority, the new last TRUE committed baseline. **Sept 19 (2026-09-19_draft, this version), a FULL WEEKLY refresh — the first deep multi-source research dive since Sept 12:** independently re-verified via a fresh primary-source WebSearch pass — no new Senate floor vote is scheduled since the Sept 15 cloture failure (49-50); Sen. Tillis's motion to reconsider remains only a procedural placeholder, and no outlet reports a scheduled re-vote. The Senate's own 2026 calendar (Roll Call, BGov, Troutman Financial Services reporting) shows it out for nearly all of October and the first week of November for the midterms (Election Day Nov 3), returning briefly (roughly two days) before the Nov 11 Veterans Day observance, then working roughly three weeks before Thanksgiving and three weeks in December before Christmas recess — leaving the post-election lame-duck session as the only realistic remaining 2026-Congress opportunity, per multiple independent outlets (Motley Fool, Sept 18; CryptoBriefing; CoinGeek; CryptoSlate). NEW THIS WEEK, logged as context and explicitly NOT used to move P: on September 17, 2026 the CFTC filed a prerule action with the White House OIRA (RIN 3038-AF80, "Regulation of Crypto Asset Transactions and Crypto Asset Markets") — confirmed via CFTC's own pressroom reference plus independent corroboration (The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein, all dated Sept 18) — an administrative fallback track running in parallel to, not a substitute for, the stalled legislative one, and its own timeline (no proposed rule before 2027) sits beyond this pillar's near-term horizons. Market prices, reported not scored: Polymarket's "signed into law in 2026" contract reads roughly ~8% as of Sept 19 (down sharply from ~82% in February 2026, before the Trump crypto-income ethics dispute intensified), though this cycle's search results showed some inconsistency on the exact current level — treated as approximate/directional, not a precise point figure; Kalshi's "CLARITY Act law before Jan 1, 2027" contract, a distinct longer-horizon market, priced around 31 cents (~31% implied), up from 24 cents days earlier. No corrections were needed to any previously reported fact this cycle — the 49-50 cloture count, the Tillis procedural-vote mechanic, and the list of seven Democratic holdouts (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) all check out against this week's independent reporting. **P HELD FLAT again at 15/28/45/72/92.** This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-19_draft is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. The last TRUE committed baseline remains 2026-09-18_draft (15/28/45/72/92), auto-stamped Sept 18.

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 5, 2026 · Updated & Re-verified September 18, 2026 (LIGHT DAILY touch, 2026-09-18_draft: **HELD FLAT at 15/28/45/72/92** — Sen. Lummis reconfirmed Sept 15-16 the bill will not return to development on the CLARITY Act found this cycle. AUTO-STAMPED per the delegated daily authority.) · Last TRUE committed: 15/28/45/72/92 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-**FLAT at 15/28/45/72/92** — no new Senate vote scheduled since the Sept 15 cloture failure; the Senate is out for nearly all of October and the first week of November for the midterms, leaving the lame independent outlets. NEW THIS WEEK, logged not scored: the CFTC filed a prerule OIRA action Sept 17 (RIN 3038-AF80) on crypto market-structure rulemaking, an administrative fallback track running in categorically excluded from the delegated daily auto-stamp authority regardless of the size of the move (here, zero) — LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.) · Last TRUE committed: 15/28/September 22, 2026 (LIGHT DAILY touch, score set 2026-09-22_draft): carried forward unchanged at 15/28/45/72/92 — not re-researched this cycle; Fed & Macro re-rated down instead (see that pillar's r committed: 15/28/45/72/92 (2026-09-22_draft, auto-stamped Sept 22) · Not Financial Advice

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is *good for crypto* by then. Held flat this cycle at 32/47/58/82/92 — unchanged since Aug 8, through the committed Aug 22 refresh (d2), the abandoned/never-delivered Aug 22 refresh, independently re-verified against fresh primary sources rather than trusted at face value. The Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date, with Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found anywhere Aug 22-29 — and it bears repeating this is a cloture vote on the motion to proceed only, not final passage, with binding disputes remain fully unresolved as of today: the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan counter-proposal — no White House sign-off or released text found this cycle) CONFIRMED this cycle: CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting, directed CFTC staff to explore a fallback crypto-market-structure; the cloture continues to stall — adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10), dated **August 20, 2026** (some secondary outlets, e.g. American Banker/PYMNT, have the primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will utilize its existing authorities to begin establishing a regime for crypto asset market structure." unilateral-authority statement — it does not touch either binding dispute and is logged as context, not used to move P, same treatment as the SEC's earlier fallback signal. Two independent primary sources: DeFiRate.com (Aug 27) cites Polymarket 13-14% ("signed in 2026") and Kalshi 20-21% ("60 votes" by Jan 1 2027); a live Aug 28 Polymarket pull separately showed 14% — both labeled as market prices without a corroborating news event, none found. A "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote surfaced in this cycle's search and was cross-checked to an **August 19, 2026** SALT Wyoming/Jackson Hole symposium — flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an Aug 2026 development. congress.gov and dailynews.com (bot-blocking); primary-source confirmation relied on 7+ independent secondary outlets instead, consistent with how prior cycles have had to handle this. Context only, not new: the Senate passed the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a shutdown fight eating September floor time around Sept 15. The move stays flat because Republicans confirmed as yes votes. The actual live blocker, unchanged since Aug 8: a *toughened* Democratic ethics counter-proposal has sat unanswered at the White House since roughly Aug 1-3. Long-term.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of September 16, 2026 (LIGHT DAILY touch, 2026-09-16, draft) — the cycle in which the Sept 15 cloture vote resolved, and failed

The crowd: treated the Sept 13-14 ethics concessions as the story and priced in a real shot at cloture — Polymarket's 2026-signed-into-law odds roughly doubled to ~35% on the concession news, then fell 49-50, support didn't even reach 50, and Polymarket's odds cratered to ~5% within a day.

Me: re-rated down hard on the near windows — 37/53/62/83/92 → 15/28/45/72/92 — because the vote outcome is now a resolved fact, not a probability: named Democratic negotiators (including Lummis) and a motion to reconsider is procedural cover rather than a scheduled second try, and Lummis herself ruled out a quick floor return. The Senate calendar reinforces the near-term read — senators leave for leaving a lame-duck session as the earliest realistic floor-time window Kennedy named. I did not cut the 1yr or 3yr windows nearly as hard: the ethics concessions the White House already made a foundation for a future round, whether that's a lame-duck attempt or a new Congress in 2027.

My edge: the crowd's ~5% post-vote Polymarket read and my 15 (1mo) / 28 (3mo) P aren't the same question — Polymarket prices signature into law within calendar 2026, a much narrower bar than the market's. Where I agree with the crowd: this was a real, unambiguous loss, not a "gap narrowed, didn't close" story anymore — the gap held, decisively, and I'm not going to soft-pedal.

The Facts

As of September 16, 2026 — LIGHT DAILY touch (2026-09-16, draft), the cycle in which this pillar re-rated DOWN for the first time since June. Hard numbers only, sources on the last page. New facts from this cycle appear first; earlier facts are in italics.

- ★ ★ **NEW — September 15, 2026, 2:15pm ET: the Senate cloture vote on the motion to proceed to H.R. 3633 FAILED, 49-50** — well short of the 60 votes required, and support did not even reach 50. Corroborated by 6+ independent outlets (CNBC, CoinDesk, CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call.
- ★ ★ **NEW — named Democrats who were negotiating the bill voted No**, including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto — Gallego, flagged in the July draft.
- ★ ★ **NEW — procedural aftermath, September 15-16, 2026:** Majority Leader Thune filed a motion to reconsider (a procedural preservation, not a scheduled revote); Sen. Lummis told reporters he likely waits for the lame-duck session; senators leave Washington in early October for the midterms and do not return until after the election.
- **MARKET PRICE, reported not scored:** Polymarket's "CLARITY Act signed into law in 2026" odds crashed from roughly 35% pre-vote to roughly 5% post-vote (KuCoin, Yahoo Finance, Coingate, etc.).

Carried forward from the September 15 light daily touch — still load-bearing, not contradicted:

- ★ **September 13, 2026: the White House agreed to an ethics package for the CLARITY Act and transmitted the language to Senate Republicans.** A senior administration official called it "a significant step." Corroborated by CNBC, The Hill, Forbes, Yahoo/Politico and congress.net — 4+ independent outlets. This is the first movement on the blocker that has sat unanswered at the White House since the July draft.
- ★ ★ **NEW — September 14, 2026: Sens. Lummis, Boozman and Scott posted the FINAL CLARITY Act text one day before the cloture vote.** Versus the July draft, the ethics division **drops** the Trump's term), **reverses the July text's outright bar on state-attorney-general enforcement** and gives state AGs standing to sue, and **raises civil penalties from "10% of the take or \$50,000"** to "10% of the take or \$100,000" for the president, vice president, members of Congress, federal judges and their spouses from issuing or sponsoring digital assets for compensation while in office. The sponsors say the draft includes "a number of changes" to the Block, The Defiant, CNBC, crypto.news, BelnCrypto, CryptoBriefing and The Hill — 6+ independent outlets.
- **What the concession does NOT do:** it does not require divestment or blind-trust placement of preexisting crypto holdings — the core of the bipartisan Tillis-Gallego counterproposal.
- **September 14, 2026: Sen. Warren called the provision a "weak fig leaf that will do nothing to stop him from making his next \$1.4 billion in crypto profits"** and went to the Senate floor.
- **September 14, 2026: Sen. Gallego — the lead Democratic negotiator and the most likely yes vote — said the Republican text "as it currently stands falls short,"** naming ethics, consumer protection and other provisions that "must be strengthened."
- **Late Monday, September 14, 2026: Senate Democrats sent a counteroffer to Republicans** on the eve of the vote (CoinDesk, Sept 15). CoinDesk could not confirm its contents beyond the Democratic objection that the new language would still block state attorneys general from directly suing the U.S. president.
- **The vote itself had not happened when this cycle ran.** The cloture vote on the motion to proceed to H.R. 3633 ripens Tuesday, September 15 at 2:15pm ET, 60 votes required; this run executed on the Democratic/independent crossovers; zero are publicly committed. It is a vote on the motion to proceed only — floor debate, amendments and a separate 60-vote passage threshold still follow.
- **MARKET PRICE, reported not scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to ~34.5% on the ethics deal, versus the ~23% Dec-31 read priced Sept 13. Marking the two quotes may not share a question basis.

Carried forward from the September 12 full weekly refresh and the daily touches since — still load-bearing, not contradicted:

- ★ ★ **NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Daily Crypto, etc. outlets). Lummis states it "incorporated more than 114 separate provisions at my Democrat colleagues' request." Substantively it narrows the DeFi/prediction-market scope — non-decentralized, settled spot trading in digital commodities, addressing the tribal-government prediction-market objections raised earlier.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text**, per the July draft; the blocker was not resolved by this release.
- **No Democrat had publicly announced support for the new text as of Sept 10-11**, despite the 114 concessions (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle's reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalshi roughly 20-30%; prediction-market reads, not used to move P.
- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.

- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — the Lummis text release is well-corroborated but a mixed signal (real concessions offered, but the Tillis-block wash, not a clearance of the sufficiency bar for a move in either direction.

Carried forward from the September 5 full weekly refresh (2026-09-05_draft2, committed by Alex Sept 5) and the light daily catch-ups since (through this morning's Sept 12) — still load-bearing, re-verified this cycle, not contradicted:

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date**, reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate with no schedule change found anywhere Aug 22-29. This is a cloture vote on the *motion to proceed* only, not final passage — floor debate/amendments and a separate 60-vote passage threshold.
- ★ ★ **NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting**, directed CFTC staff to explore a fallback crypto-CLARITY continues to stall. Adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets, e.g. American Bank primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will utilize its existing authorities to begin establishing a regime for crypto asset market unilateral-authority statement — it does not touch either binding dispute (ethics or stablecoin-yield) and is logged as context, NOT used to move P, same treatment as the SEC's earlier fallback
- **Both binding disputes remain fully unresolved as of today**: the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan counter-proposal — no White House sign-off or released text)
- **Prediction markets (market prices, not institutional estimates — house rule), two independent pulls this cycle**: DeFiRate.com (Aug 27) cites Polymarket 13-14% ("signed in 2026") and K separately showed 14%. Consistent low-teens-to-20s read across sources — but market prices alone, even corroborated by a second independent pull, can't move P under house rules without
- ★ ★ **NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and was cross-checked to an A SALT Wyoming/Jackson Hole symposium. Flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an Aug 2026 development — a caution for readers,
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** (bot-blocking) — primary-source confirmation relied on 7+ independent secondary
- **Context only, not new**: the Senate passed a stopgap funding bill Aug 8 (Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk
- **No change found to the confirmed Democratic yes-vote count** (still zero) or to any primary-source Senate floor action.
- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either

Carried forward — the abandoned/never-delivered 2026-08-28_draft (daily catch-up, researched but never rendered/selfchecked/archived/committed): logged a Polymarket "signed in 2026" drift to 14% (live pull, Aug 28) from ~19% found that day. Treated as not delivered per house discipline, superseded by this cycle's independent re-verification, not contradicted.

Carried forward from the committed Aug 22 full weekly refresh (2026-08-22_draft2 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the Sept 15, 2:15pm ET cloture vote on the motion to proceed was reconfirmed via 7+ outlets** as of Aug 21 (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Bank) still a motion-to-proceed vote only, not final passage.
- **Sen. Ruben Gallego, on the record at the Aug 19, 2026 SALT Wyoming Blockchain Symposium**, said the White House has not given a point-by-point response to the bipartisan Tillis-Gallego come back "blank, weaker than before, or not at all." He also explicitly warned against rushing the Sept 15 vote. Multi-source: crypto.news, Cointelegraph, FXStreet, Blockonomi.
- **White House crypto adviser Patrick Witt said Aug 19** the administration is "fully committed" to getting CLARITY passed in September and would keep negotiating with Democrats up to the vote. Multi-source (Cointelegraph, Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan). Combative public messaging, not evidence of a substantive co
- **An unverified, non-journalistic X post** from a crypto project's promotional account (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision "finally has a deal on the table" and is "o Gallego's own on-record Aug 19 statement (4+ independent outlets). Not used.
- **Coinbase CEO Brian Armstrong said Aug 21** he's "pretty optimistic" the bill clears 60 votes, arguing Thune wouldn't have scheduled Sept 15 without expecting passage, and that "both sides interested industry party's opinion — not used to move P.

Carried forward from the same-day Aug 22 catch-up draft (d1 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the SEC formally proposed "Regulation Crypto Assets" on Aug 18** (sec.gov press release 2026-76) — a token-offering exemption regime: a startup exemption ($\leq \$5M$ over 4 years), a full from the "investment contract" definition. This is a separate SEC rulemaking track, not the CLARITY Act, and does not touch CLARITY's binding ethics-provision or stablecoin-yield disputes —
- ★ ★ **Trump hosted a White House crypto event on Aug 19**, with SEC Chair Atkins, CFTC Chair Selig, and industry CEOs present, and publicly pushed Congress to pass "a fair version" of CLARITY rhetoric — no text change or deadlock resolution reported, so not used to move P.
- **As of Aug 21, both live disputes remain open**: the ethics-provision fight (Democrats pressing for stronger limits on officials' crypto holdings) still has no confirmed White House sign-off on unresolved.
- **Prediction markets logged that morning**: Polymarket "signed into law in 2026" = 25% Yes (Aug 22 direct pull); Kalshi's "reaches 60 votes" market $\approx$ 22% (Aug 21) — this cycle's fresh pull in volatility the house rule treats as noise, not signal, on its own.
- ★ ★ **FLAGGED, NOT SCORED — Coinbase CEO Brian Armstrong's on-record prediction that CLARITY "will pass"** is single-source opinion (one person, one outlet's framing) — explicitly not "pretty optimistic" remarks logged above.

Carried forward from the Aug 17, 18, and 20 drafts (written but never delivered — no report/render/archive/commit followed any of them; independently re-verified today, not contradicted):

- **Sen. Ruben Gallego, speaking at the SALT Wyoming Blockchain Symposium on Aug 20**, said White House responses to the Tillis-Gallego ethics counter-proposal "have come back blank floor vote (Blockonomi/Cointelegraph, FXStreet, Crypto-Economy, all Aug 20) — reaffirms the existing stalemate rather than deepening it.
- **Senate Banking Chair Tim Scott said (The Block, Aug 18) the stablecoin-yield provision "we thought was all settled" has resurfaced as a live dispute**, amid community-bank lobbying of Aug 21 (see above).
- **White House digital-assets adviser Patrick Witt called himself "truly optimistic and bullish" on passage** (The Block, Aug 18) despite the stablecoin friction — rhetoric only, no new whip
- **Polymarket "signed in 2026" bounced from ~16% (around Aug 14-15) to ~24% (Aug 20 live pull)** on no identified news catalyst, and has since settled to 25% (Aug 22) — noise, not use
- ★ ★ **FLAGGED FOR THE RECORD, not scored**: Galaxy Research appears to have cut its 2026-passage estimate further to 10% (from the 30% already reflected in this report's history) around Aug research cycle rather than new information — flagging for Alex's attention, not treating as a driver of today's score.

Carried forward from the August 16 committed baseline (still load-bearing; independently re-verified, not contradicted, this cycle):

- ★ ★ **NEW — the SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote the day before it was scheduled**, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, Gent pathways under a separate SEC rulemaking track — relevant context on regulatory limbo across both branches, but not a CLARITY-specific trigger; not used to move P.
- **The Senate remains in August recess; no new floor-schedule or ethics-text development found (as of Aug 16)**. Re-checked Bitcoin Foundation, Troutman Financial Services, CoinDesk — returns Sept 14, three weeks to work the bill), with no new reporting on the Tillis-Gallego ethics counteroffer or White House sign-off.
- **The Sept 15, 2:15pm ET cloture date remains widely corroborated** — no change from Aug 14.
- **New detail on remaining disputes**: illicit-finance provisions and reconciling the Senate Agriculture Committee's text are named as two additional sticking points ahead of the vote (PYMNTS), already carried.
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633**. Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoSI text (Calendar No. 423).
- **The real live blocker remains a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump stay senators were negotiating a stronger version of the original concession).
- **Zero confirmed Democratic yes votes on cloture** as of Aug 16, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.

- **Polymarket "signed in 2026" (market odds, not an institutional estimate) remains around the mid-teens** per the conflicting cached reads (13-21%) noted Aug 14 — not re-verified as of yet; the directional read (still depressed vs. earlier in the year) is the reliable part.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows Justice was an executive-calendar nominee vote, and Jul 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source confirmation of "no floor" during the Aug 7 recess.
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground. White House sign-off is unconfirmed — CoinDesk's own reporting hedges "whether they've actually done it is unclear," and neither senator's office nor the White House responded to comment.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated (and the crypto industry (DeFi Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to is the preferred, "future-proof" path. A modest reducer of legislative urgency — noted, not scored.
- **Odds board (sentiment only) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, Jul 30) — cut his personal 2026-passages estimate from 50% to 30% — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-counted here.
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor" — was refilled within 48 hours, GOP floor count restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ in other crypto.
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the stablecoin.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House Banking has not yet moved.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$81,224.46** (September 19, 2026). A **GENIUS-sized move (~40-47%)** from here $\approx$ **~\$114-119K**. A retest of the ~\$125K cycle high $\approx$ **+53.6%**. The anchor is real: during the GENIUS cycle, BTC ran from ~\$83K to ~\$120K ($\approx$ +44%).

Discount hard right now — the CLARITY analog just showed the other side of the coin: Polymarket's 2026-signed-into-law odds crashed from ~35% pre-vote to ~5% post-vote (Sept 15-16) on the "Bitcoin slides from nearly \$80,000 as Senate votes on Clarity Act"). The Prize doesn't feed the math — it tells you what the lean is worth acting on, and this cycle is a live example of the pillar's moved on the same news, and the two aren't the same measurement.

The Other Side

The strongest honest case this is wrong

- ★ ★ **RESOLVED, Sept 15-16: the bear case below won.** Multiple bullets in this section flagged the cloture vote as more likely to fail than the ethics concessions suggested — Punchbowl's "doomed" pessimism that this report chose not to score. The vote failed 49-50, a wider margin than even those bears expected. This report's own 1mo/3mo re-rate down to 15/28 (from 37/53) reflects the cycle. The remaining bullets below are kept as the historical record of that case, not because every specific hypothetical in them still applies.
- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have moved (6mo improvement from the Jul 18 low) to something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows.
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture knowing the midterms rather than to actually advance the bill, which would make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" produces real movement rather than another procedural loss, and September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped 10% in the same period; professional handicappers see this as a genuine coin-toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency — and now the CFTC has said the same thing.** If both the White House-aligned SEC and CFTC believe they can deliver workable rules further. CFTC Chair Michael Selig's Aug 20, 2026 on-record speech directing staff to explore a fallback rulemaking (verified against cftc.gov) is the second such regulator-level statement this session in the same direction.
- **Prediction markets have drifted lower again, not higher.** DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21% — near the lower end of the range this report has tracked since 14%. Two independent readings agreeing on a low number is a real signal even if it doesn't clear the sufficiency bar to move P on its own; a bear could reasonably argue this report is being too optimistic.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set September 16, 2026 — light daily touch, 2026-09-16_draft, the cycle in which the cloture-vote trigger fired (and failed) and this pillar re-rated down. Re still no change to the failed-cloture read, plus one new context-only administrative-track item logged below (CFTC OIRA filing).

DATE	EVENT
Checked Sept 19, no change to the legislative read	No new Senate floor vote is scheduled since the Sept 15 cloture failure. Sen. Tillis's motion to reconsider remains only a procedural placeholder; the Senate's 2026 (Roll Call, BGov, Troutman Financial Services) shows it out for nearly all of October and the first week of November for the midterms, returning briefly before the Nov 11 Veterans Day observance, then working roughly three weeks before Thanksgiving and three weeks in December before Christmas recess — leaving the lame-duck session only realistic remaining 2026 opportunity (Motley Fool 9/18, CryptoBriefing, CoinGeek, CryptoSlate)
Fired Sept 17, 2026 — confirmed via 4 independent outlets (The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein, all Sept 18)	CFTC files prerule OIRA action (RIN 3038-AF80, "Regulation of Crypto Asset Transactions and Crypto Asset Markets") — an administrative fallback rulemaking track in parallel to the stalled legislative track, its own timeline not reaching a proposed rule before 2027
Checked Sept 18, no change	Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor — consistent with, not incremental to, the existing read established the day of the failed cloture vote; no new dated development found
Checked Sept 17, no change	No new dated development found since the Sept 15 cloture-vote failure. A policy advocate's Sept 16 comment that the bill "could get another shot during lame-duck session" and speculative commentary already anticipated in the Sept 16 baseline's own note (Sen. Kennedy's remark), not a new dated fact
Surfaced Sept 10, checked Sept 13 — corroborated via 3+ independent outlets (crypto.news, Coingape, CoinSpectator)	A FOURTH named Democratic blocking issue: vertical-integration conflict-of-interest authority. Democrats want regulators empowered to set conflict-of-interest standards for vertically integrated crypto firms — one company controlling several legs of a transaction, the FTX/Alameda pattern. Republicans say they support safeguards to prevent a future administration misusing the authority; industry stakeholders have pushed back on including the provision. Sens. Booker, Lummis and Boozman are negotiating. Separately, Sen. Lummis spent Sept 11-13 publicly pressing Democrats to back the revised text ("Democrats wrote the fix, now vote for it", 115 changes incorporated) — advocacy, not a vote commitment; still zero Democrats publicly committed. Polymarket ~23% signed-into-law by Dec 31 — a market price, reported not scored
Checked Sept 2, no change	Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in — no White House sign-off on the Tillis-Gallego ethics language, no further corroborated prediction-market pull
Checked Sept 1, no change	No material development found on the ethics counteroffer, the stablecoin-yield dispute, or the Sept 15 cloture schedule since the Aug 31 light daily catch-up
Fired Aug 8, reconfirmed via 7+ outlets as of Aug 21, reconfirmed again by DeFiRate.com Aug 27, adversarially re-verified Aug 29	Cloture vote on the motion to proceed to H.R. 3633 is scheduled 2:15pm ET Tuesday, Sept 15 — no schedule change found anywhere Aug 22-29 (DeFiRate.com, Motley Fool, CryptoSlate, CryptoRank); this is a motion-to-proceed cloture vote only, not final passage
Fired Aug 20, checked Aug 29	CFTC Chair Michael Selig's on-record speech at the Innovation Advisory Committee's inaugural meeting — directed CFTC staff to explore a fallback crypto-market structure rulemaking under existing authorities "if CLARITY continues to stall because of Democratic obstruction"; verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10)
Checked Aug 29 — both still open	Ethics-provision dispute (no confirmed WH sign-off on Tillis-Gallego language) and the stablecoin-yield/banking dispute both remain fully unresolved; no development found on either since Aug 22
Pulled Aug 27 (DeFiRate.com) and Aug 28 (live), checked Aug 29	Prediction markets: Polymarket 13-14%, Kalshi 20-21% — two independent pulls agreeing on a low-teens-to-20s read
Traced Aug 29	NOT FIRED / NOT USED — "Sen. Tim Scott: 12-18 Democrats open" quote traced to an August 2025 (one-year-old) story, a likely search-engine year-confusion artifact
Aug 8, context only, checked Aug 29	Senate passed a stopgap funding bill (Collins-Murray deal) funding the government through Dec 11, 2026
Sept 15	PENDING — first cloture vote (motion to proceed), now precisely dated; Democrats call it "doomed" absent further concessions; Republicans hold 53 of 60 needed
Unresolved since Jul 30; checked again Sept 10-12	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed as of Aug 29; Gallego's own Aug 29 remarks confirm no meaningful WH response as of that date. A revised ~630-page CLARITY Act text WAS released Sept 10, 2026 (Sen. Lummis, primary source + 6 independent outlets — The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, Blockhead), incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction market scope — but the ethics/conflict-of-interest language in it is reported largely unchanged from the July draft, so this specific dispute remains unresolved
Ongoing	Three named Democratic blocking issues: ethics enforcement, illicit-finance/DeFi provisions, stablecoin yield (Yahoo Finance, Aug 5)
PARTIALLY FIRED Sept 13-14, 2026 — 6+ independent outlets	White House signs off on ethics language and Senate Republicans post the final text — the Sept 14 text drops the Jan 20, 2029 sunset, restores state-attorney-general standing to sue, and raises civil penalties to 20% or \$500,000 whichever is greater. But it is <i>not</i> a merged text with Democratic buy-in: no divestment requirement, zero Democrats publicly committed, Gallego says it "falls short," and Democrats counteroffered late Monday Sept 14.
FIRED & RESOLVED — Sept 15, 2026, 2:15pm ET	The cloture vote on the motion to proceed to H.R. 3633 FAILED, 49-50 (60 needed) — support did not even reach 50, a steeper shortfall than most industry watchers expected. Named Democrats who were negotiating the bill (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) voted No. Thune filed a motion to reconsider (procedural only); Lummis told reporters the bill will not return to the floor. 6+ independent outlets (CNBC, CoinDesk, CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call.
Sept 16, context only	Senate calendar: senators leave Washington in early October for the midterms (7 weeks out) and do not return until after the election; Sen. Kennedy said any renewed legislative structure push likely waits for the lame-duck session; the SEC's "Regulation Crypto Assets" workstream and CFTC spot-market drafting remain the live administrative fallback tracks.

The flip line: cloture fails on Sept 15-16 with no released, WH-confirmed ethics text and no clear next-step plan = start treating 2026 passage as effectively dead, not just delayed. Keep 1-year and 3-year Bull with formally filed cloture motion is delayed, not dead.

P (2026-09-19_draft, DRAFT — FULL WEEKLY refresh, awaiting Alex's stamp; HELD FLAT): 15 / 28 / 45 / 72 / 92 · Prior committed P (2026-09-19_draft, DRAFT — FULL WEEKLY refresh, awaiting Alex's stamp; HELD FLAT): 15 / 28 / 45 / 72 / 92 · Weight: 20% (equal) · Impact: 8 (uniform) · This pillar's own signals (all unchanged): 1mo -4.76 (Strong Bear) · 3mo -2.99 (Bear) · 6mo -0.68 (Strong Bull) · Master (equal-weight) this cycle: 1mo -1.99 · 3mo -1.54 · 6mo -0.52 · 1yr +1.14 · 3yr +2.82 · THE FINAL NUMBER: -0.02 equal-weighted · This pillar moved slightly from the last cycle's -0.03/+0.50 on Fed & Macro's Sept 22 re-rate (see that pillar's report); no other qualitative pillar moved this cycle's move

Prior cycle (Sept 18 light daily touch, score set 2020-09-18_draft): re-checked — Sen. Lummis reconfirmed Sept 15-16 the bill will not return to the floor, which is consistent with, not incremental to, the existing law. Light daily touch, full research access, verification clean — **AUTO-STAMPED SEPTEMBER 18, 2026** per the runbook's delegated authority. Tokenization RWA was the only pillar that moved that cycle — see

Prior cycle (Sept 17 light daily touch): re-checked — no new dated development since the Sept 15 cloture-vote failure; a policy advocate's Sept 16 lame-duck comment was already anticipated commentary,

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: a separate, deeper research pass run this afternoon, independent of this morning's light daily catch-up — the first deep multi-~630-page CLARITY Act text on **Sept 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BelnCrypto, Coingape, and Blockhead — 6+ independent Democrat colleagues' request" and narrowing the DeFi/prediction-market scope (non-decentralized trading protocols must now register with the CFTC, confined to cash-settled spot trading in digital commodities) support on remains largely unchanged from the July draft — the specific blocker tied to his vote was not resolved. No Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, CryptoTimes, and BelnCrypto). The 53-R/~8-10-crossover whip count are unchanged and reconfirmed. Prediction-market reads this week were noisy and partly single-sourced — Polymarket roughly low-teens-to-20%, Kalsbeek not used to move P. **P HELD FLAT at 32/47/58/82/92.** The Lummis release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis-blocking provision untouched and zero count picture, not a clearance of the sufficiency rule's bar (primary source or 2+ independents) for a move in either direction. **This is a FULL WEEKLY refresh — categorically excluded from the runbook (here, zero) — so this set is LEFT AS DRAFT, not auto-stamped, AWAITING ALEX'S MANUAL REVIEW.** The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped text.

This morning's cycle (*Sept 12 light daily catch-up; score set 2026-09-12_draft*): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remained unchanged; no new dated legislative development had surfaced since Paul/Hawley and a conditional Tillis, needing 8-10 D/I crossovers) was the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **P HELD FLAT at 32/47/58/82/92.** That cycle was a light day after the runbook's delegated daily auto-stamp authority, **that set was AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)." Iran War Risk** is the only pillar that moved that cycle — see t

Prior cycle (Sept 11 light daily catch-up): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remains unchanged; no new dated legislative development found since Sept 10. **P HELD FLAT. AUTO-S**

Sept 10 light daily catch-up: re-checked — the Sept 15 cloture-vote schedule unchanged since Sept 9; Polymarket 2026-passage odds still in the same ~16% band, a market-price read only; no new dated le

Prior cycle (Sept 9 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price move only.

Prior cycle (Sept 8 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the ethics-language counteroffer found; no fresh corroboration.

Prior cycle (Sept 6 light daily catch-up): held flat — House Whip Emmer's office pulled the Sept 21/28 voting weeks off the House calendar, but the operative Sept 15 Senate cloture vote was unchanged. **AU**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch: the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House optimism was a single executive's opinion, not new information. **P HELD FLAT at 32/47/58/82/92. COMMITTED BY ALEX September 5, 2026.**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores.json that session, not in this pillar's research. The last TRUE committed baseline for this pillar remains **2026-09-02_draft (32/47/58/82/92), auto-stamped Sept 3**. Not corrected retroactively in scores.json — status.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat again — unchanged since Aug 8, through the committed Aug 22 full weekly refresh (2026-08-22_draft2, stamped by Alex Aug. 22) — the ethics/conflict-of-interest provision (Tillis-Gallego counteroffer, still no White House sign-off since Jul 30/31) and the stablecoin-yield dispute — remain fully unresolved. This shared score set (2026-09-02_draft2, stamped by Alex Sept. 2) — the master FINAL NUMBER's equal-weight call band, not for any reason in this pillar — **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026), the run of 32/47/58/82/92 held flat Aug 8 through Sept 14, the Sept 15 up-move to 37/53/62/83/92, and the Sept 16 down-straight cycles (Sept 16, 17, 18).

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

*LIGHT DAILY touch, September 22, 2026 (score set **2026-09-22_draft**, committed, auto-stamped) — checking for changes since the 2026-09-19_draft baseline. **This pillar HELD FLAT at 15/28/45/72/92.***

- Not independently re-researched this cycle — this was a targeted single-pillar Fed & Macro follow-up (two regional Fed survey findings; see that pillar's report for the sourcing), not a fresh CI
- **Score decision: HELD FLAT at 15/28/45/72/92.** Not re-researched this cycle (targeted single-pillar touch) — carried forward from the Sept 19 weekly review. AUTO-STAMPED alongside Fed

Carried forward — the September 19 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 19, 2026 (score set **2026-09-19_draft**, LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW) — the first deep multi-source research dive since the Sept 12 full weekly refresh, checking for changes si

- **Full weekly refresh, full WebSearch access, no degradation this cycle:** WebFetch to arbitrary domains remains blocked in this sandbox (a documented, minor sourcing-depth caveat, not a rather than direct fetches of cftc.gov/reginfo.gov — the CFTC filing below is corroborated by 4 independent outlets regardless.
- **No new Senate floor vote is scheduled since the Sept 15 cloture failure (49-50).** Sen. Tillis's motion to reconsider remains only a procedural placeholder — no outlet reports a scheduled

★ **NEW** — the Senate's 2026 calendar shows it is out for nearly all of October and the first week of November for the midterms (Election Day Nov 3), returning briefly (roughly two days) in November, then again in December for a few days — leaving the post-election lame-duck session as the only realistic remaining 2026-Congress opportunity. Coverage of the calendar, plus the lame-duck framing independently reflected in Motley Fool (Sept 18), CryptoBriefing, CoinGeek, and CryptoSlate.

★ **NEW, LOGGED AS CONTEXT, NOT USED TO MOVE P** — on September 17, 2026 the CFTC filed a prerule action with the White House's Office of Information and Regulatory Affairs. Asset Markets." Confirmed via CFTC's own pressroom reference plus independent corroboration (The Block, Yahoo Finance/247WallSt, CryptoTimes, and Gokhshtein, all dated Sept 18) — 4 in the stalled legislative track, not evidence about the bill's own passage odds; its own timeline (no proposed rule before 2027) sits beyond this pillar's near-term horizons, so it is not used to move

- **MARKET PRICE, reported not scored:** Polymarket's "signed into law in 2026" contract reads roughly ~8% as of Sept 19 — down sharply from ~82% in February 2026, before the Trump crypto some inconsistency on the exact current level (one source implied a rebound to higher single digits from a recent low), so treat this as approximate/directional, not a precise point figure. Kals

market — priced around 31 cents (~31% implied), up from 24 cents days earlier.

- **No corrections needed to any previously reported fact this cycle** — the 49-50 cloture count, the Tillis procedural-vote mechanic, and the list of seven Democratic holdouts (Gillibrand, Warren, and others) — this week's independent reporting.
- **Score decision: HELD FLAT at 15/28/45/72/92.** No window moved; full independent primary-source research was done but nothing cleared the sufficiency bar (primary source or 2+ independent sources). **categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-19_draft is LEFT AS DRAFT, NOT auto-stamped.** baseline remains 2026-09-18_draft (15/28/45/72/92), auto-stamped Sept 18.

Carried forward — what changed in the September 18 light daily touch (2026-09-18_draft, committed, auto-stamped), for continuity:

- **Checked Sept 18, no change:** Sen. Lummis reconfirmed Sept 15-16 that the bill will not return to the floor — consistent with, not incremental to, the existing read established the day of the cloture vote.
- **Score decision: HELD FLAT at 15/28/45/72/92.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 17 light daily touch (2026-09-17_draft, committed, auto-stamped), for continuity:

- **Re-checked for a new dated development since the Sept 15 cloture-vote failure — found none.** A policy advocate's Sept 16 comment (CoinSpectator/Cointelegraph) that the bill "could be passed" anticipated in the Sept 16 baseline's own note (Sen. Kennedy's remark) — not a new dated fact, does not move P.
- **Score decision: HELD FLAT at 15/28/45/72/92.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 FAILED, 49–50** — well short of the 60 needed, and support did not even reach 50, a steeper short than expected. Independent outlets (CNBC, CoinDesk live-updates, CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call — clears the sufficiency bar comfortably.
- ★ ★ **NEW — named Democrats who were working on the bill voted No**, including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto. Sen. Gallego — the lead Democrat — convert, confirming the counteroffer sent Sept 14 was not accepted.
- **Procedural aftermath.** Majority Leader Thune filed a motion to reconsider, a procedural preservation, not a scheduled revote. Sen. Lummis told reporters the bill will *not* return to the floor. Sen. Cruz called it "a big difference between dead and mostly dead." Senators leave Washington in early October for the midterms (7 weeks out) and do not return until after the election. Market drafting under existing authority remain the live administrative fallback tracks.
- **MARKET PRICE, reported but NOT scored:** Polymarket's "CLARITY Act signed into law in 2026" odds crashed from roughly 35% pre-vote to roughly 5% post-vote (KuCoin, Yahoo Finance, CoinMarketCap). Consistent with the re-rate.
- **Score decision: RE-RATED DOWN, 37/53/62/83/92 → 15/28/45/72/92.** Per window: **1mo 37→15** — the one near-term floor catalyst this pillar was tracking is now resolved and lost by a week. **3mo 53→28** — a lame-duck attempt is a real but uncertain path, so some residual odds survive inside the window, down sharply from the pre-vote odds. **1yr 83→72** — the concessions the White House already made on ethics language are a real four-month bite give more room to recover within six months, so the cut is smaller in relative terms. **3yr 92, held flat** — a single failed cloture vote does not move the multi-year eventual-passage read.

Carried forward — what changed in the September 15 light daily touch (2026-09-15_draft, committed, auto-stamped), for continuity:

- ★ ★ **NEW — the White House agreed to an ethics package on September 13, 2026** and transmitted the language to Senate Republicans, a senior administration official calling it "the most significant single most-cited blocker, unanswered at the White House since roughly Aug 1–3. Corroborated across independent outlets (CNBC, The Hill, Forbes, congress.net, Yahoo/Politico).
- ★ ★ **NEW — Lummis, Boozman and Scott posted the FINAL CLARITY text on September 14, 2026, one day before the cloture vote, and it concedes three of the four standing Democratic objections.** **January 20, 2029 sunset** — the July text let the ethics section expire with Trump's term; (b) **REVERSES the July text's outright bar on state-attorney-general enforcement**, giving state AGs the right to sue for **penalties** from "10% of the take or \$500,000, whichever is *less*" to "20% or \$500,000, whichever is *greater*." The bar covers the president, vice president, members of Congress, federal judges and state attorneys general while in office. Corroborated by 6+ independent outlets (The Block, The Defiant, CNBC, crypto.news, BelnCrypto, CryptoBriefing, The Hill) — clears the sufficiency bar comfortably. Lummis/Boozman/Scott changes (up from the 114 logged Sept 10).
- **The honest counterweight, same-day and equally well sourced.** The concession does *not* include the Tillis-Gallego divestment/blind-trust ask — preexisting crypto holdings need not be disclosed. Sen. Lummis will do nothing to stop him from making his next \$1.4 billion in crypto profits" and took it to the floor. Sen. Gallego — the lead Democratic negotiator and the most likely yes vote — said the concession protects against protection, illicit finance, conflicts of interest and market integrity. And Senate Democrats sent a **counteroffer** to Republicans late Monday, September 14 (CoinDesk, Sept 15): negotiation was the goal.
- **SINGLE-SOURCE, reported but NOT scored:** CoinDesk alone reports the Democratic objection that the new language would still *block state attorneys general from directly suing the U.S. president* during this run; under the house sufficiency rule it cannot move a P by itself.
- **MARKET PRICE, reported but NOT scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to ~**34.5%** on the ethics deal, versus the ~23% Dec-31 read priced Sept 13. Consistent with the re-rate. Do not share a question basis — house rule, never blended, never used to move P.
- **The whip math itself is unchanged.** Zero Democrats publicly committed; Republicans hold 53 seats and need roughly 7–9 crossovers against likely GOP defections. **The 2:15pm ET cloture vote (this cycle executed 08:01 ET)** — its outcome lands in the next cycle, and it remains a vote on the motion to proceed only, not final passage.
- **Score decision: RE-RATED UP, 32/47/58/82/92 → 37/53/62/83/92.** Per window: **1mo 32→37** — the top-cited blocker got real, text-level concessions hours before the vote, but the lead Democratic objection remains. **3mo 47→53** — the largest move: a White House that has now demonstrably moved, plus a live Democratic objection. **6mo 58→62** — same logic, decayed. **1yr 82→83** — the medium-term read was already high and barely changes. **3yr 92, held flat** — a single negotiation does not move the long-term read.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

- **Sept 14, light daily touch:** Schumer convened a Democratic caucus Sunday Sept 13 to settle the party's position on CLARITY ahead of the cloture vote (6+ independent outlets), but no public change. **P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED SEPTEMBER 14, 2026.**

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 (score set 2026-09-12_draft2) — the first deep multi-source research dive since the Sept 5 full weekly refresh (2026-09-05_draft2), run separately from and after this morning's light daily touch (2026-09-11_draft, committed, auto-stamped).

- ★ ★ **NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, D.C. outlets). Lummis states the text "incorporated more than 114 separate provisions at my Democrat colleagues' request." Substantively, it narrows the DeFi/prediction-market scope: non-decentralized cash-settled spot trading in digital commodities — addressing the tribal-government prediction-market objections raised earlier in the process.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text.** The objection Sen. August was not resolved by this release.
- **Despite the 114 concessions, no Democrat had publicly announced support for the new text as of Sept 10-11** (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle's reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalsbeek used to move P.
- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.
- **Score decision: P HELD FLAT at 32/47/58/82/92 across all five windows.** The Lummis text release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis objection wash against the already-priced whip-count picture, not a clearance of the sufficiency bar (primary source or 2+ independents) for a move in either direction. **This is a FULL WEEKLY refresh, authority regardless of the size of the move (here, zero) — LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW.** The last TRUE committed baseline remains 2026-09-11_draft, committed, auto-stamped.

Carried forward — what changed in this morning's Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped), for continuity:

- **Sept 12, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development found since Sept 11. Whip-count mat D/I crossovers) is the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged since Sept 9; Polymarket 2026-passage odds still read in the same ~16% bar legislative development found. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18% (a market-price development found. **Score decision: P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged; no new dated legislative development, no WH sign-off on the **P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — the Sept 15, 2:15pm ET cloture vote remains scheduled, unchanged. New since Sept 5: House Majority Whip Tom Emmer's office h (crypto.news, Yellow.com) — affects the House timeline only, not the operative Sept 15 Senate cloture vote. Polymarket's ~18% 2026-enactment odds (market price, not an institutional estimate).
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved; no new dated development clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield).** The Tillis-Gallego ethics counteroffer sent to the White House remains from J reconfirmed unchanged via WebSearch (DeFi Rate, The Block, Bitget, Motley Fool).
- **Coinbase CEO Brian Armstrong's public prediction that the bill passes is a single executive's opinion, not new information** — reported for completeness, not used to move P.
- **Score decision: HELD FLAT at 32/47/58/82/92.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from delegated daily auto-stamp, so it was left for market pillar that moved this week, on a hot August jobs report. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session. corrected retroactively.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in.** Score decision: HELD FLAT at 32/47/58/82/92. This shared score set was originally left as draft **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 31-Sept 1.** The Tillis-Gallego ethics counteroffer sent to the White House 15, 2:15pm ET cloture date is reconfirmed unchanged by multiple outlets.
- **No fresh prediction-market pull with a corroborating news event found this cycle** to clear the sufficiency bar.
- **Score decision: HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-09-01_draft) is a light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority this cycle — see that report.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated development found on either binding dispute (ethics/conflict-of-interest, stablecoin yield) Aug 29-31.** The Sept 15, 2:15pm ET cloture date is reconfirmed unchanged a and news.bitcoin.com (all through Aug 30-31).
- **Score decision: HELD FLAT at 32/47/58/82/92.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **AUDIT NOTE — a 2026-08-28_draft daily catch-up cycle sits between this refresh and the Aug 22 commit, abandoned and never delivered.** It was researched (held flat, logged a Polymarket commit followed it — treated as not delivered, per the same house discipline this report has applied to the Aug 17, 18, and 20 drafts and the interrupted Aug 21 session. This cycle superseded sources.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date remains the only scheduled floor action,** reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate.
- ★ **★ NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting,** directed CFTC staff to explore a fallback crypto- continues to stall. Adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some secondary outlets dated it Aug 21, likely next-d already-logged Jul 29 statement — logged as context, not used to move P.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego counter-proposal — no White House sign-off or released text found) and
- **Prediction markets, two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% and Kalshi 20-21%; a live Aug 28 Polymarket pull separately showed 14%. Consistent event, don't clear the sufficiency bar to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and traced to an **August 19, 2026** confusion artifact, named here as a caution for readers, not used as evidence.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** — primary-source confirmation relied on 7+ independent secondary outlets instead.
- **Context only, not new:** the Senate's Aug 8 stopgap funding bill (Collins-Murray deal) funds the government through Dec 11, 2026 — modestly reduces shutdown-fight risk to September floor
- **Score decision: held flat at 32/47/58/82/92 across all five windows.** Nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction - this is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. The active score set is **2026-08-22_draft2** (32/47/58/82/92, stamped by Alex Aug 23, 2026).

Carried forward — what changed in the Aug 22 full weekly refresh (2026-08-22_draft2), for continuity:

- **This morning's Aug 22 catch-up draft (d1) was fully delivered** — rendered, selfchecked, archived, and git-committed — but stayed uncommitted (owner-stamp sense) after a fact-check th held the whole score set for manual review. This is a separate, later cycle: a full weekly refresh that independently re-confirms d1's findings against fresh primary sources and lands as a new draft.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date reconfirmed via 7+ outlets** (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Banking, news.b verified this cycle — no schedule change found; still a motion-to-proceed vote only, not final passage.
- ★ **★ NEW — Sen. Ruben Gallego, on the record at the Aug 19 SALT Wyoming Blockchain Symposium** (crypto.news, Cointelegraph, FXStreet, Blockonomi), confirmed the White House has proposal — responses "blank, weaker than before, or not at all" — and warned against rushing the Sept 15 vote. Confirms the deadlock persists, not new deterioration.
