Master Direction Report

Five Pillars, One Table, One Number — Updated & Re-verified September 22, 2026 (LIGHT DAILY touch, targeted single-pillar follow-up) · UPDATED DRAFT — AWAITING MY STAMP

*This is a LIGHT DAILY touch (score set **2026-09-22_draft**, draft, awaiting verification and Alex's stamp) — a targeted single-pillar follow-up, NOT a full weekly refresh, against the Sept 19 full-weekly baseline (2026-09-19_draft, itself still draft). **CLARITY Act, Iran War Risk, and Tokenization RWA are carried forward unchanged** — not re-researched this cycle. **Fed & Macro RE-RATED DOWN one point on the three near windows** (32/30/38/44/58 → 31/29/37/44/58) on two independent primary regional Federal Reserve surveys, both dated September 2026 — the Philadelphia Fed (prices paid 40.9→48.6) and the New York Fed Empire State survey (prices paid 58.1→63.1, the highest since July 2022) — both showing input-cost/selling-price pressure re-accelerating even as headline activity cooled. See the Fed & Macro pillar report for the full sourcing. **Bitcoin TA (computed) ticked** as BTC surged to \$85,992.32 from \$81,224.46.*

THE FINAL NUMBER · SEPTEMBER 22, 2026 · EQUAL-WEIGHT MODEL (UPDATED DRAFT — AWAITING MY STAMP)

−0.02

Neutral overall, essentially flat and unchanged in call band from the last full-weekly draft — −0.02, versus −0.03 on Sept 19. No call-band flip anywhere: the horizon-weighted variant holds Mild Bull at +0.51, versus +0.50 on Sept 19. Equal-weight mean of the five master window signals (scale −10 to +10). Only one qualitative pillar moved this cycle — Fed & Macro, re-rated down one point on the three near windows on two independent regional Fed surveys; CLARITY Act, Iran War Risk, and Tokenization RWA all carried forward unchanged, and Bitcoin TA (computed) ticked with a materially higher BTC price — see The Master Table and My Decision below.

COINPICKS MASTER BLEND · ALL FIVE PILLARS EQUAL-WEIGHTED · 20% EACH

Compiled September 22, 2026 (LIGHT DAILY touch, targeted single-pillar follow-up, draft, awaiting Alex's stamp) · BTC \$85,992.32 (GitHub Actions data-fetch workflow, September 22, 2026) · Engine: engine/blend.py — run.py

blend (equal-weight, 2026-09-22_draft, draft; prior draft set: 2026-09-19_draft, full weekly, itself awaiting Alex's review) · Not Financial Advice

The Master Table

The whole thesis in five rows, on the September 22 LIGHT DAILY touch (2026-09-22_draft, draft, awaiting stamp) vs. the Sept 19 FULL WEEKLY draft baseline (2026-09-19_draft, itself still awaiting Alex's review). Signals on the -10 to +10 scale.

WINDOW	MASTER (EQUAL- WT)	SEPT 19 (DRAFT)	THE CALL
1 month	-1.99	-2.01	Bear — essentially unchanged. Fed & Macro eased one point to -2.58; Bitcoin TA firmed to +0.96 from +0.72 on the week's computed re-read. CLARITY (-4.76) and Iran (-4.70) still dominate this window
3 months	-1.54	-1.63	Bear — essentially unchanged. Fed & Macro eased to -2.86; Bitcoin TA firmed to +1.12 from +0.56; every other qualitative pillar held
6 months	-0.52	-0.53	Mild Bear — essentially unchanged. Fed & Macro eased to -1.66; Bitcoin TA firmed to +1.06; Iran (-4.03) still the biggest drag, held flat
1 year	+1.14	+1.16	Mild Bull — essentially unchanged. Fed & Macro held at -0.72 (12mo window unaffected by this cycle's re-rate); Bitcoin TA firmed to +1.63. Tokenization (+3.37) and CLARITY (+3.17) remain the strongest pillars in this window
3 years	+2.82	+2.84	Bull — essentially unchanged. Every pillar still positive; Fed & Macro and CLARITY both held their 36mo readings, Bitcoin TA firmed slightly to +1.44

Formula: per pillar, Signal = ((P - 50) ÷ 50) × Quality × Impact, with Impact a uniform **8** for every pillar. **MASTER = the simple mean of all five pillar signals** — equal weight, 20% each (add a pillar and it auto-rebalances to 1/N). Bands: |s| < 0.5 Neutral · < 1.5 Mild · < 3 Bull/Bear · < 5 Strong · else Very Strong. Machine-verified two ways (hand recompute of every pillar signal and every master window, cross-checked against run.py blend's own output).

THE FINAL NUMBER — HOW IT'S BUILT, AND WHAT MOVED THIS CYCLE

-0.02 = the equal-weight mean of the five MASTER signals above ((-1.99 - 1.54 - 0.52 + 1.14 + 2.82) ÷ 5). Weighting the longer windows harder (10/15/20/30/25%) gives **+0.51**, same call band as Sept 19, Mild Bull.

What moved, and why: one pillar, targeted. This is a LIGHT DAILY touch, not a full weekly refresh — CLARITY Act, Iran War Risk, and Tokenization RWA were not re-researched this cycle and are carried forward unchanged at their Sept 19 readings. Fed & Macro re-rated down one point on the three near windows (32/30/38/44/58 → 31/29/37/44/58) on two independent primary regional Federal Reserve surveys, both dated September 2026 and neither previously scored: the Philadelphia Fed (prices paid 40.9→48.6, prices received 17.7→31.3) and the New York Fed Empire State survey (prices paid 58.1→63.1, the highest since July 2022, prices received 23.1→28.1) — both showing input-cost/selling-price pressure re-accelerating even as headline activity cooled. Two independent Fed district banks' own primary surveys, same week, same directional signal, clears this house's sufficiency bar; kept to one point because both are soft surveys whose own forward components fell, and because market pricing turned risk-on into Sept 18-19. The computed Bitcoin TA read also moved, ticking with the week's further BTC price move (\$81,224.46 → \$85,992.32). **What the number is not:** it is not a crash call, nor a breakout call, and it is not a stamped, final read — it is -0.02, essentially dead flat and barely changed from the Sept 19 read — **COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026** after a clean render/selfcheck/verification pass, per CLAUDE.md's delegated daily auto-stamp authority.

The Trend — Final Number, Cycle by Cycle

Every committed reading of THE FINAL NUMBER, in sequence — the record of how the call has actually moved, not just where it sits today. (Today's reading joins this history once archived.)

The Full Pillar Matrix

Every pillar's signal on every window — September 22 LIGHT DAILY touch (2026-09-22_draft), COMMITTED, AUTO-STAMPED. Each pillar report shows its own full score lineage.

PILLAR (WEIGHT · IMPACT)	1 MO	3 MO	6 MO	1 YR	3 YR	STATUS
CLARITY Act (20% · 8)	−4.76	−2.99	−0.68	+3.17	+6.38	Carried forward unchanged — not re-researched this cycle (targeted single-pillar touch)
Iran War Risk (20% · 8)	−4.70	−5.10	−4.03	−1.77	+1.41	Carried forward unchanged — not re-researched this cycle (targeted single-pillar touch)
Tokenization RWA (20% · 8)	+1.15	+2.11	+2.72	+3.37	+4.03	Carried forward unchanged at 58/65/70/77/86 — not re-researched this cycle (targeted single-pillar touch)
Fed & Macro (20% · 8)	−2.58	−2.86	−1.66	−0.72	+0.83	RE-RATED DOWN one point on 1mo/3mo/6mo to 31/29/37/44/58 — two independent primary regional Fed surveys (Philadelphia Fed, NY Fed Empire State) show input-cost/selling-price pressure re-accelerating
Bitcoin TA — quant (20% · 8)	+0.96	+1.12	+1.06	+1.63	+1.44	Computed, unchanged methodology: P 58/60/62/67/68, BTC \$85,992.32 (up sharply from \$81,224.46). Data check only this cycle (GitHub Actions fetch pre-committed fresh data)
MASTER — mean of the five	−1.99	−1.54	−0.52	+1.14	+2.82	equal-wt

P lineage (June → Jul 8 → ... → Sept 19 → Sept 22) — CLARITY 55/60/65/85/92 → ... → 15/28/45/72/92 (Sept 16-19, held flat) → **15/28/45/72/92** (Sept 22, carried forward unchanged). Iran War Risk 50/55/62/75/85 → ... → 1/1/14/33/66 (Sept 16-19, held flat) → **1/1/14/33/66** (Sept 22, carried forward unchanged). Tokenization 53/57/62/72/85 → ... → 58/65/70/77/86 (Sept 18-19, held flat since the SEC-exemption re-rate) → **58/65/70/77/86** (Sept 22, carried forward unchanged). Fed & Macro 38/40/46/54/61 → ... → 32/30/38/44/58 (Sept 17-19, held flat since the FOMC re-rate) → **31/29/37/44/58** (Sept 22, RE-RATED DOWN on two regional Fed surveys). Bitcoin TA is computed every run: 56/55/60/68/69 (Sept 19) → **58/60/62/67/68** (Sept 22). Each pillar report carries its own full, column-by-column lineage table.

The Story, Window by Window

What the blend is saying on September 22, 2026, a LIGHT DAILY touch, targeted single-pillar follow-up (comparisons below are vs. the Sept 19 FULL WEEKLY draft, 2026-09-19_draft, itself still awaiting Alex's review)

- **1 month — Bear (−1.99, from −2.01).** Fed & Macro eased one point to −2.58 on two regional Fed surveys' re-accelerating prices-paid readings; Bitcoin TA firmed to +0.96 from +0.72 on the week's computed re-read. CLARITY (−4.76) and Iran (−4.70), both carried forward unchanged, still dominate. The worst window this cycle, essentially unchanged in substance.
- **3 months — Bear (−1.54, from −1.63).** Essentially unchanged. Fed eased to −2.86; CLARITY (−2.99), Iran (−5.10), and Tokenization (+2.11) all carried forward unchanged; Bitcoin TA firmed to +1.12 from +0.56.
- **6 months — Mild Bear (−0.52, from −0.53).** Essentially unchanged. Fed eased to −1.66; Iran (−4.03) remains the biggest drag, carried forward unchanged; Bitcoin TA firmed to +1.06 from +0.88.

- **1 year — Mild Bull (+1.14, from +1.16).** Four of five pillars still positive: Tokenization leads at +3.37, CLARITY +3.17, Bitcoin TA +1.63, Fed −0.72 (unaffected by this cycle's re-rate, the only negative besides Iran −1.77) — CLARITY, Iran, and Tokenization all carried forward unchanged this cycle.
- **3 years — Bull (+2.82, from +2.84).** Every pillar still positive: CLARITY +6.38, Tokenization +4.03, Iran +1.41, Bitcoin TA +1.44, Fed +0.83 — a targeted single-pillar touch re-rated Fed & Macro's near windows only; the 36mo reading holds.

Where the Two Lenses Agree — and Where They Fight

The point of running qualitative and quantitative on the same standard

THE INDEPENDENT CONFIRMATION

One qualitative pillar moves on a targeted follow-up while Bitcoin TA (computed) also ticks — three of five pillars sit exactly where the still-draft Sept 19 weekly refresh left them: Fed & Macro re-rated down one point on two independent regional Fed surveys, while BTC's further move to \$85,992.32 from \$81,224.46 lifted the TA pillar's P from 56/55/60/68/69 to 58/60/62/67/68. That's the structure doing its job: a light daily touch moves only what genuinely cleared the sufficiency bar this cycle, while the pure-math read is free to reflect what price actually did.

THE REAL DISAGREEMENT

Near-term: Bitcoin TA (P 58) and Tokenization (P 58) remain the strongest near-term pillars; Fed & Macro (P 31) and Iran (P 1) sit well below, and CLARITY (P 15) remains one of the two weakest near-term reads. The master resolves it honestly: Bear at 1 month and 3 months, as two pillars still drag the same direction at once.

Long-term: the four story pillars average about +3.20 at 3 years (CLARITY +6.38, Tokenization +4.03, Fed +0.83, Iran +1.41) versus the Bitcoin-TA pillar's +1.44 — still roughly 2.2× higher. Remember why: the TA pillar is capped by construction (P never leaves 25–75) and its 3-year Quality is 0.50. Equal weight lets that gap show through honestly instead of burying it in a blend.

Trigger Watch — The Next Six Weeks, Re-Dated

A LIGHT DAILY touch, targeted single-pillar follow-up, ran today. Only Fed & Macro's own trigger fired this cycle; CLARITY Act, Iran War Risk, and Tokenization were not re-checked. These are the forward triggers; each pillar report carries the full table.

DATE / LEVEL	EVENT	RE-RATES
FIREDD Sept 22 — mildly hawkish, primary, this cycle	Two independent primary regional Federal Reserve surveys, both dated September 2026: the Philadelphia Fed (released Sept 17: prices paid 40.9→48.6, prices received 17.7→31.3) and the New York Fed Empire State survey (released Sept 15, primary, fetched directly: prices paid 58.1→63.1, the highest since July 2022, prices received 23.1→28.1) — both show headline activity cooling but input-cost/selling-price pressure re-accelerating	Fed & Macro: RE-RATED DOWN one point on 1mo/3mo/6mo to 31/29/37/44/58; 12mo/36mo held

WATCH — Tuesday, Sept 22, 2026, UN General Assembly	Trump's planned sideline meeting with six Gulf-state leaders, ahead of which he told Axios (Sept 17) he faces a "big decision" on Iran — this pillar's clearest near-term trigger, not re-checked this cycle	Iran War Risk: not yet fired — rhetoric about an undated future decision, carried forward unchanged at 1/1/14/33/66
Checked Sept 19, logged not scored (not re-checked Sept 22)	CFTC filed a prerule OIRA action Sept 17 (RIN 3038-AF80) on crypto market-structure rulemaking — an administrative fallback track, not evidence of the CLARITY Act's own passage odds	CLARITY Act: carried forward unchanged at 15/28/45/72/92
FIRE, but continuation not new escalation — Sept 17-18, corroborated via IRGC statement + The Hill (not re-checked Sept 22)	The Togo-flagged tanker "Trend" strike in the Strait of Hormuz, reversing an earlier "not fired" call but consistent with an already-active tanker campaign	Iran War Risk: carried forward unchanged at 1/1/14/33/66
Checked Sept 19, no venue live yet (not re-checked Sept 22)	Tokenization: no Tokenized Securities Venue has announced going live under the Sept 17 SEC exemption; its own 30-day issuer-notice rule makes mid-October the earliest realistic date. SIFMA/Better Markets pushback logged, not scored	Carried forward unchanged at 58/65/70/77/86
Oct 27-28, 2026	Next scheduled FOMC meeting; CME FedWatch prices 55.1% odds of another 25bp hike as of Sept 17 (market price, not scored)	Fed & Macro: the next real test of the SEP's hawkish path, now compounded by this cycle's regional-survey re-rate
Power-law fair value \$140,631	BTC \$85,992.32 sits ~39% below fair value	1yr/3yr windows: the structural bull case's core, essentially unmoved by this cycle's news

The master flip line — Iran's strikes clause fired Aug 30, escalated sharply Sept 1-2, and the Brent >\$100 clause fired Sept 10-11 and continues to hold: a confirmed new US combat death, a resumption of direct US strikes on Iran proper, independent confirmation the conflict has widened to a further new state, or a sustained Brent close above \$100. Two of the four clauses are still live. **A new, distinct nuclear-track escalation is now in view but has not itself fired a clause:** an actual NPT withdrawal enactment, or a UNSC resolution/sanctions snapback, would be a fresh downside trigger for Iran; the Sept 22 Trump-Gulf-states meeting is the nearest-term item to watch. **On CLARITY, the flip line fired on the downside Sept 16** — cloture failed cleanly with no released next-step plan; the lame-duck session is now the only realistic remaining path. A renewed floor vote that actually passes cloture would be the equivalent upside flip. **On Fed & Macro, the flip line is a durable dovish or hawkish reaction function** — a genuinely dovish Fed pivot (a cut, or explicit forward guidance toward one) would be the upside flip; the Oct 27-28 FOMC delivering the further hike its own SEP projects would confirm this cycle's cut. **On Tokenization, the flip line is unchanged from Sept 18** — a live US venue actually trading under the exemption would be the next upside confirmation; the exemption drifting unused toward its 5-year sunset, or a rescission during the comment period, would be the downside flip. The TA flip line (weekly close under \$50,000) remains unchanged and is now far from current price.

Robustness — Does Any One Pillar Drive the Call?

Equal weight is now the fixed model — there is no qual/quant mix knob to tune. The test that matters instead: drop any single pillar and see whether the conclusion holds.

— drop CLARITY Act	−0.08	Neutral
— drop Iran War Risk	+0.69	Mild Bull · yes
— drop Tokenization RWA	−0.69	Mild Bear · yes
— drop Fed & Macro	+0.33	Neutral
— drop Bitcoin TA	−0.33	Neutral
all five in (headline)	−0.02	Neutral

Leave-one-out final (drop any one pillar): −0.69 to +0.69 — SIGN STILL FLIPS (fragile), essentially unchanged from Sept 19's −0.71 to +0.67. Tokenization remains the pillar carrying the upside: drop it and the final number falls to −0.69, still the largest single-pillar swing and the only drop that changes the call band outright. Iran remains the largest single negative (drop it and the reading rises to +0.69), but it is no longer alone — CLARITY and Fed & Macro are both meaningfully negative too, which is precisely why the headline still sits just below zero. Read the fragility honestly: at −0.02 the equal-weight number is essentially dead flat and no single pillar is driving it, and this cycle's targeted one-pillar re-rate barely moved the range at all. Dropping Bitcoin TA moves the reading further (−0.33) than dropping Fed & Macro (+0.33) — the two are now nearly symmetric.

My Decision

COMMITTED — SEPTEMBER 22, 2026 (2026-09-22_draft) · LIGHT DAILY TOUCH · TARGETED SINGLE-PILLAR RE-RATE · AUTO-STAMPED

MASTER: -1.99 / -1.54 / -0.52 / +1.14 / +2.82 · THE FINAL NUMBER: -0.02 equal-weight (Neutral) / +0.51 horizon-weighted (Mild Bull) · Leave-one-out range: -0.69 to +0.69 · Score set 2026-09-22_draft, COMMITTED — AUTO-STAMPED SEPTEMBER 22, 2026 · Prior draft set: 2026-09-19_draft (FULL WEEKLY, remains a permanent draft record awaiting Alex's own review), which read -0.03 / +0.50 · BTC \$85,992.32 (GitHub Actions data-fetch workflow)

This is a LIGHT DAILY touch (2026-09-22_draft), a targeted single-pillar follow-up — NOT a full weekly refresh — against the Sept 19 full-weekly draft baseline (2026-09-19_draft, itself still awaiting Alex's review). **CLARITY Act, Iran War Risk, and Tokenization RWA are carried forward unchanged** — not re-researched this cycle. **Fed & Macro is the one pillar that moved**, re-rated down one point on the three near windows (32/30/38/44/58 → 31/29/37/44/58); the computed Bitcoin TA read also ticked with a further BTC price move (\$81,224.46 → \$85,992.32).

Why Fed & Macro cleared the bar this cycle. Two independent primary regional Federal Reserve surveys, both dated September 2026 and neither previously scored by any cycle including the Sept 19 weekly review: the Philadelphia Fed Manufacturing Business Outlook Survey (released Sept 17, primary source page confirmed at philadelphiafed.org, 5+ independent corroborating outlets) showed general activity falling to 37.8 from 47.4 while prices paid rose to 48.6 from 40.9 and prices received rose to 31.3 from 17.7; the New York Fed Empire State Manufacturing Survey (released Sept 15, PRIMARY, fetched directly from newyorkfed.org) showed general business conditions cooling to 7.6 from 20.6 while prices paid jumped to 63.1 from 58.1 — the highest since July 2022 — and prices received rose to 28.1 from 23.1. Two independent Fed district banks' own primary surveys, dated the same week, showing the same directional signal (headline activity cooling, input-cost/selling-price pressure re-accelerating to multi-month/multi-year highs) clears this house's sufficiency bar. The move is kept to one point because both are soft/sentiment surveys whose own forward-looking components (employment, future activity, general conditions) also fell, and because market pricing turned risk-on into Sept 18-19 (10-year off its 5.04% high, BTC recovered). 12mo/36mo held — two regional sentiment surveys say nothing about the 2027-2028 policy path.

Why the other three pillars are untouched. This is a targeted single-pillar touch prompted by a specific new finding on Fed & Macro, not a full four-pillar pass — CLARITY Act, Iran War Risk, and Tokenization RWA carry forward their Sept 19 readings (15/28/45/72/92, 1/1/14/33/66, and 58/65/70/77/86 respectively) unchanged. See each pillar's own report for its last full research trail, dated Sept 19.

Why the final number barely moved despite a further BTC rally. The qualitative pillars are 80% of this blend and only one moved, by a single point on three of its five windows; the quant pillar's honesty cap (P bounded at 50±25) and its blend of weekly/monthly/quarterly/analog/power-law inputs mean even a second consecutive sharp daily price move shows up as a modest tick (P 56/55/60/68/69 → 58/60/62/67/68), not a re-rate — by design, since measured TA edge is deliberately modest.

Stamp decision: COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026. Per CLAUDE.md's delegated auto-stamp authority, an ordinary light daily-type touch whose sourcing clears the sufficiency rule is auto-stamped regardless of move size or call-band sensitivity — this is not a full weekly refresh (which would categorically exclude it), research capability was fully available (WebSearch clean; WebFetch reached newyorkfed.org directly), and render/selfcheck/verification passed clean. Status: committed, stamped_by "Alex (auto-stamped)."

What to watch next, in order: (1) whether the next hard CPI/PCE/PPI print or FOMC communication confirms the two regional surveys' prices-paid re-acceleration; (2) Trump's Sept 22 UN General Assembly meeting with six Gulf-state leaders, and whether his "big decision" on Iran becomes an actual dated action; (3) whether any Tokenized Securities Venue actually announces it is live and trading under the Sept 17 exemption; (4) whether the Fed delivers the further 2026 hike its own SEP median projects at the Oct 27-28 FOMC; (5) whether the CLARITY Act's lame-duck path develops into anything scheduled.

Read as an investment posture: near windows are still Bear and the one-year window is Mild Bull, so this is not a month to chase — the number is -0.02 , essentially dead flat and barely moved by a targeted single-pillar touch. Tokenization remains the largest single swing pillar either way (see Robustness above: dropping it alone puts the reading at -0.69 , Mild Bear; dropping Iran instead gives $+0.69$) — the leave-one-out range still crosses zero, a genuinely fragile reading worth watching, and this cycle's draft status means it awaits verification and Alex's own read before it's final.

Sources

Each pillar report carries its full, freshly-checked source list. The master adds the engine and headline references for this September 22 LIGHT DAILY touch.

- **The pillars:** the sibling reports in this folder — CoinPicks_CLARITY_Act / Iran_War / Tokenization_RWA (carried forward unchanged this cycle, not re-researched) / Fed_Macro Pillar Reports (independently re-researched and re-rated this cycle, see that report's own What Changed and Sources) and the computed Bitcoin TA Quant Pillar Report.
- **The engine:** engine/blend.py → data/master_blend.json (score set 2026-09-22_draft in config/scores.json, status: draft, active_qual_set; prior draft set 2026-09-19_draft, full weekly, itself still awaiting Alex's review; full lineage back to 2026-06-19_committed; final-number window weights in config/settings.json "final_weights") · engine/mapping.py → data/pillar_scores.json (data through Sept 22, 2026).
- **September 22 light daily touch — the load-bearing facts checked this cycle:** philadelphiafed.org (primary, Philadelphia Fed Manufacturing Business Outlook Survey released Sept 17) plus MarketScreener, NAM, investinglive, Kitco, Bitget, Academic Capital (5+ corroborating outlets) · newyorkfed.org (primary, fetched directly, New York Fed Empire State Manufacturing Survey released Sept 15).
- **Carried forward from the September 19 full weekly refresh, not re-checked this cycle:** Roll Call, BGov, The Well News, Troutman Financial Services (Senate 2026 calendar) · The Block, Yahoo Finance/247WallSt, CryptoTimes, Gokhshtein (Sept 18, CFTC's Sept 17 OIRA filing, RIN 3038-AF80) · Axios, Jerusalem Post, Politico/Political Wire, Israel National News, Breitbart (Sept 17, Trump's Iran remark) · UN press releases (press.un.org), Euronews, Security Council Report (Sept 17, UNSC veto) · IRNA/GlobalSecurity.org, The Hill, Bernama, IranWire (Sept 17-18, "Trend" tanker corroboration) · SEC.gov press release 2026-90 and Commissioner Uyeda statement (primary, Sept 17), CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io (exemption mechanics) · SIFMA.org (primary, pushback statement) · U.S. Dept of Labor, Census Bureau/HUD, NAR, University of Michigan Surveys of Consumers (primary, labor/housing/sentiment data) · CNBC, CNN, NBC News, Bloomberg, The Hill (Trump-vs-Fed political-pressure story).
- **Price:** BTC/USD \$85,992.32 (Sept 22, 2026, data/btc_usd_daily.csv via the GitHub Actions data-fetch workflow) — up further from \$81,224.46 (Sept 19); cycle low \$58,526 close (June 30, 2026).
