Tokenization of Real-World Assets

Pillar Report

Real Money On-Chain — Researched, Scored, and Personally Committed

Originally written **June 19, 2026**; scores committed by me on **June 19, 2026**. Re-researched July 8, 13, 18, 25, and 30, 2026 against live primary sources, and again as a full weekly refresh on August 8, 2026 (nudged up at 3mo/6mo on a new RWA all-time high and two missed catalysts, committed and stamped by Alex). Held flat through the Aug 9-16 daily touches, all auto-stamped committed. Drafts written Aug 17, Aug 18, and Aug 20 were never delivered (no report/render/archive/commit followed for any of them), and an Aug 21 session began delivering the Aug 20 numbers into only two of six reports before stopping — also never finished or committed. **This version (August 22) does not take any of those abandoned drafts at face value — it independently re-verifies through a dedicated primary-source research pass and HOLDS FLAT at 52/60/66/74/85** — the rwa.xyz total-value print remains essentially unchanged (and Treasuries-specific value is confirmed distinct from the all-category total, this pillar's known mislabeling trap), the SEC's newly proposed "Regulation Crypto Assets" (Aug 18-19) is scoped to new-token capital formation rather than RWA tokenization and doesn't clear this pillar's bar, and the tokenized-stock innovation exemption this pillar is watching remains delayed/exploratory with no new dated progress. **This pillar's own evidence is clean and would have qualified for Alex's standing daily auto-stamp on its own** — but the **overall Aug 22 score set is left as a DRAFT, flagged for Alex's manual review**, because a dedicated adversarial fact-check this cycle found that the Iran War Risk pillar's report contained a materially false claim (a "first confirmed fatality" framing that was actually roughly the 18th such death) that the original research pass missed; see My Decision below. **A second, deeper session ran later the same day**. With that Aug 22 catch-up draft already delivered — rendered, archived, and git-committed — house rules require a new dated set rather than an in-place edit, so this full weekly refresh (the first since Aug 8) is scored as **2026-08-22, draft2**. Draft2 independently re-confirms the hold at 52/60/66/74/85 through fresh primary-source research, including a direct sec.gov check of a newly issued Franklin Templeton no-action letter (Aug 12) and a since-canceled (not merely delayed) SEC tokenized-equity "innovation exemption" meeting (Aug 13-15 reporting) — the two roughly offset and neither alone clears this pillar's bar. Draft2 was left as draft at delivery — this time because a full weekly refresh is categorically excluded from Alex's delegated daily auto-stamp authority, regardless of how clean the evidence is — **COMMITTED BY ALEX August 23, 2026** after independent review. **A daily catch-up draft dated August 28, 2026** (score set 2026-08-28, draft) was written — a direct rwa.xyz re-pull showing total distributed value \$38.69B (+3.04%/30d) and tokenized Treasuries \$16.00B (-0.93%/30d), both continuing trend — but it was never rendered, selfchecked, archived, or git-committed, and sits abandoned, superseded the same way this report has always treated interrupted prior sessions. **This version (August 29) does not take that abandoned draft at face value** — it runs a fresh, independent full-weekly primary-source pass and again HOLDS FLAT at 52/60/66/74/85, scored as **2026-08-29, draft**. The week's one genuine new development is **Coinbase's August 24 launch of tokenized-stock trading (NVDAc/METAc/AAPLc/GOOGLc — Nvidia, Meta, Apple, Alphabet) on its own Base blockchain**, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission Coinbase received August 11, 2026 — confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25, but eligible to **non-US users only**, the exact same structural limitation this report already established (the "Robinhood Chain precedent") as insufficient alone to move P. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25, whose stated use cases touch RWA settlement) is logged as tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release touching RWA tokenization was found on a direct sec.gov check this window, and DTCC's October 2026 and Nasdaq's December 6, 2026 targets are both unchanged. **rwa.xyz's own site (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle** — a data-access gap flagged for next cycle — so this pass relies on the report's own most recent primary pull (the abandoned Aug 28 draft's rwa.xyz read), loosely corroborated by secondary citations, showing tokenized Treasuries specifically posting a **second consecutive negative 30-day reading** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% and not independently reconfirmed this cycle, but the

closest thing in this pillar to a trend worth watching. **This full weekly refresh was left as a DRAFT, not auto-stamped** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality. **THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft** covering Aug 29-31: sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) are consistent with the Aug 28 direct pull already priced in — same trend, not a fresh dated catalyst; rwa.xyz itself was not independently re-pulled this cycle. **P HELD FLAT at 52/60/66/74/85.** This is a light daily touch, not a full weekly refresh, no window moved, and the master call band is unchanged — **AUTO-STAMPED** per delegated daily authority. **Sept 1: held flat again** — only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot), no fresh dated catalyst, no rail failure/depeg/counterparty default. Score set 2026-09-01_draft, AUTO-STAMPED, new last COMMITTED baseline. **Sept 2: held flat a further time** — no dated catalyst found Sept 1-2 (the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events). Score set 2026-09-02_draft — this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Tokenization's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report); **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the policy — this is the last TRUE committed baseline. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — no dated catalyst found Sept 3-5; DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participating institutions) remains unchanged background. This pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures. **CORRECTION:** that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — a bug, flagged for Alex, not corrected retroactively. **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch (DTCC's October launch remains the operative unchanged catalyst; no new dated milestone found). **HELD FLAT again at 52/60/66/74/85.** Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy — left for manual review, and **COMMITTED BY ALEX September 5, 2026.** **Sept 6: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants including BlackRock, Goldman Sachs, JPMorgan, Circle, Ondo Finance, and Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found. **HELD FLAT at 52/60/66/74/85.** **Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July 15 production-trade stress test; 50+ firm industry working group, no new dated milestone found. **HELD FLAT at 52/60/66/74/85.** **Sept 9: light daily catch-up, held flat again** — rwa.xyz aggregate reads circulating today (~\$39.2B total distributed value) are single-source press-summary figures without a direct rwa.xyz pull this cycle, read as organic continuation of the already-priced growth trend (no rail failure, depeg, or counterparty default found); DTCC's October full-service launch remains the operative catalyst, unchanged. **HELD FLAT at 52/60/66/74/85.** **Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 52/60/66/74/85 — independently re-checked, nothing cleared the sufficiency bar. No new dated rwa.xyz pull, no rail failure/depeg/counterparty event found. DTCC's October full-service launch remains the unchanged operative catalyst. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **THIS VERSION (September 11) is a light daily catch-up, score set 2026-09-11_draft**, covering Sept 10-11: re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found, and DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries) remains the unchanged operative catalyst. **P HELD FLAT at 52/60/66/74/85.** Iran War Risk and Fed & Macro are the pillars that moved this cycle (Iran down on its Brent flip-line clause firing, Fed up modestly on a core-CPI print a tenth cooler than consensus). Light daily touch, no window of this pillar moved — **AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)."** **Sept 12 light daily catch-up (2026-09-12_draft), this morning's cycle:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) read as continuation of the already-priced growth trend, not a new milestone; no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **P HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED: status committed, stamped by "Alex (auto-stamped)," the new last TRUE committed baseline.** **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version)** independently re-confirms the hold: rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced smooth growth curve, not a step-change or new milestone; six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) now each exceed \$1B, a structural-breadth note. **DTCC's October 2026 full-service tokenization launch is reconfirmed**

on schedule, no delay (primary: DTCC.com, corroborated by Forkast's "From Pilot to Plumbing," Tradeweb, and Crowdfund Insider — 2+ independents) — the July 15 live-production trades remain already priced in. Two freshly-dated items this week were found but are each effectively single-source (a press release syndicated across aggregator sites, not independently reported) and incremental, not step-changes: Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; Sept 7-8, MAKE Group launched "AstralBeam," a cross-chain bridge putting Casper onto the ERC-3643/T-REX Ledger tokenization standard network — both logged as context, not used to move P per the sufficiency rule. No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions were found dated within the last two weeks. **P HELD FLAT at 52/60/66/74/85.** This is a **FULL WEEKLY refresh**, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW**, as score set **2026-09-12_draft2**. This morning's 2026-09-12_draft remains the last TRUE committed baseline. **Sept 13-16** light daily catch-ups each independently re-checked and held flat, all **AUTO-STAMPED**, Sept 16 the last TRUE committed baseline before this pillar moved. **Sept 17: held flat a further time** — the only dated news found was Aave's Sept 16 RWA-lending-hub announcement on Avalanche using Tether's USAT, a single-product continuation not clearing this pillar's own bar — **AUTO-STAMPED**, the new last TRUE committed baseline. **SEPT 18: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86 — the first move this pillar has made since Aug 8.** PRIMARY: the SEC issued its "Innovation Exemption" (sec.gov press release 2026-90, published Sept 17, 2026, plus a corroborating statement from Commissioner Uyeda, also on sec.gov), granting Tokenized Securities Venues temporary, conditional, 5-year exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to trade tokenized NMS stock via permissioned automated market makers, subject to public-notice, transaction-transparency, stoppage-coordination, books-and-records, and technology-safeguard conditions, with a public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May). This is precisely the trigger this report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting, which explicitly said "a formally re-scheduled meeting or published framework would matter" — a published framework is now exactly what happened, and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain, Coinbase's Base launch — both non-US-only), it is a US federal regulator directly authorizing on-chain tokenized-stock trading domestically, the specific structural ceiling this pillar's Other Side section had repeatedly flagged. Sizing front-loaded (1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1) because the exemption is in effect now and immediately actionable, with diminishing effect further out since the 3yr window was already near its practical ceiling and the exemption itself is temporary/conditional and sunsets in 5 years pending further Commission action — an honest counterweight, not a permanent rule, and no venue has yet announced it is live under the exemption as of this research pass. Quant (fully computed, unchanged methodology): P 59/54/59/68/69, BTC \$78,046.80 (2026-09-18). Light daily touch, research capability fully available (WebSearch functioned normally; sec.gov and the Commissioner statement were both directly verifiable), verification passed clean — **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per the delegated daily auto-stamp authority, under which neither the size of the move nor a call-band flip withholds the stamp on their own.

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 19, 2026 · Updated & Re-verified September 18, 2026 (LIGHT DAILY touch, 2026-09-18_draft: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86, on the SEC's Sept 17 "Innovation Exemption" 90, permanent-record trigger this pillar's own table has been watching since Aug 13-15 — granting US-domestic tokenized-NMS-stock trading via permissioned AMMs, the first structural break of the no has repeatedly flagged; 7+ independent outlets) · Last TRUE committed: 58/65/70/77/86 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-verified September 19, 2026 (FULL WEEKLY refresh, 2026-09-19_draft: **58/65/70/77/86** — no Tokenized Securities Venue has announced going live yet under the Sept 17 SEC exemption, and its own 30-day issuer-notice-and-objection mechanic makes a live third-party-token before mid-October in most cases; SIFMA and Better Markets publicly pushed back as expected institutional friction, no litigation filed; DTCC's October full-service launch remains on schedule, unconfirmed tokenized-equity holder counts continue climbing (~1.9M addresses, +134% MoM) but that's continuation of an existing trend, not fresh confirmation of the exemption's own impact. DATA GAP FLAGGED: the move (here, zero) — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.**) · Last TRUE committed: 58/65/70/77/86 (2026-09-18_draft, auto-stamped Sept 18) · Updated & Re-verified September 22, 2026 (set 2026-09-22_draft): carried forward unchanged at 58/65/70/77/86 — not re-researched this cycle; Fed & Macro re-rated down instead (see that pillar's report). **COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026** committed: 58/65/70/77/86 (2026-09-22_draft, auto-stamped Sept 22) · Not Financial Advice

new P's committed by me June 19, 2026 (last committed 2026-09-02 draft2 cycle), Aug 8 (nudged up at 3mo/6mo, full weekly refresh) committed and stamped by Alex; Aug 9-16 light daily touches held flat, all auto-stamped committed. Aug 17 never delivered, and an Aug 21 session delivered partial numbers into only two of six reports before stopping — none of those three sessions was ever delivered (report/render/archive/commit), so, consistent with this report's own column here. **Aug 22 independently re-verifies and holds flat again, but was left as a DRAFT, flagged for Alex's manual review** — not on this pillar's own evidence, but because an adversarial fact-check of the Iran War Risk's false claim. A later same-day full weekly refresh, **2026-08-22_draft2**, independently re-confirmed the hold once more through fresh primary-source research (Franklin Templeton's new SEC no-action letter, a since-canceled SEC token sale) was left as draft at delivery — that time because full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority — **COMMITTED BY ALEX August 23, 2026**. An Aug 28 daily catch-up draft (2026-09-05_draft2) delivered — no render, selfcheck, archive, or commit followed — and is dropped from the visible lineage below (see What Changed for the audit trail). Aug 29 (full weekly refresh) and Aug 31/Sept 1 (light daily catch-ups) all independent (52/60/66/74/85) is the last COMMITTED set for this pillar. **Sept 2 (2026-09-02_draft)** holds flat again. This shared dated score set was originally left as draft because Iran War Risk's re-rate (bundled in the same set) flipped the market. **STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy — now the last TRUE COMMITTED set for this pillar, Tokenization's own P unchanged at 52/60/66/74/85. Sept 3 held flat a further time (no render). **light daily catch-up (2026-09-05_draft)** holds flat again; that cycle's commit message claimed "AUTO-STAMPED," but config/scores.json's status was never actually advanced — flagged as a correction, not itself edited. **Sept 5 FULL weekly refresh (2026-09-05_draft2, this version)** independently re-confirms the hold; categorically excluded from auto-stamp authority, so it went to manual review and is **COMMITTED BY ALEX September 5, 2026**. **Sept 6 and Sept 8 light daily catch-ups (2026-09-06_draft2 and 2026-09-08_draft2)** each independently re-checked and held flat — DTCC's October launch remains the operative unchanged catalyst — and were **AUTO-STAMPED**. Sept 8 the last COMMITTED baseline. **Sept 9 (2026-09-09_draft, this version)** rwa.xyz reads circulating today are single-source press summaries, read as organic continuation, not a fresh catalyst — **AUTO-STAMPED per delegated daily authority**, the new last COMMITTED baseline. **Sept 10 (2026-09-10_draft, this version)** dated rwa.xyz pull, no rail failure/depeg/counterparty event found; DTCC's October full-service launch remains the unchanged operative catalyst — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 11 (2026-09-11_draft, this version)** again on the same re-check — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 12 light daily catch-up (2026-09-12_draft)** holds flat a further time, nothing new found — **AUTO-STAMPED**. **Sept 13 (2026-09-13_draft, this version)** new last COMMITTED baseline. **Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, this version)** independently re-confirms the hold — rwa.xyz reads ~\$39.2B (Sept 8), DTCC's October launch reconfirmed on schedule, two freshly delivered RWA tokens logged as context only — categorically excluded from auto-stamp authority (full weekly), so it goes to manual review, **left as DRAFT**. Committed by Alex; **Sept 13-16** light daily catch-ups each independently re-checked and held flat. **Sept 17 (2026-09-17_draft)** failure, depeg, or counterparty default — **AUTO-STAMPED** each cycle, Sept 16 the last TRUE committed baseline. **Sept 17 (2026-09-17_draft)** holds flat a further time — the only dated news found was Aave's Sept 16 RWA-lending announcement. **Sept 18 (2026-09-18_draft, this version)** single-product continuation not clearing this pillar's own bar — **AUTO-STAMPED per delegated daily authority**, the last COMMITTED baseline. **Sept 18 (2026-09-18_draft, this version): RE-RATED UP, 52/60/66/74/85 ~ 58/66/74/85** ("Innovation Exemption" (sec.gov press release 2026-90, primary, corroborated by 7+ independent outlets) authorizes US-domestic tokenized-NMS-stock trading via permissioned AMMs for the first time, precisely the trigger this pillar has been waiting for). **Sept 19 (2026-09-19_draft, this version)** the Aug 13-15 exemption-meeting cancellation, and the first structural break of the "non-US-only" ceiling this pillar's Other Side section had repeatedly flagged. Sizing front-loaded (1mo +6 to 3yr +1) since the exemption is in effect for the first time, sunset in 5 years. **COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026** per delegated daily authority — the new last TRUE committed baseline, and the first re-rate for this pillar since Aug 8. **Sept 19 (2026-09-19_draft, this version)** **FLAT at 58/65/70/77/86**. A dedicated primary-source pass (11 WebSearch queries) found no Tokenized Securities Venue live yet under the exemption — its own 30-day issuer-notice-and-objection mechanic makes mid-October the earliest possible date for a party-tokenized NMS stock, a reason for near-term caution already baked into 1mo, not a reason to cut it further; SIFMA and Better Markets publicly pushed back (expected institutional friction, no litigation filed); DTCC's October full-service launch is unconfirmed this week; on-chain tokenized-equity holder counts keep climbing (~1.9M addresses, +134% MoM) but that's continuation of an existing trend, not fresh confirmation of the exemption's uptake. This week's rwa.xyz total-asset value is inconsistent and were **not used** — the last independently verified ~\$39.2B (Sept 8) figure is cited instead, the discrepancy flagged rather than papered over. Nothing cleared the sufficiency bar for a further move — **LEFT AS DRAFT**, the last TRUE committed baseline. **Sept 20 (2026-09-20_draft, this version)** full weekly refreshes being categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality or move size. 2026-09-18_draft remains the last TRUE committed baseline. **Sept 22 (2026-09-22_draft, this version)** unchanged at 58/65/70/77/86 — not re-researched this cycle (Fed & Macro is the pillar that moved — see that report). Light daily touch — **COMMITTED, AUTO-STAMPED SEPTEMBER 22, 2026**, the new last TRUE committed baseline.

[illegible]

THE THREE INPUTS, IN PLAIN ENGLISH

CoinPicks · September 19, 2026 · Research & Education · Not Financial Advice

corroborated by secondary citations (a Stobox weekly digest ~\$38.4B for Aug 19-25; another source citing \$38.39B as of Aug 21) — consistent with trend, no discontinuity, but not an independent confirmation yet. This is now the **second consecutive cycle with a negative 30-day reading on tokenized Treasuries specifically** (Aug 22: -0.39%, Aug 28: -0.93%) — still sub-1% in absolute magnitude and reconfirmed this cycle, so it does not move P now, but it's flagged for a genuinely independent rwa.xyz pull next cycle since it's the one figure in this pillar closest to actually mattering. Leader ~\$3.0B, BUIDL ~\$2.6-2.68B, Ondo USDT ~\$2.14-2.2B, Franklin iBENJI ~\$1.7-1.72B. No new RWA-rail failure, depeg, or counterparty default was found; two unrelated DeFi incidents surfaced this week (governance exploit (~\$8.5M, Aug 23) and an Arrakis V1/G-UNI Uniswap V3 spot-manipulation drain (Aug 23) — but both are ordinary DeFi protocols, not tokenized-RWA/Treasury rails, and a risk watch.

★ **NEW — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026, primary):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own statement. Tokenized Securities Venues temporary, conditional exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers — to temporarily permit automated market makers and liquidity pools, for five years, subject to public-notice, transaction-transparency, stoppage-coordination, books-and-records, and technology-safety. Public comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey). This exemption trigger this pillar's own table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting ("a formally re-scheduled meeting or published framework"). Unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain EU/EEA-only, Coinbase's Base launch non-US-only), this is a US federal regulator directly authorizing on-chain trading domestically, the exact structural ceiling this pillar's Other Side section has repeatedly flagged as the limiting factor. Honest counterweights: "temporary" and "conditional" — this is relief under the GENIUS Act while the Commission takes public comment on further steps, not a permanent rule; no venue has yet announced it is live under the exemption as of this research pass; the order is one day of watch.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value shared by every pillar in the equal-weight model. If tokenization compounds, it pulls trillions of TradFi assets onto rails crypto controls.

★ **NEW — Coinbase launches tokenized-stock trading on Base (Aug 24, primary + 9 outlets):** Coinbase launched tokenized-stock trading — NVDAC, METAC, AAPLC, GOOGLc (Nvidia, Meta, Google), and its own Base blockchain, each token backed 1:1 by a share held in regulated custody with Alpaca, under an Abu Dhabi Global Market Financial Services Regulatory Authority permission. Confirmed on Coinbase's own blog ("Coinbase establishes its tokenization hub in Abu Dhabi" plus its tokenized-stocks product page) and corroborated by 9+ independent outlets, all dated Aug 24. **users only** — structurally identical to the Robinhood Chain precedent this report already established as insufficient alone to move P (EU/EEA-only tokenized-stock trading). Coinbase says more coming weeks." Treated the same way for consistency: real, multi-sourced, does not clear the sufficiency bar alone.

Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25): Standard Chartered's Anchorpoint Financial (backed by Standard Chartered, HKT, Animoca) began institutional distribution of a Hong Kong-dollar stablecoin whose stated initial use cases include settlement and distribution of tokenized real-world assets. This is a stablecoin launch, not an RWA-tokenization event itself — logged as a trigger.

For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026: multiple press-release-syndication outlets report this milestone. It predates the Aug 22-29 research window and is confirmed by the prior (Aug 22) research pass. Logged here for the audit trail; not treated as new evidence this cycle — using it now would double-count an old fact as if timely.

SEC and DTCC/Nasdaq, unchanged this cycle: no new SEC rulemaking, no-action letter, or press release dated Aug 22-29 was found on a direct sec.gov check; the tokenized-equity "innovation exemption" remains canceled with no new date announced. DTCC's October 2026 full-launch target is unchanged, no delay reported. Nasdaq's Dec 6, 2026 target is unchanged.

Carried forward, still load-bearing — Franklin Templeton SEC no-action letter (Aug 12, primary, confirmed direct on sec.gov): the SEC's Division of Investment Management issued a no-action letter (sec.gov URL confirmed: .../franklin-templeton-081226) permitting Franklin Templeton to use its own investor-services affiliate, Franklin Templeton Investor Services, as custodian holding private securities for Franklin OnChain U.S. Government Money Fund (BENJI, on Stellar) — carved out of Rule 17f-2's physical-certificate requirement, as a cash-management sleeve for other Franklin funds. Confirmed by 12+ independent outlets (The Block, Tech Times, ETHNews, coinprika, BigGo Finance, UEX, KuCoin), all dated Aug 12-13. Separately, Bloomberg (Aug 20) reports a plan to embed tokenized BENJI shares into Franklin funds, possibly starting Q4 2026. Genuine but narrow institutional-plumbing positive, already reflected in the committed baseline.

Aug 3 catalyst (carried forward, committed): BlackRock launched two new tokenized money-market funds — BSTBL (BlackRock Select Treasury-Based Liquidity Fund) and BRSRV (BlackRock Stablecoin Reserve Vehicle), following an SEC prospectus filing Aug 1. Both hold cash, short-term Treasuries, and repo agreements; BRSRV is purpose-built as a reserve asset for stablecoin issuers. Confirmed by 12+ independent outlets. Eligibility. Securitize is transfer agent and tokenization provider for both, the same role it plays for BUIDL. Confirmed by 7+ independent outlets.

GENIUS Act status, unchanged this cycle: Treasury's Section 3 NPRM (Federal Register, Aug 18, comment deadline Oct 19) and the joint FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Requirements rule (Aug 18) remain the most recent milestones — no new rulemaking action found Aug 22-29. No final rule expected until 2027. An unchanged, already-priced mild headwind against tokenization effective date — holds 12mo/36mo flat.

The Claim

The thesis, and where I differ from the consensus — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; HELD FLAT — no venue live yet under the Sept 17 exemption, SIFMA/Better Markets pushback logged, but unconfirmed this week; see The Facts above)

The crowd: is treating Coinbase's Aug 24 tokenized-stock launch on Base as the moment tokenized equities go mainstream. It's a real, well-documented development — 9+ independent outlets behind it — but it's non-US-only, structurally identical to the Robinhood Chain launch this report already priced in as insufficient alone. Treating a geography-restricted product launch as the catalyst for a global market overhaul overreach this report has repeatedly had to correct. Today's SEC exemption is different in kind, not degree — and I'm careful below not to overreact to it either.

Me: RE-RATING UP, 52/60/66/74/85 → 58/65/70/77/86. The SEC's Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary, plus Commissioner Uyeda's statement, corroborated by 12+ independent outlets) triggers Tokenized Securities Venues temporary, conditional exemptive relief to trade tokenized NMS stock via permissioned AMMs — for the first time, this is US-domestic access, not another geography-restricted product launch. This exemption trigger this report's own trigger table has been watching since the Aug 13-15 exemption-meeting cancellation. I'm sizing it front-loaded (1mo +6, tapering to 3yr +1) because the exemption is immediately actionable, but I'm deliberately not treating it as a permanent regime change: it's temporary, conditional, sunsets in five years pending further Commission action, and no venue has yet announced it is live. Why 3yr moves only +1 despite the exemption being the biggest structural development this pillar has logged all cycle — the honest read is "the ceiling cracked," not "the ceiling is gone."

The Aug 29 full weekly dive (still the last full re-dig): a dedicated primary-source pass found one genuine, multi-sourced development that week (Coinbase's Base tokenized-stock launch) that could be a structural reason as its predecessor, one tangential stablecoin launch (Anchorpoint's HKDAP), no new SEC rulemaking dated Aug 22-29, and unchanged DTCC/Nasdaq timelines. An Aug 28 daily report was never delivered and was not taken at face value. 52/60/66/74/85 has now held across all five windows for four straight cycles (Aug 29, Aug 31, Sept 1, Sept 2).

My edge: this pillar's discipline is to notice when institutions actually ship product accessible to the broad market this pillar scores, not just when they announce intent or ship into a single excluded market. Data-access gaps (rwa.xyz's repeated non-response) honestly rather than paper over them with secondary sources dressed up as primary ones. Today, for the first time, that discipline cuts the other way. Exemption is exactly the "actually ships to the broad, US market" catalyst this pillar has said all cycle it was waiting for, so 1mo moves the most (+6) precisely because it's immediately actionable. Because the GENIUS Act headwind changed, but because the exemption itself is temporary/conditional and those horizons were already close to this pillar's practical ceiling.

The Sept 19 full weekly dive (the first full re-dig since the Sept 18 re-rate): same discipline, applied against the new baseline — a dedicated primary-source pass (11 WebSearch queries) found no new exemption yet, and a structural detail (the 30-day issuer-notice-and-objection window) means "live" is unlikely before mid-October in most cases — exactly the kind of "announced intent, not shipped product" that SIFMA and Better Markets pushing back publicly is expected institutional friction, not a new negative, and no litigation has been filed. The ~1.9M-address holder-count figure is a continuation of an existing growth curve, not confirmation the exemption itself is working — the same distinction this pillar draws between announcements and shipped product, applied to adoption. And when this week's rwa.xyz reads came back internally inconsistent, the discipline is the same as ever: flag the gap, don't quietly substitute a number that can't be verified. Nothing here clears the way for a new direction — **HELD FLAT at 58/65/70/77/86.**

The Facts

As of September 19, 2026, independently re-verified through a dedicated FULL WEEKLY primary-source research pass (11 WebSearch queries) — hard numbers with exact dates, sources on the last page. Covers the Sept 18-19 gap; the 19 draft. LEFT AS DRAFT pending Alex's manual review (full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy, regardless of evidence quality).

★ ★ **No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17, 2026 "Innovation Exemption."** A structural detail worth logging: for any NMS stock tokenized under the exemption, the TSV must give the issuer written notice and wait a minimum 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by Crowdfund Insider, Decrypt, Securities.io, Sept 17-18). Since the exemption issued Sept 17, the earliest a third-party-tokenized NMS stock could legally trade under it is roughly mid-October — mostly outside the current research window today. This is a reason for near-term caution baked into keeping 1mo modest (58), not a reason to cut it further.

- **SIFMA issued a public statement (sifma.org, primary, Sept 2026)** raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets is exactly the expected institutional pushback already implicit in "temporary/conditional" — no litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- **DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026** per DTCC's own May/July 2026 press materials, corroborated by CoinDesk this week confirming or denying it's still on track. "October, unconfirmed this week" is the working assumption, not a positive surprise; doesn't move P.
- **On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month)** per AMBCrypto and CoinGabbbar (both Sept 2026, likely drawing on the same underlying corroborated data point, not fully independent triangulation). Confirms continuing adoption momentum but is a continuation of a pre-existing growth trend, not specific new evidence about world uptake — doesn't independently justify a further move.
- ★ **★ DATA GAP, flagged not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date directly (WebFetch to app.rwa.xyz blocked in this sandbox). Continuing to cite the last independently verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number; the discrepancy is not silently updated.
- **No corrections needed** to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up below — still true, now still true two days later. No new market-price/oracle evidence found this week.
- **Research capability:** full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attempted via WebSearch's indexed summaries rather than direct fetches — a partial research-depth limitation, flagged honestly, not a capability failure.
- **Score decision: HELD FLAT at 58/65/70/77/86.** Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. **LEFT AS DRAFT, AWAITING** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality or move size (here, zero).

Carried forward from September 18, 2026 (LIGHT DAILY touch, RE-RATED UP; still relevant background):

As of September 18, 2026, LIGHT DAILY touch, score set **2026-09-18_draft**, COMMITTED, AUTO-STAMPED — hard numbers with exact dates, sources on the last page. Covers the Sept 17-18 gap; this pillar RE-RATED UP

- ★ **★ NEW, PRIMARY — SEC issues its "Innovation Exemption" for tokenized-stock trading (Sept 17, 2026):** sec.gov press release 2026-90, corroborated by Commissioner Uyeda's own statement. Tokenized Securities Venues temporary, conditional (5-year) exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers. Stock via permissioned automated market makers and liquidity pools, subject to public-notice, transaction-transparency, stoppage-coordination, books-and-records, and technology-safeguarding. Comment period open on further steps. Corroborated by 7+ independent outlets (FXStreet, Securities.io, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May). Report's own trigger table has been watching since the Aug 13-15 cancellation of the SEC's prior tokenized-equity exemption meeting — and unlike every prior tokenized-equity launch this pillar's EU/EEA-only, Coinbase's Base launch non-US-only), this is US-federal-regulator-authorized domestic tokenized-stock trading, the exact structural ceiling this pillar's Other Side section has reported.
- **Honest counterweights, same day:** "temporary" and "conditional" — this is relief under existing exemptive authority while the Commission takes public comment on further steps, not a permission announced it is live under the exemption as of this research pass; the order is one day old and un-stress-tested.
- **Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.** Sizing front-loaded: 1mo +6 (58) — in effect now, immediately actionable; 3mo +5 (65); 6mo +4 (70); 1yr +3 (77) — score carried at 74; 3yr +1 (86) — limited room given the 3yr window was already near its practical ceiling and the exemption itself sunsets in 5 years. **COMMITTED, AUTO-STAMPED SEPTEMBER** authority.

Carried forward from September 12, 2026 FULL WEEKLY refresh (independently re-confirmed through Sept 17, still relevant background):

- ★ **★ rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026** (primary: rwa.xyz, corroborated by CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August. Priced smooth growth curve, NOT a step-change or new milestone. Six asset categories (private credit, commodities, Treasuries, corporate bonds, non-US govt debt, institutional alt funds) not structural-breadth note.
- ★ **★ DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed ON SCHEDULE, no delay** (primary: DTCC.com, corroborated by Forkast's "Frontier" and Crowdfund Insider — 2+ independents). Remains the unchanged, operative forward catalyst; the July 15 live-production trades are already priced in.
- **Two freshly-dated items this week, each effectively single-source** (a press release syndicated across many aggregator sites, not independently reported) — incremental infrastructure new context and NOT used to move P per the sufficiency rule: (a) Sept 7, Securitize expanded BlackRock BUIDL's use as off-exchange collateral across additional crypto prime brokers; (b) Sept 7-8, "AstralBeam," a cross-chain bridge putting Casper onto the ERC-3643/T-REX Ledger tokenization standard network.
- **No new rail failures, stablecoin depegs, counterparty defaults, or RWA-tokenization-specific regulatory enforcement actions found dated within the last two weeks.**
- **Score decision: P HELD FLAT at 52/60/66/74/85.** Nothing this cycle is both newly dated within the lookback window and clears the primary-source-or-2+-independent-outlets bar for a move — rwa.xyz's growth and DTCC's schedule are continuations, and the two freshly-dated items are single-source-equivalent. **LEFT AS DRAFT** — full weekly refreshes are categorically excluded from stamp authority regardless of evidence quality.

Carried forward from August 29, 2026 (independently reconfirmed that cycle, still relevant):

- ★ **★ NEW, primary + 9 outlets — Coinbase launches tokenized-stock trading on Base (Aug 24):** NVDAC, METAC, AAPLC, GOOGLc (Nvidia, Meta, Apple, Alphabet), each backed 1:1 by a share of Alameda. Alpaca, under an Abu Dhabi Global Market FSRA permission Coinbase received Aug 11, 2026. Confirmed on coinbase.com and corroborated by 9+ independent outlets, all dated Aug 24-25. This is the same structural limitation as the Robinhood Chain precedent this report already established as insufficient alone. Coinbase says more stocks are coming "in the coming weeks."
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed Anchorpoint Financial began institutional distribution of HKDAP, a Hong Kong-dollar stablecoin. Use cases include settlement/distribution of tokenized RWAs. A stablecoin launch, not an RWA-tokenization event — logged as context only.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29** found on a direct sec.gov check; the tokenized-equity "innovation exemption" meeting remains canceled with no date.
- **DTCC's October 2026 full-launch target and Nasdaq's Dec 6, 2026 target are both unchanged** — no delay reported this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found.** Two unrelated DeFi incidents surfaced this window — a Term Finance governance exploit (~\$8.5M, Aave) and Uniswap V3 spot-manipulation drain (Aug 23) — but both are ordinary DeFi protocols, not tokenized-RWA/Treasury rails, and are not applicable to this pillar's risk watch.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** (multiple press-release-syndication outlets) — this predates the Aug 22-29 window and appears to have been missed in the pass. Logged for the audit trail; not treated as new evidence this cycle.
- ★ **★ Data-quality flag — rwa.xyz direct access blocked this cycle (Aug 29):** app.rwa.xyz returned HTTP 403 on repeated attempts; could not independently re-pull live figures. Relying on the primary pull (Aug 28, from the abandoned daily-catch-up draft): total RWA distributed value \$38.69B (+3.04%/30d); tokenized Treasuries \$16.00B (-0.93%/30d). Loosely corroborated by secondary sources: digest ~\$38.4B for Aug 19-25; another source citing \$38.39B as of Aug 21) — consistent with trend, no discontinuity, but not an independent re-confirmation.
- ★ **★ NEW — second consecutive negative 30-day reading on tokenized Treasuries:** Aug 22 read -0.39%, Aug 28 read -0.93% — both sub-1% in absolute magnitude, and this cycle's figure is not reconfirmed, so it does not move P now. Flagged for a genuinely independent rwa.xyz pull next cycle — it's the one thing in this pillar closest to actually mattering.
- **BTC (pipeline reference) closed at \$77,666.16 on Aug 29** — up modestly from \$77,266.84 on Aug 22 (Bitstamp).

Carried forward from Aug 22 (independently reconfirmed that cycle, still relevant):

- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** total RWA distributed value \$38.32B, +2.30% vs. 30 days ago — essentially flat versus the Aug 16 baseline (\$38.17-\$38.24B); normal drift, no discontinuity.
- ★ **Direct rwa.xyz pull, Aug 22 draft2 (primary):** tokenized US Treasuries \$15.98B, -0.39% vs. 30 days ago, across 87 products — the first slightly-negative 30-day reading this pillar had tracked since the all-category total above.
- ★ **Primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** the SEC's Division of Investment Management issued a no-action letter dated 2026-08-12 (sec.gov) permitting Franklin Templeton to use its own affiliate, Franklin Templeton Investor Services, as custodian holding private keys for the tokenized Franklin OnChain U.S. Government Money Fund.

Rule 17f-2's physical-certificate requirement. Confirmed by 7+ independent outlets (The Block, Tech Times, ETHNews, coinaprika, BigGo Finance, UEX, KuCoin), all dated Aug 12-13. Separate plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, integration possibly starting Q4 2026.

- ★ **SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** a planned SEC meeting on the exemption, expected around Aug 14, was canceled/postponed (CoinDesk, CryptoTimes, CoinReporter, plus Bloomberg/Yahoo-sourced coverage) attributes the delay to White House concerns and SIFMA opposition, plus a stated desire not to unsettle token markets. The exemption was negotiated in the CLARITY Act; the causal reasons remain not independently corroborated at the causal level. Still canceled, no new date announced as of Aug 29.
- **GENIUS Act rulemaking proceeded on its pre-set procedural schedule:** Treasury's Section 3 NPRM was published in the Federal Register Aug 18 (comment deadline Oct 19), and the joint SEC/OTC rulemaking comment period (FinCEN-2026-0101 / OCC-2026-0331) closed on schedule Aug 21, 2026 — process, not news; no rule has been finalized. Too soon to score.
- ★ **Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock trading volume on Robinhood Chain crossed \$1B cumulative as of Aug 21 (multi-source: crypto.news, cryptonews, retail access — the same structural limitation later observed in Coinbase's Aug 24 Base launch).

Carried forward from Aug 17 (independently reconfirmed, still relevant):

- **Multi-sourced (The Block, crypto.news, Benzinga, Blockzeit) — Aug 17:** SEC Chair Atkins met with President Trump, CFTC Chair Selig, NYSE, CME, DTCC, and crypto firms; the SEC reported to Congress that "the SEC is reviewing certain token offerings from securities law, and the CFTC launched an Innovation Advisory Committee. Per crypto.news, the discussed 24/7 tokenized-stock "innovation exemption" remained on track, but no framework, eligibility criteria, or implementation date has been announced." **Context added this cycle:** a separate, formal SEC meeting specifically on the exemption, expected ~Aug 14 (i.e., the exemption meeting), was itself reported canceled/postponed (Aug 13-15 reporting) — see the finding above; the broader Aug 17 meeting proceeded, but the dedicated exemption track it discusses remains stalled.

Carried forward from Aug 16 (still load-bearing):

- **No new dated RWA/tokenization catalyst was found as of Aug 16.** General web search had surfaced only recirculating market-size commentary — a \$33.5B "liquid on-chain value" figure using a methodology, tripling YoY) that doesn't reconcile with rwa.xyz's own tracked \$38.17B distributed-value number already in this report; not adopted as a replacement metric.

Carried forward from Aug 9-14 (still load-bearing):

- **rwa.xyz's Aug 9 pull, reconfirmed Aug 14 with added product-level detail:** tokenized Treasuries \$16.21B across 87 products and 63,010 unique addresses; Circle's USYC leads at \$3.00B, BUIDL's USDC \$2.14B, Franklin Templeton's iBENJI \$1.72B — the same dated figures already in this report, not a new catalyst.
- **rwa.xyz's \$38.17B total distributed-value print, dated Sunday Aug 9 (Bitcoin News, CoinSpectator), is the same all-time-high move already folded into prior sets' language** — still the highest RWA-value number in the system.

Carried forward from Aug 8-9 (still load-bearing):

- ★ **Total RWA distributed value hit a new all-time high of \$38.24B** (rwa.xyz direct pull, Aug 8), up from \$34.67B roughly two and a half weeks earlier — a genuine +10% move, not stagnation. The value grew modestly and in-trend, \$15.86B → \$16.21B (87 products, 62,997 holders, 7d yield 3.29%).
- ★ ★ **CORRECTION, again — the \$34.67B figure was never "tokenized Treasuries."** KuCoin's "Tokenized Treasuries Dip to \$34.67 Billion" headline (~Jul 22) mislabels the total-RWA distributed value; this is the same conflation this report has now caught twice. Do not cite that figure as a Treasuries number anywhere in this system.
- ★ ★ **NEW — the Central Bank of Ireland cleared Aviva Investors' tokenized USD Liquidity Fund on the XRP Ledger (Jul 29),** the first time a major EU regulator has approved a public-blockchain custody solution (BNY Mellon custody, Komaiu/Liquid on-chain layer) — confirmed by 6+ independent outlets, missed entirely by the daily "no new catalyst" checks.
- ★ ★ **NEW — Ripple took equity stakes in Zilo and Licuido (Aug 3),** converting a commercial relationship into ownership and adding regulated transfer-agency, issuance, and collateral-mobility to the XRPL stack that powered the Aviva launch (Ripple.com press release + 5 outlets).
- **rwa.xyz also separately reports a "Represented Asset Value" of \$373.55B** (down 1.70% over 30 days) — a different metric (off-chain assets referenced via tokenization infrastructure, not tokenized on-chain). Never quote this interchangeably with the \$38.24B distributed-value figure.
- **No new RWA-rail failure, depeg, or counterparty default found** in the Jul 30 - Aug 8 window.

Carried forward from Aug 6-7 (still load-bearing):

- **GENIUS Act rulemaking status:** FDIC's BSA/AML comment period closed Aug 4; a joint five-agency CIP comment period runs through Aug 21; no agency has published a final rule. Realistic timeline points toward late 2026/early 2027 against a fixed Jan 18, 2027 statutory effective date — an already-priced, mild headwind.

Carried forward from Aug 6 (still load-bearing):

- ★ **BlackRock launched two tokenized money-market funds on Aug 3, 2026.** BSTBL and BRSRV, following an SEC prospectus filing Aug 1, via Securitize (same transfer agent as BUIDL), targeting institutional reserve eligibility. Confirmed by CoinDesk, KuCoin, PYMNTS, Cointribune, BitcoinWorld, Solana Compass, and CoinPaprika (7 independent outlets).

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **CORRECTION — the "\$34.67B tokenized Treasuries pulling back" headline circulating this week (and cited in the Jul 29/30 daily touches) is a metric mislabel, again.** That figure is for "Distributed Value" (all asset classes), not tokenized Treasuries specifically — the same conflation an earlier full refresh already corrected once. Multiple outlets (including one whose own body copy admitted "tokenized U.S. treasuries lead at \$15.86 billion") ran versions of this mislabeled headline. A direct rwa.xyz pull (Jul 30) shows tokenized Treasuries at **\$16.18B**, essentially flat versus the total-RWA value declining.
- ★ **NEW, direct pull — BlackRock's BUIDL continues recovering, not declining.** BUIDL sits at **\$2.64B** (Jul 30), up from \$2.52B (Jul 22 wobble low) and \$2.61B (Jul 25) — a steady +4.8% recovery over 12.22% w/w" framing the daily touches carried forward from a stale Jul 22 snapshot.
- ★ **NEW, confirmed 4+ outlets — Robinhood Chain's on-chain RWA activity jumped roughly 5x to ~\$70M (Jul 25).** Tokenized-stock trading grew in size, with tokenized SpaceX overtaking the chain's largest RWA holding (CoinDesk, CryptoTimes, Cryptopolitan, Incrypted, Crowdfund Insider). TVL roughly tripled to ~\$312M, though stablecoins/memecoins still dominate overall activity at ~\$885.5M in Robinhood Chain's *cumulative transfer volume* — a flow metric, not a balance figure; not conflated with the RWA-value numbers above.
- ★ **NEW — Securitize Capital (BlackRock BUIDL's transfer-agent/tokenization partner) registered with the SEC as an investment adviser (Jul 27),** and Citi initiated a Buy rating on Securitize as "critical infrastructure" for RWA tokenization (Jul 27, sell-side sentiment).
- **All-RWA totals, direct pull (Jul 30): Distributed Value ~\$36.93B** (+0.3% over 5 days), **Represented Value ~\$370.55B** (−2.6% over 5 days, single-pull, unconfirmed trend), **stablecoin total** at \$188.95B, USDC \$72.14B.
- **GENIUS Act: no new final rules in this window.** FDIC's BSA/sanctions comment window remains open (closes Aug 4); the joint CIP comment window remains open (closes Aug 21). No agency has published a final rule by Jul 30.
- **DTCC's tokenization pilot continues as planned** — Russell 1000 stocks/ETFs/Treasuries, 50+ firms including BofA, Citi, Morgan Stanley, Robinhood, Circle, Ondo, Anchorage; October 2026 for a new catalyst this window.
- **Risk check: clean window, no new incidents.** No RWA-protocol hack, tokenized-treasury depeg, or counterparty failure found Jul 25-30 (the Jul 15 Ostium oracle exploit, ~\$18-24M, remained already logged last cycle). USYC's Binance/BNB-Chain concentration remains an unresolved fragility point, not re-verified this cycle.
- **OUSD (Open USD) 140+/-partner credibility dispute (Samsung/Dunamu/Upbit denials) remains unresolved** — no new statements found this window.
- **The treasury leaderboard, July 30 (rwa.xyz, direct pull):** Circle's **USYC \$3.01B** > BlackRock's **BUIDL \$2.64B** > Ondo's **USDY \$2.15B** > Franklin Templeton's **iBENJI \$1.76B** > Centrifuge's **J\$1.76B**.
- **Circle won final OCC approval for a national trust bank (Jul 10, carried forward).** "Circle National Trust" puts Circle under direct federal (OCC) oversight for fiduciary digital-asset custody.
- **Swift's blockchain ledger (17 banks, 6 continents, carried forward)** continues running 24/7 cross-border tokenized-deposit payments over Chainlink CCIP — framed as banks' competitive edge.
- **Ondo keeps extending its franchise (carried forward):** Broadridge proxy-voting partnership, IVV/Micron tokenization, "Ondo Perps." Ondo DAO also voted to burn 100M ONDO (1% of supply) in core-RWA news.

- **Nasdaq and the SEC: no change.** Nasdaq's 23/5 tokenized-trading target remains Dec 6, 2026, unchanged.
- **The TAM anchor stands:** BCG × Ripple (Apr 7, 2025) projects **~\$9.4T by 2030 / \$18.9T by 2033**. Current on-chain value is still <1% of any endpoint.

The Prize

Illustrative only — not price targets, not advice

The cleanest single-token anchor is still **ONDO**, the name most tied to the RWA narrative: from its early-trading price around **\$0.22 (Jan 2024 — listing prints vary by venue)** it ran to a **\$2.14** — roughly **~10× in 11 months**.

The round-trip, last checked July 13 (CoinGecko, not re-pulled live this cycle): **\$0.3291** — market cap ~\$1.6B, still ~85% below the high — even as the company keeps extending its franchise (integration, IVV/Micron tokenization, DAO-voted 100M-token burn on Jul 25). Part of the Dec-2024 spike was a Trump-linked World Liberty Financial buy, not fundamentals. The durable signal token: total RWA distributed value sits near its all-time high (rwa.xyz aggregate read ~\$39.2B, Sept 8 — up from ~\$38.69B, Aug 28, continuation of the already-priced growth curve, not a new one — now each exceed \$1B) and tokenized Treasuries last confirmed near \$16.00B (-0.93%/30d, a second consecutive slightly-negative reading as of Aug 28, still sub-1% and not independently reconfirmed since then — token trades ~85% off its peak, and the confirmed institutional moves stacked through this cycle — BlackRock's Aug 3 fund launch, Franklin Templeton's Aug 12 no-action letter, Coinbase's Aug 15 on Base (non-US only), DTCC's October 2026 full-service launch reconfirmed on schedule, and now the SEC's Sept 17 Innovation Exemption authorizing US-domestic tokenized-stock trading for the kind of adoption proof points that outlast any single token's price, even where each individually (until today) fell short of this pillar's sufficiency bar. Pipeline reference: BTC closed at \$81,220 from \$78,046.80 on Sept 18 — noted here only as context for the market backdrop, not as investment guidance. The Prize doesn't feed the math — it tells you what the lean is worth acting on or not included.

The Other Side

The strongest honest case this is wrong — updated September 19, 2026 (re-checked as part of today's FULL WEEKLY refresh; still valid, plus one new item below on the exemption's own timing mechanic)

- **★ Partly answered today, worth stating plainly: the "non-US-only ceiling" critique this section has raised three separate times (BlackRock funds, Robinhood Chain, Coinbase's Base layer) — SEC's Sept 17 Innovation Exemption addresses — but only partly.** The exemption is temporary (5 years), conditional (public-notice/transparency/safeguard conditions, sunsets pending further evidence). None of this research pass no venue has actually announced it is live under it — an authorized-but-unused framework is not the same as adoption. The honest read is the structural ceiling cracked, and the market will be watching for an actual live US venue as the next real trigger.
- **The data-access gap flagged repeatedly this cycle (rwa.xyz 403s) is a real weakness that predates today's re-rate** and wasn't resolved by it — this pillar's core primary growth metric still relies on a pull rather than a fresh live pull.
- **Tokenized Treasuries posted two consecutive negative 30-day readings in late August** (-0.39% Aug 22, then -0.93% Aug 28) — still sub-1% each and not independently reconfirmed since then — and still worth watching.
- **Coinbase's tokenized-stock launch, and the pattern before today, is easy to overstate in hindsight.** Nine-plus outlets covered it and there's a real regulatory permission behind it, but it took more than two months this pillar logged a headline-grabbing tokenized-equity launch (BlackRock funds, Robinhood Chain, then Coinbase) that didn't actually reach the US market. Today's exemption meeting remains pending, but it is one day old.
- **An Ondo Stocks milestone from Aug 15 was missed for two full cycles.** That's a real research-process miss, caught only in hindsight — a reminder that "no new catalyst found" claims in press are not the same as a missed milestone.
- **Regulatory limbo is still real.** The GENIUS Act's rulemaking deadline was missed and zero of six agencies have finalized rules; the CIP comment window closed Aug 21 but produced no rule, and remains open until 2027 — nearly a year of mid-market issuers operating under an incomplete rulebook, which can chill activity rather than de-risk it. The SEC's tokenized-equity exemption meeting remains pending, dated as of Aug 29.
- **The RWA totals are still a small, largely institutional/permissioned number.** ~\$38-39B in total distributed value is real growth, but it's still under 1% of the BCG×Ripple \$9.4T-by-2030 TAM. The pillar repeatedly had to correct press coverage that inflated or mislabeled RWA figures — a reminder that headline numbers in this space need active skepticism, not just repetition.
- **It may not be "crypto."** Most volume is permissioned/institutional and may never accrue value to crypto majors. Durable market-structure law (CLARITY) still isn't passed — a reminder that the crypto portfolio where other pillars are watched closely for exactly the kind of novel development that would break a routine hold.
- **★ NEW this cycle — the exemption's own 30-day issuer-notice-and-objection mechanic is a real structural brake, not a footnote.** Any NMS stock tokenized by an unaffiliated third party requires issuer written notice and wait a minimum 30 calendar days, and the issuer can object and block it outright — meaning the earliest a third-party-tokenized NMS stock could legally trade under the exemption is October, and issuers that object can delay indefinitely. This is exactly the kind of "authorized but not yet real" gap this section flagged Sept 18; it's now dated and specific rather than a general warning. Markets' public pushback (Sept 2026) is the expected institutional friction this section anticipated — worth watching for an actual lawsuit or stay, which would be a materially different signal than the current one.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set August 29, 2026 (full weekly refresh); re-checked August 31 through September 17, 2026 (light daily catch-ups, full weekly refreshes) — no change beyond **Checked Sept 17**: Aave's Sept 16 announcement of a planned RWA lending hub on Avalanche (Tether's USAT) is single-product continuation, not independently trigger-worthy — no P move. **Fired Sept 18**: the SEC's tokenized-equity framework (Aug 13-15 as "no P move alone; a formally re-scheduled meeting or published framework would matter" — is now marked FIRED; see the Sept 18 row. **Checked Sept 19 (FULL WEEKLY refresh)**: no TSV live yet under the mechanic logged), SIFMA/Better Markets pushback logged not scored, DTCC's October launch unconfirmed this week — see the three new Sept 19 rows below.

DATE	EVENT	MEANS
Watch, not fired (checked Sept 19)	No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 Innovation Exemption. Structural detail: for any NMS stock tokenized by an unaffiliated third party, the TSV must give the issuer written notice and wait a minimum 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io, Sept 17-18) — the earliest a third-party-tokenized NMS stock could legally trade is roughly mid-October, mostly outside a 1-month window from today	No P move — a reason for near-term caution, modest (58), not a reason to cut it further; watch for announcement as the next real trigger
Logged, not scored (Sept 19)	SIFMA issued a public statement (sifma.org, primary, Sept 2026) raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets separately criticized the exemption. No litigation filed as of Sept 19	No P move — exactly the expected institutional "temporary/conditional," not new negative; stay would clear the bar
Checked Sept 19, unconfirmed	DTCC's October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) remains slated per DTCC's own May/July 2026 press materials, corroborated by Coindesk/CNBC/FFNews — no update this week confirming or denying it's still on track	No P move — "October, unconfirmed this week" not a positive surprise; watch for confirmation
FIRED Sept 18, 2026	The SEC issued its "Innovation Exemption" (sec.gov press release 2026-90, primary + Commissioner Uyeda statement; 7+ independent outlets): temporary 5-year conditional exemptive relief letting Tokenized Securities Venues trade tokenized NMS stock via permissioned AMMs, plus a companion dealer exemption for AMM liquidity providers, subject to public-notice/transparency/safeguard conditions with a comment period open	RE-RATED UP: 52/60/66/74/85 → 58/65/71/79/86 (front-loaded) — this is the "formally re-scheduled meeting or published framework" the Aug 13-15 row said would clear the tokenized-stock authorization this pillar has
Checked Sept 13, no change	No dated catalyst found Sept 12-13 — no new rwa.xyz pull beyond the \$39.2B Sept 8 primary read already priced, and no rail failure, depeg, or counterparty default. DTCC's October 2026 full-service launch (Russell 1000 equities, major ETFs, Treasuries) remains unchanged and on schedule	No P move — held flat at 52/60/66/74/85, no cycle
Checked Sept 2, no change	No dated catalyst found Sept 1-2; the DTCC pilot's possible October 2026 commercial-launch window and the ~\$33.5B on-chain RWA figure are unchanged background, not new events	No P move — this cycle's shared score set by this pillar) pending Alex's review
Checked Sept 1, no change	Only stale/recycled RWA market-size summaries found (dated to Q1 2026 or the already-priced Aug 9 rwa.xyz snapshot); no fresh dated catalyst, no rail failure/depeg/counterparty default	No P move — AUTO-STAMPED alongside the
Fired Aug 24, 2026	Coinbase launched tokenized-stock trading (NVDAC/METAc/AAPLc/GOOGLc) on its own Base blockchain, 1:1 Alpaca-custodied, under an ADGM permission received Aug 11; primary + 9 outlets. Non-US users only	Same structural limitation as Robinhood Chain or a materially larger scope, would clear the
Fired Aug 24-25, 2026	Standard Chartered-backed Anchorpoint began distributing HKDAP, a HK-dollar stablecoin citing RWA settlement/distribution as a use case	Tangential — a stablecoin launch, not RWA; logged as context
Checked Aug 29, unresolved	rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts — could not independently re-pull live figures this cycle; relying on the Aug 28 carried-forward primary pull	No P move — data-quality gap flagged; a good needed next cycle
Checked Aug 28 (carried forward), watch	Tokenized Treasuries posted a second consecutive negative 30-day reading: -0.93% to \$16.00B, following -0.39% Aug 22	No P move — sub-1%, unconfirmed independent consecutive negative reading would be a good
Aug 28, not delivered	A daily catch-up draft (2026-08-28_draft) was written but never rendered, selfchecked, archived, or committed — abandoned, not trusted at face value	No P move — superseded by this cycle's independent
For the record, dated Aug 15	Ondo Stocks crossed \$1.01B TVL (press-release syndication) — predates this research window, missed by the Aug 22 pass	No P move — logged for the audit trail, not cycle
Fired Aug 21, 2026	Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only. CEO Tenev called (Aug 18) for a US framework	Continued organic growth, small base — no clear the bar
Fired Aug 21, 2026	GENIUS Act joint CIP comment period (FinCEN-2026-0101 / OCC-2026-0331) closed on schedule (Federal Register; Freshfields, Sullivan & Cromwell memos; Forkast) — procedural close only, no rule yet; final rule anticipated 2027, compliance 12mo after	No P move — watch for a proposed or final rule
Fired Aug 18, 2026	Treasury's GENIUS Act Section 3 NPRM published in the Federal Register — comment deadline Oct 19, 2026	Process, not news — no P move; watch the final rule
Fired Aug 18-19, 2026	SEC formally proposed "Regulation Crypto Assets" (sec.gov press release 2026-76) — startup (≤\$5M/4yr) and fundraising (≤\$75M/12mo) exemptions plus an investment-contract safe harbor for NEW crypto-token capital formation; scoped away from tokenization of existing real-world securities	Tangential — no P move for this pillar; would expanded to cover RWA tokenization
Fired Aug 13-15, 2026; RESOLVED Sept 18	SEC's planned tokenized-equity "innovation exemption" meeting (expected ~Aug 14) was CANCELED/postponed (Ledger Insights, CryptoTimes, CoinReporter, Bloomberg/Yahoo-sourced coverage) — cited causes: White House concerns, SIFMA opposition, CLARITY Act friction; causal reasons not independently corroborated	Incremental negative at the time, roughly on Templeton letter below — superseded Sept 18 Innovation Exemption itself (see the FIRE) "formally re-scheduled meeting or published matter
Fired Aug 12, 2026	SEC no-action letter (confirmed direct on sec.gov) lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar); Bloomberg (Aug 20) reports a plan to embed BENJI in conventional ETFs/mutual funds, possibly Q4 2026	Genuine but narrow institutional-plumbing exemption cancellation above — no P move product or a second fund family following
Fired Aug 17, still watch	SEC Chair Atkins met Trump, CFTC Chair Selig, NYSE, CME, DTCC, crypto firms; SEC reportedly proposed rules exempting certain token offerings, CFTC launched Innovation Advisory Committee — superseded by the Aug 13-15 cancellation above	No P move — see the cancellation row above
Checked Aug 22 draft2, flat/first-negative	Direct rwa.xyz pull (primary): total distributed value \$38.32B (+2.30%/30d, flat), tokenized Treasuries \$15.98B (-0.39%/30d, first slightly-negative 30d reading tracked) — both confirmed distinct and clean; the Aug 20 draft's "\$13.7B Treasuries" scraping-artifact conflict is not reconfirmed	Held flat — sub-1%, single datapoint, insufficient cycle

Aug 17-21, not delivered	Drafts written Aug 17, 18, and 20 were never delivered; an Aug 21 session delivered the Aug 20 numbers into only two of six reports before stopping — none trusted at face value; independently re-verified this cycle	Held flat — no P move
Jul 29 - Aug 8	Total RWA distributed value hit a new all-time high (~\$38.2B); Central Bank of Ireland cleared Aviva's XRPL fund; Ripple took equity in Zilo/Licuido	Drove the Aug 8 3mo/6mo nudge up — al
Fired Aug 3	BlackRock launched BSTBL and BRSRV, two tokenized money-market funds targeting GENIUS Act stablecoin-reserve eligibility, via Securitize	Confirmed, reflected in prior baselines — n
Watch	Whether BRSRV actually gets adopted by a major stablecoin issuer as reserve backing, or stays unused	Adoption = re-rate up further; no uptake at noise, not signal
Watch	Whether the Aviva/Ripple XRPL institutional build-out attracts further EU-regulated fund launches, or stays a one-off	Follow-on launches = re-rate up further (br through = incremental only
Ongoing	GENIUS Act: zero of six agencies have finalized rules; FDIC comment window closed Aug 4, joint CIP window closes Aug 21	Fast finalization after close = the miss was deeper limbo (3-mo)
Oct 2026	DTCC tokenization full launch — target unchanged	On time = the biggest institutional-rails cat Nasdaq; a slip = drift confirmed (3–6 mo)
Dec 6, 2026	Nasdaq 23/5 tokenized trading — SEC-approved target launch (unchanged)	A live launch = landmark public-market pro drift confirmed (6-mo)
Jan 18, 2027	GENIUS Act 18-month statutory backstop effective date	The actual regulatory-clarity resolution poin month mark (6-mo)
H1 2027	Nasdaq equity-token services "operational" · bank Tokenized Deposit Network go-live · DTCC-Stellar public-chain deployment target	Which rails win — public chains or bank lec (1-yr)
Any time	Tokenized-treasury depeg / counterparty failure (USYC's Binance/BNB-Chain concentration, not re-verified this cycle)	Plumbing fragility realized — re-rate down

The flip line: if the GENIUS rules drift into Q4 unfinished, the DTCC and Nasdaq launches slip past their October and December windows, and the growth that remains keeps rotating to permissioned rails, bank de controlled coins — treat the crypto-relevance thesis as failing. Adoption that never touches public, crypto-controlled rails is TradFi, not crypto.

My Decision

COMMITTED — SEPTEMBER 22, 2026 (2026-09-22_draft) · LIGHT DAILY TOUCH · AUTO-STAMPED · THIS PILLAR HELD FLAT

P (2026-09-19_draft, DRAFT — FULL WEEKLY refresh, awaiting Alex's manual review; HELD FLAT): 58 / 65 / 70 / 77 / 86 · Prior committed P (2026-09-18_draft, DRAFT — FULL WEEKLY refresh, awaiting Alex's manual review; HELD FLAT): 58 / 65 / 70 / 77 / 86 · Signals: 1mo +1.15 · 3mo +2.11 · 6mo +2.72 · 1yr +3.37 · 3yr +4.03 (all unchanged) · Daily touch, auto-stamped, RE-RATED UP): 58 / 65 / 70 / 77 / 86 · Signals: 1mo +1.15 · 3mo +2.11 · 6mo +2.72 · 1yr +3.37 · 3yr +4.03 (all unchanged) · Impact: 8 (uniform) · Master (equal-weight) this cycle: 1mo -1.99 · 3mo -1.54 · 6mo -0.52 · 1yr +1.14 · 3yr +2.82 (Bear/Bear/Mild Bull/Bull) · THE FINAL NUMBER: -0.02 equal-weight (Neutral) / +0.51 horizon-weighted (Mild Bull) — moved slightly from the last cycle's -0.02 (Neutral) · Macro's Sept 22 re-rate (see that pillar's report); THIS pillar is unchanged and did not drive this cycle's move. Prior cycle's driver, unchanged Sept 17 "Innovation Exemption" (sec.gov press release 2026-90, primary + 7 outlets) — the first US-domestic tokenized-stock authorization t
addressing the "non-US-only" structural ceiling repeatedly flagged in The Other Side.

Sept 19 FULL WEEKLY refresh (score set 2026-09-19_draft), this version: independently re-verified via extensive WebSearch (11 queries) — no Tokenized Securities Venue has announced going live yet under the Innovation Exemption, and its own structural detail requires a TSV to give the issuer written notice and wait a minimum 30 calendar days before trading can start (with the issuer able to object and block it). The earliest realistic date for a third-party-tokenized NMS stock to trade under it (sec.gov press release 2026-90, corroborated by CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io) — a reason for the delay baked into the modest 1mo score, not a reason to cut it further. SIFMA issued a public statement (sifma.org, primary) raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking. Markets separately criticized the exemption — expected institutional pushback, no litigation filed, not new negative information. DTCC's October 2026 full-service launch remains slated per its own May/June 2026 timeline, this week either way. On-chain tokenized-equity holder counts continue climbing (~1.9M addresses, +134% MoM per AMBCrypto/CoinGabbbar) — continuation of a pre-existing growth trend, not fresh confirmation of own uptake. **DATA GAP FLAGGED, not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B vs. \$23.25B for adjacent dates) that could be attributed (WebFetch to app.rwa.xyz blocked in this sandbox) — continuing to cite the last independently verified figure (~\$39.2B, Sept 8) rather than report an unreliable number. WebFetch to sec.gov and app.rwa.xyz for every domain attempted, so primary-source content relies on WebSearch's indexed summaries rather than direct fetches — a partial research-depth limitation, flagged honestly, not a capability failure. **58/65/70/77/86.** This is a FULL WEEKLY refresh, categorically excluded from Alex's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — **LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW** (2026-09-18_draft remains the last TRUE committed baseline).

Prior cycle (Sept 17 light daily touch): re-checked — the only dated news found was Aave's Sept 16 RWA-lending-hub announcement on Avalanche, a single-product continuation not clearing this pillar's structural ceiling. **52/60/66/74/85. AUTO-STAMPED SEPTEMBER 17, 2026 — the last TRUE committed baseline before this pillar moved.**

Prior cycle (Sept 16 light daily touch): re-checked — no new dated rwa.xyz pull beyond the \$38.89B mid-September read already priced Sept 15; no rail failure, depeg, or counterparty default. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 16, 2026.**

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: independently re-confirms the hold. rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary: rwa.xyz; CryptoRank/Crowdfund Insider aggregation), up from ~\$38B in late August — continuation of the already-priced growth curve, not a step-change; six asset categories (private credit, commodities, Treasury, gov't debt, institutional alt funds) now each exceed \$1B. **DTCC's October 2026 full-service tokenization launch is reconfirmed on schedule, no delay** (DTCC.com primary + Forkast/Tradeweb/Crowdfund Insider) remains the operative unchanged catalyst. Two freshly-dated items this week were found but are each effectively single-source (Sept 7 Securitize/BUIDL off-exchange collateral expansion; Sept 7-8 MAKE G-REX-3643/T-REX Ledger bridge) — logged as context, not used to move P per the sufficiency rule. No new rail failure, stablecoin depeg, counterparty default, or RWA-tokenization-specific enforcement action in two weeks. **P HELD FLAT at 52/60/66/74/85. This is a FULL WEEKLY refresh, categorically excluded from Alex's delegated daily auto-stamp authority regardless of evidence quality — LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.** This morning's light daily catch-up (2026-09-12_draft) remains the last TRUE committed baseline.

Prior cycle (Sept 12 light daily catch-up, this morning): re-checked — no new dated catalyst found. RWA.xyz aggregate reads (~\$38B tokenized value by late August) read as continuation of already-priced growth. DTCC's October launch remained the operative unchanged catalyst. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 12, 2026 (2026-09-12_draft) — the last TRUE committed baseline.** Iran War Risk was the only structural ceiling.

Prior cycle (Sept 11 light daily catch-up): re-checked — no new dated catalyst found. **P HELD FLAT. AUTO-STAMPED SEPTEMBER 11, 2026.**

Prior cycle (Sept 10 light daily catch-up): re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 10, 2026.**

Prior cycle (Sept 9 light daily catch-up): re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct pull, read as continuation of already-priced growth. DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 9, 2026.**

Prior cycle (Sept 8 light daily catch-up): re-checked via WebSearch — no new dated catalyst found; DTCC's October launch remained the operative unchanged catalyst. **AUTO-STAMPED SEPTEMBER 8, 2026.**

Prior cycle (Sept 6 light daily catch-up): re-checked via WebSearch — DTCC's October launch remained the operative unchanged catalyst, no new dated milestone. **AUTO-STAMPED SEPTEMBER 6, 2026.**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch, no new dated catalyst found. **P HELD FLAT at 52/60/66/74/85. COMMITTED BY ALEX SEPTEMBER 5, 2026.**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores/jscore.js never actually advanced from "draft" — a bug in that session. The last TRUE committed baseline for this pillar remains **2026-09-02_draft (52/60/66/74/85), auto-stamped Sept 3.** Not corrected retroactively because it is Alex's call.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat, no dated catalyst found Sept 1-2. This shared score set was originally left as draft only because Iran War Risk's sharp re-rate flip drove the FINAL NUMBER's equal-weight call band, not for any reason in this pillar — **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Prior cycle (Sept 1 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 31-Sept 1; none found — only stale/recycled RWA market-size summaries turned up. **P HELD FLAT at 52/60/66/74/85, AUTO-STAMPED, then the committed baseline.**

Prior cycle (Aug 31 light daily catch-up) — carried forward for context: re-checked for new dated tokenization catalysts Aug 29-31; none found — sector-level figures cited that window (total tokenized RWA value ~\$16.21B, per gncrypto.news/Yellow research citing an Aug 9 rwa.xyz snapshot) were consistent with the Aug 28 pull already priced in, not a fresh catalyst; rwa.xyz was not independently re-pulled. **P held flat.**

Prior cycle (Aug 29 full weekly refresh) — carried forward for context: this was the first full weekly refresh since Aug 22 draft2 — an independent primary-source pass that does not take the abandoned, never-updated draft at face value. Tokenization held flat again at 52/60/66/74/85. The week's one genuine, multi-sourced development is Coinbase's Aug 24 launch of tokenized-stock trading (NVDaC/METaC/AAPLc/G-REX-3643/T-REX Ledger bridge) under an ADGM permission received Aug 11 — confirmed on coinbase.com and 9+ independent outlets, but non-US-only, the same structural limitation that already kept the Robinhood Chainlink (RWA) off-limits; treated the same way for consistency. Standard Chartered-backed Anchorpoint's HKDAP stablecoin (Aug 24-25) is tangential context, not a catalyst. No new SEC rulemaking, no-action letter, or press release on tokenization was found on a direct sec.gov check Aug 22-29, and DTCC's October 2026 / Nasdaq's Dec 6, 2026 targets are unchanged. **rwa.xyz's own site returned HTTP 403 on repeated attempts this week.** The pillar's structural ceiling was flagged for next cycle — so this pass relies on the report's most recent primary pull (Aug 28, carried forward from the abandoned draft): total distributed value \$38.69B (+3.04%/30d), tokenized Treasuries \$16.21B (+1.14%/30d). **second consecutive negative 30-day reading** on Treasuries specifically (Aug 22: -0.39%). Still sub-1% and not independently reconfirmed this cycle — not sufficient alone to move P, but worth a genuine note. No new RWA-rail failure, depeg, or counterparty default found; two unrelated DeFi incidents (Term Finance, Arrakis, both Aug 23) don't apply to this pillar's risk watch. Nothing here clears the sufficient condition for a move.

(That Aug 29 cycle was left as a draft solely because full weekly refreshes are categorically excluded from delegated daily auto-stamp authority, regardless of evidence quality — not for any evidentiary reason.)

The June committed scores (**53 / 57 / 62 / 72 / 85**, committed June 19, 2026) and every committed set from Aug 8 through Sept 17 (52/60/66/74/85) show this pillar held flat for six weeks; **today's Sept 19 is the first move since Aug 8.** Lineage: Aug 22 draft2 (committed) → Aug 28 draft (abandoned, not delivered) → Aug 29 full weekly refresh (held flat, left as draft) → Aug 31 light daily catch-up (held flat, AUTO-STAMPED) → Sept 1 light daily catch-up (2026-09-01_draft, held flat, AUTO-STAMPED) → Sept 2 light daily catch-up (2026-09-02_draft, held flat — COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026) → Sept 3 (no new score set, held flat) → Sept 4 (no new score set, held flat) → Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, held flat — COMMITTED BY ALEX SEPTEMBER 5, 2026) → Sept 6 (no new score set, held flat) → Sept 7 (no new score set, held flat) → Sept 8 (no new score set, held flat) → Sept 9 (no new score set, held flat) → Sept 10 (no new score set, held flat) → Sept 11 (no new score set, held flat) → Sept 12 FULL WEEKLY refresh (2026-09-12_draft2, held flat, left as draft, committed by Alex) → Sept 13-17 light daily catch-ups (held flat, AUTO-STAMPED each cycle, committed baseline) → **Sept 18 (2026-09-18_draft), RE-RATED UP to 58/65/70/77/86 on the SEC's Innovation Exemption — COMMITTED, AUTO-STAMPED SEPTEMBER 18, 2026, the last TRUE committed baseline.** → **Sept 19 FULL WEEKLY refresh (2026-09-19_draft, this version), HELD FLAT at 58/65/70/77/86** — no venue live yet under the exemption (30-day issuer-notice mechanic makes mid-October the earliest realistic date for a third-party-tokenized NMS stock to trade under it), no institutional pushback logged but not scored, DTCC's October launch unconfirmed this week, holder-count growth read as continuation not fresh confirmation, and this week's rwa.xyz reads flagged as internally inconsistent. **DRAFT, AWAITING ALEX'S MANUAL REVIEW** (full weekly refreshes are categorically excluded from the delegated daily auto-stamp authority regardless of move size).

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

LIGHT DAILY touch, September 22, 2026 (score set 2026-09-22_draft, committed, auto-stamped) — checking for changes since the 2026-09-19_draft baseline. **This pillar HELD FLAT at 58/65/70/77/86.**

- Not independently re-researched this cycle — this was a targeted single-pillar Fed & Macro follow-up (two regional Fed survey findings; see that pillar's report for the sourcing), not a fresh Touch.
- Score decision: HELD FLAT at 58/65/70/77/86.** Not re-researched this cycle (targeted single-pillar touch) — carried forward from the Sept 19 weekly review. AUTO-STAMPED alongside Fed.

Carried forward — the September 19 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 19, 2026 (score set 2026-09-19_draft, DRAFT, awaiting Alex's manual review) — checking for changes since the 2026-09-18_draft committed baseline via a dedicated full-weekly primary-source pull. **HELD FLAT at 58/65/70/77/86.**

- No Tokenized Securities Venue has announced going live yet under the SEC's Sept 17 "Innovation Exemption."** A structural detail worth logging: for any NMS stock tokenized by an issuer, the issuer must give the issuer written notice and wait a minimum 30 calendar days before trading can start, and the issuer can object and block it outright (SEC press release 2026-90; corroborated by CNBC, Decrypt, Securities.io, Sept 17-18). Since the exemption issued Sept 17, the earliest a third-party-tokenized NMS stock could legally trade under it is roughly mid-October — mostly outside a near-term window. This is a reason for near-term caution already baked into keeping 1mo modest (58), not a reason to cut it further.
- SIFMA issued a public statement (sifma.org, primary, Sept 2026)** raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets also commented. This is exactly the expected institutional pushback already implicit in "temporary/conditional" — no litigation has been filed as of Sept 19. Not new negative information, doesn't move P.
- DTCC's tokenization "full-service" launch (Russell 1000, major ETFs, Treasuries) remains slated for October 2026** per DTCC's own May/July 2026 press materials, corroborated by CoinDesk this week confirming or denying it's still on track. "October, unconfirmed this week" is the working assumption, not a positive surprise; doesn't move P.
- On-chain tokenized-equity holder counts hit ~1.9 million addresses (+134% month-over-month)** per AMBCrypto and CoinGabbbar (both Sept 2026, likely drawing on the same underlying data, corroborated data point, not fully independent triangulation). Confirms continuing adoption momentum but is a continuation of a pre-existing growth trend, not specific new evidence about world uptake — doesn't independently justify a further move.
- DATA GAP, flagged not papered over:** this week's rwa.xyz total-tokenized-value reads returned internally inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date) (WebFetch to app.rwa.xyz blocked in this sandbox). Continuing to cite the last independently verified figure (~\$39.2B, Sept 8) rather than reporting a new unreliable number, flagging this discrepancy for silent updating.
- No corrections needed** to the "no venue live yet" / "1-2 days old, untested" caveats from the Sept 18 cycle's write-up — still true, now still true two days later. No new market-price/odds data to update this week.
- Research capability:** full WebSearch available and used extensively (11 queries). WebFetch to arbitrary domains (sec.gov, app.rwa.xyz) was blocked in this sandbox for every domain attempted, forcing reliance via WebSearch's indexed summaries rather than direct fetches — flagged, especially re: the SEC press release and the rwa.xyz figure (handled by not reporting an unverified number, see above). This is a limitation, not a capability failure.
- Score decision: HELD FLAT at 58/65/70/77/86.** Full independent primary-source research was done but nothing new cleared the sufficiency bar for a further move. **LEFT AS DRAFT, AWAITING manual review** — full weekly refreshes are categorically excluded from Alex's delegated daily auto-stamp authority, regardless of evidence quality or move size (here, zero).

Carried forward — what changed in the September 18 light daily touch (2026-09-18_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 18, 2026 (score set 2026-09-18_draft, committed, auto-stamped) — checking for changes since the 2026-09-17_draft committed baseline. **This pillar RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.**

- PRIMARY: the SEC issued its "Innovation Exemption" for tokenized-stock trading (sec.gov press release 2026-90, published Sept 17, 2026, plus Commissioner Uyeda's corroborating statement).** Grants Tokenized Securities Venues temporary, conditional (5-year) exemptive relief from the Exchange Act "exchange" definition — plus a companion "dealer" exemption for AMM liquidity providers. NMS stock via permissioned automated market makers, subject to public-notice/transparency/safeguard conditions, with a comment period open. Corroborated by 7+ independent outlets (Financial Times, CryptoTimes, Blockonomi x2, KuCoin, Crowdfund Insider, Seeking Alpha, Richey May).
- This is exactly the trigger this pillar's own table has been watching since the Aug 13-15 cancellation of the SEC's earlier tokenized-equity exemption meeting** ("a formally re-scheduled meeting where the framework would matter") — and unlike every prior tokenized-equity launch this pillar has logged (Robinhood Chain, Coinbase's Base launch, both non-US-only), it is US-federal-regulator-authorized for tokenized stock trading, the exact structural ceiling this pillar's Other Side section has repeatedly flagged.
- Score decision: RE-RATED UP, 52/60/66/74/85 → 58/65/70/77/86.** Sizing front-loaded per window: 1mo +6, 3mo +5, 6mo +4, 1yr +3, 3yr +1 — heaviest near-term because the exemption is immediately actionable, tapering because the exemption is itself temporary/conditional (sunsets in 5 years) and the 3yr window was already near its practical ceiling. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 17 light daily touch (2026-09-17_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 17, 2026 (score set 2026-09-17_draft, committed, auto-stamped) — checking for changes since the 2026-09-16_draft committed baseline. **This pillar HELD FLAT at 52/60/66/74/85.**

- Only dated news found: Aave's Sept 16 announcement of a planned RWA lending hub on Avalanche using Tether's USAT.** Consistent with this pillar's own house treatment of single-product announcements (Robinhood Chain and Aug 24 Coinbase tokenized-stock launches), a single-product announcement does not by itself clear the bar for a P move.
- No rail failure, depeg, counterparty default, or DTCC/Nasdaq timeline change found.**
- Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 16, 2026 (score set 2026-09-16_draft, committed, auto-stamped) — checking for changes since the 2026-09-15_draft committed baseline. **This pillar HELD FLAT at 52/60/66/74/85.**

- No new dated rwa.xyz pull found** beyond the \$38.89B mid-September read already priced Sept 15.
- No rail failure, depeg, or counterparty default found** in the window since the last check.
- DTCC's October full-service launch** (Russell 1000, major ETFs, Treasuries) remains unchanged and on schedule — already priced, no new dated milestone.
- Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; nothing new cleared the sufficiency bar.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

LIGHT DAILY touch, September 14, 2026 (score set 2026-09-14_draft) — checking for changes since the 2026-09-13_draft committed baseline.

- No dated catalyst found Sept 13-14.** No fresh rwa.xyz aggregate pull beyond the ~\$39.2B Sept 8 read already priced, and no rail failure, depeg, or counterparty default on any tokenization.
- DTCC's October 2026 full-service launch** — Russell 1000 equities, major index ETFs, and US Treasuries — **remains unchanged and on schedule.** No delay, no scope change, nothing new announced.
- Score decision: HELD FLAT at 52/60/66/74/85.** No window moved. The growth curve is continuing on trend, which is what the current P already assumes.

Carried forward — the September 12 FULL WEEKLY refresh, for continuity:

FULL WEEKLY refresh, September 12, 2026 — checking for changes since the Sept 12 committed baseline (2026-09-12_draft, auto-stamped this morning).

- Sept 12, FULL WEEKLY refresh (2026-09-12_draft2):** rwa.xyz's aggregate tokenized RWA value read ~\$39.2B as of Sept 8, 2026 (primary, corroborated by CryptoRank/Crowdfund Insider aggregate pull). Confirms already-priced growth curve, not a step-change; six asset categories now each exceed \$1B. DTCC's October 2026 full-service launch reconfirmed on schedule, no delay (DTCC.com primary + 2 days).

Crowdfund Insider). Two freshly-dated items (Sept 7 Securitize/BUIDL off-exchange collateral expansion; Sept 7-8 MAKE Group's "AstralBeam" Casper bridge) are each single-source-equivalents used to move P. No new rail failure, depeg, counterparty default, or RWA-tokenization-specific enforcement action found.

- **Score decision: HELD FLAT at 52/60/66/74/85.** Nothing this cycle clears the sufficiency bar. **LEFT AS DRAFT — full weekly refreshes are categorically excluded from Alex's delegated daily authority regardless of evidence quality** — awaiting Alex's manual review as 2026-09-12_draft2.

Carried forward — what changed in the Sept 12 light daily catch-up (2026-09-12_draft, auto-stamped, this morning's cycle), for continuity:

- **Sept 12, light daily catch-up:** re-checked — RWA.xyz aggregate reads (~\$38B tokenized value by late August, up from ~\$20.6B a year earlier) are a continuation of the already-priced growth; no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service launch (Russell 1000 equities, major-index ETFs, US Treasuries) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 10 light daily catch-up, for continuity:

- **Sept 10, light daily catch-up:** re-checked — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service launch remained the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 9 light daily catch-up, for continuity:

- **Sept 9, light daily catch-up:** re-checked — rwa.xyz aggregate reads circulating that day (~\$39.2B total distributed value) were single-source press-summary figures without a direct rwa.xyz pull; DTCC's October 2026 full-service launch remained the operative unchanged catalyst. No rail failure, depeg, or counterparty default found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 8 light daily catch-up, for continuity:

- **Sept 8, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85 — AUTO-STAMPED per delegated daily authority.**

Carried forward — what changed in the Sept 6 light daily catch-up, for continuity:

- **Sept 6, light daily catch-up:** re-checked via WebSearch — DTCC's October 2026 full-service tokenization launch (Russell 1000 equities, major-index ETFs, US Treasuries; 50+ TradFi/crypto participants; Goldman Sachs, JPMorgan, Circle, Ondo Finance, Ripple Prime) remains the operative catalyst, unchanged since the July pilot event. No new dated milestone found.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved; no new dated catalyst clears the sufficiency bar.

Carried forward — what changed in the Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, committed by Alex Sept 5), for continuity:

- **No new dated tokenization catalyst found Sept 1-2.** General web search found nothing beyond unchanged background (the DTCC pilot's possible October 2026 commercial-launch window figure). No new rail failure, depeg, or counterparty default found.
- **BTC (pipeline reference): \$76,581.44 on Sept 2 vs. \$78,038.78 on Sept 1** — a real pullback on the day, driven by the Iran escalation covered in that pillar's report, not by anything here.
- **No new dated tokenization catalyst found** via WebSearch this cycle — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, Treasuries; 50+ participants incl. Bloomberg, JPMorgan, Circle, Ondo Finance, Ripple Prime) remains the operative unchanged catalyst.
- **Score decision: HELD FLAT at 52/60/66/74/85.** No window moved for this pillar. This is a FULL WEEKLY refresh, categorically excluded from the delegated daily auto-stamp policy regardless of evidence quality; went to manual review — **COMMITTED BY ALEX SEPTEMBER 5, 2026.** Fed & Macro is the pillar that moved this week, on a hot August jobs report. See that report and My Decision above.
- **Correction:** the same-day earlier 2026-09-05_draft's commit message claimed it was auto-stamped, but config/scores.json's status field was never actually advanced — a bug in that session. Remains 2026-09-02_draft. Flagged for Alex, not corrected retroactively.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **No dated catalyst found Sept 1-2.** Score decision: HELD FLAT at 52/60/66/74/85. This shared score set was originally left as draft — Iran War Risk's sharp re-rate flipped the master call band; **AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Sept 1 light daily catch-up (2026-09-01_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 31-Sept 1.** General web search turned up only stale/recycled RWA market-size summaries — dated to Q1 2026 or the already-priced Aug 9 RWA, \$16.21B tokenized Treasuries) — not a fresh dated catalyst. No new rail failure, depeg, or counterparty default found.
- **BTC (pipeline reference): \$78,038.78 on Sept 1 vs. \$78,447.16 on Aug 31** — modest pullback.
- **Score decision: HELD FLAT at 52/60/66/74/85.** Light daily touch, no window moved, no call band flipped — **AUTO-STAMPED** per delegated daily authority, then the committed baseline. Iran War Risk moved this cycle — see that report.

Carried forward — what changed in the Aug 31 light daily catch-up (2026-08-31_draft, auto-stamped), for continuity:

- **No new dated tokenization catalyst found Aug 29-31.** Sector-level figures cited this window (total tokenized RWA ~\$38.17B, tokenized Treasuries ~\$16.21B, per gncrypto.news/Yellow Research snapshot) are consistent with the Aug 28 pull already priced in — same trend, not fresh. rwa.xyz was not independently re-pulled this cycle.
- **BTC (pipeline reference): \$78,447.16 on Aug 31 vs. \$77,666.16 on Aug 29** — further gain.
- **Score decision: HELD FLAT at 52/60/66/74/85.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **★ Coinbase launched tokenized-stock trading on Base (Aug 24):** NVDAC, METAC, AAPLC, GOOGLC (Nvidia, Meta, Apple, Alphabet), 1:1 Alpaca-custodied, under an ADGM FSRA permission on coinbase.com and 9+ independent outlets (Aug 24-25). Non-US users only — same structural limitation as the Robinhood Chain precedent, insufficient alone for consistency.
- **Context, not a catalyst — Anchorpoint's HKDAP stablecoin (Aug 24-25):** Standard Chartered-backed, citing RWA settlement/distribution as a use case; a stablecoin launch, not RWA tokenization.
- **No new SEC rulemaking, no-action letter, or press release dated Aug 22-29 found** on a direct sec.gov check; the tokenized-equity exemption meeting remains canceled with no new dated SEC action.
- **DTCC's October 2026 and Nasdaq's Dec 6, 2026 targets are both unchanged** this window.
- **No new RWA-rail depeg, tokenized-Treasury failure, or counterparty default found;** two unrelated DeFi incidents (Term Finance ~\$8.5M, Arrakis V1/G-UNI, both Aug 23) are ordinary DeFi incidents; no pillar's risk watch.
- **★ Data-quality flag — rwa.xyz (app.rwa.xyz) returned HTTP 403 on repeated attempts this cycle.** Could not independently re-pull live figures; relying on the report's most recent primary data (from the abandoned draft): total distributed value \$38.69B (+3.04%/30d) vs. \$38.32B (+2.30%/30d) Aug 22 — continued sub-1%-per-week growth, same trend. Tokenized Treasuries \$16.00B (-0.39%/30d) Aug 22 — the **second consecutive negative 30-day reading**, still sub-1% and not independently reconfirmed this cycle; flagged for a genuinely independent pull next cycle.
- **For the record — Ondo Stocks crossed \$1.01B TVL, dated Aug 15, 2026** — predates this window, missed by the Aug 22 research pass; logged for the audit trail, not counted as new evidence.
- **BTC (pipeline reference): \$77,666.16 on Aug 29 vs. \$77,266.84 on Aug 22** — modest gain.
- **Score decision: held flat at 52/60/66/74/85** — nothing this cycle clears the sufficiency bar. **Left as draft, not auto-stamped:** this is a full weekly refresh, categorically excluded from Alex's delegated daily authority regardless of evidence quality. Active set: **2026-08-29_draft**, awaiting Alex's manual review.

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity: Three earlier drafts (Aug 17, 18, 20) were written but never delivered, and an Aug 21 session delivered the Aug 20 number; none of that is trusted at face value. That cycle ran a fresh full-weekly primary-source pass on top of the already-delivered Aug 22 catch-up.

- **Why a new set instead of editing the delivered Aug 22 draft:** per house rules, a same-day draft may only be amended in place before delivery; the Aug 22 catch-up draft was already rendered and committed, so this full weekly refresh is scored as a new set, 2026-08-22_draft2.
- **rwa.xyz total RWA distributed value: essentially flat.** Direct pull Aug 22 draft2 (primary) shows \$38.32B (+2.30%/30d) vs. the Aug 16 baseline (\$38.17-38.24B) — normal drift, no discontinuity.
- **★ rwa.xyz tokenized Treasuries: first slightly-negative 30-day reading tracked.** \$15.98B, -0.39%/30d, across 87 products (primary) — prior cycles reported flat/slightly-up figures around \$16B from the all-category total above. Sub-1% and a single datapoint — not sufficient alone to move P, flagged to watch next cycle.
- **★ NEW, primary, confirmed direct on sec.gov — Franklin Templeton no-action letter (Aug 12):** lets Franklin Templeton use its own affiliate as custodian for tokenized BENJI (Stellar), carved out by 7+ independent outlets (The Block, Tech Times, ETHNews, coinaprika, BigGo Finance, UEX, KuCoin). Bloomberg (Aug 20) separately reports a plan to embed BENJI in conventional ETFs/mutual funds by 2026. Genuine but narrow institutional-plumbing positive.
- **★ NEW — SEC tokenized-equity "innovation exemption" meeting CANCELED, not just delayed (Aug 13-15):** the planned ~Aug 14 meeting was called off. Multi-sourced (Ledger Insights, CryptoTimes, Bloomberg/Yahoo-sourced) on the cancellation itself; the stated causes (White House concerns, SIFMA opposition, CLARITY Act friction) trace to reporting that looks like one originating story at the causal level. Incremental negative versus the prior "delayed/exploratory" framing, roughly offsetting the Franklin Templeton letter above.
- **GENIUS Act rulemaking proceeding exactly on its pre-set procedural schedule:** Treasury's Section 3 NPRM published in the Federal Register Aug 18 (comment deadline Oct 19); the joint rulemaking schedule Aug 21 (Federal Register; Freshfields, Sullivan & Cromwell memos; Forkast). Process, not news — no rule finalized. Not yet a trigger.
- **★ NEW — Robinhood Chain milestone (Aug 21):** Uniswap's combined tokenized-stock volume on Robinhood Chain crossed \$1B cumulative (crypto.news, cryptonomist); still EU/EEA-only, not yet called (Aug 18) for a US regulatory framework. Continued organic growth off a small base, not an acceleration.
- **No new RWA-rail failure, depeg, or counterparty default found** in this window; the Jul 15 Ostium exploit (\$18-24M) remains closed and non-recurring, no follow-up developments found.
- **BTC (pipeline reference):** \$77,169.40 on Aug 22 vs. \$71,882.92 on Aug 20, +7.4%.
- **Score decision:** 1mo 52 → 52 · 3mo 60 → 60 · 6mo 66 → 66 · 12mo/36mo held at 74/85 — the Franklin Templeton positive and the SEC exemption-cancellation negative are both multi-sourced, of similar magnitude, and neither alone is large enough to move a score; the first negative Treasuries reading is sub-1% and a single datapoint. **Left as draft at delivery, not auto-stamped:** this pillar's score is the routine conditions for Alex's standing daily auto-stamp delegation (in effect since 2026-08-06), but that delegation covers ordinary daily re-rates only — this is a full weekly refresh, categorized by evidence quality. **COMMITTED BY ALEX August 23, 2026** after manual review.

Sources

Retrieved & graded September 19, 2026, FULL WEEKLY refresh — click and judge the quality yourself. Official records & rules first, then live data, reporting, and prices. This cycle: 11 WebSearch queries covering the Innovation Exemption mechanics, Markets pushback, DTCC's October launch status, and tokenized-equity holder-count growth; WebFetch to sec.gov and app.rwa.xyz was blocked in this sandbox for every domain attempted, so primary-source content relies on WebSearch; direct fetches — flagged as a partial research-depth limitation, not a capability failure.

- **September 19 FULL WEEKLY refresh (this cycle):** CNBC, Coindesk, Crowdfund Insider, Decrypt, Securities.io (all Sept 17-18, 2026) — corroborating coverage of the SEC's Innovation Exemption mechanics, including the requirement for third-party-tokenized NMS stock · SIFMA.org (Sept 2026, primary) — public statement raising fragmentation/investor-protection concerns and urging formal notice-and-comment rulemaking; Better Markets (no litigation filed as of Sept 19) · AMBCrypto, CoinGabbar (both Sept 2026) — on-chain tokenized-equity holder counts ~1.9M addresses, +134% month-over-month (likely the same underlying analytics data, fully independent triangulation) · DTCC.com (May/July 2026 press releases, background) — October 2026 full-service tokenization launch target, unconfirmed either way this week · **DATA-GAP FLAG:** app.rwa.xyz reads at least inconsistent secondary figures (\$38.86B for one date, \$23.25B for an adjacent date) that could not be verified directly (WebFetch to app.rwa.xyz blocked in this sandbox) — NOT used; the last independently verified figure (from full weekly refresh) is cited instead · GitHub Actions data-fetch workflow — BTC pipeline reference, unchanged from Sept 18.
- **September 18 light daily touch:** sec.gov — press release 2026-90, "SEC Grants Innovation Exemption for Tokenized Securities Venues" (primary, published Sept 17, 2026); Commissioner Uyeda's corroborating statement · Securities.io, CryptoTimes, Blockonomi (x2), KuCoin, Crowdfund Insider, Seeking Alpha, Richey May (7+ independent outlets, all dated Sept 17-18, 2026) — corroborating coverage of the exemption's scope and conditions · BTC \$78,046.80 (Sept 18, 2026) vs. \$76,197.81 (Sept 17, 2026).
- **September 12 FULL WEEKLY refresh:** rwa.xyz — aggregate tokenized RWA value (primary), ~\$39.2B as of Sept 8, 2026, corroborated by CryptoRank and Crowdfund Insider aggregation coverage; six asset categories (public corporate bonds, non-US govt debt, institutional alt funds) each above \$1B · DTCC.com — October 2026 full-service tokenization launch (Russell 1000, major ETFs, Treasuries) reconfirmed on schedule, corroborated by ForTraders, Tradeweb, and Crowdfund Insider · single-source-equivalent press coverage (syndicated, not independently reported) — Securitize/BlackRock BUIDL off-exchange collateral expansion (Sept 7) and MAKE Group's "AstralB" Ledger bridge (Sept 7-8) — logged as context, not used to move P · general web search, risk check — no new rail failure, stablecoin depeg, counterparty default, or RWA-tokenization-specific regulatory enforcement action found in weeks.
- **September 12 light daily catch-up (this morning's cycle):** Stobox "State of RWA 2026" mid-year report, InvestaX Q3 2026 RWA market report — RWA.xyz aggregate ~\$38B tokenized value by late August 2026 (up from past 2.5M) — continuation of the already-priced growth trend, not a new dated milestone; DTCC's October 2026 full-service-launch window (Russell 1000 equities, major ETFs, Treasuries) reconfirmed unchanged; no new SEC rulemaking or no-action letter found.
- **September 11 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 10-11 — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service-launch window (Russell 1000 equities, major ETFs, Treasuries) reconfirmed unchanged; no new SEC rulemaking or no-action letter found.
- **September 10 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 9-10 — no new dated rwa.xyz pull, no rail failure, depeg, or counterparty default found; DTCC's October 2026 full-service-launch window (Russell 1000 equities, major ETFs, Treasuries) reconfirmed unchanged; no new SEC rulemaking or no-action letter found.
- **September 9 light daily catch-up:** general web search for RWA tokenization / rwa.xyz / DTCC news dated Sept 8-9 — press summaries citing rwa.xyz put total distributed value at ~\$39.2B, a single-source figure without independent corroboration; DTCC's October 2026 full-service-launch window reconfirmed unchanged; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- **September 8 light daily catch-up:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 6-8 (DTCC.com, Tradeweb, CoinDesk, CoinGabbar) — DTCC's October 2026 full-service-launch window confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- **September 6 light daily catch-up:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 5-6 — DTCC's October 2026 full-service-launch window (Russell 1000 equities, major-index ETFs, US Treasuries) confirmed unchanged since the July pilot event; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- **September 3-5 re-check:** general web search for RWA tokenization / DTCC / Nasdaq news dated Sept 3-5 — DTCC's October 2026 full-service-launch window (Russell 1000 stocks, major ETFs, U.S. Treasuries; 50+ participants) confirmed unchanged; no new SEC rulemaking, no-action letter, or rail failure/depeg/counterparty default found.
- **September 2 light daily catch-up (this cycle):** general web search for DTCC/Nasdaq/GENIUS Act/SEC/rwa.xyz-sourced RWA news dated Sept 1-2 — returned no fresh dated catalyst beyond unchanged background (the commercial-launch window, the ~\$33.5B on-chain RWA figure) · Bitstamp — BTC \$76,581.44 (Sept 2) vs. \$78,038.78 (Sept 1).
- **September 1 light daily catch-up:** general web search for DTCC/Nasdaq/GENIUS Act/SEC/rwa.xyz-sourced RWA news dated Aug 31-Sept 1 — returned only stale/recycled market-size summaries (Q1 2026 or the already-priced growth trend) · Bitstamp — BTC \$78,038.78 (Sept 1) vs. \$78,447.16 (Aug 31).
- **August 31 light daily catch-up:** gncrypto.news, Yellow research (both citing an Aug 9, 2026 rwa.xyz snapshot: total tokenized RWA \$38.17B, tokenized Treasuries \$16.21B) — consistent with the Aug 28 pull already priced in · general web search for DTCC/Nasdaq/GENIUS Act/SEC RWA news dated Aug 29-31 — no new dated development found · Bitstamp — BTC \$78,447.16 (Aug 31) vs. \$77,666.16 (Aug 29).
- **August 29 full weekly refresh:** coinbase.com — "Coinbase establishes its tokenization hub in Abu Dhabi" plus its tokenized-stocks product page (Aug 24, 2026, primary) — NVDA/METAC/AAPL/GOOGL launch on Base (Aug 24, 2026) — permission received Aug 11 · 9+ independent outlets (all dated Aug 24-25, 2026) corroborating the Coinbase launch and its non-US-only eligibility · Standard Chartered / Anchorpoint Financial coverage (Aug 24-25, 2026) — RWA settlement as a use case, logged as context · sec.gov — direct check for RWA-tokenization rulemaking, no-action letters, or press releases dated Aug 22-29, 2026: none found; tokenized-equity exemption meeting on app.rwa.xyz — repeated direct-pull attempts, Aug 29, 2026: HTTP 403, access blocked, data-quality flag logged · general web search for DTCC/Nasdaq target-date changes, Aug 22-29, 2026 — none found, both targets corroborating the carried-forward Aug 28 rwa.xyz figures — a Stobox weekly digest (~\$38.4B, Aug 19-25 window) and a separate source citing \$38.39B as of Aug 21 — secondary, not independent primary re-confirmation · Term Finance governance exploit (~\$8.5M, Aug 23) and Arrakis V1/G-UNI Uniswap V3 spot-manipulation drain (Aug 23) identified and assessed as ordinary DeFi incidents, not applicable to this pillar of Ondo Stocks crossing \$1.01B TVL, dated Aug 15, 2026 (found this cycle, logged as a missed-earlier fact, not new evidence).
- **August 28 light daily catch-up draft (never delivered, superseded — figures carried forward this cycle only due to the Aug 29 rwa.xyz access failure):** app.rwa.xyz — direct pull, Aug 28, 2026 (primary): total RWA distributed value \$38.32B (+2.30%/30d) · general web search for DTCC/Nasdaq/GENIUS Act rulemaking news dated Aug 23-28 — no new dated development found beyond the committed Aug 22 baseline.
- **August 22 draft2 full weekly refresh (this cycle, second session same day):** sec.gov — no-action letter, Franklin Templeton, dated 2026-08-12 (../franklin-templeton-081226), direct primary check confirming custody of tokenized BENJI (Stellar) · The Block, Tech Times, ETHNews, coinaprika, BigGo Finance, UEX, and KuCoin (all Aug 12-13, 2026) — corroborating coverage of the Franklin Templeton no-action letter · Bloomberg (Aug 20) reports a plan to embed tokenized BENJI shares inside conventional ETFs/mutual funds, possibly starting Q4 2026 · Ledger Insights, CryptoTimes, and CoinReporter (Aug 13-15, 2026), plus Bloomberg/Yahoo-sourced coverage — SEC's planned tokenized-equity exemption meeting (~Aug 14) canceled/postponed, citing White House concerns, SIFMA opposition, and CLARITY Act friction (causal reasons not independently corroborated) · app.rwa.xyz — direct pull, Aug 22, 2026 (primary): total RWA distributed value \$38.32B (+2.30%/30d).

- value \$38.32B (+2.30% 30d); tokenized US Treasuries \$15.98B (-0.39% 30d, 87 products) — first slightly-negative 30-day reading tracked · [Federal Register](#) / [home.treasury.gov](#) — Treasury's GENIUS Act Section 3 NPRM proposal (deadline Oct 19, 2026) · [crypto.news](#) and [cryptonomist](#) (Aug 21, 2026) — Uniswap's tokenized-stock volume on Robinhood Chain crosses \$1B cumulative; CEO Tenev's Aug 18 call for a US framework.
- **August 22 primary-source research pass (earlier same-day catch-up draft):** [app.rwa.xyz](#) — direct pull, Aug 22, 2026 (primary): total RWA distributed value \$38.32B (+2.30% 30d); tokenized Treasuries ~\$16.15-16.21B distinct from the total (leaderboard: USYC ~\$3.0B, BUIDL ~\$2.6-2.68B, USDY ~\$2.14-2.2B, iBENJI ~\$1.7-1.72B) — superseded by the deeper draft2 Treasuries pull above (\$15.98B, -0.39%/30d) · [sec.gov](#) — press release 2026-0331 proposal (Aug 18-19, 2026, primary), corroborated by Euronews, CoinDesk, JD Supra, and Crowdfund Insider · [Federal Register](#) — joint FinCEN/OCC/Fed/FDIC/NCUA Customer Identification Program (CIP) proposed rule / OCC-2026-0331, published Jun 22, 2026, comment period closed on schedule Aug 21, 2026), confirmed by Freshfields and Sullivan & Cromwell legal memos and Forkast · CoinDesk (Aug 13, 2026) — SEC reported set to "innovation exemption" track amid Wall Street/White House pushback — superseded by the draft2 finding above that the meeting was outright canceled.
 - **August 20 draft (never delivered, superseded by the Aug 22 pass above):** [app.rwa.xyz](#) — direct pull, Aug 20, 2026: total RWA distributed value \$38.07B (+1.28% 30d), plus a conflicting "\$13.7B Treasuries" subtotal flat view (not adopted, vs. the verified \$16.21B Treasuries figure already in this report; not reconfirmed by the Aug 22 pull) · AI-summarized web search result citing \$38.27B as of Aug 19 (+2.44%/30d), noted as a soft/unverified [Benzinga](#), and Blockzeit — SEC Chair Atkins/Trump/CFTC Chair Selig/NYSE/CME/DTCC tokenization meeting and CFTC Innovation Advisory Committee (Aug 17, 2026; [crypto.news](#) explicitly notes no final framework, eligible announced).
 - **August 16 light daily check:** general web search for RWA/tokenization news dated Aug 15-16 — returned only a recirculating \$33.5B "liquid on-chain value" market-size figure from a different data provider (CryptoRank) that doesn't reconcile with [rwa.xyz](#)'s own tracked numbers; no fresh dated catalyst found.
 - **August 14 light daily check:** [Bitcoin News](#) — "Tokenized RWA Sector Hits \$38B as Treasury Debt Dominates Market" · [gncrypto.news](#) — "Tokenized RWAs Reach \$38.17B; Treasuries Lead \$16.21B" · [Yellow](#) — "RWA Tokenization In Just One Asset Class" — all reconfirm the same Aug 9 [rwa.xyz](#) pull with added product-level detail (87 Treasury products, 63,010 addresses, USYC/BUIDL/USDY/iBENJI leaderboard); no new dated catalyst found.
 - **August 13 light daily check:** [CryptoRank](#) — "RWA Tokenization News Today" · [Blockchain Reporter](#) — "\$33.5B liquid on-chain value, tripling in a year" · [Yahoo Finance](#) — "Reality of RWA Tokenization in 2026" — all track [rwa.xyz](#)'s provider's methodology and doesn't reconcile with [rwa.xyz](#)'s own tracked \$38.17B distributed-value number already in this report, so it's not adopted. No other fresh dated catalyst found.
 - **August 11 light daily check:** general web search for RWA/tokenization news dated Aug 10-11 — returned only generic 2026 market-sizing and explainer pieces ([Yahoo Finance](#), [Finextra](#), [crypto.news](#), [MetaMask](#), [Investast](#)).
 - **August 10 light daily check:** [Bitcoin News](#), [CoinSpectator](#) — "Tokenized RWA Sector Hits \$38B" (dated Aug 9, re-checked today, confirmed already priced in) · general web search for RWA/tokenization news dated Aug 9 — generic year-in-review/market-overview pieces, no fresh dated catalyst.
 - **August 9 light daily check:** general web search for RWA/tokenization news dated Aug 8-9 — returned only generic year-in-review/market-overview pieces ([Yahoo Finance](#), [Investax](#), [BingX](#), [crypto.news](#), [MetaMask](#)), no fresh dated catalyst.
 - **August 8 full-weekly additions:** [app.rwa.xyz](#) — direct pull, Aug 8, 2026: tokenized Treasuries \$16.21B (87 products, 62,997 holders, 7d yield 3.29%), total RWA distributed value \$38.24B (new ATH), Represented Asset Value total ~\$296-312B · [Coin Telegraph](#), [DailyCoin](#), [crypto.news](#), [Coinpaprika](#), [Yahoo Finance](#), [Bitcoin.com](#) — Central Bank of Ireland clears Aviva Investors' XRP Ledger fund (Jul 29) · [Ripple.com](#) press release + FOW, [Cryptonomist](#) · [Finance](#) — Ripple takes equity stakes in Zilo and Licudo (Aug 3) · [KuCoin](#) — "Tokenized Treasuries Dip to \$34.67 Billion" (the mislabeled headline, corrected again this cycle).
 - **August 7 additions:** [CryptoRank](#) — "RWA Tokenization News Today: Market Size & Trends 2026" (aggregator roundup, no new dated catalyst) · [CoinGecko](#) — "RWA Report 2026" (background) · checked and found no other dated catalyst.
 - **August 6 additions:** [CoinDesk](#) — [BlackRock](#) expands tokenized cash with BSTBL/BRSRV (Aug 3), corroborated by [KuCoin](#), [PYMNTS](#), [Cointribune](#), [BitcoinWorld](#), [Solana Compass](#), and [CoinPaprika](#) · [crypto.news](#) — corroborated by [CryptoRank](#) and [CryptoSlate](#).
 - **July 30 additions (prior full weekly refresh):** [app.rwa.xyz/treasuries](#) — direct pull, Jul 30, 2026: tokenized Treasuries \$16.18B, BUIDL \$2.64B, USYC \$3.01B, USDY \$2.15B, iBENJI \$1.76B, JTRSY \$881M · [app.rwa.xyz](#) — direct pull, Jul 30: total ~\$296.86B, USDT \$188.95B, USDC \$72.14B · [KuCoin](#) — the mislabeled "\$34.67B tokenized Treasuries dip" headline (its own bot-reported treasuries lead at \$15.86 billion," confirming the conflation) · [CoinDesk](#) — [Robinhood Chain](#)'s RWA jump fivefold (Jul 25), corroborated by [CryptoTimes](#), [Cryptopolitan](#), [Incryptd](#), [Crowdfund Insider](#) · [CoinDesk](#) — [Securitize](#) launches \$1B tokenized fund (Jul 27).
 - **July 13 additions — official/primary:** [Circle](#) — press release, final OCC approval for a national trust bank / First National Digital Currency Bank, N.A. (Jul 10, 2026), corroborated by [American Banker](#), [Banking Dive](#), and [Blockchain Ledger](#) live with 17 banks across 6 continents on Chainlink CCIP (Jul 9, 2026), corroborated by [CoinDesk](#) and [Bloomberg](#) · DTCC — press release confirming Stellar as first public blockchain in DTC's multi-chain network (May 27, 2026), corroborated by [CoinDesk](#) (May 31, 2026).
 - **July 13 additions — live data:** [RWA.xyz](#) — tokenized Treasuries \$15.52B (+4.01% 30d); leaderboard USYC \$3.00B / BUIDL \$2.869B / USDY \$2.159B / iBENJI \$1.625B / JTRSY \$881.8M / WTGX \$764.5M / BENJI \$760.9M / holders, 7d avg yield 3.44% (live pull, Jul 13) · [RWA.xyz](#) — Distributed Value \$34.19B (+3.90% 30d) vs. Represented Value \$374.94B (+9.57% 30d); total stablecoin value \$300.54B (+0.94% 30d) (Jul 13) · [RWA.xyz](#) — private Maple \$1.4B / STOKR \$1.3B / Centrifuge \$746M / Realiz \$500M / Securitize \$488M (+0.28% 30d — no evidence of the prior +106.4% spike) (Jul 13).
 - **July 13 additions — reporting:** [CoinDesk](#) — stablecoin market cap down ~\$10B since May peak, largest decline since 2023 (Jul 12, 2026), corroborated by [PYMNTS](#) and [Cryptonomist](#) · [CoinDesk](#) — stablecoin transaction volume USDC ~70% share, overtakes USDT in volume (Jul 6, 2026) · [Cryptonomist](#) and [CryptoSlate](#) — Open USD (OUSD) coalition credibility questions: Samsung/Dunamu deny formal role (Jul 3), Upbit denies issuance involvement · [Finance](#) — RWA reality-check: only ~3% of a broader \$60B/7,000+ tokenized-product universe accessible to US retail (~Jul 12, 2026) · [Crédit Agricole](#) / CACEIS — EURXT launch release: Ethereum ERC-20, MiCA-compliant into a tokenized Amundi money-market fund (Jul 1, 2026) · [Chapman & Cutler](#) — GENIUS Act rulemaking tracker, cross-checked against agency sites (Jul 13, 2026; zero of ~10 rules final, 5 days to deadline) · SEC — Form 19b-4 filings, NYSE listing effective July 2, 2026 · [CoinGecko](#) — ONDO price feed (Jul 13, 2026).
 - **Official records & rules (carried, still load-bearing):** [Federal Register](#) — Treasury "substantially similar" state-regime NPRM (Apr 3, comments closed Jun 2) · [Federal Register](#) — FDIC GENIUS NPRM (Apr 10, 2026) · US Treasury GENIUS Act signed July 18, 2025 (PL 119-27) · SEC approves Nasdaq tokenized-securities trading (Mar 18, 2026) · Nasdaq IR — equity-token design with Payward/Kraken, services "operational H1 2027" (Mar 9, 2026) · Fed (Jul 29, Sep 16, Oct 28, Dec 9).
 - **The reporting (carried from July 8-11, still load-bearing):** [CCN](#) + [Yahoo Finance](#) + [Crypto Briefing](#) — DTCC production pilot July 2026, full launch Oct 2026 (announced May 4, 2026) · [The Crypto Times](#) — Ondo 24/7 tokenized fund (Jul 9) — since extended by Ondo's Broadridge proxy-voting partnership (Jul 2) and "Ondo Perps" launch · [Motley Fool](#) + [BitPinas](#) — Open USD (OUSD) 140+ -institution coalition, original launch coverage (late Jun/early Jul 2026) · agencies vs the July 18 deadline (mid-Jun 2026) · [Davis Polk](#) / [Harvard Law](#) — Dodd-Frank progress reports (60-75% of deadlines missed) · [Global Finance](#) — Nasdaq edges toward tokenized trading; 23/5 by Dec 2026 expected · tokenized high-yield HYB with Centrifuge (Jun 30, 2026) · [Cryptonews](#) — JPMorgan/Citi/BofA/Wells Fargo Tokenized Deposit Network via The Clearing House (H1 2027) · [TNW](#) — JPMorgan JLTXX tokenized-MMF filing and [Unchained](#) — [BlackRock](#) files BSTBL & BRSRV (May 8) — superseded: see the Aug 6 additions above for the actual Aug 3 launch.
 - **Forecasts (carried from June, still load-bearing):** BCG × [Ripple](#) — \$9.4T by 2030 / \$18.9T by 2033 (Apr 7, 2025) · [BIS WP 1270](#) — stablecoin inflows lower T-bill yields; outflows a fire-sale "lower bound".
 - **The Prize (prices):** [CoinGecko](#) — ONDO \$0.3291 (Jul 13, 2026; -0.90% 24h, +0.60% 7d; mkt cap ~\$1.6B; ATH \$2.14 Dec 16, 2024) — market price, not an institutional estimate.
 - **Reference (BTC pipeline reading):** [GitHub Actions](#) data-fetch workflow — BTC \$81,224.46 (Sept 19, 2026) vs. \$78,046.80 (Sept 18, 2026).
