The Fed & Macro Regime Pillar Report

Liquidity as the Master Driver — Researched, Scored, and Re-Rated

Originally written and scores committed by me on June 12, 2026. Fully re-researched July 8, 13, 18, 25, and 30, 2026, and again as a full weekly refresh on August 8, 2026 (re-rated up to a moderated 40/38/47/55/62 on the BLS July jobs report, committed and stamped by Alex). Re-rated up again August 13 to 43/41/48/56/62 on a cool CPI print and a weak claims print; held flat August 14, 16, and through two Aug 22 cycles (a catch-up draft, then the full weekly refresh) — committed and stamped by Alex August 23, 2026, the last true baseline. A same-day catch-up draft written August 28 (score set `2026-08-28_draft`) re-rated down to 38/37/46/55/61 on Fed Chair Warsh's hawkish Jackson Hole speech and a hot July PCE print, but was ***never rendered, selfchecked, archived, or committed*** *— it sits abandoned, superseded mid-cycle.* ***This version (August 29, score set `2026-08-29_draft`) is a FULL WEEKLY refresh and goes further, re-rating down to 36/35/45/55/61.*** *A dedicated adversarial-verification pass this cycle caught a real error in the abandoned draft: its CME FedWatch September rate-hike-odds figure (~35.4%→~45.7%) UNDERSTATED the actual market move. Independent re-pull and cross-check — Motley Fool citing CME FedWatch directly at 57.5%, CNBC's own body text at "nearly 56%," and a third independent source at "55.7%" — shows the real post-speech reading clustered tightly in the high-50s, roughly 56-58%, not 45.7%: September hike odds are now past coin-flip, not just approaching it. Two fresh facts not in the abandoned draft: initial jobless claims for the week ended Aug 22 (DOL, primary, Aug 27) came in at 203,000 vs. 208,000 consensus, a mild hawkish-adjacent tightening signal; and the Aug 26 H.4.1 balance-sheet release (federalreserve.gov, primary) showed the same reserve-drain pattern continuing (reserve balances −$10,351M w/w to $2,924,936M; TGA −$2,876M w/w to $950,736M), logged but not independently trigger-worthy. This cycle also corrects the abandoned draft's price-action framing: BTC did NOT hold a stable tape through the speech — it opened Aug 28 around $80,262, traded above $81,000 pre-speech, then fell back sharply once Warsh spoke, closing $79,613.44 that day, and continued falling to $77,666.16 by today, Aug 29 (Bitstamp) — a real, visible reaction, not a shrug.* ***Net: the corrected, larger CME move justifies a deeper cut than the abandoned draft reached.*** *1mo 43→36 (-7), 3mo 41→35 (-6), 6mo 48→45 (-3), 1yr 56→55 (-1), 3yr 62→61 (-1) — still minimal at the long end, since Warsh explicitly declined to commit to a reaction function and one repricing doesn't reach three years out. Left as draft at delivery, not auto-stamped: this is a FULL WEEKLY refresh, which the runbook's delegated daily auto-stamp authority categorically excludes regardless of move size — doubly so here since every window moved 7 points or fewer anyway. Flagged for Alex's manual review; see My Decision below.* ***THIS VERSION (August 31) is a light daily catch-up, score set 2026-08-31_draft****, covering Aug 29-31: CME FedWatch September hike odds continued drifting up post-Warsh (CNBC Aug 28: ~45.7%; CoinSpectator/Bitcoin.com Aug 30: ~57%; CNBC Aug 31 Jackson-Hole-roundup: ~60.4%, up from ~56% Friday) — directionally the same hawkish repricing already sized into the Aug 29 cut (which used a 56-58% cluster as its basis). Per the sufficiency rule, a market-odds drift alone, without a fresh primary data print or news event, cannot move P further. No new H.4.1 (next due Sept 3, last Aug 27) or jobless claims release landed in this window.* ***P HELD FLAT at 36/35/45/55/61.*** *This is a light daily touch, no window moved, no call band flipped —* ***AUTO-STAMPED*** *per delegated daily authority.* ***Sept 1: held flat again*** *— CME FedWatch September hike odds continued the same post-Jackson-Hole drift (Forbes/KuCoin ~66% at 11:40am ET Aug 31, up from the ~60.4% CNBC read this pillar's Aug 31 baseline used), but it's the same intraday drift sequence with no new primary print or news event behind it, so per the sufficiency rule it does not independently move P; no new H.4.1 or claims release landed (Aug 31 was Labor Day). Score set 2026-09-01_draft, AUTO-STAMPED, new last COMMITTED baseline.* ***Sept 2: held flat a further time*** *— no new H.4.1 or data print found dated Sept 1-2; September 15-16 FOMC market pricing (CME FedWatch roughly 60% hold) continues the same post-Jackson-Hole drift already priced into the Sept 1 baseline, not a fresh data-driven move, so per the sufficiency rule it does not independently move P. Score set 2026-09-02_draft — this pillar's own P is unaffected, but because all four qualitative pillars share one dated score set and Iran War Risk's sharp re-rate this cycle flips the master call band (Mild Bull → Neutral) and needs Alex's manual review, the WHOLE 2026-09-02_draft set — Fed & Macro's flat P included — stays in DRAFT status, not committed, per house rule (see My Decision and the Iran War Risk pillar report); COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026 once Alex widened*

the policy — this is the last TRUE committed baseline: 36/35/45/55/61. ***Sept 3: held flat a further time*** *— light daily catch-up found nothing material on any of the four qualitative pillars; config/scores.json untouched, blend re-run against fresh quant data only.* ***Sept 5, light daily catch-up (score set 2026-09-05_draft): RE-RATED DOWN a modest further step, 36/35/45/55/61 → 32/31/43/54/60.*** *The August jobs report (BLS, primary, released Sept 4) beat sharply — nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady at 4.1% — and markets repriced September 15-16 FOMC hike odds higher off of it (CNBC, Yahoo Finance, TheStreet, U.S. News, Investing.com/Reuters — point estimates vary 60-66% by source/timestamp but are directionally consistent and higher than the Sept 2 baseline's "~60% hold" framing). Same-day reaction: 2yr Treasury yield +5.3bp to its highest since January 2025; Dow −0.51%, S&P −0.38%, Nasdaq −0.29%; BTC fell ~2% same-day ($81,265.00 Sept 3 close → $79,676.60 Sept 4 close). Fed officials remain split (Warsh hawkish; Waller says he'd lean toward holding if inflation improves), with the Sept 11 CPI print now flagged as the likely decider before Sept 15-16. Move sized comparably to the Aug 22→28 catch-up cut on the Warsh Jackson Hole speech alone (a comparable single dated catalyst): 1mo −4, 3mo −4, 6mo −2, 1yr −1, 3yr −1, no window over 8 points.* ***CORRECTION:*** *that cycle's commit message claimed "AUTO-STAMPED SEPTEMBER 5, 2026," but config/scores.json's status field was never actually advanced to committed — a bug in that session, flagged here and not corrected retroactively (stamping is Alex's call).* ***Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:*** *independently re-verified via WebSearch — Fed Governor Waller's genuinely dovish-leaning Sept 3 speech ("give disinflation a chance") briefly cut CME hike odds to ~48% (Semafor, CNBC, Bloomberg, PBS) before the Sept 4 jobs beat reversed that back up to 60-66% (Forbes/CME FedWatch), a net hawkish drift for the week consistent with the Sept 5 cut. No further Fed commentary or data since; the Sept 11 CPI print has not yet landed.* ***HELD FLAT at this cycle's re-rated level, 32/31/43/54/60. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size — left for manual review, and COMMITTED BY ALEX SEPTEMBER 5, 2026. Sept 6: light daily catch-up, held flat.*** *Re-checked via WebSearch: no new Fed speech, data release, or FOMC commentary since Sept 3-4 (Governor Waller's dovish-leaning Sept 3 speech and the Sept 4 BLS August payrolls beat were already captured in the Sept 5 re-rate). September 6 is a Saturday — markets and the Fed's own calendar are quiet, no data or speeches scheduled. The September 11 CPI print remains the next dated catalyst and has not yet landed.* ***HELD FLAT at 32/31/43/54/60. Sept 8: light daily catch-up, held flat again.*** *Re-checked via WebSearch: no new Fed speech, data release, or FOMC commentary since Sept 3-4; the Sept 11 CPI print and the Sept 15-16 FOMC meeting remain the next dated catalysts, not pre-empted this cycle.* ***HELD FLAT at 32/31/43/54/60. Sept 9: light daily catch-up, held flat again.*** *Re-checked directly against CME FedWatch-citing coverage — September 25bp-hike odds read ~58.7% (as of Sept 7, CNBC/cryptonews), consistent with the ~56-58% cluster already priced into the baseline, not a fresh move; no new FOMC meeting, no new BLS/DOL primary release since Sept 3-4. The Sept 11 CPI print and Sept 15-16 FOMC remain the next dated catalysts.* ***HELD FLAT at 32/31/43/54/60. Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.*** *Held flat at 32/31/43/54/60 — independently re-checked, nothing cleared the sufficiency bar. The Aug CPI release (due Sept 11) and the FOMC meeting (Sept 15-16) are both still pending per BLS/Fed calendars — no new primary data since Sept 9. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is* ***AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." THIS VERSION (September 11, score set 2026-09-11_draft) RE-RATES UP, modestly, to 34/33/44/54/60.*** *This cycle deliberately held its research window open past 8:30am ET for the print this pillar has been flagging for a week, and the August CPI print landed on schedule at 8:30am ET: BLS's own release (bls.gov, primary, fetched directly and re-fetched to confirm) has headline CPI-U* ***+0.4% m/m SA*** *in August after +0.1% in July and* ***+3.4% y/y NSA****, with core (all items less food and energy)* ***+0.3% m/m*** *after +0.2% in July and* ***+2.4% y/y****; energy rose 2.1% m/m and gasoline 3.9%, accounting for over a third of the monthly increase, while shelter rose 0.3%. Against the consensus circulating pre-print (headline +0.4% m/m / 3.4% y/y; core +0.4% m/m / 2.4% y/y), headline landed exactly in line and* ***core came in one tenth cooler on the month****, core y/y in line — a modest dovish surprise in the window that brackets the Sept 15-16 FOMC. It is tempered, not clean relief: headline accelerated from +0.1% to +0.4% and the acceleration is energy-driven — the same oil shock that fires the Iran pillar's "sustained Brent >$100" clause this cycle shows up here as headline inflation. Market-implied September hike odds circulating around the print (~70% for a 25bp move) are a market price, reported and not used to move P; the BLS release itself is the mover. Cross-source caution logged: several aggregator summaries of this print circulating within minutes carried figures inconsistent with the BLS release (e.g. a 3.1% core y/y) — discarded in favour of the primary document. Re-rated up on the windows bracketing the FOMC only:* ***1mo 32→34, 3mo 31→33, 6mo 43→44****; 12mo and 36mo held flat at 54/60 — a single in-line-to-a-tenth-cooler print does not move the multi-year regime read.* ***AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)." Sept 16, light daily catch-up (2026-09-16_draft):*** *the September FOMC decision, statement, SEP and dot plot were scheduled for 2:00pm ET that day and had NOT been released at run time (~08:03 ET) — nothing new was knowable that cycle.* ***HELD FLAT at 34/33/44/54/60, AUTO-STAMPED. THIS VERSION (September 17, score set 2026-09-17_draft) RE-RATES DOWN, modestly, to 32/31/42/54/60.*** *The Sept 16 FOMC delivered its decision: the federal funds target range raised 25bp to 3.75%-4.00%*

(12-0 vote), the first hike in three years (federalreserve.gov statement, primary; corroborated by CNBC, Reuters/Advisor Perspectives, Coinpedia, coingape, and others). The hike itself was ~92.5% priced into CME/market odds ahead of the meeting per multiple outlets, so under the house sufficiency rule its mere occurrence is not, by itself, treated as new information — a market-price-implied outcome materializing is not a fresh primary fact. What IS new and primary-sourced: the SEP/dot plot itself, a Fed institutional document rather than a market price, shows 16 of 18 participants expecting at least one more hike in 2026 (12 of 18 specifically pencil in one more 25bp move by year-end, to 4.125%), plus a slower, more cautious rate-descent path through 2027-2028 than previously projected, with the long-run neutral-rate dots clustering tightly at 3.0%. Bitcoin's actual reaction was muted — it ticked up toward $76,300 on the statement, then drifted back to hold near $76,000-198 through Chair Warsh's press conference (CNBC, Coinpedia) — consistent with the move being mostly anticipated. Sized as a modest step, concentrated on the windows that bracket the now-confirmed additional-hike path through year-end 2026 and into Q1 2027: ***1mo 34→32, 3mo 33→31, 6mo 44→42****; 12mo and 36mo HELD FLAT at 54/60, since the SEP's own longer-run dots (slow descent into 2027-2028, neutral rate anchored near 3.0%) are broadly consistent with what this pillar already carried, not a new multi-year signal. Light daily touch, master call band unchanged everywhere (Neutral → Neutral equal-weight) —* ***AUTO-STAMPED per delegated daily authority: status committed, stamped_by "Alex (auto-stamped)." Sept 18 (score set 2026-09-18_draft, this version) HOLDS FLAT at 32/30/38/44/58.*** *The Sept 16 FOMC dot-plot revision already drives this window's read in the currently committed set; a Sept 18 Motley Fool piece discussing "the most important number" in the SEP is single-source commentary on already-priced primary data (the same Fed projections table this pillar already cited), not a new dated fact — does not clear the sufficiency bar. AUTO-STAMPED per delegated daily authority.* ***Sept 19 (score set 2026-09-19_draft) is a FULL WEEKLY refresh that HOLDS FLAT again at 32/30/38/44/58*** *— confirmatory jobless-claims and housing prints, left as DRAFT for Alex's manual review since weekly refreshes are categorically excluded from auto-stamp regardless of finding.* ***THIS VERSION (September 22, score set 2026-09-22_draft) is a LIGHT DAILY touch, targeted single-pillar follow-up, and RE-RATES DOWN one point on the three near windows to 31/29/37/44/58.*** *Two independent primary regional Federal Reserve surveys, both dated September 2026 — the Philadelphia Fed Manufacturing Business Outlook Survey (released Sept 17: prices paid 40.9→48.6, prices received 17.7→31.3) and the New York Fed Empire State Manufacturing Survey (released Sept 15, primary, fetched directly: prices paid 58.1→63.1, the highest since July 2022, prices received 23.1→28.1) — both show headline activity cooling but input-cost and selling-price pressure re-accelerating to multi-month/multi-year highs. Two independent Fed district banks' own surveys, same week, same directional signal, clears the sufficiency bar; kept to one point because both are soft surveys whose own forward components (employment, future activity) fell, and because market pricing turned risk-on into Sept 18-19. 12mo/36mo HELD — two regional sentiment surveys say nothing about the 2027-2028 policy path. CLARITY Act, Iran War Risk, and Tokenization all carried forward unchanged this cycle. Per the runbook's delegated auto-stamp authority this is an ordinary light daily-type touch and the sourcing clears the sufficiency rule — AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."*

COINPICKS PILLAR REPORT · WEIGHT: 20% OF MY THESIS (EQUAL, 1/5)

Written June 12, 2026 · **[MERGED — see merge note below] Updated & Re-verified November 2, 2026 — LIGHT DAILY touch, active set 2026-11-02_draft (COMMITTED, AUTO-STAMPED NOVEM** priced Dec 9 hike: CME FedWatch odds (MARKET PRICE) are back to ~73–76%, inside the priced ~74–79% band. No Board/Chair remarks Oct 31 – Nov 2. October jobs Fri Nov 6, 8:30 ET (bls.gov, primary) **ALEX'S STAMP: HELD FLAT at 34/23/34/43/58, identical to the Oct 29 committed baseline it builds on.** The Oct 28 FOMC hold was already fully priced; no new Fed-official remarks found dated Oct tool-wide degradation). Per CLAUDE.md, a full weekly refresh is categorically excluded from auto-stamp regardless of outcome. · Prior: **Updated & Re-verified October 31, 2026 — LIGHT DAILY touch** remarks this window moving December odds beyond what's already priced. Nothing cleared the sufficiency rule. · Prior: **Updated & Re-verified October 30, 2026 — LIGHT DAILY touch, active set still** and no new Fed-speaker remarks or guidance were found dated Oct 29-30. Current government-shutdown status for this specific window could not be independently confirmed either way; flagged as an **34/23/34/43/58.** The FOMC held the funds rate at 3.75%-4.00% Oct 28, 2:00pm ET, voting 10-2 (Governors Lisa Cook and Beth Hammack dissenting for a 25bp hike, Cook's first dissent since 2022) — PR baseline (built on Chair Warsh's Oct 16 remarks); the dissent is genuine new information but a mild, within-band hawkish data point (2 of 12 votes) that does not clear the sufficiency rule for a further mo had not yet published as of this research pass — not used; flagged as this pillar's own next flip-line test. **AUTO-STAMPED under Alex's delegated daily authority** (status: committed, stamped_by: "Alex **10-24_draft: RE-RATED UP, 1-month only, 31→34 (+3); 3mo/6mo/1yr/3yr HELD at 23/34/43/58.** The decisive new fact: Fed Chair Kevin Warsh, speaking alongside IMF MD Georgieva at an IMF event ups), declined to preview the Fed's remaining 2026 decisions and explicitly declined to telegraph an Oct 28 hike. Following that remark, Oct 28 hike odds collapsed from the already-logged ~33–47% bar Warsh statement. Clears the sufficiency rule; sized entirely onto 1mo since the Oct 28 decision sits in that window. Dec 9 odds (~74–79%, Polymarket/Kalshi-avg) sit within the already-priced baseline bar forecasts are conflicting single-bank opinions, reported as color only, not scored. The Oct 27–28 FOMC meeting itself has not yet happened as of today. Per CLAUDE.md, a full weekly refresh is categorica **17_draft: HELD FLAT on all five windows, 31/23/34/43/58.** The FOMC blackout period (Oct 17-29) continues; no new Fed-official statement or data print found since the Oct 19 check; nothing cleared period (Oct 17-29, ahead of the Oct 27-28 meeting) was confirmed via the St. Louis, Atlanta and Chicago Fed's own published calendars; no Fed speakers found; no new data prints per BLS's own release **31/23/34/43/58.** No new Fed-official statement found dated after the Oct 14 CPI print; nothing cleared the sufficiency rule. · Prior: **Updated & Re-verified October 17, 2026 — FULL WEEKLY refresh,** the approaching FOMC blackout period ahead of the Oct 27–28 meeting. Secondary-aggregator reports of September PPI and retail-sales prints (dated Oct 15) were internally inconsistent across sources sufficiency rule rather than used on uncorroborated, internally contradictory secondary sourcing. Market-priced Oct 28 hike-odds reports found this cycle (CME FedWatch/Kalshi/Polymarket, variously ~3 functional for every domain tried this cycle (tool-wide DNS failure, matching this sandbox's already-documented pattern); WebSearch worked normally and was the sole research channel. Per CLAUDE.mo **touch, score set 2026-10-15_draft: RE-RATED DOWN on all four near/medium windows, 33/26/36/44/58 → 31/23/34/43/58 (−2/−3/−2/−1/0).** The decisive new fact is the September 2026 CPI pr +3.7% y/y (vs. 3.6% consensus, up from 3.4% in August), core +2.6% y/y (vs. 2.5% consensus, up from 2.4%), energy/gasoline-driven (+9.1% m/m). This extends, not just reiterates, the Oct 8 Waller hawkis Oct 28 hike odds rose to roughly 34% (hold ~66%) from a pre-CPI ~17% CME FedWatch read; December 9 hike odds elevated further to roughly 75-85% across sources (noisy, no single figure settled). **Si** acceleration argues restrictive policy holds longer); 12mo −1 (smaller marginal effect at this horizon); 36mo HELD at 58 (noise at this horizon). **AUTO-STAMPED under Alex's delegated daily authority** WEEKLY refresh, score set 2026-10-10_draft: RE-RATED DOWN, 35/29/37/44/58 → 33/26/36/44/58 (−2/−3/−1/0/0) — a partial reversal of last cycle's large +8/+4/+3/+1/0 upward move. The decisive new used in the first research pass — FXStreet, Dailysabah, HousingWire, Newsquawk, Bloomberg Tax): further rate increases are the likely next step if data keep behaving as expected; inflation has run above his more dovish spring-2026 posture, not a restatement — while downplaying the weak September payrolls print as still "solid and stable" and flagging December, not Oct 27–28, as the likelier next hike. (released Oct 8): 197,000, with the prior week revised UP 197,000→199,000 — claims have held below 200,000 for four straight weeks, continued labor resilience, not independently scored. **Sizing:** 1mo ta −3 because the Dec 8–9 meeting sits inside this window, where December-meeting hike odds drifted directionally higher (roughly 62–84% depending on source, no single figure settled); 6mo takes a mu 12mo/36mo HOLD, since one week of Fed-speaker rhetoric and noisy market pricing is insufficient at those horizons. **COMMITTED BY ALEX, October 14, 2026** (as part of score set 2026-10-14_draft, wh (+8/+4/+3/+1/0) — the largest move of that cycle and this pillar's FIRST UPWARD re-rate in weeks. Both load-bearing legs of the hawkish case broke dovish on primary data: August PCE undershot at 3.4 28 FOMC now prices as a hold. It is a DEFERRAL, not an all-clear: Barr re-stated the full hawkish case on Sept 29 (before either release), a December hike is still the base case, and the 10-year rose to 5.29 31/29/37/44/58 → 27/25/34/43/58 (−4/−4/−3/−1/0), the largest move of this cycle. A week of hawkish evidence, mostly PRIMARY: Governor Barr's Sept 23 speech verbatim from the Fed's own PDF (local survey with LONG-RUN inflation expectations breaking a three-month plateau (3.3% → 3.4%) and year-ahead 4.0% → 4.6%; DOL claims at 197,000; and H.4.1 reserve balances down $83,601M in one week

is exactly the process that exclusion exists to require. · *Prior entries below include a September 24 line from a cycle that was never delivered (no render, selfcheck, archive or commit) and is superseded above* revision already drives this window's read in the current committed set; a Sept 18 Motley Fool piece on the SEP's "most important number" is single-source commentary on already-priced primary data, n **FLAT at 32/30/38/44/58**. Jobless claims fell to 196K for the week of Sept 12 (released Sept 17), the lowest since mid-July — confirmatory of the already-priced hawkish read, not new information. Housin a 19-year high near 5.04% before settling near 4.95%. A high-profile political story broke in parallel — Trump publicly pressured the Fed and demanded rates be cut to '1% or less' after Chair Warsh voted authority regardless of the size of the move (here, zero) — LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW.) · Last TRUE committed: 32/30/38/44/58 (2026-09-18_draft, auto-stamped Sept 18) · Upda surveys dated September 2026 — the Philadelphia Fed (prices paid 40.9→48.6, prices received 17.7→31.3, released Sept 17) and the New York Fed Empire State survey (prices paid 58.1→63.1, the highest sufficiency bar; kept to one point since both are soft surveys with falling forward components, and 12mo/36mo held since regional sentiment surveys don't speak to the multi-year policy path. This is a ta Last TRUE committed: 31/29/37/44/58 (2026-09-22_draft, auto-stamped Sept 22) · Updated & Re-verified September 23, 2026 (LIGHT DAILY touch, score set **2026-09-23_draft**: **HELD FLAT at 31/29/37/ SEPTEMBER 23, 2026.**) · Last TRUE committed: 31/29/37/44/58 (2026-09-23_draft, auto-stamped Sept 23) · Not Financial Advice · **Updated & Re-verified September 24, 2026** (LIGHT DAILY touch, score **29/27/36/44/58**. Fed Governor Michael S. Barr, Sept 23, PRIMARY — the speech PDF was fetched from federalreserve.gov and parsed directly: “in my base case, further policy adjustments are likely to be flash US PMI showed the strongest private-sector growth since July 2021 (composite 58.4, manufacturing 57.0, services 58.7) alongside the fastest input-cost inflation since October 2022 and selling-price confirmed, since FRED DGS10 publishes a day late and still read 4.96% for Sept 22 at research time.) · Last TRUE committed: **31/29/37/44/58** (2026-09-23_draft) — note the Sept 24 set 29/27/36/44/58 w

The Scores — Committed vs. Drafts

MERGE NOTE — TWO independent full weekly refreshes ran for October 3, and this is the same duplicate-cycle failure mode the runbook already documents for Sept 26. *The cloud routine researches the day on its own `2026-10-03_draft` and its archive keeps the bare `2026-10-03` directory — so this package takes the next free key, `2026-10-03_draft2`, and archives as `2026-10-03-2`.* ***The divergence is substantial and needs Alex's decision*** *cloud took +3 on 1mo, this package +8) — genuine corroboration that the pillar should rise, with the gap turning on how decisively the September jobs report prices out the October meeting. On the other three pillars this package a* ***independent adversarial-verification passes behind it****, and those passes withdrew three claims carried in previously delivered reports as false — corrections that apply to the shared record whichever score set Alex keeps.* ***Oct 3 (2*** *want to push back on. The 9/26 column is now the last COMMITTED baseline, stamped by Alex September 27, 2026. Historical notes follow.* ***Sept 26 (2026-09-26_draft3, this version): FULL WEEKLY refresh, RE-RATED DOWN 3*** *last COMMITTED baseline. An intervening Sept 24 draft was written but never delivered, so — consistent with this report's convention for abandoned drafts — it does not get its own column here; it remains in `config/scores.json`* ***never delivered*** *(not rendered, selfchecked, archived, or committed) — shown for lineage only, superseded. Aug 29 was a FULL WEEKLY refresh that went further, after an adversarial-verification pass corrected an understated CME o Risk's re-rate flipped the master call band; COMMITTED, AUTO-STAMPED SEPTEMBER 3 once Alex widened the policy — this is the last TRUE committed baseline at 36/35/45/55/61. Sept 3 held flat a further time (nothing material fo STAMPED," but config/scores.json's status was never actually advanced to committed — a bug, flagged as a correction this cycle.* ***Sept 5 FULL WEEKLY refresh (2026-09-05_draft2, this version)*** *independently re-confirms the re-ra* ***(2026-09-06_draft, 2026-09-08_draft)*** *each independently re-checked and held flat — no new Fed speech or data release since Sept 3-4, the Sept 11 CPI print still pending — and were* ***AUTO-STAMPED****, Sept 8 the last COMMITT the new last COMMITTED baseline.* ***Sept 10 (2026-09-10_draft)*** *holds flat a further time — the Aug CPI release (due Sept 11) and the Sept 15-16 FOMC meeting remain pending per BLS/Fed calendars —* ***AUTO-STAMPED per del*** *consensus at +0.3% m/m (2.4% y/y), with the headline acceleration energy-driven —* ***AUTO-STAMPED per delegated daily authority****, the committed baseline.* ***Sept 12 light daily catch-up (2026-09-12_draft)*** *holds flat a furthe independently re-verifies the August CPI print (no discrepancy) and examines the new August PPI release (BLS, Sept 10): a hot 5.4% y/y headline that is energy-driven, with core PPI actually undershooting consensus — a mild disinfl* ***delegated auto-stamp authority regardless of findings, left as DRAFT for Alex's manual review. Sept 16 light daily catch-up (2026-09-16_draft)*** *held flat again at 34/33/44/54/60 — the FOMC decision itself had not land and its SEP/dot plot land: the 25bp hike itself was already priced (market odds, not scored), but the dot plot's hawkish forward guidance — 16 of 18 officials expecting another 2026 hike — is new primary Fed information, sized on th doesn't clear the bar — AUTO-STAMPED, the last TRUE committed baseline.* ***Sept 19 (2026-09-19_draft, this version, column "9/19") FULL WEEKLY refresh, HOLDS FLAT again at 32/30/38/44/58*** *— jobless claims (196K, we mixed besides; a parallel Trump/Fed political-pressure story (Trump publicly demanding rate cuts after a unanimous FOMC hike) is logged as governance context, not scored. Full weekly refreshes are categorically excluded from dele three near windows to 31/29/37/44/58 on two independent primary regional Fed surveys (Philadelphia Fed prices paid 40.9→48.6, NY Fed Empire State prices paid 58.1→63.1) showing input-cost/selling-price pressure re-acceleratin* ***it has no column here*** *— it proposed a light daily RE-RATE DOWN of two points on 1mo/3mo and one on 6mo, to 29/27/36/44/58, but no render, selfcheck, archive or commit ever followed and its status was never advanced past d Sourcing clears the sufficiency rule — AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."*

Last TRUE committed P (2026-10-29_draft, LIGHT DAILY touch, COMMITTED, AUTO-STAMPED under Alex's delegated daily authority, October 29, 2026): 34 / 23 / 34 / 43 / 58 · **Prior draft (2026-10-31_draft, FULL WEEKL** (equal) · **Impact:** 8 (uniform) · **Formula:** Signal = ((P − 50) ÷ 50) × Quality × Impact — e.g. 1mo ((34 − 50) ÷ 50) × 0.85 × 8 = −2.18; 3mo ((23 − 50) ÷ 50) × 0.85 × 8 = −3.67. Nothing dated Oct 29 – Nov 2 cleared the sufficiency bar the Oct 28 decision, back to ~73–76% by Oct 30 – Nov 1, inside the already-priced ~74–79% band. No Board or Chair remarks Oct 31 – Nov 2 (federalreserve.gov, PRIMARY). ISM Manufacturing (October data) was due Nov 2, 10:00

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds the macro regime is *good for crypto* by then — not "the Fed cuts by then." Re-rated down this cycle to **31 / 23 / 34 / 43 / 58** from the committed 33 / 26 / 36 / 44 / 58: the Sept does not reach the 2029 liquidity regime.

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. Liquidity is the tide; it moves the whole market at once.

Carried forward, still load-bearing: July PCE (bea.gov, primary, released Aug 26) printed a modestly hot headline read, +0.2% m/m / 3.7% y/y (0.1pp above consensus), core +0.2% m/m / 3. 30-year Treasury yield's 19-year high was substantially a fiscal-deficit story, not a clean Fed signal; both already reflected in the committed baseline this cycle re-rates from.

The Claim

The thesis, and where I differ from the consensus — updated October 15, 2026 (LIGHT DAILY touch, score set 2026-10-15_draft, AUTO-STAMPED)

This cycle (Oct 15): the crowd will likely read the hot September CPI print — headline accelerating to 3.7% y/y, core to 2.6% y/y, both above consensus — as confirmation the Fed's hiking cycle h Kalshi/Polymarket) roughly doubled off this print, from a pre-CPI ~17% to ~34% — still a hold favorite, which is why 1mo only takes −2, not a wholesale flip. December 9 is a different story: odds also moving (−2) — energy-only prints fade, core re-acceleration doesn't. **P RE-RATED DOWN on four windows, 33/26/36/44/58 → 31/23/34/43/58** — 36mo held, since one print doesn't rea

Prior cycle (Sept 22): the crowd will likely read the Philadelphia Fed and NY Fed Empire State surveys by their falling headline-activity numbers — both surveys' general-conditions readings cool received sub-indexes jumped, not fell, with Empire State prices paid hitting the highest level since July 2022. That is a genuine, if soft, re-acceleration in the inflation pipeline landing barely a week both surveys' own forward-looking components (employment, future activity) fell in the same reports, and the CLARITY/Iran/Tokenization pillars are untouched this cycle — this is a single targete speak to the multi-year policy path.

Prior cycle (Sept 17): the crowd will likely read the Sept 16 FOMC's 25bp hike to 3.75%-4.00% itself as the headline event. **Me:** that hike was ~92.5% priced into market odds beforehand, so its n least one more 2026 hike (12 of 18 specifically pencil in a year-end move to 4.125%), and a slower projected descent through 2027-2028. Bitcoin's own reaction was a shrug (ticked up toward $76 been running on. **P RE-RATED DOWN, modestly, to 32/31/42/54/60** — 1mo 34→32, 3mo 33→31, 6mo 44→42, concentrated on the windows bracketing the confirmed additional-hike path into

Prior cycle (Sept 12, FULL WEEKLY refresh): the crowd will likely read the hot 5.4% y/y August PPI headline (BLS, Sept 10) — the highest of 2026 — as confirmation the inflation picture is worse actually steers on came in under consensus, a mild disinflationary surprise. That reinforces the already-priced cooler-than-consensus CPI read from last cycle rather than contradicting it — a fresh **at 34/33/44/54/60.** The Sept 15-16 FOMC meeting has not yet occurred and remains the next real catalyst. This is a FULL WEEKLY refresh, so — regardless of the flat finding — it is left as DRAFT

Prior cycle (Sept 12 light daily catch-up): the crowd would likely read the ~90% market-implied hike odds circulating that morning as new information demanding a further hawkish re-rate. **M** a CPI print this pillar already scored, not a new dated primary fact, so per the house sufficiency rule it did not independently move P. **P HELD FLAT at 34/33/44/54/60,** AUTO-STAMPED.

Prior cycle (Sept 11): the crowd will take a headline that jumped from +0.1% to +0.4% m/m and read it as inflation re-accelerating into a hawkish FOMC. **Me:** look at what moved it — energy +2 steers on, core, came in at +0.3% m/m against a +0.4% consensus, with core y/y in line at 2.4%. That is a modest dovish surprise in the windows that bracket the Sept 15-16 meeting, and it is why change.

The crowd: might read Warsh's studied refusal to commit to forward guidance as him keeping his options open, and treat the hawkish framing as just rhetoric until an actual vote. The abandone

Me: now at 32/31/43/54/60, down from the 36/35/45/55/61 this pillar held through Aug 29-Sept 3. That Aug 29 cycle's dedicated adversarial-verification pass re-pulled the CME FedWatch data c found only continued/drifting odds, not a fresh primary print, so P held; a Sept 3 check found nothing material on any pillar. **Sept 5:** the August jobs report (BLS, primary, released Sept 4) beat sh Treasury yield move to its highest since January 2025, a modest equity selloff, and BTC falling ~2% same-day ($81,265.00 → $79,676.60). This is a fresh, dated, primary-sourced print — not odds d Fed speech or primary data release, so P held flat at 32/31/43/54/60 through Sept 10; the August PPI print (BLS, primary, released Sept 10) showed annual wholesale inflation accelerating to 5.4% used to move P (the sufficiency bar for this pillar has been the primary CPI/PCE/jobs release, not the less-market-moving PPI). **Sept 11:** the August CPI print (BLS, primary, released 8:30am ET) lan data release found since the CPI print; P HELD FLAT at 34/33/44/54/60, AUTO-STAMPED. **Sept 12, FULL WEEKLY refresh (afternoon, this version):** the August PPI print (BLS, Sept 10) examined verified with no discrepancy. P HELD FLAT at 34/33/44/54/60, left as DRAFT for Alex's manual review since full weekly refreshes are categorically excluded from auto-stamp authority. The Sept 15-

My edge: the discipline is in re-pulling the actual rate-odds venue rather than trusting the first number that circulates — this cycle that discipline caught a real error before it was ever delivered t and still pending as of this research pass — and the Sept 15 FOMC itself remain the real tests — Warsh explicitly declined to pre-commit to a reaction function, so this re-rate prices in a repriced

The Facts

Updated November 2, 2026 (LIGHT DAILY touch, active set 2026-11-02_draft (COMMITTED, AUTO-STAMPED NOVEMBER 2, 2026)) — the new dated items are in the first box below. The remaining boxes are as of October 15, 2026 (L

★ NEW THIS CYCLE — OCTOBER 29 – NOVEMBER 2, 2026 (LOGGED NOVEMBER 2)

Oct 30 hawkish Fed-president remarks, which the Oct 31 weekly missed. Dallas Fed President Logan (2026 voter), Oct 30: "the FOMC needs to implement at least two more 25-basis-point soon" (Reuters + investinglive/24/7 Wall St); Richmond Fed President Barkin, Oct 30 (Reuters only — SINGLE-SOURCE, reported not scored). **Why no move:** they confirm the Dec 9 hike this pi

Rate odds — MARKET PRICE, not an institutional estimate. Dec 9 hike odds (MARKET PRICE, CME FedWatch, not an institutional estimate): ~85% just after the Oct 28 decision, back to ~73

PRIMARY — the curve eased despite the remarks. Treasury par yield curve (PRIMARY, home.treasury.gov), Oct 29 → Oct 30: 2y 4.73 → 4.65, 10y 4.98 → 4.94, 30y 5.32 → 5.31. The front end t

Calendar. No Board or Chair remarks Oct 31 – Nov 2 (federalreserve.gov, PRIMARY). ISM Manufacturing (October data) was due Nov 2, 10:00 ET and was not out at research time. Treasury refu the next tests that could move P.

★ NEW THIS CYCLE — OCTOBER 15, 2026

★ THE DECISIVE NEW FACT, and the reason P moves down this cycle — the September 2026 CPI print, Bureau of Labor Statistics, released October 14, 2026, 8:30am ET. PRIMARY (b **+2.6% y/y** (up from 2.4% in August, vs. a 2.5% consensus), +0.3% m/m. Driver: energy, specifically gasoline, **+9.1% m/m and +34.2% y/y**. This is a hawkish beat on BOTH headline and core the Oct 8 Waller hawkish shift already priced into the baseline this cycle re-rates from, and lands in a Fed that is in a HIKING stance (raised to 3.75-4.00% in September), not a cutting one — so

MARKET PRICES, never blended with institutional estimates, labelled explicitly throughout. Kalshi/Polymarket-derived odds of an Oct 28 hike rose to roughly **34% (hold ~66%)** as of O noisy range rather than a settled figure. For December 9, hike odds are elevated further to roughly **75–85%** across sources (wide spread, consistent with this pillar's standing practice of not qu 1mo window) is still a hold favorite even after roughly doubling.

Also confirmed, not used to move P: New York Fed President Williams has previously floated "one further upward adjustment…late this year" (already partially logged in prior cycles) — cons

Score decision: P RE-RATED DOWN, 33/26/36/44/58 → 31/23/34/43/58 (−2/−3/−2/−1/0). This is an ordinary LIGHT DAILY touch, not a full weekly refresh — the sourcing (primary BLS d verification raised no unresolved inconsistency. **AUTO-STAMPED under Alex's delegated daily authority: status committed, stamped_by "Alex (auto-stamped)."** Research capability was

★ CARRIED FORWARD — THE WEEK OF OCTOBER 3 – OCTOBER 10, 2026

★ A negative finding, stated plainly because it was deliberately checked for: there is NO government shutdown and no data disruption. BLS's own release calendar and the Federal Re (through Dec 11, 2026) is holding as expected, with no blackout of economic data. *The exact H.4.1 reserve-balances dollar figure for the week ended Oct 7 could not be extracted from available*

★ THE DECISIVE NEW FACT, and the reason P moves down this cycle — Fed Governor Christopher Waller, Istanbul Economic Forum (hosted by the Central Bank of the Republic of Newsquawk, Bloomberg Tax — every sub-claim below is CONFIRMED. (a) Further rate increases are the likely next step if incoming data keep behaving as expected. (b) Inflation has been runn demand as upside inflationary pressures — a genuine hawkish *shift* from his more dovish, wait-and-see posture earlier in the year (spring 2026), not a restatement of an old position. (e) He ex rate hikes don't need to come at consecutive FOMC meetings, leaving room for a pause at the upcoming Oct 27–28 meeting, while flagging December (the Dec 8–9 meeting) as the next hike corroborating primary source because it IS itself primary and multiply corroborated on content.

★ PRIMARY — DOL initial jobless claims, week ended Oct 3, 2026, released Oct 8, 2026 (corroborated by multiple independent outlets via a Reuters-sourced wire): **197,000**, with the PRI September payrolls print that drove the prior cycle's big dovish move — read here as a continuation of labor-market resilience on the claims side, not a new deterioration signal, and NOT use

MARKET PRICES, never blended with institutional estimates, labelled explicitly throughout. CME FedWatch-style pricing for the Oct 27–28 meeting barely moved despite Waller's remark 9 meeting, sources on hike-implied odds are noisy and not internally consistent across feeds (ranging roughly **62–84%** depending on source) but agree DIRECTIONALLY that implied Decembe described as "higher, though sources disagree on the exact figure" and labelled a market price throughout. This directional shift, concentrated at the meeting that sits inside the 3-month wind

The 10-year Treasury yield was roughly FLAT this week — approximately **5.23% on Oct 8** versus approximately 5.24% on Oct 1 (the prior cycle's reading) — after an initial Waller-driven sp 6mo trim, since no new quarterly GDP/PCE data landed this week and the long end didn't move much. 12mo and 36mo HOLD FLAT — one week of Fed-speaker rhetoric and noisy market pric

Explicitly EXCLUDED this cycle — verification found these too weak/unreliable to use. A single wire report's claim that Goldman Sachs might shift to forecasting two more hikes is interna reported in CONFLICTING directions by two low-quality aggregators and could not be resolved (FRED access was blocked this cycle) — no 2-year yield figure is quoted as fact. The exact H.4.1

Score decision: P RE-RATED DOWN, 35/29/37/44/58 → 33/26/36/44/58 (−2/−3/−1/0/0), a partial reversal of the prior cycle's large +8/+4/+3/+1/0 upward move. This is a FULL WEEKLY capability was NOT degraded this cycle: federalreserve.gov, dol.gov, and five-plus independent outlets were all reached directly in two independent passes (one research, one adversarial verifi

★ CARRIED FORWARD — THE WEEK OF SEPTEMBER 26 – OCTOBER 3, 2026

★ PRIMARY — August PCE undershot, BEA, released Sept 30, 2026. Every element re-confirmed exact against bea.gov: headline PCE price index **+0.3% m/m and 3.4% y/y**; **core +0.2% m Caveat stated rather than buried:** this release embeds the *annual update of the National Economic Accounts*, with revisions reaching back to January 2021, which is a genuine qualification on

★ PRIMARY — the September jobs report, BLS, released Oct 2, 2026 at 8:30 a.m. ET, and it contradicts the Fed's own stated rationale. Nonfarm payrolls **+29,000** against an ~84,000 c participation 61.8%. Prior months revised down by a combined **60,000** — July flipped from +21,000 to **−10,000** (−31,000) and August from +162,000 to +133,000 (−29,000); the arithmetic ch

★ PRIMARY — Vice Chair Philip N. Jefferson, "The U.S. Economy and Monetary Policy," Darden School of Business, University of Virginia, Oct 1, 2026. Quote re-verified verbatim and by carefully examining trends in the data, the evolving outlook, and the balance of risks." A sitting Vice Chair explicitly slowing the pace. **NOT USED:** a secondary article placing this speech on calendar shows Governor **Lisa D. Cook** there on Sept 30. Both are corroboration at best and are excluded from the re-rate.

★ THE HAWKISH COUNTERWEIGHTS, which are why this move is single-digit and stops at 12 months. (a) Governor Michael S. Barr, "Economic Conditions and Monetary Policy," D *timely fashion.*" and "*Risks to achieving our inflation target have increased, while risks to the labor market have receded, so we need to recalibrate policy to get us in a better position that more eve maximum employment and stable prices." Correction to an earlier pass of this cycle, which truncated the latter two sentences while presenting them as verbatim: the full endings are restored abov* hike: "The Committee decided to raise the target range for the federal funds rate by 1/4 percentage point to 3-3/4 to 4 percent," on a 12–0 vote, effective Sept 17, 2026. Remaining 2026 meet (+0.6pp). Growth is accelerating, not cracking. **(c) Initial claims, week ended Sept 26** (PRIMARY, DOL, released Oct 1, extracted from the release text): **197,000**, −1,000 w/w; prior week revise **5.29% (Sept 30)** → 5.24% (Oct 1), the series ending Oct 1 — there is no Oct 2 observation and none is asserted; a widely circulated "5.27% on Oct 2" traces to a third-party CFD feed and is no term tightening priced, *more* long-run inflation risk — which is exactly the de-anchoring this pillar tracks.

CORRECTED this cycle, and it kills a claim this system has been repeating: jobless claims are NOT at or near a 57-year low. The "near 57-year lows" / "lowest since 1969" framing carried 197,000 is not even 2026's lowest print, with **189,000** (week of Jul 18) and **190,000** (Apr 25) both lower, besides 190,000 and 195,000 in Sept 2022 and 195,000 in Jan 2024; the series minimum — and a hiring freeze at these claims levels does not force the Fed's hand.

MARKET PRICES, never blended with the SEP. CME FedWatch October-hike odds collapsed to roughly **17–23%** (hold ~77–81%) as of Oct 2, from about 36% a week earlier. For December, c CME's own page and the CNBC article both returned HTTP 403, so this rests on conflicting secondary citations of a market price and is labelled accordingly. These are market prices, not institu

H.4.1, week ended Sept 30 (PRIMARY, released Oct 1, re-confirmed exact): reserve balances **$2,948,090M** from $2,930,193M, **+$17,897M w/w** — last cycle's record −$83,601M drain has *re*

★ NEW THIS CYCLE — THE WEEK OF SEPTEMBER 19–26, 2026

★ PRIMARY — Fed Governor Michael S. Barr, "A Long-Term View on the Costs of Shelter," Sept 23, 2026, 10:05 a.m. EDT, at the Chicago Fed's Housing Affordability 2026 summit. All th growth is strong and the labor market is solid, but inflation is above our 2 percent target and not clearly trending toward target in a timely way. Moreover, risks to achieving our inflation targe **adjustments are likely to be needed to ensure inflation comes down to target in a timely fashion.**" He also confirmed he supported the Sept 16 hike. *Verification note, stated because it c* sentence is present, and the Board's own September calendar lists Barr at 10:05 a.m. — 10:20 a.m. that day was Vice Chair Jefferson at the NY Fed.

★ PRIMARY — S&P Global flash US PMI, Sept 23, 2026. The embargoed release ("Embargoed until 0945 EDT … 23 September 2026") was retrieved directly. Composite output **58.4** (from 5 **fastest since OCTOBER 2022**, attributing it to higher fuel and transport costs — and reports selling-price inflation rising too, reversing August's nine-month low. *Figure deliberately not quoted* characterisation, which is what actually carries the pillar, is primary.

★ PRIMARY — University of Michigan Surveys of Consumers, FINAL September, released Sept 25, 2026. Sentiment **48.1**, down 7.0% month-on-month from 51.7; current conditions 50.9 **expectations ticked up to 3.4%, ending three consecutive months at 3.3%.**" The long-run break is the single most consequential figure in this pillar's cycle, because de-anchored long-run

★ PRIMARY — DOL initial jobless claims, week ended Sept 19, 2026: advance figure **197,000** (the "near 57-year lows" characterisation carried here was later found FALSE and is withdrawn near-record-low layoff rate removes the last dovish counterweight to a further hike — and is, honestly, also a risk-on positive in its own right.

★ PRIMARY — Federal Reserve H.4.1, week ended Sept 23, 2026. Reserve balances **$2,930,193M against $3,013,794M** the prior week — a fall of exactly **$83,601M in one week**, arithme report has logged (prior logged weeks: −$10.4B, −$49.3B) and is a direct liquidity negative for crypto. **Honest qualifier:** it is substantially a mechanical TGA/tax-date rebuild rather than policy

Two Fed voices, both DOWNGRADED on sourcing after verification — used as corroboration only, neither able to move P alone. *Boston Fed President Susan Collins, Sept 22:* the quote not carry it, and every corroborating outlet traces to the same Reuters story, so it is **effectively single-agency** and labelled as such. It had never been scored by any prior cycle — a genuine c describing INVESTORS' forecasts, saying market pricing suggested "it's likely that another rate hike may be appropriate by the end of the year," and then adding "That seems to me a reasonab conflation this system forbids. No primary transcript exists (it was an unscripted fireside chat; newyorkfed.org 404s), and genuinely independent reporting is TWO outlets (Reuters and CNBC) –

Also logged this cycle, not scoreable. The Fed's own *Senior Credit Officer Opinion Survey* (Sept 24, primary) reports dealer pricing and non-pricing terms "remained basically unchanged, on **SAAR, an increase**, attributed to price reductions — which **contradicts this report's earlier "cooling rate-sensitive sectors" framing, and that framing is softened accordingly** (figure is s the Board calendar shows the next on Sept 28.

MARKET PRICES — reported, and never blended with the SEP's institutional estimates. The 10-year Treasury yield rose **4.96% (Sept 22) → 5.11% (Sept 23) → 5.18% (Sept 24)**, the high carried in the abandoned Sept 24 draft (FRED had not yet published Sept 23 at its research time) and *supersedes* its press-sourced "5.104%" intraday quote with the primary constant-maturity

differing by timestamp; traders price roughly **four more hikes by the June 2027 meeting**, which contradicts and retires this report's earlier "Polymarket ~51% odds of a cut by June 2027" lin could not reproduce it — that file truncates long before 2026, so the readings were almost certainly fabricated by a summarizing layer reading a truncated file, not served by FRED. It is logged

RE-CONFIRMED FROM PRIMARY — the Sept 16 FOMC and its dot plot. The statement reads "The Committee decided to raise the target range for the federal funds rate by 1/4 percentag **4.375%**; medians 4.1% (2026), 4.1% (2027), 3.9% (2028), 3.2% longer-run. So this report's standing line — 16 of 18 officials seeing at least one more 2026 hike, 12 of 18 at exactly one more —

THE TEST HAS LANDED, AND IT CAME BACK TWO-SIDED. August PCE and the Q2 GDP third estimate released **Sept 30** (BEA, primary). Core PCE printed 3.0% y/y, but roughly 0.15-0.2 poi offset, so this pillar's own flip line resolves without confirming or reversing the Sept 23-26 cut — held flat on the Oct 1 daily touch.

★ ★ **NEW this cycle — Philadelphia Fed Manufacturing Business Outlook Survey, released Sept 17, 2026 (primary source page confirmed at philadelphiafed.org; that month's PDF di investinglive, Kitco, Bitget, Academic Capital):** general activity fell to 37.8 from 47.4, but **prices paid rose to 48.6 from 40.9** (50.5% of respondents reporting higher prices vs. 1.9% lower) toward cooling.

★ ★ **NEW this cycle — New York Fed Empire State Manufacturing Survey, released Sept 15, 2026 (PRIMARY, fetched directly from newyorkfed.org):** general business conditions cooled

- **Why this clears the sufficiency bar:** two independent Federal Reserve district banks' own primary surveys, dated the same week, showing the same directional signal (headline activity coolin
- **Why only one point:** both are soft/sentiment surveys, not hard CPI/PCE prints; both releases' own headline-activity and forward-looking components (employment, future activity, general co recovered) — a market price, not scored, but the honest reason not to take this further.
- **12mo/36mo HELD** — two regional sentiment surveys say nothing about the 2027-2028 policy path those windows price.
- **Score decision: P RE-RATED DOWN one point on the three near windows, 32/30/38/44/58 → 31/29/37/44/58.** Research capability fully available this cycle (WebSearch clean; WebFetch **(auto-stamped)."**

Carried forward from the September 19 FULL WEEKLY refresh (score set 2026-09-19_draft, still draft, awaiting Alex's review), still load-bearing:

★ ★ **NEW this cycle — initial jobless claims, week ended Sept 12 (DOL, primary, released Sept 17): 196,000**, the lowest since mid-July; four-week average 203,250; continuing claims 1.730

★ ★ **NEW this cycle — new-residential-construction data (Census Bureau/HUD, primary, released Sept 17): housing starts 1,275K SAAR (−2.6% m/m), permits 1.394M (−2.7% m/m).** (single-family starts actually +7.6%) — insufficient alone to move P per the sufficiency rule; flagged for next cycle if the cooling repeats.

- ★ **NEW this cycle, background color — University of Michigan preliminary September consumer sentiment (released ~Sept 11-12, primary/academic survey): fell to 47.8 from 51.7** now — it is already implicitly reflected in the mood behind the Sept 16-17 hawkish re-rate.
- **Treasury yields backed up further into and through FOMC week:** the 10-year touched ~5.04% intraweek, a 19-year high, before settling near 4.94-4.95% by Sept 18 as oil prices eased; 2-5
- **CME FedWatch (market price, not scored):** the October 27-28 FOMC meeting priced a **55.1% probability of another 25bp hike** as of Sept 17, 2026 — compare pre-Sept-16-meeting pricin roughly 51%.
- **A high-profile political story broke in parallel: President Trump and senior administration officials (the Vice President, the Treasury Secretary, and an economic counselor) publicly** independent outlets (CNBC, CNN, NBC News, MS NOW, BNN Bloomberg, Fortune, The Hill, Bloomberg). A governance/Fed-independence storyline, not new economic evidence — the Fed di
- **Bank-forecaster reactions, logged not scored:** Goldman Sachs's post-meeting note expects an October hike with no December hike in its base case; an earlier BofA call for three 2026 hikes reacting to the already-priced SEP, not new primary facts.
- **Fed Vice Chair Bowman's Sept 18 speech in London (Mansion House, federalreserve.gov, primary)** covered bank stress-testing rule finalization — not a monetary-policy or rate signal, n
- **Score decision: P HELD FLAT at 32/30/38/44/58.** Full independent primary-source research this cycle (~15 targeted WebSearches, no capability degradation); nothing above clears the suffi

Carried forward from the September 17 light daily touch (score sets 2026-09-17_draft / draft2, merge set, committed, auto-stamped), still load-bearing:

As of September 17, 2026 (LIGHT DAILY touch, score set 2026-09-17_draft) — hard numbers only, sources on the last page. New this cycle: the Sept 16 FOMC decision and its SEP/dot plot; the Sept 12 weekly-refresh material further

★ ★ **NEW this cycle — Sept 16 FOMC decision (federalreserve.gov, primary; corroborated by CNBC, Reuters/Advisor Perspectives, Coinpedia, coingape — 5+ independent outlets).** T not used to move P on its own.

★ ★ **NEW this cycle — the Summary of Economic Projections / dot plot (federalreserve.gov, primary).** 16 of 18 participants project at least one more 2026 rate increase; 12 of 18 specifica neutral-rate dots clustering tightly at 3.0%. This is a primary Fed institutional document, not a market price, and clears the sufficiency bar on its own.

- **Bitcoin's reaction was muted:** ticked up toward $76,300 on the statement, then drifted back to hold near $76,000-198 through Chair Warsh's press conference (CNBC, Coinpedia) — consiste
- **Score decision: P RE-RATED DOWN, modestly, to 32/31/42/54/60** — 1mo 34→32, 3mo 33→31, 6mo 44→42; 12mo/36mo HELD FLAT at 54/60. Light daily touch, master call band unchang

★ **Carried forward — August PPI (BLS, primary, released Sept 10, 2026; corroborated by CNBC, CNN, Yahoo Finance — 3+ independent outlets).** Headline final demand **+0.4% m/m** (in PPI (ex food/energy) came in at **+0.3% m/m**, UNDER consensus on one reading (+0.2% m/m on a further core-ex-trade-services cut) — a mild disinflationary surprise on the core reading.

- **Score-relevant read on the PPI print:** reinforces, rather than contradicts, the already-priced "cooler than consensus" August CPI narrative — **not a distinct new directional catalyst**, so it do
- **Re-verified August CPI (BLS, released Sept 11) independently this cycle:** headline +0.4% m/m / +3.4% y/y, core +0.3% m/m / +2.4% y/y, shelter +0.3% m/m / +3.0% y/y — matches the fi
- **DOL initial jobless claims, week ending Sept 5 (released ~Sept 11, primary): 206,000, down 1,000 w/w, 4-week average 206,000** — steady, unremarkable, no signal.
- **CME FedWatch-tracked market-implied odds of a 25bp hike at the Sept 15-16 FOMC read ~62-69% this week (as of Sept 10-11)** — a *market price* only, not an institutional estimate, ex price snapshots at different times; the divergence is noted, not resolved or editorialized on.
- **Fed Chair Warsh: no new substantive remarks since the Aug 28 Jackson Hole speech.** A Sept 9 Marketplace piece characterizing him as withholding forward guidance ahead of the meeti
- **The Sept 15-16, 2026 FOMC meeting had NOT yet occurred** as of the Sept 12 research pass — it has since occurred and fired; see the NEW facts above.
- **Historical score decision (Sept 12 cycle, superseded):** P HELD FLAT at 34/33/44/54/60 — FULL WEEKLY REFRESH, left as DRAFT for Alex's manual review at the time (weekly refreshes are ca

Carried forward from the Sept 12 light daily catch-up (score set 2026-09-12_draft, auto-stamped that morning), still load-bearing:

- **Re-checked — no new Fed speech or primary data release found since the Sept 11 CPI print.** Coverage of ~90% market-implied hike odds circulating that morning traced to Fed Chair W

★ **CARRIED FORWARD — August CPI (BLS, primary, released 8:30am ET September 11, 2026):** headline CPI-U **+0.4% m/m seasonally adjusted** after +0.1% in July, **+3.4% y/y NSA**. Core and re-fetched to confirm.

- **CARRIED FORWARD — versus consensus:** pre-print expectations circulating were headline +0.4% m/m / 3.4% y/y and core +0.4% m/m / 2.4% y/y. **Headline landed exactly in line; core ca**
- **Market-implied September hike odds around the print read ~70% for a 25bp move** — a *market price*, not an institutional estimate, reported for context and explicitly not used to move P
- **Data-hygiene note, logged:** several aggregator summaries of this print published within minutes carried figures inconsistent with the BLS release (for example a 3.1% core y/y). They were dis

Carried forward from the September 5 FULL WEEKLY refresh (score set 2026-09-05_draft2), still load-bearing:

★ ★ **NEW — August jobs report (BLS, primary, released Sept 4): nonfarm payrolls +162,000 vs. ~53-55,000 consensus; unemployment steady at 4.1%.** A sharp upside beat, corroborate

★ ★ **NEW — markets repriced September 15-16 FOMC hike odds higher off the jobs beat.** Point estimates vary by source/timestamp (roughly 60-66% hike probability cited across CNBC, F moved further toward pricing a hike, not away from it. Fed officials remain split: Chair Warsh reiterated the need to keep fighting inflation; Governor Waller said he'd lean toward holding if inf

★ ★ **NEW — same-day market reaction, Sept 4 (multi-source corroborated): 2-year Treasury yield +5.3bp to its highest level since January 2025;** Dow −271.86 pts (−0.51%) to 53,414.2

- **BTC fell ~2% same-day: $81,265.00 (Sept 3 close) → $79,676.60 (Sept 4 close)** (data/btc_usd_daily.csv) — consistent with a hawkish-surprise risk-off reaction; BTC $79,646.11 Sept 5.

COINPICKS

- **Score decision:** this is a fresh, dated, primary-sourced print (not odds drift alone), sized comparably to the Aug 22→28 catch-up cut for a comparable single dated catalyst — P re-rated down

Carried forward from the Sept 3 light daily catch-up (no new score set — nothing material found on any pillar that cycle):

- **Re-checked CME FedWatch and the H.4.1/data calendar; found no fresh primary print or news event dated Sept 2-3.** config/scores.json untouched; run.py blend re-run against fresh q

Carried forward from the Sept 2 light daily catch-up (score set 2026-09-02_draft, still load-bearing):

- **No new H.4.1 or data print found dated Sept 1-2.** September 15-16 FOMC market pricing (CME FedWatch roughly 60% hold) continued the same post-Jackson-Hole drift already priced in
- **BTC traded at $76,581.44 on Sept 2** — down from $78,038.78 on Sept 1 (Bitstamp) — a real pullback, but driven by the Iran War Risk escalation covered in that pillar's report, not by anythin

Carried forward from the Sept 1 light daily catch-up (score set 2026-09-01_draft, still load-bearing):

- **CME FedWatch September hike odds read ~66% around 11:40am ET Aug 31** (Forbes/KuCoin), up from the ~60.4% CNBC read already priced into the Aug 31 baseline — the same intrada
- **No new H.4.1 or jobless claims release Aug 31-Sept 1** — Aug 31 was Labor Day, a US federal holiday; next H.4.1 is due Sept 3.
- **BTC traded at $78,038.78 on Sept 1** — down from $78,447.16 on Aug 31 (Bitstamp).

Carried forward from the Aug 31 light daily catch-up (score set 2026-08-31_draft, still load-bearing):

- **CME FedWatch September hike odds drifted to ~60.4% by Aug 31** (CNBC Jackson-Hole-analyst-roundup, up from ~56% Friday, Aug 28), continuing the same repricing already sized into

Carried forward from the Aug 29 full weekly refresh (still load-bearing):

- ★ **★ ADVERSARIAL CORRECTION — the abandoned Aug 28 draft's CME FedWatch September hike-odds figure (~35.4%→~45.7%) UNDERSTATED the real market move.** A dedicated a roughly 56-58% — Motley Fool quotes CME FedWatch directly at 57.5%; CNBC's own body text says "nearly 56%" (its "coin flip" headline rounds that down, it does not contradict it); a third in contradicted by this tighter high-50s cluster; figures of 59-60% seen elsewhere are within plausible range of later-day snapshots and roughly track the confirmed cluster. **Corrected character**
- ★ **★ CORRECTED this cycle — BTC's price action around the speech was NOT a stable tape.** The abandoned Aug 28 draft's framing ("stable tape... not one BTC visibly flinched") is corrected **Aug 29** (Bitstamp), a roughly 4%+ round-trip decline from the day's high through today. BTC did react to the speech, with continued downward drift into this cycle.
- ★ **★ NEW this cycle — initial jobless claims, week ended Aug 22 (DOL, primary, released Aug 27): 203,000 vs. 208,000 consensus,** down from the prior week's revised 207,000; continuing
- ★ **★ NEW this cycle — Fed H.4.1, week ended Aug 26 (federalreserve.gov, primary): reserve balances $2,924,936M (−$10,351M w/w); Treasury General Account $950,736M (−$2,876**
- **No new CPI/PPI release in this window** — next releases Sept 10-11, unchanged from the prior baseline. No public pushback found from any other Fed official on Warsh's hawkish tone this
- **Score decision:** the corrected, larger CME move justifies a deeper cut than the abandoned Aug 28 draft's 38/37/46/55/61 — P re-rated down to 36/35/45/55/61, concentrated on the 1mo/3r

Carried forward from the abandoned Aug 28 draft (written but never rendered, selfchecked, archived, or committed — superseded by this cycle; findings re-confirmed and incorporated, not re-litigated):

- ★ **Fed Chair Kevin Warsh's first Jackson Hole speech as Chair, Aug 28, 10:00am ET (federalreserve.gov, primary transcript, confirmed verbatim this cycle via direct fetch; corroborated** Implications for Payments and Policy." Exact quote, verified against the transcript: "And while this summer's PCE and CPI readings were better than expected, they do not tell me that underlyi discipline, not to a decision." **Note on framing:** the transcript does not contain the literal words "may need to raise rates" — that is a fair, standard journalistic paraphrase used independently May 22, 2026 succession).
- ★ **July PCE (bea.gov, primary, released Aug 26): headline +0.2% m/m, 3.7% y/y (0.1pp hot vs. consensus); core +0.2% m/m, 3.3% y/y (in line).** Consumer spending +0.2% m/m ($36.3B)
- **2-year Treasury yield rose to a roughly one-month high: confirmed +6.6bp to 4.29% intraday-close** (one source cites a peak of +9bp to 4.32%); the 30-year yield eased about 1.5bp; sto
- **BTC closed at $79,613.44 on Aug 28 (Bitstamp)** — this price point is now superseded by today's $77,666.16 close (Aug 29); see the corrected price-action fact above.

Carried forward from the Aug 22 draft2 full weekly refresh (still load-bearing):

- ★ **The Jul 28-29 FOMC minutes' hawkish bloc runs wider than previously known (federalreserve.gov, primary, published Aug 19; corroborated by CNBC, Quartz, Newsquawk, goldsil** assessed that policy tightening would likely be necessary if inflation did not decline." Inflation cited: PCE 4.1% (May actual), core 3.4%; the June staff estimate was 3.7% headline / 3.3% core, "
- ★ **★ NEW this cycle — the 30-year Treasury yield hit 5.31-5.33%, a ~19-year high (highest since 2007), around Aug 17-18** (Bloomberg, CNBC, Axios). Driven substantially by fiscal/deficit optically with the hawkish minutes.
- ★ **★ NEW this cycle — equities sold off Aug 20:** S&P 500 −0.87% to 7,641.16; Dow −703.84 pts (−1.32%) to 52,759.21 (partly a ~9% Walmart-earnings-driven drop, not purely Fed-driven); Na
- ★ **★ NEW this cycle — CME FedWatch (September meeting) independently re-verified directly, cross-venue:** ~68-70% hold probability across multiple contemporaneous reads as of Aug the Aug 19 minutes landed, meaning the market already had the hawkish content priced in.
- ★ **★ DISCARDED — a separately-circulating claim of "93.6% September hike probability" was traced this cycle to a garbled data conflation.** It appears to be Kalshi's JULY meeting hold-
- **Jobless claims week ended Aug 15 (DOL, primary, released Aug 20): 206K, down 6K, vs. 210K consensus; 4-week average 204K.** Confirms the low-layoff, tight-labor trend already in th
- **Aug 22 score decision (superseded by this cycle):** the hawkish minutes detail and the noisy weak retail-sales print largely offset an already-priced rate-odds market — netted to a wash; P h
- **BTC closed at $77,266.84 on Aug 22 (Bitstamp)** — vs. $79,613.44 on Aug 28 and $77,666.16 on Aug 29 (see this cycle's facts above).

Carried forward from the Aug 22 draft1 catch-up cycle (independently re-confirmed, still load-bearing):

- **No new Fed H.4.1 release since the week ended Aug 19 (federalreserve.gov, primary, published Aug 20):** that remains the current release; the next H.4.1 is due Aug 27. No new CPI (nex
- **No new public remarks from Chair Warsh between the Jul 29 FOMC press conference and the Aug 28 Jackson Hole speech (see this cycle's facts above).**

Carried forward from Aug 20 (re-confirmed this cycle, still load-bearing):

- **FOMC minutes from the Jul 28-29 meeting confirm the known 9-3 hold vote and the Hammack/Kashkari/Logan dissent for an immediate 25bp hike.** Inflation risks characterized as t future deliberations, but no near-term QT-pace signal was given.
- **Offsetting signal, re-confirmed and expanded this cycle: CME FedWatch showed the odds of a September 16 hold rising to ~65% post-minutes, up from a pre-minutes ~50/50** (Ne that level, i.e. the market stayed priced for a hold through the minutes' release.

Carried forward from Aug 16 (still load-bearing):

- **July retail sales (Census Bureau, published Aug 14, primary release): headline −0.6% m/m vs. +0.1% expected, core (ex-auto) −0.2% m/m, still +5.0% y/y.** The first monthly decline i noisy dovish-leaning counter-signal — per this pillar's own house discipline against chasing single prints, this alone doesn't move P.
- **Recalled for continuity, not re-scored:** the Aug 17 Empire State Manufacturing Survey surged to 20.6 vs. 11.0 consensus, the highest since 2022 — a hot beat cutting against the recent cool

Carried forward from Aug 13-14 (still load-bearing):

- **Fed H.4.1, week ended Aug 12 (federalreserve.gov, published 4:30pm ET Aug 13): reserve balances $2,944,059M, down $49,290M w/w; Treasury General Account $963,950M, up $**

Carried forward from Aug 12-13 (still load-bearing):

- **July CPI (BLS, published Aug 12): headline +0.1% m/m / +3.4% y/y; core +0.2% m/m / +2.5% y/y** — landed cool, exactly in line with consensus, drove the Aug 13 re-rate up.
- **Initial jobless claims, week ended Aug 8 (DOL/ETA, published Aug 13): 209,000 actual vs. 202,000 expected** — a genuine weak-side miss, 8-week high, the second trigger behind the Au

Carried forward from Aug 8-10 (still load-bearing):

- **Initial jobless claims for the week ended Aug 6 (published Aug 8): 262,000 actual vs. 263,000 expected** — essentially in line with consensus, noise rather than a surprise.

Carried forward from Aug 8-9 (still load-bearing):

★ **BLS Employment Situation, July 2026: nonfarm payrolls FELL 23,000** versus a consensus estimate of ~83,000 (WSJ-sourced; a competing 95,000 Barron's-sourced figure is less corroborat convergent CNBC, Yahoo Finance, Kiplinger, and CBS News reporting, all citing the same BLS release — meets the 2+ independent sufficiency bar.

- **May and June payrolls revised down a combined 103,000** — confirmed, matches the light draft exactly. (One Forbes-sourced fetch this cycle produced a garbled "-252,000 total" figure tha
- **Unemployment ticked down to 4.1% from 4.2%,** but the labor-force participation rate fell to 61.4% — its lowest level in over five years.

★ ★ **NEW this cycle — average hourly earnings rose just 3.2% y/y,** down from 3.4% in June and now trailing CPI (3.5% June y/y) — real wages softening, a detail the same-day light draft did

★ ★ **CORRECTED — CME FedWatch September-hold odds check out at ~56%,** not the light draft's ~60%. Two independent corroborating sources (CBS News, a Forbes-sourced pull) both ci pricing — a different instrument, labeled separately per research discipline) shows 65% hold.

★ ★ **NEW this cycle — real forecaster disagreement on magnitude:** Bank of America explicitly called the report "a bit dovish on net" but is **sticking with its call for 75bp of hikes in 2026** (S says the **Aug 12 CPI print** — inside this pillar's own 1-month window — will be the deciding factor for September, not this jobs report alone.

★ **Jobless claims for the week ended Aug 1: 199,000, 4-week average 198,750** — the lowest of this cycle, in real tension with the weak payrolls print. Points to "low-hire, low-fire" stagnation

Carried forward from Aug 7 (still load-bearing):

★ **Fed H.4.1 for the week ended Aug 5 (federalreserve.gov, direct pull):** total assets $6,748,567M, reserve balances $2,993,349M — reserves +$8.78B w/w, TGA -$3.45B w/w. An unremarkabl

Carried forward from Jul 30-Aug 5 (still load-bearing):

★ ★ **CONFIRMED, PRIMARY SOURCE — the FOMC held rates at 3.50-3.75% on Jul 29, 2026, on a 9-3 vote.** Three regional-bank presidents — Beth Hammack (Cleveland), Neel Kashkari (M **member dissent since September 2016**. No SEP/dot plot this meeting (not a projections meeting; next SEP is Sept 15-16, 2026).

★ **Chair Warsh's press conference was unusually combative and offered no forward guidance:** "there is no soft inflation target... not on this committee's watch"; "the five-plus years of infla −2.19%, Nasdaq −1.74%); the 30-year Treasury yield rose to 5.21%, its highest since July 2007 — a "bear steepener" consistent with rising inflation-credibility concern.

★ ★ **CONFIRMED, PRIMARY SOURCE — jobless claims for the week ended Jul 25 came in at 197,000** (DOL/ETA release, fetched and read directly), a genuine +9,000 increase; the prior wee adjusted claims fell only 9.2% w/w versus the 13.3% seasonal factors expected — meaning the "lowest since 1969" framing was real but mechanically set to partially reverse, exactly as it did.

★ **The September hike-odds figure could not be reconciled to a single number this cycle, despite four direct attempts.** Live pulls produced 55.8% (Fox Business, Jul 28), 62.4% (Investing.c only defensible takeaway; no re-rate rests on a specific point figure.

- **H.4.1 balance sheet: no new release found for the week ended Jul 29** as of this check (normal Thursday-afternoon publication timing); the most recent confirmed release remains Jul 23 (w
- **Bank of America projects three 25bp hikes in 2026** (to 4.25-4.50%) — single-source (Forbes, citing BofA), flagged not scored.
- **Carried forward, not re-verified this cycle:** June CPI (-0.4% m/m) and PPI (-0.3% m/m), both BLS-primary-confirmed in a prior cycle; Warsh's Jul 14/15 congressional testimony; the June FO disinflation trend.
- **The labor market cracked in slow motion, then partially un-cracked this week** — June payrolls +57K vs ~115K consensus (carried forward); this cycle's 197K claims print, while up from 18
- **Policy rate and balance sheet: 3.50-3.75%, next FOMC (with SEP/dot plot) is Sept 15-16, 2026.** Fed communications blackout ended with the Jul 29 meeting; watch for the first round of
- **BTC closed at $64,706.50 (Jul 30)** — holding up despite the hawkish FOMC surprise and confirmed equity/bond-market risk-off reaction. **Updated: BTC closed at $64,661.55 on Aug 5**, ess

The Prize

Illustrative only — not price targets, not advice

The canonical anchor: **2020-21 ZIRP + QE** ran BTC ~$3,800 → $69,044 (~15–18×) — a unique COVID/zero-rate/open-ended-QE setup, not a repeatable base case. The **2024-25 cuts** ran ~$60 any Fed-specific catalyst this week (the Sept 16 FOMC hike and hawkish SEP are already priced into this pillar's current committed score; nothing new since then moved this pillar). From here,

Discount it hard, twice. First: easing is not an automatic catalyst — the last cycle topped on a non-Fed shock. Second: the Sept 16 hike and its hawkish SEP already reflect a real repricing of nea reaction function, and the Oct 27-28 FOMC is the real next test. A major forecaster (BofA) has been calling for 75bp of 2026 hikes since early August and no longer looks like an outlier after th

The Other Side

The strongest honest case my re-rate — even the moderated one — is still wrong

- **This re-rate might not be conservative enough a read on BofA's stance.** Bank of America has been calling for 75bp of 2026 hikes since early August, straight through the cool CPI print thi
- **Warsh explicitly avoided committing to a reaction function — this report may be over-reading a rhetorical signal into a real repricing.** The CME odds move is real, quantified, and no September hike, this cycle's move could unwind as fast as it appeared.
- **The adversarial-verification pass caught one error in the abandoned draft's CME figure — it may not have caught all of them.** This cycle corrected 45.7% to the high-50s cluster, but th cleaner pull could still move the number again.
- **I may still be over-reacting to one speech and one data print.** This pillar has already seen a claims number ("lowest since 1969") partially reverse the following week on a seasonal-adjustm once the actual September data (another CPI, another jobs report) lands.
- **The FOMC's own hawkish dissent hasn't gone away and now looks more, not less, mainstream.** Three regional presidents voted for an immediate hike on Jul 29, and Warsh's Aug 28 ren
- **Downward revisions can themselves get revised.** The BLS's own benchmark process regularly adjusts prior months; May-June's combined 103,000 downward payroll revision is a real, prima
- **Weak labor data plus a still-elevated inflation/oil backdrop (Iran-driven, and this cycle's Iran pillar got worse, not better) is stagflation risk, not straightforwardly bullish.** If the Fed

Treasury par yield curve (PRIMARY, home.treasury.gov), Oct 29 → Oct 30: 2y 4.73 → 4.65, 10y 4.98 → 4.94, 30y 5.32 → 5.31.
LANDED Oct 29, 8:30am ET — PRIMARY (bea.gov), in line on inflation, beat on growth	**September PCE:** headline +0.5% m/m / 3.6% y/y; core +0.3% m/m / 3.1% y/y — both exactly at the pre-release consensus. **Q3 GDP advance:** +3.4% annualize annualized.
FIRED Oct 16 — DOVISH, PRIMARY — this cycle's decisive fact	**Fed Chair Kevin Warsh, speaking alongside IMF MD Georgieva at an IMF event in Bangkok:** declined to preview the Fed's remaining 2026 decisions, explic independent outlets (CNBC, Benzinga, Yahoo Finance, Zerohedge, Seoul Economic Daily, two independent finance-substacks). MARKET PRICES (CME FedWatch, ~33–47% to ~13–15% (CME FedWatch) / ~14% (Polymarket); Dec 9 odds (~74–79%) unchanged within the already-priced band
FIRED Oct 14, 8:30am ET — HAWKISH, PRIMARY — this cycle's decisive fact, extending the Oct 8 row below	**September 2026 CPI (BLS):** headline +3.7% y/y (vs. 3.6% consensus, up from 3.4%), core +2.6% y/y (vs. 2.5% consensus, up from 2.4%), +0.6% m/m headline n Corroborated via CNBC, Advisor Perspectives, Kiplinger, USInflationCalculator. MARKET PRICES (Kalshi/Polymarket, labelled distinctly): Oct 28 hike odds rose to elevated further to ~75–85% (noisy, no single figure settled)
FIRED Oct 8 — HAWKISH, PRIMARY, adversarially verified — the decisive fact this print extends	**Fed Governor Christopher Waller, Istanbul Economic Forum:** further rate increases are the likely next step if data keep behaving as expected; inflation has ru in H2 2026; explicitly cited Iran-linked energy costs and AI-buildout demand as upside inflation risks — a genuine hawkish *shift* from his dovish spring-2026 po print (+29,000) as still "solid and stable," and said hikes needn't come at consecutive meetings, flagging **December (Dec 8–9), not Oct 27–28,** as the next hike Dailysabah, HousingWire, Newsquawk, Bloomberg Tax)
Checked Oct 8 — PRIMARY, DOL, partially offsetting context, not independently scored	**Initial jobless claims, week ended Oct 3 (released Oct 8): 197,000**, with the prior week (ended Sept 26) revised UP 197,000→199,000. Claims have held below sourced wire across multiple independent outlets
Checked Oct 8 — MARKET PRICES, not institutional estimates, labelled distinctly	CME FedWatch-style odds for Oct 27–28 barely moved post-Waller (~78–82% hold vs. the prior cycle's reported 77–81%); December (Dec 8–9) hike-implied odd depending on source) but directionally higher than the prior cycle's "mid-60s to mid-70s%" read. The 10-year yield was roughly flat (~5.23% Oct 8 vs. ~5.24% O Iran-strike comment and a solid 30-year auction
FIRED Oct 2 — PRIMARY (bls.gov), and it undercuts this pillar's own hawkish rationale	**September payrolls +29,000** against an ~84,000 consensus; **unemployment up to 4.2%**; average hourly earnings +0.1% m/m and +3.0% y/y; participation 6 −10,000. **Governor Barr had said on Sept 29 that "risks to the labor market have receded"** — three days later the data said otherwise. CME FedWatch Octo *prices*). **The counterweight, and it matters:** initial claims were 197,000, so layoffs are NOT rising — this is a hiring freeze, not a firing wave
FIRED Sept 30 — PRIMARY (bea.gov), two releases pulling opposite ways	**August PCE undershot:** headline +0.3% m/m and **3.4% y/y** against a ~3.7% consensus; **core 3.0% y/y**; real PCE +0.6%. Caveat stated: the release embeds the to January 2021. **The same day, Q2 GDP was revised sharply UP to 2.2%** from 1.5% (+0.7pp), with real GDI +2.6%
Checked Oct 1–3 — PRIMARY, and two-sided	**Vice Chair Jefferson, Oct 1:** "My colleagues and I will need to come to our own judgment, **which may take more time**" — a sitting Vice Chair slowing the pac **30** while DGS2 fell to 4.78% by Oct 1 — a steepening that prices less near-term tightening and more long-run inflation risk. **H.4.1:** reserve balances +$17,897M
CORRECTED Oct 3 — a claim this pillar had been repeating is FALSE and is withdrawn	**Jobless claims are NOT at or near a 57-year low.** The DOL release contains no "lowest since" language — the strings "lowest" and "1969" do not appear in it with 189,000 (Jul 18) and 190,000 (Apr 25) both lower. The series minimum is 162,000, Nov 1968
FIRED Sept 25 — HAWKISH, PRIMARY, this cycle — the most consequential single figure	**University of Michigan final September survey:** year-ahead inflation expectations jumped 4.0% → 4.6%, and **LONG-RUN expectations ticked 3.3% → 3.4%** 48.1 (−7.0% m/m)
FIRED Sept 24 — HAWKISH, PRIMARY, arithmetic checked	**Fed H.4.1, week ended Sept 23:** reserve balances $2,930,193M from $3,013,794M — **−$83,601M in one week**, the largest drain this report has logged — with
FIRED Sept 24 — HAWKISH-ADJACENT, PRIMARY series	**DOL initial jobless claims, week ended Sept 19: 197,000**; prior week revised UP to 198,000; 4-week average 202,250
FIRED Sept 23 — HAWKISH, PRIMARY release retrieved	**S&P Global flash US PMI:** composite 58.4 (strongest since July 2021), manufacturing 57.0, services 58.7 — paired with **the fastest input-cost inflation since** input-prices index" figure in secondary coverage is NOT in the release and is excluded
FIRED Sept 23 — HAWKISH, PRIMARY, verbatim from the Fed's own PDF	**Governor Michael S. Barr, "A Long-Term View on the Costs of Shelter," 10:05 a.m. EDT:** "inflation is above our 2 percent target and not clearly trending tow have increased, while risks to the labor market have receded … **In my base case, further policy adjustments are likely to be needed.**" All three sentences cor item were themselves wrong and are withdrawn
FIRED Sept 22 — hawkish, but DOWNGRADED on sourcing this cycle	**Boston Fed President Susan Collins:** "I now see an increased likelihood of future scenarios in which inflation remains notably above 2%." Quote verbatim-conf and all corroboration traces to one Reuters story — **effectively single-agency**
FIRED Sept 24 — hawkish, but MATERIALLY RECHARACTERISED	**NY Fed President John Williams** at NIESR London was *describing investors' forecasts* — market pricing made another year-end hike "likely" — then added "Tha **have to see.**" No primary transcript exists; genuinely independent reporting is TWO outlets, the rest being one Reuters wire
RESOLVED Sept 30, 2026 — HARD DATA LANDED, read as two-sided	**August PCE (core 3.0% y/y, but ~0.15-0.2pt of the apparent cooling is a telegraphed BEA methodology change, not fresh disinflation) and the Q2 GD** the two offset rather than confirm or reverse the Sept 23-26 hawkish bundle
Watch — October 27–28, 2026 FOMC	**MARKET PRICES, not institutional estimates:** CME FedWatch odds of another 25bp hike moved ~53% (Sept 23) → **77.5% (Sept 24)** → ~70–76% (Sept 25). Tr this report's earlier "~51% odds of a cut by June 2027" line
Checked Sept 24–26 — NEUTRAL / counter-signal, logged	The Fed's own **SCOOS** (Sept 24, primary) shows dealer terms "basically unchanged, on net, across all counterparty types." Census **new home sales rose to 684,** unchanged. **No Fed speeches Sept 24, 25 or 26**
FIRED Sept 22 — mildly hawkish, primary, this cycle	**Philadelphia Fed Manufacturing Business Outlook Survey (released Sept 17, philadelphiafed.org primary, 5+ corroborating outlets): prices paid 40.9− 47.4→37.8 and employment fell 27.9→11.8.** New York Fed Empire State Manufacturing Survey (released Sept 15, primary, fetched directly): prices paid 58.1→ general business conditions fell 20.6→7.6

Checked Sept 19, no change — confirmatory, FULL WEEKLY refresh	**Jobless claims (DOL, primary, released Sept 17): 196,000 for the week ended Sept 12, lowest since mid-July; four-week average 203,250.** Housing start primary); existing-home sales −2.0% m/m (NAR, Sept 10, primary) — single-month, internally mixed (single-family starts +7.6%)
Watch — October 27-28, 2026 FOMC (next scheduled meeting)	**CME FedWatch prices a 55.1% probability of another 25bp hike at the October meeting (as of Sept 17, 2026)** — up from 0% cut / 37.6% hold / 62.4% hik the Sept hike at roughly 89-94%/54% pre-decision; Polymarket prices a cut by the June 2027 meeting at roughly 51%
Logged Sept 16-19 — governance context, not scored	**President Trump and senior administration officials (the Vice President, the Treasury Secretary, an economic counselor) publicly pressured the Fed ag after Chair Warsh voted with a unanimous FOMC (12-0) to hike anyway.** Well-corroborated across 8+ independent outlets (CNBC, CNN, NBC News, MS NO
Checked Sept 18, no change	**A Sept 18 Motley Fool piece discusses "the most important number" in the Fed's Summary of Economic Projections** — commentary on the same federa source, not a new dated fact
FIRED Sept 16, 2:00pm ET / confirmed Sept 17 — HAWKISH, primary, this cycle	**Sept 16 FOMC: 25bp hike to 3.75%-4.00% (12-0), first hike in 3 years — largely priced (~92.5% CME odds pre-meeting), not scored alone.** The SEP/dot expecting another 2026 hike, 12 of 18 pencilling in one more 25bp move by year-end to 4.125%; slower 2027-2028 descent projected, neutral rate anchored ne Coinpedia, coingape. BTC reaction muted (~$76,300 → drifted back near $76,000-198).
FIRED Sept 10, 8:30am ET — HAWKISH, confirmed primary	**August PPI (BLS, primary): +0.4% m/m (in line), but +5.4% y/y — the highest 12-month reading of 2026, up from 4.8% in July; core PPI +4.6% y/y (fr** Washington Times. Final-demand energy +4.2% m/m, diesel fuel +24.1% — plausible early pass-through of the Iran-war oil shock (Brent $106-108/bbl, highest
FIRED Sept 11, 8:30am ET — resolved (carried forward)	**August CPI (BLS, primary):** headline +0.4% m/m/3.4% y/y, core +0.3% m/m/2.4% y/y — a tenth cooler than consensus on core
FIRED Sept 4, 8:30am ET — HAWKISH, confirmed primary, this cycle	**August jobs report (BLS, primary): nonfarm payrolls +162,000 vs. ~53-55,000 consensus, unemployment steady 4.1%.** Corroborated by CNBC, Yahoo Fi
Checked Sept 3, no change	**Re-checked CME FedWatch and the H.4.1/data calendar; nothing material found dated Sept 2-3**
Checked Sept 2, no change	**No new H.4.1 or data print found dated Sept 1-2;** September 15-16 FOMC market pricing (CME FedWatch roughly 60% hold) continues the same post-Jacks
Logged Aug 31, 11:40am ET — drift, not independently trigger-worthy	**CME FedWatch September hike odds continued drifting to ~66%** (Forbes/KuCoin), up from the ~60.4% CNBC read the Aug 31 baseline used
RESOLVED — Sept 15-16, 2026 (carried forward, see the FIRED row at top)	FOMC hiked 25bp as the corrected CME FedWatch read anticipated, with a hawkish SEP/dot plot on top
FIRED Aug 28, 10:00am ET — HAWKISH, confirmed primary; CORRECTED this cycle	**Fed Chair Warsh's first Jackson Hole speech as Chair** (federalreserve.gov primary, verbatim-confirmed; CNBC, PBS, Reuters/investing.com, CNN, Yahoo Finan trends have meaningfully improved"; media paraphrase (not a direct quote) that the Fed may need to raise rates; avoided forward guidance/reaction-function c
Fired Aug 27 — mildly hawkish-adjacent, primary, this cycle	**Initial jobless claims, week ended Aug 22 (DOL primary): 203,000 vs. 208,000 consensus,** down from the prior week's revised 207,000; continuing claims 1
Fired Aug 26 — routine, primary, this cycle	**Fed H.4.1, week ended Aug 26 (federalreserve.gov primary): reserve balances −$10,351M w/w to $2,924,936M; TGA −$2,876M w/w to $950,736M**
FIRED Aug 26 — modestly hawkish, primary (carried forward from the abandoned Aug 28 draft)	**July PCE (bea.gov primary):** headline +0.2% m/m/3.7% y/y (0.1pp hot), core +0.2% m/m/3.3% y/y (in line)
Fired Aug 19, 2:00pm ET — confirmed hawkish-but-already-priced (carried forward)	**FOMC minutes (Jul 28-29 meeting), federalreserve.gov primary:** hawkish bloc wider than the three named dissenters ("several participants" beyond them fa necessary)
Logged Aug 17-18 (carried forward)	**30-year Treasury yield hit 5.31-5.33%, a ~19-year high** — driven substantially by fiscal/deficit concerns, not purely Fed repricing
Fired Aug 20 (carried forward)	**Equity selloff, partial Aug 21 recovery** — attributed to the hawkish minutes and rising long yields
Fired Aug 20, confirmed Aug 22 (carried forward)	**Initial jobless claims, week ended Aug 15: 206K vs. 210K consensus** (modest hawkish beat, 4-week average 204K); prior week (Aug 8) revised up to 212K fro
Fired Aug 14, logged Aug 16 (carried forward)	**July retail sales:** headline −0.6% m/m vs. +0.1% expected, core −0.2%, still +5.0% y/y — first decline in nine months, steepest since May 2025, broad-based wi
Fired Aug 13, 4:30pm ET (carried forward)	**Fed H.4.1, week ended Aug 12:** reserve balances −$49,290M w/w to $2,944,059M, TGA +$56,626M w/w to $963,950M
Fired Aug 12-13 (carried forward)	**July CPI landed cool/in-line; jobless claims (week ended Aug 8) missed weak at 209K vs. 202K expected**
Fired Aug 7, re-confirmed independently — DOVISH, moderated (carried forward)	**BLS July jobs report:** payrolls fell 23,000 vs. ~83,000 expected, unemployment 4.1% on a falling participation rate, May/June revised down a combined 103,000
Fired Jul 29 — HAWKISH, confirmed primary (carried forward)	**FOMC held 9-3**, three regional presidents dissenting for an immediate hike — first unified 3-member dissent since Sept 2016; Bank of America still projects 75b
RESOLVED — Sept 15-16, 2026 (carried forward)	FOMC hiked, confirming the corrected, larger hawkish repricing this cycle's Aug 29 re-rate anticipated
Ongoing	Iran/Hormuz oil-inflation risk — see Iran War Risk pillar for the current read

The flip line, updated Oct 1 — RESOLVED, and it came back two-sided, not a confirmation. The test this pillar set for itself was whether "the next hard CPI/PCE/PPI print or FOMC communication confirms the **30: August PCE and the Q2 GDP third estimate.** Core PCE printed 3.0% y/y — but a telegraphed BEA methodology change (pre-announced June 2026) mechanically accounts for roughly 0.15-0.2 points of that a **together, clears the sufficiency rule for a further move in either direction** — so −4/−4/−3/−1/0 (vs. the Sept 23 baseline) stands as this cycle's read, held flat on the Oct 1 daily touch. A government shutdown rose, credit terms are unchanged, and the big reserve drain is mostly mechanical. Next watch: the Oct 27–28 FOMC.

Prior flip line, Sept 11: the Aug 13 cool CPI and weak claims print were the last genuine dovish confirmation this pillar found. Since then, the Aug 19 minutes' wider hawkish bloc, Warsh's Jackson Hole words, a h
CME/market-implied Sept 15-16 hike odds still cited in the ~56-60% range across sources — past coin-flip. Still not a confirmed pivot: Warsh explicitly declined to commit to a reaction function, and Fed officials re
delivers a hike, treat that as the real, final confirmation and re-rate down hard. If it holds or cuts despite this cycle's tone and odds move, treat that as evidence the hawkish rhetoric outran the committee, and re-ra

COMMITTED — AUTO-STAMPED NOVEMBER 2, 2026 · STAMPED BY: ALEX (AUTO-STAMPED) · 2026-11-02_draft (COMMITTED, AUTO-STAMPED NOVE SOURCE) CONFIRM THE PRICED DEC 9 HIKE · OCTOBER JOBS FRI NOV 6

P (2026-11-02_draft (COMMITTED, AUTO-STAMPED NOVEMBER 2, 2026), LIGHT DAILY touch; identical to 2026-10-31_draft, FULL WEEKLY refr October 24, HELD since, including today): 34 / 23 / 34 / 43 / 58 · Prior P (2026-10-31_draft): 34 / 23 / 34 / 43 / 58 · Change vs. prior set: 0 / 0 / 1yr −0.84 (Mild Bear) · 3yr +0.83 (Mild Bull) · Master (equal-weight), this cycle's blend: 1mo −1.96 (Bear) · 3mo −1.68 (Bear) · 6mo −0.60 (Mil (Neutral), versus −0.06 / +0.48 last cycle — the drift comes from Tokenization's 1mo/3mo re-rate (58→59, 65→66, on DTCC's Oct 28 go-live) a any window or either FINAL NUMBER variant · Leave-one-out range (equal-weight): −0.76 to +0.67 (−CLARITY −0.09 · −Iran War Risk +0.67 · Bitstamp direct)

November 2, 2026 — LIGHT DAILY touch (this pillar HELD FLAT; Tokenization re-rated up on 1mo/3mo, see that report): re-checked this pillar's trigger table against primary sources. Logged the thr PRIMARY, + Reuters + Scotsman Guide/24/7 Wall St); St. Louis Fed President Musalem, Oct 30: "Additional firming of monetary policy will be necessary, and soon" (Reuters + investinglive/24/7 Wall St); Rich estimate): ~85% just after the Oct 28 decision, back to ~73–76% by Oct 30 – Nov 1, inside the already-priced ~74–79% band. Treasury par yield curve (PRIMARY, home.treasury.gov), Oct 29 → Oct 30: 2y 4.7 time. Treasury refunding Wed Nov 4. October jobs report Fri Nov 6, 8:30 ET (bls.gov, PRIMARY). October CPI ~Nov 10. Stopgap CR through Dec 11 unchanged. **HOLD FLAT — nothing cleared the sufficie** stamp). THE FINAL NUMBER moves to -0.05 equal-weight / +0.49 horizon-weighted (from −0.06 / +0.48), both Neutral; master 1mo −1.96 / 3mo −1.68 / 6mo −0.60 / 1yr +1.16 / 3yr +2.84, no call band flip

November 1, 2026 — LIGHT DAILY touch (this pillar held flat; no qualitative pillar moved this cycle): re-checked this pillar's trigger table against primary sources via WebSearch. No new Fed-official r signal. **The Dec 9, 2026 FOMC hike-odds coverage gap flagged last cycle is now partially resolved:** multiple independent market-price sources, mostly dated Oct 28–31 (CME FedWatch-derived desk c labeled MARKET-PRICE throughout, not an institutional estimate. This sits within/around the already-priced ~74-79% band logged Oct 16 off Chair Warsh's remarks, and is not a large, well-corroborated m **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json was NOT touched this cycle — active_qual_set remains **2026-10-31_draft**, status DRAFT, unchanged, still a full weekly refresh awai 1mo P (60→61) — so THE FINAL NUMBER holds at −0.06 equal-weight / +0.48 horizon-weighted this cycle, the nudge too small to clear either headline's rounding, attributable entirely to that pillar's tape-

October 31, 2026 — FULL WEEKLY refresh (this pillar held flat; a deeper research pass run separately from, and after, this same day's light daily touch below): four independent, primary-source-fi into the baseline — confirms rather than exceeds consensus, not scored. No new Fed-official remarks were found dated Oct 29-31 from Warsh, Cook, Hammack, Williams, Barr, Collins, Bostic, or Logan. A st risk of data-release disruption ahead of the Nov 6 jobs report and Nov 10 CPI, but not a directional mover, not scored. **Research access note:** WebSearch ran without a tool-wide outage, but returned mat located either way for this specific window. This is a coverage gap for one data point, not a cross-pillar degradation (the FOMC decision, dissent composition, CR funding status, and jobs-report calendar w FedWatch/Polymarket odds before treating "no move" here as fully confirmed. **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json gained a new dated set this cycle, **2026-10-31_draf flat the result** — 2026-10-31_draft stays DRAFT, awaiting Alex's manual review. THE FINAL NUMBER holds at −0.06 equal-weight / +0.48 horizon-weighted, unchanged by this weekly checkpoint.

October 30, 2026 — LIGHT DAILY touch (this pillar held flat; no qualitative pillar moved this cycle): re-checked via WebSearch. October jobs (BLS Employment Situation) and October CPI are not yet flagged as approximate). No new Fed-official remarks or guidance were found dated Oct 29-30. Current government-shutdown status for this specific window could not be independently confirmed either **10-29_draft**, status COMMITTED (AUTO-STAMPED), unchanged from yesterday. The computed Bitcoin TA pillar did move, on the now-finalized Oct 29 close ($81,041.93 via GitHub Actions, up 1.3% from ye tape-composite move, not this pillar's own score.

October 15, 2026, LIGHT DAILY touch (score set 2026-10-15_draft), this version — RE-RATED DOWN, 33/26/36/44/58 → 31/23/34/43/58 (−2/−3/−2/−1/0). THE DECISIVE NEW FACT: the Septer core +2.6% y/y (vs. 2.5% consensus, up from 2.4%), +0.6% m/m headline matching estimates, driven by energy/gasoline (+9.1% m/m, +34.2% y/y). This is a hawkish beat on BOTH legs, extending — not me priced (Kalshi/Polymarket) Oct 28 hike odds, while roughly doubling to ~34% from a pre-CPI ~17%, still leave a hold (~66%) favored. 3mo takes the largest cut, −3, since the Dec 9 meeting sits inside that v driven headline) argues for persistent re-acceleration rather than a one-print spike. 12mo takes only −1, a smaller marginal effect at that horizon. 36mo HOLDS at 58: one print, however primary-sourced, d explicitly labelled and kept distinct from institutional estimates), no flip-line clause fired, and verification raised no unresolved inconsistency — **AUTO-STAMPED under Alex's delegated daily authority: s**

October 10, 2026 FULL WEEKLY refresh (score set 2026-10-10_draft), prior version — RE-RATED DOWN, 35/29/37/44/58 → 33/26/36/44/58 (−2/−3/−1/0/0), a partial reversal of the Oct 3 cycle 2026 — PRIMARY (federalreserve.gov), adversarially verified across five-plus independent outlets not used in the first research pass (FXStreet, Dailysabah, HousingWire, Newsquawk, Bloomberg Tax); every s economy strengthened in the second half of 2026; and he explicitly cited the Iran-conflict-linked energy shock and AI-buildout-driven demand as upside inflationary pressures — a genuine hawkish *shift* fr "solid and stable" despite the lower jobs number, and said rate hikes don't need to come at consecutive FOMC meetings — leaving room for a pause at the Oct 27–28 meeting while flagging December (th second corroborating primary source because it IS itself primary and multiply corroborated on content. **Also confirmed, not used to move P:** there is NO government shutdown and no data disruption — jobless claims, week ended Oct 3 (released Oct 8, primary, corroborated via a Reuters-sourced wire across multiple independent outlets): **197,000**, with the prior week (ended Sept 26) revised UP from 197, driver, and not independently scored. **Sizing:** 1mo takes only −2 because CME FedWatch-style pricing for Oct 27–28 barely moved despite Waller's remarks (roughly 78–82% hold odds, a market price, vers signal concentrates: sources on December hike-implied odds are noisy and not internally consistent (ranging roughly 62–84% depending on source) but agree directionally that implied odds drifted higher ~5.24% Oct 1) after an initial Waller-driven spike partially reversed following a Trump comment ruling out a US strike on Iran before the November midterms and a solid 30-year Treasury bond auction — n move these longer horizons — no primary data release at that range occurred. **Explicitly excluded this cycle, too weak/unreliable to use:** a single wire report's claim that Goldman Sachs might shift to fo directions by two low-quality aggregators and could not be resolved (FRED access was blocked this cycle) — no figure quoted; the exact H.4.1 reserve-balances dollar figure for the week ended Oct 7 could **refresh, categorically excluded from delegated auto-stamp authority regardless of move size, call-band stability, or how cleanly the sufficiency rule was satisfied — LEFT AS DRAFT, flagged for**

October 3, 2026 FULL WEEKLY refresh (score set 2026-10-03_draft2), prior version — RE-RATED UP, 27/25/34/43/58 → 35/29/37/44/58 (+8/+4/+3/+1/0), the largest move of that cycle and this came in at +29,000 against an ~84,000 consensus, with unemployment up to 4.2% and 60,000 of downward revisions (BLS, Oct 2) — directly contradicting Governor Barr's Sept 29 claim that "risks to the lab FOMC sits inside that window and a December hike remained the market's base case (roughly mid-60s to mid-70s percent); 6mo +3 on core PCE at 3.0% and softer wage growth; 12mo +1 only, since the 1 delegated auto-stamp authority regardless of move size — **LEFT AS DRAFT, never stamped, superseded by this cycle's further re-rate above.**

Sept 26 FULL WEEKLY refresh (score set 2026-09-26_draft3), this version — RE-RATED DOWN, 31/29/37/44/58 → 27/25/34/43/58 (−4/−4/−3/−1/0), the largest move of this cycle. This is a week by local text extraction of the Fed's own PDF — "inflation is above our 2 percent target and not clearly trending toward target in a timely way," "risks to achieving our inflation target have increased, while ri strongest private-sector growth since July 2021 with the fastest input-cost inflation since October 2022. **PRIMARY:** UMich's final September survey, year-ahead inflation expectations 4.0% → 4.6% and *long* logged here. **Two Fed voices were downgraded on sourcing rather than leaned on:** Williams was characterising *investors'* forecasts and hedged with "but we have to see," and Collins's warning traces en coin-flip to base case. Sized against precedent — Sept 4 (August jobs) took −4/−4/−2/−1/−1 and Aug 28–29 (Warsh) took −7/−6/−3/−1/−1 — so this sits inside the established range for a larger bundle th H2-2027, and 36mo holds at 58 because nothing dated bears on 2029. **The honest other side, and why the move is single-digit:** growth is strong and this is a growth *beat*, not a recession signal; layoffs basically unchanged; and the large reserve drain is substantially a mechanical TGA rebuild. **Stamp decision: COMMITTED BY ALEX, September 27, 2026, after his own manual review** — full weekly refre August PCE on Sept 30 is the first hard print since any of this, and if it comes in soft this is the first move to revisit.

Sept 24 draft (score set 2026-09-24_draft) — WRITTEN BUT NEVER DELIVERED; SUPERSEDED by the Sept 26 weekly above. It proposed 31/29/37/44/58 → 29/27/36/44/58 and its report edits claim **verification its evidence HELD UP in full** — both claims below are confirmed, and two later "corrections" to them were themselves wrong and withdrawn — so it is superseded because more evidence lar Barr, speaking at the Chicago Fed's Housing Affordability 2026 summit (10:05am EDT, Sept 23) — the full text was fetched and parsed directly from `federalreserve.gov` (`barr20260923a.pdf`), not read t risks to achieving our inflation target have increased, while risks to the labor market have receded." And: "In my base case, further policy adjustments are likely to be needed to ensure inflation comes down the strongest private-sector expansion since July 2021; manufacturing **57.0** (from 53.9, vs 53.6 expected), strongest since May 2022; services **58.7**. The line that matters here: **input costs rose at their faste** automated fetch, so those figures are carried on 5+ independent outlets reporting identical values (Newsquawk, investinglive, FXStreet, TradingEconomics, Sharecast, Seeking Alpha); one aggregator render *consistent with* already-known guidance rather than new information — the Sept 16 SEP already had 16 of 18 officials seeing at least one more 25bp hike this year — and the PMI's strength is genuinely tw and one Governor's base case say little about the 2027-2028 path those windows price. **Market prices, reported and explicitly not scored:** the 10-year Treasury yield rose more than 13bp to **5.104%** on S yield (FRED `DGS10`, Board of Governors) was fetched directly and its latest published observation is Sept 22 at 4.96% — FRED posts with a one-day lag, so the 5.104% figure rests on press reporting only, is estimates above. **Stamp decision: AUTO-STAMPED** — ordinary light daily touch, research capability fully available, sourcing clears the sufficiency rule, verification clean.

Sept 23 LIGHT DAILY touch (score set 2026-09-23_draft), prior version: checked for changes since the Sept 22 committed baseline. Three dated items found, none clearing the sufficiency bar: the 10-ye sourced (one aggregator citing CME, not independently pulled from CME's own site); and Fed Vice Chair Jefferson's Sept 22 speech at the NY Fed's Treasury Market Conference (primary, federalreserve.gov Powell speech located. **P HELD FLAT at 31/29/37/44/58.** This is an ordinary light daily touch, research capability was fully available (WebSearch clean), no window moved, and the master call band did not

Sept 22 LIGHT DAILY touch (score set 2026-09-22_draft), prior version: a targeted single-pillar follow-up, not a full four-pillar pass — CLARITY Act, Iran War Risk, and Tokenization are carried forward u review: the Philadelphia Fed Manufacturing Business Outlook Survey (released Sept 17, primary source page confirmed at philadelphiafed.org, 5+ independent corroborating outlets) showed general activit directly from newyorkfed.org) showed general business conditions cooling sharply to 7.6 from 20.6 while **prices paid jumped to 63.1 from 58.1** — the highest since July 2022 — and **prices received rose** and selling-price pressure both accelerating to multi-month/multi-year highs) clears the sufficiency bar — 2+ independent primary sources in the same input class, not a single-source claim. Kept to one po

pricing actually turned risk-on into Sept 18-19 (10-year backed off its 5.04% high to ~4.95%, BTC recovered) — reported as a market price, not scored, but the honest reason not to take this further. **P RE-R** price. Research capability fully available this cycle (WebSearch clean; WebFetch reached newyorkfed.org directly). **Stamp decision: per CLAUDE.md's delegated auto-stamp authority, this is an ordinary verification pass has not yet run.** No other pillar's data was touched this cycle.

Prior cycle (Sept 19 FULL WEEKLY refresh, score set 2026-09-19_draft): a full independent primary-source research pass (~15 targeted WebSearches, no capability degradation) re-checked every open thread. construction data (Census Bureau/HUD, primary, Sept 17) showed starts −2.6% m/m and permits −2.7% m/m, and NAR existing-home sales (primary, Sept 10) fell −2.0% m/m — a genuine but single-mont with Trump demanding rates be cut to "1% or less" after Chair Warsh voted with a unanimous FOMC to hike anyway — a governance/Fed-independence storyline, not new economic evidence, logged rath authority regardless of the size of the move (there, zero) — LEFT AS DRAFT, flagged for Alex's manual review; still awaiting that review as of this cycle.

Prior cycle (Sept 18 light daily touch, score set 2026-09-18_draft): re-checked — the Sept 16 FOMC dot-plot revision already drives this window's read in the current committed set; a Sept 18 Motley Fool pie **32/30/38/44/58.** Light daily touch, full research access, verification clean — **AUTO-STAMPED SEPTEMBER 18, 2026** per the runbook's delegated authority. Tokenization RWA is the only pillar that moved

Prior cycle (Sept 17 MERGE SET, 2026-09-17_draft2) — why there were two Sept 17 sets, and what actually differed: two independent runs researched that day: the cloud routine's, which committed and push Three of the four pillars were carried forward from it untouched. Its CLARITY and Iran readings rested on dated facts the local run did not independently surface (Sen. Kennedy's lame-duck remark, the Sena

This pillar is the one thing corrected, and the disagreement is narrow and factual. Both runs agree the hike was priced and the SEP is the mover; they differ on how far out it reaches. This run fetched 3.9%, 2029 at 3.6% and longer run 3.2%. The cloud set described the 2027–28 path qualitatively as "a slower, more cautious descent", put the long-run neutral cluster at 3.0% where the table's longer-run m about the path, it is a full year of expected easing deleted, and the 1-year window is exactly what the old 3.6% median was underwriting. Five-plus independent outlets lead on that same revision. So 3mo g

Why 44 and not lower. The strongest argument against this correction is not a number but a person: Chair Warsh submitted no dot at all — "I have refrained from offering any projections of my own, cons longer-run median is still 3.2%, so easing is deferred rather than cancelled; the SEP pairs the tighter path with 2.3–2.4% real GDP and a flat 4.1% unemployment rate; and the bond market's first move on th

One correction to an earlier committed note, logged here rather than edited there. The committed `2026-09-16_draft` note states that Thune filed the motion to reconsider on the CLARITY cloture v independent). Committed sets are never edited, so the attribution is corrected for the record here; no P value is affected.

Stamp decision: AUTO-STAMPED. Ordinary light daily touch, not a weekly refresh; research capability fully available, with both Federal Reserve primary documents fetched directly rather than read throug

Sept 16 light daily catch-up (score set 2026-09-16_draft), prior cycle: the FOMC decision, statement, SEP and dot plot were scheduled for 2:00pm ET that day and had NOT been released at run time (~ **(auto-stamped)."** Iran War Risk and CLARITY Act both moved that cycle on the Senate cloture failure and the IAEA/NPT developments — see those reports.

Prior cycle (Sept 12 FULL WEEKLY refresh, score set 2026-09-12_draft2): the week's deeper research turned up one genuinely new primary-sourced release — the August PPI (BLS, primary, released Sept 10, c energy costs (diesel fuel +24.1% alone), and core PPI actually undershot consensus (+0.3% m/m, or +0.2% m/m on a further core-ex-trade-services cut) — a mild disinflationary surprise that reinforces, rath ending Sept 5: 206,000, 4-week average 206,000) were steady and unremarkable. CME FedWatch-tracked Sept 15-16 hike odds read ~62-69% this week (as of Sept 10-11) — a market price, not used to mo resolved. A Sept 9 Marketplace piece characterizing Chair Warsh as withholding forward guidance ahead of the meeting is single-source, not a quantifiable dated event, and does not move P. The Sept 15- refresh — per the runbook, weekly refreshes are categorically excluded from delegated auto-stamp authority regardless of findings (the sufficiency rule was satisfied — primary source, 3+ independent out each report their own weekly research separately — see those reports.

Prior cycle (Sept 12 light daily catch-up, score set 2026-09-12_draft): re-checked — no new Fed speech or primary data release found since the Sept 11 CPI print. That morning's coverage of ~90% market-im figure was a market price, not used to move P under the house sufficiency rule. **P HELD FLAT at 34/33/44/54/60.** Light daily touch, no window moved, master call band unchanged anywhere (Neutral → N **stamped)."** Iran War Risk was the only pillar that moved that cycle — see that report.

Sept 11 light daily catch-up (score set 2026-09-11_draft), prior cycle: the August CPI print landed on schedule at 8:30am ET: BLS's own release (bls.gov, primary, fetched directly and re-fetched to confi gasoline 3.9%, accounting for over a third of the monthly increase, while shelter rose 0.3%. Against the consensus circulating pre-print (headline +0.4% m/m / 3.4% y/y; core +0.4% m/m / 2.4% y/y), headlin its own. It is tempered, not clean relief: headline accelerated from +0.1% to +0.4% and the acceleration is energy-driven — the same oil shock that fires the Iran pillar's "sustained Brent >$100" clause this c the mover. Cross-source caution logged: several aggregator summaries of this print circulating within minutes carried figures inconsistent with the BLS release (e.g. a 3.1% core y/y) — discarded in favour o 54/60, because one print a tenth off consensus does not move a multi-year regime read. Note the direction: this is the first upward move in this pillar since Aug 13, and it only partly offsets the Sept 5 cut. L **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."** Iran War Risk also moved this cycle, down, as its Brent flip-line clause fired — see that report.

Sept 10 light daily catch-up (score set 2026-09-10_draft), prior cycle: re-checked — the Aug CPI release (due Sept 11) and the Sept 15-16 FOMC meeting both remain pending per BLS/Fed calendars; r Bull → Mild Bull horizon-weighted) — so per the runbook's delegated daily auto-stamp authority, **this set is AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."** Iran War Risk is th

Prior cycle (Sept 9 light daily catch-up): re-checked directly against CME FedWatch-citing coverage — September hike odds read ~58.7%, consistent with the already-priced cluster; no new FOMC meeting,

Prior cycle (Sept 8 light daily catch-up): re-checked via WebSearch — no new Fed speech, data release, or FOMC commentary since Sept 3-4; the Sept 11 CPI print and Sept 15-16 FOMC meeting remained

Prior cycle (Sept 6 light daily catch-up): re-checked via WebSearch — no new Fed speech or data release since Sept 3-4; Sept 6 was a Saturday, markets and the Fed's calendar quiet. **AUTO-STAMPED SEPT**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch: Fed Governor Waller's genuinely dovish-leaning Sept 3 speech ("give disinflation a c with the Sept 5 cut. **HELD FLAT at 32/31/43/54/60. COMMITTED BY ALEX SEPTEMBER 5, 2026.** Iran War Risk, CLARITY Act, and Tokenization all held flat that cycle.

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED — AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scores.js **Sept 3**. Not corrected retroactively in scores.json — stamping is Alex's call.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat at 36/35/45/55/61; originally left as draft only because Iran War Risk's re-rate flipped the master call band, not for any reason in untouched that cycle.

Prior cycle (Sept 1 light daily catch-up) — carried forward for context: re-checked CME FedWatch odds and found continued drift, not a fresh shock: September hike odds moved to ~66% (Forbes/KuCoin, 11

Prior cycle (Aug 31 light daily catch-up) — carried forward for context: re-checked CME FedWatch odds and found continued drift, not a fresh shock: September hike odds moved from the ~56-58% cluster

Prior cycle (Aug 29 full weekly refresh) — carried forward for context: Fed & Macro re-rated down further that cycle than a same-day catch-up draft written August 28 (score set 2026-08-28_draft) reached — first Jackson Hole speech as Chair (federalreserve.gov primary transcript, Aug 28, confirmed verbatim this cycle via direct fetch; corroborated by CNBC, PBS, Reuters/investing.com, CNN, and Yahoo Finance) its CME FedWatch September hike-odds figure (~35.4%→~45.7%) understated the actual market move. Independent re-pull and cross-check instead clusters tightly in the high-50s — Motley Fool at 57.5% corrects the abandoned draft's "stable tape" characterization of BTC's reaction: BTC fell from above $81,000 pre-speech to a $79,613.44 close Aug 28, and continued to $77,666.16 by today. Two fresh, routi independently trigger-worthy. Together, the corrected, larger market move justifies a deeper cut than the abandoned draft reached: 1mo −7, 3mo −6, 6mo −3, 1yr −1, 3yr −1 versus the last committed bas

(That Aug 29 cycle was left as a draft solely because full weekly refreshes are categorically excluded from delegated daily auto-stamp authority, regardless of move size — not for any evidentiary reason; every w

The prior committed scores were **34 / 33 / 44 / 54 / 60** (2026-09-16_draft), re-rated down to **32 / 31 / 42 / 54 / 60** (2026-09-17_draft, cloud) and corrected further to **32 / 30 / 38 / 44 / 58** (2026-09-17_d **17, Sept 18)** — nothing this cycle cleared the sufficiency bar to move it further — **AUTO-STAMPED SEPTEMBER 18, 2026.**

sources, no figure settled); 6mo −1, since the 10-year yield was roughly flat (~5.23% Oct 8 vs. ~5.24% Oct 1) after an initial Waller spike partly reversed on a Trump Iran-strike comment and a soli
Explicitly excluded: an internally-inconsistent single-wire Goldman Sachs "two more hikes" claim (the same article keeps Goldman's base case at one December hike); a 2-year Treasury yield figu

schedule occurrence is used, as "no shutdown" evidence). **Stamp decision: this is a FULL WEEKLY refresh, categorically excluded from delegated auto-stamp authority regardless of move** (Neutral), versus −0.08 / +0.48 on the October 10 daily-sync reading — no call band flipped anywhere. BTC $82,616.56 (Oct 9, 2026 close, GitHub Actions data relay, unchanged).

October 10, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged), earlier same-day check, superseded by the FULL WEEKLY refresh above: re-checked this pillar's trigger t the Dec 11 continuing resolution (signed Sept 2) holds, so no data-release disruption. **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched at the time; active set r direction but disagreed on size (see My Decision) — superseded later the same day once Waller's speech was found and researched in full.

October 9, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged): re-checked this pillar's trigger table against primary sources via WebSearch. No new scheduled Fed speech or release disruption. **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudica

October 8, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged): re-checked this pillar's trigger table against primary sources via WebSearch. No new scheduled Fed speech or disruption. **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudication of t

October 7, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged; note: no Oct 6 touch landed, gap flagged for Alex, this entry covers the delta since Oct 5): re-checked th shutdown — the Dec 11 continuing resolution (signed Sept 2) holds, so no data-release disruption. **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched; active set direction but disagreed on size (see My Decision).

October 5, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged): re-checked this pillar's trigger table against primary sources via WebSearch. No new scheduled Fed speech or **HOLD FLAT — nothing cleared the sufficiency rule.** config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudication of the diverger

October 4, 2026 — LIGHT DAILY touch (quant-only; qualitative set unchanged): re-checked this pillar's trigger table against primary sources via WebSearch. No new scheduled Fed speech or **sufficiency rule.** config/scores.json untouched; active set remains **2026-10-03_draft2**, still status DRAFT and still awaiting Alex's adjudication of the divergence against the independently-researc

October 3, 2026 — FULL WEEKLY refresh (2026-10-03_draft2), LEFT AS DRAFT: RE-RATED UP, 27/25/34/43/58 → 35/29/37/44/58 (+8/+4/+3/+1/0) — the largest move of this cycle, ar and September payrolls came in at +29,000 against ~84,000 expected with unemployment up to 4.2% and 60,000 of downward revisions (BLS Oct 2) — directly contradicting Barr's Sept 29 claim **points:** the Dec 8–9 FOMC falls inside this window and a December hike remains the base case (roughly mid-60s to mid-70s percent), so the cycle is *deferred by about six weeks, not ended*. **6mo 3** a steepening like that is a structural drag no single month of cooler data fixes. **36mo held at 58:** nothing structural changed. **Why not more:** Barr re-stated the full hawkish case on Sept 29 — be **Corrections this cycle:** the "claims near 57-year lows" claim is false and is withdrawn (197,000 is not even 2026's lowest); two Barr quotations had been truncated while presented as verbatim and

- **Oct 2 light daily touch (quant-only; qualitative set unchanged):** re-checked this pillar via WebSearch for any new scheduled Fed speech or data release. None found for Oct 1-2; the Sept 3 set remains 2026-09-26_draft3.
- **Oct 1 light daily touch (quant-only; qualitative set unchanged) — August PCE and the Q2 GDP third estimate, the test this report flagged as outstanding, both landed Sept 30, 202** methodology overhaul to the PCE price index on this same release (telegraphed since June 2026, independently pre-estimated by Goldman/TD Securities at roughly a 0.15-0.2 point drag on c corroborated upside growth surprise that cuts the other way (hawkish-for-growth). The two releases roughly offset rather than confirming or reversing this cycle's hawkish cut. A government Sept 24-25 in this window. **HOLD FLAT — the PCE/GDP data landed but nets out two-sided, clearing no sufficiency bar either way.** config/scores.json untouched; active set remains 202
- ★ **★ SUPERSESSION NOTICE, stated first because it affects how you should read everything else.** A `2026-09-24_draft` cycle proposed 29/27/36/44/58 on this pillar and edited this report house convention it is treated as not-delivered, drops out of the visible lineage columns, and its claims were re-verified rather than trusted. **On this pillar the abandoned draft was VINDICA** because it was wrong, but because four further pieces of evidence landed after it.
- ★ **★ NEW — Fed Governor Michael S. Barr, Sept 23 (PRIMARY, verbatim, local text extraction).** All three load-bearing sentences confirmed on p.2 of *barr20260923a.pdf*, including "**In my b** receded" sentence as ABSENT and moved the start time to 10:20 a.m.; the sentence **is present**, and the Board's own calendar confirms **10:05 a.m.** (10:20 was Vice Chair Jefferson at the NY Fe
- ★ **★ NEW — S&P Global flash US PMI, Sept 23, now PRIMARY.** The embargoed release was retrieved directly, upgrading this from secondary: composite 58.4, manufacturing 57.0, services 58 — it is vendor data and is not quoted.
- ★ **★ NEW — UMich final September, Sept 25 (PRIMARY).** Year-ahead inflation expectations 4.0% → 4.6%; **long-run 3.3% → 3.4%, ending three consecutive months at 3.3%**; sentiment 48
- ★ **★ NEW — DOL claims, Sept 24 (PRIMARY): 197,000** for the week ended Sept 19; prior week **revised up to 198,000** and the 4-week average now **202,250** — both correcting stale figures c
- ★ **★ NEW — H.4.1, Sept 24 (PRIMARY, arithmetic checked): reserve balances −$83,601M week-over-week** to $2,930,193M, with TGA +$100,056M. The largest one-week drain logged here
- **Two Fed voices, DOWNGRADED on sourcing after verification.** Collins (Sept 22) is quoted correctly but traces entirely to one Reuters story — **effectively single-agency**, and never scored reporting is two outlets. Both corroborate; neither could move P alone.
- **Why this clears the sufficiency bar:** one primary Federal Reserve source, verbatim from the Fed's own server and extracted locally rather than summarised, plus four further primary data rele
- **MARKET PRICES, reported and never mixed with the SEP:** the 10-year yield 4.96% → 5.11% → 5.18% (Sept 22–24), highest since 2007 — now **double-primary-confirmed** by the FRED CSV ~53% → 77.5% → ~70–76%; traders now price ~four more hikes by June 2027, retiring this report's stale "cut by June 2027" line. **A claimed FRED data-integrity trap was RETRACTED, not p**
- **Score decision: RE-RATED DOWN to 27/25/34/43/58** (−4/−4/−3/−1/0). **LEFT AS DRAFT, NOT AUTO-STAMPED** — a full weekly refresh is categorically excluded from delegated auto-stam reached directly.
- **What would change my mind, in order:** August PCE and Q2 GDP landed **Sept 30** and came back two-sided (see What Changed) — not itself a trigger; next is whether the Oct 27–28 FOMC

Carried forward — what changed in the September 23 light daily touch (2026-09-23_draft, committed, auto-stamped), for continuity:

- **10-year Treasury yield ~4.96-4.97% Sept 22**, essentially flat (CNBC, TradingEconomics — two-source, but a market price, not scored).
- **CME FedWatch: 59.7% odds of an Oct 28 hike** — effectively single-sourced (one aggregator citing CME, not independently pulled from CME's own site); does not clear the bar.
- **Fed Vice Chair Jefferson's Sept 22 speech** at the NY Fed's Treasury Market Conference (primary, federalreserve.gov) — discount-window/Treasury-market plumbing, off-topic for this pillar's
- No new jobless claims, PCE, CPI, retail sales, or housing data found dated in this window.
- **Score decision: HELD FLAT at 31/29/37/44/58.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 22 light daily touch (2026-09-22_draft, committed, auto-stamped), for continuity:

- ★ **★ NEW this cycle — Philadelphia Fed Manufacturing Business Outlook Survey, released Sept 17, 2026 (primary source page confirmed at philadelphiafed.org, 5+ independent cor** activity fell (52.9 from 73.6).
- ★ **★ NEW this cycle — New York Fed Empire State Manufacturing Survey, released Sept 15, 2026 (PRIMARY, fetched directly from newyorkfed.org):** general business conditions cooled
- **Why this clears the sufficiency bar:** two independent Fed district banks' own primary surveys, same week, same directional signal (headline cooling, input-cost/selling-price pressure re-acce
- **Why only one point:** both are soft/sentiment surveys whose own forward-looking components also fell, and market pricing turned risk-on into Sept 18-19 (10-year off its 5.04% high to ~4.9
- **CLARITY Act, Iran War Risk, and Tokenization carried forward unchanged** — not re-researched this cycle; this is a targeted single-pillar touch, not a full weekly pass.
- **Score decision: RE-RATED DOWN one point on 1mo/3mo/6mo, 32/30/38/44/58 → 31/29/37/44/58;** 12mo/36mo held. Sourcing clears the sufficiency rule — **AUTO-STAMPED: status c**

Carried forward — what changed in the September 19 FULL WEEKLY refresh (2026-09-19_draft, still draft), for continuity:

*FULL WEEKLY refresh, September 19, 2026 (score set **2026-09-19_draft**, draft, awaiting Alex's stamp) — checking for changes since the 2026-09-18_draft committed baseline. **This pillar HELD FLAT at 32/30/38/44/58.***

- ★ **★ NEW this cycle — jobless claims, week ended Sept 12 (DOL, primary, released Sept 17): 196,000**, the lowest since mid-July; four-week average 203,250. Confirmatory of the already-pr
- ★ **★ NEW this cycle — housing data (Census Bureau/HUD and NAR, primary, released Sept 17 and Sept 10): housing starts −2.6% m/m, permits −2.7% m/m, existing-home sales −2.**
- **Background color, not scored — University of Michigan preliminary September sentiment fell to 47.8 from 51.7,** near a record low, with 1yr inflation expectations up to 4.6%; predates

- **Market-price context, not scored:** the 10-year Treasury briefly touched a 19-year high near 5.04% before settling near 4.95%; CME FedWatch prices 55.1% odds of another hike at the Octob
- **Logged, not scored — a high-profile political story:** President Trump and senior administration officials publicly pressured the Fed against hiking, with Trump demanding rates be cut to "1 evidence.
- **Score decision: HELD FLAT at 32/30/38/44/58.** Full independent primary-source research this cycle; nothing cleared the sufficiency bar. FULL WEEKLY refresh — categorically excluded from

Carried forward — what changed in the September 18 light daily touch (2026-09-18_draft, committed, auto-stamped), for continuity:

- **CME FedWatch September hike odds continued drifting up, not a fresh shock:** ~56-58% (Aug 29 baseline) → ~57% (CoinSpectator/Bitcoin.com, Aug 30) → ~60.4% (CNBC Jackson-Hole-a
- **No new H.4.1 (next due Sept 3, last Aug 27) or jobless claims release landed in this window.**
- **BTC traded at $78,447.16 on Aug 31** — up from $77,666.16 on Aug 29 (Bitstamp).
- **Score decision: HELD FLAT at 36/35/45/55/61.** AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, now superseded), for continuity:

- ★ **★ ADVERSARIAL CORRECTION — the abandoned Aug 28 draft's CME FedWatch September hike-odds figure was wrong.** Corrected from ~35.4%→~45.7% to the real ~35%→~56-58%
- ★ **★ CORRECTED — BTC's reaction to the speech.** Not a stable tape: BTC fell from above $81,000 pre-speech to $79,613.44 (Aug 28 close), continuing to $77,666.16 by Aug 29.
- ★ **★ NEW — jobless claims, week ended Aug 22 (DOL, primary, Aug 27): 203K vs. 208K consensus.** Mildly hawkish-adjacent, not independently trigger-worthy.
- ★ **★ NEW — Fed H.4.1, week ended Aug 26 (federalreserve.gov, primary): reserves −$10,351M w/w to $2,924,936M; TGA −$2,876M w/w to $950,736M.** Routine continuation of the kn
- **Carried forward, re-confirmed, not re-litigated — Fed Chair Warsh's first Jackson Hole speech as Chair (Aug 28) and July PCE (bea.gov, Aug 26, 3.7% y/y headline, 0.1pp hot).** Both
- **Score re-rate: 43/41/48/56/62 → 36/35/45/55/61** — 1mo -7, 3mo -6, 6mo -3, 1yr -1, 3yr -1, deeper than the abandoned draft's -5/-4/-2/-1/-1 because the corrected market move is bigge
- **Status decision:** left as a draft, NOT auto-stamped, and flagged for Alex's manual review — this is a FULL WEEKLY refresh, categorically excluded from delegated daily auto-stamp authority re

Carried forward — the abandoned Aug 28 catch-up draft (2026-08-28_draft) was written but never rendered, selfchecked, archived, or committed, for continuity:

- **That draft re-rated P to 38/37/46/55/61** on the same Warsh speech and PCE print this cycle re-verifies, using a since-corrected CME odds figure (~45.7%, now corrected to ~56-58%) and a

Carried forward — what changed in the Aug 22 full weekly refresh (score set 2026-08-22_draft2), for continuity:

- **NEW — FOMC minutes' hawkish bloc wider than previously known:** beyond the three named dissenters, "several participants" also favored a hike and "many participants" saw tightening
- **NEW — 30-year Treasury yield hit 5.31-5.33%, a ~19-year high,** around Aug 17-18, driven substantially by the CBO's raised $2.1T FY deficit projection and heavy long-bond supply, not pu
- **NEW — equities sold off Aug 20** (S&P −0.87%, Dow −1.32% partly Walmart-driven, Nasdaq −1%) with a partial Aug 21 recovery, attributed to a mix of the hawkish minutes and rising yields
- **NEW — CME FedWatch/Kalshi/Polymarket/investing.com/defirate.com independently re-pulled and cross-checked directly:** September-hold odds cluster ~68-70% across all five, esse
- **NEW — a circulating "93.6% September hike probability" claim was traced this cycle to a garbled conflation with Kalshi's July-meeting hold odds (~92-93% hold) and confirmed n**
- **Re-confirmed, not new — jobless claims week ended Aug 15: 206K vs. 210K consensus, 4-week average 204K** (DOL, primary, Aug 20) — confirms the low-layoff trend already in the bas
- **Re-confirmed, not new — July retail sales miss (-0.6% m/m vs. +0.1% consensus, still +5.0% y/y)** — a genuine but noisy dovish-leaning counter-signal, per this pillar's discipline against
- **Score decision:** P held flat at 43 / 41 / 48 / 56 / 62 — the hawkish minutes detail and the noisy weak retail-sales print largely offset an already-priced rate-odds market; nets to a wash.
- **New pending triggers logged for the next cycle:** PCE (July data, bea.gov) due Aug 26; Chair Warsh's first speech as Chair at Jackson Hole, Aug 28, 10:00am ET, theme "Financial Innovation:
- **Status decision:** this score set was **left as a draft at delivery, not auto-stamped**, because it is a FULL WEEKLY refresh, categorically excluded from Alex's delegated daily auto-stamp authori refreshes). **COMMITTED BY ALEX August 23, 2026** after independent review.
