The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as full weekly refreshes on **August 8 and August 22, 2026**. Drafts were written **August 17, 18, and 20** but none was delivered, and an **August 21** session got partway through delivering the Aug 20 numbers into only 2 of 6 reports before stopping, also not delivered. A same-day **2026-08-22_draft** catch-up cycle independently re-verified the hold and was fully delivered — rendered, selfchecked, archived, and git-committed — but stayed uncommitted after a fact-check that cycle caught a materially false claim in the Iran War Risk pillar report; the same-day full weekly refresh that followed, **2026-08-22_draft2**, independently re-confirmed the hold again and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline: 32/47/58/82/92. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat, logged a Polymarket drift to 14%) but was never rendered, selfchecked, archived, or committed — treated as not delivered, superseded by this cycle. **This version — 2026-08-29_draft, a FULL WEEKLY refresh, the first deep multi-source research dive since Aug 22 — independently re-verifies everything again via a dedicated primary-source research pass, and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. The Sept 15 cloture-on-motion-to-proceed date remains the only scheduled floor action, reconfirmed by DeFiRate.com (Aug 27) and Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found Aug 22-29; both binding disputes (ethics/conflict-of-interest and stablecoin yield) remain fully unresolved; CFTC Chair Michael Selig, in an on-record Aug 20, 2026 speech (verified directly against cftc.gov), directed CFTC staff to explore a fallback crypto-market-structure rulemaking if CLARITY continues to stall — the CFTC's analog to SEC Chair Atkins' earlier unilateral-authority statement, logged as context, not used to move P; DeFiRate.com's Aug 27 pull shows Polymarket 13-14% and Kalshi 20-21%, both market prices, not institutional estimates, and insufficient alone to move P; and a "Sen. Tim Scott: 12-18 Democrats open" quote was traced to an **August 2025** story (a year old) and flagged as a likely search-artifact, explicitly NOT used. **No window moved and no call band flipped for CLARITY — this cycle is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, so 2026-08-29_draft was LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW. THIS VERSION — a light daily catch-up, score set 2026-08-31_draft, covering Aug 29-31 — independently re-checked for a schedule change, new ethics text, or WH sign-off; none found (DeFiRate.com, Motley Fool, Disruption Banking, Bitcoin Foundation, Qz, news.bitcoin.com, all through Aug 30-31 reconfirm the Sept 15 cloture date unchanged). P HELD FLAT at 32/47/58/82/92.** This cycle's score set (2026-08-31_draft) is a light daily touch, not a full weekly refresh, and was **AUTO-STAMPED** alongside the other unchanged pillars per the runbook's delegated daily authority (the one pillar that moved this cycle, Iran War Risk, cleared the auto-stamp bar on its own terms — see that report) — see My Decision below. **Sept 1: held flat again, no material development found** — the Tillis-Gallego ethics counteroffer remains unanswered at the White House since Jul 30/31, the Sept 15 cloture date is unchanged, and no fresh prediction-market pull cleared the sufficiency bar. Score set 2026-09-01_draft, AUTO-STAMPED, the new last COMMITTED baseline (Iran War Risk moved again this cycle — see that report). **Sept 2: held flat a further time** — nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in, no White House sign-off on the ethics language, no fresh corroborated prediction-market pull. Score set 2026-09-02_draft — this pillar's own P is unchanged. All four qualitative pillars share one dated score set, and Iran War Risk's sharp re-rate this cycle flipped the master call band (Mild Bull → Neutral), originally leaving the whole set as draft pending Alex's manual review; **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy so a call-band flip no longer withholds the stamp on its own (see My Decision and the Iran War Risk pillar report). This remains the last TRUE committed baseline for this pillar: 32/47/58/82/92. **Sept 3: held flat a further time** — nothing material found on any pillar that cycle. **Sept 5, light daily catch-up (2026-09-05_draft): held flat again** — the Sept 15 cloture schedule remains unchanged, no WH ethics sign-off, no fresh corroborated prediction-market pull; this pillar's own P is unaffected, but Fed & Macro re-rated down on a hot August jobs report, moving the shared master figures.

CORRECTION: that cycle's own commit message claimed this set was "AUTO-STAMPED," but config/scores.json's status field was never actually advanced to committed — a bug in that session, caught and flagged here, not corrected retroactively (stamping is Alex's call). **Sept 5, FULL WEEKLY refresh (2026-09-05_draft2), this version:** independently re-verified via WebSearch — the Sept 15 cloture schedule and both binding disputes are unchanged, Coinbase CEO Armstrong's public optimism is a single executive's opinion, not new information, and is not used to move P. **HELD FLAT again at 32/47/58/82/92. Full weekly refreshes are categorically excluded from the delegated daily auto-stamp policy regardless of move size (here, zero) — LEFT AS DRAFT for manual review, and COMMITTED BY ALEX September 5, 2026. Sept 6: light daily catch-up, held flat a further time** — re-checked via WebSearch: the Sept 15, 2:15pm ET cloture vote remains scheduled (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes). New since the Sept 5 baseline: House Majority Whip Tom Emmer's office has also pulled the weeks of Sept 21 and Sept 28 off the House voting calendar (crypto.news, Yellow.com) — this affects the House's own timeline, not the Sept 15 Senate cloture vote itself, which remains this pillar's operative near-term event and is unchanged. Polymarket's ~18% odds of 2026 enactment (a market price, not an institutional estimate) reflect the same math already priced in. No new dated legislative development clears the sufficiency bar to move P. **HELD FLAT at 32/47/58/82/92. Sept 8: light daily catch-up, held flat again** — re-checked via WebSearch: the Sept 15, 2:15pm ET Senate cloture vote remains scheduled and unchanged (Thune's cloture motion, filed Aug 8, still stands; Republicans hold 53 seats, need 7+ Democratic/independent votes to hit the 60-vote threshold); no new dated legislative development, no WH sign-off on the ethics-language counteroffer, and no fresh corroborated prediction-market pull found. **HELD FLAT at 32/47/58/82/92. Sept 9: light daily catch-up, held flat again** — re-checked: the Sept 15, 2:15pm ET Senate cloture vote (Thune's Aug 8 cloture filing, 53 R seats needing 7+ D/I votes) remains unchanged (Yahoo Finance, CNBC "policy gamble hanging by a thread" Sept 1, Bitget); Polymarket 2026-passage odds drifted to ~16-17% (CNBC, cryptonews) from ~18% — a market-price move only, not used to move P under house sufficiency rule; the recycled "Galaxy Research cut odds 50% → 30%" figure is the same Jul 24-25 analyst call already logged as mis-dated in an earlier cycle, not a fresh data point. No new dated legislative development found. **HELD FLAT at 32/47/58/82/92. AUTO-STAMPED per delegated daily authority, the new last COMMITTED baseline. Sept 10: light daily catch-up (score set 2026-09-10_draft) vs the 2026-09-09_draft committed baseline.** Held flat at 32/47/58/82/92 — independently re-checked, nothing cleared the sufficiency bar. The Sept 15, 2:15pm ET Senate cloture vote (motion to proceed) remains the operative near-term event, unchanged since Sept 9; no new dated legislative development found. Polymarket 2026-passage odds still read in the same ~16% band — a market-price move only, not used to move P under house sufficiency rule. The master FINAL NUMBER's call band did not flip anywhere (Neutral → Neutral equal-weight, Mild Bull → Mild Bull horizon-weighted) — so per the runbook's delegated auto-stamp authority this set is **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."** **THIS VERSION (September 11, score set 2026-09-11_draft) is a further light daily catch-up.** Held flat again at 32/47/58/82/92. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 (60-vote threshold, Thune's Aug 8 filing) is unchanged and still the operative near-term event. The fullest whip-count writeup found this cycle (crypto.news, **September 4**) names Rand Paul and Josh Hawley as firm Republican no votes with Thom Tillis conditional on stronger ethics language — putting the Democratic votes needed at 7-11 against the two who crossed in committee (Gallego, Alsobrooks) — but it is dated before the Sept 8-10 baselines, so it is not new information and does not move P. Polymarket ~16% (a market price) and Galaxy Research ~10% (an analyst estimate) are reported separately and neither is used to move P under the house sufficiency rule. **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)."** **THIS VERSION (September 12, score set 2026-09-12_draft, this morning's light daily catch-up)** held flat again at 32/47/58/82/92 — the Sept 15, 2:15pm ET cloture schedule and whip-count math were unchanged since Sept 11, and no new dated legislative development had surfaced yet. **AUTO-STAMPED: status committed, stamped_by "Alex (auto-stamped)"** — the new last TRUE committed baseline. **A separate, deeper FULL WEEKLY refresh ran independently this afternoon (September 12, score set 2026-09-12_draft2)** — the first deep multi-source research dive since the Sept 5 full weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, and Blockhead — 6+ independent outlets), stating it "incorporated more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope so non-decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities. The ethics/conflict-of-interest provision that Sen. Tillis has conditioned his support on remains largely unchanged from the July draft, and no Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/-8-10-crossover whip count are unchanged; this week's prediction-market reads were noisy and partly single-sourced (Polymarket low-teens-to-20%; Kalsi ~15% year-end, single-source, flagged) and, as market prices, were not used to move P. **P HELD FLAT at 32/47/58/82/92** — the Lummis release is well-corroborated but a mixed signal (real concessions, but the Tillis-blocking language untouched and zero confirmed Democratic converts) that nets to a wash, not a clearance of the sufficiency rule's bar

for a move in either direction. **This is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so 2026-09-12_draft2 is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW.** The last TRUE committed baseline remains 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

Written June 5, 2026 · Updated & Re-verified September 17, 2026 (LIGHT DAILY touch, 2026-09-17_draft: **HELD FLAT at 15/28/45/72/92** — re-checked; no new dated development on the CLARITY AC failure. A policy advocate's Sept 16 comment that the bill "could get another shot during lame-duck" is speculative commentary already anticipated in the Sept 16 baseline's own note, not a new dated fa STAMPED per the delegated daily authority.) · Last TRUE committed: 15/28/45/72/92 (2026-09-16_draft, auto-stamped Sept 16) · Not Financial Advice

The Scores — Committed vs. Drafts

June column committed by me June 12, 2026. Aug 16 is the prior auto-stamped daily baseline. Per house rule, drafts only collapse out of this table once a set actually commits — Aug 22 draft2 committed Aug 23 and stays visible until the new Aug 29 column has not committed, so nothing collapses yet from here. Aug 17, 18, and 20 drafts were written but never delivered; an Aug 21 session delivered the Aug 20 numbers into only 2 of 6 reports before stopping, so the Aug 21 catch-up draft (d1) held flat, was fully delivered (rendered/selfchecked/archived/committed to git), but stayed uncommitted after an adversarial fact-check caught a false claim in the Iran War Risk pillar report. The same-day full report was not independently re-confirmed the hold and was **COMMITTED BY ALEX August 23, 2026** — the last committed baseline. A subsequent **2026-08-28_draft** daily catch-up cycle was researched (held flat) but never rendered, self-checked, or not delivered, dropped from this visible lineage (see What Changed for the audit note). This cycle's **2026-08-29_draft**, a **FULL WEEKLY** refresh, independently re-confirms the hold again via fresh primary-source research and analysis. **REVIEW: Aug 31 and Sept 1 are light daily catch-ups (2026-08-31_draft, 2026-09-01_draft)** that each independently re-checked for a schedule change or ethics-text development, found none, held flat, and were **AUTO-STAMPED** set for this pillar. **Sept 2 (2026-09-02_draft)** is a further light daily catch-up, again held flat. This shared dated score set was originally left as draft, because Iran War Risk's re-rate (bundled in the same set) flipped to **STAMPED SEPTEMBER 3, 2026**, once Alex widened the delegated daily auto-stamp policy — now the last **TRUE COMMITTED** set for this pillar, CLARITY's own P unchanged at 32/47/58/82/92. Sept 3 held flat a further time, so the **daily catch-up (2026-09-05_draft)** holds flat again; that cycle's own commit message claimed "AUTO-STAMPED," but config/scores.json's status field was never actually advanced — flagged as a correction this cycle, not its own. **FULL WEEKLY refresh (2026-09-05_draft2, this version)** independently re-confirms the hold via fresh WebSearch research; categorically excluded from daily auto-stamp authority, so left for manual review — **COMMITTED BY ALEX** **Sept 8 light daily catch-ups (2026-09-06_draft, 2026-09-08_draft)** each independently re-checked and held flat — no new dated legislative development, no WH sign-off on the ethics language, no fresh corroborated predictions, **STAMPED**, Sept 8 the last **COMMITTED** baseline. **Sept 9 (2026-09-09_draft, this version)** re-checks again and holds flat a further time — Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price move, so the sufficiency rule — **AUTO-STAMPED per delegated daily authority**, the new last **COMMITTED** baseline (see What Changed for cycle-by-cycle detail). **Sept 10 (2026-09-10_draft)** re-checks again and holds flat a further time, so the scheduled action, unchanged; Polymarket odds still read in the same ~16% band, insufficient alone to move P — **AUTO-STAMPED per delegated daily authority**, the last **COMMITTED** baseline. **Sept 11 (2026-09-11_draft)** re-checks again, unchanged, and the only whip-count detail surfacing this cycle (Paul/Hawley firm no, Tillis conditional) is dated Sept 4, before the last two baselines, so it is not new information — **AUTO-STAMPED per delegated daily authority**, the last **daily catch-up (2026-09-12_draft)**, **this morning**: holds flat again, no new dated development found — **AUTO-STAMPED**, the last **TRUE COMMITTED** baseline for this pillar. **Sept 12 FULL WEEKLY refresh (2026-09-12_draft, this version)** dive since Sept 5 — Sen. Lummis released a revised ~630-page CLARITY text Sept 10 (primary source, corroborated by 6+ independent outlets) incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction market provision is largely unchanged and no Democrat has publicly signed on — a mixed signal, net a wash, that does not clear the sufficiency bar in either direction. **Holds flat a further time at 32/47/58/82/92 — categorically excluded from weekly refresh), LEFT AS DRAFT, AWAITING ALEX'S MANUAL REVIEW. Sept 15 (2026-09-15_draft)** re-rates UP to 37/53/62/83/92 once the Senate released Lummis's final text with a Trump-backed ethics sunset provision, so the **weekly refresh (2026-09-16_draft)** RE-RATES DOWN sharply to 15/28/45/72/92 — the Sept 15 cloture vote FAILED 49-50 — **AUTO-STAMPED**, the last **TRUE** committed baseline. **Sept 17 (2026-09-17_draft, this version)** HOLDS FLAT at 15/28/45/72/92 since the cloture failure; lame-duck speculation is unchanged commentary already priced — **AUTO-STAMPED per delegated daily authority**.

Last TRUE committed P (2026-09-15_draft, light daily touch, auto-stamped): 37 / 53 / 62 / 83 / 92 · Current P (2026-09-16_draft, light daily touch, AUTO-STAMPED): 15 / 28 / 45 / 72 / 92 · Weight: 20% (equal) · Impact: 8 (Quality × Impact. Full lineage: June committed 55/60/65/85/92 (Jun 12) → ... (see prior versions of this report for the full Jul 8 → Sept 14 path, flat at 32/47/58/82/92 since Aug 8) → Sept 14 light daily (2026-09-14_draft) 32/47/58/82/92 committed baseline before the ethics concession → Sept 15 light daily (2026-09-15_draft) 37/53/62/83/92 — RE-RATED UP: the White House conceded on ethics Sept 13 and the final text posted Sept 14 dropped the 2029 sunset penalties, against an unmet divestment ask, a publicly unconvinced lead Democratic negotiator and a live counteroffer — auto-stamped, the last committed baseline → Sept 16 light daily (2026-09-16_draft, this version) 15/28/45/72/92 2:15pm ET cloture vote FAILED 49-50, well short of 60, with named Democratic negotiators voting No and Lummis ruling out a quick floor return; 3yr held flat since a single failed vote does not move the multi-year read — **AUTO-STAMPED**.

THE THREE INPUTS, IN PLAIN ENGLISH

P — the odds this is good for crypto by then. Held flat this cycle at 32/47/58/82/92 — unchanged since Aug 8, through the committed Aug 22 refresh (d2), the abandoned/never-delivered Aug 23 draft, the weekly refresh (2026-08-29_draft), all independently re-verified against fresh primary sources rather than trusted at face value. The Sept 15, 2:15pm ET cloture vote on the motion to proceed to the cloture date, reconfirmed this cycle by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate/CryptoRank (Aug 22), with no schedule change found anywhere Aug 22-29 — and it bears repeating that

proceed only, not final passage, which still needs its own floor debate/amendments and its own 60 votes. Both binding disputes remain fully unresolved as of today: the ethics/conflict-of-interest bipartisan counter-proposal — no White House sign-off or released text found this cycle) and the stablecoin-yield dispute (no update found). NEW, CONFIRMED this cycle: CFTC Chair Michael G. Sarno at the Innovation Advisory Committee's inaugural meeting, directed CFTC staff to explore a fallback crypto-market-structure rulemaking using the CFTC's existing authorities in case CLARITY is not verified directly against cftc.gov (PressRoom/Speeches/Testimony/opaselig10), dated **August 20, 2026** (some secondary outlets, e.g. American Banker/PYMNTS/The Hill, dated it Aug 21, like the primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will utilize its existing authorities to begin establishing a regime for crypto asset market oversight." SEC Chair Atkins' already-logged Jul 29 unilateral-authority statement — it does not touch either binding dispute and is logged as context, not used to move P, same treatment as the SEC's earlier independent prediction-market pulls this cycle show a consistent low-teens-to-20s read: DeFiRate.com (Aug 27) cites Polymarket 13-14% ("signed in 2026") and Kalshi 20-21% ("60 votes" by Polymarket pull separately showed 14% — both labeled as market prices, not institutional estimates, and per house rule cannot move P without a corroborating news event, none found. A "Signed open to voting for CLARITY" quote surfaced in this cycle's search and was cross-checked to an **August 19, 2025** (one year earlier) CoinDesk/Politico Pro story from a prior year's SALT Wyoming flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an Aug 2026 development. congress.gov and dailypress.senate.gov both returned HTTP 403 (bot-blocking); primary-source confirmation relied on 7+ independent secondary outlets instead, consistent with how prior cycles have had to handle this. Context only, not new: the Senate passed the Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a shutdown fight eating September floor time around Sept 15. The move still hold only 53 of the 60 votes needed and roughly zero Democrats are confirmed as yes votes. The actual live blocker, unchanged since Aug 8: a *toughened* Democratic ethics counter-proposal. White House since roughly Aug 1-3. Long-term still high — even the bears argue "slips past the midterms," not "dies."

Quality — how trustworthy the evidence is. Unchanged this cycle per house rules.

Impact — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

The Claim

The thesis as of September 16, 2026 (LIGHT DAILY touch, 2026-09-16_draft) — the cycle in which the Sept 15 cloture vote resolved, and failed

The crowd: treated the Sept 13-14 ethics concessions as the story and priced in a real shot at cloture — Polymarket's 2026-signed-into-law odds roughly doubled to ~35% on the concession news, but was wrong about the size of the gap: cloture failed 49-50, support didn't even reach 50, and Polymarket's odds cratered to ~5% within a day.

Me: re-rated down hard on the near windows — 37/53/62/83/92 → 15/28/45/72/92 — because the vote outcome is now a resolved fact, not a probability: named Democratic negotiators (including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto as the likely yes) voted No, Thune's motion to reconsider is procedural cover rather than a scheduled second try, and Lummis herself ruled out a quick floor return. The Senate calendar reinforcement for the midterms in early October and don't return until after the election, leaving a lame-duck session as the earliest realistic floor-time window Kennedy named. I did not cut the 1yr or 3yr window on ethics concessions the White House already made are real and don't evaporate just because this particular vote failed, so they remain a foundation for a future round, whether that's a lame-duck attempt or not.

My edge: the crowd's ~5% post-vote Polymarket read and my 15 (1mo) / 28 (3mo) P aren't the same question — Polymarket prices signature into law within calendar 2026, a much narrower bar than what my numbers are deliberately less crushed than the market's. Where I agree with the crowd: this was a real, unambiguous loss, not a "gap narrowed, didn't close" story anymore — the gap held, and that by clinging to the pre-vote optimism I priced in yesterday.

The Facts

As of September 16, 2026 — LIGHT DAILY touch (2026-09-16_draft), the cycle in which this pillar re-rated DOWN for the first time since June. Hard numbers only, sources on the last page. New facts from this cycle appear first (still load-bearing) below.

- ★ ★ **NEW — September 15, 2026, 2:15pm ET: the Senate cloture vote on the motion to proceed to H.R. 3633 FAILED, 49–50** — well short of the 60 votes required, and support did not even reach the most industry watchers expected. Corroborated by 6+ independent outlets (CNBC, CoinDesk, CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call.
- ★ ★ **NEW — named Democrats who were negotiating the bill voted No**, including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto — Gallego, flagged in the vote, did not convert.
- ★ ★ **NEW — procedural aftermath, September 15–16, 2026:** Majority Leader Thune filed a motion to reconsider (a procedural preservation, not a scheduled revote); Sen. Lummis told reporters that Sen. Kennedy said any renewed push likely waits for the lame-duck session; senators leave Washington in early October for the midterms and do not return until after the election.
- **MARKET PRICE, reported not scored:** Polymarket's "CLARITY Act signed into law in 2026" odds crashed from roughly 35% pre-vote to roughly 5% post-vote (KuCoin, Yahoo Finance, CoinMarketCap) — consistent but never blended with the P score.

Carried forward from the September 15 light daily touch — still load-bearing, not contradicted:

- ★ **September 13, 2026: the White House agreed to an ethics package for the CLARITY Act and transmitted the language to Senate Republicans.** A senior administration official called it "a landmark ranging ethics provision in history." Corroborated by CNBC, The Hill, Forbes, Yahoo/Politico and congress.net — 4+ independent outlets. This is the first movement on the blocker that has surfaced since roughly Aug 1–3.
- ★ ★ **NEW — September 14, 2026: Sens. Lummis, Boozman and Scott posted the FINAL CLARITY Act text one day before the cloture vote.** Versus the July draft, the ethics division dropped the July text which the ethics section with Trump's term), **reverses the July text's outright bar on state-attorney-general enforcement** and gives state AGs standing to sue, and **raises civil penalties from \$500,000, whichever is less to "20% or \$500,000, whichever is greater."** It bars the president, vice president, members of Congress, federal judges and their spouses from issuing or spending compensation while in office. The sponsors say the draft incorporates 126 substantive Democrat-requested changes. Corroborated by The Block, The Defiant, CNBC, crypto.news, BelnCryp and independent outlets.
- **What the concession does NOT do:** it does not require divestment or blind-trust placement of preexisting crypto holdings — the core of the bipartisan Tillis–Gallego counterproposal.
- **September 14, 2026: Sen. Warren called the provision a "weak fig leaf that will do nothing to stop him from making his next \$1.4 billion in crypto profits"** and went to the Senate floor.
- **September 14, 2026: Sen. Gallego — the lead Democratic negotiator and the most likely yes vote — said the Republican text "as it currently stands falls short,"** naming ethics, conflicts of interest and market integrity as provisions that "must be strengthened."
- **Late Monday, September 14, 2026: Senate Democrats sent a counteroffer to Republicans** on the eve of the vote (CoinDesk, Sept 15). CoinDesk could not confirm its contents beyond the **reported not scored:** CoinDesk alone reports the Democratic objection that the new language would still block state attorneys general from directly suing the U.S. president.
- **The vote itself had not happened when this cycle ran.** The cloture vote on the motion to proceed to H.R. 3633 ripens Tuesday, September 15 at 2:15pm ET, 60 votes required; this run excluded 53 seats and need roughly 7–9 Democratic/independent crossovers; zero are publicly committed. It is a vote on the motion to proceed only — floor debate, amendments and a separate 60-vote threshold.
- **MARKET PRICE, reported not scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to ~34.5% on the ethics deal, versus the ~23% Dec-31 read priced Sept 13. Market prices, not institutional estimates and never move a P; the two quotes may not share a question basis.

Carried forward from the September 12 full weekly refresh and the daily touches since — still load-bearing, not contradicted:

- ★ ★ **NEW — Sen. Lummis released a revised ~630-page CLARITY Act text on September 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Coingape, and Blockhead — 6+ independent outlets). Lummis states it "incorporated more than 114 separate provisions at my Democrat colleagues' request." Substantively it narrows the Democratic demand that decentralized trading protocols must register with the CFTC and are confined to cash-settled spot trading in digital commodities, addressing the tribal-government prediction-market objection.
- **The ethics/conflict-of-interest provision — the specific language Sen. Tillis has conditioned his support on — remains largely unchanged from the July draft in this new text**, per the sourcing above. The report's actual binding blocker was not resolved by this release.
- **No Democrat had publicly announced support for the new text as of Sept 10-11**, despite the 114 concessions (The Block and Blockhead/Politico — 2 independent outlets).
- **The Sept 15, 2:15pm ET cloture vote schedule and the 53-R-seat / ~8-10-crossover whip count remain unchanged** and were reconfirmed again this cycle.
- **Prediction markets (market prices, not institutional estimates — house rule), this cycle's reads were noisy and partly low-quality-sourced:** Polymarket roughly low-teens-to-20%; Kalshi single-source, flagged as such and, like all prediction-market reads, not used to move P.

- **Context, unchanged:** House GOP canceled its Sept 21 and Sept 28 session weeks (~Sept 3), shrinking the post-Senate-vote House re-passage window if the Senate amends the bill.
- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — the Lummis text release is well-corroborated but a mixed signal (real concessions offered, but the Tillis-block confirmed Democratic converts) — net a wash, not a clearance of the sufficiency bar for a move in either direction.

Carried forward from the September 5 full weekly refresh (2026-09-05_draft2, committed by Alex Sept 5) and the light daily catch-ups since (through this morning's Sept 12) — still load-bearing, re-verified this cycle, not contradicted:

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed remains the only scheduled floor date**, reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate.com (Aug 28) independently adversarially re-verified this cycle, with no schedule change found anywhere Aug 22-29. This is a cloture vote on the *motion to proceed* only, not final passage — floor debate/ethics passage threshold still follow.
- ★ ★ **NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting**, directed CFTC staff to explore a fallback crypto asset market under the CFTC's existing authorities, in case CLARITY continues to stall. Adversarially verified directly against cftc.gov (PressRoom/Speeches/Testimony/opaselig10) — dated **August 20, 2026** (source: Banker/PYMNTS/The Hill, dated it Aug 21, likely next-day pickup; cftc.gov used as the primary date). Direct quote: "If CLARITY continues to stall because of Democratic obstruction, the CFTC will begin establishing a regime for crypto asset markets." This is the CFTC's analog to SEC Chair Atkins' already-logged Jul 29 unilateral-authority statement — it does not touch either binding or unbinding of P, logged as context, NOT used to move P, same treatment as the SEC's earlier fallback signal.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego bipartisan counter-proposal — no White House sign-off or released text found) (no update found). Status quo on both.
- **Prediction markets (market prices, not institutional estimates — house rule), two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% ("signed in 2026") and 2027); a live Aug 28 Polymarket pull separately showed 14%. Consistent low-teens-to-20s read across sources — but market prices alone, even corroborated by a second independent pull, are not a corroborating news event, and none was found.
- ★ ★ **NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and was cross-checked to CoinDesk/Politico Pro story from a prior year's SALT Wyoming/Jackson Hole symposium. Flagged as a likely search-engine year-confusion artifact and explicitly NOT used as evidence of an ethics concession to readers, not a real development.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** (bot-blocking) — primary-source confirmation relied on 7+ independent secondary sources; prior cycles have had to handle this.
- **Context only, not new:** the Senate passed a stopgap funding bill Aug 8 (Collins-Murray deal) funding the government through Dec 11, 2026 — modestly reduces (doesn't eliminate) the risk of a floor time around Sept 15.
- **No change found to the confirmed Democratic yes-vote count** (still zero) or to any primary-source Senate floor action.
- **Recommendation this cycle: HOLD all five windows flat at 32/47/58/82/92** — nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction.

Carried forward — the abandoned/never-delivered 2026-08-28_draft (daily catch-up, researched but never rendered/selfchecked/archived/committed): logged a Polymarket "signed in 2026" drift to 14% (live pull, Aug 28) from 13% (above), insufficient alone to move P; no other new development found that day. Treated as not delivered per house discipline, superseded by this cycle's independent re-verification, not contradicted.

Carried forward from the committed Aug 22 full weekly refresh (2026-08-22_draft2 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the Sept 15, 2:15pm ET cloture vote on the motion to proceed was reconfirmed via 7+ outlets** as of Aug 21 (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Business, Yahoo/Motley Fool), with no schedule change found — still a motion-to-proceed vote only, not final passage.
- **Sen. Ruben Gallego, on the record at the Aug 19, 2026 SALT Wyoming Blockchain Symposium**, said the White House has not given a point-by-point response to the bipartisan Tillis-Gallego ethics provision before the August recess — responses have come back "blank, weaker than before, or not at all." He also explicitly warned against rushing the Sept 15 vote. Multi-source: crypto.news, CoinDesk, Bloomberg, Forbes. Not used to move P.
- **White House crypto adviser Patrick Witt said Aug 19** the administration is "fully committed" to getting CLARITY passed in September and would keep negotiating with Democrats up to the point of Democrats for blocking the pre-recess vote. Multi-source (CoinTelegraph, Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan). Combative public message; no concession — not used to move P.
- **An unverified, non-journalistic X post** from a crypto project's promotional account (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision "finally has a deal on the table" and is "officially confirmed, journalistic, and directly contradicted by Gallego's own on-record Aug 19 statement (4+ independent outlets). Not used.
- **Coinbase CEO Brian Armstrong said Aug 21** he's "pretty optimistic" the bill clears 60 votes, arguing Thune wouldn't have scheduled Sept 15 without expecting passage, and that "both sides are committed." Single source (Motley Fool/Fool.com), an interested industry party's opinion — not used to move P.

Carried forward from the same-day Aug 22 catch-up draft (d1 — independently re-verified, fully delivered: rendered, selfchecked, archived, git-committed; re-verified again this cycle, not contradicted):

- ★ ★ **the SEC formally proposed "Regulation Crypto Assets" on Aug 18** (sec.gov press release 2026-76) — a token-offering exemption regime: a startup exemption (≤\$5M over 4 years), a small business exemption (≤\$10M over 4 years), and a conditional safe harbor from the "investment contract" definition. This is a separate SEC rulemaking track, not the CLARITY Act, and does not touch CLARITY's binding ethics provision — not used to move P.
- ★ ★ **Trump hosted a White House crypto event on Aug 19**, with SEC Chair Atkins, CFTC Chair Selig, and industry CEOs present, and publicly pushed Congress to pass "a fair version" of CLARITY (Bloomberg, Forbes). Real public pressure and rhetoric — no text change or deadlock resolution reported, so not used to move P.
- **As of Aug 21, both live disputes remain open:** the ethics-provision fight (Democrats pressing for stronger limits on officials' crypto holdings) still has no confirmed White House sign-off on the ethics provision; the stablecoin-yield/banking dispute is also still unresolved.
- **Prediction markets logged that morning:** Polymarket "signed into law in 2026" = 25% Yes (Aug 22 direct pull); Kalshi's "reaches 60 votes" market = 22% (Aug 21) — this cycle's fresh pull is 25% (above), illustrating the kind of intra-week volatility the house rule treats as noise, not signal, on its own.
- ★ ★ **FLAGGED, NOT SCORED — Coinbase CEO Brian Armstrong's on-record prediction that CLARITY "will pass"** is single-source opinion (one person, one outlet's framing) — explicitly not used to move P; sufficiency rule; see the more specific Aug 21 "pretty optimistic" remarks logged above.

Carried forward from the Aug 17, 18, and 20 drafts (written but never delivered — no report/render/archive/commit followed any of them; independently re-verified today, not contradicted):

- **Sen. Ruben Gallego, speaking at the SALT Wyoming Blockchain Symposium on Aug 20**, said White House responses to the Tillis-Gallego ethics counter-proposal "have come back blank" and separately warned against rushing a floor vote (Blockonomi/Cointelegraph, FXStreet, Crypto-Economy, all Aug 20) — reaffirms the existing stalemate rather than deepening it.
- **Senate Banking Chair Tim Scott said (The Block, Aug 18) the stablecoin-yield provision "we thought was all settled" has resurfaced as a live dispute**, amid community-bank lobbying for a floor vote, and GOP support — still open and unresolved as of Aug 21 (see above).
- **White House digital-assets adviser Patrick Witt called himself "truly optimistic and bullish" on passage** (The Block, Aug 18) despite the stablecoin friction — rhetoric only, no new White House sign-off.
- **Polymarket "signed in 2026" bounced from ~16% (around Aug 14-15) to ~24% (Aug 20 live pull)** on no identified news catalyst, and has since settled to 25% (Aug 22) — noise, not used to move P.
- ★ ★ **FLAGGED FOR THE RECORD, not scored:** Galaxy Research appears to have cut its 2026-passage estimate further to 10% (from the 30% already reflected in this report's history) around Aug 22 window and looks like a gap in an earlier research cycle rather than new information — flagging for Alex's attention, not treating as a driver of today's score.

Carried forward from the August 16 committed baseline (still load-bearing; independently re-verified, not contradicted, this cycle):

- ★ ★ **NEW — the SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote the day before it was scheduled**, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, Galaxy Research). Would have created token-offering exemption pathways under a separate SEC rulemaking track — relevant context on regulatory limbo across both branches, but not a CLARITY-specific trigger.
- **The Senate remains in August recess; no new floor-schedule or ethics-text development found (as of Aug 16).** Re-checked Bitcoin Foundation, Troutman Financial Services, CoinDesk, and others. Date as the only scheduled action (Senate returns Sept 14, three weeks to work the bill), with no new reporting on the Tillis-Gallego ethics counteroffer or White House sign-off.
- **The Sept 15, 2:15pm ET cloture date remains widely corroborated** — no change from Aug 14.

- **New detail on remaining disputes:** illicit-finance provisions and reconciling the Senate Agriculture Committee's text are named as two additional sticking points ahead of the vote (PYMNTS "multiple unresolved fights" picture already carried).
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633.** Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoS) via the bill's own congress.gov calendar text (Calendar No. 423).
- **The real live blocker remains a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump corroborated by Coindesk's Jul 29 report that senators were negotiating a stronger version of the original concession).
- **Zero confirmed Democratic yes votes on cloture** as of Aug 16, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.
- **Polymarket "signed in 2026" (market odds, not an institutional estimate) remains around the mid-teens** per the conflicting cached reads (13-21%) noted Aug 14 — not re-verified as of peak of 43%. Treat the exact figure as noisy; the directional read (still depressed vs. earlier in the year) is the reliable part.

Carried forward from the July 30 full refresh (still load-bearing):

- ★ ★ **PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows ceremony for the late Sen. Lindsey Graham plus an executive-calendar nominee vote, and Jul 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is of "no floor time" than any leadership quote — and confirms no path to passage before the Aug 7 recess.
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground Jul 30). The exact text is undisclosed and White House sign-off is unconfirmed — CoinDesk's own reporting hedges "whether they've actually done it is unclear," and neither senator's office nor I comment requests. Treat as real movement, not a completed deal.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and the House (adviser Patrick Witt mocking the comparison) and the crypto industry (DeFi Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to act on its own, while still calling statute the preferred, "future-proof" path. A modest reducer of legislative urgency — noted, not scored.
- **Odds board (sentiment only) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, 30% a week ago. Galaxy Research's Alex Thorn cut his personal 2026-passage estimate from 50% to 30% — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-checked).
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics provisions. Democratic votes: zero.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor" corrected in an earlier cycle: his SC seat was refilled within 48 hours, GOP floor count restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since then, constraint, now potentially loosening.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M in CLARITY Act without an ethics provision."
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the rewards structure survives in the text as-is.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House (Dusty Johnson) unchanged.

The Prize

Illustrative only — not price targets, not advice

Anchor: BTC **\$76,197.81** (September 17, 2026). A **GENIUS-sized move (~40–47%)** from here ≈ **~\$107–112K**. A retest of the ~\$125K cycle high = **+64%**. The anchor is real: during the GENIUS committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K (≈+44%).

Discount hard right now — the CLARITY analog just showed the other side of the coil: Polymarket's 2026-signed-into-law odds crashed from ~35% pre-vote to ~5% post-vote (Sept 15-16) on the news. Sold off alongside it (CoinDesk, Sept 15: "Bitcoin slides from nearly \$80,000 as Senate votes on Clarity Act"). The Prize doesn't feed the math — it tells you what the lean is worth acting on, and the pillar's own honesty rule: the score moved on evidence (cloture failed), price moved on the same news, and the two aren't the same measurement.

The Other Side

The strongest honest case this is wrong

- ★ ★ **RESOLVED, Sept 15-16: the bear case below won.** Multiple bullets in this section flagged the cloture vote as more likely to fail than the ethics concessions suggested — Punchbowl's "dramatic" repeatedly missed "imminent" dates, and market pessimism that this report chose not to score. The vote failed 49-50, a wider margin than even those bears expected. This report's own 1mo+ record reflects that the bear case, not the concession-driven optimism, was the better read this cycle. The remaining bullets below are kept as the historical record of that case, not because every side is wrong.
- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have agreed. The report is giving real weight (an 8-point 6mo improvement from the Jul 18 low) to something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows — a pattern, not a one-off.
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture knowing no Democrats on the record before the midterms rather than to actually advance the bill, which would make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" dates. The guarantee the actual Sept 15-16 vote produces real movement rather than another procedural loss, and September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped from 50% to 27% on a single news event, suggesting professional handicappers see this as a genuine coin-toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency — and now the CFTC has said the same thing.** If both the White House-aligned SEC and CFTC believe they can deliver the political cost of letting CLARITY slip further. CFTC Chair Michael Selig's Aug 20, 2026 on-record speech directing staff to explore a fallback rulemaking (verified against cftc.gov) is the same message — a slow bleed on legislative priority, not a dramatic kill, but a second data point in the same direction.
- **Prediction markets have drifted lower again, not higher.** DeFiRate.com's Aug 27 pull puts Polymarket at 13-14% and Kalshi at 20-21% — near the lower end of the range this report has tracked. Polymarket pull independently confirmed 14%. Two independent readings agreeing on a low number is a real signal even if it doesn't clear the sufficiency bar to move P on its own; a bear case is too conservative in not letting corroborated market pessimism move the needle.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

The Triggers

Dated events ahead — some prove the claim right, some prove it wrong. Re-set September 16, 2026 — light daily touch, 2026-09-16_draft, the cycle in which the cloture-vote trigger fired (and failed) and this pillar re-rated down

DATE	EVENT	MEANS
Surfaced Sept 10, checked Sept 13 — corroborated via 3+ independent outlets (crypto.news, Coingape, CoinSpectator)	A FOURTH named Democratic blocking issue: vertical-integration conflict-of-interest authority. Democrats want regulators empowered to set conflict-of-interest standards for vertically integrated crypto firms — one company controlling several legs of a transaction, the FTX/Alameda pattern. Republicans say they support safeguards but fear a future administration misusing the authority; industry stakeholders have pushed back on including the provision. Sens. Booker, Lummis and Boozman are negotiating it. Separately, Sen. Lummis spent Sept 11-13 publicly pressing Democrats to back the revised text ("Democrats wrote the fix, now vote for it", 115 changes incorporated) — advocacy, not a vote commitment; still zero Democrats publicly committed. Polymarket ~23% signed-into-law by Dec 31 — a market price, reported not scored	CLARITY: no P move named blocking issue rather than changes more likely than not for a re-rate on its own remains the operative
Checked Sept 2, no change	Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in — no White House sign-off on the Tillis-Gallego ethics language, no fresh corroborated prediction-market pull	Status quo — no P other unchanged pillar
Checked Sept 1, no change	No material development found on the ethics counteroffer, the stablecoin-yield dispute, or the Sept 15 cloture schedule since the Aug 31 light daily catch-up	Status quo — no P other unchanged pillar
Fired Aug 8, reconfirmed via 7+ outlets as of Aug 21, reconfirmed again by DeFiRate.com Aug 27, adversarially re-verified Aug 29	Cloture vote on the motion to proceed to H.R. 3633 is scheduled 2:15pm ET Tuesday, Sept 15 — no schedule change found anywhere Aug 22-29 (DeFiRate.com, Motley Fool, CryptoSlate, CryptoRank); this is a motion-to-proceed cloture vote only, not final passage	Confirmation of the move
Fired Aug 20, checked Aug 29	CFTC Chair Michael Selig's on-record speech at the Innovation Advisory Committee's inaugural meeting — directed CFTC staff to explore a fallback crypto-market-structure rulemaking under existing authorities "if CLARITY continues to stall because of Democratic obstruction"; verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10)	The CFTC's analog logged as context, no P move
Checked Aug 29 — both still open	Ethics-provision dispute (no confirmed WH sign-off on Tillis-Gallego language) and the stablecoin-yield/banking dispute both remain fully unresolved; no development found on either since Aug 22	The actual blockers
Pulled Aug 27 (DeFiRate.com) and Aug 28 (live), checked Aug 29	Prediction markets: Polymarket 13-14%, Kalshi 20-21% — two independent pulls agreeing on a low-teens-to-20s read	Market prices, not in news event found, not
Traced Aug 29	NOT FIRED / NOT USED — "Sen. Tim Scott: 12-18 Democrats open" quote traced to an August 2025 (one-year-old) story, a likely search-engine year-confusion artifact	Named and excluded trigger
Aug 8, context only, checked Aug 29	Senate passed a stopgap funding bill (Collins-Murray deal) funding the government through Dec 11, 2026	Modestly reduces (October September floor time)
Sept 15	PENDING — first cloture vote (motion to proceed), now precisely dated; Democrats call it "doomed" absent further concessions; Republicans hold 53 of 60 needed	Cloture clears = re-cloture fails cleanly 2027
Unresolved since Jul 30; checked again Sept 10-12	Tillis-Gallego ethics counteroffer — real per CoinDesk + 4 outlets as of Jul 29-30, text still undisclosed, WH sign-off still not confirmed as of Aug 29; Gallego's own Aug 19 remarks confirm no meaningful WH response as of that date. A revised ~630-page CLARITY Act text WAS released Sept 10, 2026 (Sen. Lummis, primary source + 6 independent outlets — The Block, Decrypt, CryptoTimes, BeInCrypto, Coingape, Blockhead), incorporating 114 Democrat-requested provisions and narrowing DeFi/prediction-market scope — but the ethics/conflict-of-interest language in it is reported largely unchanged from the July draft, so this specific dispute remains unresolved.	The Sept 10 release watch for the ethics Democrat to publicly
Ongoing	Three named Democratic blocking issues: ethics enforcement, illicit-finance/DeFi provisions, stablecoin yield (Yahoo Finance, Aug 5)	Resolution on all the cloture succeeding; holds
PARTIALLY FIRED Sept 13–14, 2026 — 6+ independent outlets	White House signs off on ethics language and Senate Republicans post the final text — the Sept 14 text drops the Jan 20, 2029 sunset, restores state-attorney-general standing to sue, and raises civil penalties to 20% or \$500,000 whichever is greater. But it is <i>not</i> a merged text with Democratic buy-in: no divestment requirement, zero Democrats publicly committed, Gallego says it "falls short," and Democrats counteroffered late Monday Sept 14.	The half that fired is (32/47/58/82/92 → 32) actual Democratic buy-in left.
FIRED & RESOLVED — Sept 15, 2026, 2:15pm ET	The cloture vote on the motion to proceed to H.R. 3633 FAILED, 49-50 (60 needed) — support did not even reach 50, a steeper shortfall than most industry watchers expected. Named Democrats who were negotiating the bill (Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks, Cortez Masto) voted No. Thune filed a motion to reconsider (procedural only); Lummis told reporters the bill will not return to the floor. 6+ independent outlets (CNBC, CoinDesk, CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call.	The flip line fired on every window except 62–45, 1yr 83–72
Sept 16, context only	Senate calendar: senators leave Washington in early October for the midterms (7 weeks out) and do not return until after the election; Sen. Kennedy said any renewed market-structure push likely waits for the lame-duck session; the SEC's "Regulation Crypto Assets" workstream and CFTC spot-market drafting remain the live administrative fallback tracks.	Sets the realistic floor informs the 3mo/6mo in its own

The flip line: cloture fails on Sept 15-16 with no released, WH-confirmed ethics text and no clear next-step plan = start treating 2026 passage as effectively dead, not just delayed. Keep 1-year and 3-year Bull exit a reported bipartisan ethics counteroffer, and a formally filed cloture motion is delayed, not dead.

Sept 15 LIGHT DAILY touch (score set 2026-09-15_draft), this version — the first UPWARD re-rate on this pillar since June. The standing trigger "White House / Senate GOP concedes on the ethics package" was triggered by the White House agreed an ethics package and sent it to Senate Republicans; on Sept 14, one day before the cloture vote, Lummis, Boozman and Scott posted the FINAL CLARITY text, which **drops the Jan 2027 date** **bar on state-attorney-general enforcement**, and **raises civil penalties to 20% or \$500,000, whichever is greater** (from 10% or \$500,000, whichever is less). Six-plus independent outlets; clears the sufficiency bar. The divestment/blind-trust ask is still not met, Warren calls it a "weak fig leaf", lead Democratic negotiator Gallego says the text "as it currently stands falls short", and Democrats sent a counteroffer late Monday, which had not occurred when this ran at 08:01 ET, is still more likely than not to fail. **P 32/47/58/82/92 → 37/53/62/83/92**. Light daily touch, full research access, verification clean — **AUTO-STAMPED** per delegated authority as widened Sept 2, under which the size of a move is explicitly not a reason to withhold the stamp.

Sept 12 FULL WEEKLY refresh (score set 2026-09-12_draft2), this version: a separate, deeper research pass run this afternoon, independent of this morning's light daily catch-up — the first deep multi-outlet weekly refresh. Sen. Lummis released a revised ~630-page CLARITY Act text on **Sept 10, 2026** (PRIMARY: lummis.senate.gov press release; corroborated independently by The Block, Decrypt, CryptoTimes, Blockhead — 6+ independent outlets), incorporating "more than 114 separate provisions at my Democrat colleagues' request" and narrowing the DeFi/prediction-market scope (non-decentralized trading platform, CFTC, confined to cash-settled spot trading in digital commodities). The ethics/conflict-of-interest provision Sen. Tillis has conditioned his support on remains largely unchanged from the July draft — the sufficiency bar resolved. No Democrat had publicly announced support for the new text as of Sept 10-11 (The Block, Blockhead/Politico — 2 independent outlets). The Sept 15, 2:15pm ET cloture schedule and the 53-R/47-D math unchanged and reconfirmed. Prediction-market reads this week were noisy and partly single-sourced — Polymarket roughly low-teens-to-20%, Kalshi ~15% year-end per one outlet (single-source, flagged for bias). The move P. **P HELD FLAT at 32/47/58/82/92**. The Lummis release is well-corroborated but a mixed signal — real concessions offered, but the specific Tillis-blocking provision untouched and zero confirmed D support against the already-priced whip-count picture, not a clearance of the sufficiency rule's bar (primary source or 2+ independents) for a move in either direction. **This is a FULL WEEKLY refresh — categorically re-evaluated delegated daily auto-stamp authority regardless of the size of the move (here, zero) — so this set is LEFT AS DRAFT, NOT auto-stamped, AWAITING ALEX'S MANUAL REVIEW**. The last TRUE score set 2026-09-12_draft (32/47/58/82/92), auto-stamped this morning.

This morning's cycle (Sept 12 light daily catch-up, score set 2026-09-12_draft): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remained unchanged; no new dated legislative development had emerged. Whip-count math (53 R seats, defections from Paul/Hawley and a conditional Tillis, needing 8-10 D/I crossovers) was the same math already priced (Yahoo Finance, crypto.news, cryptotimes.io). **P HELD FLAT** at 32/47/58/82/92. The move was a light daily touch, no window moved, master call band unchanged anywhere — so per the runbook's delegated daily auto-stamp authority, **that set was AUTO-STAMPED: status committed, stamp applied**. War Risk is the only pillar that moved that cycle — see that report.

Prior cycle (Sept 11 light daily catch-up): re-checked — the Sept 15, 2:15pm ET cloture-vote schedule remains unchanged; no new dated legislative development found since Sept 10. **P HELD FLAT. AUTO-STAMPED** per delegated daily authority.

Sept 10 light daily catch-up: re-checked — the Sept 15 cloture-vote schedule unchanged since Sept 9; Polymarket 2026-passage odds still in the same ~16% band, a market-price read only; no new dated legislative development. **FLAT. AUTO-STAMPED SEPTEMBER 10, 2026.**

Prior cycle (Sept 9 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; Polymarket 2026-passage odds drifted to ~16-17% from ~18%, a market-price move only. **FLAT. AUTO-STAMPED SEPTEMBER 9, 2026.**

Prior cycle (Sept 8 light daily catch-up): held flat — the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the ethics-language counteroffer found; no fresh corroborated news pulls. **AUTO-STAMPED SEPTEMBER 8, 2026.**

Prior cycle (Sept 6 light daily catch-up): held flat — House Whip Emmer's office pulled the Sept 21/28 voting weeks off the House calendar, but the operative Sept 15 Senate cloture vote was unchanged. **AUTO-STAMPED SEPTEMBER 6, 2026.**

Sept 5 FULL WEEKLY refresh (2026-09-05_draft2) — carried forward for context: independently re-verified via WebSearch: the Sept 15, 2:15pm ET cloture-vote schedule was unchanged; no new White House sign-off on the counteroffer; Coinbase CEO Armstrong's public optimism was a single executive's opinion, not new information. **P HELD FLAT at 32/47/58/82/92. COMMITTED BY ALEX September 5, 2026.**

CORRECTION — flagged this cycle: the prior same-day light daily catch-up (2026-09-05_draft) reported "COMMITTED, AUTO-STAMPED SEPTEMBER 5, 2026" in its commit message, but config/scorebook/2026-09-05_draft2.json never actually advanced from "draft" — a bug in that session, not in this pillar's research. The last TRUE committed baseline for this pillar remains **2026-09-02_draft (32/47/58/82/92), auto-stamped Sept 2, 2026**. scores.json — stamping is Alex's call — only flagged here and reflected accurately in this report's status.

Prior cycle (Sept 2 light daily catch-up) — carried forward for context: held flat again — unchanged since Aug 8, through the committed Aug 22 full weekly refresh (2026-08-22_draft2, stamped by Alex Aug 22, 2026). 1 catch-ups. Both binding disputes — the ethics/conflict-of-interest provision (Tillis-Gallego counteroffer, still no White House sign-off since Jul 30/31) and the stablecoin-yield dispute — remain fully unresolved. The 02_draft was originally left as draft only because Iran War Risk's sharp re-rate flipped the master FINAL NUMBER's equal-weight call band, not for any reason in this pillar — **COMMITTED, AUTO-STAMPED SEPTEMBER 2, 2026** — widened the delegated daily auto-stamp policy.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026) and every committed set since (32/47/58/82/92, most recently committed Sept 12, 2026, 2026-09-12_draft, auto-stamped this morning) were all **HELD FLAT** at 32/47/58/82/92 since Aug 8. Today's FULL WEEKLY refresh (2026-09-12_draft2) independently re-confirms the hold but, unlike the daily touches, stays a draft awaiting Alex's own review before it can become the new committed baseline.

Override any P and re-stamp — the master blend recomputes.

What Changed Since Last Check

LIGHT DAILY touch, September 17, 2026 (score set 2026-09-17_draft, committed, auto-stamped) — checking for changes since the 2026-09-16_draft committed baseline. **This pillar HELD FLAT at 15/28/45/72/92.**

- **Re-checked for a new dated development since the Sept 15 cloture-vote failure — found none.** A policy advocate's Sept 16 comment (CoinSpectator/Cointelegraph) that the bill "could be a speculative commentary, already anticipated in the Sept 16 baseline's own note (Sen. Kennedy's remark) — not a new dated fact, does not move P.
- **Score decision: HELD FLAT at 15/28/45/72/92.** No window moved; nothing new cleared the sufficiency bar. AUTO-STAMPED per delegated daily authority.

Carried forward — what changed in the September 16 light daily touch (2026-09-16_draft, committed, auto-stamped), for continuity:

- ★ ★ **NEW — the Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 FAILED, 49–50** — well short of the 60 needed, and support did not even reach 50, a steeper short than expected. Corroborated by 6+ independent outlets (CNBC, CoinDesk live-updates, CryptoTimes, Coinpedia, Bitget, HomeCryptoInvest) plus the Senate's own roll call — clears the sufficiency bar.
- ★ ★ **NEW — named Democrats who were working on the bill voted No**, including Sens. Gillibrand, Warner, Booker, Warnock, Gallego, Alsobrooks and Cortez Masto. Sen. Gallego — the lead Democrat — set flagged as the most likely yes — did not convert, confirming the counteroffer sent Sept 14 was not accepted.
- **Procedural aftermath.** Majority Leader Thune filed a motion to reconsider, a procedural preservation, not a scheduled revote. Sen. Lummis told reporters the bill will *not* return to the floor. Sen. Cruz pushed for a cloture vote, but the structure push likely waits for the lame-duck session; Sen. Cruz called it "a big difference between dead and mostly dead." Senators leave Washington in early October for the midterms (7 weeks before the election. The SEC's "Regulation Crypto Assets" workstream and CFTC spot-market drafting under existing authority remain the live administrative fallback tracks.
- **MARKET PRICE, reported but NOT scored:** Polymarket's "CLARITY Act signed into law in 2026" odds crashed from roughly 35% pre-vote to roughly 5% post-vote (KuCoin, Yahoo Finance, Cointelegraph) — a market-price read only; institutional estimate, but directionally consistent with the re-rate.
- **Score decision: RE-RATED DOWN, 37/53/62/83/92 → 15/28/45/72/92.** Per window: **1mo 37 → 15** — the one near-term floor catalyst this pillar was tracking is now resolved and lost by a wide margin; a quick comeback and the Senate calendar clearing out for the midterms. **3mo 53 → 28** — a lame-duck attempt is a real but uncertain path, so some residual odds survive inside the window, do not move P. **6mo 62 → 45** — a new Congress seated Jan 2027 plus a possible lame-duck bite give more room to recover within six months, so the cut is smaller in relative terms. **1yr 83 → 72** — the concern that the ethics on ethics language are a real foundation carried into any future round, so the one-year read stays comparatively high. **3yr 92, held flat** — a single failed cloture vote does not move the multi-year read.

Carried forward — what changed in the September 15 light daily touch (2026-09-15_draft, committed, auto-stamped), for continuity:

- ★ ★ **NEW — the White House agreed to an ethics package on September 13, 2026** and transmitted the language to Senate Republicans, a senior administration official calling it “the most provision in history.” This is the pillar’s single most-cited blocker, unanswered at the White House since roughly Aug 1–3. Corroborated across independent outlets (CNBC, The Hill, Forbes, c
- ★ ★ **NEW — Lummis, Boozman and Scott posted the FINAL CLARITY text on September 14, 2026, one day before the cloture vote, and it concedes three of the four standing Dem** July draft the ethics division (a) **DROPS the January 20, 2029 sunset** — the July text let the ethics section expire with Trump’s term; (b) **REVERSES the July text’s outright bar on state-a** state AGs standing to sue, which was an explicit Democratic ask; and (c) **raises civil penalties** from “10% of the take or \$500,000, whichever is less” to “20% or \$500,000, whichever is grea president, members of Congress, federal judges *and their spouses* from issuing or sponsoring digital assets for compensation while in office. Corroborated by 6+ independent outlets (The Bl BelnCrypto, CryptoBriefing, The Hill) — clears the sufficiency bar comfortably. Lummis/Boozman/Scott state the draft incorporates 126 substantive Democrat-requested changes (up from the
- **The honest counterweight, same-day and equally well sourced.** The concession does *not* include the Tillis–Gallego divestment/blind-trust ask — preexisting crypto holdings need not be called the provision a “weak fig leaf that will do nothing to stop him from making his next \$1.4 billion in crypto profits” and took it to the floor. Sen. Gallego — the lead Democratic negotiator and Republican text “as it currently stands falls short” on ethics, consumer protection, illicit finance, conflicts of interest and market integrity. And Senate Democrats sent a **counteroffer** to Repub (CoinDesk, Sept 15): negotiation was still live on the eve of the vote.
- **SINGLE-SOURCE, reported but NOT scored:** CoinDesk alone reports the Democratic objection that the new language would still *block state attorneys general from directly suing the U.S.* P inside the concession. Uncorroborated as of this run; under the house sufficiency rule it cannot move a P by itself.
- **MARKET PRICE, reported but NOT scored:** Forbes (Sept 14) cites Polymarket odds on CLARITY roughly doubling to ~**34.5%** on the ethics deal, versus the ~23% Dec-31 read priced Sept institutional estimate, and the two quotes may not share a question basis — house rule, never blended, never used to move P.
- **The whip math itself is unchanged.** Zero Democrats publicly committed; Republicans hold 53 seats and need roughly 7–9 crossovers against likely GOP defections. **The 2:15pm ET clot H.R. 3633 had NOT occurred at run time (this cycle executed 08:01 ET)** — its outcome lands in the next cycle, and it remains a vote on the motion to proceed only, not final passage.
- **Score decision: RE-RATED UP, 32/47/58/82/92 → 37/53/62/83/92.** Per window: **1mo 32 → 37** — the top-cited blocker got real, text-level concessions hours before the vote, but the lead Dem counteroffer was still in flight, so cloture today remains more likely than not to *fail*; the gap narrowed, it did not close. **3mo 47 → 53** — the largest move: a White House that has now demonstra counteroffer, makes a second bite within the quarter materially more plausible even if today’s cloture fails. **6mo 58 → 62** — same logic, decayed. **1yr 82 → 83** — the medium-term read was alr **held flat** — a single negotiation round does not move the multi-year read.

Carried forward — what changed in the September 14 light daily touch (2026-09-14_draft, committed, auto-stamped), for continuity:

- **Sept 14, light daily touch:** Schumer convened a Democratic caucus Sunday Sept 13 to settle the party’s position on CLARITY ahead of the cloture vote (6+ independent outlets), but no public commitments followed, so the whip count was unchanged from Friday. **P HELD FLAT at 32/47/58/82/92 — AUTO-STAMPED SEPTEMBER 14, 2026.**

- **Correction:** the same-day earlier 2026-09-05_draft’s commit message claimed it was auto-stamped, but config/scores.json’s status field was never actually advanced — a bug in that session 2026-09-02_draft. Flagged for Alex, not corrected retroactively.

Carried forward — what changed in the Sept 2 light daily catch-up (2026-09-02_draft), for continuity:

- **Nothing dated Sept 1-2 found beyond the same Sept 15 cloture schedule already priced in.** Score decision: HELD FLAT at 32/47/58/82/92. This shared score set was originally left as **COMMITTED** but was flipped the master call band — and was **COMMITTED, AUTO-STAMPED SEPTEMBER 3, 2026** once Alex widened the delegated daily auto-stamp policy.

Carried forward — what changed in the Aug 29 full weekly refresh (2026-08-29_draft, held flat, left as draft, now superseded), for continuity:

- **AUDIT NOTE — a 2026-08-28_draft daily catch-up cycle sits between this refresh and the Aug 22 commit, abandoned and never delivered.** It was researched (held flat, logged a Pollster poll) but no render/selfcheck/archive/git-commit followed it — treated as not delivered, per the same house discipline this report has applied to the Aug 17, 18, and 20 drafts and the interrupted Sept 1 draft. This report now supersedes it and independently re-verifies everything from scratch against fresh primary sources.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date remains the only scheduled floor action,** reconfirmed by DeFiRate.com (Aug 27) and by Motley Fool/CryptoSlate.com (Aug 28). A schedule change found anywhere Aug 22-29.
- ★ **★ NEW, CONFIRMED — CFTC Chair Michael Selig, in an on-record speech at the Innovation Advisory Committee's inaugural meeting,** directed CFTC staff to explore a fallback crypto custody rule if the CFTC's existing authorities if CLARITY continues to stall. Adversarially verified directly against cftc.gov (PressRoom/SpeechesTestimony/opaselig10) — dated **August 20, 2026** (some sources have a next-day pickup; cftc.gov used as primary). The CFTC's analog to SEC Chair Atkins' already-logged Jul 29 statement — logged as context, not used to move P.
- **Both binding disputes remain fully unresolved as of today:** the ethics/conflict-of-interest provision (Tillis-Gallego counter-proposal — no White House sign-off or released text found) and the stablecoin yield provision (no new dated development found).
- **Prediction markets, two independent pulls this cycle:** DeFiRate.com (Aug 27) cites Polymarket 13-14% and Kalshi 20-21%; a live Aug 28 Polymarket pull separately showed 14%. Consistent with market prices alone, without a corroborating news event, don't clear the sufficiency bar to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — a "Sen. Tim Scott: 12-18 Democrats open to voting for CLARITY" quote** surfaced in this cycle's search and traced to an **August 18, 2026** CoinDesk/Politico Pro story — a likely search-engine year-confusion artifact, named here as a caution for readers, not used as evidence.
- **congress.gov and dailypress.senate.gov both returned HTTP 403 to direct fetch attempts this cycle** — primary-source confirmation relied on 7+ independent secondary outlets instead.
- **Context only, not new:** the Senate's Aug 8 stopgap funding bill (Collins-Murray deal) funds the government through Dec 11, 2026 — modestly reduces shutdown-fight risk to September floor vote.
- **Score decision: held flat at 32/47/58/82/92 across all five windows.** Nothing found this cycle clears the sufficiency bar (primary source or 2+ independents) for a move in either direction — no call band flipped. **Left as draft, NOT auto-stamped:** this is a FULL WEEKLY refresh, categorically excluded from the runbook's delegated daily auto-stamp authority regardless of how small (here, zero) the moves are. This cycle is **2026-08-29_draft**, AWAITING ALEX'S MANUAL REVIEW; the last committed baseline remains 2026-08-22_draft2 (32/47/58/82/92, stamped by Alex Aug 23, 2026).

Carried forward — what changed in the Aug 22 full weekly refresh (2026-08-22_draft2), for continuity:

- **This morning's Aug 22 catch-up draft (d1) was fully delivered** — rendered, selfchecked, archived, and git-committed — but stayed uncommitted (owner-stamp sense) after a fact-check trip to the Iran War Risk pillar report, which held the whole score set for manual review. This is a separate, later cycle: a full weekly refresh that independently re-confirms d1's findings against fresh primary sources. A dated set, 2026-08-22_draft2, per the runbook's same-day-after-delivery rule.
- ★ **★ NEW — the Sept 15, 2:15pm ET cloture-on-motion-to-proceed date reconfirmed via 7+ outlets** (The Block, Bitcoin.com, Troutman Financial Services, CCN, Disruption Banking, news.bitcoin.com, Qz, and news.bitcoin.com) — Aug 21, independently adversarially re-verified this cycle — no schedule change found; still a motion-to-proceed vote only, not final passage.
- ★ **★ NEW — Sen. Ruben Gallego, on the record at the Aug 19 SALT Wyoming Blockchain Symposium** (crypto.news, Cointelegraph, FXStreet, Blockonomi), confirmed the White House held the Tillis-Gallego ethics counter-proposal — responses "blank, weaker than before, or not at all" — and warned against rushing the Sept 15 vote. Confirms the deadlock persists, not new developments found.
- ★ **★ NEW — WH crypto adviser Patrick Witt (Aug 19)** said the administration is "fully committed" to September passage and will keep negotiating with Democrats, while publicly blaming Sen. Tillis (Cointelegraph, Yahoo Finance, crypto-economy.com, CryptoTimes, crypto.news, CryptoSlate, Cryptopolitan) — combative messaging, not a concession, not used to move P.
- **No stablecoin-yield-provision developments found this window** — still an open blocker, status quo.
- **Prediction markets, this cycle's fresh pull:** Polymarket "signed in 2026" ~19.5% as of ~Aug 21 (CCN: volatile, dipping to ~15.5% before recovering slightly), Kalshi "60 votes" ~22% (Aug 21) — highs but roughly consistent with, not below, the range already carried; market prices, not used to move P.
- ★ **★ NEW, FLAGGED AND EXPLICITLY NOT USED — an unverified, non-journalistic X post** (@iotex_io) circulating ~Aug 20-21 claimed the ethics provision is "officially solved" — single-source claim contradicted by Gallego's own on-record Aug 19 statement (4+ outlets). Named explicitly so it isn't mistaken for a scored fact.
- ★ **★ NEW, FLAGGED NOT SCORED — Coinbase CEO Armstrong's Aug 21 "pretty optimistic" remarks on 60 votes** (Motley Fool/Fool.com) are single-source opinion from an interested party, not a sufficiency rule, and its tone runs counter to Gallego's account.
- **Zero confirmed Democratic yes votes on cloture** — Republicans hold 53 of 60 votes needed, unchanged.
- **Score re-rates (Aug 22 d1 → Aug 22 d2):** 1-month 32 → **32** (held) · 3-month 47 → **47** (held) · 6-month 58 → **58** (held) · 1-year 82 → **82** (held) · 3-year 92 → **92** (held) — nothing found this cycle moves a window. **Left as draft at delivery:** no window moved and no call band flipped for CLARITY, and this cycle's own evidence was clean — but a FULL WEEKLY refresh is categorically excluded from the delegated daily auto-stamp authority regardless of how small (here, zero) the moves are, independent of the separate Iran War Risk issue that held the earlier same-day d1 draft. **COMMITTED BY ALEX AUG 23, 2026**
