# The CLARITY Act Pillar Report

The Crypto Rules Bill — Researched, Scored, and Personally Committed

*Originally written **June 5, 2026**; scores committed by me on **June 12, 2026**. Fully re-researched **July 8, 13, 18, 25, and 30, 2026**, and again as a full weekly refresh on **August 8, 2026**. Drafts were written **August 17** and **August 18** but neither was delivered — no render/selfcheck/archive/commit followed either day — and no cycle ran **August 19**. **This version (August 20) independently re-verifies both undelivered drafts' claims against fresh primary sources and HOLDS FLAT at 32/47/58/82/92**, unchanged since Aug 8. Sen. Ruben Gallego's Aug 20 remarks at the SALT Wyoming Blockchain Symposium reaffirm the existing White House-ethics stalemate rather than deepen it, and Sen. Tim Scott's Aug 18 comment that the stablecoin-yield fight has resurfaced is a single dated quote, not sufficient on its own to move a window. **This version's scores are left as a DRAFT, awaiting Alex's manual review** — not because CLARITY's own evidence moved, but because this cycle's Iran War Risk pillar surfaced a genuinely novel escalation (Iran reportedly struck the UAE with missiles for the first time; the UAE suspended economic ties with Iran) that the standing daily auto-stamp delegation isn't meant to wave through automatically; see My Decision below.*

## COINPICKS PILLAR REPORT · WEIGHT: 25% OF MY THESIS

Written June 5, 2026 · Updated & Re-verified August 20, 2026 (light daily touch off the Aug 16 baseline — DRAFT, awaiting Alex's manual review) · Not Financial Advice

## The Scores — Committed vs. Drafts

June column committed by me June 12, 2026. Every draft since is shown for full lineage — nothing collapses until I commit a newer set. Aug 8 (full weekly refresh, 3mo confirmed unchanged) committed and stamped by Alex. Aug 9-16 are light daily touches — all held flat, all auto-stamped (no cycle ran Aug 15). Aug 17 and Aug 18 drafts were written but never delivered (no render/selfcheck/archive/commit followed); no cycle ran Aug 19. Aug 20 holds flat again, independently re-verified, and is left as a draft awaiting Alex's manual review (see My Decision).

**Current draft P (Aug 20):** 32 / 47 / 58 / 82 / 92 · **Weight:** 20% (equal) · **Impact:** 8 (uniform) · **Formula:** Signal = ((P - 50) ÷ 50) × Quality × Impact. Full lineage: June committed 55/60/65/85/92 (Jun 12) → ... (see prior versions of this report for the full Jul 8-Aug 7 path) → Aug 8 32/47/58/82/92 (3mo up — Thune files cloture, locking in a Sept 15-16 procedural vote; committed and stamped by Alex) → Aug 9-16 32/47/58/82/92 (held flat, auto-stamped daily) → Aug 17 draft 32/47/58/82/92 (written, never delivered) → Aug 18 draft 32/47/58/82/92 (written, never delivered) → **Aug 20 32/47/58/82/92** (held flat, independently re-verified) — left as a draft, awaiting Alex's manual review (driven by the Iran War Risk pillar's findings this cycle, not by any CLARITY-specific evidence).

### THE THREE INPUTS, IN PLAIN ENGLISH

**P** — the odds this is *good for crypto* by then. Held flat this cycle at 32/47/58/82/92 — unchanged since Aug 8, across two undelivered drafts (Aug 17, Aug 18) and today's independent re-verification of both. The Sept 15, 2:15pm ET cloture vote remains the only scheduled date, re-confirmed by The Block and Troutman Financial Services Blog through this window with no date change found. Sen. Ruben Gallego, speaking at the SALT Wyoming Blockchain Symposium on Aug 20, said White House responses to the Tillis-Gallego ethics counter-proposal "have come back blank, weaker than before, or not at all," and separately warned against rushing a floor vote — multi-sourced (Blockonomi/Cointelegraph, FXStreet, Crypto-Economy), but a reaffirmation of the existing stalemate, not a fresh deterioration, so it isn't used to move P. Senate Banking Chair Tim Scott said (The Block, Aug 18) the stablecoin-yield provision "we thought was all settled" has resurfaced as a live dispute — a modest new wrinkle, but a single dated primary quote isn't sufficient on its own to move P under the sufficiency rule. The move stays flat because Republicans still hold only 53 of the 60 votes needed and roughly zero Democrats are confirmed as yes votes. The actual live blocker, unchanged since Aug 8: a *toughened* Democratic ethics counter-proposal has sat unanswered at the White House since roughly Aug 1-3. Long-term still high — even the bears argue "slips past the midterms," not "dies."

**Quality** — how trustworthy the evidence is. Unchanged this cycle per house rules.

**Impact** — 8 out of 10, the uniform value every pillar now shares in the equal-weight model. This bill writes the rules for the entire market.

## The Claim

*The thesis as of August 20, 2026, and where I differ from the consensus — flat since Aug 8, through two undelivered drafts and today's independently re-verified touch, nothing structural moved*

**The crowd:** is reading Sen. Gallego's Aug 20 SALT Wyoming remarks — blunt language about White House responses coming back "blank, weaker than before, or not at all" — as fresh bad news. But by his own account this describes the same stalemate that's persisted since roughly Aug 1-3, said more candidly in public, not a new deterioration; his separate warning against rushing a floor vote cuts toward caution, not collapse.

**Me:** holding at 32/47/58/82/92 unchanged since Aug 8 — including through two drafts (Aug 17, Aug 18) that were written but never delivered, and today's independent re-verification of both against fresh primary sources. Republicans still hold only 53 of 60 needed, and the real blocker (the unanswered Democratic ethics counter-proposal) hasn't moved. Tim Scott's Aug 18 comment that the stablecoin-yield fight has resurfaced is worth logging, but it's a single dated quote — not, by itself, enough to move a window.

**My edge:** unchanged since June — the crowd keeps pricing a *timing* problem like a *death* problem. The House did its half a year ago (294-134). A formally filed, precisely-dated cloture vote is a Senate actually moving a bill rather than sitting on it. I'm not moving any window today because nothing about the structural math (still 7 Democratic votes short) changed — and Polymarket's bounce from ~16% to ~24% this week, on no identified news catalyst, is exactly the kind of noise I don't chase.

## The Facts

*As of August 20, 2026, light daily touch — hard numbers only, sources on the last page. New facts from the Aug 16-20 window appear first; earlier facts are carried forward unchanged (still load-bearing) below.*

- ★ ★ **NEW — Sen. Ruben Gallego, speaking at the SALT Wyoming Blockchain Symposium on Aug 20**, said White House responses to the Tillis-Gallego ethics counter-proposal "have come back blank, weaker than before, or not at all," and separately warned against rushing a floor vote. Multi-sourced same-speech coverage (Blockonomi/Cointelegraph, FXStreet, Crypto-Economy, all Aug 20). This reaffirms the existing stalemate rather than deepening it — not used to move P.
- ★ ★ **NEW — Senate Banking Chair Tim Scott said (The Block, Aug 18) the stablecoin-yield provision "we thought was all settled" has resurfaced as a live dispute**, amid community-bank lobbying against stablecoin yield eroding GOP support. A modest new wrinkle — single dated primary quote, not by itself sufficient to move P under the sufficiency rule.
- **White House digital-assets adviser Patrick Witt called himself "truly optimistic and bullish" on passage** (The Block, Aug 18) despite the stablecoin friction — rhetoric only, no new whip count given.
- **Polymarket "signed in 2026" (a market price, not an institutional estimate) bounced from ~16% (around Aug 14-15) to ~24% (Aug 20 live pull)** on no identified news catalyst — treat as noisy, not a confirmed signal; not used to move P.
- ★ ★ **FLAGGED FOR THE RECORD, not scored:** Galaxy Research appears to have cut its 2026-passage estimate further to 10% (from the 30% already reflected in this report's history) around Aug 14-15. This predates the Aug 16-20 window being researched now and looks like a gap in an earlier research cycle rather than new information — flagging for Alex's attention, not treating as a driver of today's score.
- **No change found to the confirmed Democratic yes-vote count** (still zero) or to any primary-source Senate floor action.
- **The Sept 15, 2:15pm ET cloture vote on the motion to proceed to H.R. 3633 remains unchanged** — re-confirmed by The Block and Troutman Financial Services Blog through this window; no date change found.

*Carried forward from the August 16 light daily touch (still load-bearing; independently re-verified, not contradicted, this cycle):*

- ★ ★ **NEW — the SEC cancelled its Aug 14 "Regulation Crypto" open-meeting vote the day before it was scheduled**, citing an "unforeseen scheduling issue" (crypto.news, TechTimes, Genfinity). The ~400-page proposal would have created token-offering exemption pathways under a separate SEC rulemaking track — relevant context on regulatory limbo across both branches, but not a CLARITY-specific trigger; not used to move P.
- **The Senate remains in August recess; no new floor-schedule or ethics-text development found (as of Aug 16).** Re-checked Bitcoin Foundation, Troutman Financial Services, CoinDesk — all confirm the Sept 15 cloture date as the only scheduled action (Senate returns Sept 14, three weeks to work the bill), with no new reporting on the Tillis-Gallego ethics counteroffer or White House sign-off.
- **The Sept 15, 2:15pm ET cloture date remains widely corroborated** — no change from Aug 14.
- **New detail on remaining disputes:** illicit-finance provisions and reconciling the Senate Agriculture Committee's text are named as two additional sticking points ahead of the vote (PYMNTS) — consistent with, not exceeding, the "multiple unresolved fights" picture already carried.
- **CONFIRMED (Aug 8): Thune filed cloture on the motion to proceed to H.R. 3633.** Confirmed against 5 independent outlets (CoinGape, CryptoBriefing, CoinDesk, Cointelegraph, CryptoSlate) plus partial primary corroboration via the bill's own congress.gov calendar text (Calendar No. 423).
- **The real live blocker remains a toughened Democratic ethics counter-proposal, unanswered at the White House since roughly Aug 1-3** (crypto.news, "CLARITY Act stalls as Trump stays silent on ethics deal," Aug 3; corroborated by Coindesk's Jul 29 report that senators were negotiating a stronger version of the original concession).
- **Zero confirmed Democratic yes votes on cloture** as of Aug 16, against a need for roughly 7-10 crossover votes to reach 60; Republicans hold 53.
- **Polymarket "signed in 2026" (market odds, not an institutional estimate) remains around the mid-teens** per the conflicting cached reads (13-21%) noted Aug 14 — not re-verified as of Aug 16, still well below the Jul 21 local peak of 43%. Treat the exact figure as noisy; the directional read (still depressed vs. earlier in the year) is the reliable part.

*Carried forward from the July 30 full refresh (still load-bearing):*

- ★ ★ **PRIMARY-SOURCE CONFIRMATION — CLARITY was not on the Senate floor calendar Jul 28-29.** A direct pull of the Senate's own daily floor schedule (dailypress.senate.gov) shows Jul 28's time went to a memorial ceremony for the late Sen. Lindsey Graham plus an executive-calendar nominee vote, and Jul 29 went to the motion to proceed on the Russia/Iran sanctions bill (which passed 86-12). This is a harder, primary-source confirmation of "no floor time" than any leadership quote — and confirms no path to passage before the Aug 7 recess.
- ★ **Tillis-Gallego ethics counteroffer reported — real, but not finalized.** CoinDesk (tier-1) and 4+ corroborating outlets report Sens. Tillis (R-NC) and Gallego (D-AZ) struck new common ground on an ethics compromise (Jul 29-30). The exact text is undisclosed and White House sign-off is unconfirmed — CoinDesk's own reporting hedges "whether they've actually done it is unclear," and neither senator's office nor the White House responded to comment requests. Treat as real movement, not a completed deal.
- ★ **NEW — a second ethics-adjacent fight surfaced and was rejected by both sides.** A proposal to give prosecutors enforcement leeway over software-developer liability was floated and then rejected Jul 30 by both the White House (adviser Patrick Witt mocking the comparison) and the crypto industry (DeFi Education Fund's Amanda Tuminelli: "not a constructive or serious proposal"). A fresh friction point, not yet resolved.
- ★ **NEW — SEC Chair Atkins says the SEC can write crypto rules unilaterally if Congress stalls.** Atkins told CNBC (Jul 29, corroborated by 5+ outlets) the SEC is "ready, willing, and able" to issue crypto market-structure rules on its own, while still calling statute the preferred, "future-proof" path. A modest reducer of legislative urgency — noted, not scored.

- **Odds board (*sentiment only*) — as independently re-verified July 30:** Polymarket's "signed in 2026" contract hit a record low of 27% (Jul 29) before recovering to 30% (my own live pull, Jul 30) — down from the ~35% read a week ago. Galaxy Research's Alex Thorn cut his personal 2026-passages estimate from 50% to 30% — confirmed real and well-corroborated, but dated to Jul 24-25, not this week; not double-counted here.
- **Vote math — carried forward, unchanged:** GOP floor count remains ~53; still only Gallego and Alsobrooks on record as Democratic negotiators, both conditioning votes on enforceable ethics language. Firmly committed Democratic votes: zero.
- **Sen. Graham's death and the Senate's memorial calendar** continue to consume floor time this week — a genuine, primary-source-confirmed scheduling drag, distinct from any "thinned floor math" inference (which was already corrected in an earlier cycle: his SC seat was refilled within 48 hours, GOP floor count restored to ~53).
- **Ethics talks were broken as recently as Jul 22** (seven Senate Democrats formally rejected the GOP's DOJ-enforcement draft that day) but the Tillis-Gallego report suggests movement since — carried forward as the binding constraint, now potentially loosening.
- **The June 30 ethics bomb, still the root cause:** OGE released Trump's 927-page disclosure on **June 30: ~\$1.4B of 2025 crypto income** — \$635M in TRUMP-memecoin royalties, \$500M+ WLFI-related. Gillibrand: "*there is no CLARITY Act without an ethics provision.*"
- **Section 604 / Wyden's developer-protection push — carried forward, corroborated by 9+ independent outlets.** No committed Democratic floor vote attached to it yet.
- **The stablecoin-yield fight — carried forward, still closed off rather than resolved:** Banking Chairman Tim Scott rejected bank lobbyists' request to change yield-related restrictions on the floor; Coinbase's ~\$1.35B/yr USDC-rewards structure survives in the text as-is.
- **Still true from June, still load-bearing:** the House passed H.R. 3633 **294-134 on July 17, 2025** (bipartisan); Senate Banking advanced its separate substitute **15-9 on May 14, 2026**. House fast-follow plan (companion bill, Rep. Dusty Johnson) unchanged.

## The Prize

*Illustrative only — not price targets, not advice*

Anchor: BTC **\$71,882.92** (Bitstamp daily close, August 20, 2026) — up sharply from \$62,937.03 on Aug 16 (+14.2%). A **GENIUS-sized move (~40–47%)** from here ≈ **~\$101–106K**. A retest of the ~\$125K high ≈ **+74%**. The anchor is real: during the GENIUS Act's passage (Senate committee Mar 13 → signed July 18, 2025) Bitcoin ran from ~\$83K to ~\$120K (≈+44%).

Discount both — 2025 had tailwinds 2026 doesn't, and **the GENIUS rally itself fully retraced**. And note the coil cuts both ways: prediction-market odds bottomed at a fresh record low of 13% on Aug 5, bounced to a noisy 20-27% on the cloture filing, slid to a reported ~15.5% by Aug 10-13, and have since bounced again to ~24% (Aug 20 live pull) on no identified news catalyst — still a real repricing from the ~74-82% readings earlier in 2026, but choppy enough week to week that I'm not reading direction into it. The cloture filing is a dated procedural step, not evidence the underlying passage odds have durably moved; the odds swings are sentiment, not yet a scored fact. The Prize doesn't feed the math — it tells you what the lean is worth acting on, and this week's +14% BTC move against a completely flat CLARITY score is itself a reminder that this pillar's signal and price action aren't the same thing.

## The Other Side

*The strongest honest case this is wrong*

- **The Tillis-Gallego "breakthrough" isn't confirmed by either side.** No text is public, the White House hasn't signed off, and CoinDesk's own reporting hedges on whether the senators have actually reached an agreement. This report is giving real weight (an 8-point 6mo improvement from the Jul 18 low) to something that could evaporate as easily as the Jul 20-22 ethics deal did when seven Democrats rejected it.
- **A second unresolved fight just opened up.** The developer/software-liability dispute, rejected by both the White House and industry Jul 30, shows that even as one axis of the ethics fight narrows, new disputes keep appearing — a pattern, not a one-off.
- **A cloture filing with no Democratic votes lined up may just be political theater.** Punchbowl's own sourcing says Democrats consider this vote "doomed" — if Thune is filing cloture knowing it will fail, the point may be to put Democrats on the record before the midterms rather than to actually advance the bill, which would make today's "progress" more symbolic than substantive.
- **The floor-calendar problem doesn't have an end date either.** "No path before recess" was confirmed by Thune himself, but this report's own history is repeated rounds of missed "imminent" and "targeted" dates — nothing guarantees the actual Sept 15-16 vote produces real movement rather than another procedural loss, and September is also when midterm-campaign politics starts eating floor time.
- **Prediction markets are genuinely more bearish than a month ago.** A record-low 27% print, even if it partially recovered, is real information — Galaxy Research's own house view dropped from 50% to 30% independent of any single news event, suggesting professional handicappers see this as a genuine coin-toss-or-worse on 2026 passage.
- **The SEC's "we'll do it ourselves" signal cuts against urgency.** If the White House and industry believe the SEC can deliver workable rules unilaterally, that reduces the political cost of letting CLARITY slip further — a slow bleed on legislative priority, not a dramatic kill.
- **The midterms are still the real wall:** miss August 7 and September belongs to election politics. Worst case — Congress resets in January and the Senate starts its bill over.

## The Triggers

**The flip line:** cloture fails on Sept 15-16 with no released, WH-confirmed ethics text and no clear next-step plan = start treating 2026 passage as effectively dead, not just delayed. Keep 1-year and 3-year Bull either way — a bill with 294 House votes, a reported bipartisan ethics counteroffer, and a formally filed cloture motion is delayed, not dead.

## My Decision

### 🕒 DRAFT — AUGUST 20, 2026 (LIGHT DAILY TOUCH) · AWAITING MY STAMP

#### **Draft P: 32 / 47 / 58 / 82 / 92 (holds flat) · Weight: 20% (equal) · Impact: 8 (uniform)**

Held flat again today — unchanged since Aug 8, across two undelivered drafts (Aug 17, Aug 18, neither followed by a report/render/archive/commit) and today's independent re-verification of both against fresh primary sources. The Sept 15, 2:15pm ET cloture date is unchanged, re-confirmed by The Block and Troutman Financial Services Blog. Sen. Gallego's Aug 20 SALT Wyoming remarks reaffirm the existing White House-ethics stalemate rather than deepen it, and Sen. Tim Scott's Aug 18 comment that the stablecoin-yield fight has resurfaced is a single dated quote, not sufficient on its own to move a window. The real live blocker, unchanged since Aug 8, is a toughened Democratic ethics counter-proposal sitting unanswered at the White House since roughly Aug 1-3.

#### **CLARITY's own evidence this cycle is routine — nothing here would have blocked an auto-stamp on its own.**

But the Aug 20 score set bundles four qualitative pillars together, and this cycle's Iran War Risk research surfaced a genuinely novel escalation: Iran reportedly struck the UAE with missiles for the first time, and the UAE has suspended economic ties with Iran. That doesn't cleanly fit the routine, well-evidenced daily-move pattern Alex's standing auto-stamp delegation (in effect since 2026-08-06) is meant to cover — per the runbook, a genuinely novel or ambiguous situation defaults to draft even when no individual window moved more than 8 points and no call band flipped. So the entire 2026-08-20\_draft set, including this unchanged CLARITY score, is left as a draft awaiting Alex's manual review rather than being auto-stamped.

The June committed scores (**55 / 60 / 65 / 85 / 92**, committed June 12, 2026) and the Aug 16 committed scores (**32 / 47 / 58 / 82 / 92**) remain the prior human/auto-stamped values, identical to today's draft.

**Override any P and re-stamp — the master blend recomputes.**

## What Changed Since Last Check

*Light daily touch, August 20, 2026 — checking for changes since the Aug 16 touch, spanning two undelivered drafts (Aug 17, Aug 18; no cycle ran Aug 19).*

- **Aug 17 and Aug 18 drafts were written but never delivered** — no report/render/selfcheck/archive/commit followed either day. This Aug 20 cycle independently re-verifies both drafts' underlying claims against fresh primary sources rather than treating them as ground truth, and lands as a new dated set (2026-08-20\_draft) per the runbook's new-day rule, rather than editing either stale draft in place. No cycle ran Aug 19.
- ★ **★ NEW — Sen. Gallego's Aug 20 SALT Wyoming remarks** describe WH ethics responses as "blank, weaker than before, or not at all" and warn against rushing a floor vote — reaffirms, doesn't deepen, the existing stalemate.
- ★ **★ NEW — Sen. Tim Scott's Aug 18 comment (The Block)** that the stablecoin-yield provision has resurfaced as a live dispute — a modest new wrinkle, logged not scored (single-source, sufficiency rule).
- **Polymarket "signed in 2026" bounced from ~16% (Aug 14-15) to ~24% (Aug 20)** on no identified catalyst — noise, not used to move P.
- **Flagged for Alex:** Galaxy Research appears to have cut its 2026-passage estimate to 10% around Aug 14-15 — predates this window and looks like a gap in an earlier cycle, not new information; not used to move today's P.
- **The Sept 15, 2:15pm ET cloture date remains unchanged** — re-confirmed by The Block and Troutman Financial Services Blog.
- **Zero confirmed Democratic yes votes on cloture** — Republicans hold 53 of 60 votes needed, unchanged.

- **Score re-rates (Aug 16 → Aug 20):** 1-month 32 → **32** (held) · 3-month 47 → **47** (held) · 6-month 58 → **58** (held) · 1-year 82 → **82** (held) · 3-year 92 → **92** (held) — nothing found today exceeds the Aug 16 baseline. **Left as a draft, not auto-stamped** — the overall Aug 20 score set is held for Alex's manual review because of a novel escalation surfaced in the Iran War Risk pillar this cycle (Iran reportedly struck the UAE for the first time; UAE suspended economic ties with Iran), not because of anything in CLARITY's own evidence.

- **August 20 light daily check:** Blockonomi/Cointelegraph, FXStreet, and Crypto-Economy (all Aug 20) — independent same-speech coverage of Sen. Ruben Gallego's remarks at the SALT Wyoming Blockchain Symposium, describing White House ethics responses as "blank, weaker than before, or not at all" and warning against rushing a floor vote · The Block — Senate Banking Chair Tim Scott's stablecoin-yield comment and White House adviser Patrick Witt's "truly optimistic and bullish" remark (both Aug 18) · Polymarket — "signed in 2026" live pull, ~24% (Aug 20) · The Block and Troutman Financial Services Blog — re-confirmation of the Sept 15, 2:15pm ET cloture date, no change found. This cycle independently re-verifies the underlying claims behind the undelivered Aug 17 and Aug 18 drafts against these fresh primary/reporting sources rather than treating the drafts themselves as ground truth.
